Herkomer, Hubert, R.A., was b. 1849 at Waal, in Bavaria. At an early age he settled with his parents first in America and subsequently in England. Joined the Institute of Painters in Water Colours ('71), and to the gallery of this Society and to the Grosvenor and Academy exhibitions he contributed many drawings, chiefly of Bavarian subjects. His oil picture, "After the Toil of Day," in the Academy exhibition of '73, extended his reputation, and prepared the way for his "**Last Muster**," the memorable picture of the Chelsea pensioners ('75). He was ('79) elected an A.R.A. He personally directs the well-known **Art School at Bushey**, of which he is the founder, and in connection with which a new theatre was opened in '88 with the performance of a romantic fragment entitled "**The Sorceress**," composed by Professor H. himself. He has since prepared for the same theatre a musical and pictorial play illustrative of "Scenes in y^e Olden Time." The honour of **Royal Academician** was conferred, amid general congratulations, in '90 on Mr. H.

Herschell, Farrer, P.C., 1st Lord (created 1880), was b. in '37, and educated at Univ. Coll., London, and at the Univ. of Bonn. Called to the bar '60, and became Q.C. '72; bancher of Lincoln's Inn the same year; Recorder of Carlisle '73. Represented Durham City in the Liberal interest '74-85. Solicitor-General in Mr. Gladstone's ministry ('80), and received the honour of knighthood. In '86 was raised to the peerage, and became **Lord Chancellor**. Took part in the **Round Table Conference**, which was called in order to discover, if possible, a *modus vivendi* for the Liberal party with regard to the **Irish question**. The first meeting of this Conference took place at Lord H.'s house. On the appointment of a **Royal Commission** to inquire into the working of the **Metropolitan Board of Works**, the selection of Lord H. to act as President was unanimously approved. Towards the end of '88 Lord H. visited India. Lord H. delivered a powerful speech on the **Parnell Commission** in the House of Lords.

Herts, County Council for. See COUNTY COUNCILS.

Hervey Archipelago, or Cook's Islands. In the South Pacific, between the Friendly Islands and the Society Islands. Discovered by Captain Cook in 1777, and in 1823 became the scene of the missionary labours of John Williams (of Raratonga). Annexed to Britain, '88. See BRITISH EMPIRE (table).

Hesse. See DIPLOMATIC.

Hicks-Beach, Right Hon. Sir Michael Edward, P.C., M.P., D.C.L., was b. 1837. Ed. at Eton and Christ Church, Oxford. Is a J.P. and D.L. for Gloucestershire. Sat as Conservative M.P. for E. Gloucestershire ('64-85); W. Bristol ('85). Has held the following official appointments: Parliamentary Secretary to Poor Law Board (Mar. to Aug. '68); Under-Secretary for Home Office (Aug. to Dec. '68); Chief Secretary for Ireland ('74-8 and '86-7); Secretary of State for Colonies ('78-80); Chancellor of the Exchequer and Leader of the House of Commons in the first Salisbury administration. On his lordship's return to power in '86 Sir M. resumed the Chief Secretaryship for Ireland, but after a few months resigned, owing to failing eyesight. After travelling for some time on the Continent he returned to his Parliamentary duties, and re-entered the cabinet as **President of the Board of Trade** in Feb. '88. In the session of '89 he introduced the bill for regulating railway rates and charges. On Oct. 23th, '91, Sir M. alluded at Stockton to the question of the leadership of the House, and said: "I neither expect nor desire that the office should be conferred upon me."

High Church. See CHURCH OF ENGLAND.

Higher Education of Women. The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in '68. The National Union for Improving the Education of Women, formed under the presidency of the Princess Louise, in consequence of that report, founded in '72 the Girls' Public Day School Company, which, with the Church Day Schools Company, has raised the standard of girls' education throughout the land, and prepared the way for the Higher—that is, University and College—Education of Women. These two Companies have now 59 schools and 8711 pupils, and are entirely taught and officered by women, many of whom have had a college training. The National Union also founded, in '77, the Teachers' Training and Registration Society, out of which has grown the Maria Grey Training College, 5, Fitzroy Street (Principal, Miss Ward), and, indirectly, the Cambridge Teachers' Training College (Principal, Miss Woods), and the Edinburgh Teachers' Training Association, St. George's Hall, Randolph Place. Oxford and Cambridge now offer many facilities to women desiring advanced education. At Cambridge the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, history, medieval and modern languages, law, Semitic languages, Indian languages and theology are, since '81, open to women. The conditions of entrance are (1) the having resided for a specified number of terms (five to thirteen, according to circumstances) either at Girton or Newnham College, or within the precincts of the University, under the regulation of one or other of these colleges;

(2) the having passed either (a) certain parts of the higher local examination, or (b) the University previous examination ("Little Go"), or any examination which ordinarily excuses a member of the University from this. To all women who pass any one or more of these triposes, certificates are formally granted by the University, declaring that they have attained the standard of a first, second, or third class in an honours examination for the B.A. degree; but this degree, for various reasons, is not conferred upon them. Candidates who attain a standard equivalent to that required for the ordinary B.A. (or "Poll") degree, have a certificate to this effect conferred upon them. **Girton College** (Mistress, Miss Welsh) was founded at Hitchin in '70, removed to Cambridge in connection with the Association for Women's Lectures in Cambridge, and incorporated in '72. It now numbers about 106 students, with five resident women lecturers, a vice-mistress, and a junior bursar. Entrance and scholarship examinations are held in Cambridge and London (also at Edinburgh, Clifton, Leeds, and other centres if necessary) in the months of March and June. They consist of compulsory English subjects, with arithmetic and optional subjects—Latin, Greek, modern languages, and mathematics. Certain other examinations (fifteen in number) may be substituted for the entrance examination. Students can attend University lectures in Cambridge, in addition to those provided by the college. The college fees (inclusive) are £105 per annum. Arrangements are made for loans to students when necessary, and they are allowed to reside at the college, for purposes of study, during the long vacation, on payment of certain charges. The South Hall, **Newnham College**, Cambridge, was opened in '75 (Principal, Miss Clough). The North Hall (Vice-Principal, Miss Gladstone) followed in '80, and Clough Hall in '83; 149 students and 10 resident tutors form the collegiate body. An entrance examination is held annually at Cambridge in mathematics and languages. Scholarships and exhibitions are awarded yearly to students for the various tripos examinations. No student, unless reading for a tripos examination, with a reasonable prospect of obtaining honours, is allowed to reside at the college for more than two years without special permission. Women are admitted by the Council as out-students of the college if they either (a) reside with their parents or guardians in Cambridge, or (b) are not generally resident in Cambridge, but are *bona fide* students, pursuing definite study, over thirty years of age, unable to afford the cost of residence in one of the halls, or in other exceptional circumstances, and accustomed to support themselves. They have the right to read in the library, and to dine in college once a week. A system of lectures and examinations in theory, practice, and history of teaching was established in Cambridge in '80, and is specially intended for women students of the University who wish to become teachers. A scheme of correspondence teaching was inaugurated in '70 by Mrs. Peile, and numbers students in all parts of the world. In Oxford the principal final honour examinations of the University (in classics, natural science, history, mathematics, and jurisprudence) are open to women, who, during the examination sit in, the same room, and do the same papers as the men. In certain subjects (as English and modern languages), where no final honour

examination for the B.A. degree is provided by the University, special women's honour examinations are held, with a standard equivalent to that of the University honour degree examinations. A pass examination in two languages and one other subject (history, science, logic, and political economy, or mathematics) can be taken by those not wishing to read for honours. Before a candidate can enter for either pass or honours, the first examination for women at Oxford must be taken, unless some equivalent (as responses, the higher examination of the Oxford and Cambridge board, the London matriculation, the Victoria University entrance examination, the Cambridge higher local in two languages of group B and group C, or the Oxford senior local in two languages, and mathematics) has been passed. Certificates are awarded as the result of the examinations, and in the case of honours the names are entered in the *University Gazette*; but the B.A. degree is not conferred upon women. Nearly all the colleges in Oxford open their lectures to women, and most of the college tutors give private instruction to women students. Lectures and classes for those reading for an honour examination not provided by the University (English and modern languages) are arranged by the Association for the Education of Women in Oxford. **Somerville Hall**, Oxford (Principal, Miss Maitland), founded in '79, has 48 students and 2 resident tutors. There is no entrance examination, but all students are expected to pass the first Oxford examination, either before entering the hall or on the first opportunity afterwards, unless they have passed one of the examinations accepted as equivalent. Satisfactory references are required in every case. Scholarships are competed for at the hall in the spring of each year. The hall is undenominational in principle. Its buildings include a gymnasium, and a boat is kept on the Cherwell for the use of students. **Lady Margaret Hall**, Oxford (Principal, Miss Wordsworth), was also founded in '79. It is conducted on the principles of the Church of England, with provision for the liberty of members of other religious bodies, and numbers about 36 students and 2 resident tutors. Candidates for entrance, who have not yet passed the Oxford first examination, or an equivalent, are expected to pass an entrance examination in two foreign languages and elementary mathematics. Scholarships are offered each October. **S. Hugh's Hall**, Oxford (Principal, Miss Moberley), founded in '86, is intended for students unable to bear the expenses of **Lady Margaret Hall**, and has about 13 students. The fees for board and lodging are £45 a year. The conditions of entrance are the same as for **Lady Margaret Hall**. The lecture arrangements for the three halls are under the management of a committee for the education of women in Oxford (Secretary, Mrs. A. H. Johnson). Unattached students are allowed, under certain conditions, to reside in Oxford under the censorship of Mrs. A. H. Johnson, 8, Merton Street. A system of teaching by correspondence (apply to Mrs. A. H. Johnson) was set on foot in '83, and a scheme of teachers' training is under the management of Mrs. Scott, Merton College. The University of London confers its degrees equally upon men and women. Women students are received at the **Royal Holloway College**, Egham, opened in '87 (Principal, Miss Bishop). The object of the college is to provide the

instruction necessary for the London degrees in science and arts, the preliminary M.B., and for the examinations of the University of Oxford. Instruction in music, drawing, and painting is provided. The entrance examination, held in September, includes English, foreign languages, and arithmetic. Scholarships are competed for in July. All scholars must read for honours. There are seven resident women lecturers, and eight non-resident professors and teachers. **Bedford College**, London, incorporated '49 (President, Miss Martin), offers scholarships and prepares resident and non resident students for the London degrees in arts and science. Students are not admitted under sixteen except in special circumstances, and, if necessary, have their acquirements tested by preliminary examination. An art school is attached to the college. **Queen's College**, Harley Street, and the ladies' department of **King's College**, Kensington Square (Lady Superintendent, Miss Schmitz), provide lectures and classes as preparation for the London examinations. **Westfield College**, Hampstead, founded in '82 (Mistress, Miss Maynard) receives students for the same object; but they are not compelled to take the entire course, or to enter for any University examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic, and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Students of **University College**, London, or of the **London School of Medicine for Women**, can reside, under collegiate rules, at **College Hall**, Byng Place, Gordon Square (Principal, Miss Grove). **Victoria University** follows the example of London in conferring its degrees upon women. Halls for residence for them are open at Manchester, Liverpool, and Leeds in connection with the men's colleges. The provincial colleges of Birmingham, Bristol, and Nottingham also provide for women. In **Ireland** the **Royal University of Ireland** (Dublin) offers degrees to women, and also exhibitions and scholarships. In **Scotland** the University of St. Andrew's grants the degree of LL.A. to women on the result of examination in the subjects taught in the University, together with history, music, fine arts, aesthetics, modern languages, and the natural sciences. There is at present no hall of residence for the women students, but Professor Knight hopes shortly to open one. **Queen Margaret College**, Glasgow, carries on the work started by the Glasgow Association for the Higher Education of Women, which had for many years arranged for lectures by the professors of Glasgow University. The college provides lectures and classes for women in arts, science, and medicine on university lines, and has applied for affiliation to the University of Glasgow and for admission to degrees. There is at present no entrance examination nor house of residence, but families are recommended for the reception of students. In **South Wales** the classes of **University College**, Cardiff, in arts and science are open to female students, with special scholarships for residents at **Aberdare Hall**, Cardiff (Principal, Miss Hutchins). A school of cookery is attached to the college. The **University College of North Wales** (Bangor), gives the same advantages to women as to men, and provides a hall of residence (Principal, Miss Hughes). Open entrance scholar-

ships (from £30 to £10 in value) are offered to men and women alike.

Historical Manuscripts Commission. A Royal Commission was appointed in '69 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law and general literature. The Commission at present is constituted as follows: Lord Esher (chairman), Lord Carlingford, Marquis of Lothian, Marquis of Salisbury, Marquis of Bath, Earl of Rosebery, Lord Edmond Fitzmaurice, Bishop of Limerick, Bishop of Chester, Lord Acton, Sir G. W. Dasent, Sir W. Hardy, and Mr. H. C. Maxwell Lyte, with Mr. John Romilly as secretary.

Hodgson, John Evan, R.A., was b. in London 1831. He had youthful experience of Russia, and after being ed. at Rugby spent some time in his father's office. Becoming a student at the Royal Academy, his first picture was hung there in '56. From domestic he passed to historical, and thence to Moorish subjects. Elected R.A. in '79.

Hogan, James Francis, Australian author, was ed. at St. Patrick's Coll., Melbourne, and entered the service of the Education Department of Victoria. Has been connected as a journalist with the *Victorian Review*, *Melbourne Argus*, *Melbourne Herald*, and the *Melbourne Advocate*. His literary works include: "The Irish in Australia" ('87), "The Australian in London" ('89), "The Lost Explorer" ('90), and "The Convict King," issued in '91. Since '87 he has been resident in England.

Hogg, Quintin, is a son of the late Sir James Weir Hogg, chairman of the old East India Co., and was b. in 1845. Ed. at Eton; afterwards becoming engaged in business in Rood Lane in connection with Bosanquet, Curtis & Co. He is now the head of the firm, which bears the title of Hogg, Curtis, Campbell & Co. He has for many years been actively associated with philanthropic and religious movements. Some thirty years ago he started a ragged school in the district of Drury Lane. This was in '73 converted into a working boys' home and institute "for the purpose of endeavouring to withdraw elder boys from evil surroundings." From Endell Street the institution was in '78 removed to larger premises in Long Acre, where the membership soon increased to 600. Now under the name of the Polytechnic (Regent St., W.) a noble institution is in full working order. Mr. H.'s support of these institutions has been on the most generous scale.

Hole, Very Rev. S. Reynolds, Dean of Rochester. Ed. at Newark grammar school and Brasenose College, Oxford. He was ordained curate of Newark in 1844, and became vicar in '50. In '74 he was nominated Rural Dean of Southwell, in '75 Canon of Lincoln, and in '87 was appointed to the deanery of Rochester in succession to the late Dr. Scott. He was for some time chaplain to the present Archbishop of Canterbury. Dean H. is one of the most popular platform speakers, and has a fund of good humour and good stories, upon which he draws largely. He has been a contributor to *Punch*, and was an intimate friend of the late John Leech. He is one of the highest living authorities on the cultivation of roses, his "Book about Roses" having run through many editions and

been translated into several languages. He delivered a particularly witty speech at the Church Congress in Oct. '91.

Holland. See NETHERLANDS.

Holland, Queen of. See WILHELMINA I.

Holloway College, The Royal. Founded in 1883 by the practical benevolence of the late Mr. Thomas Holloway. Is a handsome building situated at Mount Lee, Egham, Surrey, built in the style of the French Renaissance. Its object is to supply the best and most suitable education for women of the middle and upper-middle classes. The vacancy in the number of representative governors, caused by Earl Granville's decease, was filled by the appointment of Sir W. Hart-Dyke, M.P. The college may be seen on Wednesday afternoons by orders to be obtained from the Secretary (see also HIGHER EDUCATION OF WOMEN). **Principal**, Miss Bishop; **Secretary**, J. L. Clifford-Smith.

Holmes, Oliver Wendell, M.D., LL.D., was b. at Cambridge, Mass., Aug. 29th, 1809, and graduated at Harvard University. Originally intended for the law, he ultimately attached himself to the medical profession, of which he was a distinguished ornament, being successively appointed Professor of Anatomy both at Dartmouth College and the Massachusetts Medical School. From an early age, however, he evinced a taste for poetry and general literature, and it is in his capacity as an author that he is best known in England. During the American Civil War he was an ardent supporter of the North, whose cause was materially assisted by his powerful satires, especially his "Sweet Little Man." His most popular works are "The Autocrat of the Breakfast Table," "The Professor at the Breakfast Table," and "The Poet at the Breakfast Table." Many of his happiest efforts have been delivered at public dinners. He visited England in '86, and was everywhere received with the greatest cordiality. Hon. LL.D. (Camb.). A charming book, entitled "Over the Teacups," published in '90, attracted much attention by its genial frankness.

Home Arts and Industries Association. Established about the beginning of 1885, having been previously at work in a small way under the title of "The Cottage Arts Association," was founded and promoted by Mrs. Jebb. It has now over 450 classes in England, Scotland, and Ireland, with more than 5000 pupils. Its immediate objects are to rouse the intelligence, educate the eye and train the hand, by means of voluntary evening classes for lads and girls. **President**, Earl Brownlow; **Treasurer**, Mr. Walter Besant; **Secretaries**, Miss Dymes and Mrs. H. Knig-Salter. **Office and studios**, Royal Albert Hall.

"Home for the Dying." In order that many impoverished invalids should be afforded a home, where they can peacefully end their days, a small institution has been in existence for five years, and has proved of remarkable usefulness. It is now proposed to purchase and fit up a Home, which could contain room for fifty occupants who would be persons afflicted with mortal diseases. The Chairman of the Council which manages "Friedenheim," the name of the present Home, is Sir Robert Phayre, K.C.B. During the last five years more than 160 patients have been received. **Hon. Sec.**, Miss F. M. Davidson, "Friedenheim," 133, Mildmay Road, N.

Home Office. This is a many-sided department, and makes great demands upon the time

and judgment of its parliamentary chief. He grants certificates for the naturalisation of aliens. Addresses to the Sovereign and the gracious replies thereto pass through his office; reports of Royal Commissions are forwarded to him to be laid before the Sovereign, by whose command they are subsequently presented to Parliament; he nominates the principal officers of the Isle of Man and the Channel Islands, and most civil knightships are conferred upon his recommendation. Heavy fees are paid to the Department by those upon whom peerages and other dignities are bestowed. The Home Secretary may grant Provisional Orders for the improvement of unhealthy areas in the Metropolis, and the functions of licensing and inspection in regard to the practice of vivisection, schools of anatomy, and retreats for habitual drunkards are vested in him. One staff of inspectors from the Department is charged with the supervision of coal and metalliferous mines; another sees that the Acts relative to the manufacture and storing of explosives are properly carried out; and a third visits factories, printing works, bleaching works, brickyards, white lead works, and workshops (see FACTORY AND WORKSHOP ACTS). The Home Secretary is also charged with powers of inspection under the Burial Acts, and may permit in certain special cases interments in closed burial grounds, or the exhumation of bodies where there is suspicion of foul play. Under the Prevention of Cruelty to Children Act he is given authority to direct a factory inspector to see that the conditions and restrictions of any licence granted in respect of the employment of children of between the ages of seven and ten years in theatres are duly complied with. The maintenance of peace and order within the kingdom, and the administration of justice, so far as the royal prerogative is involved in it, are, however, his leading responsibilities. His duties in connection with the police include the appointment of the Chief Commissioner of the Metropolitan Force, and the approval of rules made for the service by that officer (see METROPOLITAN AND CITY POLICE); he must be satisfied, before granting his certificate under the County and Borough Police Act, that the police of a county or borough has been maintained in a state of efficiency in point of numbers and discipline; and should his certificate of efficiency be withheld, the sum annually payable by the County Council in substitution for local grants towards the cost of pay and clothing of the police is forfeited. In any part of the United Kingdom he may authorise the employment of the military forces of the Crown in order to suppress riot and disorder. He appoints and frequently puts in motion the Director of Public Prosecutions. The control of the prisons (*q.v.*) and convict establishments, and the inspection of reformatory and industrial schools are exercised by his Department, and he has the charge of criminal lunatics and insane prisoners. He may recommend to the Crown the remission of punishment passed upon offenders, either by justices of the peace or by the judges, his most anxious and responsible function in this connection being in regard to petitions for commutation of the death sentence; but before deciding in such grave matters he usually takes such judicial, legal, and, in cases where insanity is suggested, medical opinion as he may think necessary, to enable him to

arrive at a just conclusion. See MINISTRY, SECRETARY OF STATE.

"Home Rule all Round." See SESSION, sect. 22.

Honduras, a republic in Central America. Area, 46,400 sq. m.; pop. 450,000. Capital, Tegucigalpa, pop. 12,000. Governed by a President and Congress, elected for four years. (For Ministry see DIPLOMACY.) Estimated revenue for '88-9, £225,000; expenditure, £231,000. Imports, '88, £206,450; exports, £213,020. Debt, £5,385,000. The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. Army nominally about 3800, including reserves.—'91. An unsuccessful revolt broke out under General Bardeles and Colonel Molena (May). General Ponciano Leiva, Minister of War, was elected President (Sept. 6th). He is a Progressist.

Hong Kong. An island and British Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by a narrow strait—the Lyce-moon pass. The peninsula of Kowloon, opposite the island, and a small adjacent group, the Lema Islands, appertain to the colony. Capital Victoria (commonly called Hong Kong—see previous eds.). Government is in the hands of a Governor, with Executive and Legislative Councils. Religion and education are most abundantly provided for. The island is our "Eastern Gibraltar," and is both a military and naval station. There is a mixed European, Sikh, and Chinese police, numbering 700. It is also the great emporium for European trade with China, and is a free port. For latest financial statistics see BRITISH EMPIRE, etc (table). Imports, chiefly goods for China, cottons, and other manufactured articles; exports, tea, silk and other Chinese produce. The Legislature in Dec. '90 passed a law against stowaways, to prevent surreptitious emigration to Australia. For Executive Council see DIPLOMACY.

Hook, James Clarke, R.A., was b. 1819. Commencing his artistic career by painting pictures for the most part from a scriptural or poetical basis, he afterwards produced many excellent paintings, the subjects of which were pastoral or modern. Elected R.A. ('60). Consequent upon the success of his well-known "Luff, Boy!" Mr. H. has more recently devoted his talents to marine pictures, and is a regular contributor to the Royal Academy.

Hooker, Sir Joseph Dalton, son and successor of the late Sir William Jackson Hooker, director of the Royal Gardens at Kew, was b. at Halesworth, Suffolk, 1817. Graduated M.I. Glasgow Univ. '39. Assistant-surgeon to the Government Antarctic expedition conducted by Sir James Clark Ross, '38, and on his return published a series of richly illustrated volumes on the Flora of New Zealand, Tasmania, and the Auckland Islands. He was appointed botanist to the Geological Survey of Great Britain in '46, and in '47 visited India, where he remained till '51, having been kept prisoner for some time by the Rajah of Sikkim. On his return he published his *Himalaya Journals*. In '55 he was appointed assistant-director of Kew Gardens, and became Director in '65. Made a tour in Syria for botanical purposes '70. President of the British Association at Norwich, '68, and in his address defended the Darwinian doctrine of Evolution. Accompanied by M.I.

John Ball and Mr. Maw, Dr. Hooker made a journey into Morocco '71, to study its flora. He and his companions, during their explorations, climbed to the summit of the great Atlas mountain. Elected President of the Royal Society '73, resigned '78. Created K.C.S.I. '77.

Hornby, Admiral Sir Geoffrey Thomas Phipps, K.C.B., is the son of the late Admiral Sir P. Hornby, and was b. 1825. At the age of twelve he entered the naval service by joining the *Princess Charlotte*. Was Flag Captain under Sir Sidney Dacres, the Commander of the Channel Squadron. Became Vice-Admiral in '75, and was appointed Commander-in-Chief of Her Majesty's naval forces in the Mediterranean. In '78 he received the honour of K.O.B. Acted as President of the Royal Naval College at Greenwich '81-4. Has held the appointment of Lord of the Admiralty. In Feb. '91 he met with a serious accident, being thrown out of his carriage.

Horological Institute, The British, has for its main object the encouragement of the English watch trade. Technical classes are held by the Institute at its headquarters, Northampton Square, E.C., and certificates are granted. It is in union with the City and Guilds Institute, and publishes monthly the "**Horological Journal**," which circulates among watchmakers, jewellers, and silversmiths. Sec., F. J. Britten.

Horsley, John Calcott, R.A., b. in London 1817, painted a picture in his youth which excited the admiration of Wilkie. In '43 his cartoon of "St. Augustine Preaching" gained at Westminster Hall one of the three prizes in the second rank of £200. Other frescoes of his in the Palace of Westminster are entitled "Religion" and "Satan surprised at the Lar of Eve." Since then he has painted many admirable pictures and portraits, as well as an altar-piece with figures of colossal size, entitled, "**The Healing Miracles of Christ**." The latter is in the chapel of St. Thomas's Hospital.

Horse Racing. See TURF.

Horton, Robert F., M.A., Congregational minister, was b. 1855, ed. at Shrewsbury, whence he went to New Coll., Oxford ('74), where he commenced a brilliant college career by obtaining First Class in Moderations, and in '78 a First in Classical Greats. Elected Fellow of his college '79. Began his ministry at Hampstead ('80), and his success there soon necessitated the building of a larger church, which was opened '84. Mr. H.'s work on "**Inspiration**" caused considerable discussion. The exclusion of Mr. H. from a professorship at Oxford by reason of his Nonconformist views attracted attention at the time; but by his severance from college work London has gained a decided acquisition to its ranks of preachers.

Hospitals and Dispensaries. The following list comprises most of the important hospitals and dispensaries in London, with their last annual income and secretary's address. Amounts prefixed by an asterisk are those from which returns for '91 have not been received. **Alexandra Hospital for Children with Hip Disease** (£2317), Major J. L. Stevenson, Queen Square, Bloomsbury; **Belgrave Hospital for Children** (£1300), Percy Gates, 7, Victoria Street, Westminster S.W.; **Bethlehem Hospital** (£27,000), William Baggallay, Lambeth, S.E.; **British Hospital for Diseases of the Skin** (*£1245), E. Morton Daniel, 6, Gt. Marlboro' St., W., and 5, Newington Butts, S.E.; **British Lying-In**

Hospital (£1450), F. Gardner, Endell St., Long Acre; **Cancer Hospital**, free (£6545), W. H. Hughes, Fulham Rd., S.W.; **Central London Ophthalmic Hospital** (£8874), W. Abrams, 238A, Gray's Inn Rd., W.C.; **Central London Throat and Ear Hospital** (£2235), R. Kershaw, Gray's Inn Rd.; **Charing Cross Hospital** (£9908), A. E. Reade, West Strand, Charing Cross; **Chelsea Hospital for Women** (£4226), A. C. Davies, Fulham Rd., S.W.; **Cheyne Hospital for Sick and Incurable Children** (*£2359), Reginald Blunt, 46 & 47, Cheyne Walk, Chelsea; **City Dispensary** (*£1926), F. J. T. Moore, 98, Cannon St.; **City of London Hospital for Diseases of the Chest** (£10,200), T. Storrai-Smith, 24, Finsbury Circus; **City of London Lying-in Hospital** (£3737), R. A. Othwaite, 102, City Rd.; **City Orthopedic Hospital** (£1500), E. Derenth, 27, Hatton Garden; **Convalescent Hospital for Seamen** (*£11,713), P. Michell, Seamen's Hospital, Greenwich; **Cripples' Home and Industrial School for Girls** (£3124), Miss Wellesley and Miss E. Emes, 17A, Marylebone Road; **Dental Hospital of London** (£2860), J. F. Pink, Leicester Sq.; **East London Hospital for Children and Dispensary for Women** (£8016), Samuel Whitford, Shadwell, E.; **Evelina Hospital** (£5104), T. S. Chapman, Southwark Bridge Rd., S.E.; **Finsbury Dispensary** (£1077), D. W. Williams, Brewer St., Goswell Rd., E.C.; **Foundling Hospital** (£8057), W. S. Wintle, M.A., Guilford St.; **German Hospital** (£9984), C. Feldmann, German Hospital, Dalton; **Mrs. Gladstone's Free Convalescent Home for the Poor**, more especially of the East of London (£1143), Lieut. Colonel Neville Thurgood, Sheffield; **Great Northern Central Thurgood Hospital** (£5651), W. T. Grant, Holloway Rd., N.; **Guy's Hospital** (£32,435), H. Williams, Counting House, St. Thomas St.; **Hampstead Home Hospital and Nursing Institute** (£3025), R. A. Othwaite, 4, Parliament Hill Rd., Hampstead; **Hospital for Consumption and Diseases of the Chest** (£32,533), H. Dobbin, Brompton; **Hospital for Diseases of the Throat** (£3500), W. Hospitals Association (Street Ambulance Branch). Was established in '89 for the removal and safe removal of cases of street accidents, in the Metropolis. Possesses fifty-five stations, of which twenty are public thoroughfare stations, twenty are at fire brigade stations, twelve are at hospitals, and three are at industrial dwellings. The following are the **Public Thoroughfare Stations**:—The Royal Exchange, E.C.; Cab Rank, Marble Arch, W., Cab Rank, St. Clement Dunes, W.C., Cab Rank, Midland Railway Terminus, St. Pancras, N.W., Cab Rank, St. James's Square, S., Cab Rank, Pickering Place, W., Cab Rank, Maida Vale, near Aberdeen Place, W., Cab Rank, Royal Crescent, Uxbridge Road, W., Cab Rank, Archer Street, W., Cab Rank, Queen's Gate, Cromwell Road, S.W., Cab Rank, Eccleston Bridge, S.W., Cab Rank, Vauxhall Cross, S.W.; Cab Rank, Knightsbridge, S.W.; 47, Holborn Viaduct, E.C.; York Road, East, Commercial Road, E.; New Dundee Wharf, Wapping, E.; Vauxhall Bridge, North Side, S.W.; Victoria Embankment, near Waterloo Bridge, S.W.; Spitalfields Churchyard, E.; Marshalsea Road, Borough, S.E. **Offices**, 140, Strand, W.C. **Chairman**, Sir Sydney H. Waterlow, Bart. **Hon Sec.**, Mr. Thomas Ryan, Sec. of St. Mary's Hospital, W., to which address all urgent communications should be sent.

Hotel Keepers' Liability. In the case of *Medewar v. The Grand Hotel Company*, the plaintiff sued to recover £140, the value of a number of articles of jewellery stolen from his dressing-case. It appeared that he was shown into a bedroom at the defendants' hotel at Liverpool,

for the purpose of washing his hands and dressing, but not to sleep, and his dressing case was subsequently put out into the corridor by the defendants' servants in his absence. At the trial judgment was entered for the defendants on the ground that the plaintiff had not complied with the statute limiting the liability of hotel keepers, and that he had not proved that the articles were stolen after the luggage had been removed into the corridor. On appeal (Court of Appeal, Feb. 6th, '91) it was held that the relation of host and guest had been established between the parties, and that the defendants were guilty of negligence in turning out the luggage into the corridor. Inasmuch, however, as the plaintiff had not complied with the statute, he could only recover £30.—In the Queen's Bench Division (April 23rd, '91) the Marchioness of Huntly sued the Bedford Hotel Company for £1000 damages for the loss of jewels stolen from her dressing room while she was staying as a guest at the defendants' hotel at Brighton. The jury found that the loss was caused by the negligence of the defendants' servants in not having the premises searched upon the discovery of a poker and knife on the bed in the plaintiff's dressing-room; but that there had also been negligence on the part of the plaintiff, though of a less degree, in not summoning the manager when the poker and knife were discovered, instead of simply calling the housemaid. The jury also found that a notice in the plaintiff's room that "articles of value, if not kept under lock, should be deposited with the manager, who will give a responsible receipt for the same," constituted a special bargain with the plaintiff that the defendants would be responsible if jewels were kept under lock. It appeared that the jewels in question were kept in a locked jewel-box, which was in a basket trunk that was locked, in the plaintiff's dressing-room. The learned judge entered judgment for the defendants, and the plaintiff subsequently (July 10th) applied to the Court of Appeal for judgment, or for a new trial. It was there held that there was no evidence of negligence either on the part of the defendants' housemaid or on the part of Lady Huntly; that there was no evidence of a special contract between the plaintiff and the defendants, and that the hotel keepers were only responsible under the Innkeepers' Act to the amount of £30, to which sum the plaintiff was entitled.

House, Adjourment of the. See PARLIAMENTARY PROCEDURE.

House of Commons Steeplechase. See TURF.

Howard Association (founded 1866) was instituted, under the patronage of Lord Brougham, to promote the best methods of treatment and prevention of crime and pauperism. The principles of the great philanthropist, John Howard, have been generally embodied in the work of the Association. It collects information both at home and abroad, which throws a vivid light on the present systems of punishment and prevention of crime. Many books and pamphlets dealing with pauperism, boarding out, neglected children, vagrancy, and kindred subjects, have been disseminated by the Howard Association. In Oct. '91 the Committee's Annual Report announced the completion of the 25th year of the corporate existence of the Association. A remarkable work, entitled "Penological and Preventive Principles," which

has received high official recognition, has recently been published by Mr. William Tallack, who is the Secretary of the Association. Office, 5, Bishopsgate Without, E.C.

Howells, William Dean, the eminent American novelist, was b. in Ohio, 1837. After serving his time with his father as a printer, he adopted journalism as his profession, and in 1871 was appointed editor of the *Atlantic Monthly*, from which he retired in '80. His poems, sketches, and stories, which are characterised by a lightness of artistic touch which marks the individuality of their author, have had a wide circulation on both sides of the Atlantic. Mr. H. was American consul at Vienna '61-5. One of the most popular of his writings is "A Foregone Conclusion."

Hudson Bay, An inland sea of the Dominion of Canada, nearly as large as the Mediterranean (and styled "the Mediterranean of America"), communicating with the Atlantic by Hudson Strait. Closed by ice seven months of the year. (See also HUDSON BAY RAILWAY.)

Hudson Bay Railway. This scheme, or more properly speaking, the Hudson Bay and Winnipeg Railway, is, to some extent, an adaptation of the old trade route of the Hudson Bay Company to modern requirements, and is of peculiar interest to those interested in the development of the Colonies, especially in regard to the great Canadian Pacific Railway scheme. The project is to connect Regina, the centre of the textile belt on the west, and Winnipeg, the capital of Manitoba, on the east, with Port Nelson on Hudson Bay, from which point to Liverpool the distance is not more than 2960 geographical miles. Both the places named are on the existing Canadian Pacific line, and this fact alone is of importance in connection with a scheme for opening up the shortest possible route to England. (For further details see previous eds.) A telegram from Ottawa, April 20th, '91, stated that the Manitoba Legislature had granted 1½ million dollars in aid of the company. From the same source (May 11th) it was reported that the promoters were opposing Senator Boulton's motion to ask for Imperial aid, being satisfied with the Manitoba subsidy and the assistance expected from the Canadian Parliament. On May 27th it was announced that the Senator had withdrawn his proposal in favour of an address to the Queen pointing out the importance of the line. The Hudson Bay Railway Bill passed the Dominion Senate on Aug. 10th, and on Sept. 6th it was announced that the Government had decided to make no cash subsidies for railway construction this year beyond assisting the Hudson Bay Railway Co., but on Sept. 22nd this report was contradicted as to other lines.

Hudson River Bridge. This scheme, designed by Mr. Gustav Lindenthal, C.E., is on the suspension principle, having a river span of 2850 ft., a shore span on each side of 1500 ft., and anchorage piers 320 ft. long. The height above high-water mark is 150 ft., with iron towers of 450 ft. Six railway tracks are provided for, the width being 80 ft., with suitable approaches, the provision being for 50,000 passengers per hour (see last ed.). The estimated cost for bridge approaches, etc., has been put down at \$60,000,000. It was reported in Jan. '90 that a Bill had been introduced at Washington to incorporate a company, which is to be permitted to make a profit of

10 per cent., the work to be completed in seven years. From Philadelphia (April 2nd) it was announced that the Bill for the suspension bridge between New York and Jersey City had been passed. On May 15th it was added that the Senate Commerce Committee had reported favourably on it. A New York telegram of April 30th, '91, stated that the War Department had decided that the bridge must be not less than 150 ft. in height; it was added that the structure would probably prove to be the largest of the kind in the world, no less than ten railway and four passengers' tracks being provided for in the latest plans.

Hudson River Tunnel. It was reported in April '91 that the tunnel had been driven a distance of 3,400 ft., and work was being advanced at the rate of 10 ft. a day. In August it was reported that the lowest point in the total length of 5,500 ft. had been reached, and a per cent. ascending gradient would be followed. The contractors had obtained permission from the War Department to cover the comparatively thin layer of silt, that would otherwise cover the tunnel roof, by a bed of well-tempered clay. The depth of water at this low point is from 60 ft. to 64 ft., the plan showing only about 5 ft. of river mud. As the air pressure used was 25 lb. per square inch, and this would have to be increased, it was evident that the shell of mud was not strong enough to resist it. The Board granted the application on condition that not more than 20,000 cubic yards of clay be used, that the clay bank in no place rises more than 15 ft. higher than the present bottom, nor anywhere above 3½ ft. below low water level in the river. This material will have to be removed on the completion of the tunnel, and the Department demanded a bond for \$200,000. In August it was announced that the Company had notified that the first track would be completed in a few months.

Huggins, William, F.R.S., D.C.L. (Oxon.), LL.D. (Camb. and Edin.), Ph.D. (Leyden), b. in London, 1824. Ed. at the City of London School. Since '55, Dr. Huggins has occupied himself with observation of double stars and with careful drawings of the planets Mars, Jupiter and Saturn, his object being to bring to bear upon the science of astronomy the practical knowledge he had obtained of general physics. In conjunction with Dr. W. A. Miller he made some important discoveries with regard to the heavenly bodies, and for these researches Dr. Huggins received ('66) one of the Royal Medals placed at the disposal of the Royal Society, and in the following year the Gold Medal of the Royal Astronomical Society was awarded Dr. Huggins and Dr. Miller for their conjoint researches. Dr. H. then continued his prismatic researches with a more powerful spectroscope, with most important results, and in '80 he again received a medal from the Royal Society. His labours have also received recognition from foreign societies. Mrs. Huggins is equally learned in the study of the stars. President of the Royal Astronomical Society ('76-8). As President of the British Association, Dr. H. delivered a most valuable address at Cardiff in Aug. '91, dealing with the discoveries made in astronomy.

Hughes, Rev. Hugh Price, M.A., the leader of the "Forward Movement" of Wesleyan Methodism, is a native of Wales, and was b. 1847. Ed. at Richmond Theological Coll., and gradu-

ated M.A. at London Univ. Has held appointments at Dover, Brighton, Tottenham, Dulwich, Oxford, and Brixton. Is a member of the Legal Conference. Has edited, with conspicuous success, the *Methodist Times* since '85, and is the superintendent of the new mission to the West End. During '88 Mr. H. joined in the Education controversy relating to the majority report of the Commission. He has published some of his St. James's Hall discourses in two volumes entitled "Social Christianity" and "The Philanthropy of God." Visited the United States in the autumn of '91.

Hughes, Thomas, Q.C., was b. 1823. Ed. at Rugby and Oxford. Called to the bar ('48). Radical M.P. for Lambeth '65-8, and for Frome '68-74, Q.C. ('69). In '70 he made a tour in the United States. He is the author of "**Tom Brown's School Days**" ('57), "The Scouring of the White Horse," "Tom Brown at Oxford," and "Life of Livingstone" (a volume in Macmillan's "Men of Action" series). Appointed a County Court judge ('82). The holding of a judgeship has not, however, prevented occasional but welcome appearances of "Tom Brown," as Mr. H. is affectionately dubbed, on the public platform. He has taken an active part in the Anti-Gambling crusade. On the subject of Co-operation Mr. H. is a well-known speaker.

Hull, Rt. Rev. Richard Frederick Lefevre Blunt, Bishop Suffragan of, was ed. at King's College, London, and was ordained deacon '57, and priest a year later. He has held ecclesiastical appointments as curate of St. Paul's, Cheltenham, and of St. Luke's, Chelsea; chaplain to Lord Hotham and of Scarborough Gaol; vicar of Scarborough, of which town he was appointed rural dean in '70; prebendary of Grindall in York Cathedral; for a year he was chaplain of Christ Church, Cannes. In '73 he became archdeacon of the East Riding of Yorkshire, and canon of York in '82. Archdeacon he was appointed Hon. Chaplain to the Queen in '87, and four years later became Chaplain-in-Ordinary. He was the Select Preacher at Cambridge in '86. In March '91 Dr. B. became Bishop Suffragan of Hull.

Humbert IV., King of Italy, was b. 1844; succeeded his father Victor Emmanuel '78. While Crown Prince he distinguished himself by the active part he took in the movement for promoting Italian Unity. He shared with Garibaldi the triumph of the reorganisation of the kingdom of the two Sicilies. Prince Humbert served with distinction in the war of '66, and displayed much personal bravery in the moment of disaster at the battle of Custoza, in which the Italians were defeated. He married in '68 his cousin, Princess Marguerite, daughter of the late Duke of Genoa. Their son, the Crown Prince Victor Emmanuel, Prince of Naples, was born Nov. 11th, '69. During his Majesty's visit to Naples, Nov. 17th, '78, a would-be assassin named Giovanni Passananti made an attempt upon his life with a poisoner. Visited the Emperor William II. of Germany at Berlin in March '89. His Majesty is very popular among his subjects, and his appearances in public are always hailed with delight. The Queen is well known as an admirable artist.

Hungarian Political Parties. The legislative power of Hungary is vested in the Emperor of Austria, as King of Hungary, the Delegations (see AUSTRIAN POLITICAL PARTIES), and a Reichstag, consisting of a House of Magnates and a House of Representatives. The former

comprises 286 hereditary peers, some 50 high ecclesiastical dignitaries of the Roman Catholic, Greek and Protestant Churches, 82 life-peers, all the archdukes who have attained their majority, delegates from the Diet of Croatia-Slavonia, and others—460 magnates in all. The House of Representatives contains 453 members, elected by open voting and limited suffrage for periods of five years. The present House was elected in June '87. The parties are distinguished as Liberals, Moderates, Independents, the Croatian delegates, who usually vote with the Liberals, and Nationalists, who vote now with one party and now with another. The Liberals number 250; the Independents, who aim at the liberation of Hungary from all but the monarchical tie with Austria, are 80; and the Moderates, numbering 56, accept the constitution of '67. Until last year M. Tisza commanded the support of the majority in the Chamber, but finding his authority waning after fifteen years' leadership, he has now retired, and sits as a simple deputy, his place at the head of the Ministry being taken by his colleague, Count Szapary, who was Minister of Agriculture in the Tisza Cabinet. Count Apponyi is the leader of the Moderates, and M. Julius Gregor leads the Young Czechs.

Hungary. See AUSTRIA-HUNGARY.

Hunt, William Holman, the well-known painter of religious and mystical subjects, was b. in London 1827. He first exhibited at the Royal Academy in '46, and was one of the originators of the Pre-Raphaelite movement. The occult meaning of his "Light of the World" and "The Awakening Conscience," of '54, formed the subject of a series of letters by Mr. Ruskin to the *Times*. Mr. Hunt subsequently painted "The Scapegoat" and "The Finding of the Saviour in the Temple," the latter of which attracted great notice when exhibited ('60). The largest of his works, "The Shadow of Death," occupied the artist during a four years' residence in Palestine, and was finished in '73. "The Triumph of the Innocents," by some considered his masterpiece, was in '88 reproduced in photogravure. An important mosaic by Mr. H., entitled "The Child Jesus in the Temple," which is intended for Clifton College Chapel, was exhibited in '90. A picture, illustrating the old custom of singing on Magdalen Tower, Oxford, on the 1st of May, was exhibited by Mr. H. during '91.

Hunting. Stag hunting, at one period so common in England, is now confined to 11 packs, and the present master of the Queen's buckhounds is the Earl of Coventry. In Ireland there are 4 packs. Neither can it be said that fox-hunting has increased in popularity of recent years, notwithstanding that the majority of hunts now have a fund to reimburse farmers for any losses experienced through the depredations of Keynard. Hunting men strongly resent the introduction of barbed-wire fencing, and not without cause, for several lives have been lost through the "thin line" not being observed until too late, whilst a number of valuable horses have prematurely journeyed to the "happy hunting grounds" from the same reason. In '91 many farmers humanely removed the obstruction altogether, and many others had flags so placed as to denote its whereabouts. In England there are 153 packs of foxhounds, in Ireland 14, and in Scotland

9. England also boasts of 101 packs of harriers and 19 packs of beagles; Ireland possesses 25 packs of harriers, while Scotland is content with half a dozen. Owing to the recommendations of the committee being in a measure disregarded, the Puckeridge Hunt dispute did not terminate in the satisfactory manner once anticipated. Consult "Hunting" (Badminton Library), by the Duke of Beaufort and Mr. Mowbray Morris.

Husband and Wife, Law as to, in '91. The most important case of the year with regard to the respective rights of husband and wife was that popularly known as the Jackson case (Queen's Bench Div., March 16th, '91). It was an application on behalf of Mrs. Emily Jackson for a writ of *habeas corpus* for her husband to bring her before the Court, in order to restore her to liberty. It appeared that Mrs. Jackson, who lived at Clitheroe with her sister, married Mr. Jackson in Nov. '87, without the knowledge of her family. On the evening of the marriage the husband took her back to the house, and the next day went to London, whence he sailed for New Zealand. During his absence Mrs. Jackson corresponded with him, but when in July '88 he returned to England she refused to have anything to do with him. In July '89 he obtained a decree for the restitution of conjugal rights, but that decree Mrs. Jackson refused to obey. On March 8th, '91, she was forcibly carried away by her husband to Blackburn, and detained there in a house occupied by the husband's sister. The affidavit of Mrs. Jackson's sister was to the effect that Mrs. Jackson was kept in captivity by her husband, who had the house garrisoned by men, and that the lady was detained against her will. It was alleged that the forcible detention of his wife by Mr. Jackson was without justification at law, and that the Court should order her to be set at liberty. Mr. Justice Cave and Mr. Justice Jeune declined to grant a rule, holding that where the relation was that of husband and wife, detention of the latter by the former was not illegal. Subsequently the case came before the Court of Appeal, where it was argued on Mr. Jackson's behalf that he had a common law right to gain possession of his wife, and to keep her, in order to prevent her from escaping from him. On behalf of Mrs. Jackson it was pointed out that if this was correct, a husband could keep a wife in close confinement until she rendered the conjugal right, whereas the Divorce Court could not imprison a wife because she refused to obey an order to that effect. The Judges of the Court of Appeal subsequently had an interview with Mrs. Jackson in their private room, and then gave judgment, directing that she should be set at liberty. The Lord Chancellor, in the course of his judgment, said: "I do not mean to lay it down as a proposition of law that there may not be some acts of the wife—or approximate approach to acts of misconduct—which might not give the husband a right to some physical restraint. On the same principle as he, or, indeed, any person, might restrain her if out of her mind and likely to do herself a mischief—as, for instance, if she was about to elope with any one—in such cases the exercise of the husband's authority to restrain her might be justified. And it is not necessary to lay anything down further than to say that such exercise of authority, so understood and limited, may be justified as reasonable and in accordance with law. But what we have on the return to

this writ is very different, and it is on that we have to determine. After stating the circumstances of the marriage, the decree, and the refusal of the wife to cohabit, it states, 'I therefore took my wife, and have since detained her in my house, using no more force or restraint than necessary to take her and keep her.' That is the return which seeks to justify an admitted imprisonment of this lady. I do not know that I am able to express in sufficiently precise language the difference between 'confinement' and 'imprisonment,' but if there is any distinction I can only say that upon these facts I should find an imprisonment, and looking at the return it is put as a broad proposition that the right of the husband, where there has been a wilful absenting of herself by the wife from her husband's house—that it is his right to seize possession of his wife by force and detain her in his house until she renders him conjugal rights. That is the proposition of law involved in the return, and I am not prepared to assent to it. The Legislature has expressly deprived the Matrimonial Court of the power of imprisoning the wife for refusal to comply with a decree for restitution of conjugal rights, and the result of such a system of law, if the husband had the power, would be that whereas the Court had no power to hand the wife over into her husband's hands, but only to punish her for contempt by imprisonment under the control of the Court, and without any circumstances of injury or insult—and even that power was taken away—the husband might himself of his own motion seize and imprison her until she consented to the restitution of conjugal rights. That is the proposition I am called upon to establish by holding this return to be good. I am of opinion that no such right or power exists in law. I am prepared to say that no English subject has a right to imprison another English subject (who is *sui juris* and entitled to a judgment of his or her own) without any lawful authority, but, if there were any qualification of that proposition I should be of opinion that on the facts of this case it would afford an ample justification to any Court for refusing to allow the husband in this case to retain the custody of his wife. It seems to have been thought that a lady, who is admitted to be of good position in society, may be dealt with roughly in this kind of way subject only to a question as to the exact degree of force or violence used or of physical pain inflicted upon her by seizure under the circumstances stated. But is it nothing that a lady, coming out of church on a Sunday, is to be seized by three or four men, in the face of the congregation, and forcibly put into a carriage and carried off? Is not one to consider something of the element of insult involved in such a seizure? And what happens afterwards? If the lady's statement to the medical man be true (and it is not contradicted), the moment she entered the house her husband tore her bonnet off her head and threw it into the fire. That is a statement made by the medical man in his affidavit made on behalf of the husband, and there is no denial or explanation of the statement. I confess I receive with indignation the statement of the facts in this case, and the utter absence of any apparent sense of delicacy or the respect due to the wife, whom the husband has sworn to love and cherish and protect. The result is that there is no power by law such as the husband professed to exercise, and the facts, to my

mind, afford sufficient reason to the lady to apprehend violence in future, considering the circumstances of her seizure. On either of these grounds it would be enough to say that the return of the writ is, in my judgment, bad, and that the lady be restored to her liberty and allowed to choose her own place of residence wherever she pleases." The Lord Chancellor added: "As there has now been an authoritative declaration of the law against the supposed power of the husband, any attempt to exercise it again will be a serious contempt of Court."—A singular case of alleged nullity of marriage was heard before Mr. Justice Collins (Divorce Division, Aug. 12th, '91). The petitioner was **Alice Beverley Crane**, otherwise Cooper, and the respondent her cousin, **Walter Beverley Crane**. The petitioner, who was an American by birth, stated that she was residing in London when her cousin, the respondent, who had come over from America, proposed marriage to her, which she declined. She alleged that he subsequently asked her to attend an afternoon service at St. Paul's Cathedral, and that while going in that direction the cab was suddenly stopped at St. Bride's Church, Fleet Street, the respondent telling her to go into the church and marry him, or he would blow his brains out, and she would be held responsible. The petitioner thereupon went into the church, and went through what she described as "a sort of ceremony." She remembered seeing a green cloth and signing a book; but she did not remember seeing a wedding ring, and never had one. When the ceremony was over the respondent took her back to her lodgings, and there left her, and she had never seen him since. It was sought to show that the petitioner was a woman of nervous and hysterical temperament, that she was in a dazed condition at the time of the ceremony, and that the whole thing was a plot to obtain possession of property which the respondent had wrongly believed that the petitioner would presently possess. The evidence of the clergyman who performed the ceremony was that he noticed nothing peculiar about the petitioner's manner, and that she went through the service in the ordinary fashion. Mr. Justice Collins said that the petitioner's signature in the register was written in a clear, bold hand, without any sign of confusion, and that after the evidence of the clergyman it could not be asserted that she did not understand or realise what was going on. He thought that she went through the ceremony realising what she was doing, but hoping that when it was over she would be able to avoid its consequences. That, however, was no argument to show that the marriage was void. There was no threat of violence, and it was unlike the case of *Scott v. Scabright*, because there was no evidence of physical or mental strain on the part of the lady, or of continued remonstrance. Though, therefore, he would desire to give the petitioner the relief she prayed, he was compelled to refuse the petition. The principle governing this question could not, the learned judge added, be strained to meet hard cases.—The *Queen v. Leresche* (Court of Appeal, July 21st, '91) settled an important point. A husband and wife having disagreed, they entered into a deed of separation, under which the husband agreed to allow the wife a certain sum per week. The husband failed to keep up the payments, and the wife, being in a destitute condition,

applied to him to resume cohabitation, which he refused to do. She accordingly summoned him before the magistrates for desertion, and the magistrates thereupon granted a maintenance order. It was held that the magistrates were wrong, and that there could be no desertion where the parties were living apart by arrangement because one of them had declined to resume cohabitation.—The case of *Surman v. Wharton* (Queen's Bench Division, Jan. 14th) raised a new and important question as to the liability of a husband for debts of his deceased wife, whose separate property he has taken, and for which she in respect of that property would have been liable. A Mrs. Smith, a widow (who had separate property, with which she had not dealt), married in '71 one Harwood, and enjoyed the property during her coverture. Her husband died, and then she, in '81, married Mr. Wharton, the defendant in this action, before the last Married Women's Property Act of '82. But between the passing of that Act and '87 she borrowed certain sums of the plaintiff. In '89 she died, and her husband, the defendant, entered into possession of her property. The creditor brought this action against him to recover the money borrowed; in the alternative, as liable either personally or as executor *de son tort*, the ground of action being that the debts had been contracted after the Act came into operation, and as the wife's separate estate would have been liable in her life, the husband, who had taken it, was also liable in respect of it. The County Court judge at Birmingham, however, was of a different opinion, and decided against the plaintiff, who appealed. The Queen's Bench Division held that the plaintiff was entitled to recover, as the husband took the wife's separate property subject to the liability for her debts. (See also *MARRIED WOMEN'S PROPERTY ACT*.)—The case of *Witherby v. Backham* raised the question whether a woman married before the commencement of the Married Women's Property Act, '82, can, by virtue of the Act known as *Malins' Act* (20 & 21 Vict. c. 57), assign during coverture her interest in a policy of assurance on her life, effected by her when single, for a sum payable on her death. Previously to '58, the date when *Malins' Act* came into operation, a married woman, as is well known, could not assign her chose in action if of a reversionary nature, and the husband could only assign the interest to which he might be entitled himself. The Act in question, however, enabled every married woman, with the concurrence of her husband, to dispose by deed of every future or reversionary interest in any personal estate whatsoever to which she shall be entitled under any instrument (except her marriage settlement) made after Dec. 31st, '57. The Act requires the deed to be acknowledged by the married woman in the manner prescribed by the *Fines and Recoveries Act* for the acknowledgment of deeds disposing of interests of married women in land. It appeared in the present case that a lady in '63, when a spinster, had effected in her own name a policy of assurance on her life for £2,000, and that in '74, shortly after her marriage, she executed a deed, in which her husband concurred, and which was duly acknowledged by her under the Act, assigning the policy to the defendant. The policy had recently been put up for sale by the defendant and sold; but the purchaser now took the objection that it was not clear whether a married

woman could under Malins' Act assign a legal chose in action—for instance, a debt or a policy of insurance effected in her own name, as distinguished from an equitable chose in action, such as a legacy or other money held in trust for her which would come under the description of personal estate. Mr. Justice Chitty gave judgment overruling the purchaser's objection.

Huxley, Thomas Henry, M.D., LL.D., D.C.L., F.R.S., was b. May 4th, 1825, at Ealing. Educated at Ealing School (of which his father was one of the masters) and at Charing Cross Hospital. He served as assistant-surgeon on H.M.S. *Victory* and *Rattlesnake*, during the cruise of which latter vessel he made important observations on oceanic hydrozoa. Elected a Fellow of the Royal Society '52; '55, Professor of Natural History at the Royal School of Mines, and also Fullerian Professor of Physiology at the Royal Institution; '62, President of the Biological Section of the British Association; '70, President of the Association itself for the year, and member of the London School Board; '72, Lord Rector of Aberdeen University; '73, Secretary of the Royal Society; '78, LL.D. Dublin and Edinburgh; '79, LL.D. Cambridge; '83, Rede Lecturer at Cambridge, and President of the Royal Society. In '85 he resigned his official duties, which included the Inspectorship of Fisheries and the presidency of the Royal Society. Contributed to the *Times* many scathing criticisms on General Booth's scheme (Dec. '90).

Hyderabad. For Resident, etc., see DIPLOMATIC

Hygiene and Demography, Seventh International Congress of. From Aug. 10th to 15th this Congress held its deliberations in London. The presidential opening address was delivered by H.R.H. the Prince of Wales. A visit was paid to Osborne, and a reception to the members was given by the Corporation of London. The social arrangements of the congress were particularly attractive, and many delightful excursions and entertainments were provided. The membership reached a total of nearly 2,700, proving the popularity of London as a meeting-place. Over the section which considered "Preventive Medicine" Sir Joseph Fayrer presided. "Chemistry and Physics" were discussed under the appropriate chairmanship of Sir Henry Roscoe, M.P. In the "Naval and Military" section Lord Wantage acted as president. Sir Arthur W. Blomfield spoke in the "Architecture" department on sanitary science. The following sections were also in session:—"Bacteriology" (president, Sir Joseph Lister); "The Relation of Diseases of Animals to those of Man" (president, Col. Sir Nigel Kingscote); "State Hygiene" (president, Lord Basing); "Engineering" (president, Sir John Cooke); "Hygiene of Infancy and Childhood" (president, Mr. J. R. Diggle); and "Demography" (president, Mr. Francis Galton). The Congress had held six previous meetings, —at Brussels, Paris, Turin, Geneva, The Hague, and Vienna. There were many lady visitors on the occasion of the London gathering, and Mrs. Priestley presided over a committee, at the disposal of which Mr. Agnew's gallery in Old Bond Street was courteously placed. Dr. J. V. Moore acted as the hon. secretary-general; Prof. W. H. Corfield was the hon. foreign secretary; and Mr. Malcolm Morris was hon. secretary of the reception committee. Lengthy

reports of the papers read before the Congress, and of the discussions, which were both valuable and interesting, appeared in the *Times*, and also in various journals devoted to the subjects on which the Congress deliberated.

Hypnotism. This term, as at present understood, refers to an abnormal mental and bodily condition induced in many persons by certain mechanical, psychological and physical processes, which render the "subject" amenable to suggestion and auto-suggestion, involving a temporary surrender of consciousness; the phenomena, however, being of a subjective character, and not dependent or consequent upon the subjugation of the will of the hypnotic to that of the operator. As a term, hypnotism has been in use for some years, owing its origin to Dr. Braid, a Manchester physician, who, about '41, was carrying on a series of experiments upon a new and scientific basis, and relieved from many of the abuses of mesmerism, the older study. Still, for a long time it received little attention, and, indeed, considerable opposition was shown, notwithstanding that it had the advantage of confirmatory experiments by Carpenter, the eminent physiologist. As a whole, too, the medical faculty regarded hypnotism with scepticism and disfavour. Recent researches, however, by men of acknowledged ability, and following scientific methods, have caused a genuine interest in hypnotic phenomena and their bearing; so that, in fact, a new science has arisen upon the fallacies and theories of the past. It is, however, chiefly to France and Germany that we owe the new knowledge, for our own country has had hitherto but a meagre record of work to show. The theory of hypnotism cannot at present be explained otherwise than by the observed phenomena, and these have chiefly **psychical significance**. Satisfactory physiological explanations will perhaps ultimately receive acceptance, and may support some of the theories at present in vogue. Considering the character of many of the physiologists at work on the subject—Lacaze, Charcot, Beaunis, and Liegeois, for example—much light, it may be expected, will be thrown upon phenomena whose origin is at present exceedingly obscure. Before going further, it will be convenient to indicate a few typical cases of hypnotisation. Deep sleep is produced; needles are then run into the "hypnotic" without apparent feeling, he remaining the while impassive. Certain suitable suggestions made, are followed by spontaneous bleeding at the nose, or it may be the arm; complete rigidity of the body, with adoption of attitudes not normally assumed. Loss of memory, more or less complete, may be induced; indifference to pain; conversations carried on with imaginary persons; and various analogous subjective conditions imposed. There are at present two schools of hypnotism, both in France, and the one widely differing from the other. That of La Salpêtrière (the Paris school) was founded by Charcot; and the Nancy school is represented by Bernheim, Liébeault, and others. The former refer the hypnotic condition to a morbid nervous state, induced only in unhealthy subjects, and presenting as a result the **lethargic state**, the **somnambulic state**, and the **cataleptic state**. These may be obtained in the way following: The subject gazes steadily at an object placed at short distance, and *above* the eyes. A position of the eyes, known as "strabism-

mus convergens superior," results. Breathing becomes slower, and the lethargic state is produced. Carrying it still further, the somnambule condition is reached, where the subject is little more than an automaton. The cataleptic state supervenes. Now, on the other hand, the Nancy school employ what is known as the **suggestion method** for hypnotising, and do not concede its manifestation only in the unhealthy or morbid subject; on the contrary, it is asserted that mental excitement (of different kinds) is against rapid and successful hypnosis. Nancy also maintains, in opposition to the Paris school, that crime may be committed while under hypnotic suggestion, and that cases have been proved moreover. There is conflict of testimony here. Over acts can undoubtedly be committed in the hypnotic or post-hypnotic state, and carried out with more or less precision, but it is not at all certain that outside of the laboratory, and away from definite modes of operation and experimental conditions, actual criminal acts would result. Some regard must obviously be had in such cases to mental and moral characteristics. Much attention is being given abroad to the proper attitude of the law to criminal hypnotic suggestion. (Consult Bentzen's *The Hypnotic and the civilisator's Bedeutung*.) The therapeutic utility of hypnotism has for some time seriously engaged the attention of the physician, and the attitude generally of the medical profession is in favour of further inquiry. In certain ailments, such as sleeplessness, neuralgic pains, loss of appetite, alcoholism, etc., "hypnotic suggestion" (a somewhat loose term) would appear to be of great value. But it is evident there should be proper restrictions

to its use; and, in fact, this was fully recognised at the recent Bournemouth gathering of the British Medical Association, a special resolution being passed in regard thereto. Its probable injurious effects have been pointed out—such, for instance, as may be involved in loss of will and lessened vitality; the danger of after susceptibility to accidental suggestion; its possible use for purposes antagonistic to the hypnotic itself, and the absence of any guarantee of physiological aim. But these are only a few of the many objections, which, at the same time, bear able defence. It may be mentioned that the above Association has a committee inquiring into the whole subject, but so far it has only presented an interim report. **Telepathy**, or **thought-transference**, may be said to be a heresy of hypnotism. It is believed by many that one mind can influence another "by some means other than the recognised sense perceptions." Mr. Ernest Hart says the power is "non-existent." On the other hand, Professor Lodge, F.R.S., at the British Association is heard saying: "There is the question whether it has or has not been established, by direct experiment, that a method of communication exists between mind and mind irrespective of the ordinary channels of consciousness and the known organs of sense; and, if so, what is the process?" Consult, on hypnotism generally, Moll's "Hypnotism"; Benet and Felt's "Animal Magnetism" (Kegan Paul); Kingsbury's "Practice of Hypnotic Suggestion" (Wright); Courmelles "Hypnotism" (Routledge). For the bibliography of hypnotism, Index Catalogue of Library, Surgeons General's Office, U. S. Army, vol. vi.

Ibsen, Henrik, Norwegian dramatist and poet, was b. in 1828, at Skovn. The childhood of his "Peer Gynt" is said to be largely autobiographical. After serving his apprenticeship to an apothecary, he went to Christiania Univ. to study medicine. In '50 he produced his first play, "Catilina"; and in '51 was appointed director of the National Theatre at Bergen by Ole Bull. In '52 he travelled for a time in Denmark and Germany; and in '57 he received the post of director of the Norske Theatre at Christiania, which he managed till '62. During this period several of his plays were written and produced. Most of his works are translated into German, and some into English. His "Doll's House" was produced at the Olympic, in London, July '89. The realisation of an epicene ideal seems to be the aim of Ibsen's dramatic teaching. The "Pillars of Society" contains perhaps the best embodiment of his social philosophy. His drama *Rosmersholm* was produced at the Vaudeville Theatre on Feb. 27d, '91, and excited curiosity. It was followed by *Ghosts*, and *Hedda Gabler*.

Iceland. A large island, 130 m. east of Greenland, and 850 m. west of Norway, belonging to Denmark. Capital Reykjavik. Exports, sulphur, Iceland moss, wool, dried fish, sealskins and oil, whale-oil and baleen, cider-down, bird-skins and ponies. Manufactures domestic.

After a previously unsuccessful attempt, Mr. F. W. W. Howell succeeded, on Aug. 17th, '91, in reaching the summit of Öræfi Jökull, the highest mountain in Iceland. Its height proves to be 6,550 feet.

Illegitimacy, Law as to, in '91. The House of Lords has affirmed the judgment of the Scotch Court of Session, deciding that under the law of Scotland a mother is not entitled to compensation for the death of her illegitimate son.

"Illustrated London News", established 1842, published weekly, contains illustrations of a high order, bearing upon current events and subjects of interest, with explanatory letterpress. The popular weekly article, "Our Note Book," is written by Mr. James Payn. Other contributors include Mr. Clement Scott, Mr. Andrew Lang, and Dr. Andrew Wilson. A list of wills of persons deceased, and an obituary, form interesting features of the paper. Editor, Mr. Clement K. Shorter.

Imperial British East Africa Company, was incorporated in 1888 to administer and develop certain territories on and behind the Suahili coast of Africa. By the treaty concluded in '90 between Great Britain and Germany, the former's "sphere of interest" was declared to extend from the Umbe river north and west to the Juba river and the basin of the Nile. Mombasa is now a British port, and the

centre of this territory. Late in '87 the Seyyid of Zanzibar ceded to the Association all his rights over the coast from Port Wanga to the German port of Witu. Since then this concession has been extended to all the Sultan's possessions north of the Tana, and the term extended to perpetuity. He has also granted the Company exclusive rights of Government banking and note issue in Zanzibar and Pemba. The German Protectorate has been withdrawn over Witu and the coast north to Kismayu, all of which is now under the administration of the British East Africa Company. The annual rent payable to the Sultan in respect of all the ports from Wanga to Kismayu is \$80,000, but last year the collections on the coast between Wanga and Kipini alone exceeded \$86,000. The administration of the very important ports of Lamu and Kismayu has only been taken over by the Company since June '91. A thorough survey of the harbours of Mombasa and Kilifi has been made during the past year. Two iron piers with steam cranes are now in course of construction at Mombasa. A line of land telegraph has been constructed, and is in operation from Mombasa to Melindi, and is now being continued to Lama *via* the Tana and Witu. Arrangements have been made for banking purposes, and the Company has now its own copper and silver coinage. In the terms of the Sultan's concession, he received the revenue of the customs up to August '80, when the company took over the entire administration. The Administrator is Mr. E. J. L. Berkeley, late H.M.'s Vice-Consul at Zanzibar. President, Sir W. Mackinnon, Bart., C.I.E. Offices, 2, Pall Mall East, S.W.

Imperial Federation. The question of what is to be the permanent relation in the future of the various self-governing countries of the British Empire had exercised the minds of many men before the meeting of a Conference held in '84 under the chairmanship of the late Right Hon. W. E. Forster, at which the **Imperial Federation League** was formed, with that statesman as its first chairman. Since that date the subject has been actively canvassed in the press, in the magazines, and on the platform. The conditions of the problem to be solved are these: The British Empire consists, on the one side, of the United Kingdom with its dependencies—namely, India, the Crown colonies, and the fortresses, such as Malta, Gibraltar, Bermuda, etc.; and, on the other, the self-governing colonies, which may be grouped as Canada, Australia and South Africa. The United Kingdom and its dependencies are the territorial property of the United Kingdom, and are governed by that country in various degrees. The self-governing colonies are the territorial property of the people who inhabit them, and they govern themselves entirely as regards internal affairs. The right of Her Majesty to withhold consent to any law passed by a self-governing colony is still maintained; but there are no means of enforcing a veto, and it is never exercised. The Imperial expenses—namely, those entailed by the Army, Navy, the Foreign Office (with the Diplomatic and Consular services), and the Colonial Office, are borne solely by the taxpayers of the United Kingdom; and, on the other hand, the self-governing colonies have no constitutional voice in the direction of the affairs administered by those offices. Yet their agents have access to Her Majesty's Ministers, and admittedly exer-

cise considerable influence upon their policy. The people of the colonies also claim and receive the services of these institutions, which are provided exclusively by the funds of the United Kingdom. It is very evident that such an anomalous and one-sided arrangement cannot much longer continue. The question is, What relation of a permanent character should be gradually substituted for it? (1) Shall the United Kingdom cease to bear the burden and responsibility for the external relations of these countries and their increasing populations over whose acts she can exercise no control, and devote herself to the protection and development of those dependencies which are really hers? or (2) Shall she take these countries (supposing them to be willing) into a regular partnership in the Empire, admitting them to proportionate control and responsibility in respect of Imperial affairs, to the expense of which they would proportionately contribute? This last is the course favoured by the Imperial Federation League. The existing arrangement is, however, so much to the present material advantage of the self-governing colonies (who thus enjoy all the advantages of the citizenship of a great Power, coupled with immunity from taxation and complete freedom of action), that it is unlikely they will take the initiative in introducing any change. So long as times are peaceful they cannot be in a better material position. In troublous times the necessity for making certain provision for their defence would be brought home to them, and there is little doubt that the cheapest and most effective manner in which this could be done would be by combination with one another and with the United Kingdom. The Imperial Federation League urges upon the colonies that this action should not be neglected until the hour of danger, but should be carefully considered now, and the necessary preparations made in time of peace; since a decision of such importance taken in the hurry of a crisis would not be likely to be a wise one. At the same time it urges upon the United Kingdom the danger of allowing itself to remain responsible for the acts of countries over which it has no control, and as to the future position of which no pledge or understanding exists; and points to the injustice entailed upon the taxpayer by the existing state of affairs. To both it points out the great advantages which would follow from a combination of the resources of a world-wide Empire which includes all the national strongholds as well as the bulk of the temperate regions of the globe. The Earl of Rosebery succeeded Mr. Forster as President of the League, which includes members of all shades of politics. Addresses are delivered throughout the country during the winter months by Mr. G. R. Parkin and others. In June '91 an influential deputation urged upon Lord Salisbury the desirability of summoning a similar Conference to that which assembled in '87, which could consider the relations of self-governing colonies to the Empire. The Prime Minister dealt with the matter in a favourable and sympathetic manner. The Central Offices of the League are at 30, Charles Street, Berkeley Square, London, W. Sec., A. H. Loring. Sec. for the United Kingdom, R. J. Beadon. Organ, *Imperial Federation* (monthly).

Imperial Institute of the United Kingdom, the Colonies, and India. This Institute, which is to stand for all time as a record

of Her Majesty's Jubilee, has been taking shape since January 1887. (For history of the origin of the Institute see ed. '87, and for detailed statement of its special objects see ed. '88.) In the main, and as forming the ostensible aims of the Institute, there may be said to be the formation of complete collections of the natural products of the British Empire, the establishment of a system of commercial intelligence to work with and supplement the display of the specimens, and the practical adaptation of both to the purposes and advancement of trade. The Government of the Institute is now carried on by a chartered body, whose form of constitution was approved by a Royal warrant, dated April 21st, '91. The **governors** are 125 in number, 12 being nominated by the Sovereign, 6 by the President, 36 by Colonial Governments, 15 by the Government of India, 21 by county and municipal authorities of the United Kingdom, and 26 by the various learned and technical societies and institutions of the Empire. The full complement is made up with certain *ex-officio* governors, who are principally high officials of the State. After some considerable negotiations it was determined that the **site of the Institute** should be the southern portion of the land on which the successful exhibitions of '83-4-5-6 were held; and there appears a special fitness in the site when we bear in mind that this property belonged to the Commissioners for the Exhibition of '51, and was originally acquired out of the profits of that first great display in which the Prince Consort took so deep an interest. Throughout the whole of '87 the **Organising Committee** (as the temporary governing body was named) were inviting and receiving subscriptions; and both the Queen and the Prince of Wales specially marked their interest in the Institute by subscribing. For some time the Colonies held aloof; but first the **Indian Princes** subscribed handsomely, then the Canadian Dominion voted £20,000, and the Australasian and other Colonies eventually came forward with official and private subscriptions representing nearly £100,000. Altogether about £450,000 have now been contributed or promised, the share of the **United Kingdom** being about £250,000, **India** over £100,000, and the Colonies nearly a similar amount. On July 4th, '87, Her Majesty laid the **foundation stone** of the building. The spot selected for the stone, which is of Colonial granite, is where the Central Avenue of the late Exhibitions was placed, near the entrance to what was Old London; and the building faces southward upon a new roadway—the Imperial Institute Road—which runs through from Exhibition Road to Queen's Gate, near where the main Indian Court was situated in '86. The design selected was that by Mr. T. E. Colcutt, who is the architect. The structure covers, with its galleries, nearly eight acres of ground. The **estimated cost** of erection is nearly £100,000. During '88 a Commercial Intelligence Department and School of Modern Oriental Languages were announced as being in active formation; the organisation of the latter was completed in '89, and it commenced actual teaching in Jan. '90. It was endowed in '91 with three **scholarships** in memory of the late Colonel Ouseley. The work for the year '89 was of a most important character. Lord Herschell left in the autumn of '88 for India, and took advantage of his journey to negotiate with the Government of India for the supply of sample collections of

natural products, and the transmission of reliable intelligence concerning them to the Institute. With a similar object, Sir J. R. Somers Vine (*q.v.*), the assistant secretary, was despatched in Dec. '88 on a mission to the principal British colonies, which occupied him nearly two years. The results of this tour—during which he visited Aden, Ceylon, Penang, Malacca, Singapore, Johore, Java, New Guinea, Queensland, New South Wales, Victoria, South Australia, Tasmania, New Zealand, the Samoan Islands, the Hawaiian Islands, all the provinces of Canada, certain portions of the United States, Jamaica, Barbadoes, and other West Indian islands, Cape Colony, Bechuanaland, Natal, Mauritius, East Africa, Zanzibar, and the Semoli territories—were exceedingly satisfactory. The interest of the colonies in the work of the Institute was aroused, and their practical co-operation promised. The buildings will probably be opened in '92 with a special exhibition. **Secretary**, Sir Fredk. Abel, K.C.B., D.C.L., F.R.S.; **Assistant Sec.**, Sir J. R. Somers Vine, F.R.G.S., F.S.S.; **Offices**, Imperial Institute, Imperial Institute Road, S.W.

Income Tax. See **SESSION, sect. 23.**

Income Tax, Law as to, in '91. An important case, raising question as to the exemption of charitable funds from the payment of income tax, was decided by the House of Lords (July 20th, '91). By the Income Tax Act property vested in trustees for charitable purposes is exempt from income tax, but the point was whether property held by the **Moravian Body** for the promotion of missionary work among the heathen could be considered as relating to charitable purposes. The majority of their lordships held that the term "charitable purposes" must be used in the wide sense so long recognised by the law, and that the trust in question was entitled to exemption. A minority of their lordships took another view, Lord Bramwell holding that if the conversion of the heathen was a charitable object, the same term must be applied to the provision of faggots and racks in days gone by.—In **Langston v. Glasston** (Queen's Bench Division, Feb. 6th, '91), it was held that officers of collegiate or other corporate bodies are liable to be assessed for income tax upon their stipends.—The **Reid Brewery Co. v. Male** raised the question whether London brewers who make advances to their customers can deduct bad debts from the amount to which they are assessed for income tax. The Queen's Bench Division (Feb. 9th, '91) held that the lending of money to customers was an adjunct to the brewers' business, and not a separate business, and that therefore the losses made ought to be deducted. In **Bowers v. Harding** (Queen's Bench Division, Feb. 5th), the respondent and his wife held the offices of schoolmaster and schoolmistress of a national school at a joint salary of £150 a year, he also having £10 a year as choir-master, making £160 a year. He was allowed certain deductions under 16 & 17 Vict. c. 34 and 54, for life insurance, and also under 39 & 40 Vict. c. 76, sect. 8, which would leave £28 a year on which he was assessed to income-tax. He, however, claimed a further deduction of £30 a year in respect of the wages and board of a servant as necessary to enable the wife to perform the duties of her office as schoolmistress. The commissioners allowed the claim of exemption, the effect of which was to exempt the schoolmaster from assessment altogether.

The surveyor of taxes, however, appealed, and the Court held that the exemption was wrong, on the ground that the appointment of a servant was not an expense "wholly and necessarily incurred in the performance of the duties of the office."—In the case of the *Bank of Mexico* (Queen's Bench Division, Jan. 19th, '91) it was held that the profits made abroad, though never received in this country, were assessable to income tax, as it was impossible to draw an exact line between the operations of the bank in Great Britain and in foreign countries.—To the general principle that charities are exempt from income tax some exceptions must be made. Thus, the profits obtained by the trustees of the Baptist Psalms and Hymns were held to be liable to assessment, despite the fact that they are applied to charitable purposes.

Income Tax, Rate of, 1842-92. £100 but under £150: '53, '57-8, 5d. in the £; '54, 10d.; '55-6, 11d.; '59, 6d.; '61-2, 6d. £150 and upwards: '42-52, and '57, 7d.; '54, 1s. 2d.; '55-6, 1s. 4d.; '58, 5d.; '59, '61-2, 9d.; '60, 10d. Uniform duties on Incomes of £100 a year and upwards, with abatement of £80 on Incomes under £200: '63, 7d.; '64, '68, '71, 6d.; '65-6, '70, 4d.; '67, 5d. Abatement extended to £80 on Incomes under £300: '72, 4d.; '73, 3d.; '74-5, 2d. Exemptions extended to Incomes under £150, and abatements to £120 on Incomes under £400: '76-7, 3d.; '78-9, '81, '83-4, 5d.; '80, '84, 6d.; '82, 6d.; '85-6, 8d.; '87-8, 7d.; '88-92, 6d. According to a statement of the Chancellor of the Exchequer, a man whose income is under £150 a year cannot claim exemption from income tax if income derived from his wife's separate estate brings the amount above £150.

Incorporated Law Society, The. From some papers recently discovered at the Incorporated Law Society it appears that in the year 1739 a society called the "Society of Practisers in the several Courts of Law and Equity" was established, for the promotion of fair and honourable practice and the detection and discountenance of all unfair practice. The Society was during its existence also very active in carrying into effect many professional improvements, as well as a variety of changes in the law. This Society, which was supported by subscription, continued in active existence from that time till 1820, from which period all trace of it is lost. From '10 to '25 solicitors were without any sort of professional organisation beyond a few local societies. In that year certain leading solicitors issued a prospectus advocating the establishment of a "Law Institution." A committee was formed to give effect to the prospectus, and raised in the form of shares the capital necessary to provide a building and everything else necessary for the Institution. The deed of settlement was completed in February '27, and a Royal charter was obtained in December '31. In '45 the Society, which had been originally constituted as a joint-stock company, was remodelled upon the principle of other learned and professional bodies, and received a new charter. This charter was amended by a supplemental one in '72. Any solicitor practising in England or Ireland, and any writer practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten

vacate their seats every year, and ten extraordinary members chosen by the council from among those members of the Society who are presidents of provincial law societies. The President and Vice-President are annually elected by the members of the Society from the members of the council. In '91 the Society met at Plymouth, under the presidency of Mr. W. M. Walters. The members of the Society at present exceed 6500. Its buildings are situated in *Chancery Lane*, and comprise a handsome hall and a library of nearly 30,000 volumes. The general function of the Society resembles that which the Inns of Court are supposed to discharge. It takes care of the professional training, character, and interests of the profession. When it was founded no test was required from any person wishing to become a solicitor beyond evidence of character and of having served under articles for the prescribed time. The Society instituted lectures on law in '33, and in '36 obtained from the judges authority to examine students on the completion of their articles. Since then **Preliminary and Intermediate Examinations** have been added, and the entire control of all the examinations has been transferred to the Society. Under recent legislation, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the High Court. The Society exerts itself to promote what it considers the legitimate interest of the public and of the profession. It has also assisted in promoting reforms beneficial to the whole community, such as the concentration in one building of the various Courts, or the *Conveyancing Act of '81*. The improved standing of solicitors is in part due to the exertions of the Society. See, E. W. Williamson; Assistant Sec., Mr. G. P. B. Bucknill. Office, Chancery Lane. Consult the *Calendar*.

Incorporated Society of Authors, established in 1884 by Sir F. Pollock, Cardinal Manning, and other eminent literary men, under the presidency of Lord Tennyson. Its object is to defend the interests of literary property, to maintain authors' rights, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works. Also to further the establishment of an **International Copyright Union**—which has now been fortunately accomplished—and to procure in England the passing of an Act which shall amend and consolidate the law of Domestic Copyright. This bill has been twice read in the House of Lords, being brought forward on the motion of Lord Monckswell. It is the only association of the kind in England, but its model, "*La Société des Gens de Lettres*," has been flourishing for over fifty years in France. The works published by this Society are "Grievances of Authors," "Literature and the Pension List," "History of the *Société des Gens de Lettres*," "The Cost of Production," and "The Methods of Publication." The organ of the Society is *The Author* (monthly); and it has issued various circulars and reports. It has also been enabled to point out to the Secretary of State for the Colonies certain infringements of the Copyright Law, and so to secure the punishment of the offenders. Office, 4, Portugal Street, Lincoln's Inn Fields, W.C. Chairman, Walter Besant (q.v.). Sec., S. Squire Sprigge. Office hours, 2 to 5 p.m.

Independent Order of Oddfellows. See ODDFELLOWS.

India. A dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, which are all subordinate, in varying degrees of relationship, to the suzerain power. The British territory was acquired by the **East India Company**, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857-58), the East India Company ceased to exist; and the direct sovereignty was vested by Act of Parliament in the Crown. The more powerful native chiefs continue to exercise every function of government within their own dominions, but their external relations are subject to the control of a British Resident. In other words, they have no international independence. In accordance with an Act of Parliament passed in '76, Queen Victoria assumed the title of "*Empress of India*," *Kaisar-i-Hind*. The **Parliament of the United Kingdom** is, of course, supreme over India; but this supremacy is enforced rather by means of ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions. The Act of Parliament that abolished the Company, also created a **Secretary of State for India**, together with a **Council** (selected from among Indian officials for the most part), in whom is vested the authority of the Crown. In England, every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice, he is always a cabinet minister of the first rank. In India, the supreme authority, both executive and legislative, is vested in the **Governor-General in Council**. The Governor-General, or Viceroy, who is usually a peer of political distinction, has power to overrule his Council in cases of emergency. For ordinary purposes, the council is composed of some six members, all appointed, like the Governor-General himself, by the Crown. One of these is the **Commander-in-chief**; another must have legal qualifications; another has charge of finance; another may be appointed with special reference to public works; the rest are usually experienced members of the civil service. For purposes of legislation, this Council is augmented by about twelve additional members, nominated by the Governor-General, of whom one-half must be non-official persons, and of whom some are always natives. The seat of the supreme government is Calcutta, with an annual migration to the hill station of Simla for the hot season. As regards the work of administration, India is divided into eight or more provinces. Two of these, Madras and Bombay, which boast an historic existence for two centuries, are styled **Presidencies**, and enjoy a certain precedence. They are each ruled by a Governor, appointed by the Crown, with councils modelled on that of the Governor-General. They each possess an army and a civil service of their own. Three of the other provinces (Lower Bengal, the North-Western Provinces, and the Punjab) are under a **Lieutenant-Governor**; and Bengal and the North-Western Provinces each have legislative councils. Three more, of less importance (the Central Provinces, Burma, and Assam) are under a Chief Com-

missioner. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces, the actual unit of administration is the **District**, which forms the charge of an officer, usually styled **Collector**. His principal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. Judicial functions are, as a rule, vested in other hands, subordinate to the High Courts, with an ultimate appeal to the Privy Council in England. The staff of administration consists of: (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives; (3) military officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives. The total area of India, including the outlying province of Lower Burma (but not the recent acquisition of Upper Burma), and the settlement of Aden in Arabia (which is subordinate to Bombay), amounts to 1,378,044 square miles; and the total population, according to the census of 1891, numbers 285,000,000 persons. The area of British territory alone (excluding native states) is 868,314 square miles. In the official year ending March '91, the estimated revenue of India was Rx. 48,420,400, of which Rx. 4,908,000 was derived from the land (being in the nature of rent); Rx. 8,233,000 from the salt tax. The estimated expenditure was Rx. 48,150,000, showing a surplus of Rx. 270,400. The railways of India have been constructed by private companies to which the State guarantees interest, or directly by the State. The total number of miles open is somewhat over 16,500. In the year ending March '89 the total value of the merchandise imported into India amounted to Rx. 66,579,318, and of the merchandise exported Rx. 96,978,171. The net importation of treasure was Rx. 13,844,959; the exportation of treasure Rx. 1,703,496. In '89-90 the established strength of the army was 72,895 Europeans; 349,835 natives; total, 422,730 officers and men. The total number of schools and colleges ('88) was 133,325, attended by 3,473,895 pupils, of whom only 280,285 were girls; the total expenditure on education was Rx. 2,637,012, of which Rx. 736,955 was defrayed by the State. In Dec. '88 Lord Lansdowne (q.v.) assumed the viceroyalty in succession to the Marquis of Dufferin and Ava. — **HISTORY.** **POLITICAL.** During the month of Dec. '90 the Factory Commission issued its report, of which the following is a summary: First, the limitation of the hours of work for women to 11 daily, is proper and sufficient. Female operatives do not desire the present hours shortened; on the contrary, many have expressed themselves strongly against any interference which may lead to their losing their means of livelihood. Secondly, the Commission, after anxious consideration, recommends that no separate class should be recognised by law as young persons, and that the difficulty should be met by raising the minimum age of children to fourteen. Thirdly, regarding children, the Commission is of opinion that, except under the shift system, nine hours is too long; that nine hours in shifts for only four days—that is, 36 hours weekly, as is the practice in Bengal factories—cannot be considered overwork; that nine hours on the

shift system, even if it entailed 54 hours weekly, would not be too severe; that any change would lead to the reduction of wages; and that in mills outside the Bengal shift system, half-time is the only solution of the question, and children should not work over 6½ hours daily. Fourthly, women and children should have one holiday in every seven days, preferably Sunday, as should also male adults, except where continuous production is necessary. Fifthly, operatives desire that the present working day—that is, from daylight to dusk—should be continued. The Commission did not think legislative interference in the hours of adult male labour desirable. Talshima, a Tushai chief, submitted. The Kidderzai chief, Mustaza Khan, and three other chiefs, surrendered. There were large and disorderly meetings at Madras (14th and 18th) to protest against raising the age of consent in marriage, when it was resolved: "That this meeting recognises the evils of early consummation, but believes that such consummation rarely, if ever, takes place in the Madras Presidency, and protests against the proposed change as unnecessarily mischievous and calculated to disturb the people's minds." The Sixth National Indian Congress opened at Calcutta (26th), there being over 6000 persons present, of whom 1000 were delegates. M. Phewzshah Mervanji Melita, of the Bombay Legislative Council, presided. On the second day resolutions were passed approving Mr. Bradlaugh's Indian Councils Bill, praying the House of Commons to take up the Budget earlier in the session, and calling attention to the excise question. Native speakers discountenanced marriages between men over fifty with girls under twelve years of age. The Congress closed (30th), fixing the next meeting for Madras or Nagpur, '92, and one in England in the same year. The Commission appointed in Sept. to inquire into the causes of the abnormally high mortality in Madras, reported that the water supply and drainage were defective. '91. Steps were taken to complete the organisation of the Railway Service Corps. In the Legislative Council (Jan. 9th) Sir A. Scoble introduced a Bill to amend the law affecting rape by raising the age of consent in the girl from ten to twelve years, and to remove the offence between husband and child-wife to the class of non-cognisable. It was severely attacked by Sir Romesh Chunder Mitter, who said the Bill was an infringement of the Queen's proclamation on taking over the government of India. The Viceroy made it clear that no interference with the marriage law was intended. The Bill was (23rd) referred to a select committee. A number of meetings of Hindoos were held to protest against the Bill. There was a severe drought in Madras at the beginning of Feb. The Indian Association of Calcutta expressed to the Government its agreement with the principle of the Age of Consent Bill. The agitation amongst the Hindoos against the Age of Consent Bill continued to grow, and during Feb., as a Hindoo gentleman of position said, the Hindoos might be induced to accept it with the following safeguards: First, the age of puberty to be the age of consent; second, the complainant to be either the injured girl, her parents, or guardians; third, the offence not to be classed as rape. A meeting of over 4000 Hindoos was held in Bombay (23rd) in support of the Bill. The Delhi, Umballa and Kalka Railway was

opened for through traffic (Mar. 1st). Lady Lansdowne opened the Dufferin Zenana Hospital (2nd), and unveiled the bust of Lady Dufferin. The Select Committee on the Age of Consent Bill recommended that only a district or chief presidency magistrate be permitted to take cognisance, and that no police officer below the rank of inspector is to investigate a charge against a husband. The Bill was passed by the Council. Mr. J. W. Quinton, Chief Commissioner of Assam, went to Manipur (7. v.) with an escort of 400 Goorkhas (23rd), to inquire into the deposition of the Rajah by the hill tribes. On that date the escort was attacked, and it was reported that after fighting till all ammunition was gone (24th), the Commissioner and officers were captured, and over 300 of the escort were killed or missing. Before the attack on the Commissioner a party of 80 Goorkhas, under Lieut. Grant, left Tamu for Manipur. A force of 4,400 Manipuris, with two guns, attacked the fort of Thobal (April 6th), which he was holding, and were impeded with considerable loss, no casualties occurring on the side of the defenders. For this gallant service Lieut. Grant was raised to the rank of Major. A telegram from the Viceroy announced sharp fighting on the Samana Range, and that several tribes had risen. Mr. Quinton and the other prisoners were subsequently massacred by the Manipuris. Three columns were at once despatched to Manipur to rescue the prisoners and punish the revolters. The columns reached the city (26th), and found the magazine blown up and the place sacked from end to end. It was reported (May 10th) that the Senaputty was captured. The papers were published (10th), from which it appeared that the Government and Mr. Quinton did not accept Mr. Grimwood's view of the matter, but considered the deposition of the Senaputty necessary; that no one anticipated serious resistance, and that the plan of causing the arrest at the durbar originated with Mr. Quinton. The State executioner said he beheaded all the prisoners except Mr. Grimwood, on the orders of the Senaputty and Tonga General. The native who speared Mr. Grimwood was sentenced to death. The Senaputty was arrested (2rd). The Miranzai expedition ended (23rd), the total English loss being 100 killed and wounded. Drs. Rake and Buckmaster, of Simla, succeeded (June) in cultivating the leprosy bacillus in serum. The Court appointed to try the Senaputty found him guilty (13th), and he was sentenced to death. Locusts appeared in the Bkhar district of Bengal. The Regent of Manipur was found guilty (20th), and he was sentenced to death, as was also Prince Angao Sena. The Regent and Senaputty petitioned against their sentence. Locusts appeared at Chobah Nagpore (July), and did much damage to the crops. The sentences on the Senaputty and Tonga General were confirmed, and they were hanged (Aug. 13th); those on the Regent and Prince Angao were commuted to transportation for life and forfeiture of goods. The editor, printer, and publisher of the Bengalee journal, *Bangabasi*, for articles describing the government of India as one of brute force, and attributing to it the growth of disease, were prosecuted at Calcutta (10th). The case concluded (24th), the jury disagreeing, and it was remitted to the next sessions. It was decided (Sept.) that Chura Chand, five years of age, a collateral relative of the ex-Maharajah of Manipur, should be de-

clared Rajah, and that the State should be administered by a British officer till his majority. Tribute would be established. Cholera broke out on two British war vessels, the *Marathon* and *Redbreast*, stationed at Bombay; 15 deaths occurred. The defendants in the press prosecution tendered an apology which was accepted, the case will not be proceeded with. The Viceroy reached Srirang (Oct. 23rd), where he was met by the Maharajah and his ministers. It was reported that Captain Younghusband had arrived at Gilgit with Lieutenant Davidson. The new docks at Calcutta were used for the first time (30th). A cyclone passed over the Andaman Islands (Nov.) doing enormous damage and sinking the *Enterprise*, of the Indian Government Marine; about 80 persons went down with the vessel. Sixty convicts were killed and 200 injured by falling buildings.—**GENERAL.** The report of the Savings Banks issued in Dec. showed that there were 6546 banks with 431,840 accounts, having an aggregate balance of Rs 75,417,218, the interest paid during the year being Rs. 5,710,057. The total depositors in the P. O. Savings Bank was 358,272. It was announced (11th) that four Hindustani regiments in the Bengal army were to be converted—namely, the 33d became a battalion of Punjab Mohammedans; the 38th, Dogras; the 39th, Gooikhas; the 40th, Beloches and trans-frontier Pathans. The Myingyan levy will become the 4th Burmah Infantry, in place of the 32nd Madras Infantry which was about to be disbanded. Mr. W. S. Caine delivered addresses at Madras on the Indian Excise system and Congress (13th). One man was killed and many wounded in disturbances during the election at Pondicherry. A house in Bombay collapsed (17th), killing 30 persons and injuring many. '91. Calcutta University for the first time submitted two names for appointment as Fellows (Jan. 4th). The two persons who built the house which collapsed were arrested (5th). The police of the Talpuri district broke up two dacoit bands, killing the leaders Saroop Singh and Mahip Singh. A fire occurred at Poonah (12th), by which 200 houses were destroyed. The through connection of the Bengal-Nagpore Railway was completed (19th), and opened (Feb. 1st). At the general meeting of the Dufferin Fund (26th), satisfactory progress was reported. It was estimated that 100,000 pilgrims visited Calcutta for the great bathing festival, Andhojog Jog. Communication between Herat and Tukestan was stopped for some days (26th), this being the severest winter known for fifty years. The census was taken (26th). The Budget statement for 1892 was published (Mar. 20th); the estimated revenue was Rs. 86,025,300, and the expenditure Rs. 85,009,700. The Viceroy opened the Gola Pillibheet Railway in Oude (28th), which completed the direct connection between Pillibheet and Lucknow.—**SOCIAL.** A subscription was (Dec.) started to secure a portrait of Lord Comemara. The Senate of Calcutta resolved to make itself a teaching as well as an examining body, by adding some professorships. The scheme was forwarded to the Government for consideration. Mr. W. S. Caine was elected as one of the Calcutta deputies to the Congress (33rd). The Czarewitch landed in Bombay. About 600 Mohammedan gentlemen met (28th) at Allahabad to consider questions connected with education. The 14th anniversary of the proclamation of the Empress of India was celebrated (31st)

by a parade of the troops, and a State banquet given by the Viceroy in the evening. The Czarewitch visited Calcutta (Jan. 26th). The number of persons employed on relief works was 8090 in Chingleput, 11,399 in North Arcot, 6716 in Coimbatore, about 4500 in Salem, 3582 in Nellore, 1984 in Cuddapah; numbers on gratuitous relief, 2161 in Chingleput, 4708 in North Arcot, 434 in Coimbatore. Good rain fell throughout the country (Oct. 9th). The publisher of the *Marathi*, a monthly magazine, was sentenced to three months' imprisonment, and to pay a fine for libelling Modak Mann Tycars, principal of the Elphinstone High School.

India, Imperial Order of the Crown of, was instituted January 1st, 1878, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of Her Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives and other female relatives of any of the persons who have held, now hold, or will hereafter hold the office of Viceroy and Governor-General of India, Governors of Madras and Bombay, or Principal Secretary of State for India. Registrar of the Order, Sir Albert W. Woods.

India, The Most Exalted Order of the Star of. Established by letters patent in 1861, and enlarged in '66 and '78. Its badge is a light-blue ribbon with white stripes edge-wards, and with motto, "Heaven's Light our Guide." It consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and three classes of members:—

G.C.S.I. . . Knight Grand Commander.

K.C.S.I. . . Knight Commander.

C.S.I. . . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." Of the first class there may be by the statutes of the Order be 30, of the second class 72, and of the third (or Companions) 144; but extra and honorary members may, and have been, from time to time appointed (see KNIGHTHOODS CONFERRED DURING '91). The Registrar of the Order is Sir Albert W. Woods, and the Secretary is the Foreign Sec. to the Government of India.

Indian Association, National. Established in 1875 for the purpose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India. The Association attempts to carry out these objects by the diffusion of information; by grants in encouragement of education, especially of female education, in India; promoting the employment of medical women in India; selecting English teachers for Indian families and schools; and helping Indian teachers and students visiting England. The Princess of Wales is Patroness of the Association, and Lord Hobhouse, K.C.S.I., the President. The Vice-Presidents include a large number of influential natives of India, Anglo-Indians, and other ladies and gentlemen interested in the welfare of the Empire. **Organ of the Association, The Indian Magazine** (monthly). There are several branches of the Association in India. **Hon. Sec.** in England, Miss E. A. Manning, 35, Blomfield Road, Maida Hill, London, W.

Indian Civil Service embraces a much wider field of employment than does the Home Civil Service. Besides the ordinary departments of civil administration, it includes

judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. Appointments in the Indian Civil Service are highly prized, and can only be obtained at the expense of much labour and energy. Situations in the Covenanted Civil Service are gained by passing a competitive examination in England—which examinations are as a rule held once a year in London. The candidates who have successfully competed are required to undergo two years' probation, and to pass periodical examinations in special subjects of study before proceeding to India. The limit of age for candidates is from 17 to 29 on the 1st of January of the year in which the examination is held, applications for admission to which must be made before the 1st of April. It has been announced that from 1891 the standard of age will be raised to 21. Candidates are encouraged, though it is not imperative, to obtain a university training; and to this end the Government makes an allowance of £150 per annum to all who pass their two years' probation in residence at a university; and as a further incentive, an additional bonus of £150 is granted to any student who, after remaining a third year at the university, obtains a degree in honours at Oxford or Cambridge. Having arrived in India, the candidate must within a specified period elect to serve either in the executive or the judicial branch of the service. In the former branch the lieutenant-governorship of a province is the highest post to which a civil servant can attain, and in the latter branch a judgeship of the High Court. A covenanted civil servant in India commences with a salary of 4800 rupees a year, and the number of such civil servants is about a thousand at the present time. The members of the Statutory Civil Service of India are selected partly from among the natives. Many appointments are in the gift of the local governments; but no one who is not a native, a covenanted civilian or an officer of the staff corps, can be appointed to a post with a salary exceeding 400 rupees a month without the approval of the Indian Government,—from which rule a few departments are excepted. The Public Works Department is recruited from the Royal Indian Engineering College (*g.n.*) at Cooper's Hill, from the corps of Royal Engineers, and, as regards natives, from the Civil Engineering Colleges in India. The commencing salary of appointments in this department is 4200 rupees a year; in the Telegraph Department, recruited much in the same manner, it is 3000 rupees a year, which is also the commencing salary in the Forest Department. Examinations for the Medical Service are also held in this country, and successful candidates are required to attend a four months' course at the Army Medical School at Netley, during which period they receive an allowance to cover the cost of living.

Indian Councils Bill. See Session, sect. 75a.

Indian Empire, The Most Eminent Order of. Instituted in 1878 to commemorate the proclamation of Her Majesty as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This order consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and of three classes of members, viz., Knights Grand Commanders (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Only the two first

of these, being knights, are entitled to the prefix "Sir." The motto of the order is "*Imperatrix Auspiciis*" (Under the favour of the Empress). See KNIGHTHOODS CONFERRED DURING '91.

Indian National Congress. Within the last few years a movement has taken definite shape among the educated classes of India of all races, religions, and provinces—to meet together and discuss their political wants. Hitherto, the people of India have been widely separated from one another by differences of language, creed, and caste; and these differences have been intensified by distance. It is the English Government that has for the first time made it possible for them to unite in a common object.

The original stimulus came from the education in English, which is given in all the colleges and higher schools, and in many of the common schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first National Indian Congress was held at Bombay in Dec. '85. The president was Mr. W. C. Bonnerjee, a Bengali Brahmin, and standing counsel to the Government of India. The second congress was held at Calcutta in Dec. '86; the president was the Hon. Dadabhai Naoroji. The meetings were held in public; and the Viceroy (Lord Dufferin) invited the members—in their private capacity, as "gentlemen of more or less distinction and culture"—to a garden party. At the third congress, held at Madras in Dec. '87, the number of delegates rose to 607; the president was Mr. Budhadin Tyabji, the leading Mussulman barrister of Bombay. The fourth congress was held in Dec. '88, at Allahabad, the capital of the North-Western Provinces, under the presidency of Mr. Geo. Yule, a well-known Calcutta merchant, and former president of the Chamber of Commerce. The number of delegates who attended was 1248. The fifth congress was held at Bombay in Dec. '89, under the presidency of Sir W. Wedderburn, Bart., formerly chief secretary to the Government of Bombay. The number of delegates was 1890, and several thousands of visitors were present. The resolutions adopted at all the congresses have been of a very similar character. Questions of social reform—such as child marriage—have been altogether avoided, as affecting only special religions and castes. Loyalty to the British Crown has been unhesitatingly avowed, both in the resolutions and in the speeches; but certain political changes in the administrative system have been as unhesitatingly demanded. First is placed the introduction of a representative element (in the form of a proportion of the members being elected) into the councils of the Viceroy and of the governors of provinces, so that the inhabitants of the country may have some voice both in the making of laws and in the levying of taxation. Second, perhaps, in importance comes a demand that the natives should be treated with greater confidence in the matter of self-defence—(1) By being admitted to the higher ranks of the army; (2) by being allowed to form volunteer corps; and (3) by being no longer prohibited to possess and wear arms. Other resolutions call for the appointment of a Royal Commission to inquire into the working of the Indian administration, for the entire separation of judicial and executive functions, for the extension of trial by jury, and for the introduction of a system of technical education. The proceedings at the Congress have always

been marked by unanimity, this unanimity being attained after exhaustive discussions in the various Standing Committees (of which there are 27) and the Subjects Committee, the latter a body of one hundred, selected from the assembled delegates. This was especially observable in '89, when the Mohammedan delegates at first opposed and afterwards fully accepted the Council's reform resolutions. It has, unfortunately, been found impossible to reconcile all classes of Mohammedans to the Congress proposals. The Mohammedans of Northern India, led by Sir Syed Ahmed Khan of Aligarh, profess that they prefer English rule as it is to Hindu rule as they suppose it might be. They do not oppose the resolutions of the Congress so much as to decline to act with the Hindus in pressing for their realisation. A few of the great Rajput landholders have also taken up a similar attitude of opposition. The Congress for '92 was held in December at Calcutta, under the presidency of the Hon. Phewshah Mehta, M.L.C. Bombay, a Parsee barrister of eminence in Western India. At this Congress it was determined, "all things being convenient," that the '92 session shall be held in London, over one hundred delegates at least to be present. Committees to make arrangements were appointed. The Congress for '91 was held in Nagpur, Central Provinces, and began on Dec. 26th. The political meetings of the Congress being ended, a Social Conference for the discussion of social reforms in the Hindu community is regularly held. From one-half to two-thirds of the delegates to the Congress attend this Conference. The official report of the various sessions of the Congress may be obtained from Wm. Digby, C.I.E., 25, Craven Street, Charing Cross. A monthly journal, entitled *India*, for the discussion of Indian affairs, is published at 25, Craven Street. It is edited by Mr. Digby, and is, in the main, a Congress paper. See INDIA.

Indiarubber. Indiarubber is the solidified sap of a tree principally found in South America. It is of a soft gummy nature, and easily decomposed by oily substances. **Guttapercha**, which is found only in the East Indies, is obtained from the gutta tree. It is a brownish gum, which solidifies by exposure to the air. There are solid varieties of rubber trees, and widely different qualities of gums. The best rubber comes from Para, a province of Brazil, and the second grade from the Amazon River. There is also a good quality found in the island of Madagascar, while the inferior grades come from Carthagenia, Central America, Assam, Java, Borneo, Africa, and other places. These inferior rubbers are largely sent to the American markets very much adulterated. To obtain the rubber, the gatherers make three or four incisions an inch wide with a narrow hatchet, cutting barely through the bark of the tree. Under each incision is placed a little tin can, into which the *borrache*, or rubber milk, exudes. Each gash will yield from two to three tablespoonfuls of the sap. This soon coagulates if not smoked, which process consists in pouring the milk over a paddle or round stick, and passing it through the smoke from a fire of palm-nuts, which causes it to thicken. The peculiar virtue of the smoke used has not been investigated, but smoke from wood will not answer. Great care is needed in the operation, lest part of the rubber

should coagulate. When this happens the product is termed extra fine, which is the middle grade between *borrache ana*, the best, and *sernamby*, which is the inferior and wholly coagulated material, as it is found oozing from the trees. When the milk ceases to flow each cut in the bark is coated by a thin film, which dries in the course of a few days. This *borrache*, or rubber, is considered to be the best of the crop, as it is usually free from adulteration. It is estimated that the rubber region of the Amazon covers an area of 645,000 square miles, exclusive of the rubber belts in Peru and Ecuador. Of this area about 15,000 square miles is being worked. The valley of the Orinoco has a belt of rubber trees which covers an area of 38,000 square miles, making the total rubber area of South America 950,000 square miles. The annual exports from Para and Amazonian provinces are about 128,000,000 pounds, of which 48 per cent. is sent to the United States. The Brazilian Government imposes an export duty upon rubber of 21 per cent. of official value. Of this, 9 per cent. goes into the treasury of the general government, and 12 per cent. into the treasury of the state government of Para. The money thus collected is used to pay subsidies, which are granted to the steamship lines which bring the rubber from the interior to Para, and also to those which transport it to New York and Liverpool.

Industrial Assurance Bill. See Session, sect. 76.

Inflammable Liquids Bill. See Session, sect. 77.

Inquests, Coroners'. The following are the verdicts found in the coroners' inquests held in the years '89 and '90:—

	1890	1889
Murder	159	167
Manslaughter	130	134
Justifiable homicide	4	3
Suicide or self-murder	2,154	2,135
Accidental death	11,342	10,521
Injuries, causes unknown	222	183
Suffocated whilst in bed with parents	1,389	1,331
Found drowned	1,479	1,201
Found dead	1,207	1,177
Executed	16	15
Natural death:—		
Excessive drinking	629	476
Disease, aggravated by neglect	183	174
Want, cold, exposure, etc.	207	222
Natural causes	12,131	10,861
Other causes	935	1,078
Total	32,027	29,675

The number of inquests on males was 20,097, as compared with 19,700 in '89, and on females 11,030, as compared with 9,975. The totals included inquests on 2641 male and 2394 female legitimate children of one year old and under, and 587 male and 503 female illegitimate children of the same age. The total costs were £103,201 14s. 1d., giving an average of £3 4s. 6d.

Institute of Painters in Oil Colours, Piccadilly, W. Founded 1883. The Exhibitions, which are held annually, commencing in November, are open to all artists, and the principle of selection is the same as at the Royal Academy (*q.v.*). Pres., Sir Jas. D. Linton, P.R.I.; Vice-Pres., F. Walton, R.I.; Sec., W. T. Blackmore.

Institution of Civil Engineers. Founded Jan. 2nd, 1818, incorporated by Royal Charter June 3rd, '28, and received a Supplemental Charter, with extended powers, August 3rd, '87, requisite for the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students. At the close of the last financial year (March 31st, '91) the numbers of these several classes were: members 1743, associate members 2065, honorary members 209, associates 422, and students 914: total 6664, of all classes. The sessions extend from the second Tuesday in November to the last Tuesday in May, the ordinary meetings being held on the Tuesday in each week. The record of the proceedings at these meetings is embodied in the *Minutes of Proceedings*. Besides the ordinary meetings there are every fortnight during the session special supplemental meetings for students only. The gross receipts were £61,174, including strict income £19,623, capital £4,137, and trust funds £413. The institution is possessed of three freehold houses, which cost £40,000, and its funded property amounts to £55,400, besides which it has under its charge trust funds of the nominal value of £15,286, aggregating £110,686. It has a library of upwards of 25,000 volumes, including 700 volumes of rare tracts, the number of which cannot be much less than 10,000. **Offices:** 25, Great George Street, Westminster, S.W.

Insurance.—ACCIDENT. The business of this branch is done by thirty-eight companies, who for certain premiums insure the payment of periodical sums for total and partial temporary disablement, and other fixed amounts on death or on total or partial permanent disablement. The *Railway Passengers Company* was the first established, which was in 1849. Its net premium income is £224,749. The percentage of claims to premiums of these companies is about £55. In reference, however, to this item, no definite returns can be made, as in the reports of some companies a portion of the working expenses is included in the amount of accident losses. Companies have been formed to insure *live stock* in case of total loss or accidental injury, and also to provide compensation upon the loss of partial injury to carriages and other road vehicles. These companies include the London and Provincial Horse and Carriage, the Imperial Live Stock and the Horse Insurance Companies. Many accident insurance companies also transact **Employers' Liability Insurance** and the insurance of workmen by collective policies against accidents for which the employers are not legally liable. There are twenty-four of these companies, of which the most important is the *Employers' Liability Assurance Corporation*, whose premium income is £287,562. Since its commencement in '81 it has paid in claims over £800,000. Under one class of policies employers are indemnified against their liability to pay compensation for injuries to their workmen, both under the *Employers' Liability Act* of '80 and at common law, up to the limit of three years' wages specified in that statute. Such policies also indemnify the employer against all costs incurred in defending actions brought by workmen for injuries sustained in his service. The premiums are calculated on an estimate of the annual wages paid by the employer. Very

many accidents which occur during employment are such that no compensation can be recovered against the employer. Joint policies are therefore granted to give the full indemnity under the Act and at common law as before mentioned, and also grant compensation in all cases of accident during occupation for which the employer is not liable. Many employers extend their insurance by joining with their workpeople under this system, so as to provide for every accident during occupation. The usual benefits under these joint policies to employers are one year's wages, limited to £50 in the event of death, and one-third of the weekly wages (not exceeding twenty-six weeks) during total disablement. The premiums for these policies are paid in full by the employer, who, by arrangement with the workpeople, deducts from their weekly wages their contributions, which for their benefits vary from 1d. to 3d. per week, according to occupation.

—HEALTH OFFICES. The *Health Insurance Association* and the *Sickness and Accident Association* answer a great requirement of the middle classes, as they pay weekly sums to those who are wholly or partially disabled from following their vocations on account of illness not resulting from accidents. These companies also combine accident and fidelity guarantee with health insurance. The premiums of the *Health Insurance Association* are £111, while the claims amounted to £139. The premiums of the *Sickness and Accident Association* are £17,102, and the claims come to £851. The management expenses of the former company are £4847, and of the latter £7431. **—Fidelity Guarantee.** About nineteen companies insure the honesty of employes in the exercise of their vocations by policies of insurance. Many objections exist against the guarantees of private bondsmen for this purpose; and an immense and rapidly increasing number of employers prefer policies of insurance, to secure themselves against loss by the dishonesty of their servants. An insurance policy will be granted in favour of any person having a good character. The premium varies according to his responsibility, nature of employment, supervision and remuneration. The lowest is 5s. and the highest about 60s. per cent. Clerks and cashiers are generally charged from 10s. to 30s., while travellers and collectors on small salary and commission are rated at £2 to £3 per cent. A new method of guarantee has recently been started for insuring staffs of clerks. By this system Guarantee Companies issue a collective policy which covers loss from a staff of employes of any number beyond five, so that their employer will be secured against loss by embezzlement on the part of this staff to the amount contracted for, on each of its members. The first company to transact fidelity guarantee insurance was the "Guarantee Society," started in '40. In addition to these companies, who insure employers generally against loss by their servants' dishonesty, there is a society called the "Bankers' Guarantee Trust Fund," to indemnify against loss by Bank employes. The Society is divided into two branches, the British and the Foreign Guarantee Trust. The Bank of England and several of the leading railway companies have a fund contributed by the employes to secure their employers against loss by the dishonesty of the former. The claims paid by the Guarantee Society and the Provident Clerks and General

Guarantee Association since their formation amount to nearly £400,000 and £272,000 respectively. One of the leading grievances of Fidelity Guarantee Insurance Companies is that they are not allowed more than about 25 per cent. of the costs they incur for the prosecution of offenders.—**Hail Storm** insurance is carried on by three companies, the "General Hail-storm," founded at Norwich in '43, being the oldest. Insurances are effected of wheat, barley, oats, rye and green crops against loss by hailstorms at a fixed sum per acre; and crown, plate and sheet glass at a certain sum per cent. No correct estimate can be formed as to the progress of business in this branch of insurance, as annual reports are not furnished. The three companies, however, appear to be financially strong and well conducted.—**Steam Boiler** insurance began by the establishment of the "Manchester Steam Users' Association" in '54, and is transacted by 12 companies. This business includes the insurance of boilers against explosion and against damage thereby to the surrounding property, and of the employers' liability risk under the recent statute for all accidents to the boilers covered by the conditions in the policies. The premiums vary from £1 per boiler for £100, to £5 or £6 for £1000, according to the condition, required pressure and locality of the boiler.—**Plate-glass** insurance was first commenced in '52 by the Plate-glass Insurance Company. The business has very rapidly extended, and most of the leading centres of industry now support one or more of these companies. The method generally followed in plate-glass insurance is to undertake to make good all breakages, the companies being entitled, by way of salvage, to the broken glass. The insurance is often undertaken by contract in private dwellings, the charge paid to the companies being based on the size and rental of the house.—**Extraordinary Forms of Insurance.** The companies transacting insurance of this class, and the different kinds of such insurance, are as follows: The **Mortgage Insurance Corporation** insures the holders of mortgages and other securities against loss of principal and interest, and transacts other business of a kindred character. The **Liverpool Mortgage Insurance Company** also insures against loss in connection with mortgages. The **Trustees, Executors and Securities Insurance Corporation** insures bonds, shares and all other securities lodged with them against risks of all kinds. The **Northern Accident Insurance Company** insures against the loss of bonds and securities whilst in transit. The **Law Guarantee and Trust Society** insures against loss in connection with investments, and guarantees the integrity of the corpus of a trust. The **Marine and General Mutual Life Assurance Society** insures passengers and mariners against loss or damage to luggage and effects. The **Security Company, the Burglary Insurance Corporation, the Scottish Alliance Insurance Company, the National Insurance Company of Scotland, and the Goldsmith's General Burglary Insurance Association**, insure against **burglary and theft**. The **Sanitary Insurance Company** insures against loss arising from **imperfect sanitation**. The **Fine Art Insurance Company** insures against loss resulting from the destruction of or damage to **pictures**. The **Licences Insurance and Guarantee Fund** assures against loss in consequence of the **non-renewal of publicans'**

licenses. The National Free Insurance Guarantee Corporation provides retailers with bills, paper bags, etc., insuring against accidents. The Assurance Trust Corporation deals in shares of insurance companies. The Policies Association purchases policies of life assurance. The Alliance, Atlas, Crown, English and Scottish Law, and Rock issue policies to provide sinking funds in connection with leasehold property. Most ordinary Life Assurance Companies insure against issue of marriages when a birth is improbable.—**FIRE.** The premium income of fire insurance offices for '90 was over £400,000 more than that of the previous year; while the percentage of losses to premiums was 58'92, compared with 57'27 in '89. The total expenditure in '90 was 83'61, as against 82'28 per cent. in '89. The spirit of retrenchment, with particular reference to a reduction on large risks, is still increasingly active; while the benefit to insurance companies from the weeding-out process as regards American fire risks is now perceptible. Although the fire offices suffered no loss in '90 from a conflagration, there have been enough fires to cause the amount of loss sustained to stop for a time the payment of dividends by some offices, and to greatly reduce those of others. The net premium and net losses of the following leading British Fire Insurance Companies are as follows, according to the *Post Magazine*, the principal insurance newspaper—namely, The Liverpool and London and Globe premiums, £1,423,762, losses, £820,027; North British and Mercantile premiums, £1,380,158, losses, £810,687; Royal premiums, £1,220,382, losses, £686,567; Phoenix premiums, £1,037,977, losses, £638,610; Commercial Union premiums, £939,295, losses, £380,860; Sun premiums, £871,679, losses, £470,983; Imperial premiums, £764,364, losses, £443,086; Norwich Union premiums, £748,347, losses, £468,408; London and Lancashire premiums, £702,347, losses, £382,618; Lancashire premiums, £679,703, losses, £452,242; Northern premiums, £671,464, losses, £405,188; Queen premiums, £644,507, losses, £421,540; Guardian premiums, £579,484; losses, £411,801; London Assurance premiums, £423,766, losses, £211,714; Alliance premiums, £395,295, losses, £188,626. In round numbers the aggregate premium income of fire offices amounts to about £15,500,000. The number of companies in the United Kingdom whose business is entirely or mainly that of fire insurance is 38. Four of these—the Sun, Westminster, Phoenix and Norwich Union—were established last century. The number of companies who transact fire insurance in this country is 67, and 40 compose the London Salvage Corps. Flour mills, and especially the larger ones, in which the automatic roller system of gradually reducing the wheat into flour is adopted on a large scale, are very dangerous risks. Several fire offices refuse to insure them, and others reluctantly do so, and then only on condition that heavy premiums are paid and expensive precautions are adopted to guard against explosions from the ignition of flour dust. The introduction of the electric light in the incandescent form is looked upon as a reduction in the risk, and in most cases insurance companies are prepared to accept lower premiums. Oil mills are also very risky buildings to insure, and the fire companies are not disposed to take them except at higher rates than those hitherto paid—the only exception

made being in favour of the electric light. **Textile mills** are better risks, and consequently the insurance rates for such are much lower than flour and oil mills. The premiums for textile factories have been reduced nearly 50 per cent. during the last six years—owing partly to the increase of fire-proof mills, but more particularly to the use of **automatic sprinklers**. For extinguishing fires, these sprinklers are now generally adopted in the above-named mills, and very liberal allowances are made from the insurance rates in those factories in which they are fitted, if installed according to the instructions of the offices insuring them. The **Palatine Fire Insurance Company**, which has recently taken over the Mutual Fire Insurance Company, has greatly encouraged the use of automatic sprinklers in mills by making about 20 per cent. reduction in the rates if properly installed. Much excellent work is done by this Company by its system of periodical inspection of mills insured by it; and it would be well if other fire offices followed its example. According to the results of fires on property protected by these sprinklers, and insured in the Boston (U.S.) Manufacturers' Fire Insurance Company, for eleven years the losses from 750 fires in buildings without automatic sprinkler protection amounted to £1,141,340; while the losses from 206 fires in buildings protected with automatic sprinklers did not exceed £17,526. Great progress has been made in the installation of the **electric light** in '91, and it is admitted that the adoption of the "**Phoenix Rules**" for securing their safety is an admirable plan. Not a single fire has, it is stated, occurred, or any injury happened to any person, from any electrical installation which has been in compliance with the Phoenix rules. Excellent information has recently been notified in the "Technological Dictionary of Insurance Chemistry," by Mr. William A. Harris, Secretary of the Phoenix Fire Office, Liverpool, respecting the **causation and prevention** of fires in buildings, and at docks, wharves, harbours and in ships. If the precautions mentioned in this book be adopted there will be a great reduction of loss from fire.—**LIFE**. This business has made important progress during the year. As, however, the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for several weeks subsequently. The number of life assurance companies transacting ordinary business in the United Kingdom which reported their transactions in '90 was 81, of which 77 were British offices, three American, and one Colonial. Their total assurances in force then amounted to £769,726,390; their total life and annuity funds were £235,324,057. The increase in the funds during the year was £13,538,183; the life premium income, £28,993,884; commission and expense of management, £5,641,759; and the average cost per cent. 19.45. Of the 77 British companies, the **total assurances** in force amounted to £426,909,941; the total life and annuity funds were £162,205,552; the increase of funds in the year £6,256,284; the number of **policies issued** in the year, 102,799; the new sums assured, 34,525,187; the new premiums, £1,345,737; the life premium income, £13,875,118; commission and expenses, £1,937,422; and the average cost per cent. 13.96. The total results for nine industrial companies and eight friendly societies are as follows: **Industrial Companies**—Total assurances in force, about £84,988,530; total

funds, £8,141,702; increase in year, £1,019,787; life premiums income, £4,871,142; commission and expenses, £2,108,002; average cost per cent., 43.27. **Friendly Societies**—Total funds, £2,426,406; increase in year, £171,458; total collections, £1,110,195; commission and expenses, £472,833; average cost per cent., 42.59. According to tabulated statistics published in the *Commercial World*, based upon the returns made to the House of Commons by the Board of Trade under the Life Assurance Companies Act '70, for all the years from '71 to '91 of the premium incomes of 90, and of the life assurance and annuity funds of 88 British life offices, the following companies have increased their premium income above £100,000 during this period:—viz., Prudential (Ordinary and Industrial), £3,980,567; Refuge, £555,746; Scottish Widows, £379,639; Scottish Provident, £303,298; Gresham, £273,010; Pearl, £256,979; British Workman's, £240,967; Star, £188,083; Standard, £177,345; United Kingdom Temperance and General, £168,526; Wesleyan and General, £163,773; Life Association of Scotland, £128,980; London and Lancashire, £124,460; Edinburgh, £123,559; British Empire, £112,730; North British and Mercantile, £109,530; Clergy Mutual, £109,301; National Provident, £103,109; Sun, £103,006. Later returns of premium incomes of many life offices for their last financial year are notified in the *Post Magazine* on the 3rd and 17th of Oct. last in an excellent table, mentioning the new business receipts and expenditure of life offices, assurance companies, and collecting friendly societies. Full particulars are also given in this table under the heads referred to of the Colonial and American Life Offices doing business in England, and which are not stated in the Board of Trade returns notified in the *Commercial World*. The number of companies, according to these returns, having life and annuity funds exceeding £3,000,000 in '90 are the following eighteen, viz., Prudential (Ordinary and Industrial), £10,730,039; Scottish Widows, £10,318,840; Standard, £7,004,917; Scottish Provident, £6,958,468; North British and Mercantile, £4,981,506; United Kingdom Temperance, £4,670,872; National Provident, £4,442,182; Equitable, £4,398,644; Gresham, £4,382,834; London Life, £4,107,043; Law Life, £4,052,258; Liverpool and London and Globe, £4,016,125; Clergy Mutual, £3,583,209; Economic, £3,513,188; Royal, £3,473,114; Life Association of Scotland, £3,460,749; Scottish Equitable, £3,188,492; Scottish Amicable, £3,061,811.—**Endowment Policies**, payable at a given age or earlier in the event of death, answer a very important public requirement, and are granted by most of the life offices. Much better arrangements have been recently made for paying surrender values and reviving lapsed policies. Several important restrictions have also been removed in favour of policy-holders as regards travelling and residing abroad. Invalids can also have their lives insured on favourable terms. Life assurance as transacted at the **Post Office** is not suited to the habits of the working classes, and the number of policies issued by it is therefore very small. According to the report of the Postmaster General for the year ending March 31st, '91, only 468 policies were issued by that department in '90, assuring the sum of £25,466, as compared with 671 insurances in '89 for £32,832. In '90 the number of immediate annuities granted by the Post Office was 948,

amounting to £21,956, and 116 deferred annuities were purchased, amounting to £2,427. On the other hand, an enormous number of life policies are granted to the masses by industrial life assurance companies and collecting friendly societies; and this kind of insurance has prodigiously increased during the last twelve years—so much so that about half the population of this country is insured in them. The following figures show the large premium incomes received by a few of these companies and societies—viz., (1) By Industrial Companies—Prudential, £3,517,925; Refuge, £508,348; Pearl (for six months), £141,401; British Workman's, £74,969; London, Edinburgh and Glasgow, £187,140. (2) By Collecting Friendly Societies: Liverpool Victoria Legal, £403,237; Royal Liver, £405,218; Royal London, £160,951; Scottish Legal, £103,221. All the large English and Scottish societies have branches in Ireland. The four societies last named contain about 90 per cent. of the members of collecting friendly societies. The average premium paid by each member is 17d per week. About half the number of British Life Offices grant immediate annuities; 36 lend on personal security with life assurance; and 26 transact fire insurance. The Sun Life Office has introduced a system of dispensing with the medical examination of lives proposed for assurance. If intending policy-holders do not wish to undergo medical examination, but make a declaration of health before one of the Company's officers, on payment of a premium a little in excess of the ordinary whole-life-with-profit premium for the first five years, a policy is issued, but without carrying any assurance during this period. If death occur within the five years, all the premiums paid are to be returned with 5 per cent. compound interest. At the end of this period the policy becomes a with-profit endowment assurance policy, payable at the end of fifteen years, or at previous death, and the corresponding endowment assurance rate is exigible. Profits, however, date from the commencement of the policy, so that the policy-holder has the two advantages—firstly, that after five years he obtains life assurance without having undergone medical examination; and secondly, that he obtains for the first five years and afterwards endowment assurance bonuses, while he pays for the first five years only whole-life rates. As it is stated that the plan, though commendable, does not at once provide an assurance that would be satisfactory to trustees under a marriage contract, or to a business creditor, the Caledonian Insurance Company have introduced a new form of assurance, whereby these deficiencies may be remedied. By this scheme the Company, in approved cases, will grant immediate life assurance without medical examination. The directors require the applicant under this method to lodge a proposal containing the usual information respecting his own health, history, and the causes of the death of his relatives, and although the directors reserve their right to communicate with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the requirement that the transaction shall take the form of an endowment assurance—that is, an assurance payable on the attainment of a selected age, or at death if this should occur

previously, but with this variation from the ordinary endowment assurance—viz., that the amount payable on survivorship shall be double the amount payable at death. To meet the case of those who do not desire a cash benefit on reaching the selected age, there is provided instead of the endowment the option of a large paid-up policy or the exchange of an annuity for the endowment. The Imperial Life Assurance Co., under the heading "Indemnity Assurance," issue policies at extraordinary low premiums for sums payable at death, if this event occur before the attainment of ages 45, 50, 55, or 60. These are practically temporary assurances of very long duration. Nothing will be paid under them if policy-holders die after the expiration of the term for which they are granted. The Mutual Life Assurance Company of London have recently introduced a new system of assurance called **Guaranteed Tontine Endowment**, whereby double the amount assured is paid if the policy-holder survives the stipulated time for which his policy is granted.

PERFECTED PENSIONS. The new system of perfected pensions of the Church of England Life and Fire Insurance Company is, if not theoretically new, yet practically a novelty. Its purpose is to secure an annual income payable during the later years of life. If the assured should die before that date the whole of his premiums and interest will be returned to his representatives. — **ASSESSMENT ASSOCIATIONS.** A great number of assessment or co-operative associations for life assurance were established in the United States about eleven years ago. One of the earliest of these, which does by far the largest business, is the Mutual Reserve Fund Life Association of New York. For a short time this Company has carried on business in the United Kingdom, and the amount of assurances it has effected in England and Wales is said to be enormous, on account of its premiums being very much lower than those of any of the British life offices. The assessment principle is that a certain fixed sum is annually collected to pay management and incidental expenses, while the amount required to discharge the life claims is collected bi-monthly. The former is called the annual dues and the latter the mortuary calls, or that part of the premium which is necessary to be set apart to meet the life claims when they are called for, the amount being improved for this purpose. The yearly dues are fixed at compound interest at the rate of 8s. per cent., and an additional sum as an entrance fee is included in the first year's payment. The mortuary calls graduate in an ascending scale, according to age and to each age at entry. The maximum and minimum amount of call to which the assured is liable is given from 25 to 60. Twenty five per cent. of the mortuary calls is set aside as a reserve fund, to protect members from excessive mortality calls in any one year. During the twelve months which have passed since the North British and Mercantile Insurance Company agreed with the civil servants to entertain proposals from them for life assurance at a reduction of 15 per cent. on all premiums received, and on certain conditions to revive and extend membership without the necessity of previous medical examination, it is reported that there have been 5277 proposals accepted for assurances amounting to £1,687,000. At the end of '90

there were 3667 policies in force, assuring £1,230,950. The transfer of the business and connections of the Scottish Provincial to the North British and Mercantile Company will greatly increase the business of the latter, while the transfer of the Queen Life and Fire Insurance Company to that of the Royal will enormously add to the business and financial status of the last-named company. It is properly stated that combinations such as the two just mentioned go to form companies which were previously of more than average strength into colossal associations. In the expectation of a lesser and possibly a lower rate of interest, two life assurance companies have adopted as a basis of valuation a rate of interest at 2½ and 2 per cent. respectively, with the most stringent table of mortality.

MARINE. This has been in a more depressed state during '90 than for several years previously, owing to the heavy losses made on policies. For several recent years very low rates have been charged for insurance, which have been greatly inadequate to the risks involved. Such reduced rates have been occasioned by the influx of a great number of small marine insurance companies, who to get business have recklessly issued policies at such remarkably small premiums that they were not remunerative. Many first-class underwriters and insurance brokers condemn this practice as one that will become ruinous to marine insurance companies, since it will materially increase over-insurance of ships—a grievance that was forcibly pointed out in the House of Commons as existing in '84, and for the suppression of which Mr. Chamberlain's Merchant Shipping Bill was mainly introduced. In consequence of the prevalence of very low premiums for marine insurance during the last five or six years the large and old-established underwriting companies have refused to reduce their rates to anything like a level with those of the new companies, and hence the former have done much less business during this period than they previously did. For the last nine months, however, marine insurance brokers have become more careful in considering the security of the companies they insure with than formerly, and therefore have increased their policies with leading companies of old standing, so that the latter have considerably regained much of the business they lost, owing to smaller and newly established companies of indifferent financial status insuring at lower rates. The result will be that, while the latter companies will effect less insurances, the leading companies will issue more policies. Of twenty-one leading marine insurance companies in Great Britain, the oldest are the Royal Exchange and the London Assurance Corporation, both established in 1720; and the Alliance and Indemnity Companies, both founded in 1824. The premium income of 20 of these leading companies as reported in '90 was £3,501,763, their losses and averages £2,938,053, and their percentage of losses to premiums 87.9. The dividends paid upon some marine insurance companies' shares are mainly, and as to some are almost entirely, derived from the investment of capital and reserves. Several of such companies are more financial than insurance concerns. A large amount of marine insurance business is also done by private underwriters connected

with Lloyds and the Liverpool Underwriters Association. Marine insurances are generally effected through marine insurance brokers, who are an important class in London, Liverpool and Glasgow. Claims are determined by average adjusters in difficult cases. One of the grievous evils in underwriting transactions is the use of so-called "honour policies," generally issued as insurances on prospective freight. In '90 the underwriters of several London marine insurance companies visited North America with the view of starting agencies, both in the United States and Canada, and they established them there accordingly. One of the main businesses in which they competed with local marine insurance associations was the insurance of hulls on the Lakes, upon which American assureds had resolved to raise the premiums in consequence of the severe losses they had sustained on this kind of business for several years. The number of members engaged as underwriters at Lloyds is 603, who, with few exceptions, have lodged with the Committee security, either by deposit or approved guarantee, against the marine liabilities which they severally incur at Lloyds. The total deposits of individual members applicable to marine business are valued at £2,706,025, and the guarantees of individual members amount to £1,012,000. A decided rise in premiums has recently occurred, but it is still limited to those by sailing vessels or by steamers in no regular trade, and is not extended to any important degree to ocean liners. Mr. Ernest King Allen, of the Royal Exchange Assurance Co., has recently issued an excellent book upon the stamp duties on sea insurances. This also includes judicial decisions relating thereto, and the interpretation of the Inland Revenue Commissioners on the duties, and various letters which have been addressed to them in regard to this subject. See **LOYD'S CLAUSES**.

Insurance Law in '91. In the Queen's Bench Division (July 20th, '91) Mr. Thomas Maybrick and Mr. Michael Maybrick sued an insurance company on behalf of **Florence Maybrick**, a convict under sentence of penal servitude for life, to recover the sum of £2,000, an amount to which her husband, the late James Maybrick, had insured his life for her benefit. Mrs. Maybrick was convicted two years ago of murdering her husband by administering poison to him, but the capital sentence was commuted by the Home Secretary, on the ground that, though the convict had administered poison to her husband with the view of taking his life, the evidence did not conclusively show that he died from the results of the poison. On behalf of Mrs. Maybrick it was urged that she knew nothing of the insurance, which was voidable only in case the deceased committed suicide, was killed in a duel, or died at the hands of the executioner. The Court, however, held, on the authority of *Fauntleroy's* case, that the amount could not be recovered by Mrs. Maybrick's representatives. Judgment was afterwards reserved in the Appeal Court.—The **South Staffordshire Tramways Company** took out a policy in the **Sickness and Accident Insurance Association**, by which the latter agreed that "so far as regards claims for personal injury and damage to property made against the assured in respect of accidents caused by vehicles, or the motive power thereof while attached thereto, belonging to the assured and specified in the subjoined schedule, and

for which accidents the assured shall be liable, the association shall pay to the assured the sum of £250 in respect of any one accident, but not exceeding in all the sum of £1,500 in any one year." During the currency of the policy one of the plaintiffs' vehicles specified in the policy was overturned, and about forty persons were injured. The plaintiffs thereby became liable to pay compensation amounting to £833, and claimed this sum from the defendants. The question then arose whether the injury caused to each of the forty persons constituted a separate accident within the meaning of the policy. Mr. Justice Day held that there had been only one accident, and that the liability of the defendants was limited to £250. Mr. Justice Lawrence differed, and held that the injury to each person was a separate accident within the meaning of the policy, and that the plaintiffs were entitled to the full sum of £833. The Court of Appeal (Feb. 5th) held that the latter was the true construction of the policy, and that the plaintiffs were entitled to recover the larger amount.

Insurance of Children's Lives. See Session, sect. 38.

International Copyright. Artists and authors have long desired to obtain an international law of copyright, by which works of literature and art might be protected, not only in the countries where they were first published, but in all civilised countries. A conference upon international copyright was held at **Berne** in September 1885, and attended by representatives of the following states: Germany, Spain, France, Great Britain, Hayti, Honduras, Italy, the Netherlands, Sweden and Norway, Switzerland, and Tunis. At this conference there was settled the draft of a convention for securing to the authors of literary or artistic works published in any one of the countries represented copyright in all the others. Such copyright is not to be more than the author enjoys in his own state, nor more than the state granting it secures to its own subjects. The provisions of the convention extend to dramatic and dramatico-musical works. They extend to all works which at the date of the convention have not become public property. They forbid the publication of a translation not sanctioned by the author of the original work. But if within a certain time there appears no authorised translation, an unauthorised one may be published. Articles which have appeared in newspapers or periodicals may be reproduced, unless such reproductions have been expressly forbidden by the original authors or publishers, and no prohibition by them can have effect in the case of articles discussing politics, current topics or news of the day. A work is not to be indirectly appropriated by a reproduction which, in spite of superficial changes, is essentially the same as its original. The convention establishes an Office of the International Union for the Protection of Literary and Artistic Works, which is to be under the surveillance of the Swiss Government, and is to be supported by contributions from all the contracting parties. Any State, not a party, which is willing to adopt the provisions of the convention, may give in its adherence, whilst any State which is a party to the convention, and wishes to withdraw, must give a year's notice of its intention. The convention is to take effect within three months from the adoption of the draft. Conferences

for its revision are to be held successively in each of the countries by which it has been adopted. The last conference was held in London, but owing to the inadequate arrangements of the executive committee, it was not attended by a single man of letters of representative rank. It does not annul or preclude any conventions already existing or hereafter to be made between any two or more of the contracting parties, provided that such special conventions secure at least as ample a protection to authors as it does, and do not otherwise conflict with its provisions. In this country Acts of Parliament have been passed in '44, '52, '75 and '86, with the object of securing copyright to authors and artists who are subjects of foreign states which secure copyright to British artists and authors. These Acts empower Her Majesty by Order in Council to grant copyright to the artists and authors of such countries, and Her Majesty has a large discretion in fixing the conditions with which they must comply. The existence of the copyright of the foreign author in his own country may be proved by a certificate under the official seal of a Minister of State in that country or of a British diplomatic or consular officer acting there. Copies of works made in any foreign country other than that in which the protected work was first published and made without the consent of the proprietor of the copyright may not be imported into this country. An Order in Council issued under these Acts applies to works produced before the date of the Order, but not so as to prejudice any person who has lawfully produced any work in the United Kingdom. It shall be taken to apply to every British possession, saving only those which are expressly excepted. The Act of '86 contains several modifications of previous statutes intended to harmonise with the provisions of the convention of Berne above noticed. Conventions for the mutual protection of copyright have been made between the United Kingdom and several foreign States. In the **United States of America**, after much amendment, a bill was passed in March '91, to take effect from July, giving to foreign authors a copyright in their works under certain conditions. Most of these are simple, consisting of the payment of small fees in certain places, but one is the famous "chromo-amendment," which in free-traders' ideas detracted largely from the merits of the bill. Under this clause the foreign copyright-owner can have his rights in the United States, if he deposit with the Librarian of Congress, firstly, a printed copy of the title of his book, or musical composition, or a printed description of his painting, statue, lithograph, etc.; and secondly, two copies of such book, or a reproduction of such work of art from type set or from negatives or drawings on stone made within the United States. Musical compositions are exempted from the second condition. This amendment was designed to be strongly protective of American trade interests. Their printers, lithographers, etc., will get an enormous increase of work. Those, however, who believe that the British printing trade will suffer severely, and who anticipate that all future books will be printed in America, forget first, that the books, which will be set up in America, form but the smallest fraction of the printing of Great Britain, and secondly, that most of those books will continue to be printed on this side also, so strong still is the British

prejudice against American methods of issue, and American spelling. The well-known British author will largely benefit by the bill in spite of the amendment, but the fact that every number of a magazine is to be considered a separate book, and copyrighted accordingly, may lead to trouble for those authors who produce their work serially. The confusion in the bill between art-reproducers and type-setters has placed American artists abroad in the ridiculous position of being unable to obtain copyright for their work done in Europe, and generally the artistic American public will suffer by the protection that has been extended to their home lithographers and photographers. Foreign music-publishers have reason to congratulate themselves that they obtain a market in America without being put to the expense of having the score set in the United States. Foreign dramatic authors are now doubly protected. Common law previously protected them from piracy until their plays were printed, and now a play printed in accordance with the conditions of the bill can be copyrighted as a book. The bill should be of chief benefit to American authors themselves, who will now be freed from competition with pirated reprints of popular English novelists, and its passage reflects the highest credit upon Mr. R. Underwood Johnson, and the American Copyright League.

Intimidation, Law as to, in '91. Three important decisions were given by the Queen's Bench Division on July 14th, '91, with respect to the question of what constitutes intimidation by workmen. In the first case it appeared that the defendant had been permitted to give evidence when his appeal from the decision of the magistrates came before the Recorder of Newcastle-on-Tyne. In the case which he had stated, the Recorder remarked that the appellant's evidence formed part of the grounds upon which his judgment, sustaining the conviction, was founded. It was held that evidence by the appellant could not be legally given, and that therefore the conviction must be quashed. In the next case, that of *Gibson v. Lawson*, the parties were employed in a shipbuilding yard, the respondent being a member of the Amalgamated Society, and the appellant a member of the National Society. The members of the former resolved to strike unless the appellant left his society and joined them. The appellant declined this proposal, and the shipbuilding company, in order to avoid a strike, dismissed him from their yard. It was not contended that violence or threats were used towards the appellant, but he had sworn that he was afraid, owing to what the respondent had said, that he would lose his work, and would not get employment in any place where the Amalgamated Society predominated over his own society. On these facts the magistrates dismissed the summons, and it was now held that they were right in so doing, as there was no conduct which, under any reasonable construction of the word "intimidate," could be brought within its meaning. Whether the action of the Amalgamated Society was morally right, was not a question for the Court. The question was whether it was illegal, and the Court did not think it was. The third case was that of

Curran v. Treleven. The magistrates had convicted the secretaries of three trade unions in Plymouth for intimidating Mr. Treleven, a shipowner. Mr. Treleven, it appeared, employed both unionists and non-unionists, and the three secretaries told him that if he did not cease to employ non-unionists they would call off the union men. Mr. Treleven declined to discharge the non-unionists, and the union men were consequently called off their work. The magistrates convicted the defendants, and the Recorder of Plymouth held that though there was no violence or intention to commit violence, yet the facts of the case constituted intimidation within the meaning of 38 & 39 Vict., cap. 86, sect. 7, sub-sect. 1. The Court now held that there was no intimidation in the case, and negatived the view of the Recorder that a strike which would have the effect of injuring an employer was illegal and indictable at common law. The conviction was consequently quashed.

Inventions, '91. A selection is here given of inventions and improvements effected chiefly in manufacturing processes which in the course of the year attracted attention. In ed. '89 reference was made to the new *cyclone pulveriser*. The apparatus has since been materially improved. We may recall that the pulveriser embodies the principle of the cyclone in its disintegrating action, hence the name. Originally intended for the reduction of flour, this machine, however, is suitable for the pulverisation of other substances; for example, plum-bago, cotton-seed, and even bricks. A company has been working the patent, and in the autumn of '90 the Cyclone Flour and Meal Company was separately established, subject to certain conditions, to experiment as to its adaptability to wheat milling, and the results certainly seem to have justified this course. It is claimed that the best "wholemeal" on the market is now obtained by the process, and produced by a cheaper method than any other milling system. Information regarding the machine can be had from the Cyclone Flour and Meal Company, 32, Graham Street, City Road, N. That ingenious inventor, Mr. Edison, is perfecting yet another device, called the *kinetograph*. It is intended for the reproduction of action and motion by rapid photography, combined with the recording of sounds by the phonograph. The kinetograph can take a series of forty-six photographs of movements in one second, and thus preserve the appearance of continuous motion. For the subsequent reproduction of scenes and sounds, *pari passu*, a projecting lens is used, with an ordinary screen, upon which are thrown the pictures, the phonograph forming a part of the apparatus. It is hardly possible that this invention can be useful commercially, however amusing and instructive it may become. A new and original form of copying apparatus, called the *schapiograph*, has been brought out by Messrs. Hermann, Hurwitz, & Co., and in many respects is an improvement. The usual gelatine-surface paper is wound in lengths upon a cylinder, connected by a width of itself with another cylinder opposite, which may be turned, when desired, to expose a fresh surface, and at the same time rolls away the inky portion. The ink used is absorbed also, so that the same surface can be rolled back again for another use. The apparatus is contained in a portable box, and made in various sizes. The Anticleptic Manufacturing Com-

pany, Cobridge, Stoke-on-Trent, have patented a device for protecting shop goods from theft. By a system of hooks and clips, placed along the lengths of wood as at present used by shopkeepers for exposing goods, it is rendered impossible for a thief to make off with any article. It is called the *antilepto*, and should find favour among tradesmen. Almost yearly there is an addition to the explosive mixtures already competing for use in mining operations, tunnelling, and quarrying. *Ammonite*, the new explosive, brought out by the Miners' Safety Explosives Company, Ltd., of 23, Great George Street, Westminster, was practically tested in the summer at the company's works in Essex. It consists of a mixture of ammonium nitrate and mono-nitro-naphthalene in the proportions 8½ to 8½, and is contained in metallic watertight cartridges. It was found by experiment that ammonite bears favourable comparison with other well-known explosives, and particularly with *robuite*. A striking experiment was one showing the instantaneous transmission of an explosion along a line of cartridges 80 ft. long, by the use of a single detonator at one end of the line. Professor Frank Clowes, of University College, Nottingham, has devised an apparatus to render easy the process of testing the sensitiveness of different forms of *safety-lamps* when used for detecting *fire-damp* in mines. As is well known, many attempts have been made to produce a safety-lamp to serve the double purpose of illuminating and of detecting minute percentages of fire-damp. The apparatus was exhibited in the autumn at the British Association. Considerable interest has attached to the appearance of a new-keyed musical instrument for just intonation called the *enharmonium*, the ingenious production of Dr. Shōhō Tanaka, a native of Japan, and now of Berlin. The continental musicians have shown much interest in Dr. Tanaka's invention, in marked contrast to the attitude of the English authorities. The instrument aims at producing musical sounds in *strict tune*, or, in a series of musical sounds to give the true harmonic combinations of theory, which our modern pianoforte and other instruments do not supply. Dr. von Bulow has said, in reference to his use of the instrument, "In order to make pure music it is necessary to think in pure tones." The *enharmonium* has five octaves, and an ordinary key-board is used, with the difference that the black keys are divided, some into two and some into three parts, and one additional shorter and narrower black key is introduced between the E and F white keys. This gives twenty notes, and by means of a bodily shifting of the key-board to the right or left, it is set so as to act in the key required. The inventor is constructing one for the Prussian Government. Moor's improved blowpipe for industrial workers is introduced by the Cambridge Scientific Instrument Company. An indiarubber tube leads from the gas supply, and this, used with the bent glass mouthpiece, secures flexibility and freedom of action, besides lessening fatigue. The tube can be instantly connected with any ordinary gas burner. The flame is well defined, and great intensity can be got. Mr. Snelling's invention of a process for making *Hop Tea* has been acquired by the Hop Tea Foreign and Colonial Syndicate, Ltd., who intend to develop the industry, and erect a factory at Maidstone. Hop tea is a blend of Indian and Ceylon teas with Kentish hops

prepared by the process above, and improved flavour is claimed, with tonic properties.

Ireland, Administration of Law in. See SESSION, sect. 28.

Ireland, Distress in. See SESSION, sect. 27.

Ireland, Government of. The head of the executive is the Lord Lieutenant, who is assisted by a Chief Secretary, the Lord Chancellor of Ireland, the Attorney-General for Ireland, the permanent officials, and a Privy Council (which is a separate and distinct body from the Privy Council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the Ministry of the day in London. The Lord Lieutenant is charged with the maintenance of peace and order; the Irish Constabulary are under his control, and he may, if he think it to be necessary, direct the Commander of the Forces to send troops to their aid. He has power to commute sentences and pardon criminals, and he may by and with the advice of his Council issue proclamations under the *Criminal Law and Procedure (Ireland) Act 1887 (g.c.)*. There are, however, more agreeable and less anxious functions attaching to the office; for, as representing Her Majesty, the Viceroy, assisted by his wife, holds courts, drawing-rooms, levees, and maintains in Dublin an establishment of a semi-legal character. On occasions he confers the honour of civil knighthood. During his absence the duties of chief governorship are performed by three or more Lords Justices, those who act in this capacity being usually the Lord Chancellor of Ireland, the Commander of the Forces, and some of the judges. The Chief Secretary to the Lord Lieutenant, or Chief Secretary for Ireland, as he is usually called, has been described as prime minister to the Viceroy; and although he is in theory subordinate to the Home Office, he has his own establishment at the Irish Office in London, as well as in Dublin, and is directly responsible to the House of Commons for the acts of the Irish administration. He is assisted by a Permanent Under-Secretary (Col. the Right Hon. Sir J. West Ridgeway, K.C.B., K.C.S.I., P.C.: salary £2000), and other officials. (The late Col. King-Harman acted for a while as Parliamentary Under-Secretary without salary. See SESSION '88, sect. 39.) There is a separate Local Government Board for Ireland; a Board of National Education, by which the grant made by Parliament for public education is administered; the inspection of Irish fisheries is kept separate from the supervision of those of England or Scotland; and there is a veterinary department in Dublin for dealing with cattle diseases, etc. See MINISTRY.

Ireland, Local Government for. See SESSION, sect. 29.

Ireland, Royal University of, Earlsfort Terrace, Dublin, founded 1879 under the University Education (Ireland) Act. On its establishment Queen's University, founded '50, at Dublin, dissolved; and the relations of the Queen's Colleges at Belfast, Cork, and Galway to the new University were revised. Its degrees, exhibitions, and scholarships are open as well to female as male students. The number of candidates who presented themselves for the various examinations of the University in the year '90 was 3845. Chancellor, the Marquis of Dufferin and Ava. Vice-Chancellor, Lord Emily.

Secretaries. J. C. Meredith, LL.D.; D. B. Dunne, LL.D. The degrees and hoods are:—LL.D. (hood scarlet cloth, lined with pink silk); LL.B. (h. black silk faced with white); M.D. (h. scarlet cloth lined with scarlet silk); M.B. (h. black silk faced with scarlet); M.Ch. (h. black silk, lined with white and faced with blue); M.A.O. (h. black silk, lined and faced with purple); D. Mus. (h. white figured silk, lined and faced with rose-coloured satin); B. Mus. (h. blue silk, lined with rabbit skin); M.E. (white silk, lined and faced with green); B.E. (h. black silk or stuff, lined and faced with green); D. Sc. (h. scarlet cloth, lined with blue silk); D. Lit. (h. scarlet cloth, lined with white silk); M.A. (h. black silk, lined with blue silk); B.A. (h. black silk or stuff, lined with rabbit skin). Consult *The Calendar*.

Irish Channel Tunnel (See IRELAND AND SCOTLAND TUNNEL in eds. of '88 and '90). On Feb. 11th, '91, Sir Roper Lethbridge read an important paper on this subject at the Society of Arts, Adelphi. He reviewed the four proposals put forward as follows: by Mr. Barton, from Islandmagee to Wigtownshire; by Mr. McCullough, between Whitehead and Portpatrick; Messrs. W. Scott and Livingston Macassey, known as the northerly route by way of Cantyre; and the Donaghadee-Portpatrick route. Then there was the proposal of Mr. Maxton to construct a submerged buoyant tubular bridge. Putting aside the Donaghadee on account of the cost (26 millions), the estimated outlay for the other schemes varied from 5½ millions to 10 millions, and Sir Roper, after enlarging upon the inestimable political, social and commercial advantages that would be realised, suggested Government assistance in the form of guaranteed interest or otherwise. At the August meeting of the British Association at Cardiff, Prof. M. Fitzgerald, of Belfast, read a paper on the subject.

Irish Nationalist Party. See POLITICAL PARTIES, ENGLISH, *et infra*.

Irish (Nationalist) Parliamentary Parties.

In our 91 edition we recorded the fact that in the case of O'Shea v. O'Shea and Parnell, the jury found that the respondent had committed adultery with the co-respondent, and that the petitioner had not connived at the adultery; and that Mr. Justice Butt (Nov. 17th, 90) pronounced a decree nisi with costs against the co-respondent. What effect was this decision of the court in an undefended suit to have upon the position of Mr. Parnell as leader of the Irish Parliamentary party, upon the prospects of Home Rule, and upon the relations between the two parties constituting the Opposition? These relations had, since Mr. Gladstone had openly advocated Home Rule, been cordial, and while preserving their independence and separate organisation, the Gladstonians and Parnellites had on all important issues co-operated together; the Nationalists in one notable instance, when they had to choose between voting with the New Radicals under Mr. Labouchere, or with the official Opposition, rallying to the support of Mr. Gladstone. For eight days after the verdict was pronounced nothing was publicly known of the view which Mr. Gladstone took of the matter. In course of that period continued fidelity to Mr. Parnell was expressed by a large number of his old followers; many public bodies in Ireland passed resolutions of confidence in him; and even Mr. Labouchere in a public speech is said to have advised Mr. Parnell not to be diverted from

the task he had set himself, to free his people, by anything that had occurred. Parliament met on Nov. 25th, and after the Queen's Speech had been read the Nationalist members assembled, as had been customary with them, to elect their sessional chairman, the apartment allotted to them for this purpose being No. 15 of the range of committee rooms which is adjacent to the House of Commons. The proceedings were of brief duration. According to the *Freeman's Journal*, the welcome accorded to the National leader was enthusiastic in the extreme. The re-election of Mr. Parnell as chairman of the party was proposed by Mr. Sexton, seconded by Col. Nolan, and agreed to amid loud applause. Mr. Parnell thanked the meeting for this further and fresh proof of their confidence in him, and stated that in response to their unanimous desire he would continue to discharge the duties of leader. Later in the day he took his accustomed place in the House. His re-election was a great surprise to many (but certainly not all) of the Gladstonians, who, judging the question from the standpoint of public morality, had fully counted upon his retirement, at least for a time. Mr. Gladstone's opinion on the subject was embodied in the following letter to Mr. John Morley, dated the previous day, but communicated to Mr. Parnell in course of the afternoon of the 25th: "MY DEAR MORLEY,—Having arrived at a certain conclusion with regard to the continuance at the present moment of Mr. Parnell's leadership of the Irish party, I have seen Mr. McCarthy on my arrival in town, and have inquired from him whether I was likely to receive from Mr. Parnell himself any communication on the subject. Mr. McCarthy replied that he was unable to give any information on the subject. I mentioned to him that in '89, after the terrible murder in the Phoenix Park, Mr. Parnell, although totally removed from any idea of responsibility, had spontaneously written to me an offer to take the Chiltern Hundreds—an offer much to his honour, but one which I thought it my duty to decline. While clinging to the hope of a communication from Mr. Parnell, to whomsoever addressed, I thought it necessary, viewing the arrangements for the commencement of the Session to-morrow, to acquaint Mr. McCarthy with the conclusions at which, after using all the means of observation and reflection in my power, I had myself arrived. It was that, notwithstanding the splendid services rendered by Mr. Parnell to his country, his continuance at the present moment in the leadership would be productive of consequences disastrous in the highest degree to the cause of Ireland. I think I may be warranted in asking you so far to explain the conclusion I have given above, as to add that the continuance which I speak of would not only place many hearty and effective friends of the Irish cause in a position of great embarrassment, but would render my retention of the leadership of the Liberal party, based as it has been mainly upon the prosecution of the Irish cause, almost a nullity. This explanation of my own view I begged Mr. McCarthy to regard as confidential, and not intended for his colleagues generally, if he found that Mr. Parnell contemplated spontaneous action. But I also begged that he would make known to the Irish party, at their meeting to-morrow afternoon, that such was my conclusion if he should find that Mr. Parnell had not in contemplation

any step of the nature indicated. I now write to you in case Mr. McCarthy should be unable to communicate with Mr. Parnell, as I understand you may possibly have an opening to-morrow through another channel. Should you have such an opening I would beg you to make known to Mr. Parnell the conclusion itself, which I have stated in an earlier part of this letter. I have thought it best to put it in terms simple and direct, much as I should have desired had it lain within my power to alleviate the painful nature of the situation as respects the manner of conveying what my public duty has made it an obligation to say. I rely entirely on your good feeling, tact and judgment.—Believe me, sincerely yours, W. E. GLADSTONE." The publication of this letter settled the matter completely, so far as Mr. Gladstone's followers—most of whom had hitherto been quite in the dark as to his views—were concerned, but unsettled it from the Nationalist point of view. A second meeting of Irish Home Rulers was called, and was duly held on the 26th, but so much difference of opinion manifested itself thereat, that it was resolved to adjourn until the following Monday, and in the meantime to communicate with Mr. W. O'Brien and Mr. Dillon, who having been charged some weeks before under the Crimes Act in connection with the proceedings at Tipperary, had while under remand on bail slipped away to France and thence to the United States, where they were now in company with Mr. T. P. O'Connor, and one or two other members of the party. On the evening of Nov. 28th, Mr. Parnell issued a "Manifesto to the Irish People," which duly appeared on the following day. This very remarkable document made no reference to the Divorce Court proceedings, but said: "The letter of Mr. Gladstone to Mr. Morley, written for the purpose of influencing the decision of the Irish party in the choice of their leader, and claiming for the Liberal party and their leaders the right to veto upon the choice, is the immediate cause of this address to you, to remind you and your parliamentary representatives that Ireland considers the independence of her members as her only safeguard within the constitution, and above and beyond all other considerations whatever. The threat in that letter, repeated so insolently on many English platforms and in numerous British newspapers, that unless Ireland concedes this right of veto to England she will indefinitely postpone her chances of obtaining Home Rule, compels me, while not for one moment admitting the slightest probability of such loss, to put before you information which until now, so far as my colleagues are concerned, has been solely in my possession, and which will enable you to understand the measure of the loss with which you are threatened, unless you consent to throw me to the English wolves now howling for my destruction. In November of last year, in response to a repeated and long-standing request, I visited Mr. Gladstone at Hawarden, and received the details of the intended proposals of himself and his colleagues of the late Liberal Cabinet with regard to Home Rule, in the event of the next General Election favouring the Liberal party. It is unnecessary for me to do more at present than to direct your attention to certain points of these details, which will be generally recognised as embracing elements vital for your information and the formation of your judgment. These vital points of difficulty

may be suitably arranged and considered under the following heads: 1st. The retention of the Irish Members in the Imperial Parliament. 2nd. The settlement of the land or agrarian difficulty in Ireland. 3rd. The control of the Irish constabulary. 4th. The appointment of the Judiciary (including judges of the Supreme Court, county court judges, and resident magistrates). Upon the subject of the retention of the Irish Members in the Imperial Parliament, Mr. Gladstone told me that the opinion, and the unanimous opinion, of his colleagues and himself recently arrived at after most mature consideration of alternative proposals, was that in order to conciliate English public opinion, it would be necessary to reduce the Irish representation from 103 to 32. Upon the settlement of the land it was held that this was one of the questions which must be regarded as questions reserved from the control of the Irish Legislature, but at the same time Mr. Gladstone intimated that while he would renew his attempt to settle the matter by imperial legislation on the lines of the Land Purchase Bill of '86, he would not undertake to put any pressure upon his own side, or insist upon their adopting his views. In other and shorter words, that the Irish Legislature was not to be given the power of solving the agrarian difficulty, and that the Imperial Parliament would not. With regard to the control of the Irish constabulary, it was stated by Mr. Gladstone that, having regard to the necessity for conciliating English public opinion, he and his colleagues felt that it would be necessary to leave this force and the appointment of its officers under the control of the imperial authority for an indefinite period, while the funds for its maintenance, payment and equipment would be compulsorily provided out of Irish resources. The period of ten or twelve years was suggested as the limit of time, during which the appointment of judges, resident magistrates, etc., should be retained in the hands of the imperial authority. I have now given a short account of what I gathered of Mr. Gladstone's views and those of his colleagues during the two hours' conversation at Hawarden—a conversation which I am bound to admit was mainly monopolised by Mr. Gladstone—and pass to my own expression of opinion upon these communications which represent my views then and now. And, firstly, with regard to the retention of the Irish Members. The position I have always adopted, and then represented, is that, with the concession of full powers to the Irish Legislature equivalent to those enjoyed by a State of the American Union, the number and position of the Members so retained would become a question of imperial concern, and not of pressing or immediate importance for the interests of Ireland. But that with the important and all-engrossing subjects of agrarian reform, constabulary control, and judiciary appointments, left either under imperial control or totally unprovided for, it would be the height of madness for any Irish leader to imitate Grattan's example and consent to disband the army which had cleared the way to victory. I further undertook to use every legitimate influence to reconcile Irish public opinion to a gradual coming into force of the new privileges and to the postponement necessary for English opinion with regard to the constabulary control and judicial appointments; but I strongly dissented from the proposed 100

duction of Members during the interval of probation, and I pointed to the absence of any suitable prospect of land settlement by either Parliament as constituting an overwhelming drag upon the prospects of permanent peace and prosperity in Ireland. At the conclusion of the interview I was informed that Mr. Gladstone and all his colleagues were entirely agreed that pending the General Election silence should be absolutely preserved with regard to any points of difference on the question of the retention of Irish Members. . . . Let me say, in addition, that if, and when, full powers are conceded to Ireland over her own domestic affairs, the integrity, number, and independence of the Irish party will be a matter of no importance; but until this ideal is reached it is your duty and mine to hold fast every safeguard. . . . Mr. Parnell next recounted what he alleged had passed between him and Mr. John Morley in reference to the tactics to be pursued in Parliament during the previous session ('90), in regard to the Land Purchase Bill, and went on to say that just before the commencement of the session just opened (1890-91), "the right hon. gentleman asked me whether I would be willing to assume the office of Chief Secretary to the Lord-Lieutenant of Ireland, or to allow another member of my party to take the position. He also put before me the desirability of filling one of the law offices of the Crown in Ireland by a legal member of my party. I told him, amazed as I was at the proposal, that I could not agree to forfeit in any way the independence of the party or any of its members. . . . In conclusion, he directed my attention to the Plan of Campaign estates. He said that it would be impossible for the Liberal party when they attained power to do anything for these evicted tenants by direct action; that it would be also impossible for the Irish Parliament, under the powers conferred, to do anything for them; and flinging up his hands with a gesture of despair he exclaimed, 'Having been to Tipperary I do not know what to propose in regard to the matter.' I told him that this question was a limited one, and that I did not see that he need allow himself to be hampered by its future consideration; that, being limited, funds would be available from America and elsewhere for the support of those tenants as long as might be necessary; that of course I understood that it was a difficulty, but that it was a limited one, and should not be allowed to interfere with the general interests of the country. I allude to this matter only because within the last few days a strong argument in many minds for my expulsion has been that unless the Liberals come into power at the next General Election the Plan of Campaign tenants will suffer. As I have shown, the Liberals propose to do nothing for the Plan of Campaign tenants by direct action when they do come into power, but I am entitled to ask that the existence of these tenants, whom I have supported in every way in the past, and whom I shall continue to support in the future, shall not constitute a reason for my expulsion from Irish politics. I have repeatedly pledged myself to stand by these evicted tenants, and that they shall not be allowed to suffer, and I believe that the Irish people throughout the world will support me in this policy. Sixteen years ago I conceived the idea of an Irish parliamentary party, independent of all English parties. Ten years ago I was

elected the leader of an independent Irish parliamentary party. During these ten years that party has remained independent, and because of its independence it has forced upon the English people the necessity of granting Home Rule to Ireland. I believe the party will obtain Home Rule only provided it remains independent of any English party. I do not believe that any action of the Irish people in supporting me will endanger the Home Rule cause or postpone the establishment of an Irish Parliament; but even if the danger with which we are threatened by the Liberal party of to-day were to be realised, I believe that the Irish people throughout the world would agree with me that a postponement would be preferable to a compromise of our national rights by the acceptance of a measure which would not realise the aspirations of our race."—CHAS. STEWART PARNELL. After the publication of the manifesto Mr. Gladstone wrote, under date Nov. 29th: "It is no part of my duty to canvass the manifesto of Mr. Parnell, which I have read this morning, and I shall not apply to it a single epithet, for I am not his judge in any matter, and I believe myself to have shown in the matter of the Pigott Commission that I have no indisposition to do him justice. But the first portion of the document consists of a recital of propositions stated to have been made by me to him, and of the objection entertained by him to those propositions. The Irish, as well as the British public, has a right to know whether I admit or deny the accuracy of the recital, and in regard to every one of the four points stated by Mr. Parnell I at once deny it. (1) The purpose of the conversation was not to make known 'intending proposals.' No single suggestion was offered by me to Mr. Parnell as formal, or as unanimous, or as vital. It was a statement perfectly free and without prejudice of points of which either I myself, or such of my colleagues as I have been able to consult, incline to believe that our plan of '86 for Home Rule for Ireland might be improved, and as to which I was desirous to learn whether they raised any serious objections in the mind of Mr. Parnell. (2) To no one of my proposals did Mr. Parnell offer serious objections; much less did he signify, in whole or in part, that they augured the proposal of a measure which would not satisfy the aspirations of the Irish race. According to his present account, he received from me in the autumn of '89 information of vital changes adverse to Ireland in our plans for Home Rule, and kept that information secret; and since that time I have had no communication on the subject from Mr. Parnell, until now, in the end of Nov. '90, in connection with a totally independent and personal matter, he produces it to the world. (3) I deny, then, that I made the statement which his memory ascribes to me, or anything substantially resembling them, either on the retention of the Irish members, or on the settlement of the land or the agrarian difficulty, or on the control of the constabulary, or as to the appointment of the judiciary. As to the land in particular, I am not conscious of having added anything to my public declarations, while, as to county-court judges and resident magistrates, I made no suggestion whatever. (4) The conversation between us was strictly confidential; and in my judgment—and, as I understood, in that of Mr. Parnell—the publication even of a true account of it is to break the seal of confidence

which alone renders political co-operation possible. (5) Every suggestion made by me was from written memoranda. The whole purport of my conference was made known by me in the strictest confidence, when it had just taken place, to my colleagues in the Cabinet of '86. I assured them that in regard to none of my proposals had Mr. Parnell raised any serious difficulty whatever. (6) Neither Mr. Parnell nor I myself was bound by this conversation to absolute and final acceptance of the proposition then canvassed; but during the year that has since elapsed I never received from Mr. Parnell any intimation that he had altered his views in regard to any of them. I have now done with the Hawarden conversation, and I conclude with the following statement: (1) I have always held in public, as well as in private, that the National party of Ireland ought to remain entirely independent of the Liberal party of Great Britain. (2) It is our duty, and my duty in particular, conformably with the spirit of Graffan and O'Connell, to study all adjustments in the great matter of Home Rule which may tend to draw to our side moderate and equitable opponents; but for me to propose any measure, such as Ireland could approve, on the lines which I have laid down, would be fatuity as regards myself and treachery to the Irish nation, in whom, even by the side of Mr. Parnell, I may claim to take an interest." Mr. John Morley wrote: "The manifesto published by Mr. Parnell this morning contains two or three statements affecting me which I desire without loss of time to correct: (1) I made no sort of attempt to fetter Mr. Parnell's action on the Land Purchase Bill. . . . (2) Mr. Parnell imputes to me that in our conversation of Nov. 10th (five days before the proceedings in Court) I made a 'remarkable proposal' with the object of absorbing the Irish party into English politics by means of office. I made no proposal. It was natural that, in a free and confidential discussion of a possible future, I should wish to make sure, for Mr. Gladstone's information, that Mr. Parnell still held to the self-denying declarations of '86. His answer to my inquiry was what I had fully anticipated. (3) Mr. Parnell's account of what passed on the same occasion on the subject of the evicted tenants on campaign estates is wholly incorrect. I observed that some direct action might become necessary, though of course I foresaw that there were difficulties in the way of legislation. I never said that either I or any of my colleagues had formed any conclusion against legislation. I never said or hinted that it would be impossible for an Irish Parliament to do anything in the matter. I did say that, whether by direct or indirect action, the evicted tenants ought not to be allowed to suffer. As to Tipperary, there is all the difference between the sensible perception of difficulties and the despair which Mr. Parnell ascribes to me. Mr. Gladstone is well able to deal with his own share in the manifesto; but I am bound to say that on Nov. 10th I was under the most distinct impression that Mr. Parnell did not object to the suggestions thrown out a year ago at Hawarden as subjects for provisional examination, and those suggestions were likely to make a scheme generally acceptable to Great Britain." Mr. Dillon, Mr. O'Brien, Mr. T. D. Sullivan, Mr. T. P. O'Connor and Mr. Gill telegraphed from Indianapolis to Mr. Justin McCarthy

(Nov. 30th): "We suspended judgment, at Mr. Parnell's request, pending the appearance of his manifesto. We have this morning read manifesto with deepest pain. It fully convinces us that Parnell's continued leadership is impossible. Will cable our views fully to-morrow for information of Irish party and Irish people." At a meeting in No. 15, on Dec. 2nd, a proposal of Colonel Nolan to adjourn the consideration of the question of the leadership for a fortnight, and then to resume the debate in Dublin, was defeated by 44 to 29, being virtually a majority of 15 against Mr. Parnell. On Dec. 31st the Irish hierarchy, at a meeting of their standing committee in Dublin, issued a declaration proclaiming Mr. Parnell's unfitness to retain his post as leader of the party, not only on moral grounds, but also on the further ground that his retention would cause inevitable disunion. On Dec. 3rd and 4th the Irish Parliamentary party had before them, in No. 15, a proposal of Mr. Clancy, to the effect that, in view of the differences between Mr. Gladstone and Mr. Parnell as to the Hawarden suggestions, the whips of the party be instructed to obtain from Mr. Gladstone, Sir W. Harcourt and Mr. John Morley an expression of their views on the subject of the control of the constabulary and the settlement of the land question. While Mr. Clancy's proposal was before the meeting Mr. Parnell submitted certain draft resolutions, declaring the opinion of the Irish Parliamentary party that no Home Rule Bill would be satisfactory or acceptable which would not confer the immediate control of the Irish police on an executive responsible to an Irish Parliament, and which did not confer on an Irish Parliament full power to deal with the Land question. In course of the discussion he remarked that if these proposals were taken to the Liberal leaders, and if the meeting decided by resolution that the answer of those leaders upon two points was satisfactory, the answer would be satisfactory to him. He would, he is reported to have added, resign the leadership if the vote of the majority of the party decided that the answer of the Liberal leaders was satisfactory. Communications were entered into with Mr. Gladstone which led to the adoption of a modified proposal, differing from that first made by Mr. Clancy, in that it contained no reference to differences between Mr. Gladstone and Mr. Parnell, and simply requested a conference with him alone. The purport of this proposal, as adopted by the meeting in No. 15, was communicated to Mr. Gladstone, who wrote that he could not undertake "to make any statement of our intentions on these or any other provisions of a Home Rule Bill in connection with a question of the leadership of the Irish party. When the Irish party shall have disposed of this question, which belongs entirely to their own competence, in such a manner as will enable me to renew the former relations, it will be my desire to enter without prejudice into confidential communication, such as has heretofore taken place, as occasion may serve, upon all amendment of particulars and suggestion of improvements in any plan for a measure of Home Rule. I may venture to assure you that no change has taken place in my desire to press forward on the first favourable opportunity a just and effective measure of Home Rule. I recognise and earnestly seek to uphold the independence of the Irish Parliamentary party no less than that of the Liberal

party. I acknowledge with satisfaction the harmony which since '86 has prevailed between them; and, when the present difficulty is removed, I am aware of no reason to anticipate its interruption. From what has taken place on both sides of the Channel in the last four years, I look forward with confidence, as do my colleagues, to the formation and prosecution of a measure which, in meeting all the just claims of Ireland, will likewise obtain the approval of the people of Great Britain. I shall at all suitable times prize the privilege of free communication with the Irish Nationalist party. And I will finally remind you of my declaration this morning that, apart from personal confidence, there is but one guarantee which can be of real value to Ireland. It is that recently pointed out by Sir William Harcourt in his letter of Dec. and, when he called attention to 'the unquestionable political fact that no party and no leaders could ever propose or hope to carry any scheme of Home Rule which had not the cordial concurrence and support of the Irish nation as declared by their representatives in Parliament.' With this statement of my views and those of my colleagues, I anticipate that you will agree with me in the opinion that there would be no advantage in a further personal interview. What passed between the delegates from No. 45 and Mr. Gladstone was embodied in a report which was read in No. 15 on Saturday, Dec. 6th. After the report had been read a scene of confusion and excitement arose which culminated in the majority of the party, headed by **Justin McCarthy**, leaving the room, assembling elsewhere, and choosing him as their **Chairman**. Forty-four members retired with Mr. J. McCarthy, twenty-six remained with Mr. Parnell, and maintained that not having been formally deposed, he was still leader of the Irish Parliamentary party. The scene of the contest between the two factions was then changed to Ireland, where, the *Freeman* standing by Mr. Parnell, a new and anti-Parnellite organ was started under the title of the *National Press*. There was at the time a vacancy in the representation of **Kilkenny**, caused by the decease of Mr. Marum. Sir John Pope Hennessy was in the field as a Nationalist candidate, and having to choose, decided to stand as an anti-Parnellite. Mr. Vincent Scully went to the poll as a Parnellite, but after an exciting contest was defeated by a majority of 1162. At **North Sligo**, on the decease of Mr. P. McDonald, there was in April '91 another similar contest, which resulted in the anti-Parnellite being returned there also. Long before the second contest, however, Mr. W. O'Brien and Mr. Dillon had arrived in France from the United States, and in February a series of negotiations were conducted at **Boulogne** with them by Mr. McCarthy and Mr. Sexton on the one side and Mr. Parnell on the other, with a view to compose the outstanding difference. The endeavour to bring about harmony in the Nationalist ranks being, however, quite ineffectual, the fugitives crossed from Boulogne to England, and were arrested at Folkestone on Feb. 12th, being at once conveyed to Ireland, where they underwent the sentence passed upon them under the Crimes Act. At a meeting of anti-Parnellites held at the House of Commons on Feb. 12th, Mr. Justin McCarthy submitted a report drawn up by himself and Mr. Sexton on the negotiations, especially with regard to the Liberal assurances

on the land and police questions. In this the following passage occurred: "We felt quite confident, relying on Mr. Gladstone's promise of Dec. 5th, to enter into communications with the leader of the Irish Parliamentary party, that assurances on the subjects in question from Mr. Gladstone and his colleagues would not be long delayed even if no further inquiry was addressed to them, but we thought it desirable to expedite these assurances as circumstances of urgency appeared. Our communication with Mr. Gladstone and his colleagues was limited to a request for a statement of their policy on the settlement of the Irish land difficulty, and the final control of the Irish police. We submitted the specific questions, and asked that the decision upon them should be conveyed to us for the information of the Irish party. Our request was complied with, and after a few days a paper in the following terms was placed in our hands, with an intimation that it might be taken as embodying the provisions with respect to the settlement of the Irish land question and the final control of the Irish police which Mr. Gladstone and his colleagues would regard it as their duty to insert in the Home Rule Bill and treat as essential provisions." On the question of the settlement of the land dispute the following passage occurs: "It would be obviously inconsistent with the concession of Home Rule to Ireland that the power to deal with the laws relating to land in Ireland should be permanently confined to the Imperial Parliament to the exclusion of the Irish Legislature. The land question must therefore either be settled by the Imperial Parliament simultaneously with the establishment of Home Rule, or within a limited period thereafter, to be specified in the Home Rule Bill, or the power to deal with it must be committed to the Irish Legislature." On the question of the police, the report says: "Mr. Gladstone expressly said, in introducing the Home Rule Bill in 1886, that he and his colleagues had no desire to exempt the police of Ireland in its final form from the ultimate control of the Irish legislative body. The complete organisation of the civil force by the Irish Government to take the place of the present armed and semi-military police ought not to require more than a moderate amount of time, say five years or less. During the interval of the present armed police, under the control of the Lord-Lieutenant, would undergo a rapid reduction or transformation (subject, of course, to a strict observance of all the engagements made by the Imperial Government with the Royal Irish Constabulary), and would, on the completion of the arrangement for a civil police, finally disappear." Mr. Justin McCarthy and Mr. Sexton asserted on the same day that the Boulogne negotiations were conducted by them with Messrs. Dillon and O'Brien upon the basis that Mr. Parnell's leadership of the Irish party was impossible. The truce which had been agreed upon pending the result of the Boulogne negotiations came to an end with their failure, and the fight between the two factions was renewed with the rancour and bitterness usually displayed in internecine contests. In June Mr. Parnell and Mrs. O'Shea were married at the Registrar's office, Steyning, Sussex. On the decease of the O'Gorman Mahon the Parnellite candidate at **Carlow**, which was assumed to be a stronghold of his leader, sustained in July a crushing defeat. (The figures polled at this and other by-elections will be found under

the heading **COMMONS, HOUSE OF.** At the end of July Mr. Dillon and Mr. W. O'Brien were liberated from Galway gaol upon the expiration of the term of imprisonment passed upon them in connection with the Plan of Campaign on the Smith-Barry estate in Tipperary, and both at once pronounced their opinion that Mr. Parnell's leadership was no longer possible. Later on the *Freeman's Journal* changed its policy from Parnellite to anti-Parnellite, the leading spirit in the movement being Mr. Dwyer Gray. Notwithstanding many discouragements and disasters, Mr. Parnell continued to fight a losing battle with great courage and persistency. But of late years he had been far from robust, and in returning from a visit to Ireland he contracted a chill, which caused his death at Brighton on the evening of **Tuesday, Oct. 6th.** His body was conveyed to Dublin, and buried at Glasnevin cemetery on Sunday, Oct. 11th, a great procession escorting it through the city. On the following day a number of his followers met in Dublin and issued an address, in which they declared their intention of carrying on the struggle until the principles for which he lived and died had triumphed, and the national unity had been restored around a parliamentary party pledged to work for Ireland, under the flag of independent opposition, and absolutely free from the control of any foreign power or party. Later in the month it was announced that Mr. John Redmond had been selected as the leader of the Parnellite party, and that he had resigned his seat for North Wexford (for which no new writ can be issued until Parliament meets) in order to stand for the seat vacated by the decease of Mr. Parnell. For this seat there was a triangular contest, the other candidates being Mr. Martin Flavin (anti-Parnellite) and Captain Sarsfield (Unionist). As between the two Nationalist factions, the fight was carried on with the greatest acrimony, and was accompanied by scenes of violence and disorder. A great deal of interest was excited by the so-called "revelations" regarding the Boulogne negotiations, particularly by the disclosure of certain "assurances" said to have been given by the Liberal leaders. But these were, word for word, the same as those communicated by Mr. Justin McCarthy to his colleagues on Feb. 12th (and which are given fully above), and those were in substance only a formal repetition of what Mr. John Morley had told the citizens of Newcastle about a month before. The polling at Cork took place on Nov. 6th, and the return of Mr. Flavin was even a greater triumph for the anti-Parnellites than the other bye-elections which had taken place since the rupture had been. The seat at North Kilkenny, which had been vacated by the death, in October, of Sir John Pope Hennessy, was filled by the unopposed return of Mr. McDermott, who, like him, was an anti-Parnellite. Subjoined is a list of the members of the two sections of the Nationalist party, corrected to Nov. '91, Mr. T. P. O'Connor being included in one of them for the sake of classification, although he sits for an English constituency:—**Anti-Parnellites** (54)—McCarthy, Justin; Abraham, William; Barry, John; Chaney, P. A.; Connolly, Dr.; Colclough, Bernard; Condon, T. F.; Cox, Joseph A.; Crilly, Daniel; Deasy, John; Dickson, Thomas A.; Dillon, John; Esmonde, Sir Thomas H.; Grattan, Maurice; John, Flavin; Martin, Flynn; James C.; Foley, P. J.; Fox, Joseph F.; Gilhooly, J.; Hammond, J.; Healy,

Maurice; Healy, T. M.; Jordan, Jeremiah; Kenny, Matthew J.; Kilbride, Dennis; Knox E. F.; Vesey, Lane, William J.; McCartan Michael; McCarthy, Justin Huntly; McDermott, Patrick; MacNeill, J. G. Swift; Molloy Bernard C.; Morrogh, John; Murphy, W. M.; O'Brien, James F. X.; O'Brien, P. J.; O'Brien, W.; O'Connor, Arthur; O'Connor T. P.; O'Keefe, Francis A.; Pinkerton, John Power; Patrick Joseph; Quinn, T.; Reynolds W. J.; Roche, John; Sexton, Thomas Sheehan, T. D.; Sheehy, David; Stack, John Sullivan, Donal; Sullivan, T. D.; Tanner, Dr. Tute, James; Webb, Alfred. **Parnellites** (30)—Blanc, Alexander; Byrne, Garrett M.; Campbell, Henry; Carew, J. Lawrence; Clancy, John J.; Conway, Michael; Corbet, William J.; Dalton, James J.; Fitzgerald, James C.; Harrington, E.; Harrington, T.; Harrison, Henry; Hayden, Luke P.; Kenny, Dr.; Lalor, Richard; Leahy, James; Leamy, Edmund; Macdonald, W. A.; McKenna, Sir J.; Maguire, T. Rochfort; Mahony, Pierce; Nolan, Col.; Nolan, Joseph; O'Brien, P.; O'Connor, J.; O'Hanlon, Thomas; O'Kelly, James J.; Power, Richard; Redmond, William H. K.; Shell, Edward Neutral (1)—Gill, Thomas P. One seat (North Wexford) vacant. Total 86.

Irish Society and London Companies (Irish Estates) Committee. See **SESSION**, sect. 128.

Iron. See **TRADE**, '91.

"**Irving, Henry**," is the "stage name" of John Henry Brodribb, the famous actor, who was b. at Keinton, Glastonbury, 1838, and was ed. by Dr. Pinches at his school, George Yard, Lombard Street, London. Made his first appearance at the Sunderland theatre in '56, and subsequently proceeded to Edinburgh, where he played for two and a half years. Appeared at the Princess's Theatre, London, in September '59, for about three months. In April '60 Mr. Irving proceeded to Glasgow, where he played till the end of the ensuing Sept.; subsequently going to the Manchester Theatre Royal. From January '66 to July of that year Mr. Irving was engaged at the Prince of Wales's Theatre, Liverpool, and then returned to Manchester. A London engagement followed at the St. James's Theatre. In December '67 he was engaged at the Queen's Theatre, Long Acre, and at various other houses, till in the spring of '70 he made a great success as **Digby Grant** in the "**Two Roses**" at the Vaudeville Theatre. In November '71 he made his first appearance at the Lyceum. His first great effort here was in "**The Bells**." Mr. Irving scored a series of remarkable successes subsequently, in "**Charles I.**" and "**Eugene Aram**" (by Mr. Wills), "**Richard III.**," "**Hamlet**," "**Macbeth**," and "**Othello**" ('76); followed by the Poet Laureate's "**Queen Mary**." At the Lyceum, in '77, "**Richard III.**" was produced, and then the curious piece "**The Lyons Mail**," in which Mr. Irving "doubled" in **Dubosoq** and **Lesurques**. This was followed by the poetical drama "**Vanderdecken**." In December he took over the Lyceum from Mrs. Bateman, and revived "**Hamlet**." In "**Othello**" he for one season alternated the characters of **Othello** and **Iago** with Mr. Edwin Booth, the American tragedian. In July '84 Mr. I. paid his first visit, with Miss Ellen Terry (*q.v.*) to the United States. A

second visit to that country was made in '84; and the latter end of '85 was marked by the unprecedented success of a new dramatic version of "*Faust*." Subsequently Mr. I. reproduced "*Macbeth*," which was again revived in Jan. '89. Another notable undertaking ('89), however, was the reproduction of the late Watts-Phillips' "*The Dead Heart*." A new play adapted by H. Merivale from Sir Walter Scott, and entitled "*Ravenwood*," was produced Sept. '90, followed by a revival in '91 of "Much Ado about Nothing," "The Lyons Mail," "The Corsican Brothers." Mr. I. unveiled the Marlowe Memorial at Canterbury (Sept. 16th).

Isle of Man. Lies in the Irish Channel, equidistant from England, Scotland, and Ireland. Area 220 sq. m., pop. 54,089. **Divisions** are 6 sheadings and 17 parishes. The principal towns are Douglas, Castletown, Ramsey, and Peel; **Castletown** is the ancient capital, but **Douglas** (pop. 15,719) is the chief town and the seat of government. **Physical aspect** mountainous, well watered, and exhibiting lovely scenery. There are peculiar breeds of ponies, cattle, cats, etc.—**Government** is "home rule" under a Lieutenant-Governor, who, with Council and House of Keys, makes up the Tynwald Court. Acts, after assent of the Crown, must be proclaimed on Tynwald Hill. **Industries** are farming, fishing, mining of lead, copper, iron, zinc and reception of tourists. The land is in a high state of cultivation. (For financial statistics see BRITISH EMPIRE, etc.—table). Railways exist between the various towns.—The Manx people are a distinct Celtic nationality. Their language and old customs are rapidly disappearing. The island has had many **sovereigns**—Welsh, Scots, Northumbrians, Norse, English. The last kings were the Dukes of Athole, who sold their revenues in 1765, but did not give up entire rights till 1849, since when only has Man been an actual dependency of the British Crown. In May '91 a general election took place in the island, a Redistribution of Seats Bill having been carried by the local legislature. Owners and occupiers of real property of annual rateable value of £4. lodgers with £10 qualification, and unmarried women qualified by ownership have the right to vote. The result of the election was the return of democratic members.

Isle of Man Tower and Suspension Bridge. As recorded in our '91 ed., this is an enterprise to construct a tower of about 400 ft. in height, which will be connected by means of a suspension bridge with Douglas Head. On Oct. 24th, '90, the Earl of Lathom laid the foundation stone of the tower with Masonic ceremony. It was stated that the erection would have six floors, to be devoted to various purposes, the top being used as an observatory. The cost was estimated at £80,000, apart from the bridge, and it is expected to be completed by the midsummer of '92. At the annual meeting of the Company, on Feb. 25th, '91, Dr. Abbott, the chairman, said all the property required had been secured. The Marine Drive at Douglas Head was formally opened on July 24th.

Italian Dependencies. See COLONIES AND DEPENDENCIES OF EUROPEAN POWERS, ABYSSINIA, ASSAB, and MASSOWAH.

Italian Political Parties and Parliament. The legislative authority of Italy rests with the King and two chambers, the **Senate** and **Chamber of Deputies**. The former (unlimited in

number) is composed of princes of the royal house, after attaining their majority, and of members nominated for life by the king. They must be upwards of forty years of age, and they are supposed to have justified their nomination by eminent services to their country. The **Chamber of Deputies** (Camera de' Deputati) is elected by *scrutin de liste* by conditional universal suffrage for periods of five years, and contains 508 members, or one to every 57,000 of the population. For electoral purposes Italy is divided into 135 districts, which again are subdivided. One-eighth of the inscribed electors must vote to render an election valid. The present Chamber of Deputies was elected on Nov. 23rd, 1890, a dissolution having been decreed by the king on Oct. 22nd. Towards the end of Jan. '91 the Finance Minister submitted a bill which had for its object the provisional application of increased duties on various imported goods and the tax upon the manufacture of alcohol. After the Premier had supported Signor Grimaldi, who introduced the bill, a motion to proceed to the order of the day was defeated by 186 to 123 votes. Thereupon Signor Crispi placed in the hands of the King the resignation of the Cabinet (Jan. 31st). The Marquis di Rudini then formed a Cabinet, which included Professor Villari as Minister of Instruction. The Marquis holds the offices of Premier and Minister for Foreign Affairs.

Italy. A kingdom governed by Humbert I., second constitutional King, assisted by a Senate (composed of the Princes of the royal house and of royal nominees of eminence, paying taxes to annual amount of £120), and Chamber of Deputies, elected by all citizens over twenty-one who can read and write, and pay annual taxes amounting to 16s. 8d. Area 114,410 square miles; pop. 29,944,607. **Estimated revenue**, '89-'90, 1,801,397,772 l.; **expenditure**, 1,857,906,850 l.; **public debt**, 450,000,000 l. **Imports** ('89), £55,627,191; **exports**, £18,019,036. (For army and navy see FOREIGN ARMIES and FOREIGN NAVIES; for history to '91 see previous eds.)

POLITICAL. The newly elected Parliament was opened by King Humbert (Dec. 10th). There were 100 deputies present, and the Royal Speech was loudly cheered. It was reported that there was serious disagreement between King Menelek and the Italians in Abyssinia, making war imminent. Signor Biancheri, a Ministerialist, was re-elected President of the Chamber (11th), the Government candidates for the other Parliamentary offices being also elected. It was reported (15th) that the Italian troops at Kassala were in a critical position, and that reinforcements had been telegraphed for. The manager of the Casino in the Riviera decided to withdraw permanent entry tickets, and issue tickets half-yearly. Commander de Rossi announced (31st) the discovery of the basilica of St. Sylvester, dating from the fourth century, and containing the tombs of six Popes, in the Catacombs of St. Priscilla. '91. Typhus fever, which had been raging at Pisa for some time, was reported to have extended to Florence (Jan. 1st). The fever was reported to be spreading (8th). The Chamber (20th) ratified a treaty of friendship and extradition between Italy and Bolivia. The Minister of Finance presented his statement (28th). The actual deficit, as estimated for '88-9 in the financial statement of Dec. 16th, '89, was 74,400,000 fr. The result of the Budget operations for '89-90 was that the

patrimony had increased to 53,000,000 fr., while the deficit for the financial year '90-1 remained fixed at 25,300,000 fr., but payments had decreased, resulting in the diminution of receipts by 20,000,000 fr. A deficit of 45,000,000 fr. might therefore be expected. With regard to the financial year '91-2, the Minister said he anticipated a deficit of 10,500,000 fr. In view of the reductions to be made in the receipts of the Budget of '90-1, the receipts for the Budget of '91-2 would show a diminution of 16,500,000 fr. It would therefore be necessary to allow in the estimates for '92-3 for an actual deficit of 30,000,000 fr. To provide against this deficit, the Government intended, in the first place, to fix an absolute limit to the extraordinary expenditure, which henceforth would never exceed 85,000,000 fr. Signor Crispi resigned (31st). The Marquis di Rudini assumed office (Feb. 10th) as Premier and Minister for Foreign Affairs. In a speech to the Chamber of Deputies (Mar. 4th), the Marquis di Rudini said the Ministry had no intention of relaxing the bonds of the Triple Alliance, or of dissolving them. A protocol delimitating the British and Italian spheres of influence in East Africa was signed (24th) by Lord Dufferin and the Marquis di Rudini. At Bari 179 persons were (April) charged with belonging to a conspiracy called the "Mala Vita," the principal object of which was brigandage. The amended Budget was passed by 24 votes to 4 (13th). A serious explosion occurred at the powder magazines at Fort Monteverde (23rd), killing 2 people and wounding 150. An indemnity was given to the families of the victims. There were 265 tons of powder in the magazine. The Roman Budget for '91 fixed the income at 27,040,751 lire, and the expenditure at 32,986,326 lire. In Rome (May 1st), the demonstration was passing off quietly, when the people, at the call of an anarchist, attacked the soldiers who were drawn up on one side of the Piazza Santa Croce. Shots were fired at the troops, and many of the soldiers were wounded. A number of the mob were also killed and wounded. There was a conflict between the soldiers and the mob in Florence. The celebration of the sixth centenary of the foundation of the Duomo was inaugurated (24th) with imposing ceremony. The "Mala Vita" trial terminated; the Court found all the prisoners (179) guilty except 14, and sentenced them to terms of imprisonment varying from fifteen years to six months. Lombardy, Venetia and part of Tuscany were visited (June 7th) by repeated earthquake shocks, Verona suffering most. The gendarmier arrested (21st) at Andria 50 men belonging to the "Infame Leghe," an association resembling the "Mala Vita." The special commission appointed to examine the water supply of Florence reported, condemning all the existing sources of supply. The new ironclad *Stella* was launched (July 6th). The Prince of Naples paid a visit to England, when he visited the Queen, and was present at a garden party at Hatfield. He also dined with the Duke of Cambridge. The Royal family breakfasted on board H.M.S. *Bombay* (8th). A lava flow from Vesuvius broke out again in increasing magnitude. The satirical paper, *Bologna Riget*, criticised incidents in the military manoeuvres, which was objected to by the officers of the 30th Regiment. These officers fruitlessly ransacked a theatre to find the writer of the article and the artist, and on reaching the street were hooted by a large

crowd. They drew their swords and cut right and left, wounding a number of people, who retaliated with stones and revolver shots. The police eventually quieted the disturbance. Ten persons were taken to the hospitals and others to their homes. The regiments at Bologna were at once ordered to Pescara. King Humbert unveiled a monument of Charles Emanuel I. at Mondovì (Aug. 23rd). The Judicial Congress was opened in the great hall of the University at Florence (Sept. 7th), under the presidency of Signor Ferraris. It was stated that the Pope had placed 20,000 fr. at the disposal of Messrs. Marcellius & Domenickelli, for the publication of a new *édition de luxe* of Dante (Fra Giovanni's version), which dates from the fifteenth century. A fight took place between some troops and brigands, in which the chief, Reverel, was killed (13th). The Pope received 2000 French working-men in the vestibule of St. Peter's.—GENERAL. The Pope (Dec. 15th) received the Bishop of Nancy, who was the first French prelate to endorse Cardinal Lavigne's adhesion to the Republic. The Italian Socialist Congress met at Capolago (Jan. 5th). The Anti-Slavery Association offered a prize of 20,000 lire for a popular book on the abolition of slavery (Feb.). A stream of lava began to flow from Vesuvius (June 7th). His Holiness issued a letter to the archbishops and bishops of the German and Austro-Hungarian empires, calling on them to use their endeavours to eradicate the practice of duelling (Sept. 21st). The Pope celebrated Mass in the Concile Chapel at St. Peter's (26th), when there were 2,000 pilgrims present. His Holiness received 3,000 of the International Catholic Pilgrimage (28th). Low Mass was celebrated in a most elaborate and imposing manner by the Pope in St. Peter's (29th). The edifice was crowded, and there were 25,000 foreign pilgrims outside. The reception given to his Holiness was most enthusiastic. An interview took place (30th) between the King of Italy and the King of Roumania at Monza. The statue of Garibaldi was unveiled at Nice (Oct. 3rd). Several pilgrims got on the altars over the tombs in the Pantheon, and there were disturbances in consequence. The Public Prosecutor determined (4th) to proceed against three of the pilgrims under the penal code, by which they were liable to be imprisoned from six to thirty months. Notwithstanding the disturbance, the Pope celebrated low Mass at St. Peter's (5th). There were 1,200 pilgrims present. Three thousand persons presented the Naples municipal authorities with a gigantic wreath to be placed at the foot of the statue of Victor Emanuel (6th). The sacred emblems were removed from the altars in the Pantheon, and a long correspondence took place between the Quirinal and the Vatican, with the result that the figures were quietly replaced. The Marquis di Rudini and M. de Giers met at Monza (12th). The trial of the sixty persons concerned in the anarchist riots in the summer of '90 began at Rome (14th). The new opera by Mascagni, *L'Ami Fritz* (31st), was a great success. The Inter-Parliamentary Peace Conference was opened at Rome, under the presidency of Signor Biancheri (Nov. 3rd), in the great hall of the Capitol. The States represented were, Great Britain, Germany, Austria, Belgium, Denmark, Spain, France, Italy, Greece, Norway, Portugal, Netherlands, Roumania, Servia,

Sweden, and Switzerland, and there were about 100 foreign delegates present. The Court of Appeal at Trani acquitted 124 of the Mala Vita prisoners, and confirmed the sentence on 31 (7th). During a bull-fight at Castellamare (10th), the circular structure on which the spectators were seated gave way. Five hundred persons were more or less injured, and about 20 cases proved fatal. The Peace Congress

was opened (11th) in Rome, under the presidency of Signor Bonghi. The National Exhibition was opened at Palermo (15th).

Italy, King of. See HUMBERT IV.

Ivory Coast. A portion of Guinea, between Grain and Gold Coasts. The stations of Grand Bassam, Assinie, and Kutenu were reoccupied by France (1884). The coast is low and sandy and the climate inimical.

J

Jackson Case. See HUSBAND AND WIFE, LAW AS TO.

Jackson, Right Hon. William Lawies, P.C., M.P., Chief Secretary for Ireland, is the son of the late Mr. W. Jackson, of Leeds, where he was born in 1840. He received part of his education at a Moravian school. He entered the House of Commons in the Conservative interest as M.P. for Leeds in '80, and was elected to represent the Northern Division of Leeds in '85, and again in '86. In the latter year he became Financial Secretary to the Treasury, in which office he has performed much useful work. He was sworn a Member of the Privy Council in '90. Mr. J. is well known in the leather and woollen trades, and is a Director of the Great Northern Railway. In November '91 his appointment as Chief Secretary for Ireland was notified.

Jamaica. The largest of the British West India Islands, lying 90 miles south of Cuba. Divided into three counties—Surrey, Middlesex, and Cornwall. **Turk's and Caicos Islands** have been annexed to the colony. Capital Kingston (pop. 40,000), with Spanish Town (the old capital) of next importance. The principal ports are Port Royal (harbour of Kingston), Montego Bay, and Falmouth. Exports sugar, rum, pineapples and various fruits, coffee, pimento, logwood, cacao, ginger, etc.—Naval manœuvres were carried out during two days in Dec. '90. Kingston was attacked by two men-of-war, which were eventually compelled to retire. The manœuvres were very thoroughly carried out.—'91. Serious riots by the men of the 1st West India Regiment; twenty-four constables and one civilian were injured. The Exhibition was opened at Kingston by Prince George of Wales (Jan. 27th). The streets were gaily decorated. The Legislative Council voted £2000 to reimburse the Government for the expenses of entertaining Prince George of Wales and other visitors at the Exhibition. The island is ruled by a Governor, with a Privy Council and a partly elective Legislative Council. (For financial statistics see BRITISH EMPIRE, etc.—table.)

James, Henry was b. in America 1843, his father being the Rev. Henry James, a well-known philosophical writer. Began the study of law, but ultimately attached himself to literature. His novels, which deal largely with American life and character, are very popular. "*Princess Casanovissima*" ('87) fully sustained his reputation, differing from most of his others by its study of English life. Mr. J. has been for many years a resident in England. His recent works, "*The Reverberator*," "*Partial Portraits*," and "*A Tragio Muse*," have all been successful. His play, "*The American*," was produced at the Opera Comique (Sept. '91).

James, Rt. Hon. Sir Henry, P.C., Q.C., M.P., was b. at Hereford, 1828. Educated at Cheltenham College; Lecturer's Prizeman at the Inner Temple (50-51); called to the bar at the Middle Temple (52). Nominated to ancient office of "postman" of Court of Exchequer (67); appointed Q.C. (69). Was Solicitor-General (73), and Attorney-General (73-4 and '80-85). During the latter period he introduced and carried through Parliament the Corrupt Practices (Parliamentary Elections) Act. Returned in the Liberal interest for Taunton (69-85), Bury (85). On the formation of Mr. Gladstone's Govt. in '86, Sir Henry refused to join it, though offered the Lord Chancellorship, because he could not follow Mr. Gladstone upon the Home Rule question. Since then Sir Henry has been one of the active leaders of the Liberal Unionist party. Sir Henry was one of the counsel for the *Times* in the action of *O'Donnell v. Walter*, and as one of the leading counsel for that organ in the *Parrell Commission* delivered an able address, forming a retrospect of the history of Ireland. Visited Belfast and delivered a political address (April '91).

Japan. An empire adjacent to China, from which it is separated by the Eastern Sea and the Straits of Corea, formed of the archipelago of Nippon, which consists of four large islands, Yesso, Hondo, Kiushiu, and Shikoku, and of nearly 4000 rocky islets. Its area is about 147,345 sq. miles. Its history is almost as ancient as that of China, the present Mikado being the representative of a dynasty which claims to have possessed the throne since B.C. 660; but the legendary period comes down to a time much nearer our own than the well-authenticated annals of the Middle Kingdom during the last 2000 years. The name of the present Mikado is Mutsu Hito (*q.v.*), and he was born in 1852. **Army**, 245,311; **navy**, 12,252; **estimated revenue** (90-91), 83,462,532 yen; **expenditure**, 77,012,952 yen; **imports** (90), 81,728,580 yen; **exports**, 56,603,506 yen; **debt**, 300,830,900 yen.—The Diet was opened by the Emperor (Nov. 29th, '90). '91. A return published at the beginning of the year showed that the population on Jan. 31st was 40,072,020, of which 20,245,336 were males and 19,825,684 were females. The number of inhabited houses was 7,440,872. Arranged according to social status, there were 3825 nobles, of whom 593 were the heads of families; 1,993,317 *shizoku*, or members of the old military class, of whom 430,411 were the heads of families; and 38,074,558 "common people," 7,736,764 being the heads of families. There were 7,445,119 married couples. During the year the number of births was 1,209,910, 617,863 of the children being males and 592,047 females. The deaths numbered

808,680. There were 340,445 marriages and 107,478 divorces, while 15,711 Japanese emigrated abroad. An outbreak of dysentery at Fu-Ko-Haen was reported (Jan. 15th), during which there were 24,800 cases and 4,400 deaths. There was a cyclone at Woo-Ko-Yama, causing much loss of life and destruction of property. The New Parliament Houses were destroyed by fire (10th); their original cost was \$2,370,000. A magnificent cathedral of the Greek Church was opened at Tokio (March 8th). Whilst the Czarevitch was at Otsu (May 14th) an attempt was made to assassinate him. He was severely wounded. The Mikado at once set out for Otsu, and had an interview with the Czarevitch (13th). The would-be assassin was sentenced to the full penalty of the law allowed in such cases—penal servitude for life. A typhoon occurred at Kobe (Aug. 16th), which destroyed much shipping, and in which H.M. gunboat *Iwedo* sank. About 250 lives were lost. Many houses were wrecked. The Minister of War (Sept.) demanded 4,000,000 yen, half for construction of fortifications, and the other half for strengthening existing defences, the manufacture of rifles, etc. The Japan Cotton Spinners' Association published (Oct.) some interesting figures with regard to that industry. They show that from July '88 to June '91, the number of mills increased from 19 to 30; the number of spindles from 83,360 to 300,499; the quantity of cotton consumed monthly from 1,152,250 lb. to 6,156,300 lb.; the yarn spun monthly from 1,008,825 lb. to 5,221,908 lb.; and the coal consumed monthly from 2,694,787 lb. to 11,699,055 lb. The largest mill in the country was the Osaka Biseki Kwaisha. It had a paid-up capital of \$1,200,000 and a reserve fund of \$400,000. The total number of spindles was 61,200, of which 27,300 were mule and 33,900 ring. The cotton consumed at this one mill in the first six months of '91 was 5,361,566 lb. There was also a separate weaving shed with 333 looms. Altogether the mill employed 2,889 operatives, of whom 962 were males and 1,927 females. The Kanegafuchi mill in Tokio employed 1,731 hands, the Miye mill at Yokkaichi 1,676 hands, and the Settsu mill at Osaka 1,567 hands. Including the mills now in course of erection, there were on June 30th, '91, altogether 36 mills with 377,970 spindles, employing 17,248 hands. The import of cotton yarn was gradually falling off, the values for the last three years being '88, \$13,611,898; '89, \$12,522,039; '90, \$9,928,061. A terrible earthquake (Oct. 27th) devastated Osaka, Najoja, Gifu, Ojaki, and most of the coast towns, the loss of life being estimated at 5,000, injured 9,000, houses destroyed 12,000. Other towns also suffered in a less degree.

Japan, Emperor of. See MUTSU HITO.
Japanese Political Parties. The First Japanese Diet, to which the Emperor delivered an address (Nov. 29th, '90), is composed of a House of Peers and a House of Representatives. In the House of Peers there sit ten life members by virtue of their rank, 139 elected nobles, 59 Imperial nominees, and 44 elected men of mark. In the House of Representatives there are 300 members, all elected. Of these, about 130 are opposed to the policy of the Government, and follow the Constitutional Liberal party; 115 are classed as Independent, and are not committed to any special programme; 50 follow Count Okuma, as members of the Constitutional Progressive party; and, lastly, 5 belong to the Moderate Conservative party, but appear to

have no very clearly defined views. The President of the Upper House is Count Ito, who was selected by the Emperor; while the members of the Lower House selected as their President, Mr. Nakajima, a choice which has received Imperial approval. The elections for the House of Representatives took place in July '90. There were 450,365 persons entitled to vote; of these, 27,636 did not vote; 2,823 votes were void owing to irregularity. After the first session of Parliament there was a ministerial crisis. Count Matsugata replaced Count Yamagata as Prime Minister, retaining also the portfolio of Minister of Finance. Count Enomoto became Foreign Minister, and Count Ito was appointed President of the Privy Council (June '91).

Java. An island of the Asiatic Archipelago, the chief seat of Dutch power in the East Indies. Divided into 22 Residencies. Capital, Batavia (500,000). Other chief towns Samarang and Sourabaya. Exports, coffee, sugar, tea, rice, indigo, pepper, tobacco, etc. Administered by the Residents of Provinces and their subordinates under the Governor-General of the Dutch Indies. The mode of government is called the "culture system," and is based on officially directed labour. The army, as well for Java as for the other Dutch possessions in the East Indies, numbers about 15,000 Europeans and 16,000 natives, associated together. The colonial navy consists of 88 vessels, manned by 1271 men. There are 590 miles of railroad. Estimated revenue of Dutch East Indies, '90, 132,651,477 gldrs.; expenditure, 140,161,812 gldrs.; average imports, £12,800,000; average exports, £16,000,000. Land is government property, except in the west, and is let on hereditary lease. Enforced cultivation insures provision for the large population.

Jebb, Prof. Richard Claverhouse, M.P., LL.D., the eminent Greek scholar, was b. in Dundee 1841. Ed. at St. Columba's Coll., co. Dublin, Charterhouse School, London, and Trin. Coll., Camb., where he graduated Senior Classic '62. Public Orator of his Univ. '69, Professor of Greek in the Univ. of Glasgow '75, hon. LL.D. Edin., Harvard, and Bologna Univs. In May last Dr. J. was elected **Regius Professor of Greek** in the Univ. of Cambridge in succession to the late Dr. Kennedy. Amongst the most important of his works are "The Attic Orators," "Modern Greece," and a "Life of Richard Bentley." Dr. J. has for some time past been engaged in editing the "Complete Works of Sophocles." It is mainly through his efforts that a British School of Classical and Archaeological Studies has recently been established at Athens. The hon. degree of D.C.L. was conferred on Dr. J. by Oxford University, June '91. Elected in October to represent Cambridge University in Parliament on the decease of Mr. Raikes.

Jeddo Coal and Drainage Tunnel (U.S.). In July '91 the *Scientific American* gave an account of what it described as "the greatest engineering feat in the history of anthracite coal-mining," about to be commenced. This is the Jeddo Tunnel, to be driven for the purpose of draining the flooded mines of Jeddo and Harleigh. It runs from Butter Valley, Pa., to the bottom of Eberwade mammoth vein, a distance of three miles through solid rock, being 8 ft. square in the clear. All the collieries in the valley will be drained, and it will open an inexhaustible supply of coal, furnishing employment for thousands for years to come.

Jenner, Sir Wm., Bart., K.C.B., M.D., F.R.S., was b. at Chatham 1815. Ed. at Univ. Coll., M.D. Lond. '44. Has held successively the appointments of Professor of Pathological Anatomy in Univ. Coll.; Physician to the Hospital for Sick Children, Physician to Univ. Coll. Hospital, Professor of Clinical Medicine, and Professor of Principles and Practice of Medicine in Univ. Coll., and is **Physician in Ordinary to the Queen and the Prince of Wales**, whom he attended with Sir William Gull in the serious attack of typhoid fever which prostrated H.R.H. in '71. Sir William J. also attended the **Prince Consort** in his last illness. His eminence as a physician is chiefly based upon his discovery of the symptoms which differentiate typhus from typhoid fever. **President of the Royal College of Physicians '81.**

Jennings, Sir Patrick, K.C.M.G., was b. at Newry, Ireland, in 1831. Reaching Victoria in '52, he went to New South Wales, and became an important squatter. Entered parliament, and has acted as commissioner for N.S. Wales at various international exhibitions. Was the **executive commissioner** and organiser of the first international exhibition in Australia, which was held at Sydney in '79. Vice-President of Executive Council, and in '80 attained to the Premiership. At the Imperial Conference held in London in '87, Sir Patrick spoke as one of the New South Wales representatives. In '90 he was called to the Upper House, or Legislative Council, of the colony.

Jerome, Jerome Kwata, the author of "Three Men in a Boat," was b. in 1861. Owing to a change in his father's financial position, consequent on the inundation of the Jerome mine at the Cannock Chase Colliery, he became a clerk at the Edston offices of the L. & N.W. Railway Co. Leaving this occupation for the stage, Mr. J. acted at Astley's Theatre and in the provinces. Then the journalist's career attracted and for a time satisfied him, after which he became successively a tutor and a shorthand writer for a firm of parliamentary agents. Finally, before he gave himself up to literature, Mr. J. entered a solicitor's office, where he remained till '89. Published "On the Stage and Off" in *Play*, and then the "Idle Thoughts of an Idle Fellow" attracted the notice of the reading public. "Stage Land" he published in '89; and "Three Men in a Boat" made its appearance in that year also, scoring a striking success. During the summer of '90 Mr. J. wrote the "Diary of a Pilgrimage." Of his work as a dramatic author the following is a summary. His first play was "Barbara," which ran for a year at the Comedy Theatre, and has since been played in the U.S.A. and Australia; "Sunset" and "Fennel" met with success, while in '88 "Woodbarrow Farm" was played to large audiences, and was afterwards taken to New York. In '90 "New Lamps for Old" was produced at Terry's Theatre. "Told after Supper" was issued by him in Dec. '90. "Woodbarrow Farm" scored a success at the Vaudeville Theatre (Jan. '81).

Jersey, One of the Channel Islands (*q.v.*).

Jersey, Victor A. G. C. V., 7th Earl of, the newly appointed Governor-General of New South Wales, was b. March 20th, 1845; was ed. at Eton and Balliol Coll., Oxford. His first official appointment was as a Lord-in-Waiting to the Queen, which he held '75-7. For a short time he has acted as **Paymaster-General**. The announcement that his lordship had been sworn

a member of the **Privy Council** was made in the early part of '90, followed in July by his appointment to succeed Lord Carrington. Lord J. has taken a warm interest in various philanthropic movements, especially in connection with training-ships for boys. Was installed (July '81), as Grand-Master of the Freemasons in New South Wales.

Jeune, Sir Francis Henry, one of the Justices in the High Court of Justice, is the eldest son of a former Bishop of Peterborough, and was b. in 1844. Ed. at Balliol Coll., Oxford, where he obtained 1st Class in Classical Mods. '63, and 1st class in *Lit. Hum.* two years later. He also was successful in obtaining the Stanhope prize in '63, and the Arnold prize in '67. He was called to the bar of the Inner Temple '68, and took silk in '88. In connection with the civil action of the Tichborne claimant Mr. J. acted as junior counsel. In ecclesiastical affairs he has long enjoyed a considerable reputation, and appeared in the Lincoln case in '90. Succeeded Lord Hannen, in Jan. '81, as Judge of the Probate, Divorce, and Admiralty Division. Lady Jeune has long been an energetic philanthropist, and, with Sir Francis, has occupied a noteworthy position in the social life of London. Was knighted on his ascension to the judicial bench.

Jews. The numbers of Jews in the various countries of Europe, according to the *Archives Judaïques*, are as follows:—Russia, 3,000,000; Austria-Hungary, 1,644,000; Germany, 562,000; Roumania, 263,000; Turkey (about) 105,000; Holland, 82,000; France, 65,000; England, 70,000; Italy, 40,000; Switzerland, 7,373; Scandinavia, 6,973; Servia, 3,492; Greece, 2,652; Iberian Peninsula, 2,102. **Total in Europe, 5,400,000.** Outside Europe no satisfactory enumeration is possible, but it is probable that Asia contains 300,000; Africa, 350,000; the Americas, 250,000; and Australia, 15,000. There are probably eight millions of Jews in existence at the present date (1891). Until very recently Jews were restricted in their rights throughout the world; and those of eastern Europe, Africa, and the East still labour under many disabilities, which it is the object of the "Alliance Israélite" of Paris, and similar societies in Germany, Austria, and England (Anglo-Jewish Association, 85, London Wall, E.C.), to remove. In England, full emancipation was granted to Jews in 1858. They possess a special **Jewish Board of Guardians** (13, Devonshire Square, Bishopsgate), which provides for indigent Jews, a large orphan asylum at West Norwood, in addition to many other charities, and there are Jewish wards in several hospitals. There are six large Jewish elementary schools in London, the principal being the **Jews' Free School**, Bell Lane, Spitalfields, the largest and one of the most successful elementary schools in the world. Similar schools and charities are connected with the principal Provincial congregations: the most important are those of Liverpool (2), Manchester (5), Birmingham, Leeds (2), Newcastle, Hull, and Sheffield. The spiritual wants of Jews are provided for in the East-End by a number of *Hebræa* or minor congregations, which have been united (Federation of Minor Synagogues); while eleven of the larger synagogues are organised by the United Synagogue (2, Charlotte Street, Portland Place, W.). Ministers for these are mostly trained at **Jews' College** (Tavistock House, Tavistock Square), which has a very extensive library of works

dealing with Jewish subjects. Another library specially noteworthy for Hebrew MSS. is situated at the Beth Hamidrash (St. James' Place, E.C.), where the sittings of the *Beth Din*, or ecclesiastical tribunal, are held, at which points of Jewish law are decided. Ecclesiastical matters are under the control of the Chief Rabbi. The mandates of the Chief Rabbi are only binding on the so-called *Orthodox Jews*, while there are "Reform" congregations at Upper Berkeley Street, London, Manchester and Bradford. There has been a marked *rapprochement* of recent years between these two bodies. There are, besides, some 3,000 Spanish and Portuguese Jews (*Sephardim*) in London, who are under the spiritual charge of the Rev. Dr. Gaster and whose ritual slightly differs from that of the more numerous German and Polish Jews (*Ashkenazim*). As a religious term "Jew" has nowadays the very vaguest connotation, ranging from the superstition of the Chassidim of Russia and Galicia to the advanced agnosticism of the Society of Ethical Culture in New York. Jews have some special enactments connected with registration of their marriages, modifications of the Factory Acts to suit their Sabbath, etc. These, and other legislation likely to affect them, are looked after by the Jewish Board of Deputies (36, Finsbury Circus).—During '91 great attention has been again directed to anti-Semitic agitations in Russia and other countries. The influx of Jewish aliens into England occasioned much controversy in May and June. The election of Dr. Adler (*q.v.*) as Chief Rabbi of the United Congregations of the British Empire was also a leading event. Baron Hirsch's great scheme for the emigration of Jews to a colony assumed clearer shape in Sept. '91, when the formation of a company was announced. M. Jacques Henri Dreyfus was installed as Chief Rabbi of Paris (Sept. 29th). There are three Jewish weeklies, of which the most important is *The Jewish Chronicle* (2, Finsbury Square, E.C.; Editor, A. T. Meyers).

Jex-Blake, Rev. Thomas W., D.D., Dean of Wells, was b. in 1832, and was ed. at Rugby and Univ. Coll., Oxford, where he graduated M.A. ('57), and received B.D. and D.D. in '73. After acting as composition master to the sixth form at Marlboro' Coll., he was elected Fellow of Queen's Coll., and ordained deacon ('56) and priest ('57). For ten years he was an assistant master at Rugby, and for six years was Principal of Cheltenham Coll. In '74 Dr. Jex-Blake became Head Master of Rugby, and held this position till '86. A year later he was appointed rector of Alvechurch, Redditch, and in Feb. '91 succeeded the late Dr. Plumtre as Dean of Wells. His works include "Life in Faith" and "Long Vacation in Continental Picture Galleries."

Joachim, Joseph, the distinguished violinist, was born near Pressburg, in Hungary, in 1831. Already famous as a youthful prodigy, he went to Leipzig in '43, to the Conservatoire previously founded by Mendelssohn, who saw his genius and encouraged him. He first came to London in '44, and has since annually visited us. Herr J. has been principal violinist of the Monday and Saturday Popular Concerts from their very commencement. In '69 he became the head of the newly developed Academy of Music at Berlin. He has written several works for his instrument and the

orchestra, the chief being the Hungarian Concerto. The University of Cambridge conferred on him the degree of Mus. Doc. in '77, Herr J. in '87 visited Paris, and had an enthusiastic reception. The University of Oxford recently conferred upon him the honorary degree of D.C.L. In celebration of the fiftieth anniversary of his first appearance in public, Herr J. was, on March 17th, '89, presented with a magnificent violin purchased by subscribers to a fund of which the Duke of Edinburgh was President. Visited England in Feb. '91, and made many public appearances during the musical season.

Jockey Club. See TURF.

Joint Stock Companies. A Parliamentary return is annually issued giving the names, objects or business, places where business is or was conducted, date of registration; number of persons who signed the memorandum of association, total number of shares taken up by such subscribers, nominal capital, number of shares into which it is divided, number of shares taken up, amount of calls made on each share, and the total amount of calls received, of all joint stock companies. It denotes whether the companies are limited or unlimited, and also the number of shareholders in each of the said companies at the date of the last return, and whether still in operation or being wound up; of the total number having their registered offices in the city of London, or within five miles of the General Post Office. The total number and the paid-up capital of all registered companies which are believed to be carrying on business at the present time. This return can be obtained from Messrs. Eyre & Spottiswoode, East Harding Street, E.C., and 32, Abingdon Street, Westminster (price 1s. 6d.). The following table shows the progress of the joint stock company movement during the last six years:—

DATE.	TOTAL.	
	No. of Cos.	Paid up Capital.
1884	9,344	£494,909,862
1885	9,471	529,637,684
1886	10,494	591,508,692
1887	11,001	611,430,371
1888	11,968	671,870,184
1889	13,323	775,139,533

The total amount of capital subscribed for new issues during '91 up to the end of September was £74,260,788, compared with £131,707,761 in '90, and £142,554,546 in '89, exclusive of vendors' shares, etc.

Jones, Henry Arthur, the dramatist, was b. Sept. 20th, 1851, at Granborough, Bucks. After attempting a literary career, his dramatic tastes received encouragement from the production of a comedy by him entitled "Only Round the Corner." His next success was the acceptance by Mr. Wilson Barrett of "A Clerical Error" ('79). Minor pieces followed in the shape of "His Wife" and "A Bed of Roses." In Nov. '82 Mr. Wilson Barrett produced "The Silver King," at the Princess's Theatre, and this greatly increased Mr. Jones's reputation. "Breaking a Butterfly" and "Chatterton" ('84), "Saints and Sinners," "Hoodman Blind," "The Lord Harry," "The Noble Vagabond,"

"Hard Hit," and "Heart of Hearts," testify to the energy with which he prosecuted his dramatic labours. "Wealth," at the Haymarket in '88, proved very successful, and was followed by "The Middleman" (Aug. '89). Mr. J.'s next exploit was a play of daring originality, called "Judah" ('90); and "The Dancing Girl," produced at the Haymarket in Jan. '91, received much attention. Mr. J. has often lectured on his art in public. A German version of "The Middleman" was produced in Berlin in March '91. Published "Saints and Sinners" in '91. On Nov. 2nd, his new play, "The Crusaders," was produced at the Avenue Theatre.

Journalists. The Institute of, was established on the 9th of March, 1889, by conversion of the National Association of Journalists, a professional society founded in '84, and incorporated by Royal Charter in March '90. The Charter, by which journalism is formally constituted one of the professions, directs and declares that Hugh Gilzean Reid, Sir Algernon Borthwick, Bart., M.P., Edward Lawson, Sir Edwin Arnold, Justin McCarthy, M.P., J. M. Maclean, M.P., F. W. Clayden, Harry Furniss, E. R. Russell, J. A. Willox, Sir Thomas Sowler (the late), Henry Flint, J. T. Bunce, and other journalists therein named, and such other persons as, at the date of the Charter, were members, or might thereafter become members of the Institute, "shall for ever hereafter be, by virtue of these presents, one body politic and corporate by the name of 'The Institute of Journalists'"; and, after conferring power to hold lands and other property, goes on to recite the objects and purposes for which the Institute is constituted. These are embodied in thirteen clauses, and include the devising of examination or other practical tests for candidates; "the promotion of whatever may tend to the elevation of the status and the improvement of the qualifications of all members of the journalistic profession;" ascertainment, and where necessary amendment, of the law and practice affecting the discharge by journalists of their professional duties; collection of information; and in various other respects, specified and not specified, the promotion by all reasonable means of the interests of journalists and journalism. Care has been exercised in drawing up the constitution of the Institute to guard against the possibility of its operating at any future time in such a way as to exclude from the work of the newspaper press any honest and capable service, from whatsoever source it may come; and the decentralisation of authority which attends the system of organisation by branches (called "Districts" and "Sub-districts") is regarded as an efficient safeguard against that possibility. Although the central office and committee rooms are in London, there is no fixed or localised centre of authority; the council meetings and the annual conference both being movable, and held from time to time in the chief towns throughout the country. At the date of conversion into the Institute there were about 1200 members, since increased to about 2700, organised in 49 districts and sub-districts, and including nearly all the well-known journalists of London and the provinces (including Scotland and Ireland). The Charter, moreover, confers upon the Institute power to affiliate branches in India and the colonies and in foreign countries; and already considerable numbers of Anglo-Indian and colonial journalists have become

members, and have opened correspondence preparatory to considering a basis for colonial organisation, whereby they may participate in the status and advantages conferred by the Charter, while retaining the control of their own local affairs. Similar measures are being taken by English journalists on the continent. The meetings of the Institute which attracted the most public attention have been that at the Mansion House, London, on March 9th, '89 (when the Institute in its present form was founded), and the successive Annual Conference of '89, at the Town Hall, Manchester; of '90 at the Council House, Birmingham, and of '91, at the City Hall, Dublin. At the Dublin Conference, Mr. Edward Lawson was elected President for '91-2, in succession to Sir Algernon Borthwick and Mr. H. Gilzean Reid; the provisional constitution as embodied in the Charter was revised; an Orphan Fund branch was established, and the fund opened by donations of £1,000 from Sir Algernon Borthwick, and £500 from Mr. J. A. Willox of the *Liverpool Courier*; a committee was appointed to prepare a scheme for educational and technical examination tests for admission to professional membership; important questions of professional usage and privilege were debated; the establishment of a professional employment registration system was approved, and other important business transacted. The Lord Mayor of Dublin (Ald. J. Meade, J.P.) gave a banquet to 300 journalists and other guests at the Mansion House; Lord and Lady Wolsley entertained the members at a luncheon and reception; the Irish journalists gave a brilliant reception at the Royal Hibernian Academy, and the hospitalities of the occasion continued over two or three weeks. Next year ('92) conference meetings will be held in Edinburgh and Glasgow, jointly. This year the Vice-Presidents are: Mr. H. Gilzean Reid, Birmingham; Sir Algernon Borthwick, London; Mr. J. A. Scott, Dublin; Mr. H. J. Palmer, Leeds; Mr. E. Byrne, Dublin; Mr. J. A. Willox, Liverpool; Mr. G. F. Gratwicke, Exeter; Mr. E. E. Peacock, London; Mr. J. Wilson, Edinburgh; Mr. S. Grogan, London; Mr. John C. Moor, Sunderland; Mr. J. Vaughan, Leicester. Hon. Treasurer, Mr. F. W. Clayden. Legal Adviser, Mr. J. R. Fisher, B.A. Hon. Secs., Mr. B. T. Barton, and Mr. G. H. Kynaston. Sec. of the Institute, Herbert S. Cornish. Central Office, 78, Fleet St., London, E.C.

Jowett, Rev. Professor B., D.D., was b. at Camberwell 1817. Became Scholar of Balliol College, Oxford ('35). Fellow ('38); appointed Regius Professor of Greek on the recommendation of Lord Palmerston ('55). Was member of a commission for taking into consideration mode of admission by examination to writer-ships in Civil Service of India. Professor Jowett has written commentaries on some of the Pauline Epistles, and an essay on the Interpretation of Scripture in "Essays and Reviews." In '70 he was elected Master of Balliol, and in '86 Vice-Chancellor of the University. He published a translation of the "Dialogues of Plato," '71; second edition (5 vols.) '76; also a "Translation of Thucydides with Notes and Essay," '80 (2 vols.); and a "Translation of Aristotle's Politics, with Notes and Essay," '85 (2 vols.). The honorary degree of D.D. was conferred on him by the University of Leyden ('75), LL.D. Edin. ('84), and Dublin ('86). Hon. LL.D. was conferred on

Dr. J. by Cambridge Univ. June '90. In Oct. '91, his illness excited much sympathy.

Jubilee Institute, Queen Victoria's. Founded by Her Majesty the Queen in 1887 out of the surplus (£72,538 17s. 2d.) of the Women's Jubilee Offering. By a Royal Charter of Incorporation granted in '89, it is enacted that "the purposes to which the annual income of the fund is to be applied are the training, support and maintenance of women to act as nurses to the sick poor in their own homes, and the establishment (if thought proper) of a home or homes for such nurses, and generally the promotion and provision of improved means for nursing the sick poor." It is further enacted that the work of the Institute be carried on at St. Katharine's Royal Hospital, Regent's Park, N.W. Pres. of the Council, Rev. Arthur L. B. Peile; Sec., Col. Gildea, St. Katharine's Royal Hospital, Regent's Park, N.W. (See also NURSES.)

Judges. The following is a list of judges of the Supreme Court of Judicature:—Lord High Chancellor: Lord Halsbury. **Court of Appeal:** The Lord Chancellor, Lord Coleridge (Lord Chief Justice of England), Lord Esher (Master of the Rolls), Sir Charles P. Butt (President of the Probate Division), Sir N. Lindley, Sir C. S. C. Bowen, Sir E. Fry, Sir H. C. Lopes, and Sir E. F. Kay. **Chancery Division:** Lord Chancellor, Sir J. W. Chitty, Sir F. North, Sir J. Stirling, Sir A. Kekewich, and Sir R. Romer. **Queen's Bench Division:** Lord Coleridge, Hon. G. Denman, Sir C. E. Pollock, Sir H. Hawkins, Sir J. C. Mathew, Sir L. W. Cave, Sir J. C. Day, Sir A. L. Smith, Sir A. Wills, Sir W. Grantham, Sir A. Charles, Sir R. V. Williams, Sir J. C. Lawrence, Sir R. S. Wright, and Sir R. H. Collins. **Probate, Divorce and Admiralty Division:** Sir C. P. Butt (President) and Sir F. H. Jeune. **Court of Arches:** Lord Penance. **Consistory Court:** Mr. T. H. Tristram, D.C.L. **Bankruptcy Court:** Sir R. V. Williams. **Railway and Canal Commission:** Mr. Justice Wills, Lord Trayner, Mr. Justice Murphy, Sir F. Peel, and Viscount Cobham.

Judicial Separation. It was in the power of the ecclesiastical courts, which formerly determined all matrimonial causes, to grant a divorce *à mensâ et thoro*, which released the husband and wife from the duty of cohabitation, but did not enable either of them to marry again. By the "Matrimonial Causes Act, 1857," it was provided that such divorces should no more be granted, but that in every case in which a

decree might have been made for a divorce *à mensâ et thoro*, a decree might thenceforward be made for a judicial separation. A decree for judicial separation may be obtained either by the husband or by the wife on the ground of adultery or cruelty, or desertion without cause for two years or upwards. Cruelty in this sense may be defined as injury to person or to health, or conduct raising a reasonable apprehension of bodily hurt. Even threats to a wife, not accompanied by personal violence, and cruelty to children in the presence of their mother, have been in some cases regarded as cruelty giving ground for a decree. Desertion must be wilful, and against the will of the person who complains of it. From the date of a decree for judicial separation, and so long as the separation continues, the wife is considered as a *feme sole* with respect to all property which she may acquire; and should she again cohabit with her husband, all such property is to be held to her separate use. But this provision has been made superfluous by the Married Women's Property Act, 1882 (*q.v.*). The court has power to order such alimony for the wife, and to make such provision for the custody, maintenance, and education of the children of the marriage, as it may think proper. Should the decree have been pronounced in the absence of one of the parties, and on the ground of desertion by him or her, the party so absent may present a petition setting out such absence and reasonable ground for the alleged desertion, and may obtain a reversal of the decree. The separation, moreover, may be ended at any moment by the deliberate consent of the parties separated to a renewal of cohabitation.

Justice of Peace Qualification Bill. See SESSION, sect. 79.

Jute. See TRADE, '91.

Jutland Ship Canal and Harbours. In February '90 the project of a large navigable canal between the North Sea and the Kattegat, following the Limfjord, was revived, the plan comprising the construction of a harbour at each end. It was understood that the capital required (£2,000,000) was available, but a concession from the Danish Government was looked for, the promoters asking for a concession for a hundred years, with 3 per cent. interest guaranteed on a capital not exceeding 35,000,000 kr. for a period of fifteen years, beginning one year after the completion of the canal, which must take place not later than July 1st, 1895.

K

Kaffraria. The country of the Kaffirs, in eastern South Africa. The name, when used now, implies the *Transvaal Territories* (*q.v.*), which lie between Basutoland and the sea, and from the Kei river to Natal. A district southwest of the Kei, formerly called *British Kaffraria*, was annexed to Cape Colony in 1863, and is now divided into the two districts of King William's Town and East London.

Kaiser Wilhelm's Land. The German portion of New Guinea (*q.v.*), together with the islands of New Britain and New Ireland.

Kalnoky, Count Gustav Siegmund, was b. 1832 at Lettowitz, Moravia. After serving for a few years in the army, he entered the diplomatic service ('50), and from '60 to '70 he was Councillor of Legation at the Austrian Embassy in London. In '74 he went as Minister to Copenhagen, whence he was transferred ('80) as ambassador to St. Petersburg. Thence he was recalled in '81 to assume the important office of the joint *Austro-Hungarian Minister of Foreign Affairs*, in succession to Baron Haymerle—a post which Count Kalnoky

has since filled with much ability, pursuing the peace policy which is the foundation of the Central European Alliance.

Kashmir (N.W. India). For Resident see DIPLOMATIC.

Kashmir Railway. An account of the proposed railway into the heart of Kashmir was given in the *Times* of Feb. 12th, '91, when it was stated that the route preferred leaves the North-Western Railway of India a few miles below Rawul Pindi, and proceeds north by Panjar, Kohala and Baramulla to Srinagar. The distance is 210 miles, of which the first 78 are in English territory. The gradients are described as easy, and the tunnelling light, and the cost 2½ to 2¼ millions sterling. In the *Times* of August 6th Sir Lepel Griffin wrote to correct a statement which had been published to the effect that the Indian Government had practically decided to reject his (Panjar) scheme, on the ground that the guarantee of 4½ per cent. demanded was too high. He gave an extract from a letter dated Simla, July 2nd, of the Secretary to the Government to the effect that the surveys of alternative routes were going on. Sir Lepel added that the guarantee asked was 3½ or 3¾ per cent., with a quarter share of eventual profits. He drew attention to the importance of the report that the Russians were about to extend the Trans-Caspian Railway (*q.v.*), to Sarakhs.

Kay, Sir Edward Ebenezer, was b. at Meadowcroft, near Rochdale, 1822, and ed. at Cambridge. Called to the bar at Lincoln's Inn (47). For some years (during which he compiled the well-known "**Kay's Reports**") he was the authorised law reporter in the Court of Vice-Chancellor Wood (afterwards Lord Hatherley). Q.C. ('66). He was also for some time leader in Vice-Chancellor Bacon's Court, but subsequently cultivated a successful practice in the House of Lords. Appointed a judge of the High Court ('81). Succeeded Sir H. Cotton as a **Lord Justice of Appeal** (Nov 11th, '90).

Keewatin. A Canadian district under the jurisdiction of the Government of **Manitoba**. It lies between that province and Ontario, and stretches from United States boundary to Hudson Bay. Area not determined. Part has been assigned to Ontario. It is a difficult region of rock, swamp, and wood, with few tracts available for agriculture or pasturage; but mineral wealth is great, including copper and silver, and game is plentiful. See **MANITOBA AND HUDSON BAY RAILWAY**.

Kekewich, Sir Arthur, was b. in 1832. Called to the bar in '58, Q.C. ('77). Bench of his Inn ('81). He enjoyed a considerable Chancery practice, and for a long time was **standing counsel** to the **Bank of England** and several large insurance companies. He was raised to the Judicial Bench in '86. Mr. Justice Kekewich made several unsuccessful attempts to enter Parliament.

Kendal, Margaret Brunston, popularly known as "**Madge**" Robertson previous to her marriage with Mr. Wm. Hunter (Grimston) Kendal, actor, with whom she has since always appeared on the stage, was b. at Great Grimsby in 1849. The late T. W. Robertson was her brother. She made her first appearance at the Haymarket as Ophelia in '65, and her first triumph as Blanche Dumont in Marston's "**Hero of Romance**" at the same theatre. Mrs. Kendal has played many parts, of which the most successful perhaps have been those of Lilian

in "**New Men and Old Acres**," and Dora in "**Diplomacy**." In '81 Mr. Kendal, jointly with Mr. Harc, took the management of the St. James's Theatre, and Mrs. Kendal joined the company. In '90 Mr. and Mrs. K. returned from a successful American tour, which was repeated later in the year.

Kew Gardens. First formed as Botanic Gardens, 1750-60. Parliamentary Committee to consider the management appointed 1838; Lindley's report presented '40; gardens transferred to Commissioners of Woods and Forests '40. Opened to the public free '41. Palm-house built '48. **Open free** to the public every weekday from noon, and on Sunday afternoons. Distributions of bedding-out plants are made annually in the autumn to applicants.

Kew Observatory. Old Deer Park, Richmond, Surrey, was built by George III., in preparation for the famous transit of Venus in 1769, to serve as a substitute for an older and smaller one connected with Kew Palace, associated historically with the discovery of aberration and mutation, which had fallen into disrepair. About seventy years after its foundation, the Government determined to discontinue its maintenance, because the Royal Observatory at Greenwich fulfilled more completely the main objects to which the King's Observatory was then applied. The building was eventually handed over to the British Association for the Advancement of Science, in 1842, under the title of the Kew Observatory. The connection between the British Association and the Kew Observatory lasted for thirty years, until '71. Mr. J. P. Gassiot, who was then the chairman of the Kew committee, made the munificent offer to **endow** it with a sum of £10,000 if the Royal Society would nominate a Kew committee who should have entire control over the management of the observatory and over the income from the trust fund, and would cause magnetic and meteorological observations to be continued in perpetuity,—which offer was accepted. When the use of the Kew Observatory was granted by Her Majesty rent free to the Royal Society, it possessed a valuable collection of standard instruments and verifying apparatus, most of which had been purchased by grants made either by the Royal Society, or the British Association. In addition to its observational work in magnetism, electricity and meteorology, the observatory has attained a very high and growing reputation at home and abroad for the trustworthiness of its **verifications** and for its many and varied services to experimenters. It is the central station of the Meteorological Office for their system of self-recording observations, as a place where new instruments intended for other observatories can be tested beforehand, as a school where intending observers can be practically trained, and lastly as an experimental laboratory where the efficiency of new designs of meteorological instruments might be thoroughly tried. A largely increased and increasing number of thermometers, barometers, magnetic apparatus, sextants, watches, chronometers, telescopes, and a great variety of other instruments, are continuously in progress of verification, suitable fees being charged to the public and the various Government offices to defray the cost of the examination.

K.G. See **GARTER, ORDER OF THE**.

Khojak Tunnel. Intelligence was received in London on April 18th, '90, that the two

headings of this tunnel between Shilabagh and Chaman, on the railway from Quetta to Candahar, had met. The tunnel is about 2½ miles in length, and Mr. G. P. Rose, A.M.I.C.E., is the executive engineer. The Khojak Pass is 7500 ft. above the sea, and about 2000 ft. higher than the level of the surrounding country; the tunnel, which pierces the range at right angles, passes from east to west, and enters about 1000 ft. below the crest of the pass. The length of the tunnel is 12,600 ft., and there is space for two lines of rails, ascending for the first half at a grade of 1 in 1000, and descending at 1 in 40. Two main shafts, of 318 ft. and 219 ft. respectively, were sunk to aid the work of construction, and the water difficulties were formidable. In the House of Commons (Aug. 4th, '81), in a debate on the India Revenue accounts, Mr. Maclean, who was supported by Sir R. Lethbridge, moved a resolution in favour of the extension of the Indian railway system to Candahar, the latter describing the Khojak line as terminating "in a hole in the wall." Sir J. Gorst, then Under-Secretary for India, said it would be most unwise for the House to express an opinion on the subject, in view of our relations with the Ameer of Afghanistan, and the motion was negatived without a division. The Calcutta *Englishman* says the first sod of the Killa Abdulla extension was turned in Dec. '87, and the work undertaken has no equal in India. The original idea was to continue the Killa Abdulla line 60 miles from Quetta into the Khojak Pass, piercing the Khwaja Amran range, and finally establishing a temporary terminus on the Chaman plain. It was estimated that the total cost would be about 131 lakhs, but an additional 7 miles having been sanctioned on the Chaman side, 12 lakhs were added, making 143 lakhs.

Khokand. A Mussulman khanate in Central Asia, the power of which was shattered by General Tchernayeff in '64-5. A portion was left independent until '75, when an outbreak caused the Russians to overrun and annex it. This campaign was the hardest the Russians had had in Turkestan in point of national resistance, but the people have since become reconciled to their rule. Khokand now forms the Turkestan province of *Ferghana*, an ancient name restored in '76. The city of Khokand (pop. 35,000) ranks next in commercial importance and size to Tashkend and Bokhara.

Khorassan ("The country of the Sun"). One of the richest provinces of Persia, forming the north-east portion of that kingdom. It consists of 140,000 square miles, comprising nearly a quarter of Persia: population 800,000. The country is wonderfully fertile, except where the great desert of Persia encroaches upon it, and its prosperity may be expected to increase now that the Turcoman raids all the way along the north are suspended.

Kimberley. A fertile district lying between King Sound and Cambridge Gulf in the tropical portion of the colony of **Western Australia**. Has been recently explored and opened up for settlement. There are immense tracts of splendid pasturage. The chief port is Derby. In 1883 gold was discovered, a gold-field "proclaimed," and a great rush from all parts took place. Enormous finds were at first reported, but general disappointment was experienced, privations incurred, and the field practically abandoned. See **WESTERN AUSTRALIA**.

Kimberley. The capital of the province of Griqualand West, **Cape Colony**, and chief centre of the diamond diggings. Though young, it is a large and important town, well provided with institutions and accessories of civilised life; pop. 25,000.

King-of-Arms. See **GARTER KING-OF-ARMS**.

King's College, London. Established by Royal Charter 14th August, 1829, opened '31; charter annulled by Act of Parliament 19th May, '82, and College re-incorporated for the purpose of "giving instruction in literature, science, and the doctrines and duties of Christianity, as the same are inculcated by the Church of England." The visitor is the Archbishop of Canterbury, and among the *perpetual governors* are the Lord Chancellor, the Home Secretary, the Lord Mayor of London, and the Lord Chief Justice of England. There are nine departments in the College—viz., theology, literature, science, engineering, medicine, ladies', evening classes, civil service, and the school. To students who have acquired a certain degree of proficiency it grants the diploma of "Associate of King's College," to which is attached the privilege of free admission to all the classes in the department from which they have been elected, as also the use of the college libraries and museums. The associates of the *theological department* wear a distinctive hood—viz., black, poplin, edged on the outside with a quarter of an inch, and on the inside with one inch, of mauve silk. In addition to *King's College School* four other schools are in union with the College, and the pupils of these schools may become associates in two instead of in three years. The *ladies' department* is conducted in Kensington Square; certificates of proficiency are granted in passing the examinations, after a regular attendance of three or more terms. The students of the *evening classes*, which meet from October to March, and from April to June, receive certificates, and may become associates. The *civil service department* prepares for the excise, customs, Post Office, the navy, and other examinations; women also prepared. The whole college is under the supervision of the *Principal*, Rev. Dr. Henry Wace (*q.v.*). Last session there were 61 matriculated students in theology, 50 in general literature, 105 in engineering, 220 in medicine, and 29 in the evening classes. Including students not matriculated, the total number attending the College last session was 3,224, besides 274 boys in the school. In July '91 a Committee of the Privy Council agreed to recommend the incorporation of King's College with University College, and the medical schools of the metropolis into a Teaching University, to be called the "Albert University," "in and for London." The draft Charter approved by the Committee must lie on the table of both Houses of Parliament for thirty days next Session before being submitted for the Queen's sanction.

King's Cross Tunnel. A new method of tunnelling was adopted in the construction of this subway for the Great Northern Railway during '81, which is called the Jennings and Stannard system. The idea is to prevent the subsidence of the soil over the permanent brickwork structure, caused by the space created in the removal of the ground. The new method consists of the use of a series of flat steel bars called "needles," with which a temporary lining is made; these are pushed forward, after the brickwork is made within

them, by screwjacks, into the face of the work in front. Considerable economy is claimed, while gas and other mains are not interfered with. In the King's Cross case the work was carried on within 6 ft. of the surface without opening the road.

Kioto (Japan) Canal. Some particulars were to hand at the beginning of '91 as to the construction of this canal, which affords a striking instance of the development of western ideas in this country. The canal, which is seven miles long, between Lake Biwa and the Bay of Osaka, carries the waters of the Biwa, which is 500 miles square, and at an altitude of 275 ft., to the town of Kioto. It is also used for navigation, supplies motive power for factories, and irrigates the rice fields. The canal is carried through the mountain chain of Nogarō-Yama by a tunnel $\frac{1}{2}$ miles long, cut and "faced" in European style by a French engineer, while there are two shorter tunnels nearer Kioto. Before reaching the town the canal is divided in two, one branch joining an old navigable sea canal, and the other being utilised as motive power for the engines in the Kioto factories.

Kipling, Rudyard, was b. in Bombay '65, and from his residence in India has been enabled to depict *Anglo-Indian* life—especially the military side of it—with striking fidelity. The publication of "Soldiers Three" and "*Plain Tales from the Hills*" attracted a good deal of attention, and resulted in Mr. K. being much sought after by editors of magazines. Some poetry by Mr. K. has appeared in the *English Illustrated Magazine*. His books entitled "The Light that failed," and "Life's Handicap," appeared in '91. He is now engaged, with Mr. Balestier, in writing "*The Naulahka*."

Knights. In modern days knighthoods are conferred as a mark of the Sovereign's esteem, or as a reward for services of any kind, military or civil. They are bestowed by the Sovereign, or occasionally by the Lord Lieutenant of Ireland as directly representing her. The Royal Orders of Knighthood are: the Garter, the Thistle, St. Patrick, the Bath, St. Michael and St. George, Star of India, and the Indian Empire (see respective headings). Knights not belonging to any of these orders are termed knights bachelors. This last-mentioned dignity is that which is conferred upon the judges of the High Court, the Attorney-General and Solicitor-General, upon civic dignitaries, and upon persons who have attained distinction in various walks of life. The Sovereign bestows the dignity either by a tap with a sword upon the shoulder of the kneeling person honoured, who is then commanded to rise "Sir" A—B—, or by letters patent. All knights are entitled to the prefix of "Sir," and their wives to that of "Dame or Lady." (See ADDRESS, FORMS OF and KNIGHTHOODS CONFERRED DURING '91.)

Knighthoods conferred, and Promotions made in the different Orders, Nov. '90—Nov. 16th, '91. The office or rank given after several of the names was that held at the time the dignity was conferred, and some changes in that respect may have taken place since.

Romer, Mr. R., Q.C., one of the Judges of the High Court of Justice, Queen's Bench division.
Solomons, Julian Emanuel, Esq., Member of the Legislative Council of New South Wales.
Waring, Henry John, Esq., late Mayor of Plymouth.
Windeyer, William Charles, Esq., Puisne Judge of the Supreme Court of New South Wales.
Wragg, Walter Thomas, Esq., Puisne Judge of the Supreme Court of Natal.
Wright, Robert Samuel, one of the Justices of the High Court of Justice.
Knowles, James, F.R.I.B.A., was b. 1831. Educated at Univ. Coll., Lond. From early years he pursued literature, and contributed articles to various magazines; and in '60 he published the "Story of King Arthur." Succeeded Dean Alford ('70) as editor of the *Contemporary Review* (q.v.), and on the establishment of the *Nineteenth Century* (q.v.) became its editor ('77). In addition to his literary work, Mr. Knowles has acquired reputation as an architect: Aldworth, the Surrey residence of Lord Tennyson, Kensington House, the Thatched House Club, and several churches having been erected from his designs.
Knox-Little, Rev. William John, was b. at Stewartstown, co. Tyrone. Educated at Trin. Coll., Camb., where he graduated in '62. Subsequently became Assistant Master in the Grammar Schools of Lancaster and Sherborne; curate of Christ Church, Lancaster, of Turweston, Bucks, and St. Thomas', Regent Street; rector of St. Alban's, Chesham, '75; Canon of Worcester '81. He is a High Churchman, and has published, in addition to a number of sermons, "Characteristics of the Christian Life," "Meditations on the Three Hours' Agony of our Blessed Redeemer," and "Motives of the Christian Life." Canon Knox-Little has also published several novels, including "The Child of Stafferton," which has met with success. Delivered stirring Lenten addresses at St. Paul's Cathedral '91, and published during the year a book entitled "The Christian Home."
Kossuth, Lajos, or Louis, the veteran Hungarian patriot, was b. near Pesth, 1805. In '32 he was elected to the National Diet of Pressburg. For publishing reports of the proceedings of that body he was, in '37, after a warning from the Government, prosecuted and sentenced to four years' imprisonment. In '40 founded the *Pesti Hírlap*, which became the organ of the Radical opposition. In '47 he was again elected to the National Diet, and forthwith became leader of the opposition. In March '48 he demanded the re-establishment of an independent government for Hungary with a ministry responsible to the country. Returned to Pressburg as Minister of Finance for Hungary in the cabinet of Count Batthyány. President of the provisional government ('49). In April '49, in the Diet at Debreczin, he declared Hungary an independent state. Elected Governor of Hungary, he entered Pesth, but was compelled to retreat on the entry of the Russian troops. Kossuth, accompanied by a large number of refugees, entered Turkish territory on August 17th, and in the February following ('50) was, with his companions, interned at Kutahia, in Asia Minor. Liberated in September '51, Kossuth came to England, where, save for a visit to the United States, he lived for many years. He subsequently made several attempts to incite the Italians

and Hungarians against Austria. For the last quarter of a century he has resided at Turin, where he has devoted himself to scientific studies.

Krapotkin, Prince Peter Alexievitch, Russian socialist leader, was b. at Moscow 1842. Formerly aide-de-camp to the Military Governor of Transcaucasia (63-7), during which he made many journeys in Siberia and Manchuria. Studied at the St. Petersburg University ('68-72), and joined the most advanced Anarchist section of the **International Working Men's Association** in Belgium in '72. Returning to Russia, he took part in the **Tchaykovsky conspiracy**; was arrested '74, and after two years' imprisonment escaped to England. In '79 founded the Anarchist paper *Le Révolte*, at Geneva, whence he was expelled '81. Commenced then a **crusade against Russian Government** in the English and French press. In '82, while on a visit to London, was condemned by the Police Correctionnelle at Lyons to five years' imprisonment for participating in the **International Working Men's Association**. Released '86, and returned to England. Is a frequent writer and lecturer on **Socialistic** questions. He is at present in the United States.

Kurdistan. A country of 50,000 sq. m. in Asiatic Turkey, situated on the Persian frontier.

Kyrie Society, The, owes its origin to a letter written by Miss Miranda Hill, calling attention to the dull, commonplace lives of the poor, and suggesting means to enliven and beautify their lives. In 1877 the Society was started, and its work has increased steadily up to the present time. The work is apportioned between four branches, each of which is regulated by a sub-committee, the superintendence of the whole being taken by the executive committee. **Objects of the K. S.** :—1. **Decorative Branch**.—To decorate by mural paintings, pictures, stencil

works, mottoes, and other means, workmen's clubs, hospital wards, parish rooms, or any room used for social gatherings, without distinction of creed. 2. **Open Spaces Branch**.—To secure and assist in securing any open spaces in or near the Metropolis, and to prevent spaces being illegally built upon. To co-operate with local societies for the preservation of commons, footpaths, village greens, and roadside strips. To render available as public gardens, disused burial grounds and other waste spaces, and to provide seats, plants, etc., for them. To distribute cut flowers, plants, ferns, and bulbs to hospitals, workhouses, and other institutions, and amongst the homes of the poor. 3. **Musical Branch**.—To organise a voluntary choir of singers to perform oratorios for the poor. These are frequently given in churches, chapels, and halls, situated in poor neighbourhoods and districts of London (where good music could hardly otherwise be heard). To give miscellaneous concerts in halls, school-rooms, and other places, with a view to provide recreation and amusement in poor districts; and in connection with this branch of the society the Countess of Meath provides entertainments in workhouses and hospitals during the winter months. 4. **Literature Distribution Branch**. To distribute as loans or gifts to hospitals, infirmaries, workhouses, clubs, and libraries for the benefit of the poor, books, magazines, and periodicals. **Hon. gen. secs.**, T. Slingsby Tanner and Miss Lilian James. **Office**, 40, Manchester Street, W.—**Kyrie Society, Liverpool**, was founded in 1877 (originally in connection with London). Has seven departments of work: Musical, Dramatic, Decorative, Literature, Open Spaces, Children's Toy, and Children's Happy Evening Branch, the latter having been recently added. **Hon. Sec.**, Mr. F. Greer. **Treas.**, Mr. F. C. Leslie, 5, Union Court, Liverpool.

L

Labouchere, Henry, M.P., was b. 1837. Educated at Eton. Entered the Diplomatic Service ('54) through the influence of his uncle the late Lord Taunton, and was successively **attaché** at Washington, Munich, Stockholm, Frankfurt, St. Petersburg, Dresden, and Constantinople, where he became **Second Secretary** in '63. He retired in the following year. Married Miss Henrietta Hodgson, a well-known actress. Edits and owns *Truth*, and is part proprietor of the *Daily News*. Sat as a Radical for Windsor ('65-6), Middlesex ('67-8), and for Northampton since '80. Mr. Labouchere is noted for his vivacious speeches and quick lively repartee—gifts which render him popular in the House of Commons. He is an advanced Radical, and one of Mr. Gladstone's most energetic supporters.

Labour. There have been several strikes of considerable magnitude during '91, details of which are given below, as are also a few particulars of the more important minor strikes :—**Dec.** '90. The potters employed at the works of Sir Henry Doulton struck work (3rd) because he refused to take three boys from the wheel, the men considering that their chances

of continuous employment were endangered by the number of apprentices taken on. The remainder of the skilled artisans struck (4th). The Northumberland Miners' Association declined to send delegates to the Paris Conference in March, when the enforcement of an eight hours' day was to be considered. These men worked only seven hours. The dock labourers at Garston went on strike against working on a supposed boycotted ship. The ship was not boycotted, but the dock company refused to take any of the strikers back. Fifteen hundred men at the Silksworth Collieries went on strike on the question of the deputies being members of the Union. A strike occurred at the Manningham Mills of Messrs. S. C. Lister & Co. against a reduction of the wages of the velvet and plush hands (17th). '91. A strike occurred amongst the tinplate workers in the Dyffryn, Morriston and Swansea districts (**Jan.**) against the use of a flux, the fumes of which they were contended were poisonous. An arbitrator tin appointed, who reported that unless the were heated much above melting point the flux would give no injurious fumes. The men of the City of Cork Steam Packet Company struck against the employment of non-Union

men; the company supplied the place of the men on strike, and (27th) the latter gave way, but the company determined to stick to the men who helped them. Strikes for shorter hours occurred amongst the Cardiff and Swansea tram men. The men at the Silkworth Collieries being no longer *employees* of the owners were evicted from their dwellings.—Feb. A number of the *employees* at Singer's sewing machine manufactory, Glasgow, struck because a society man was dismissed (24th).—The cotton spinners in the Huddersfield district struck on the wages question.—March. The strike at Sir Henry Doulton's was terminated (1st) by the surrender of the men. The strike at the Silkworth Collieries was terminated (20th) by the men accepting the masters' terms that the deputies should neither be prevented from nor coerced into joining the Union. The Huddersfield strike terminated (30th), it being agreed that the wages of the spinners and twiners should rise and fall together.—April. The whole of the men employed by the Shrewsbury and Talbot Cab Company struck (2nd) for a reduction on the hire of the cabs. The spoolers at the Manningham Mills determined (3rd) to return to work; they, however, later on declined to return (6th). Serious riots took place in connection with the strike at Bradford, the military being called out (15th). More hands returned to work at the Manningham Mills (20th), and the strike ended (23rd), the whole of the hands determining to return to work.—May. A large number of bakers at Hickenhead struck for an increase of wages and the abolition of Sunday baking (1st). A thousand coachbuilders in Birmingham struck for a reduction of hours from sixty to fifty-four per week (6th). About three hundred women and girls employed by Messrs. Leonards & Co., penmakers, Birmingham, also struck for less work. The first annual report of the Dockers' Union was issued (6th). From the balance-sheet it appeared that the total income of the Union from all sources had been £24,425 4s. 6d., which included the amount from property invested. The amount contributed to the central fund, after branch expenses were paid, appeared to be £19,654 13s. 6d., and the expenditure had been £24,385 2s. 6d., leaving a balance of expenditure over income of £4,695 8s. 6d., which had been met out of the capital invested, which appeared to be £6,285 3s. 5d. The total amount expended on strike pay during the year was £14,549 8s. 1d. The working expenses, exclusive of strike pay, had been 38 per cent. From the relief fund £1,334 7s. 8d. had been expended. During the year £1,000 was given to the Australian strike fund, and £67 to other unions. The gains secured by the Union for the men were summarised as follows: Number of men secured gain by strike, 34,236; number of men secured gains without strike, 2,190. Total loss of wages during strikes, £104,918 1s. 7d. Average loss per man, £3 1s. 3d. Total weekly gains secured by strike, £8,704 0s. 9d. Average weekly gains secured by strike, 5s. 1d. Total weekly gains obtained without strike, £5,284 13s. 1d. Average weekly gains without strike, 4s. 11d.—The workmen of the Dundee, Perth and London Shipping Co., at Dundee, struck against the principle of freedom on the part of the masters to employ free labour. A large number of London carpenters and joiners struck, and at a meeting of masters (11th) it was resolved: "That this meeting, representing

the largest employers in the building trade of London, being of opinion that the demands made by the carpenters and joiners are unreasonable, authorise the committee of the Central Association of Master Builders of London to give notice to the United Trade Committee of Carpenters and Joiners that unless the firms struck against are enabled to obtain sufficient men to meet their requirements by May 23rd, '91, the only course open will be to close all shops and works against carpenters and joiners; and this meeting pledges itself to do so."—The bricksetters in Ashton-under-Lyne, Stalybridge, Oldham, Hyde and district struck for an increase of wages; the masters granted an increase of a halfpenny an hour, and the strike terminated (17th). The labourers also struck for a similar advance. The committee of the Amalgamated London Tailors issued the following circular: "To the master tailors of London.—I am instructed by the central board to communicate to you the decision of the journeymen tailors to do no more work for your firm unless you notify your willingness to treat with our representatives on the three points already placed before you—*e.g.*, first, that all employers should provide good, healthy workshops for their *employees*; secondly, that a uniform time 'log' be agreed to; thirdly, that the system of working in partnership be abolished. Trusting you will see your way to come to an early understanding and settlement, we are, yours respectfully, D. CLARK and E. MADDON, Secretaries, May 20th." The whole of the men employed in the City and West End were withdrawn from those firms who declined to accede to the request in the circular (21st); over 6,000 came out. The Central Association of the Master Builders issued the following circular: "11, Bedford Street, Strand, May 21st, '91. Sir, *Re* carpenters' and joiners' strike, I am desired by the committee to say that, as the firms struck against have not been able to meet their requirements, it will be necessary to carry out the resolution come to at the meeting on May 11th last, and close all shops and jobs to carpenters and joiners on Saturday, the 23rd inst. Kindly let me hear how many men in your employ this notice has affected. The committee also desire me most earnestly to impress upon you the extreme importance of united action in this matter. I am, sir, yours truly, E. S. HENSHAW, Secretary." The master tailors held a meeting (25th), at which resolutions were passed to the effect—(1) that an alliance of London master tailors should be at once formed for mutual protection; (2) admitting that the request of the men that all workshops should be healthy was just and reasonable; (3) that no objection should be made to the men who desired it working single-handed, provided that this should not be insisted upon where accumulation of work or other cause made it impossible; (4) expressing the readiness of those present to meet a committee of the London men, through their representatives, to discuss the practicability of a uniform "time log" for London; (5) appointing a committee (with power to add to their number) to confer with the representatives of the men, in accordance with the previous resolution; and (6) empowering the committee so appointed to settle terms with the men on equitable principles, with full power to act in such a way as they might deem advisable in the interest of the trade. A ballot of the striking tailors was taken

(28th), when 2,916 voted for immediately returning to work, and 2,107 against; and the strike practically terminated (30th). Two thousand foreign tailors in the East End struck to secure—(1) that healthy workshops should be provided; (2) that all employed be paid direct by the firms, without the intervention of the middleman; (3) that women should be paid at the same rate as men for the same class of work; (4) that the manufacturers should recognise the Union, and pay the trade union rate of wages. Seven hundred engineers at Messrs. Palmer's Jarrow shipyard struck because 50 plumbers were doing work which the strikers claimed belonged to them. A conference was held between the masters and a deputation from the Amalgamated Society of Engineers (15th). The bakers in the metropolis struck (21st) for higher wages and shorter hours. Over 3000 members of the Amalgamated Society of Fustian Cutters in Cheshire struck for an advance of 10 per cent. in prices. Several thousand boot and shoe makers in Leicester struck for the provision of workshops for all those employed in the trade (20th). A lock-out took place in the South Wales tinplate trade.—July. Five thousand ironworkers on the Clyde struck (2nd) against a reduction in wages of 10 per cent. The great strike amongst the bricklayers, carpenters and joiners at Norwich came to an end (12th), the men accepting the code of rules offered by the masters, and getting an increase in wages of a halfpenny an hour. A strike amongst the Southport tailors occurred, and later on extended to Liverpool, the men resisting arbitration.—August. The strike at Messrs. Kynoch & Co.'s ammunition works at Witton terminated (7th). The carpenters and joiners at the Southampton Naval Works, Woolston, struck work (11th) owing to a dispute amongst themselves as to where the work of one body ended and that of the other began. The strikes at the Clitheroe and Harwich cotton mills, which lasted 25 weeks, terminated (12th), the employers agreeing to pay Blackburn list of prices. The strike at Woolston was settled (13th). The strike amongst the Clyde riveters and caulkers terminated (20th), the men accepting a 5 per cent. reduction till the end of the year.—**Aberdeen Dock Strike.** The crew of the steamer *Ben Wyvis* struck against signing the Federation ticket (Feb. 23rd), and the strike extended, riots occurring (26th). The dock labourers determined to strike (28th) and block all vessels entering the harbour. Further riots occurred (March 5th), and the cabs conveying the Federation men were attacked and the windows smashed. The strike collapsed (12th). The secretary of the local union sent a letter to say that the men would accept the Federation ticket if the shore labourers were reinstated. The Federation, however, declined to displace the freemen, and said that those who went out must take their chance.—**Cardiff Strike.** The *Glen Gilder* shipped a federation crew (Feb. 3rd), and the men who were loading her coal immediately stopped work. Two other steamers were also blocked on the same ground. The whole of the tippers and crane men in the employ of the Bute Docks Company struck (5th), but the owners expressed their determination to use their judgment as to whom they should employ, and not be dictated to by the Union, and issued the following notice: "Bute Docks Company.—Notice.—Certain coal

tippers and others in the employ of the Bute Docks Company having ceased work without assigning any reason or giving any notice, the company hereby give notice to their workmen that they require all persons in their employ to give due notice before terminating their engagements, and that any workmen leaving without the notice which he ought to give may be proceeded against for damages; and, further, as indicated by notice, dated Aug. 1st, '90, all labour at the Bute Docks must be regarded as absolutely free, and that no preference will be given either to Unionists or non-Unionists, and particularly, that the company cannot, directly or indirectly, recognise any attempt to put pressure upon other employers or workmen as to the terms upon which they are to carry on their business. W. THOMAS LEWIS, General Manager. Feb. 6th, '91." Great efforts were made by the Dock Company, and fresh hands were secured who were housed in the docks, and protected by a large body of police, and half the company's tips were at work (9th). A number of leading trade unionists met at Cardiff (10th) and denounced the action of the "new unionists," also issuing the following notice:—"Fellow trade unionists.—The action of the coal-tippers at the Bute Docks in ceasing labour without any reasonable cause has put back the progress of trade unionism for twenty years. The cause of British labour is too sacred to be left in the hands of speculators and foreigners. Mr. John Havelock Wilson, General Secretary of the Sailors' and Firemen's Union, who is one of the prime movers and chief instigators of the present regrettable strike at the Bute Docks, pleads and defends his Union on the score that it is mainly composed of foreign seamen. Mr. Wilson, in a recent speech at Deptford, said that 'he was glad to be able to state that their Union now included eighteen thousand foreign sailors.' Fellow trade unionists, what does this remarkable statement mean? It means that eighteen thousand British seamen have been robbed of their work and wages by Mr. Wilson's 'National' Sailors' Union. How long can this condition of affairs last? Is the British sailor to be blotted out so as to benefit foreign labour? No; a thousand times, no. The strike at the Bute Docks benefits only foreign ports and foreign industry, and is crippling the cause of home trade. Whilst men are 'playing' at Cardiff the rival foreign ports of Antwerp, Hamburg, Havre, and others are progressing by leaps and bounds. Remember this fact, because it is of the highest importance to our future welfare as working men. If the trade of the country is to be destroyed by unnecessary strikes, the cause of labour is lost and the sufferers are ourselves. The present strike at the Bute Docks is not in the interests of British labour. It is ruinous to British industry, and it is engineered solely in the interest of personal vanity and foreign trade. Whilst, as trade unionists, we claim a legal right to combine and form our labour unions, yet, in honour and justice, we must concede the same right of liberty of action to our fellow-men not to combine if they think fit. Coercion never was any good. It failed in Ireland; it failed in Scotland; and it must naturally fail in Wales. The coal-tippers have lost their employment I would seriously urge to reconsider their position, because no question of principle is involved so far as regards the maintenance of

trade unionism. Remember that the victories of labour in the past have been won by justice, and moderation, and a good cause. To the Tipplers,—I would advise you to resume labour at the docks in the interest of yourselves, your wives, and your families, the trade of the country, and the progression of the port of Cardiff.—THOMAS M. RELLY, General Secretary, London United Workmen's Committee.

Later the offices of the Docks Company were besieged by men seeking work. The committee sent out a circular (12th) inviting all unionist branches in the district to strike in support of them. The *Glen Gelder* sailed (13th), having been loaded by the free hands. The Trades Council determined to support the men, and the North Shields branch of the Sailors and Firemen's Union voted £100 to help. The situation became more serious (13th), in consequence of the disturbances at other docks, and the Federation issued on that date a long manifesto, in the course of which it said: "During this protracted struggle the inconvenience to the public and shipowners has been very great, and the loss of wages to ship-workers in the port of London has been considerable, many thousands of tons of coal, which would otherwise have been supplied in London, having been taken at foreign and other ports, and other work has been restricted. The Shipping Federation has abundant information that the coercion, intimidation and violence practised under the new trades union propaganda are most distasteful to a large portion even of the men enrolled in the Unions, and that vast numbers of Union and non-Union workmen would gladly be in accord with their employers, and be free to carry on their avocations undisturbed by the turmoil and exactions which now oppress them. This condition of unrest is not confined to London. Every week new troubles are developed at one or other of the ports in the kingdom. At present the trade of Cardiff is paralysed by the struggle resulting from the dictation of the unions. At Hull, according to a manifesto published in *The Times* of the 6th inst., members of the combined labour unions have pledged themselves not to work upon or handle goods in any vessel partly or wholly manned by non-unionists. By these proceedings it has become almost impossible for shipowners to carry on the work of their ships in port, whilst at sea the position is intolerable. Seamen and firemen no longer own allegiance to their employers, but to the officials of their Union, the result of which is a degree of insubordination seriously menacing the security of life and property at sea. The members of the Shipping Federation feel that the time has now arrived when in the interests of British shipping (in some respects the most important industry of the nation), also in the interests of the great body of workers connected with this industry, more decided measures should be taken, and with this object the following resolutions have been adopted:—

(a) That on and after Monday, Feb. 23rd, no member of the Federation shall employ on board his vessels any seaman or fireman who is not willing to pledge himself to adhere to the following regulation—viz., That every seaman, by signing, pledges himself to carry out his agreement in accordance with the Merchant Shipping Act, and to proceed to sea in any vessel in which he signs articles, notwithstanding that other members of the crew may or may not be members of any seamen's union. (b) That the

Shipping Federation are determined, at all costs, to maintain the right of their individual members, in accordance with the Merchant Shipping Acts, to sign their crews at the shipping offices, or on board ship, as may be most convenient to them.' In adopting the above resolutions, the members of the Shipping Federation desire it to be distinctly understood that they do not wish to interfere with any union of men so long as the legal rights of others are respected. Further, this Federation is not seeking to effect any reduction of wages, and it earnestly invites all industrious and well-disposed shipworkers to co-operate with their employers in putting an end to a state of things alike injurious to themselves, their wives and families, and the trade of the country." Mr. Mann waited on Sir Wm. Lewis (16th), but negotiations were declined, the latter saying that if he dismissed the men who had come and helped them, he would deserve dismissal himself. The Federation subsequently fitted up a vessel to be moored off Penarth as a depot for the Federation seamen brought to Cardiff, so that they might be free from molestation. The company issued a notice (28th) to the effect that the places of the strikers had been filled up, and that the whole of the operations at the docks were carried on night and day, as before the strike. The strike collapsed, the men accepting the Federation ticket, which binds them to sail in the ship signed for, whoever may sail with them (March 12th). The collapse was partly due to the fact that a revolt had occurred amongst the men, who were not supported by the other trades as they expected to have been, and the men deserted the Union in considerable numbers to take Federation tickets. The district superintendent of the Seamen and Firemen's Union at Cardiff received notice from the general secretary (15th) that the block was to be raised.—**Engineers' Strike.** The question of overtime was the cause of the strike amongst the engineers which broke out in the Tyne and Wear districts (Nov. 2nd). As there were members of the society who could not find work, it was thought by the other members desirable to do away with overtime so that these members might be employed. Delegates approached the employers on the subject. The employers then formulated a proposed agreement whereby no man put upon new work should be called upon to work more than ten hours per week beyond the full week's work of 63 hours, overtime rates to be as at present, and old work, shop repairs, and breakdown as by previous custom, and exempt from the proposed restrictions. A vote was taken amongst the men on the question, and the employers' terms were rejected. In the middle of October, whilst the negotiations were going on, the men employed at the North Eastern Engineering Works came out on strike on the ground that during the negotiations the apprentices at those works had been improperly asked to work overtime. On this the employers of the two districts resolved to give notice for the discharge of 25 per cent. of their men weekly, beginning from the 24th Oct. A conference of the men on the 24th resolved that the 75 per cent. of the men give a week's notice, and that was acted upon, to the number of 35,000. A number of apprentices met on the 31st, and passed the following resolutions:—
"Resolved, that the apprentices decline to work overtime on any pretext or consideration

on old work, new work, or ship repairs, and, in the event of any apprentice being suspended or dismissed for adhering to the text of this resolution, that all apprentices in the employment of the firm cease work until the question at issue is settled and the offending apprentices allowed to resume work. Resolved also, that should any apprentice object to fall in with the terms of the resolution passed by his fellows, and agree to work overtime, all the apprentices in the shop in which he is employed leave work until he comply with the requirements set forth in the resolution, which are in agreement with the views of the men, who did not themselves want to be compelled to work overtime, or to have the apprentices competing with them. The result was that the whole of the engineers in the Tyne and Wear districts came out (Nov. 2nd.) The engineers were rather in a fix as the secretary of their society was dead, and another could not be appointed for nine months. However, Mr. Knight, secretary of the Iron Shipbuilders and Boilermakers' Society, stepped into the breach, and at once started negotiations. He endeavoured to bring about a meeting between the employers and representatives of the men, but made it a condition precedent to that, that the men should return to work. Mr. Knight's negotiations, however, fell to the ground, and immediately Mr. Glennie, the leader of the strike, proposed a conference between employers and men. A number of the men who remained faithful at the Elswick Works were roughly pelted by a crowd of apprentices and boys (3rd). A conference between employers and men took place, with the result that Capt. Noble, on behalf of the former, and Mr. Glennie, on behalf of the latter, signed a document containing proposals to be further considered by both sides; the tendency of the proposals was to discourage overtime. The employers made a series of proposals to the men, and agreed to discourage overtime as much as possible. Their proposals were submitted to the men, the principal being—(1) Employers undertake to discourage systematic overtime as much as possible. (2) Overtime to be paid for at the same rate as at present, subject to the following restrictions: New work. No man to be required to work more than 65 hours in any week, nor more than 230 hours in any four weeks, calculated from total time to total time. (This means calculated from pay day to pay day.) "When men are working alternately night and day shift they shall, when required, continue working till relieved by men from the incoming shift: this, however, not to become a practice. They shall not be required to work any other overtime. Commercial repairs. No man to be required to work more than 65 hours per week, but systematic overtime to be avoided. Break-downs in plant or usual shop repairs according to previous custom, and therefore exempt from above restriction; but overtime under this head to be discouraged as much as possible." The voting resulted in 3,511 for the proposals and 2,920 against. The consequence of the ballot was that the men returned to work (5th).—**London Dock strike.** At a delegate meeting of the Sailors and Firemen's, Coalies', Dockers' and other Unions (Feb. 12th), it was decided to call out the Union men from all places where Federation men were employed, and the non-Freemen's Society issued the following notice:

—"Notice to All—It has been finally decided that the Shaw, Saville, New Zealand, British India, Lund's lines, and all others which employ 'free labour,' will be on block; and it is requested that all our men will refuse to put craft alongside of any vessels belonging to the above-named firms, either for delivery or for receipt of goods. By order of the executive, E. S. CUNNINGHAM, Gen. Sec." This notice was acted on, and (16th) it was resolved not to handle cargoes which had been originally consigned to a Federation vessel and then transferred to a Union one. The Federation made some alterations in the set of rules printed at the back of its ticket. They now provide that tickets shall be issued to every "competent" sea-going person. From Rule 3, "registration tickets shall only be issued at the seaman's registration offices, etc.," the word "only" was now omitted; and in Rule 4, the words placed in brackets no longer stated: "The fee for registration, including registration ticket and rules, is 1s., and for each renewal 6d. [which also entitles to membership in the Amalgamated British Seamen's Protection Society, if desired]. Members of any [other] seamen's trade union may, however, avail themselves of the advantages of registration for employment without prejudice." It was understood that the men might become members of the society referred to if they wished, but no reference to that fact was now made on the ticket. The most important alteration, however, was that made in Rule 5, which originally stood: "This registration ticket entitles the holder to preference of employment, at the recognised port wages, for any vacancies in any ship, or with any ship master or owner affiliated with the Shipping Federation (Limited)." The words "preference of" were omitted on the new ticket, which simply "entitles the owner to employment." But the crucial rule, No. 6 on the list, still remained as before, and formed the "pledge" which would have to be made on and after Monday (23rd) by every seaman or fireman seeking employment from a member of the Federation. This rule read as follows: "Every seaman, by registering, pledges himself to carry out his agreement in accordance with the Merchant Shipping Acts, and to proceed to sea in any vessel in which he signs articles, notwithstanding that other members of the crew may, or may not, be members of any seamen's union." The lightermen and non-freemen resumed work (23rd). The Dockers' Union (March 3rd) withdrew from the Federation of Trade and Labour Unions, and the block was withdrawn, so far as the dockers were concerned (4th). The Joint Committee of Labour Unions decided that the whole of the shore unions should return to work. On the men going to work, however, the stevedores and coalies refused to work beside Federation men of their own branch, and left the docks. The Hull Amalgamated Seamen's and Firemen's Union, the Leith branch of the Union, and the North Shields, the South Shields, and the Newcastle branches, decided to accept the Federation ticket. The struggle terminated (12th), Mr. J. H. Wilson, the General Secretary of the Union, having sent to the secretaries of all Unions, except Cardiff, that the Federation ticket was to be accepted by members. Early in Sept. the dock labourers at the Carron and Hermitage wharves demanded pay for mealtime, and eventually

the masters agreed to pay for breakfast-time, and that was accepted. Subsequently (14th) the whole of the Union bands struck work, and the ship men struck in sympathy with the wharf hands, who were really the only persons affected. There was (25th) a plentiful supply of free labour, and most of the men were glad to receive a weekly wage, as offered by the owners. A meeting of the Carmen's Union was held (Oct. 1st), when it was determined, by an overwhelming majority, to block the two wharves from the Monday following, and this was carried into effect (5th). This did not, however, have a very serious result. About the same time, the terms which the employers would accept were made known. They were prepared to give watermen 30s. per week, and shipmen 35s. per week, upon six-monthly engagements. The men so hired would be expected to be ready for work from 6 a.m. to 6 p.m. They would be allowed an hour and a half for meals. Overtime—that is to say, work done between 6 p.m. and 6 a.m.—would be paid for at the rate of 8d. per hour, as heretofore. Mr. Sprow, a delegate who had brought himself into prominence in other strikes, attempted (12th and 13th) to induce the men in the *Thames*, lying in Carion Wharf, to come out; but he was unsuccessful, and was also cautioned as to his conduct by the police, and subsequently arrested. The Committee of the Amalgamated Society of Watermen and Lightermen of the River Thames issued a notice (22nd) removing the block on the two wharves. The central committee, however, of the Dockers' Union issued instructions for the strike to continue on the part of its members. A number of unionists made a serious attack on a party of free labourers who were on their way to the wharves (Nov. 2nd); sticks and stones were freely used, and many of the men had to be taken to the hospitals to be attended to. The strike was officially declared at an end (16th), but the efforts of the organisers of the Dockers' Union to get the strikers reinstated were fruitless, the Companies determining to retain the men who remained loyal during the strike.—**Permanent Employment.** During the year great efforts were made by the employers to change the casual riverside hands into permanent hands, and with considerable success, the London and India Docks Joint Committee instituting with that object a system of pensions, the money for which they provided, the men contributing nothing. The following is the scale of pensions:—

At any age,	Per week.
after completion of 15 years' service	6s.
" 55 years of age	25 " 7s.
" 56 " "	26 " 7s. 6d.
" 57 " "	27 " 8s.
" 58 " "	28 " 8s. 6d.
" 59 " "	29 " 9s.
" 60 " "	30 " 9s. 6d.
" 61 " "	30 " 10s.
" 62 " "	30 " 10s. 6d.
" 63 " "	30 " 11s.
" 64 " "	30 " 11s. 6d.
" 65 " "	30 " 12s.

—**London Shoemakers Strike.** In the middle of October the lasters and finishers employed by two East End firms struck work without the sanction of their union. In consequence of that the masters intimated (19th) that if the men did not return to work there would be a

general lock-out of the London workmen. The union could not prevail on the men to return to work, and the lock-out took place (Nov. 2nd), 20,000 employees being affected. The members of the National Union of Boot and Shoe Operatives voted by ballot (3rd), as to whether the officers of the union, who had not sanctioned the strike, should be upheld, with the result that 2,122 voted yes, and 632 no. The men on strike were at once ordered to resume work, and the strike concluded (5th).—**The Omnibus Strike.** The men belonging to the General Omnibus Company and the London Road Car Company, in the early part of June, demanded from their employers shorter hours and higher pay, and the men of the former also objected to the introduction of the ticket system. An agitation commenced, at the head of which Mr. Sutherst soon placed himself. The masters did not accede to the men's demands, and a great mass meeting (7th) declared a general strike, which took place the following day (Sunday). Nearly all the men joined the strike at the first, but on Sunday an attempt was made to run some of the vehicles. They were, however, blocked, and failure was the result. Mr. Sutherst, with three delegates, waited on a joint meeting of the directors of both companies (8th), and formulated the men's demands, which were: A twelve hours' day; one day's holiday a fortnight; an increase of wages; the abolition of the accident fund; the recognition by the companies of the men's Union; the reinstatement of men discharged for joining the Union; seven days' notice; and the discharge of the men who worked on Sunday. To this the joint boards issued the following reply:—"London General Omnibus Company (Limited) and the London Road Car Company (Limited), to their employees.—The directors have carefully considered the proposals of their men, and have come to the following determinations: 1. As soon as possible, but not later than the 13th July, '91, the average day's work for drivers and conductors shall be 12 hours. 2. When the 12 hours' day comes into operation, the wages shall be as follows: Drivers, commencing at 6s. per day; after 12 months' service, 6s. 6d. per day; conductors, commencing at 4s. 6d. per day; after 12 months' service, 5s. per day (past services in each case to be reckoned in fixing wages). Horse-keepers, 4s. per day; washers, 4s. per omnibus per week. 3. That the other demands (including the dismissal of the men who brought the omnibuses out on Sunday, and have been faithful to the companies) will not be conceded. All former notices are cancelled.—Dated 8th June, '91. JOHN POUND, Chairman, London General Omnibus Company (Limited); T. HERBERT MOORE, Chairman, London Road Car Company." "We, the undersigned associated masters, agree to the above: Thomas Tilling, T. Willing Tibbs (for the Camden Town Omnibus Association); Cane and Glover (for the Victoria Association); W. S. Birch (for the Atlas and Waterloo Association); and C. F. French (for the King's Cross and Barnsbury Associations)." Both the companies asserted that they had a large number of applications for employment, by men out of work, but they preferred to wait and, if possible, give the work to the old men. Meanwhile a number of private omnibuses were put on the streets, and exorbitant fares were charged. The London Trades Council issued the following notice (9th):—"Fellow-country-

men.—We have an urgent appeal to make to you. The omnibuses of London are out on strike against the terrible hours of labour hitherto imposed upon them, asking only for a twelve hours' day, and one day's rest in fourteen. They, with your generous help, are bound to win that strike. A few omnibuses are already running on the twelve hours' system; and every one of these will bear a notice, stamped by the London Trades Council, and signed by Mr. Sutherst, stating that the strike committee has sanctioned its running. We appeal to you to refuse to ride upon any omnibus that does not bear this notice. For the sake of the men and women, and little children, whose lives will be made brighter by the result of this struggle, we ask you, in the name of humanity, to do this. Remember that every penny you spend on any omnibus except these sanctioned ones, will be so much put into the pockets of the companies to assist to maintain a cruel system, under which men have been robbed of all home life and all domestic comforts—a system that we believe you, as Englishmen, are not prepared to see maintained. Signed by order and on behalf of the London Trades Council. G. SHIPTON, Secretary." At the same time collecting boxes were taken about the streets, and considerable sums of money were collected for the men. The Lord Mayor entered into communication with the Companies and the men, with the result that (12th) he received a letter from the Company in which the following paragraph occurred:—"The London General Omnibus Company granted to their drivers and conductors on June 8th their application for a working day of twelve consecutive hours as nearly as possible; in addition to this the company have decided to raise the wages of their men above those received by them a fortnight ago by 6d. per day in the case of the drivers, and 1s. per day in the case of the conductors on full pay, and by 1s. per day in the case of all horsekeepers. The result of this will be that drivers and conductors on full pay will receive 8s. 6d. and 5s. per day respectively for twelve hours' work. The company has no intention whatever of granting any further concessions. The day off has always been granted to the men on their reasonable application. Some have taken it often, others but seldom, at their own option. This was communicated to the strikers, who accepted it, and the strike concluded (13th), the men returning to work on the Sunday (15th).—**Post Office Strike.** On Jan. 3rd about 240 of the second division Savings Bank clerks were suspended by Sir Arthur Blackwood for declining to perform compulsory overtime when called upon. On the previous day a communication had been sent out calling upon the clerks to do at least two hours' compulsory extra duty daily, should occasion arise, until further notice. Many of the clerks had left for the day, and those who remained refused to do it at such short notice, and left at the usual hour. On Saturday morning they found that they were suspended without pay pending instructions from the Postmaster-General. The men had also felt aggrieved at the increasing number of women employed in the department. The Postmaster-General received a deputation (8th) from the suspended clerks, who stated their case to him, and in reply the right hon. gentleman said that it would be necessary to take some official notice of the insubordination,

but that all those who by the evening of the 10th signified their intention of returning to work would be received back on the following Monday. This was accepted by the clerks, and the incident terminated.—**Scottish Railway Strike.** On Sunday, Dec. 21st, a large meeting of railway men at Glasgow initiated a strike for a ten hours' day, which affected the Caledonian, the North British, and the Glasgow and South Western lines, and which caused enormous loss and inconvenience for a long period. At the commencement the strike was mainly confined to those employed in the goods traffic, although the passenger traffic became seriously involved. Picketing was at once established at the great centres, and by the evening of the 22nd 4000 men were out. Glasgow, Edinburgh, Dundee, Motherwell, Arbroath, Greenock, Polmadie, and Hamilton, were first affected, and subsequently a number of men at Carlisle and Berwick struck in sympathy. By the 25th the number of strikers amounted to 8000, and goods traffic was practically at a standstill, and local passenger traffic was discontinued in many places. Mr. Thompson of the Caledonian, and the other general managers resolved to remain firm and to enter into no negotiations with the men while they were on strike, and they succeeded in securing men to work the trains. Many old Midland men entered the service, and the traffic began to improve from the 27th, as regarded the passenger traffic, which was fairly regular. A number of signalmen on various parts of the systems deserted their posts, which were filled by stationmasters, inspectors and others, and some delay in the traffic was caused by their inexperience. A considerable sum of money was sent from England to the strikers. On the 29th and following days riots occurred in several places, the strikers being reinforced by a number of colliers, and several of the men who remained loyal to the Companies or had taken the places of strikers, were knocked about. Further riots and collisions with the police occurred at Motherwell, where evictions from the Companies' houses of men who had left their service took place, and some damage was done to rolling stock, but generally speaking, there was very little violence shown at first, but assaults and stone throwing became frequent towards the end of the affair, apparently caused by the feeling that the strike could not be successful, and was being gradually, but surely, defeated. On Jan. 6th, Mr. Cunningham Graham, M.P., and Mr. John Burns spoke at Glasgow and Dundee respectively in support of the strike. At a meeting of the strikers on the 7th it was resolved to issue a manifesto to the public, setting forth the following as the men's demands: "(1) A working day of ten hours to be actually worked. The clause is to be interpreted in a reasonable spirit by both parties, and neither as compelling the companies to treat, for example, a porter at a roadside station as on the same footing as a porter at a large station, where the work is continuous, nor as entitling the companies to expect from a porter at a roadside station an unreasonable long day's work. This clause not to affect the existing rates of wages. (2) Overtime to be paid after sixty hours per week have been worked. (3) Overtime to be paid for at the rate of time and a quarter. (4) Sunday work to be paid for at the rate of time and a half. (5) For shunters and yardmen in busy

shunting-yards, and signalmen at important signal stations, eight hours to be the *maximum* day's duty, and the men on strike to go in at once on the Companies undertaking to give effect to these terms." A collision occurred in Glasgow on the 7th, causing the death of one man. Mediation was tried by the Lord Provost of Edinburgh, and others, without effect; but Mr. Thompson, on his own motion, issued a circular on the 13th, offering to reinstate any old Caledonian men who would go back, although he had two applications for every vacancy existing. Both passenger and goods traffic continued to improve. The Caledonian was practically out of the strike by the 21st, and on the 20th, the order was issued by the strike committee that the men should resume work on the 13th. The next day there was a rush of men to seek reinstatement, and the strike was at an end, the result being that the railway companies and traders had lost a large sum, and eight hundred men remained out of work.—**Swansea Dock Strike.** Several vessels were blocked (Feb. 12th), because the owners refused to replace the Federation crew by Unionists, the block being extended to other vessels (16th). The block was removed (19th).—**Bookbinders' Strike.** The binders in the employ of Messrs. Waterlow & Sons, and Messrs. Shaw & Co., struck (Nov. 16th) for an eight hours' day.—**May Day Demonstrations.** There was a Socialist demonstration in Hyde Park May 1st. On the next day the London carpenters and joiners assembled on the Thames Embankment, and marched to Hyde Park; and a remarkable feature of the affair was the absence of all socialistic tendencies, either on the banners or in the speeches. Notwithstanding the pouring rain resolutions were carried in favour of working only 47 hours a week, and tence an hour pay. The London Trades Council demonstration (3rd) was a gigantic affair, and had the advantage of bright weather. There were twelve platforms, and amongst the speakers were Mr. Cunningham Graham, M.P., Mr. John Burns, and Dr. Aveling. The following resolution was carried at the various platforms: "That this meeting recognises that the establishment of an international eight hours' day for all workers is the most immediate step towards the ultimate emancipation of the workers, and urges upon the Government of all countries the necessity of having a working day of eight hours by legislative enactment."

Labour Commission. See SESSION, sect. 30.

Labour Commission. A Royal Commission on Labour was appointed, in April '91, with the Rt. Hon. the Marquis of Hartington, M.P., as **Chairman**. The other members were: The Rt. Hon. the Earl of Derby; Rt. Hon. Sir Michael Hicks-Beach, Bart., M.P.; Rt. Hon. Sir John Gorst, O.C., M.P.; Rt. Hon. A. J. Mundella, M.P.; Rt. Hon. Leonard H. Courtney, M.P.; Rt. Hon. H. H. Fowler, M.P.; Sir E. Harland, Bart., M.P.; Mr. J. C. Bolton, M.P.; Mr. G. W. Balfour, M.P.; Mr. T. Burt, M.P.; Mr. Jesse Collings, M.P.; Mr. W. Abraham, M.P.; Sir F. Pollock, Bart.; Prof. Marshall, Sir W. Lewis, Messrs. W. Austin, J. Mawdsley, Tom Mann, Edward Trow, Henry Tait, Samuel Pimmsoll, A. Hewlett, J. H. Ismay, David Dale, George Livesey, and W. Tunstall. The joint secretaries being: Messrs. Geoffrey Drage and J. Burnett, and the offices, 44, Parliament Street. On the

appointment of the Commission a committee was formed to decide on the procedure to be adopted, and their report was presented to a meeting of the whole Commission (May 28th). They recommended that the trades be divided into the following groups: (a) The mining, iron, engineering, hardware, shipbuilding and cognate trades; (b) transport and agriculture (the term transport including shipping, canals, docks, railways, and tramways); (c) textile, clothing, chemical, building, and miscellaneous trades. This suggestion was adopted, as was also the following **syllabus**—**Trade differences** between employers and employed: (1) Their causes; (2) their development, organisation and conduct; (3) their cost; (4) their prevention or settlement.—(1) **Their Causes.** A. Wages—1. How fixed. 2. How calculated—(a) by piece work; (b) by day work; (c) by task work. 3. How paid—(a) direct, by employer, or by sub-contractor; (b) weekly, fortnightly, or at other periods; (c) increased by bonus, or reduced by stoppages; (d) truck or payment in kind; (e) house, land, or other allowances. 4. Fluctuations of wages—(a) how brought about; (b) how adjusted. 5. Differences of wages in different establishments and localities. 6. Existence and effect of—(a) pensions; (b) deferred pay; (c) sick insurance; (d) accidental insurance. 7. Notice required for the termination of wage contracts. B. Hours of labour and continuity of employment: 1. Normal hours of work. 2. Overtime, and how remunerated. 3. Night shifts, and how remunerated. 4. Short time, season work, or other irregularity of employment. 5. Sunday and holiday labour; how arranged and paid for. 6. Duration of days' work, and weeks' work, and how regulated. C. Sub-division, distribution and classification of work, as between different trades, individuals, men, women, or children, whether part-timers or not, factories, workshops, or homes. D. Apprenticeships. E. Introduction of machinery. F. Supply and quality of the machinery and materials of production or transport. G. Safety of employment, provisioning of ships, lighting, sanitation and inspection of workplaces. H. Discharge for belonging to a trade union. I. Refusal to work with non-unionists. J. Discharge of representative delegates and use of black list. K. Employment of foreigners. L. Obnoxious officials. M. Sympathetic strikes. N. Other causes of disputes. (2) **Their development, organisation and conduct:** A. Trade associations or combinations of employers or of employed, whether permanent in character or temporary, occasional, or for special dispute purposes; their trade rules, benefits and policy. B. Strikes and lock-outs; picketing, black listing, and other methods of influencing persons concerned or not directly concerned in the dispute. C. Importation of new or foreign labour, whether under contract or otherwise. (3) **Their cost:** A. Economic result of strikes and lock-outs to workers, to employers, and to the community at large. (4) **Their prevention or settlement:** A. Conciliation by joint committees or otherwise. B. Mediation. C. Arbitration, voluntary or compulsory. D. Sliding scales. E. Profit sharing. F. Industrial partnerships. G. Co-operation. The group committees were to hear evidence of fact on these points, and to present reports to the Commission, with summary of evidence if they

thought desirable, leaving it to decide the questions of principle. In addition a schedule of questions was prepared to be sent to unions of employers and employed, and other representative bodies or persons, founded upon the syllabus. The following were the members of the **group committees**:—Group A. (Iron and Coal): Mr. David Dale (chairman), Sir E. Harland, M.P., Mr. Burt, M.P., Mr. Abraham, M.P., Mr. E. Trow, Mr. Hewlett, Sir W. Lewis, Mr. Gerald Balfour, M.P., and Mr. H. H. Fowler, M.P. Group B. (Docks, Railways and Agriculture): Lord Derby (chairman), Mr. J. C. Bolton, M.P., Mr. T. H. Ismay, Mr. Tom Mann, Mr. Henry Tait, Mr. S. Plimsoll, Mr. Jesse Collings, M.P., Professor Marshall, and Sir M. Hicks-Beach, M.P. Group C. (Textile and Miscellaneous): Mr. Mundella, M.P. (chairman), Mr. W. Tunstall, Mr. Mawdsley, Mr. G. Livesey, Mr. Austin, Sir John Gorst, M.P., Sir Frederick Pollock, and Mr. L. Courtney, M.P. The first sitting of group A. to take evidence was on July 19th; of group B. on June 17th; and of group C. on June 29th. After the recess group A. sat again on Oct. 27th, group B. on Nov. 2nd, and group C. met on Nov. 10th.

Labour Legislation. In view of the legislation that will probably follow the Report of the Royal Commission on Labour, it may be useful to give a brief outline of the measures for the regulation of labour which have been passed in the United Kingdom since the subject was first made a matter for State interference. The factory system had its origin in the grand series of mechanical inventions in connection with the cotton manufacture, which marked such an important stage in the industrial progress of the country during the last thirty or forty years of the eighteenth century. Under the new order of things hand labour in the cottages of the people was superseded, and men, women, and children were drafted into the factories in ever-increasing numbers. Much of the work could be done by very young children, and the proportion of these employed was very large. The leading idea of the manufacturer, in too many cases, was to get the largest possible amount of work out of his workpeople and machines, and such a thing as limiting the hours of labour was not dreamt of. The machinery was kept running sixteen or eighteen hours a day for six days in the week, and, of course, the workpeople had to be there to attend to it. As a rule, the children were apprenticed to their masters for long terms of years, and were subjected to very harsh treatment in the mills. In course of time public interest was excited on their behalf, and in the year 1796 their condition was brought prominently into notice by letters in the newspapers, giving graphic descriptions of factory life. In the treatment of their workpeople a number of the largest manufacturers were notable exceptions to their fellows, and when the question of doing something to make the lives of factory operatives more bearable was raised, they came forward as champions of the cause. Sir Robert Peel (the first baronet, himself a manufacturer employing a large number of hands) brought the subject before the House of Commons, and in the year 1802 succeeded in getting a Bill passed, embodying certain regulations for preserving the health and morals of apprentices and others employed in cotton and woollen factories. This, the **first Factory Act** in the statute-book, made it imperative that all fac-

tories should be duly ventilated, and twice a year washed with quicklime and water; that every apprentice should be supplied with proper clothing; that no apprentice should be allowed or compelled to work more than twelve hours a day, nor before six in the morning nor after nine at night; that some part of every working day should be set aside for the instruction of every apprentice in reading, writing, and arithmetic, this instruction to be continued during the first four years of apprenticeship; that the justices of the peace should appoint visitors of factories to enforce the provisions of the Act, one of the visitors to be a justice of the peace and the other a clergyman. This Act was very well as a beginning, but circumstances soon arose which rendered it obsolete to a large extent. Hitherto the mills were driven by water-power, and were situated in localities where such was available; but when the steam-engine took the place of the water-wheel, the manufacturers built their mills in the most densely populated places, so that they might have an ample command of labour. Instead of being accommodated in buildings attached to the mills, the young people who now came to be employed were able to live at home with their parents, and to be under their control. The system of apprenticeship was, for obvious reasons, practically abandoned, and, as the Act of 1802 applied to apprentices only, it became a dead letter. In the course of a few years the cry of the oppressed was again heard in the manufacturing districts, and among those who appeared to take up the cause of the factory children was their old friend, Sir Robert Peel, who, finding that the Act of 1802 now failed in its purpose, introduced a **new factory Bill** into the House of Commons in June 1815. A Select Committee was appointed to make inquiry on the subject, and the evidence laid before it showed that many gross abuses existed in the factories. Notwithstanding this fact, the Bill met with considerable opposition, and it did not get through Parliament until the year 1819, and then it was considerably modified in some of its most important points, and its operation was limited to cotton factories. The employment of any child under nine years of age was forbidden, and the hours of work for all under sixteen years of age were limited to twelve per day, to be taken between 5 a.m. and 9 p.m., and out of the twelve hours one and a half had to be allowed for meals, thus reducing the actual working time to ten and a half hours. Further provision was made for keeping the working-rooms in a wholesome condition; and it was enacted that an abstract of the factory laws should be exhibited in the works, so that all the *employers* should become acquainted with the same. The new Act was regarded with little satisfaction by the friends of the factory operatives, and the agitation for further legislation on the subject was continued with increasing vigour. In the year 1825, Mr. John Cam Hobhouse, member for Westminster, introduced a Bill to reduce the work of children in cotton factories to eleven hours per day, and to strengthen the authority of the magistrates, whose duty it was to enforce the law. The Bill met with strong opposition from the factory interest in the House, and the proposal to reduce the working hours to sixty-six per week had to be abandoned, and a reduction of three hours on Saturdays substituted. Power was granted to the magistrates to summon

witnesses, and this was recognised as an important concession. The absurdity of limiting this and the preceding Act to cotton factories, seeing that a similar state of things existed in the worsted and woollen mills, was for a time urged in vain; but at length the public mind was thoroughly roused on the subject, and the agitation for securing shorter hours of labour for factory children generally spread throughout the country. Prominent among those who carried on the agitation was Mr. Richard Oastler, of Fixly Hall, near Huddersfield, who came to be known as "The Factory King." The next attempt at legislation on the subject was the introduction in Feb. '31, by Mr. John Cam Hobhouse, of a Bill which proposed to repeal all existing laws affecting the employment of children in factories, and to establish a more efficient code of regulations applying to all textile factories alike. It proposed that no one under eighteen years of age should work more than eleven and a half hours on the first five days of the week and eight and a half hours on Saturdays, one hour and a half of that time being allowed for meals. The employment of any child under nine years of age in any factory was absolutely forbidden, and no one under twenty-one was to be allowed to work during the night. This Bill met with a powerfully organised opposition from the mill-owners, who held meetings in various parts of the country, at which they passed resolutions predicting all sorts of disasters to the trade of the country if the Bill should become law. In its passage through Parliament the Bill was seriously mutilated, and its operation was limited to cotton factories. The only real reform effected by it was the abolition of night-work so far as young persons were concerned. Before the session closed, Mr. Sadler, the member for Newark, introduced a Ten Hours' Factory Bill, but it perished amid the agitation and excitement created by the Reform Bill. In the first reformed Parliament a strong party was formed in favour of legislation on behalf of factory children, and Lord Ashley consented to champion the cause. Early in '33 his lordship gave notice of his intention to re-introduce Mr. Sadler's Bill. Meanwhile an influential society had been formed in London, under the presidency of the Duke of Sussex, for the improvement of the condition of factory children, and this organisation gave powerful support to the cause. Before Lord Ashley's Bill could be proceeded with, both it and a measure dealing with the same subject, which had been introduced by Lord Morpeth, were put in abeyance by the appointment of a Royal Commission to collect information with reference to the employment of children in factories, and suggest means for the curtailment of their hours of labour. The report of the Commission was so conclusive as to the existence of great evils, that the Government were bound to take action in the matter, and at their instance a Bill was introduced by Lord Althorp, based on the recommendations of the Commissioners. The Bill proposed to limit the hours of labour to twelve per day for five days in the week and to nine on Saturdays, for all persons above thirteen and under eighteen years of age; children above nine and under thirteen were not allowed to work more than eight hours in one day, excepting in silk-mills, in which the limit was fixed at ten hours a day. The Government proposals failed to satisfy the advocates of a Ten Hours' Bill, and Lord Ashley

introduced a rival measure, which proposed to include all women within its scope, and to limit the working hours of women and children to ten per day. On a test division in the House, Lord Ashley's Bill was rejected and that of the Government proceeded with. In its final form the Bill embodied many important regulations with regard to the health, education, and holidays of factory workers, and made provision for the appointment of independent inspectors to enforce the new law. The operation of the Act, however, was not so satisfactory as had been expected, and the ten hours' agitation was persevered with. While the divisions of our industrial army employed in factories were thus being cared for, the case of other divisions was gradually being brought into notice. The children employed in chimney sweeping had long been objects of sympathy with philanthropic people, but though their condition was as bad as could well be imagined, it was for a time successfully argued that the service they rendered could not be otherwise accomplished. Towards the close of last century the subject was brought under the notice of Parliament. The House of Commons passed a Bill that would have placed under strict regulation the employment of climbing-boys, but the House of Lords amended the measure to such an extent as to make it practically useless for its purpose, and the abuses it was designed to abolish were continued. In June '17 a Select Committee of the House of Commons was appointed to inquire into the whole subject, and rarely has a more horrible story been told than is to be found in their report. The country was shocked by the disclosures made, but it was not until April '34 that Parliament was asked to take any action on the report. A Bill was then introduced by Mr. Fox Maule, but this measure, like its predecessor, was shorn of its most essential provisions by the House of Lords. Six years later, however, a Bill was passed which accomplished the desired end, and in the course of a little time the necessity for employing climbing-boys was put an end to forever by the invention of a mechanical sweeper. About the time that the case for the climbing-boys triumphed, the condition of the women and children employed in mines was brought prominently into notice by the report of Lord Ashley's Children's Employment Commission, appointed in '40. This report gave another shock to the popular mind, and was described in the House of Commons as "an awful document." On the 7th of June '42 Lord Ashley introduced a Bill to regulate and restrict the employment of women and children in mines, the chief provision of which was designed to prohibit absolutely the employment of women underground. The Bill met with strong opposition in the House of Lords, and was modified in several important parts, but its ultimate effect was to exclude women from working in mines. The law regulating work in mines has since been amended in various ways; most recently by the Coal Mines Regulation Act, '87. This Act consolidates, with amendments, the Acts of '72 and '76, and the Stratified Ironstone Mines (Gunpowder) Act '81. As the law now stands, the employment below ground of boys under twelve, and of women or girls of any age, is prohibited, and the hours and conditions of employment of boys over twelve below ground are fixed and regulated. Above ground no boy nor girl under the age of twelve is to be em-

ployed, and the hours and conditions of employment of boys and girls over that age, and of women, are fixed and regulated. Liberal provision is also made for ensuring the safety of persons employed in and about mines. It has been stated that the Factory Act of '33 failed to satisfy the advocates of a Ten Hours Bill, and on several occasions the subject was brought before the House of Commons. In '44 an Act was passed which introduced the **half-time system**, under which the children employed in factories were guaranteed that a certain part of the day should be set aside for school attendance, and sixty-nine hours per week were fixed as the working time for women and "young persons"—that is, persons between the ages of fourteen and eighteen years of age. The Act contained other provisions of a valuable nature, but still the advocates of a Ten Hours Bill declared that they were not satisfied, and they carried on their agitation throughout the country. Their opportunity came with a change of ministry, and in June '47 the Royal assent was given to an Act for limiting the hours of labour for women and young persons to fifty-eight per week. A flaw in this Act having been discovered, by which the restrictions it imposed could be evaded, an amending Act was passed in the Session of '50, whereby the period of employment for women and young persons was fixed at from six in the morning till six in the evening in summer, and from seven in the morning till seven in the evening in winter, with meal intervals of an hour and a half, work to cease on Saturdays at two o'clock. Though this Act raised the total working hours of the week from fifty-eight to sixty, it was accepted on the ground that there would be greater certainty of the law being observed as it was now constructed. In '56 a short Act was passed, fixing the **responsibility of mill-owners** with regard to the fencing of machinery, and in '60 bleaching, dyeing, and finishing works were placed under regulation and inspection. Soon afterwards a commission was appointed to inquire into the employment of children in various trades and manufactures not already regulated by law, and the result of this inquiry was the extension, in '64, of the Factory Act to half-a-dozen industries not previously included. Next came the **Factory Act Extension Act** and the **Workshops Regulation Act** of '67. By these Acts the whole of the manufacturing industries of the country were practically placed under special legal control. In '74 an Act was passed limiting the hours of work of adult women and young persons in factories to fifty-seven instead of sixty per week. A year later it came to be considered desirable that the **Factory and Workshops Regulation Acts** should be consolidated and amended, and a Royal Commission was appointed to inquire into the working of the Acts. The outcome of this inquiry was the **Factory and Workshops Act '78**, the provisions of which are summarised in the preceding volumes of this book. In '83 an Act was passed regulating the conditions of **work in bakeries and white-lead works**. During the Parliamentary Session of '90-'91 no fewer than five Bills were introduced for amending or extending the Factory and Workshops Act of '78—two in the Lords and three in the Commons. Of these, only the measure brought in by the Government was proceeded with, and it received the Royal assent on Aug. 8th. This Act prohibits the employment of children under eleven years

of age, strengthens the provisions for the security of life and limb from dangerous occupations and fire, and provides for the more effectual performance of the duties of the local authorities.

Labrador. A great peninsula on the east coast of British North America, lying between the Gulf of St. Lawrence and Hudson Bay. See **BRITISH EMPIRE** (table).

Labuan. An island and British colony, situated in a bay on the north-west coast of Borneo. The port and town is **Victoria Harbour**. For financial statistics see **BRITISH EMPIRE**, etc. (table). There are only about a score of Europeans resident, the population being composed of Kyans, Malays, Borneans, Klings, and Hindüs. Labuan was purchased of the Sultan of Brunei in 1846. By an arrangement between Her Majesty's Government and the British North Borneo Company, the island has been administered since '80 by the officers of the company. Rainfall in Labuan is extraordinary, being 125 in. during the year.

Lachine Rapids (St. Lawrence) Utilisation. In Oct. '91 attention was called to the fact that some years ago a charter was granted to a Canadian company for the purpose of utilising the great water power at this place. The rapids are about five miles above Montreal, and the suggestion was to obtain electrical power, for which purpose a dam is necessary across the northern channel of the St. Lawrence, which is here divided by small islands. The municipalities along the south shore of the river objected for fear of floods; but the company's engineers say that such fear is groundless. In Oct. it was reported that negotiations were on foot to raise a million sterling in Europe as soon as the local authorities' objection had been removed, and the approval of the scheme had been obtained from the Department of Public Works at Ottawa (also see **MONTMORENCY FALLS**).

Lacrosse. The home of this game is Canada, but since its introduction into this country some eighteen years ago it has become very popular. The **Irish Association** was formed in '79, the **North of England Association** in the following year, and the **Southern Counties** in '82. The Challenge Flag competitions extend over a greater portion of the season, and are always watched with interest by large crowds, as also is the annual encounter between teams representing North and South. The final tie for the **North of England Flags** of '91 was decided at Didsbury Park, Manchester, on March 14th, the clubs left in being South Manchester and Cheetham. The former won by four goals, and beyond being the possessors of the original set, they now hold the new trophy for the third year in succession. Teams: **South Manchester**—J. T. Harding (goal), F. Rushworth (point), P. Farrar (cover-point), F. M. P Davis (third man), P. Raundrop, A. McGregor (defence field), C. Rome (centre), W. Nicholson, S. P. Brown (attack field), J. Tweedale (third home), C. H. Taylor (second home), F. Poole (first home). **Cheetham**—A. Cliffe (goal), C. Bamford (point), T. Warriner (cover-point), D. Powell (third man), H. Bull, B. F. Weaver (defence field), W. Stockdale (centre), T. Sinclair, W. Turvey (attack field), C. Westerby (third home), J. Mallilieu (second home), H. Dale (first home). Umpires, Crummack (Stockport) and Estell (Heaton Mersey); referee, C. Cheetham (Stockport). Snaresbrook having beaten Cambridge

University in the semi-final of the South of England Flags, met Clapton on the Richmond Athletic Ground on March 21st, when the latter proved successful by six goals to love; and having been victorious in '87 and '89, they became absolute owners of the much-coveted "banners." Teams: **Clapton**—S. P. Barrett (goal), A. P. Barrett (captain, point), C. Newman (cover-point), H. E. Dyers (third man), J. D. Stubbs, J. W. Richardson (defence field), D. Bisan (centre), E. H. Barrett, G. May (attack field), J. Worsfold (third home), E. J. Keddel (second home), F. W. Barrett (first home). **Snarebrook**—F. L. Day (goal), H. Dickson (captain, point), T. F. Goddard (cover-point), G. W. Footitt (third man), F. Mundy, A. W. Grant (defence field), E. C. Chant (centre), H. A. Gandom, P. J. Banks (attack field), S. Vines (third home), E. H. Seaton (second home), R. Ball (first home). Referee, E. T. Sachs (Middlesex County); umpires, V. Barker (Hampstead) and E. Buss (Surbiton). The North and South match, instituted in '77, was played on the Richmond Athletic Club Ground on April 11th, when the Southerners displayed much improvement, and won, after an exciting contest, by eleven goals to nine. Never before had twenty goals been scored in this contest. Teams: **South**—S. E. Barrett, Clapton (goal); A. P. Barrett, Clapton (point); W. A. Bonnell, Hampstead (cover-point); C. Newman, Clapton (third man); H. E. Ryers, Clapton, and F. G. Madgen, West London (defence field); E. Buss, Surbiton (centre); W. H. S. Oulton, Cambridge University, and S. M. Knight, West London (attack field); C. S. Knight, West London (third home); G. M. Burd, Surbiton (second home); F. W. Barrett, Clapton (first home). **North**—J. S. Harding, South Manchester (goal); C. Mason, Stockport (point); N. Melland, Owens College (cover-point); T. Coombs, Harrogate (third man); Warrenner and H. Backhouse, Heaton Mersey (defence field); W. Stockdale, Cheetham (centre); E. Ronic, South Manchester, and J. Adam, Heaton Mersey (attack field); J. Tweedale, South Manchester (third home); C. Taylor, South Manchester (second home); F. Poole, South Manchester (first home). Umpires, V. Barker (Hampstead) and H. P. Allen (Huddersfield). Referee, E. T. Sachs (Middlesex County). The international match between England and Ireland took place on Sept. 14th, at Ormeau, Belfast, where the wearers of the shamrock gained a decided victory over those sporting the rose by twelve goals to nil, thus emphasising the most unsatisfactory state of affairs in connection with this pastime, that of the game being played in England in the winter and in Ireland in the summer, for the want of regular practice on the part of the losers had undoubtedly much to do with the result. Teams: **England**—F. Rushworth, South Manchester (goal); J. Hamford, Cheetham (point); L. Zimmerman, Owens College (cover-point); C. Newman, Clapton (defence field); Raundrop, South Manchester (right defence); H. C. Byers, Clapton (left defence); J. F. B. Adam, Heaton Mersey (centre); S. Knight, West London (left attack); C. Knight, West London (right attack); J. Tweedale, South Manchester (third home); G. W. Burd, Surbiton (second home); F. Poole, South Manchester (first home). **Ireland**—M. MacDonald, Ards (goal); R. MacDonald, Ards (point); W. MacDonald, Ards (cover-point); J. T. Gibb, Rugby (defence field); T.

Macintosh, Ards (right defence); S. Gardner Rugby (left defence); W. Dawson, Ards (centre); M. McCoull, Rugby (left attack); J. Moffett, Rugby (right attack); H. Anderson, Windsor (third home); J. Clugston, Rugby (second home); H. S. McCashin, Rugby (first home). Umpires—England, J. Neill; Ireland, W. P. Reid. Referee, J. Sinclair. On Oct. 3rd Rugby beat Ards, at Belfast, by seven goals to three; and the Countess of Shaftesbury then presented the winning team with the handsome challenge shield of the Irish Lacrosse Union.

Ladakh. For Commissioners see DIPLOMATIC.

Ladies' Clubs. See CLUBS FOR LADIES.

Lady Margaret Hall. See HIGHER EDUCATION OF WOMEN.

Lagos. A British colony on the Guinea coast, West Africa. Consists of Lagos, town and island, on the coast of Bight of Benin, 150 miles east of Gold Coast, together with Badagry, Palma and Lekie on the mainland. See BRITISH EMPIRE (table).

Lakh. A term used in India to express the number 100,000 in the computation of money. A lakh of rupees = 100,000 rupees. In 1835, when the currency was remodelled, the value of the rupee was fixed at two shillings. A lakh of rupees is therefore equivalent to £10,000.

Lancashire, Derbyshire and East Coast Railway. During the Parliamentary Session of '91 this great scheme was introduced and passed. It is for a line straight across England from west to east, from Warrington, where the main line of the North Western system crosses the Manchester Ship Canal (q.v.) to Sutton, on the Lincolnshire coast. The distance is rather over 150 miles, or with branches, 160 miles, of railway, and there are several interesting engineering features. According to the evidence of the engineer, Mr. R. E. Cooper, on April 24th and 25th, a viaduct at Monsal Dale, Derbyshire, would be 275 ft. high, the highest in this country. It would be quite straight, with 150 ft. spans. The original estimate was £100,000, and he had had a tender for the steel work at £69,700; and there would be about £4,000 for the foundations. The steepest gradient would be 1 in 75, and the estimated cost of the whole line £4,275,222, power being taken to subscribe £100,000 to a North Sea harbour. The preamble was passed by a Lords Committee on July 8th, and the Bill was read a third time, and passed in the House of Lords on July 23rd.

Landes (France) Re-afforesting. In the report for the Department of the Landes, published towards the close of '90, particulars were given of the reclamation work carried on for thirty years on the waste land between Bordeaux and Bayonne. The 730,000 acres, distributed over 102 parishes, and worth only 4 fr. an acre, or under £120,000, had been replanted and drained, and are now worth £3,200,000. Private owners have also reclaimed and re-afforested 875,000 acres. The vine has flourished on a sandy soil, where the phylloxera will not thrive, and the exports of pine timber and of turpentine have rapidly developed. The Department, from being the most unhealthy in France, is now one of the most salubrious, and the last statistical report showed that the births exceeded the deaths by 1,412.

Land Registry (Middlesex Deeds) Act, 1891. See SESSION, sect. 80.

Land Taxation. See SESSION, sect. 81.

Landlord and Tenant. The relation of landlord and tenant is created wherever a person having an estate in land grants to another person in consideration of a rent a lesser estate in this land. Thus, when a freeholder lets his land to a farmer for a term of years, he becomes landlord and the farmer becomes tenant. **Tenancies** are of many kinds; and the most usual are a tenancy for a term of years, a tenancy from year to year, a tenancy at will, and a tenancy on sufferance. A tenant for a term of years is a **leaseholder**; and if the term be longer than three years the lease must be by deed, although, where no deed has been executed, evidence is admissible to prove that there has been an agreement for a lease. Where there is a lease in proper form the tenant is secured in his possession so long as he pays his rent, and at the expiry of his term he is supposed to give up possession without the formality of a notice to quit. Formerly a breach of any of the covenants contained in the lease was enough to void it; but now any breach may be compensated by a money payment. A tenancy from year to year arises when land is let from year to year, or when it is let without any express stipulation to that effect, but with the reservation of a yearly rent, or when the tenant holds over after the expiration of his term and pays rent for so doing. This tenancy cannot be terminated by either party otherwise than by giving a half-year's notice; so that if this notice be not given before the expiration of the first half-year, another year is added to the tenancy, and so on. A tenancy from year to year may be created by word of mouth, and a verbal notice to quit is valid, although it is always desirable, as a precaution, to give written notice. A tenancy at will is a tenancy terminable at the pleasure of either party. The Courts are reluctant to constitute any tenancy as a tenancy at will unless there is an express agreement to that effect. But this agreement need not be in writing. A tenancy by sufferance is little more than the fact of possession. It occurs when a tenancy of a higher kind, such as a tenancy from year to year, has expired, and the tenant remains in possession without either hindrance or sanction from the landlord. Tenancy by sufferance cannot be created by the will of the parties, but only by legal construction. If the landlord accept rent from the tenant by sufferance, he immediately creates, according to circumstances, a tenancy at will or from year to year. A tenant under a lease or from year to year may sub-let unless expressly restricted from so doing, but a tenant at will or on sufferance cannot do so. For the recovery of rent in arrear the landlord has, beside the other remedies of a creditor, the remedy of distress. He may in person or by his bailiff take possession of so much of his tenant's chattels upon the holding as by their sale will produce a sum sufficient to discharge the arrears. He must distrain at one time for the whole of that which is due. No arrears of rent can be recovered by distress but within six years of their becoming due. After five days have elapsed from the seizure of the goods they may be sold, having been valued by two sworn appraisers, and the surplus, if any, must be repaid to the tenant. If the distress was unlawful the tenant has an action of replevin. It is a general rule that whatever is affixed to the freehold goes with the free-

hold; and this rule with its exceptions gives rise to a large part of the law of landlord and tenant. **Fixtures** made by the tenant may be subdivided into three classes: (1) fixtures for purposes of trade, (2) fixtures for ornament or convenience, and (3) fixtures for agricultural purposes. As regards (1) trade fixtures, like machinery, furnaces, brewing vats, salt-pans, etc., these may be removed by the tenant who has set them up, in every case in which their removal occasions no material injury to the freehold. (2) Fixtures for ornament or convenience, like window-blinds, marble chimney-pieces or kitchen ranges. These also, if set up by the tenant, may be removed by him, provided always that in removing them he does little or no damage. (3) Fixtures for agricultural purposes. The law relating to these is chiefly contained in the Agricultural Holdings Acts. Somewhat analogous to fixtures are **emblems** that is to say, crops resulting from the tenant's cultivation which at the expiration of his tenancy are still uncut and growing. The general rule with respect to these is that the cultivator has the right, after such expiration, to enter on the land to reap and to carry away the produce of his labour. If he die before the harvest, such crops fall into his personal estate, and his executor or administrator succeeds to the rights which he had. Where a tenant from year to year holds of a landlord who has only a life estate, and the landlord dies in the course of the current year, the tenant is entitled to occupy the holding until the year has expired, and the new landlord is entitled to a proportionable part of the year's rent. The non-payment of rent does not affect the validity of a notice to terminate a tenancy. Thus, a notice given on March 25th to take effect on Sept. 25th is good, even though the rent due on March 25th may not have been paid.

Landlord and Tenant, Law, on in '91. An interesting point was raised in *Shepherd v. Berger* (Court of Appeal, March 4th, '91). There was a provision in the lease that whenever a quarter's rent should be in arrear for twenty-one days, and no sufficient distress could be levied, the landlord might recover possession. It appeared, however, that the rent had been permitted to get three quarters in arrear, and that a distress which was put in was only sufficient to satisfy two of them. The landlord then brought an action to recover possession. In the Lord Mayor's Court it was held that he was entitled to succeed; but the Queen's Bench Division decided otherwise, apparently holding that the proviso did not apply when three quarters rent was in arrear, though it would if there were only one quarter. The Court of Appeal, to which the case was taken, decided in favour of the landlord, holding that when the proceeds of the distress had been appropriated to satisfy the first two quarters there remained one quarter's rent due, in respect of which, in the absence of sufficient distress, the proviso for re-entry applied. In *Joyner v. Weeks* the defendant was the lessee of a house and shop, which he was bound to deliver up at the end of the term in good repair. Two years before the expiration of the term the plaintiff granted a lease of the premises to the tenant of a house and shop next door, the lease to commence at the expiration of the defendant's tenancy, and the new lessee covenanting to execute substantial alterations and repairs, and to make a connection with the house he occu-

pied next door. At the expiration of the defendant's tenancy the new tenant entered and made the alterations and repairs. It was proved that the cost of making good the dilapidations at the end of the defendant's tenancy would amount to £70, but the defendant denied liability, on the ground that the plaintiff had sustained no damage by his breach of covenant to repair, and that at most he was entitled to nominal damages. The Court of Appeal (May 5th, '91) held that the liability of the defendant was not affected by any arrangement between the plaintiff and a third party, and that there must be judgment for the £70. In *Mason v. Gravely* (Queen's Bench Division June 19th, '91) the plaintiff took a house, the drainage of which was represented by the defendant to be in good condition. As he and his family subsequently suffered from illness, the drains were taken up, and they were then found to be in a filthy and defective state. The jury gave judgment for the plaintiff for £70. In several other cases of the kind where there was a written representation that the drains were in good order, the plaintiffs recovered damages.—A tenant covenanted by his lease not to assign his premises, without the landlord's consent, but such consent was not to be arbitrarily withheld. The tenant assigned without the lessor's consent, the explanation being that there was an omission on the part of his solicitor's clerk to make the necessary application. It was held that though the landlord would have been bound to accept the sub-tenant had his consent been asked, yet he was entitled to recover the premises, and that there was no equitable jurisdiction to relieve the tenant from forfeiture which arose from oversight, forgetfulness, or carelessness (*Barrow v. Isaacs*, Court of Appeal, Dec. 18th, '90).

Lang, Andrew, M.A., LL.D., was b. at Selkirk, 1844, and educated at Edinburgh Academy, St. Andrews University, and Balliol College, where he graduated first class in classics. Elected a Fellow of Merton, '68. He has for some time been on the literary staff of the *Daily News*, and is a well-known contributor to periodical literature. His "Ballads and Lyrics of Old France," and "Ballades in Blue China," '81, brought him into prominent notice. His subsequent works, especially "Helen of Troy," "Rhymes à la mode," and "Custom, Ritual, and Myth," increased his reputation. He is joint translator, with Prof. Butcher, of the "Odyssey," and with Mr. Myers and Mr. Leaf of the "Iliad." Mr. L. was in '88 appointed Gifford Lecturer on Natural Religion at St. Andrews University, and delivered his inaugural address Jan. 17th, '89. His recent works include "The Gold of Fair-ilee," "Lost Leaders," which consists of leading articles which had appeared in the columns of the *Daily News*, and "Prince Piglio." He has edited the "Blue Fairy Tale Book," and the "Red Fairy Tale Book." During '90 Mr. L. wrote, in collaboration with Mr. Rider Haggard, "The World's Desire," in addition to the "Life, Letters, and Diaries of Sir Stafford Northcote, first Lord Idlesleigh," which was highly praised for skill and delicacy therein exhibited. In '91 there appeared "Essays in Little," "The Blue Poetry Book," and "Angling Sketches."

Lankester, Edwin Ray, M.A., F.R.S., was b. 1849. Ed. at St. Paul's School and Christ Church, Oxford. Appointed Fellow and Lecturer of Exeter College, Oxford ('72), and Professor of Zoology and Comparative Ana-

tomy in University College, London ('74). In '76, Professor Lankester prosecuted the spirit-medium Slade. He has taken a prominent part in the defence of scientific experiments on live animals, in the discussion of University reform, and in the advocacy of State endowment of scientific research.

Lansdowne, Henry Charles Keith Fitz-Maurice, 5th Marquis of (creat. 1784), eldest son of the 4th Marquis by the Hon. Emily Jane, daughter of the Comte de Flahault and the Baroness Keith and Nairne, was b. 1845; succeeded his father '66. Was Under-Secretary for War (April '72 to Feb. '74), and Under-Secretary India Office (May to Aug. '80); was Governor-General of Canada '83-8. His appointment was particularly popular with the French Canadians, owing to the fact that his lordship's mother was a French lady. Lord Lansdowne was invited to join the second Salisbury administration on the resignation of Lord Randolph Churchill. The invitation was, however, declined. On the retirement of Lord Dufferin from the Governor-Generalship of India, in '88, Lord Lansdowne was appointed his successor.

Law. For important cases occurring during '91, see under Apprentice, Banking, Bankruptcy, Berkeley Peerage, Betting, Bill of Exchange, Bill of Sale, Breach of Promise, Clubs, Company Law, Coroners' Inquiries, Criminal Prosecutions, Custody of Children, Dishorning Cattle, Distress for Rent, Divorce, Ecclesiastical Law, Election Law, Employers' Liability, Flats, Hotel-keepers' Liability, Husband and Wife, Illegitimacy, Income Tax, Insurance Law, Intimidation, Landlord and Tenant, Libel, Licensing Acts, Lunacy Inquiry, Married Women's Property Act, Master and Servant, Merchandise Marks Act, Money Lending, Negligence, Next-of-Kin, Agents, Parliamentary Bar, Petitions to Parliament, Privilege of M.P.'s, Settled Land Acts, Solicitors, Stock Exchange Law, Timber, Trustees, Wards of Court, Weights and Measures, Wills.

Lawn Tennis. Major Walter Wingfield, late of the 1st Dragoon Guards, must be looked upon as the pioneer of lawn tennis in this country, and it may safely be conceded that no pastime ever more rapidly made its way into general favour. The gallant officer first introduced the game some sixteen years ago, under its classical appellation of *Sphairistiké*. An Association has been formed, consisting of recognised lawn tennis associations and clubs willing to conform to the rules, for the purpose of advancing the interests of the pastime generally throughout the United Kingdom. The following are amongst the leading events decided in '91. The Queen's Club Covered Court championships were decided in the first week of April, and terminated as follows:—Gentlemen's singles, final, Mr. H. S. Barlow beat Mr. H. A. B. Chapman by three sets to two; four-handed championship, final, Messrs. H. S. Mahony and J. H. Crispe defeated Messrs. H. Chipp and J. Baldwin by three sets to love, but this pair were beaten by the holders (Messrs. H. S. Scrivener and G. W. Hillyard), by three sets to one; ladies' championship, Miss M. Shackle beat Miss Wray by two sets to love, and gained the title by similarly defeating Miss Jacks (the holder). An entry of twelve was obtained for the Covered Court Championship at Hyde Park in the second week of April, and in the third round of the

All-Comers' Singles. Mr. J. H. Crispe beat Mr. Chapman, and Mr. E. G. Meers defeated Mr. H. S. Barlow. Mr. Crispe retired in the final, and consequently Mr. Meers met Mr. E. W. Lewis (the holder), but the latter again proved equal to the occasion, and won by three sets to love. It is a singular fact that since this gentleman won the championship in '87, he has not lost a set to any of his opponents.—In the Queen's Bench Division on April 23rd, a case that arose out of the **Cheltenham** tournament of '90 was brought to a close before Mr. Justice Hawkins and a special jury. The action was brought by Mr. H. Webb and Mr. R. Webb against Capt. G. R. Taylor, Mr. J. T. Agg-Gardner, General Houghton, and Mr. E. J. C. Studd, the committee of the tournament, to recover damages (claim £3000) for breach of contract in not holding the tournament in the Montpellier Gardens. The defence was that the courts were not in a fit condition to stand a five days' tournament. A mass of evidence was produced on each side. Mr. Lockwood, Q.C., Mr. J. V. Austin, and Mr. H. W. W. Wilberforce appeared for the plaintiffs; and Mr. R. T. Reid, Q.C., and Mr. Cagney for the defendants. In summing up, his lordship said that the damages claimed were exorbitant and unjustifiable. The jury found for the defendants, and his lordship gave judgment accordingly.—The **Irish** championship meeting at Dublin was fixed for the last week in May, but owing to unfavourable weather this fixture had to be extended over the first Monday in June. In the final round of the **All-Comers' Singles**, Mr. Pim beat Mr. Stoker by three sets to love, but was in turn similarly beaten in the championship round by Mr. E. W. Lewis (the holder). Messrs. Lewis and D. G. Chaytor defeated Messrs. Mahony and Boyd in the final of the **All-Comers' Doubles**, but in the championship round they were beaten by Messrs. Pim and Stoker (the holders) by three sets to two. Mr. Chaytor and Miss Martin defeated Mr. Greene and Miss McClintock by three sets to one in the final for the ladies' and gentlemen's doubles; and Miss Pope and Miss Jackson were beaten by Miss Martin and Miss Stanwell by two sets to one in the final of the ladies' championship doubles. At the **Scottish** championship gathering, held in Edinburgh in the middle of June, Mr. A. B. Carvosso beat Mr. A. Thomson in the final of the gentlemen's singles, but in the championship cup round Mr. de S. H. Browne (the holder) defeated him by three sets to love. Messrs. Watson and Fuller beat Messrs. Hillier and Hine in the final of the gentlemen's doubles, and in the cup round also defeated Messrs. Browne and Horn (the holders). Miss Corder beat Miss Jones in the final of the ladies' singles, but on meeting Miss Jackson (the holder) in the cup round she was defeated by two sets to one. At the **Northern** championship re-union, held at Manchester about the same time, the gentlemen's singles fell to Mr. W. Baddeley (Kent), the ladies' singles to Miss Stanwell, the gentlemen's doubles to Messrs. W. and H. Baddeley, the ladies' doubles to Miss Stanwell and Miss "Northern," and the All-England championship mixed doubles to Mr. Kay and Miss Jackson. A few days later the **Oxford and Cambridge** matches took place at Queen's Club, West Kensington, where the Dark Blues won the singles, whilst the doubles were credited to the Light Blues. The **Welsh** championship meeting was held towards the close of the same

month at Roath, Cardiff, and in the final for the gentlemen's singles, Mr. Barlow beat Mr. Mahony by three sets to two, whilst Miss Pope defeated Miss M. Sweet-Escott in the final for the ladies' singles by two sets to one. Some grumbling was occasioned over an unusually early draw being made for the All-England championships, and it was said that had the practice pursued prior to '90 been adopted, both Mr. Beach, the famous American player, and Mr. D. Davy, the Yorkshire champion, would have been amongst the competitors. The courts at Wimbledon were in splendid condition, and some excellent play was witnessed in the course of the competitions. Mr. W. Baddeley beat Mr. Pim in the final of the **All-Comers' singles** by three sets to one, and Mr. W. J. Hamilton (the holder) retiring, the first named was awarded the championship. The brothers Baddeley also defeated Messrs. E. Renshaw and H. S. Barlow in the final of the gentlemen's doubles by three sets to two, and then beat Messrs. Pim and Stoker (the holders) in the championship round by three sets to one. Miss Dod beat Miss Hillyard by two sets to love in the final for the ladies' singles, and Miss L. Rice (the holder) retiring, the first mentioned became **lady champion** for the year, and repeated her victories of '87 and '88. On July 18th, the Queen's Club open tournament, which embraces the London championships, was brought to a close, and in the singles challenge cup round Mr. Barlow beat Mr. Pim, the challenger, by three sets to one, and retained the title. In the gentlemen's open singles for the Queen's Cup Mr. Pim beat Mr. Mahony; the two last named divided the doubles with Messrs. W. and H. Baddeley, the light becoming too bad for play. Miss Shackle defeated Miss Jacks (the holder) by two sets to one in the final of the ladies' open singles, and became **lady champion** of London; and the same lady took the Queen's Cup by similarly defeating Miss Legh in the final of the ladies' club singles.

Lawrance, Sir John Compton, whose elevation to the Bench in the place of Mr. Justice Field took place Feb. '90, was b. 1832; called to the bar at Lincoln's Inn '59, and took silk '87, being elected Bench of his Inn in '79. **Recorder of Derby** for the last ten years. **Represented** in the Conservative interest, S. Lincolnshire 80-85, and the Stamford division since '85. Was leader of the Midland Circuit for some years. The new judge was sworn in before the Lord Chief Justice, thus reviving a custom of great antiquity.

Lawson, Sir Wilfrid Bart., was b. at Brayton Hall, Cumberland, Sept. 4th, 1829, and succeeded to the baronetcy on the death of his father, who was a gentleman of strong temperance and anti-slavery principles. Returned in '59 as member for Carlisle, and lost his seat for that borough in consequence of the introduction into the House of Commons of his "Bill for the Legislative Suppression of the Liquor Traffic" on March 4th, '64. He was, however, again returned in '68 for the same city, which he continuously represented till the general election of '85, when, Carlisle becoming a one-member constituency, he stood for the Cocker-mouth Division of Cumberland, but was defeated by ten votes. At the general election in the following year he was returned for that division by a large majority. Sir Wilfrid Lawson has thrice successfully

proposed his **Local Option** (*q.v.*) Resolution. Elected **President of the United Kingdom Alliance** on the death of Sir W. C. Trevelyan. He is a familiar figure in the House of Commons, where, as in the provinces, he is very popular. During '91 Sir Wilfrid has delivered many political and temperance speeches.

Lawyers Deceased (Dec. 1st, '90—Nov. '91). See OBITUARY.

Layard, Rt. Hon. Sir Austen Henry, G.C.B., was b. 1817, and commenced his career as correspondent of a London paper at Constantinople. With the assistance of Sir S. Canning, in '45 he commenced to make the series of **discoveries of Assyrian antiquities**, of which he gave a most interesting account in his well-known works "**Nineveh and its Remains**" ('49) and "**Monuments of Nineveh**" ('49-'53). Mr. L. subsequently abandoned Oriental research for diplomacy. He was **Under Sec. for Foreign Affairs** for a short time in Lord Russell's first administration ('52), when he sat as **member for Aylesbury**. During the **Crimean War** Mr. L. proceeded to the scene of hostilities to ascertain the condition of the British troops. He subsequently proceeded to **India**, to ascertain for himself the causes of the outbreak of the Mutiny, in '57. He was returned in the Liberal interest for **Southwark**, '60 (re-elected '66 and '68). He was **Under Sec. for Foreign Affairs** '61-6, and was **Chief Commissioner of Works** in Mr. Gladstone's first administration. In '69 he was appointed **Ambassador at Madrid**, and in '77 was sent as our plenipotentiary to that city. A bust of Sir H. L. was presented to the trustees of the British Museum by a distinguished gathering of subscribers (June 11th, '91). He is President of the Huguenot Society.

Laymen, House of. A House of Laymen for the Province of Canterbury assembled for the first time with the Houses of Convocation at the opening of the Parliament of 1886. It is composed of ten representatives from the diocesan conferences of London, six each from Winchester, Rochester, Lichfield, Worcester, and four each from the remaining dioceses of the province. To the representative body so formed the Primate may add ten laymen by nomination. Some dissatisfaction has been expressed in both Provinces as to the constitution of the House; and a revision of its constitution is pending, and will precede the formation of a similar House for the Northern Province. **Chairman**, Lord Selborne; **Vice-Chairman**, Mr. G. A. Spottiswoode; **Secretary**, Mr. J. Larcombe. The first sitting took place Feb. 17th, 1886, when rules of procedure were adopted, the most important being that the procedure of the House of Commons should be as far as practicable followed. The House of Laymen is bound to avoid discussions upon doctrine. Like Convocation, the House of Laymen is elected with every fresh Parliament.

Members of the House of Laymen. [Names marked thus * were members of the last House of Laymen.] **Canterbury**—*Earl Stanhope, *Viscount Cranbrook, *Lord Northbourne, Lord Harris. **London**—*Hon. T. H. W. Pelham, *J. A. Shaw-Stewart, *G. A. Spottiswoode, *J. G. Talbot, M.P., *Eugene Stock, P. V. Smith, F. A. Bevan, L. T. Dibdin. **Winchester**—*Earl of Selborne, *Lord Montagu, Lord Basing, Rt. Hon. George Cubitt, M.P., *Melville Portal, Frank Willan. **Bangor**—Lord Penrhyn, T. Pritchard, Hon. W. E. Sackville-West, J. Lloyd Griffith. **Bath** and

Wells—Sir R. H. Paget, Bart., M.P., *C. I. Elton, Q.C., M.P., *E. J. Stanley, M.P., John Francis Fortescue Horner. **Chichester**—*Sir W. Barttelot, Bart., C.B., M.P., *Hon. Justice Grantham, *F. Barchard, *W. E. Hubbard, Ely—*A. Sperling, *O. C. Pell, Professor Stokes, M.P., C. P. Allix. **Exeter**—Lord Clinton, *Sir J. H. Kennaway, Bart., M.P., *J. Shelly, *Lieut.-Col. White, Thomson, Gloucester and Bristol—*Sir J. E. Dorington, Bart., M.P., J. Harvey, *W. K. Wait, B. St. John Ackers. **Hereford**—*Sir O. Wakeman, Bart., *Sir J. R. Bailey, Bart., M.P., *J. Rankin, M.P., J. Maitin Southwell. **Lichfield**—*Earl of Hariowby, C. Bill, *C. J. Blagg, *S. Leighton, M.P., *T. Salt, M.P., Major-General Buller. **Lincoln**—*Right Hon. E. Stanhope, M.P., *Sir W. E. Welby-Gregory, Bart., *A. G. Leslie Melville, Sir C. H. Anderson, Bart. **Landaff**—*O. H. Jones, *J. A. Rolis, *J. E. Ollivant, *J. Watson. **Norwich**—Lord Heniker, *H. Rodwell, *S. Hoare, M.P. **Oxford**—Prof. Burrows, *Right Hon. Sir J. R. Mowbray, M.P., *A. W. Hall, M.P., J. H. Wilson. **Peterborough**—*The Duke of Rutland, *W. A. Heygate, *E. P. Monckton, *S. G. Stopford-Sackville. **Rochester**—Sir C. D. Fox, Kt., D. Christopherson, Col. H. de Guay Geary, *Sydney Gedge, M.P., *E. H. L. Penrhyn, *G. B. Richardson. **St. Albans**—*Right Hon. Sir H. J. Selwyn-Ibbetson, Bart., M.P., *James Round, *A. Unwin Heathcote, *H. Hicks Gibbs. **St. Asaph**—*Earl of Powis, *P. P. Pennant, *W. Trevor Parkins, *Sir W. W. Wynne, Bart. **St. Davids**—*Viscount Emlyn, Sir J. T. D. Llewellyn, Bart., *H. Davies-Evans, *W. S. de Winton, R. Raikes. **Salisbury**—*Earl Nelson, *Hon. Sidney Herbert, M.P., *H. B. Middleton, R. Williams, jun. **Southwell**—*H. H. Bamrose, *J. Borough, *F. Wright, *H. E. Thornton. **Truro**—*Earl of Mount Edgumbe, E. Carlyon, R. Foster, C. C. Ross. **Nominated members**—C. T. Dyke-Acland, M.P., Viscount Hardinge, F. Dixon-Hartland, M.P., Lord Norton, Sir R. Temple, Bart., M.P. **York**—It has been resolved by Convocation of the Northern Province to establish a House of Laymen for the Province of York, similar to that of Canterbury. The elections have not yet taken place. It is hoped to secure such an arrangement as will enable the Houses of both provinces, if not to meet simultaneously, at all events to hold consultative meetings.

Lay Readers, Diocesan. To this office, by which laymen are empowered to conduct such extra services within churches as the bishop may approve, and the incumbent may desire, sixteen gentlemen were admitted on March 21st, '91. The Bishop of London conducted the service in St. Paul's Cathedral, and among those who took upon themselves this new office were the Earl of Stamford, Mr. S. Gedge, M.P., Mr. G. A. Spottiswoode, and Mr. Eugene Stock.

Learned Societies. The rapid progress of art and science during the present century has led to the establishment of innumerable societies and institutions for the furtherance of the study of special subjects. A list of these associations would occupy so much space that we are only able to indicate the chief of them. The names in brackets indicate the **Secs.**—Some leading ones, however, are separately noticed, or alluded to under the several sciences. **Anthropological Institute**, 3, Hanover Sq., W. (Cuthbert E. Peek); **British Association for the Advancement of Science**, Burlington House, W.

(President, Sir A. Geikie); **British Archaeological Association**, 32, Sackville St., W. (W. de Gray Birch); **British Medical Association**, 429, Strand (F. Fowke); **Chemical Society**, Burlington House, W. (Prof. Armstrong); **Clinical Society**, 53, Berners St., T. Barlow, M.D.; **Entomological Society**, 11, Chandos St., W.C. (H. Goss); **Geological Society**, Burlington House, W. (J. E. Marr and H. Hicks); **Institution of Civil Engineers**, 25, Great George St., S.W. (J. Forrest); **Institution of Electrical Engineers**, 28, Victoria St., Westminster, S.W. (F. H. Webb); **Institution of Naval Architects**, 5, Adelphi Terrace, W.C. (G. Holmes); **Iron and Steel Institute**, Victoria Mansions, S.W. (J. S. Jeans); **Linnean Society**, Burlington House, W. (B. D. Jackson); **Numismatic Society**, 22, Albemarle St., W. (H. A. Grueber); **Pathological Society**, 53, Bevis St., W. (S. Coupland, M.D.); **Royal Academy of Music**, Tottenham St. (F. Corder); **Royal Archaeological Institute**, 17, Oxford Mansions, Oxford (H. Gosselin); **Royal Asiatic Society**, 22, Albemarle St., W. (Prof. T. W. Rhys-Davids); **Royal Astronomical Society**, Burlington House (E. B. Knobel); **Royal College of Physicians**, Pall Mall, S.W. (Dr. E. Laving); **Royal College of Surgeons**, 40, Lincoln's Inn Fields (E. Trimmer); **Royal Geographical Society**, 1, Savile Row, W. (Henry W. Bates); **Royal Historical Society**, 20, Hanover Sq., W. (P. E. Dove); **Royal Institution**, 21, Albemarle St., W. (Sir F. Bramwell); **Royal Meteorological Society**, 24, Great George St., S.W. (G. J. Symons); **Royal Society**, Burlington House (Prof. M. Foster); **Royal Society of Literature**, 20, Hanover Sq., W. (Percy Ames); **Royal Statistical Society**, 9, Adelphi Terrace, W.C. (J. B. Martin); **Society of Antiquaries**, Burlington House (Hon. H. A. Dillon); **Victoria Institute**, 8, Adelphi Terrace, W.C. (Capt. Petrie); **Zoological Society**, 3, Hanover Sq., W. (P. L. Sclater).

Leaseholders Entranchisement Bill. See SESSION, sect. 81.

Leaseholds. See LANDLORD AND TENANT.

Lecky, W. E. H., was b. in Dublin, 1838, and was educated at Trin. Coll. In his "Leaders of Public Opinion in Ireland" Mr. L. showed strong tendencies towards Irish Nationalism, but since the formulation of Mr. Gladstone's Home Rule policy has distinguished himself by magazine articles written against it. Mr. L. is the author of "History of the Rise and Influence of the Spirit of Rationalism in Europe" ('65); "History of European Morals from Augustus to Charlemagne" ('60); "History of England in the Eighteenth Century" ('78), the completion of which, (vols. vii. and viii.) was published in Oct. '90, and formed the subject of many reviews. Received (June '91) the hon. degree of LL.D. from Cambridge University. Later in the year he issued a collection of poems.

Leeward Islands. The westward section of the Lesser Antilles (so called in distinction from the Windward Islands, with reference to the trade winds). Those which belong to Great Britain are grouped together in one federal colony, and consist of the five presidencies of *Antigua*, *Montserrat*, *St. Christopher*, *Dominica*, and the *Virgin Islands*. The Leeward Islands confederation has representative government, with a Governor, Executive, and General Federal Council. The islands have possessed various forms of government in past

times. The capital and seat of government of the Leeward Islands is *St. John*, Antigua.

Legal Tender. The following are legal tender up to and including the annexed amounts:—

Of the	Gold coins	up to any amount.
	Silver coins	„ „ 2s.
	1d. and ½d. coins	„ 1s.
Mint.	3d. coins (farthings)	„ 6d.

Bank of England notes are legal tender in England and Wales (except by the Bank of England itself), but a creditor cannot be compelled to give change. If a debtor require a receipt, he must prepare it, stamp it, and offer it for signature to his creditor, who by refusal to sign it renders himself liable to a penalty. The actual notes or coins must be produced by the debtor, and offered in payment, otherwise legal tender has not been made.

Legion of Honour. The Instituted under the Republic of France (May 1802), was intended as a reward for military and civil services. There were three ranks—Grand Officers, Commanders, and Legionaries (see ed. '87). On the coronation of Napoleon I., the Grand Officers were divided into two classes—Knights of the Grand Eagle, and Grand Officers. The constitution of the Legion was remodelled by Napoleon III. in '52, and during his reign upwards of 6,000,000 francs were distributed annually amongst the members.

Leighton, Sir Fredk., P.R.A., was b. at Scarborough, 1830. Studied alternately at Rome, Berlin, Frankfurt-on-the-Main, Florence, Paris, and Brussels. His first exhibited work was a large picture of "Cimabue," which, appearing at the Royal Academy ('55), excited much interest. Purchased immediately by the Queen, it was re-exhibited at several exhibitions. Subsequently Mr. Leighton resided at Paris, where he had the benefit of the advice of Ary Scheffer, Robert Fleury, and other French painters. Since his residence in London, whence he returned in '60, Sir Frederick Leighton has been a constant contributor to the Royal Academy, of which he was made an associate ('64), and R.A. ('69). His genius as a painter and sculptor is no less remarkable than his industry, and in '78 he was chosen President of the Royal Academy, in succession to the late Sir Francis Grant. He was knighted on that occasion, and created a baronet in '86. In '88 Sir Fredk. was elected a member of the Royal Society of Painters in Water Colours. He exhibited at the Royal Academy in '81 "Perseus and Andromeda," "The Return of Persephone," and a marble group, entitled "Athlete Struggling with a Python."

Leith Deep Water Dock. In Aug. '91 some details were published of a proposed new deep water dock, the plans having been passed by the Commissioners. It comprises the construction of a sea wall and reclamation of about 54 acres of foreshore, where the dock is to be built 1000 ft. long by 445 ft. wide, having an entrance from the harbour 66 ft. wide, with 13 ft. of water at low water of spring tides on the sill, being 5 ft. lower than the sill of the Albert Dock. This would give a depth of 30 ft. at high water spring tides, and 26 ft. at neaps. The new dock is to be connected with the Albert Dock, the sill of connection being at the same level as the sill of the lock of the Albert. The area is over ten acres, and the berthage will accommodate six Atlantic liners at once. The estimated cost, all told, is £280,000; and the cost

of deepening the channel to the dock is estimated at another £50,000.

Leixoes (Portugal) Harbour. The approaching completion of this harbour was reported in Aug. '91. The Leixoes are a small and isolated group of rocks about three miles to the north of Oporto, and some forty years ago it was definitely proposed, owing to the badness of the Douro bar, to connect them with the shore, and thus form an artificial harbour. On the basis of plans prepared by Senhor Nogueira Soares, an engineer, tenders were invited in '83, and that of MM. Dauderni, Duparchy, & Co., the only firm who appeared, was accepted at £2000 below the maximum, which was fixed at a million sterling. The port is of large capacity, has good anchorage, and can easily be entered by vessels of 23 ft. draught. It is the only place of refuge on this coast between Vigo Bay and Lisbon.

Leo XIII. See POPE, THE.

Leopold II., King of the Belgians, was b. at Brussels, 1835, and is the son of King Leopold I., whom he succeeded. His Majesty has travelled much in Europe, Asia Minor, and Egypt. He is the head of the **International Association**, whose object is to open to Europeans the Congo and its tributaries. He was the friend of Gordon, whom he had taken into his employ, but was deprived of his services when the latter was summoned from Brussels to go to the Soudan. King Leopold married, in '53, the Archduchess Maria of Austria, by whom he has had two daughters and one son, the Duke of Brabant, who died when two years old.

Leslie, George Dunlop, R.A., son of the late C. R. Leslie, R.A., was b. 1835. He first exhibited at the British Institution in '57, and has been a constant contributor to the Royal Academy since that date. A.R.A. ('68), R.A. ('76). Mr. Leslie's aim in art has always been to paint pictures from the sunny side of English life, and as much as possible to render them cheerful companions to their possessors.

Lesseps, Ferdinand de, was b. at Versailles, in 1805. At the age of twenty-four he entered the French diplomatic service as attaché at Lisbon, and subsequently held consular appointments at Barcelona, Tunis, and Alexandria. In '41, while detained in quarantine at Port Said, his great project for cutting a canal through the Isthmus of Suez dawned upon him. During his eight years' residence in Egypt he dreamed over this scheme, but it was not until Abbas Pasha acceded to power in '54 that the project received practical support. M. Lesseps, however, ultimately triumphed, for in '59 the first sod of the canal was turned, and on Aug. 15th, '69, the waters of the Red Sea and the Mediterranean met. He was created a K.C.S.I. by Queen Victoria, and received the honorary freedom of the City of London ('70). The French Academy awarded him a prize of 5000 francs for his history of the canal published in '76. In '81 he was elected **President of the French Geographical Society**. His endeavours to cut a canal through the Isthmus of Panama have collapsed owing to lack of funds.

Letters of Distinction; See ABBREVIATIONS, LIST OF.

Lewis, George, the celebrated London solicitor, was b. in 1833. He first made his mark in conducting the prosecution of the directors of the Overend and Gurney's bank,

and many other mercantile and financial prosecutions were afterwards put into his hands. The prosecution of Madame Rachel the restorer of female beauty, and Dr. Slade the medium, are among the cases which he superintended as a solicitor. His greatest undertaking was, perhaps, the preparation of the case for Mr. Farnell and the Irish party, for whom he was solicitor at the **Farnell Commission**. He was engaged on behalf of the defendants in the "Baccarat" trial (June '91).

Libel Law Amendment Act, introduced by Sir A. Borthwick, and as the 51 & 52 Vict. c. 64 received royal assent Dec. 24th, 1888. It repeals sect. 2 of the Newspaper Libel and Registration Act, '81, and enacts (sect. 3) that a **fair and accurate report** in any newspaper of proceedings publicly heard before any Court exercising judicial authority should, if published contemporaneously with such proceedings, be privileged; but nothing in the section is to authorise the publication of any blasphemous or indecent matter. Section 4 enacts that a **fair and accurate report** published in any newspaper of the proceedings of a public meeting, or (except where neither the public nor any newspaper reporter is admitted) of any meeting of a vestry, town council, school board, board of guardians, board or local authority formed or constituted under the provisions of any Act of Parliament, or of any committee appointed by any of the above-mentioned bodies, or of any meeting of any commissioners authorised to act by letters patent, Act of Parliament, warrant under the Royal Sign Manual, or other lawful warrant or authority, select committees of either House of Parliament, justices of the peace in quarter sessions assembled for administrative or deliberative purposes, and the publication at the request of any Government office or department, officer of state, commissioner of police, or chief constable, of any notice or report issued by them for the information of the public, shall be **privileged**, unless it shall be proved that such report or publication was published or made maliciously: but nothing in the section is to authorise the publication of any blasphemous or indecent matter: the protection intended to be afforded is not to be available as a defence in any proceedings, if it shall be proved that the defendant had been requested to insert in the newspaper in which the report or other publication complained of appeared a reasonable letter or statement by way of contradiction or explanation of such report or other publication, and had refused or neglected to insert the same: and nothing contained in the section is to be deemed or construed to limit or abridge any privilege now by law existing, or to protect the publication of any matter not of public concern, and the publication of which is not for the public benefit. For the purposes of this section "**public meeting**" is defined to mean any meeting *bona fide* and lawfully held for a lawful purpose, and for the furtherance or discussion of any matter of public concern, whether the admission thereto be general or restricted. Sect. 5 empowers a judge, upon an application by or on behalf of two or more defendants in respect to the same, or substantially the same, libel brought by one and the same person, to make an order for the **consolidation of such actions**, so that they shall be tried together; and in a consolidated action of the kind the jury are to assess the whole amount of the damages, if

any, in one sum, but a separate verdict is to be taken for or against each defendant, and if the verdict is against the defendant or defendants in more than one of the actions so consolidated, the jury are to apportion the amount of damages, and the judge, if he award the plaintiff costs, shall apportion such costs as he may deem just, between and against those defendants. The defendant may give in evidence, in mitigation of damages, that the plaintiff has already recovered or sued for damages, or has received, or agreed to receive, compensation in respect of a libel or libels to the same effect as that for which the action has been brought. The section of the Act of '81 requiring the *fiat* of the Attorney-General before a criminal prosecution for libel can be commenced is repealed, and instead thereof it is enacted that such criminal proceedings shall not be instituted without the order of a judge at chambers being first had and obtained, such application to be made on notice to the person accused, who is to have an opportunity of being heard against it. A person charged with libel before any court of criminal jurisdiction, and the husband and wife of such person, are to be competent but not compellable witnesses, on every hearing at every stage of the case.

Libel Actions in '91. The *cause célèbre* of '91 was, beyond doubt, that of Sir William Gordon-Cumming v. Wilson and others. The case, which was heard before the Lord Chief Justice and a special jury, in the Queen's Bench Division, occupied seven days, the verdict being given on June 9th. The action was brought by the plaintiff (a baronet, and a lieutenant-colonel in the Scots Guards), against Mr. and Mrs. Lycett Green, Mrs. Arthur Wilson, Mr. Arthur Stanley Wilson, and Mr. Berkeley Levett, for slander. The following "statement of facts," as drawn up by General Owen Williams, and signed by him and Lord Coventry, was put in in the course of the trial:—"For the Doncaster race meeting of 1890, the following party were the guests of Mr. and Mrs. Arthur Wilson at Trauby Croft: His Royal Highness the Prince of Wales, Hon. H. Tyrwhitt Wilson, the Earl and Countess of Coventry, the Earl of Craven, Lord Edward Somerset, Lady Brougham and Vaux, Count Henry Lützow, Captain the Hon. A. Somerset, Sir William Gordon-Cumming, Lieut.-General and Mrs. Owen Williams, Mr. and Mrs. Lycett Green, Mr. Christopher Sykes, Miss Naylor, Mr. Berkeley Levett, Mr. K. Sassoon, and Mr. J. Wilson (the son of the house). On the evenings of Sept. 8th and 9th, the party played at baccarat. After returning from the races on Sept. 10th, Mr. Lycett Green (having previously taken counsel with his father on the matter) made a statement to Lord Coventry to the effect that his brother-in-law, Mr. J. Wilson, had told him on the evening of the 8th, that Sir William Gordon-Cumming systematically placed a larger stake on the table after the card had been declared in his favour than he had originally laid down, and when the cards were against him he frequently withdrew a portion of his stake, by these means defrauding the bank. This conduct had also been noticed by Mrs. Arthur Wilson (who informed her husband of what she had seen), Mrs. Lycett Green and Mr. Levett having been also made acquainted with the facts. It was agreed that they should all carefully watch the play on the following night, when Sir William Gordon-

Cumming was again observed most distinctly to repeat the same practices. Lord Coventry, on hearing this, consulted General Owen Williams as to what steps should be taken in the matter. Mr. Lycett Green repeated his statement to both of them, in the presence of Lord Edward Somerset, Captain Arthur Somerset, and Mr. J. Wilson, and added, that those who had watched were quite prepared to swear to the accuracy of the report. The matter having thus been placed more or less in the hands of Lord Coventry and General Owen Williams, they decided that it was imperative upon them to inform the Prince of Wales immediately of what had occurred, and, after mature deliberation, they agreed to suggest to his Royal Highness that, for the sake of all concerned, and for society at large, it was most desirable that the circumstances should not be allowed to transpire outside the immediate circle of those already acquainted with the facts; but as a condition of silence, Sir William Gordon-Cumming must be made to sign an undertaking never again to play cards for the rest of his life. His Royal Highness having been placed in possession of all the details of the case, and this suggestion being made to him, agreed that such a solution was possible. Lord Coventry and General Williams then went to Sir William Gordon-Cumming, and informed him that he was accused of cheating at baccarat. This charge he denied emphatically, and begged to be allowed to see the Prince of Wales, who consented to see him, provided Lord Coventry and General Owen Williams were present. The interview took place. Sir William again denied the truth of the accusation, but was told it was utterly useless to attempt a denial in the face of the distinct evidence of so many totally unprejudiced persons, whose interest it was that no scandal should have happened in the house. The Prince of Wales afterwards saw Mr. Lycett Green, Mr. A. Wilson, Mr. Levett, Mr. J. Wilson, Lord Edward Somerset, Captain Arthur Somerset, and Mr. Sassoon, all of whom were acquainted with the circumstances of the case, and listened to their verification of the account which had been already given him. It was pointed out to these gentlemen that an *exposé* would mean a horrible public scandal, and as it was most expedient that this should, if possible, be avoided, they were asked whether they would be willing to keep silence with regard to what had taken place, on condition that Sir William Gordon-Cumming signed an undertaking never again to play cards for the rest of his life. To this they all agreed, and declared that they would do their utmost to prevent the matter from transpiring. Lord Coventry and General Williams then saw Sir William Gordon-Cumming, and explained that the only possible condition on which silence could be maintained would be that he should sign the undertaking before mentioned. At the same time, they clearly pointed out that his signature to this would be a distinct admission of his guilt. Quite understanding, he signed the document, which was afterwards signed also by the gentlemen who were cognisant of the facts, and then given to the safe keeping of his Royal Highness the Prince of Wales. Sir William Gordon-Cumming left Trauby Croft early the following morning. These circumstances were not known to Lady Coventry, Lady Brougham, Mrs. Owen Williams, Miss Naylor, Lord Craven,

Count Henry Litzow, nor Mr. Christopher Sykes, all of whom were staying in the house at the time. The above is an accurate statement of all the facts of the case.—(Signed) COVENTRY, OWEN WILLIAMS." The undertaking referred to above was in the following terms:—"Tranby Croft, Sept. 10th, '90. In consideration of the promise made by the gentlemen whose names are subscribed to preserve silence with reference to an accusation which has been made in regard to my conduct at baccarat on the nights of Monday and Tuesday, Sept. 8th and 9th, '90, at Tranby Croft, I will, on my part, solemnly undertake never to play cards again as long as I live. (Signed) W. Gordon-Cumming; subscribed to by Albert Edward P., Coventry, Owen Williams, Arthur Wilson, Arthur Somerset, Edward Somerset, E. Lyett Green, A. Stanley Wilson, Berkeley Levett, R. D. Sassoon." On the part of the plaintiff it was alleged that he was coerced into signing this undertaking. As to its being an admission of guilt it was never intended as such by him, while it could not have been so regarded by others, or those acquainted with the matter would have been compelled to communicate with the commander-in-chief as to the plaintiff's conduct. The anxiety of those who induced the plaintiff to sign the paper was, it was suggested, not their conviction of his guilt, but the result of an unworthy fear lest it should come before the public that the Prince of Wales had played baccarat. The plaintiff, who was examined at considerable length, absolutely denied the alleged cheating, and it was argued on his behalf that those who made the charge might easily have been mistaken, while there was no reason why a man of fortune like Sir W. Gordon-Cumming, enjoying as he did the friendship of the Prince of Wales, should be guilty of the contemptible conduct suggested against him. In the course of the case the Prince of Wales was called, and stated in reply to the jury that he saw no foul play, but that the charges against Sir W. Gordon-Cumming seemed so strongly supported by those who brought them forward that he felt he had no other course but to believe what he was told. For the defence it was contended that there was overwhelming evidence that Sir W. Gordon-Cumming was guilty of the conduct alleged, and that until the matter had become public he was content to live under the imputation which he had practically admitted in the document he had signed. Five witnesses had stated that they saw the plaintiff cheat, and three others—the Prince of Wales, Lord Coventry and General Williams—having heard the witnesses, were satisfied that the charges were true. The jury, after the Lord Chief Justice had summed up, returned a verdict for the defendants, and judgment was entered accordingly.—In an action brought by an unmarried woman for damages for slander, such slander consisting of an imputation upon her chastity, a verdict was entered for the plaintiff for £10. The Court of Appeal, however, held that as the special damage alleged was due not to the slander itself, but to the unauthorised repetition of it by others, judgment must be entered for the defendant. Lord Justice Kay in the course of the case (*Speight v. Gosnay*, Court of Appeal, Jan. 20th, '91) expressed regret that under the law an imputation upon the chastity of an unmarried girl should not in

itself be actionable. This point was met subsequently by the Slander of Women Bill (*g.v.*) passed into law by Parliament.—In the Queen's Bench Division (April 25th, '91) Lord Penrhyn sued the *Licensed Victuallers' Mirror* for damages for libel. The plaintiff alleged that the newspaper in question had accused him of dishonesty in connection with the running of his race horses. After a good deal of evidence had been taken, the defendants withdrew all imputations against the persons connected with Lord Penrhyn's stables at Exton, stating that they had never had any wish to impute anything derogatory to the plaintiff; but merely to comment upon what they believed at the time to have been the in and out running of some of his horses. Admitting that they were entirely mistaken, they agreed to a verdict for Lord Penrhyn for £100 and costs. This was accepted, it being stated on behalf of the plaintiff that half the amount would go to the Rous Memorial Hospital and the other to the Bentinck Memorial Fund. — In *Tuppenney v. New* (Queen's Bench Division, June 17th, '91), the plaintiff sought to recover damages for libel from the Rev. C. New, a Congregational minister at Hastings. The plaintiff was a deacon of the defendant's church, and the alleged libel consisted of letters written by Mr. New with reference to the "most cruel treatment of Mrs. Tuppenney" by her husband, which letters, in addition to being sent to the plaintiff, were "published" by being read to the deacons of the church. The defence was that it was the defendant's duty as a minister to intervene between the plaintiff and his wife, and that the publication to the deacons was privileged. In the result the defendant withdrew all imputations upon the plaintiff, and a juror was withdrawn.—At Dublin (June 24th, '91), Mr. H. Campbell, M.P., private secretary to the late Mr. Parnell, recovered £250 damages for a libel in the *Cork Herald*. The words complained of were the following:—"All the others were on plank beds with O'Brien and Dillon, when Mr. Henry Campbell was discharging the degrading duty of hiring houses for the immoral purposes of his master."—The slander action of the *Royal Aquarium Co. v. Parkinson*, ended June 26th, '91, subject to a point of law, in a verdict for the plaintiffs for £250. The defendant is a member of the London County Council, and when the plaintiffs applied for a dancing licence, he stated that a minuet performance at their place of entertainment was of an indecent and improper character. Mr. Justice Hawkins held that the occasion was privileged, but left the question to the jury as to whether there was malice in the speaking of the words complained of. The jury found that there was malice, and the question whether the members of a County Council are absolutely privileged, irrespective of malice, was reserved.—In the Court of Session, Edinburgh (July 21st, '91), Mr. Sexton, M.P., sued the proprietors of the *Scotsman* for £5000 damages for libel. The alleged libel was contained in letters published in the *Scotsman*, and written by John D. Crockett, of Belfast, to Mr. Sexton, complaining that the latter had, in a question put to the Irish Secretary in the House of Commons, insinuated that he had insulted Irish girls at an eviction on the Ponsonby estate. Mr. Crockett said that there was "as much truth in that insinuation as there could be in the supposititious rumour

that Mr. Sexton had been intoxicated, and suffered from *delirium tremens*." The case for the plaintiff was that the letter represented that Mr. Sexton was of intemperate habits, while for the defence it was denied that it bore any such construction, being written simply to point out what Mr. Sexton's feelings would be if a charge of that sort had been made against him by Mr. Crockett. In fact, it was pleaded, it was simply a case of Mr. Crockett paying Mr. Sexton back in his own coin.—The jury found a verdict for the defendant.—The Court of Appeal (April 21st, '91), gave an important decision in the case of **Bonnard v. Perryman**. The action was one of libel, and the plaintiff sought to prevent further publication of the alleged libellous statements which formed the subject of the suit. The Court of Appeal held that it could only interfere by injunction before the trial of actions in cases which were so clear that any jury would say the matter complained of was libellous. In this case, as it was considered that the statements complained of, together with the defendant's plea of justification, raised a question which should be tried by a jury, the Court declined to grant the injunction asked for.—An important decision as to what constitutes a privileged communication, was raised in the case of **Stuart v. Bell** (Court of Appeal, May 5th, '91). It was an action originally brought at Leeds assizes, by the plaintiff Ronald Stuart, formerly a valet to Mr. H. M. Stanley, the African explorer, to recover damages for slander from Mr. Thomas Bell, who was then Mayor of Newcastle. It appeared that while Mr. Stanley was on a visit at the Mansion House at Newcastle, the Chief Constable of the town received from the Chief Constable of Edinburgh a communication to the effect that a lady who had been stopping at the same hotel as Mr. Stanley and his servant, Stuart, had lost a gold watch from her bedroom, and that suspicion fell upon Stuart. The Chief Constable of Newcastle sent this letter to the Mayor, who read it, and then told Mr. Stanley what it stated. This was the slander complained of. Two or three days later, Mr. Stanley discharged the plaintiff, on the ground that he could not keep in his employ a person upon whom suspicion of dishonesty had fallen. This discharge, and the inability of the plaintiff to obtain another situation, occasioned the special damage which he alleged he had sustained by reason of the slander. At the trial at Leeds, the judge held that the communication made by the Mayor of Newcastle to Mr. Stanley was not privileged, and the jury gave the plaintiff £250 damages. The Court of Appeal, however, by a majority, set aside this finding, and entered judgment for the defendant, with costs. Lord Justice Lindley held that it was the defendant's moral and social, though not his legal, duty to communicate to Mr. Stanley the communication which he had received; in other words, that the occasion was privileged. He found, also, that there was no evidence of malice. The learned judge added: "The result may seem hard on the plaintiff, who has unquestionably been injured. It was his misfortune to fall under suspicion, and to be dismissed by his master without inquiry. But this is no reason for holding the defendant responsible for this misfortune, and he cannot be so held without limiting privileged occasions to such an extent as to render the law applic-

able to them opposed to the general interests of society, instead of being in harmony with them, nor without violating the important doctrine which has frequently been asserted by judges of the highest eminence—I mean the doctrine that the law has not restricted the right to make such communications within any narrow limits." Lord Justice Kay concurred, but Lord Justice Lopes took an opposite view, holding that the act of the defendant was officious and uncalled-for, and that it ought not to be regarded as privileged.—At the Guildhall (Nov. 2nd, '91), Signor Ciampi, a professional opera singer, sued the *Daily Telegraph* for libel. The defendants' musical critic had spoken of the plaintiff as one who could not now be considered a singer, though he "dealt with Zerlina's loutish lover according to the accepted humour of a true Italian buffo." The plaintiff alleged that this statement had damaged him professionally, and that it was written with malicious intention. For the defendants it was contended that the criticism was an honest and *bona fide* expression of opinion. The jury found a verdict for the plaintiff for one farthing damages, and Mr. Justice Wills deprived the plaintiff of his costs.

Liberals. See ENGLISH POLITICAL PARTIES.

Liberal-Unionist Association. Formed to resist the Home Rule policy adopted by Mr. Gladstone in 1886, and embodied in his two projects, the "Government of Ireland" and "Land Purchase (Ireland)" Bills. The Association has spread its organisation over the whole of the United Kingdom, and has upwards of two hundred branches in England and Wales, besides those in Scotland and Ireland. For the purposes of organisation a representative body known as the Liberal-Unionist Council has been called into being, and consists of ninety-four members, the majority of whom are elected by the branch associations in all parts of the United Kingdom, and the rest having seats on the Council by virtue of their official connection with the party both in and out of Parliament. Chairman of the Association and of the Liberal-Unionist Council, the Marquis of Hartington, M.P. Offices, 31, Great George St., Westminster, S.W. Sec., John Boraston.

Liberation Society. See DISESTABLISHMENT.

Liberia. A negro republic on the Grain Coast of West Africa. Area about 14,300 sq. m., pop. 1,068,000, including 18,000 civilised Americo-Liberians and 1,050,000 half wild aborigines. Capital, Monrovia, pop. 3400. Revenue ('89), £17,000; expenditure, £33,000. In '71 a debt of £100,000 was contracted in England, on which no interest has been paid since '74. Liberia was founded in '82 by American philanthropists for the settlement of freedmen. It was declared independent in '47, was recognised as a sovereign state by Great Britain in '48, and by the United States in '61. The constitution is on the model of that of the United States. The President is elected for two years, the House of Representatives (13 members) for two years, and the Senate (8 members) for four years.

Liberty and Property Defence League, The (motto "Self help *versus* State-help"), was established in 1882 for resisting over-legislation, for maintaining freedom of contract, and for advocating individualism as opposed to socialism, entirely irrespective of party politics. Federated with the League are 130 Defence and

Protection Societies, representing nearly every industry in the kingdom. The League publishes numerous pamphlets by well-known writers upon the various subjects of Individualism. **Chairman**, Earl of Wemyss. **Central offices**, Westminster Chambers, S.W. **Sec.**, W. C. Crofts. **Branches** exist in all the great commercial and industrial centres in England, Scotland and Ireland, also in America, Australia, India, France, and Italy.

Libraries. The special feature of our English library system has been the work done under the **Public Libraries Acts** (*q.v.*). These Acts date from 1850, the Act of that year having been followed by Acts extending the principle to Scotland and Ireland and amending matters of detail. The Acts enable towns, local board districts, and parishes to establish libraries, to be maintained by a rate not exceeding *1d.* in the *£*. The capitals of the three kingdoms have been singularly backward in adopting the Acts. Dublin only established two libraries, without adopting the Acts, in '84. Edinburgh only adopted them in '86, when Mr. Carnegie (*q.v.*) offered a sum of £50,000 on condition of their adoption. London until quite recently had only adopted them in a single parish of Westminster, but in '85-6 Wandsworth, Fulham and Lambeth followed suit, and in '87-8 they were adopted in eleven other Metropolitan districts. Of the older libraries of the country the most important, of course, is that of the **British Museum** (*q.v.*), which is only exceeded in extent by the Bibliothèque Nationale at Paris. It possesses over 1,450,000 volumes and 100,000 MSS. and charters. It is entitled under the Copyright Acts to a copy of every work published in this country—a privilege which is also enjoyed by the Bodleian Library, Oxford (425,000 vols. and 30,000 MSS.), and the Cambridge University Library (225,000 vols. and 5000 MSS.). The Advocates' Library, Edinburgh (285,000 vols. and 3000 MSS.) and the library of Trinity College, Dublin (215,000 vols. and 2000 MSS.). Valuable and extensive libraries are attached to the other universities, to the colleges of Oxford and Cambridge, and to most cathedrals. There are a number of important professional libraries in London, Dublin, and Edinburgh, and a few endowed libraries, such as the Chetham at Manchester (1653). The concentration of literary and intellectual interests in London has naturally given birth to a large number of special libraries, many of which are open to the student upon proper introduction. The more important of them are included in the following alphabetical list of the principal London libraries:—Admiralty (25,000 vols.); Bethnal Green Free Library, London Street, Bethnal Green, E. (20,000), open 10 to 5 and 6 to 10; Chemical Society (8000); Church House (10,000); College of Preceptors (7000); Colonial Office (12,000); Corporation, Guildhall (85,000), open free; Dr. Williams' (30,000); Foreign Office (70,000); Geological Society (17,500); Gray's Inn (13,000); House of Commons (40,000); House of Lords (30,000); Incorporated Law Society (30,000); India Office (10,000); Inner Temple (37,000); Institute of Civil Engineers (18,000); Lambeth Palace (30,000 and 14,000 MSS.); Lincoln's Inn (45,000); London Institution (70,000, subs.); London Library (100,000, subs.); Middle Temple (32,000); Museum of Practical Geology (20,000); Patent Office (85,000); People's Palace, Mile End Road, E.; Royal Society (50,000); Royal Asiatic Society (13,000); Royal Astro-

nomical Society (8000); Royal College of Physicians (16,000); Royal College of Surgeons (45,000); Royal Colonial Institute (5000); Royal Geographical Society (25,000); Royal Institution (42,000, subs.); Royal Medical and Chirurgical Society (34,000); Royal Society of Literature (8000); Royal United Service Institution (21,000); Russell Institution (18,000, subs.); St. Paul's Cathedral (9000); Zion College (51,000); Society of Antiquaries (21,000); Society of Telegraph Engineers (4000); South Kensington, Educational (43,000); National Art (58,000); Dyce (14,500); Forster (19,000); Royal Statistical Society (26,000); University College (105,000); University of London (11,000); War Office (25,000); Westminster Chapter (11,000).—Further advantage of the Public Libraries Act was taken by various towns during '91. In the provision for popular reading London still offers a striking contrast to Paris, where, beside four important libraries, not including the Bibliothèque Nationale, freely open to the public, the municipality has established a system of popular libraries, of which there are now nearly sixty, with an annual circulation of over a million volumes. The St. Martin's Public Library was opened in Feb. '91 by Mr. Gladstone, who spoke on the growth of the movement. A poll was taken as to the establishment of a library in Marylebone, with an adverse result. Pending the opening of a permanent library in Lambeth, a reading-room was founded in March at Old Hawkstone Hall, Waterloo Road. At Brixton Oval a library will soon be built by the generosity of Mr. Henry Tate, and another will be placed in North Lambeth, in consequence of a bequest by the late Mr. John Noble. The Library Association of the United Kingdom, founded 1877, now numbers nearly 500 members, including the chief librarians of the country. **Hon. Secs.**, J. Y. W. MacAlister, 53, Berners St., W.; E. C. Thomas, 2, South Square, Gray's Inn, W.C.

Licensing Acts, '72, '74. These Acts contain only a part of the statute law with regard to licensing. The Act of 1872 is the principal Act. It applies only partially to Ireland, and not at all to Scotland. It imposes severe penalties upon the illicit sale of liquor, upon drunkenness in any public place or highway, upon permitting drunkenness or gambling or harbouring prostitutes on licensed premises, upon harbouring any constable on such premises in his hours of duty, and upon bribing or attempting to bribe him. It fixes the hours of closing (altered by the Act of 1874), but enables the local authority to grant exemptions from them when the convenience of many persons engaged in lawful business so requires. It provides that if any licensed person on whose licence two convictions for offences against the Act have been recorded is again convicted, he shall forfeit his licence, and he shall be disqualified for five years, and his premises for two years, from receiving another. But a conviction more than five years old is not to be taken into account for the purpose of increasing any penalty. In every licensing district must be kept a register of licences showing particulars of all convictions, etc., and this register must be open to inspection by any ratepayer, holder of a licence, or owner of licensed premises. In counties and in boroughs the justices must annually appoint from among themselves a licensing committee of not less than three members. But in boroughs no licence granted by this committee is to be valid unless confirmed by the body of justices who would, but for the Act, have been authorised to grant licences. Premises not already licensed at the passing of the Act cannot receive a licence unless they are of an annual value fixed by the Act with reference to their situation. Penalties under the Act are recoverable by summary conviction, subject to an appeal to Quarter Sessions. No justice who has any beneficial interest in the manufacture or sale of intoxicating liquors can do anything under this Act. The Act of 1874 contains many modifications of the Act of 1872, and of these several mitigate the severity of the law. But both are so long

and intricate that for precise information a reference to the text is necessary.

Licensing Acts, Cases under the, in '91.

The most important decision of the year was unquestionably that given by the House of Lords (March 20th, '90) in the case of *Sharp v. Wakefield*. In Sept. '87 the landlord of the Lowbridge Inn, Kentmere, applied to the Kendal magistrates for the renewal of his licence. Nothing was alleged against the applicant, but the renewal was refused on the ground that there was no longer any necessity for a licensed house in the neighbourhood, and that the premises were remote from police supervision. The point raised, therefore, was, shortly, whether, in the absence of any objection against the character of the house or of its occupier, the Bench could at their discretion decline to renew the licence. Sharp appealed to the Quarter Sessions, on the ground that the objections to renewal in the Licensing Acts are of a personal and not of an administrative character. The Court of Quarter Sessions, however, decided against the appellant, and the case was then taken to the Queen's Bench Division, which decided that the justices had the same discretion in regard to renewing as in reference to the granting of licences. The case was further taken to the Court of Appeal, with the same result; and finally the matter came before the House of Lords, which once more dismissed Sharp's appeal. In the opinion of the Lord Chancellor, if the justices are to determine whether a new licence is wanted, they can also determine whether circumstances have made an old licence unnecessary. The discretion in the first case presumes discretion in the second. Both discretions are absolute, though they must both be judicial. The Lord Chancellor laid great emphasis on this point. He said: "The legislature had given credit to the magistrates for exercising a judicial discretion, and thought that they would fairly decide the questions submitted to them, and not by evasion attempt to repeal the law which permitted public-houses to exist, or to evade it by avoiding a plain exposition of the grounds on which they acted." Again: "An extensive power is confided to the justices, in their capacity as justices, to be exercised judicially; and discretion means, when it is said that something is to be done within the discretion of the authorities, that that something is to be done according to the rules of reason and justice, not to private opinion; according to law, and not humour. It is not to be arbitrary, vague and fanciful, but legal and regular; and it must be exercised within the limit to which an honest man competent to the discharge of his office ought to confine himself." This appears to show that the reasons must be specific, and that, while the bench may for ordinarily sufficient or common-sense reasons refuse a licence, it must be on individual and intelligible grounds.—In July '90 a beerhouse-keeper at Manchester was convicted by the justices for having his house open during prohibited hours on Sunday, and subsequently the magistrates refused to renew his licence on that ground. He appealed to Quarter Sessions, where he produced evidence of good character; but the magistrates, while intimating that he was no doubt a respectable man, held that he was not a man of sufficiently good character for the purpose in question. They therefore sustained the original decision of the justices. On an appeal

* The stamp duties, etc., bring this sum up to about £29 8s.

to the Superior Courts (April '91), it was held that a distinction could not be drawn between good character in the abstract and the good character of a man in the capacity of a publican. They therefore required the justices to re-hear the application. It should be remembered that it is only in respect of beerhouses already licensed in '69 as to which such a point could arise, for other publicans come within the law laid down in *Sharp v. Wakefield*.

Lichfield, Rt. Rev. Augustus Legge, Lord Bishop of. The see was founded in 656; income £4200. He is the 5th son of the late Earl of Dartmouth, and was b. 1839. Was ed. at Eton and Christ Church, Oxon. Graduated B.A. '61, and proceeded to M.A. in '64, when he was ordained deacon by the Bishop of Lichfield, and licensed to the curacy of Handsworth. Receiving priest's orders in '65, he came to St. Mary's, Bryanston Square, where he remained as curate in '67, when he was appointed vicar of St. Bartholomew's, Sydenham. Hon. canon of Rochester in '77. Two years later he became vicar of Lewisham, of which he was rural dean '86-'91. Succeeded Dr. MacLagan as Bishop of Lichfield in June '91, and was enthroned on Oct. 24th.

Lidderdale, Rt. Hon. William, Governor of the Bank of England, is a native of Scotland, and was b. in 1812. Ed. privately in Cheshire, and commenced his commercial career in connection with the well-known firm of Messrs. Rathbone Brothers, of Liverpool. After being successful in the establishment of a branch of their business in the United States, he became manager to the firm, and afterwards a member of it. In London he started another branch of this firm, and finally became head of it. He was appointed a *Director of the Bank of England*, and as Governor rendered distinguished service to the commercial community of the world by his firm action with relation to the Bank crisis of Nov. 14 h. '90. Owing to the position of Messrs. Baring Bros., he called upon other banks, with the Bank of England, to guarantee about £17,000,000, with the result that confidence was restored. Sworn a member of the Privy Council. Elected a member of the Grocers' Company (Feb. '91). Presented with the freedom of the City of London, and entertained at a banquet (May).

Lifeboats (for their origin and development see ed. '87). The Royal National Lifeboat Institution, which is supported by voluntary contributions, was founded 1824. It has 302 lifeboats on the coasts of the United Kingdom. Total number of lives saved since Institution founded, 35,547. Pecuniary rewards paid for gallant services since '24, £113,500; besides gifts of 97 gold and 1048 silver medals or silver clasps, 184 binocular glasses, 15 telescopes, 4 aneroid barometers, 9 framed certificates of service, and 1301 votes of thanks inscribed on vellum. The payments for last year amounted to £75,877; of which £30,378 was expended on lifeboats, lifeboat carriages and boat-houses, £35,078 on stores, etc., and the balance on rewards, special grants, etc. During the past thirty-seven years the self-righting boats have been launched more than 6800 times on service, and have saved upwards of 13,500 lives. The boats have been capsized altogether 48 times while out on service, but only on 23 of those occasions was there any loss of life. The number of lives lost (counting 27 men who

perished on the occasion of disasters which befell the Southport and St. Anne's lifeboats on Dec. 9th, '86) amounts to 98, including 14 shipwrecked persons. The 84 lifeboat-men lost represent about 1 in 960 of the men employed in the boats on service; and the upsets were at the rate of 1 in each of the 130 service launches. The sum required to provide and endow a boat is £3000. See, Mr. Charles Dibdin, 14, John Street, Adelphi, W.C.

Li Hung Chang, one of the most intelligent and enlightened Chinese of the present age, was b. 1823, in the province of Anhui, and took the Hanlin degree in '49. When the Taiping rebels invaded Anhui ('50) he joined Tseng Kuo Fan's army as secretary. Was appointed Provincial Judge (Nich Tai) of Chékang, and in '61 Governor (Futai) of Kiangsu. In conjunction with General Gordon he recovered Suchow ('63), and drove the rebels entirely out of Kiangsu. For his services he received the Yellow Jacket and Peacock's Feather, and was created an hereditary noble of the third class. Two years later he was appointed *Governor-General of the Liang Kiang Provinces*, and subsequently commanded against the Nienfei and Mohammedan rebels. On the death of Tseng Kuo Fan ('72) he was appointed *Governor-General of Chihli*, the metropolitan province, and this post he still holds. He is also Senior Grand Secretary (Chung Tang)—the highest distinction to which a Chinese official can aspire. He is known as a friend to foreigners and to European culture and industry, and obtained much distinction for his successful negotiations on the occasion of the murder of Mr. Maigary. A member of the Board of Admiralty, he originated the Chinese navy, and he was the chief promoter of the China Merchants' Steam Navigation Co., the only native steamship line. He is Imperial Commissioner of Trade for the Northern Ports.

Limitations, Statutes of. These statutes limit the time within which a man may seek redress for an injury he has sustained. Lapse of time will not protect any one who has ever committed a crime from being prosecuted for it. Redress from a trustee for a breach of trust may always be had, however long the interval since its commission. But with this exception the remedy for any civil injury may be barred by lapse of time. An action of debt or covenant, if founded on a deed, must be brought within 20 years of breach; if founded on any less formal agreement, within 6 years of breach. An action to recover land must be brought within 12 years after the right to bring it first accrued. Should the right have accrued to a person under disability, as an infant or lunatic, an action may be brought within 12 years of its accruing, or within 6 years of the disability ending or the disabled person dying; but in no case of disability are more than 30 years to be allowed altogether. The above term of 12 years applies also to an action brought by a mortgagor to recover possession of his land, and to an action brought to recover money charged upon land by mortgage or otherwise. Only such arrears of rent as have accrued within 6 years before bringing an action for them can be recovered. Actions of trespass to goods, of assault, battery, wounding or imprisonment, must be brought within 4 years of the time when the injury was committed; actions for slander being limited to 2 years. Actions on penal statutes, if brought by the

party aggrieved, are limited to 2 years; if brought by a common informer, are limited to 1 year. The lapse of 60 years bars actions for the recovery of real property, when brought by the Crown against a subject. The remedy in all the above cases may be lost by the lapse of time, but the right survives and may sometimes be made available in other ways than by action. Formal acknowledgment of a right by the person to whom it is adverse will render of no effect any lapse of time which has taken place, but time will run afresh from the acknowledgment. The law upon this subject is very complex and difficult.

Lincoln, Rt. Rev. Edward King, Lord Bishop of. The see was known formerly as Lindissee, then Leicester, then Dorchester, when in 1067 it became the diocese of Lincoln. The old see dates from 680. The present income is £4200. His lordship, the son of the late Ven. Archdeacon King, and the 106th bishop of the total succession, was b. 1829. Ed. at Oriel Coll. Oxon., where he graduated B.A. ('51), M.A. ('55), and D.D. ('73). Ordained deacon ('54), and priest ('55); and consecrated Lord Bishop of Lincoln April 25th, '85. Dr. King was formerly curate of Wheatley, Oxfordshire ('54-8); chaplain and assistant lecturer at Cuddesdon College ('58), being made Principal ('63). Ten years later he became Canon of Christ Church and Regius Professor of Pastoral Theology at Oxford. Dr. K., who is an enthusiastic High Churchman, is known as an author by his sermons "Ezra and Nehemiah," "Addresses to Men and other Sermons" ('78); "Meditations on the Last Seven Words" ('76); "Church Treasures" ('74). His lordship has edited a devotional book, "The Communicant's Manual" ('60). In '88 proceedings were instituted against Dr. K. by the Church Association (q.v.) for alleged illegal ritualistic practices, and on Feb. 14th, '89, his trial was commenced at Lambeth Palace. He read a protest against the Primate's jurisdiction, and the court adjourned till March 12th, when the arguments were heard. On May 11th the Archbishop gave judgment to the effect that he had jurisdiction in the case, and the court adjourned to enable counsel to advise the Bishop. His lordship's subsequent contention that being a bishop he was not a minister was overruled by the court. Further legal proceedings took place in June '91.

Lincoln, Robert Todd, United States Minister to the Court of St. James, was b. at Springfield, Ill., 1843, and is the only surviving son of the late President Abraham Lincoln. Graduated at Harvard University '64. On the advice of his father joined the Staff of General U. S. Grant as a volunteer aide-de-camp. By the desire of General Grant he obtained a regular captain's commission and entered the army. Served throughout the final campaign of the Civil War, at its close resuming the study of law and was admitted to the bar of Illinois. After practising with success in Chicago he at length, during the administration of President Garfield, entered the Cabinet as Secretary of State for War. He retained his portfolio on the accession of Mr. Arthur to the Presidential Chair at the death of General Garfield, and held it till the end of the administration. Appointed United States Minister to St. James's in '89.

Lindley, The Rt. Hon. Sir Nathaniel, eldest son of the late Dr. J. Lindley, F.R.S. Prof. of Botany at Univ. Coll., Oxford, was b.

1828. Ed. at Univ. Coll., London. Called to the bar at the Middle Temple ('50); Q.C. ('72). Appointed a judge of the Court of Common Pleas ('75), became one of the Lords Justices of Appeal and a member of the Privy Council ('87). Lord Justice Lindley is well known in legal circles as the author of an "Introduction to the Study of Jurisprudence," and "A Treatise on the Law of Partnership and Companies."

Linen. See TRADE, 91.

Linton, Mrs. E. Lynn, daughter of the late Rev. J. Lynn, was b. at Kewswick 1822. Is a well-known essayist and writer of fiction, and at one time was a constant contributor to the *Saturday Review*. The authorship of the famous article on "The Girl of the Period" was attributed to Mrs. Linton. Her letters *versus* the *Women's Rights agitation* are characterised by that vigorous style for which she is so justly celebrated. Among the best known of Mrs. Linton's works are "Grasp your Nettle"; "Sowing the Wind"; "Patricia Kemball"; "The Rebel of the Family"; "The True Story of Joshua Davidson"; "Christopher Kirkland"; "Paston Carew, Millionaire and Miser"; and "Through the Long Night." Her husband is the well-known engraver and author, Mr. W. J. Linton, to whom she was married in '58. Her articles on "Wild Women" attracted attention in '91.

Linton, Sir James D., President of the Royal Institute of Painters in Water Colours, was b. in London 1840. After instruction from Mr. Leigh he became an illustrator of not a few books and magazines, in addition to exhibiting pictures at the Dudley Gallery and Royal Academy. His water-colour picture "*Maundy Thursday*" attracted much attention, and for this he received the gold medal of the Philadelphia International Exhibition. As a painter in oils Sir James has also attained success, particularly in historical subjects. Elected President of the Institute of Painters in Oil Colours on its foundation in '83, and in the year following succeeded Mr. Haghe as P.R.I. The honour of knighthood was bestowed on Sir James in '85.

Liquor Traffic Local Veto (Wales) Bill. See SESSION, sect. 82.

Lister, Sir Joseph, D.C.L., J.L.D., F.R.S., the eminent surgeon, was b. 1827. Ed. at London Univ., graduating B.A. ('47) and M.B. ('52). At one time was Professor of Clinical Surgery in Edin. Univ. and Professor of Surgery in Glasgow Univ. Surgeon Extraordinary to Her Majesty the Queen. His father was the discoverer of that principle upon which the achromatic microscope is constructed. Received in '80 the royal medal of the Royal Society, and '81 the prize of the Academy of Paris for his discoveries in antiseptic treatment in surgery known as "Listerism." Created baronet in '83. In the new Great Medical and Surgical Hospital and School at Rome a bas-relief of Sir J. L. is to be placed on the principal facade.

Literary Magazines. The following list of representative magazines which deal with literary interests may be useful:—The *Academy*, 27, Chancery Lane, W.C., established in '60, has made a speciality of signed reviews. It is published weekly, and is edited by Mr. J. S. Cotton. The *Anti-Jacobin*, established in '91, gives reviews of new books, and contains many articles on subjects of literary interest. It is edited by Mr. Frederick Greenwood. The *Athenæum*, 22, Took's Court, Chancery Lane, W.C., established in '28, holds a high position as a

weekly review of literature, science, art, and music. **The Bookman**, 27, Paternoster Row, E.C., was established in Oct. '91, as a monthly journal for book-readers, book-buyers, and booksellers. It is edited by Dr. W. Robertson Nicoll. **The Bookseller**, 12, Warwick Lane, E.C., gives careful lists of new books, their prices, and publishers. It is published monthly. **Literary Opinion**, 25, Paternoster Square, E.C., was established in '86, but entirely re-constituted in July '91. Appeals to book-lovers in Greater as well as in Great Britain. It is published monthly, and is edited by Mr. A. Patchett Martin. **The Literary World**, 13, Fleet Street, E.C., was established in '68, and gives copious extracts from new books as well as reviews. It is published weekly, and is edited by Mr. J. G. Clarke. **The National Observer**, 115, Fleet Street, E.C., is a weekly literary and political review, and is edited by Mr. W. E. Henley. **The Publishers' Circular**, St. Dunstan's House, Fetter Lane, E.C., gives weekly reviews of, and particulars regarding, new books. It also contains lists of old works now out of print. **The Review of Reviews**, Mowbray House, Norfolk Street, Strand, W.C., established in '90, gives a summary of the most important and interesting articles appearing in the magazines of the world; condensed reviews of the books of the month are a feature. It is published monthly, and is edited by Mr. W. T. Stead. **The Saturday Review**, 38, Southampton Street, Strand, W.C., was established in '55. It is essentially critical on literary as well as political subjects. It is published weekly, and is edited by Mr. W. H. Pollock. **The Speaker**, 115, Fleet Street, E.C., was established in '89, and devotes a proportion of its space to literature. It is published weekly, and is edited by Mr. T. Wemyss Reid. **The Spectator**, 7, Wellington Street, Strand, W.C., established in '28, contains reviews of new books and essays on the events of the week.

Literature, '91. The literary record of the year was unusually full of interest and variety. In one respect '91 will long be remembered as the *annus mirabilis*, for on July 1st **International Copyright (q.v.)** became an accomplished fact. It was said at the time that the market was going to be flooded with books that had been held back in anticipation of the coming Act. So far were these predictions from being verified that the summer was probably the dulllest on record. It is too early yet to speculate as to the ultimate effect of the Act on the publishing trade of Great Britain and the United States respectively; but already there is reason to believe that only writers of established reputation will reap much benefit from the legislation. No one, however, will grudge them their day of good things, for they have waited long and patiently for this measure of elementary justice. The authors were not ungrateful, for they dined at the Metropole in honour of the event on July 17th. If the proceedings were very dull they were also very decorous, and much respect was paid to the American guests. During the year several magazines came into being, and others died. Of these the **Strand Magazine** attained to a success that was almost phenomenal. Part I. appeared on Dec. 10th, '90, and, in spite of an issue of 250,000 copies, went out of print the same day. Doubtless this result was largely due to the fact that the periodical, which was lavishly illustrated and written for by well-known authors, was published at 6d., and was accompanied by a finely-executed oleograph

that was alone worth the money. Another feature of this magazine, in which it need never fear any copyist, consisted in its being published at any except the ordinary magazine date. It may also be mentioned that Mr. G. Newnes, M.P., turned his business into a limited company, under the style of **George Newnes, Limited**. The capital was put at the enormous sum of £400,000. With customary shrewdness Mr. Newnes confined the applications to the trade, and nearly all the shares, it is understood, were subscribed. It is not in human nature, and certainly not in the nature of a railway bookstall clerk, not to push the wares in the sale of which one has a pecuniary interest. Another magazine, on somewhat similar lines, was the **Ludgate Monthly**, the first part of which was issued on April 24th. Its price, however, was only 3d., and by devoting special articles to the great outdoor games of England, it soon obtained considerable vogue at such places as Lord's and the Oval, where it was hawked as freely, and bought as rapidly almost, as the "last cyard o' match." After a plucky and presumably costly effort to establish itself, Mr. Harry Quilter's **Universal Review** expired in Dec. '90. Some periodicals experienced very hard luck, for they were born and died within the year. For instance, **Groombridge's Magazine** came in January, but not to stay; the **Ladder**, although edited with exceptional ability by Mr. D. B. Bal-sillie, had to pass into a state of suspended animation about midsummer, after an existence of some six months. The first number of the **Goming Day**, which was mainly the organ of the Rev. J. Page Hopps, of Leicester, appeared in January; but its successors were few. On the other hand, although extensively announced for January, Mr. Robert Buchanan's **Modern Review** has not yet seen the light. The only new quarterly of any consequence was the **Economic Review**, the magazine more especially of the Christian Socialists, the first number of which appeared in January. And on Oct. 15th there appeared the first number of the **Review of the Churches**, a mid-monthly magazine, whose *raison d'être* is the promotion of union among the churches within Christendom. The general editor is the Rev. Dr. Lunn, but he is assisted by four special editors, who report upon the affairs of their respective churches. With the November magazines there was published the first number of the **Educational Review**, specially devoted to the cause of elementary, secondary and university education. It is conducted by Mr. Reginald W. Macan, M.A., as Oxford editor, and Mr. Oscar Browning, M.A., as Cambridge editor. **The Victorian Magazine (Hutchinson)** made a promising *début* also in December. **The Nineteenth Century**—the first number of which was published in March '77 by Messrs. H. S. King & Co., and the eleventh in Jan. '78 by Messrs. Kegan Paul & Co.—was transferred from the latter firm to Messrs. Sampson Low & Co., whose connection dated from the September number. One of the purely literary controversies of the year arose out of an article contributed by Mr. Frederic Harrison to the **Nineteenth Century** for Dec. '90, in which he advocated the restoration of the Elgin Marbles to Greece. In reply to this argument there appeared in the number for March '91 a paper by the editor, Mr. James Knowles, entitled "The Joke about the Elgin Marbles," in which he affected to treat his own contributor's article

as an elaborate jest. This action on the part of an editor was, not unnaturally, more than Mr. Harrison could tolerate, and in the July number of the *Fortnightly*, in the course of an answer to Mr. Knowles, he intimated that he should write no more in the *Nineteenth Century*. Although we do not claim that the works of Aristotle belong to English literature, except in the guise of translation, it must be noted that one of the events of '91 was the discovery by the British Museum authorities of a treatise, supposed to have been lost, by Aristotle on the *Constitution of Athens*. The papyrus on which this book was written was found amongst others that had been purchased in Egypt. Translations by Mr. F. G. Kenyon and others appeared in due course, as well as a facsimile of the original text. Unhappily the pleasure that surrounded this fortunate discovery was marred by a suggestion of favouritism, for the news of the occurrence was communicated at great length to the *Times* (Jan. 19th) alone of all the papers in the United Kingdom. On New Year's Day considerable sensation was produced in the newspaper world by the appearance of a literary supplement to the *Daily Chronicle* of that date. Besides reviews of books, notes on literary, artistic, and scientific matters, the supplement also contained the opening chapter of Mr. William Black's novel of "Donald Ross of Heimra." The *Daily Chronicle*, which issued its supplement every Wednesday afterwards, was thus the first London daily newspaper to publish a serial story in its columns. Mr. Black's novel was followed by one from the pen of Mr. Quiller-Couch, entitled "The Blue Pavilions." In emulation of this example, the *Star* published, day after day, the instalments of Mr. I. Zangwill's story, *The Big Bow Mystery*, the opening chapter of which appeared in the issue for Aug. 2nd. The late Mr. Raikes incurred some unpopularity by his objecting to allow the Supplement to go through the post at the usual newspaper rates, on the ground that it was not news; but by dropping the description "literary supplement," and printing some police intelligence, or other tidings of a non-literary character, on one of the pages, the *Daily Chronicle* passed muster. On Jan. 1st the *Morning Advertiser* was published at a penny, its price hitherto having been threepence. The appearance of the *Sunday Sun* should be chronicled here, because one of its chief features consisted in an exhaustive description and review, from the pen of Mr. T. P. O'Connor, M.P., the Editor, of the books of the week, to which most of the front page was devoted. Still more important was the publication of the new illustrated sixpenny weekly, *Black and White*, the first number of which appeared on Feb. 6th, which was conducted with a degree of literary and artistic excellence that woke up the *Illustrated London News* and *Graphic*. The editorship of the *Illustrated* having passed into the hands of Mr. Clement K. Shorter, he introduced, almost immediately, new literary features that placed his paper abreast of its competitor. Mention must also be made of a pamphlet entitled *Free Railway Travel*, by Mr. R. A. Cooper, of Norwich, for, though not exactly literature, it was held by many that it would prove to be, in its way, as epoch-marking a brochure as was Sir Rowland Hill's pamphlet advocating the Penny Post. During what is popularly known as the 'silly season'—when the *Daily Telegraph* was

discussing *Drink* and the *Daily News* was describing *Life in Our Villages*—the *Daily Chronicle* made a gigantic and genuine hit with its *Theosophy* correspondence, which arose out of its report of Mrs. Besant's farewell address to the National Secularist Society, in the course of which she intimated that she had become a convert to the doctrines associated with the name of the late Madame Blavatzky. For weeks London rang with discussions about the *Mahatmas* and their mysteries. A new monthly review, devoted to literary news and criticism, appeared in September, under the title of *The Bookman*, and the editorship of the Rev. W. Robertson Nicoll (q.v.). In the year, and particularly with reference to International Copyright, a good deal was heard of the *Literary Agent*. "Ouida," among others, condemned the custom of writers placing themselves in the hands of an agent, and Mr. Besant, among others, upheld the practice. To say the least of it, however, it looks paradoxical that, while there is a growing public opinion against the middleman, he should actually be enthroned by leading authors. Nor is it easy to see how novelists like Dickens, Thackeray, George Eliot, and others were able to conduct their business affairs satisfactorily to themselves, and yet writers of the present day find this either beyond their capacity or far too irksome. Before the year expired, unfortunately, one or two of the older publishing houses, unable to cope with the fierce competition of these times, had to close their doors. If it be the fact—and it seems to be borne out by the circumstance that the yield of books during '90 was below the yield for '89, which, in turn, was below that of its predecessors—that there is, year by year, a tendency towards a diminished output of books, this would seem to show that the future is largely with the newspapers and weekly and monthly periodicals, for they exhibited increased power and popularity. This record would be regarded as incomplete if mention were not made of the death (Oct. 6th) of Mr. W. H. Smith, the founder of the great railway bookstall trade, and one of the largest disseminators of literature of nearly every description.

BIOGRAPHY.—It is no disparagement to the many excellent books in this department published during the year to say that Mrs. Oliphant's tasteful *Memoir of Laurence Oliphant and of Alice, his Wife* (*Blackwood*) bore the palm alike for the interest of its subject and the literary charm with which Oliphant's singular story was told. Dr. Samuel Smiles' *A Publisher and his Friends* (*Murray*) proved to be an exceptionally entertaining account of John Murray *secundus*, and of the origin and progress of the great house in Albemarle Street from 1768 to 1843. Mr. Nicolay and Col. John Hay's monumental work on *Abraham Lincoln* (*Unwin*), in ten volumes, belonged as much to the domain of history as to that of biography. Cardinal Newman gave rise to two books of widely different character. One was the *Letters and Correspondence of John Henry Newman during his Life in the English Church* (*Longmans*), edited by Miss Anne Mozley, to which a brief autobiography gave permanent value. The other was a somewhat painful record of the *Early History of Cardinal Newman* (*Kegan Paul*) by his brother, Prof. F. W. Newman. In Dr. George Smith's *A Modern Apostle: Alexander N. Somerville* (*Murray*), we had a judicious biography of a Free Kirk missionary, who wan-

dered to all parts of the earth. The Rev. James Hay, minister of Kinn, made a close study of the great dean in *Swift's Life Mystery* (Chapman & Hall). The *Memoirs of Prince Talleyrand* (Griffith, Farran), edited by the Duc de Broglie, translated by R. L. de Beaufort, with an introduction by Mr. Whitelaw Reid, the American Minister in Paris, hardly realised the great expectations that had been cherished about it. Col. Church related the extraordinary career of a man of genius in his straightforward *Life of John Ericsson* (Sampson Low). Mr. Justin McCarthy dealt very pleasantly with *Sir Robert Peel* (Sampson Low), but his book was eclipsed a few months afterwards by Mr. G. W. E. Russell's modest but excellently written account of the political career of *The Right Hon. W. E. Gladstone* (Sampson Low). Nevertheless, we saw a good many Peel books in '91, and the most important was the volume prepared and edited by Mr. C. S. Parker, M.P., from the statesman's private correspondence, and entitled *Sir Robert Peel: In Early Life, 1789-1804; as Irish Secretary, 1812-1818; and as Secretary of State, 1822-1827* (Murray). Able and scholarly in the highest degree was Father Bridgett's *Life and Writings of Sir Thomas More, Lord Chancellor of England and Martyr under Henry VIII.* (Burns & Oates). Mr. L. B. Seeley edited a readable sketch of Dr. Johnson's friend *Mrs. Thrale*, afterwards *Mrs. Piozzi* (Seeley), and illustrated it with passages from her diaries. We learned that grave physical defects in no way militate against a career of public usefulness in Mrs. Steele's biography of *The Rt. Hon. Arthur MacMurrough Kavanagh* (Macmillan). Mr. Clark Russell rather forced the pace for his hero in his picturesque book on *Collingwood* (Methuen). Miss Redgrave's *Richard Redgrave, O.B., R.A.* (Cassell), was an unassuming memoir of her father, compiled mainly from his diary. Col. Spalding wrote with vigour and skill of the famous Russian General *Souvorov* (Chapman & Hall). Dr. B. W. Richardson's *Thomas Sopwith, M.A., C.E., F.R.S.* (Longmans), and Mr. Edwin Hodder's *George Fife Angus: Father and Founder of South Australia* (Hodder & Stoughton) were painstaking memoirs of comparatively unknown men who did excellent service in their day. Mr. Percy Fitzgerald hardly rose to his opportunities in his *Life of James Boswell* (Chatto & Windus). The Bishop of Rochester and Canon Benjamin's *Life of Archibald Campbell Tait, Archbishop of Canterbury* (Macmillan), was a thoroughly honest piece of workmanship. The *Memoir of Madame Jenny Lind-Goldschmidt* (Murray), by Canon Scott Holland and W. S. Rockstro, would have been more generally appreciated had it been briefer. Mrs. Sutherland Orr's *Life and Letters of Robert Browning* (Smith, Elder), eagerly looked for, appeared to fall somewhat flat. Coming out about the time of the Kaiser's visit to England, Mr. Harold Frederic's *The Young Emperor: a Study in Character Development on a Throne* (Unwin) had great success. It is held to be a mistake for the same author to publish a second book on the same lines as the first, and Miss Fanny Kemble's *Further Records* (Bentley) was no exception to this rule. A similar remark must be held to apply to Mr. Montagu Williams' *Later Leaves* (Macmillan), which had better have been limited to his magisterial experiences. Messrs. Smith, Elder & Co. published an exhaustive and acceptable account of the *Life and Writings of Joseph*

Mazzini. In the *Correspondence of Princess Lieven and Earl Grey* (Bentley), well translated by Mr. Guy Le Strange, was found much of special interest relating to the statesmen and politicians of two and three generations ago. Mr. C. Kegan Paul found time in the midst of business cares to write a lucid sketch of *Maria Drummond* (Kegan Paul). Miss Alexander Ireland did not add much to the sum-total of our knowledge of a gifted woman in her *Life of Jane Welsh Carlyle* (Chatto & Windus). Mr. J. J. Roche's *Life of John Boyle O'Reilly* (Unwin) was a sympathetic biography of an Irish journalist and poet, better known perhaps in the United States than in Great Britain. Mr. Austin Dobson had a subject after his own heart in *Horace Walpole* (Osgood), which contained an appendix of books printed at the Strawberry Hill Press, and several illustrations by Percy and Leon Morant. Mr. Alfred Dawson told well the story of his talented father in his *Life of Henry Dawson, Landscape Painter 1811-78* (Seeley). Though nearly everything that can be said about the poet has been said, Miss Wordsworth's monograph on *William Wordsworth* (Percival) was very acceptable, though marred by the bitterness of her allusions to Sir Walter Scott. However, there was something new in Dr. Japp's *De Quincey Memorials* (Heinemann), in which some of the letters and records were published for the first time. Dr. Hedderwick's *Backward Glances, or Some Personal Recollections* (Blackwood), broke fresh literary ground, and contained much of genuine interest. The *Annals of My Early Life, 1806-46* (Longmans), by Bishop Wordsworth of St. Andrews, introduced so many distinguished men, pupils or college chums of his, that it was read with unusual avidity. Miss Watts Phillips' affectionate account of *Watts Phillips: Playwright and Artist* (Cassell), illustrated by several specimens of his work as a draughtsman, showed that her brother possessed powers of a high order as a fanciful and humorous artist. Mr. T. P. O'Connor's *Life of Charles Stewart Parnell* (Hurd, Lock), written and published within a week, was a notable feat in book making. Admiral Sir Augustus Phillimore's *The Last of Nelson's Captain* (Harrison) was a biography of Admiral Sir William Parker.

FICTION.—Nearly all of the leading novelists were well represented in '91. Mr. George Meredith broke the silence of later years with a work named *One of Our Conquerors* (Chapman & Hall), in which all his mannerisms were accentuated, but which revealed no falling off in his rugged and brilliant strength. In *The Little Minister* (Cassell), Mr. J. M. Barrie produced the best long story that he has yet written. Miss Olive Schreiner, who seems in no hurry to make literature (*O si sic omnes!*), showed all her fine powers of imagination and charm of style in *Dreams* (Unwin). If Mr. William Black was hardly at his best in *Stand Fast, Craig-Royston!* (Low), he was equal to his best self in *Donald Ross of Heimra* (Low), in which the local colour reached the acme of perfection. Mr. Rider Haggard and Mr. Lang collaborated in *The World's Desire* (Longmans), but the product of their joint efforts appeared to fall flat. If Mr. Haggard's *Eric Brighteyes* (Longmans) was more highly esteemed, it was not, we may be sure, because he had done without Mr. Lang's help. In *Noughts and Crosses* (Cassell), "Q." gave evidence of owning the rarest gift of short story-telling. This book

was a distinct advance upon anything he has yet written. Mr. F. W. Robinson has seldom done better work than in *Her Love and His Life* (*Hurst & Blackett*). Those who follow with interest the development of Mr. Rudyard Kipling were divided in opinion as to the merits of his first longer story, *The Light that Failed* (*Macmillan*), but his *Life's Handicap*: being *Stories of Mine Own People* (*Macmillan*) encountered more unequivocal acceptance. Mr. George Gissing discussed *New Grub Street* (*Bentley*) with some degree of power and pathos, though there are picturesque but painful aspects of it with which he seems as yet to be unfamiliar. For shrewdness and smartness of the higher sort Miss Sara Jeannette Duncan's *An American Girl in London* (*Chatto & Windus*) is commendable. Dr. George Macdonald's later style was well exemplified in *There and Back* (*Gegan Paul*). Sir Edwin Arnold gave a father's blessing and an introduction to Mr. E. L. Arnold's *The Wonderful Adventures of Phra the Phœnician* (*Chatto & Windus*). Lucas Malet's powerful story of *The Wages of Sin* (*Sonnenschein*) gave rise to a good deal of controversy. Mr. G. Colmore's *A Living Epitaph* (*Longmans*) was pronounced to be admirable by many critics. A comparatively new candidate to public favour appeared in the person of Mr. R. P. Dyer, and he passed with honours into the charmed circle, his two books *Just Impediment* (*Ward & Downey*) and *Miss Maxwell's Affections* (*Chatto & Windus*) evincing many fine qualities. Mr. Egerton Castle's *Consequences* (*Bentley*) brought its author to the front with a rush, and Mr. Eden Phillpotts made a mark with his *The End of a Life* (*Arrowsmith*). Mrs. Oliphant's *Janet* (*Hurst & Blackett*) showed that her right hand has all its old cunning. There were some good points in Dr. C. J. Wills' *John Squire's Secret* (*Ward & Downey*), and his *Jardyne's Wife* (*Trischler*). The Rev. S. Baring-Gould revealed his skill in *Urith: a Tale of Dartmoor* (*Methuen*), and on the other hand Mr. Clark Russell's *A Marriage at Sea* (*Methuen*) was somewhat slight and unsatisfactory, but he atoned for any shortcomings here in his *My Danish Sweetheart* (*Methuen*). In *He Fell Among Thieves* (*Macmillan*) there was again collaboration by Mr. D. Christie Murray and Mr. Herman. Mr. Francis Adams' *John Webb's End* (*Eden, Remington & Co.*) was a remarkable tale of Australian bush life, but Mr. Rolf Boldrewood's *A Sydney-side Saxon* (*Macmillan*) probably found a wider circle of readers. A new humourist was discovered in Mr. Barry Pain, whose *In a Canadian Canoe*, and other *Stories* (*Henry*), received additional advertisement from Mr. Andrew Lang's rather rough and ungenerous handling of it. Many good points existed in Mr. Fred Boyle's *Her Evil Genius* (*Chapman & Hall*), and Mr. Fraser Rae's *An American Duchess* (*Bentley*) was undoubtedly the best piece of fiction he has yet turned out. When an M.P. takes to novel-writing, the experiment is watched with unusual interest, which in the case of Mr. Louis J. Jennings' *The Philadelphian* (*Hurst & Blackett*) was amply justified by the event. Roy Toller's *A Draught of Lethe: the Romance of an Artist* (*Smith, Elder*), invited and won high praise. Mr. W. E. Norris' industry and nice literary turn were displayed in *Miss Wentworth's Idea* (*Ward & Downey*), and Mrs. Chaine's *Sons* (*Bentley*). Mr. Grant Allen is becoming so prolific a writer that it is

not easy, save for the most leisurely, to keep pace with him, but luck continues to wait upon him. Besides winning the *Tit-Bits* £1000 prize, he found time to produce *Dumaresq's Daughter* (*Chatto & Windus*) and *Recalled to Life* (*Arrowsmith*), the former story being uncommonly good. Mr. H. B. Marriott-Watson, hitherto known to fame as collaborator with Mr. Barrie in the latter's play of "Richard Savage," produced an excellent adventure story called *The Web of the Spider* (*Hutchinson*), in which effective use was made of his knowledge of the Maoris and New Zealand scenery. Mr. Marion Crawford, indefatigable as ever, brought out two powerful stories, written in his vigorous and polished style, *Khaled* (*Macmillan*) and *The Witch of Fragus* (*Macmillan*). There were many excellent studies of character in Mr. A. Gordon's *The Folks of Carglen* (*Unwin*). Mr. Thomas Hardy's volume of short stories entitled *A Group of Noble Dames* (*Osgood*) excited a good deal of ire on the part of Mrs. Grundy. Miss Maxwell's *Grace* (a tale of modern chivalry, *In the Heart of the Storm* (*Gegan Paul*), could not fail to possess many admirable features, but it hardly reached the standard of some of her earlier books. Mrs. Walford's *The Mischief of Monica* (*Longmans*) was, on the other hand, fully up to her high reputation. In all that Mr. William Morris writes, we may look for fine literary flavour and beautiful fancy, and both qualities were conspicuous in his *News from Nowhere*; or an *Epoch of Rest*: being some chapters from a Utopian Romance (*Hacues & Turner*). Mrs. Macquoid's pleasant style characterised her *At an Old Château* (*Ward & Downey*). In consequence of Mr. Leonard Courtney's fervid recommendation, great attention was paid to Mr. J. H. Pearce's *Esther Pentreath* (*Unwin*). Mrs. Gellie told with marked felicity the story of a Highland parish in her *Raffans Folk* (*Innes & Co.*). Mrs. Alexander's *A Woman's Heart* (*White*), Mr. R. A. King's *Bell Barry* (*Chatto & Windus*), Mrs. Henniker's *Sir George* (*Bentley*), and Lady Lindsay's *Bertha's Earl* (*Bentley*), found many admirers. Miss Annie S. Swan, to call her by her maiden name, by which she still chooses to be known, was well represented by *The Ayres of Studleigh* (*Oliphant & Co.*). The venerable dictum that truth is stranger than fiction received curious illustration in Mr. R. H. Sherard's *By Right, not Law* (*Cassell*), for in a letter to the *Daily Chronicle* he gave chapter and verse for all the incidents that critics had condemned as "improbable." Mr. L. Dougall's *Beggars All* (*Longmans*) and Mr. E. Peacock's *Narcissa Brendon* (*Hodges*) met with prompt recognition of their merits. Mr. Hall Caine's romance of *The Scapagoat* (*Hennemann*), though it will not enhance his reputation, was not unworthy of it, and it so powerfully affected the Jewish section of the community that he has undertaken to go to Russia to study the Jewish question on the spot, presumably with the intention of making its phases the groundwork of another novel. If the heart of the Tsar is to be reached by the means of fiction, Mr. Hall Caine is just the man to do it. Besides writing voluminously for boys, Mr. G. A. Henty found time to write an attractive story for older folk, namely *A Hidden Foe* (*Low*). Although best known as an intrepid and enterprising voyager, Mr. E. F. Knight, in his novel, *Save me from my Friends* (*Longmans*), discovered many readers to whom such an appeal must be addressed in

vann. Mr. M. Maartens's *An Old Maid's Love (Bentley)*, a Dutch tale told in English, powerfully impressed even the most case-hardened devourers of fiction. The Earl of Dysart toiled manfully, not without success, after the bubble, Reputation, in his *Heloni's Vow*; or, *a Freak of Fate (Sonnenschein)*. Mr. R. E. Forrest's *Eight Days (Smith, Elder)* was remarkable for its lifelike reproduction of certain episodes in the Indian Mutiny. A very favourable impression was created by Mr. T. St. E. Hake's sensational story, *Within Sound of the Weir (Cassell)*. There was much that charmed in Miss Kettle's *The Magic of the Pine Woods (Unwin)* and Miss Sarah Barnwell Elliott's *Jerry (Osgood)*. Mrs. Williamson's *A Child Widow (Chatto & Windus)* was appreciated by others than Messrs. Mudie's clients, and Orlando Figgins, and other Stories (*Ward & Downey*), by Mrs. Alfred Marks (*May Iloppus*), contained something to suit all tastes. Mr. D. Dormer's *Steven Vigil (Chapman & Hall)* and Mr. Cecil Dunstan's *Quits (Ward & Downey)*, were praiseworthy efforts. It is often hazardous to write a novel with a purpose, but Miss Miriam Alan, in her zeal against the flogging of girls in schools and institutions more or less charitable, successfully essayed this task in *Wednesday's Child (Long)*. Miss Wilkins' *A New England Nun*, and other Stories (*Osgood*), was charming and graceful to a degree that is rare even among experienced writers. Mr. Walter Besant, while assiduous in his care for the interests and even the creature comforts of authors, delighted his countless admirers by his picturesque and powerful story of *St. Katherine's by the Tower (Chatto & Windus)*. Mr. I. Zangwill, till then best known as the clever editor of the genuinely comic weekly *Ami*, made a more permanent reputation by his *The Bachelors' Club (Henry)*, a series of stories of undoubted talent and originality. The lady who contributed, under the masculine pseudonym of John Oliver Hobbes, to Mr. Fisher Unwin's Pseudonym Library the story of *Some Emotions and a Moral* must have been gratified by the sensation caused by her singularly-entitled tale. A new author, who elects to be nameless, furnished in *Tim (Macmillan)* a delightfully characteristic story of Eton school life. Miss Braddon's latest novel, *Gerard (Simpkin & Co.)*, though possibly less exciting than some of her earlier works, was, nevertheless, profoundly interesting. Archdeacon Farrar's story entitled *Darkness and Dawn (Longmans)*, if marred by certain rhetorical extravagances, was yet a brilliant and instructive picture of the Roman manners of the time of Nero and the early Christians. The *White Company (Smith, Elder)* is probably Dr. Conan Doyle's best novel. Miss Mary Angela Dickens, granddaughter of the great novelist, showed much promise in her *Cross Currents (Chapman & Hall)*. There was very considerable power displayed in *Naboth's Vineyard (Spencer Blackett)*, by E. Somerville and Martin Ross. Mr. Short-house's *Blanche, Lady Falaise (Macmillan)*, though impressive in its way, was deficient in interest as a story. Miss Hawke, daughter of the late Rev. R. S. Hawke, but better known as Lancelot Falconer, surpassed that tale in her remarkable novel of *Cecilia de Noël (Macmillan)*. Mr. Frank Barrett in *The Sin of Olga Zassoulis (Chatto & Windus)*, and Mr. George Moore in *Vain Fortune (Henry)* showed a marked improvement on their previous work. Mr. W.

Robertson's *The Lords of Cuningham (Paisley: Gardner)* was a successful historical novel. A *Reverend Gentleman (Methuen)*, by Mr. J. M. Cobban, was favourably received. No one has come to the front so rapidly as Mr. Stanley J. Weyman, and his *The New Rector (Smith, Elder)* and *The Story of Francis Cludde (Cassell)* fully justified the esteem in which he is deservedly held as a writer of fiction.

MISCELLANEOUS.—Following our usual plan of massing together books that do not lend themselves to our general idea of classification, we lead off with mention of Professor Freeman's scholarly and thorough, albeit somewhat ponderous, *History of Sicily from the Earliest Times (Clarendon Press)*, of which vol. i., dealing with the native nations and the Phœnician and Greek settlements, and vol. ii., from the beginning of the Greek settlement to the beginning of Athenian intervention, have been published. Mr. William Andrews collected a mass of interesting information in his *Old-time Punishments (Hull: Andrews)*. Distinguished for its elegant style and just criticism, Mr. John Morley's *Studies in Literature (Macmillan)* was a welcome interlude in the political strife. Mr. Bernard Quaint published two volumes of his *Saga Library*, done out of the Icelandic by Mr. William Morris and Erik Magnússon. Of recent years the Socialists have had it so much their own way that the Individualists thought it time to issue a counterblast. This took the form of a volume of essays entitled *A Plea for Liberty (Murray)* by different writers, under the editorship of Mr. Thomas Mackay and the patronage of Mr. Herbert Spencer, who furnished an introduction to the book. Messrs. George Bell & Sons brought out an entirely new edition, at a cost of £60,000, of *Webster's International Dictionary of the English Language*. In the most businesslike and unaffected manner Sir George Chetwynd related his *Racing Reminiscences and Experiences of the Turf (Longmans)*. Though based on Peter Cunningham's well-known handbook, Mr. H. B. Wheatley's *London Past and Present: its History, Associations, and Traditions (Murray)*, was so extensively added to that it was practically a new work. Although Mr. Loftie's text was superficial enough, the very numerous illustrations by Mr. W. Luker, jun., undoubtedly gave a certain value to *London City: its History, Streets, Traffic, Buildings, People (Leadenhall Press)*. In this connection, too, mention should be made of *Philip's Handy Volume Atlas of London (Philip)*, not because it was literature—which, of course, it was not—but because it was the first instance of the mapping out of the metropolis with the utmost detail in book form no bigger than Baedeker. Mr. C. G. Leland ("Hans Breitmann") was quite at home in his *Gypsy Sorcery and Fortune-telling (Unwin)*, a subject that he has studied closely for many years. Although in some respects a trifle arrogant in tone, there was much that was excellent and commanded attention in Mr. George Moore's *Impressions and Opinions (Nutt)*. The late Dean Church's *The Oxford Movement: Twelve Years, 1833-45 (Macmillan)*, bore the marks of greatest care and conscientiousness. Though his views on the subject were not declared for the first time, it was convenient to have the whole question carefully overhauled in Mr. Goldwin Smith's *Canada and the Canadian Question (Macmillan)*. Dr. Westcott's *Essays in the History of Religious Thought in the*

West (*Macmillan*), if not very profound, formed a useful contribution to this much-discussed subject. For trenchant and merciless criticism Dr. Abbott's *Philomythus: an Antidote against Credulity* (*Macmillan*), in which he dissected Cardinal Newman's essay on Ecclesiastical Miracles, evoked great excitement and controversy, although he fairly held his own against all comers. Mr. Buchanan breaks out in fresh places every now and then, and, when he does so, he is always clever and amusing, as his *The Coming Terror* (*Heinemann*), a volume of essays and letters, abundantly proved. The only objection to the Rev. T. Mozley's *Letters from Rome on the Occasion of the Œumenical Council, 1869-70* (*Longmans*), seemed to be that they were published about twenty years too late. To all journalists, if not indeed to all professional writers, Mr. J. R. Fisher's and Mr. J. A. Strahan's *The Law of the Press* (*Clowes*) was very welcome. The Rev. Dr. Atkinson delightfully recorded his Yorkshire career in *Forty Years of a Moorland Pariah* (*Macmillan*). There was much fresh and original observation in Professor C. Lloyd Morgan's *Animal Life and Intelligence* (*Arnold*). Everybody hailed with acclamation the appearance of Dr. W. G. Grace's unpretending book on *Cricket* (*Arrowsmith*). Mr. G. C. Williamson completed his great task of producing a revised edition of *Traders' Tokens* (*Stolk*). The two volumes gave evidence of a research which was valuable and most interesting in its results. *The Guild Merchant* (*Clarendon Press*) was a learned and instructive contribution to British municipal history by Dr. Charles Gross, of Harvard University. When Professor Henry Jones, M.A., wrote his *Browning as a Philosophical and Religious Teacher* (*Macmillan*) he held a chair in the University College of North Wales. He is now a Professor in St. Andrews University. Was this a case of cause and effect? Miss Agnes M. Clerke was both pleasant and accurate in her *The System of the Stars* (*Longmans*). Brilliant and paradoxical as ever, must be written of Mr. Oscar Wilde's *Intentions* (*Osgood*). The great work to which Mr. Charles Booth has devoted himself with such public spirit made steady progress, and Messrs. Williams and Norgate were enabled to bring out the second volume of his *Labour and Life of the People*. The six lectures that Mr. Maxime Kovalevsky delivered at Oxford on the *Modern Customs and Ancient Laws of Russia* were published in volume form by Mr. Nutt. Mr. Sidney Colvin's edition of the *Letters of John Keats to his Family and Friends* (*Macmillan*) contained a good deal of new matter about the poet. Miss Beatrice Potter obtained a respectful hearing for her statement of the present position and progress of *The Co-operative Movement in Great Britain* (*Sonnenschein*). Mr. John Rae's *Contemporary Socialism* (*Sonnenschein*) has, very properly, already taken its place as the foremost authority on the subject, alike for all-round thoroughness of knowledge and lucidity of treatment. In *The Diary of a Pilgrimage* (*Arrowsmith*) Mr. J. K. Jerome did not repeat the phenomenal success of his earlier books. Pleasant proof of the beneficent results of national education and public libraries was afforded by the *Guide to the Choice of Books* (*Stanford*), compiled by Mr. Arthur Acland, M.P., and the *Guide-book to Books* (*Frowde*), prepared by

Mr. E. B. Sargent and Mr. Bernard Whishaw. Two books by Mr. Sidney Webb, the *Eight Hours' Day* (*Scott*)—in which Mr. Harold Cox collaborated—and the *London Programme* (*Sonnenschein*) displayed a masterly grasp of intricate questions. Mr. Hall Caine was well advised in publishing in book form his Royal Institution lectures on *The Little Manx Nation* (*Heinemann*). A little belated, but welcome for all that, was the volume of *The Scientific Papers of James Clerk Maxwell, F.R.S.* (*Cambridge University Press*), edited by Mr. W. D. Niven. In *The Gods of Greece* (*Macmillan*) Mr. Louis Dyer brought ripe judgment and fulness of knowledge to bear upon a most interesting subject. Professor Wallace's examination of the *Rural Economy and Agriculture of Australia and New Zealand* (*Low*) was a work of great practical value. *Modern Humanists* (*Sonnenschein*) was a vigorous and caustic estimate of Carlyle, Mill, Emerson, Arnold, Ruskin, and Spencer by Mr. J. M. Robertson, a quondam colleague of Mr. Bradlaugh's on the *National Reformer*. The *Annals of a Fishing Village* (*Blackwood*), edited by Mr. J. A. Owen, was an able and picturesque book, marked by faithful observation of nature and fisher-folk's customs. Similar qualities also distinguished the same writer's (?) *On Surrey Hills* (*Blackwood*), by a Son of the Marshes. It is always pleasant to hear a superior person expound his opinions of men and things; hence the keen interest that was aroused by Mr. W. D. Howell's *Criticism and Fiction* (*Osgood*). Sir Daniel Wilson discussed an unhackneyed subject in his *The Right Hand: Lethargy* (*Macmillan*). Mr. David Balfour's *The Lesson of the Revolution* (*Black*) was a studious, earnest, and eloquent bit of moralising on Britain's peril and her hope. Considerable sensation was caused by Mr. A. Nelson Sealorh's (an evident *nom de plume*) *The Last Great Naval War* (*Cassell*), in which he described, with competent knowledge and imaginative power, the tremendous conflict in which the fleet of Great Britain finally disposed of that of France. Curious information was to be found in Mr. R. S. Fitt's *Sports and Pastimes of Scotland* (*Gaidner*). Colonel Maurice's highly esteemed essay on *War* (*Macmillan*) was based on a reprint of his article in the *Encyclopædia Britannica*. Mr. W. Catton Grasby being an experienced educationist, his *Teaching in Three Continents* (*Cassell*), in which he reviewed from personal observation the educational systems of the world, attracted much attention. Dr. Raven, the well-known antiquary, wrote a most interesting book on *The Church Bells of Suffolk* (*Jarroll*). Professor Sidgwick's *The Elements of Politics* (*Macmillan*), though not a popular, was a learned and exhaustive exposition of the subject. Another of the fruits of the International Copyright Act was seen in the fact that dramatists are now free, without risk of losing their rights, to publish the text of their plays. Hence we had Mr. Henry Arthur Jones' *Saints and Sinners* (*Macmillan*), and Mr. A. W. Pinero's *The Times* (*Heinemann*). Mr. George Bernard Shaw knows no fear, and his *Quintessence of Ibsenism* (*Scott*), although a hard book to read, was a wholehearted and audacious justification of the great Norwegian dramatist. Miss Lucy Garnett's *The Women of Turkey and their Folklore* (*Nutt*) was the outcome of long and painstaking research. The *Letters of Marie Bashkirtseff* (*Cassell*) failed to arouse in the same degree

the curiosity that her "Journal" had provoked. Canon Cheyne's Bampton Lectures on *The Origin and Religious Contents of the Psalter in the Light of Old Testament Criticism and the History of Religions* (*Kegan Paul*) was scholarly in style and exhaustive in treatment. Though susceptible of more popular handling than it received from Sir William Muir, *The Caliphate: its Rise, Decline, and Fall* (*Religious Tract Society*), could not have obtained more careful attention than he bestowed upon it. Who shall set bounds to the industry of Mr. G. A. Henty? Besides turning out three or four boys' books every year, and writing an occasional novel for older folk, pursuing his journalistic avocations the while, he appeared as a humourist in *Those Other Animals* (*Henry*), in which he wrote down many favourite quadrupeds, and wrote up many creatures that had previously been ostracised or damned with the faintest of praise. Father Didon's *Jesus Christ* (*Kegan Paul*) was remarkable rather for its pronounced devotional spirit than for critical and up-to-date exegesis. Mr. Bartlett's famous *Familiar Quotations* (*Macmillan*) appeared in what is now to be regarded as its permanent form. Despite defects, it is undoubtedly a great work, and its compiler has laid literary men under a heavy debt of gratitude for it. Sir Edwin Arnold's *Seas and Lands* (*Longmans*) consisted practically of the vivid letters written by him for the *Daily Telegraph* while he was on tour round the world. It need hardly be said that Mr. Froude's *The Divorce of Catharine of Aragon* (*Longmans*), which forms a supplementary volume to his "History of England," was characterised by all his fascination of style, and by the defects of his qualities. Mr. R. C. Lehmann's *In Cambridge Courts* (*Henry*) was a clever, indeed brilliant, series of studies, in prose and verse, of University life. Dr. Dale's *Fellowship with Christ, and other Discourses* (*Hodder & Stoughton*) were marked by fervour, thoughtfulness, toleration, and vigour of style. In its way one of the best and most entertaining books of the year was *The Colleges of Oxford: their Histories and Traditions* (*Methuen*), written by members of the University, and edited by Mr. Andrew Clark, M.A., of Lincoln College.

POETRY.—Decidedly the most interesting event in the poetic annals of '91 was the publication, in two sumptuously got-up volumes, of Mr. Ruskin's *Poems* (*George Allen*), under the editorship of Mr. W. G. Collingwood. These handsome books confirmed the opinion that though Mr. Ruskin was not inspired by divine afflatus, he had a very pretty gift of song. Mr. R. L. Stevenson's *Ballads* (*Chatto & Windus*) contained many powerful pieces. It was pleasant to see that popular appreciation of a richly endowed genius had reached such a pass as to warrant the issue, in one volume, of a cheap edition of the *Poetical Works of D. G. Rossetti* (*Ellis & Elvey*), which had received the devoted attention of his brother, W. M. Rossetti. In this connection, too, must be noted the one-volume edition of the complete *Poetical Works of Percy Bysshe Shelley* (*Macmillan*), with an introduction by Professor Dowden. Mr. Lewis Morris essayed to relate, in blank verse, *A Vision of Saints* (*Kegan Paul*), a poem that was highly thought of, while not perhaps rivaling his best. In *Ionia* (*George Allen*) we had really a reprint of a bygone singer well worthy of revival. The *Shorter*

Poems of Robert Bridges (*Bell*) met with an enthusiastic reception. Sir Edwin Arnold's sacred poem, *The Light of the World* (*Longmans*), encountered a good deal of caustic criticism. *Lapsus Calami* (*Macmillan*), by J. K. S.—understood to be a son of Sir James Fitzjames Stephen—displayed great skill in the application of lighter verse to topical subjects. Lord Houghton's *Stray Verses, 1889-90* (*Murray*), proved that its author was a poet like his father. Thanks were due to Messrs. Macmillan for their beautiful re-issue of the *Cambridge Shakespeare*, the text of which has been so laboriously and lovingly verified by Mr. Aldis Wright. Walter Crane's *Renaissance* (*Mathews*), although unequal, gratified his numerous admirers. There were many meritorious hits in the Rev. F. Langbridge's *A Cracked Fiddle* (*Methuen*). Alfred Austin's *Collected Works* (*Macmillan*) seemed, in the opinion of certain wisecracks, to have some bearing on the question of the succession to the Laureateship, as to which it is at present enough to say that there is no vacancy. In his *The Outcast: A Rhyme for the Times* (*Chatto & Windus*), Mr. Robert Buchanan cleverly held a brief for himself in the Byronic vein. Dolly Radford's *A Light Load* (*Mathews*) was smooth and tuneful. Mr. Alfred H. Miles' valiant attempt to provide a representative collection of the best work of *The Poets and Poetry of the Century* (*Methuen*), in which he has the help of some of the most competent critics of the day, was rewarded by a large share of public approval. The anthology will be completed in ten volumes, of which four have already appeared, namely: Vol. I., Cabbie to Coleridge; Vol. II., Southey to Shelley; Vol. III., Keats to Edward Lord Lytton; Vol. VI., William Morris to Robert Buchanan. Mr. Arthur Clark Kennedy's *Pictures in Rhyme* (*Longmans*) was much admired. As the efforts of a working man, Mr. J. Y. Geddes' *In the Valhalla* (*Dundee. Leng*) exhibited unusual promise. In the same category must be placed another volume by Mr. F. C. H. H. Miss Emily Hickey was seen to great advantage in *Michael Villiers, Idealist, and other Poems* (*Smith, Elder*). Another poetess, Miss Helen M. Waithman, displayed a gift of fine artistic song and a rare sense of appreciation of nature in *Charybdis, and other Poems* (*Eden, Kensington*). Mr. Alfred Hayes' *The March of Man* (*Macmillan*) contained pieces that were superior to the title-poem. Mr. Frederick Tennyson's *Daphne, and other Poems* (*Macmillan*) excited respectful attention. Mr. J. B. O'Hara's *Songs from the South* (*Ward & Lock*) showed that the Australian muse is, at any rate, melodious. Much that was agreeable was to be discovered in E. L. Tomlin's *Gleanings* (*Longmans*). Poor Miss Amy Levy's fine qualities were manifested in *A Minor Poet* (*Unwin*). Mr. W. Sharp's *Sospiri di Roma* (*Roma: Società Lasciale*) was pretentious or ambitious, and not over-successful. The *Blue Poetry Book* (*Longmans*) should be mentioned as an excellent selection from the best writers tastefully edited by Mr. Andrew Lang, who is always at home in this class of work. To the same category belonged the *Lyra Heroica* (*Nutt*), beautifully produced and adequately edited by Mr. W. E. Henley. *Verses Grave and Gay* (*Cassell*) by Miss Ellen Thorneycroft Fowler, daughter of the Right Hon. H. H. Fowler, M.P., showed an exceptionally clever and skilful touch, many of the

lighter pieces being particularly happy. Doubtless the world-wide fame that Mr. Lecky enjoys as an historian accounted for the interest that was generally taken in his *Poems (Longmans)*, which were pleasant without being otherwise remarkable.

SERIALS.—We are sorry to have to record that in consequence of ill-health, Mr. Leslie Stephen was compelled to retire from the editorship of *The National Dictionary of Biography (Smith, Elder)*, and to leave his co-editor, Mr. Sidney Lee, in sole possession of the chair. Mr. Stephen has been honourably identified with this great undertaking from the very first, but it must be satisfactory to him to feel that he has been succeeded by a man whom practically he has trained for the post. Meanwhile twenty-eight volumes of the Dictionary have now appeared, each quarterly volume being published with a punctuality that must put several metropolitan railway companies to the blush. *Chambers' Encyclopædia* has made solid progress, seven volumes having appeared, bringing the work down to "Pear." Reinforced by additional editorial assistance, Dr. Murray's *New English Dictionary (Clarendon Press)* will soon make more rapid strides. The "Great Explorers" Series of Messrs. George Philip and Son was enriched with biographies of Sir John Franklin, by Admiral Markham, and Livingstone and Central Africa, by Mr. H. H. Johnston. Messrs. Macmillan's series of "Twelve English Statesmen" nears completion, Mr. J. R. Thursfield's painstaking *Sir Robert Peel* making the tenth volume. The same publishers' more popular series of "English Men of Action" was increased by Mr. C. W. Oman's *Warwick, the Kingmaker*, and Mr. David Hannay's *Rodney*. Is it not time that Mr. William Archer whipped up his team for the "Great Actors" Series (*Kegan Paul*)? Mr. E. A. Parry's *Charles Macklin* is only the third volume in two years. Among the latest accessions to the "Rulers of India" Series of the Clarendon Press, Major-General Sir Owen Burne's *Oliver and Strathairn* may be named as perhaps the most praiseworthy. Mr. T. Roosevelt's *New York* and Mr. H. C. Lodge's *Boston* were distinct acquisitions to Messrs. Longman's "Historic Towns" Series. The most recent addition to the "International Scientific Series" (*Kegan Paul*) was Dr. Edridge Green's *Colour Blindness and Colour Perception*. To the "Badminton Library" (*Longmans*) there was added an excellent treatise on *Riding and Polo*, Capt. R. Weir handling the former subject, Mr. J. Moray Brown the latter. Messrs. Cassell and Company began a reissue of their *National Library*, freshening up the series from time to time by the inclusion of a new volume. The other outstanding series, such as the *Canterbury Poets*, *Camelot Classics*, as also the *Contemporary Sciences* series and *Great Writers* series of Mr. Walter Scott, all received additions during the year; but special mention may be made of the excellent *Life of Cervantes* contributed by Mr. H. E. Watts to the last-named. Eight volumes of Professor Henry Morley's *English Writers (Cassell)* have now appeared, increasing one's admiration of the author's heroism in attacking so heavy a task single-handed. Despite the demands thus made on his time, however, the Professor was enabled to undertake a pretty little series of *Companion Poets* for Messrs. Routledge, the first volume (Ayton's "Lays of the Scottish Cavaliers")

being particularly acceptable. If we may infer anything from the fact that a serial publication of Mr. Green's *History of the English People* was begun in September, and that the first part of Mr. Palgrave's *Dictionary of Political Economy* came out in August, Messrs. Macmillan would seem to be disposed to cultivate the serial part business. Though the final volume has not actually been published, it is in the press, and we may therefore congratulate Professor Whitney and his staff upon the splendid character in all respects of the *Century Dictionary (Unwin)*. The completion of so grand an enterprise is an achievement of which every one concerned in its production may feel proud.

TRAVEL.—In this department the year was, comparatively speaking, a blank. To everybody's relief, we have nearly got beyond reach of the Stanley-Emin controversy. It is true that we had to some extent in Dr. Dulcken's translation of Dr. Peters' narrative of the German Emin Pasha Expedition, *New Light on Dark Africa (Ward, Lock)*, but it was inevitable, of course, that Dr. Peters should have an opportunity of telling his story. And the same privilege belonged to Major Casati, whose *Ten Years in Equatoria and the Return with Emin Pasha (Ward)* was a temperately expressed and interesting description of his long residence in Central Africa. Probably Surgeon Parke's painstaking but ponderous *My Personal Experiences in Equatorial Africa as Medical Officer to the Emin Pasha Relief Expedition (Low)* may be regarded as the very last word on the subject, and fortunately it is at least a gentlemanly last word. The African book of most importance, however, was Mrs. E. H. S. Calder's translation of Dr. Haus Meyer's *Across East African Glaciers (Philip)*, an account of the first ascent of Mount Kilima-Njaro, with notes on the geological, botanical and entomological results of the expedition. Miss Menie Muriel Dowie's (now Mrs. Henry Norman) *A Girl in the Karpathians (Philip)* was generally over-rated. *Across the Border; or, Pathan and Bileoh (Chapman & Hall)*, a careful work by Mr. E. E. Oliver, M.I.C.E., attracted considerable attention by reason of the numerous illustrations by Mr. J. L. Kipling, the worthy father of a more famous son. Curiously enough, Mr. H. de Windt, in his *A Ride to India across Persia and Beluochistan (Chapman & Hall)*, dealt with certain aspects of the same subject. Miss Ellen Miller's *Alone through Syria (Kegan Paul)*, excellent in itself, was commended to favour by Professor Sayce. Mr. W. D. Pittcairn having something to say about a country not yet hackneyed, his *Two Years among the Savages of New Guinea (Ward & Downey)* was received with merited approval. But one of the most reasonable and most useful books in this branch was Archdeacon Moule's *New China and Old (Seely)*, in which he recited his personal recollections of thirty years' experience of the Celestials and the Flowery Land. On the other hand, the most learned and most solid book in this department was Mr. R. H. Codrington's study of the anthropology and folklore of *The Melanesians (Clarendon Press)*. Though rather superficial, Miss Isabel Morris gave a very pleasant account of *A Summer in Russia; or, Sunny Days in Southern Russia (Ward & Downey)*. Mr. H. W. Seton-Karr wrote a frank, readable, and intelligent description of *Bear hunting in the White Mountains; or, Alaska and British America Revisited (Chapman*

& Hall). Mrs. Grimwood told a thrilling story with considerable effect in *My Three Years in Manipur, and Escape from the Recent Mutiny (Beniley)*.

Literary Men Deceased (Dec. 1st, '90, to Nov. '91). See OBITUARY.

Liverpool New Harbour Improvements. (See last ed.) In reference to a scheme of dredging away the bar of the Mersey, which is such a serious obstruction to ocean-going vessels, Mr. G. F. Lyster, engineer to the Mersey Board, issued his report in Aug. '91. After less than a year's work the quantity of sand removed was 350,000 tons. The original estimate was that the removal of 800,000 tons would, provided there was no re-deposit, effect a deepening of 6 ft. 6 in. below the shallowest depth then found, viz. 11 ft. below low water spring tides, for a length of channel of 3000 ft., with a width of 1000 ft. It was also found that a local improvement in depth had taken place, which, it was inferred, was attributable to the dredging operations. On Aug. 13th a further expenditure of £6000 was sanctioned, and it was stated that over the whole space attacked there was now 16 ft., against 11 ft., of water.

Liverpool. Rt. Rev. John Charles Ryle, D.D., 1st Bishop of (founded 1880), eldest son of the late Mr. J. Ryle, M.P., of Macclesfield, was b. '46. Was educated at Eton, and at Christ Church, Oxford; graduating (30) Craven Scholar and first-class Classics. Rector of Helmingham (44-61); vicar of Stradbroke (61-80); appointed Bishop of Liverpool by Lord Beaconsfield ('80). Author of "Christian Leaders a Hundred Years Ago," "Expository Thoughts on the Gospels," in 7 vols., and other works.

Liverpool (Vyrnwy) Water Scheme. On the last Sunday in May '91 a temporary pipe line, consisting of 50 sections, of 12 in. steel flexible tubes 800 ft. in length, was laid across the Mersey to convey the Vyrnwy lake water to the Prescott reservoir. This line will be superseded in course of time by a permanent aqueduct. The water was stored at the Norton Tower, on the Cheshire side, 300 ft. above the river and 2 miles from it, and from the tower the pipe is 18 in. in diameter. After the water has been thus forced through the 12 in. pipe lying in the river bed, it reaches another larger pipe on the Prescott side of the Mersey at the rate of 4½ million gallons a day. On June 19th the valve admitting the water into the reservoir was opened, and the water was found to flow freely. Prescott reservoir is 6 miles from Liverpool. The total distance between Vyrnwy lake and Prescott is some 72 miles. It is singular that the water began to flow into the reservoir within a few hours of the time that the sea found its way into the first section of the Manchester Ship Canal (*q.v.*), close by. According to the Water Committee's report £2,063,287 had been expended on the scheme up to June 30th.

Livery Franchise. See SESSION, sect. 32.

Llandaff. Rt. Rev. Richard Lewis, Lord Bishop of. See founded in the sixth century. The present income is £4200. His lordship, the 93rd bishop, is the son of John Lewis, Esq., of Henllan, Narbeth, Pembroke, and was b. 1821. Ed. at Bromsgrove School, and Worcester Coll., Oxford. Graduated D.D. by diploma '83, in which year he was consecrated Lord Bishop of Llandaff. His lordship was formerly rector of Lampeter Velfry '51-83; Prebendary of Caerfarchell and of Myddim in St. David's Cathedral

'67-75; Archdeacon of St. David's; and chaplain to the Bishop of St. David's '75-83. His lordship presided at the Church Congress ('80) at Cardiff.

Lloyd, Edward, the famous tenor vocalist, was b. in London 1845. When seven years old he entered Westminster Abbey choir. Afterwards he became solo tenor at the Chapel Royal, St. James's. Mr. L. was engaged in '67 at Novello's Concerts, and in '71 at the Gloucester Festival, where he attracted much attention by his singing in Bach's "Passion." In '88 Mr. L. went on a tour in America, taking part in the Cincinnati Festival, where he obtained much applause. Mr. L. paid his second visit to the States (March '90), and again had a most successful tour. He sang with his usual artistic excellence at the Handel Festival (where he was honored for his rendering of "The enemy saith"), and at the Hereford and Birmingham Musical Festivals of '91.

"Lloyd's Clauses." These clauses are so important, and they are passing into such general use, particularly in London, Liverpool, and Glasgow, in contracts for marine insurance, that we repeat them, with the remark that although a bill of lading whose terms shall be absolute and unvarying is probably an impossible dream, the increasing adoption of Lloyd's clauses shows that this is not the case with contracts of marine insurance.—

F.P.A. Warranted free from particular average unless the vessel or craft be stranded, sunk, or burnt, each craft or lighter being deemed a separate insurance. Underwriters, notwithstanding this warranty, to pay for any damage or loss caused by collision with any other ship or craft, also to pay any special charges for warehouse rent, re-shipping, or forwarding, for which they would otherwise be liable, and to pay the insurance value of any packages which may be totally lost in trans-shipment. Grounding in the Suez Canal not to be deemed a strand, but underwriters to pay any damage or loss which may be proved to have directly resulted therefrom. **G.A. General Average** and salvage charges payable according to foreign official adjustment, if so claimed, or per York-Antwerp Rules, if in accordance with the contract of affreightment. **F., C. and S. Warranted free of capture, seizure, and detention**, and the consequences thereof, or of any attempt therat, piracy excepted, and also from all consequences of hostilities or warlike operations, whether before or after declaration of war.

Deviation. In the event of the vessel making any deviation or change of voyage, it is mutually agreed that such deviation or change shall be held covered at a premium to be arranged, provided due notice be given by the assured, or receipt of advice of such deviation or change of voyage. **Continuation Clause (Ship or Ships Policies).** In the event of any shipment coming upon this policy, the value of which is in excess of the sum then remaining available, it is mutually agreed that the underwriter shall grant a policy for such excess up to, but not beyond the amount of this policy, and the assured shall pay the premium thereon at the same rate. **Continuation Clause (Time Policies).** Should the vessel hereby insured be at sea on the expiration of this policy, it is agreed to hold her covered until arrival at port of destination at a premium to be arranged, provided due notice be given on or before the expiration of this policy. **No Thirds as applying to Iron Ships and Steamers.**

No thirds to be deducted except as regards ~~temp, rigging, and ropes, sails, and wooden deck.~~ **Lloyd's Warranties.** Warranted not to sail from the Baltic, White, or Black Seas, or British North America, between the 1st day of October and the 1st day of April, nor from the West Indies or Gulf of Mexico between the 1st day of August and the 12th day of January, nor to go to the Azores, nor to sail the Baltic before the 20th day of March or after the 10th day of September. **M. C.**

Warranted free from particular average below the load waterline, unless occasioned by fire or contact with some substance other than water.

Local Government (England and Wales) Act, 1888 (51 & 52 Vict. ch. 41), provides that a council shall be established in every administrative county as defined by this Act, and be intrusted with the management of the administrative and financial business of the county, and shall consist of the chairman, aldermen, and councillors. Three-fourths of the members of the council (the councillors) are to be elected by the burgesses and electors throughout the county, the other fourth (the county aldermen) are to be selected by the councillors. The county council is to be constituted and elected, and is to conduct its proceedings in like manner, and be in the like position in all respects, to the council of a borough divided into wards. Clerks in holy orders and other ministers of religion are not disqualified for being elected and being aldermen or councillors; and a person is qualified who, though not qualified in manner provided by the Municipal Corporations Act '82, as applied by this Act, is a peer owning property in the county, or is registered as a parliamentary voter in respect of the ownership of property situate in the county. The county councillors are to be elected for a term of three years, and are then to retire together. The county is to be divided into electoral divisions, each returning one councillor. The electors of the county councillors are to be, in a borough, the burgesses enrolled in pursuance of the Municipal Corporations Acts, and elsewhere the persons registered as county electors under the County Electors Act, 1888. The chairman of the council (who is not to be called mayor) is to be appointed by the council from amongst their number, and is by virtue of his office to be a justice of the peace for the county. There is to be transferred to the county council all business done by the quarter sessions in respect of the following matters:—The making, assessing, and levying of a county, police, hundred, and all rates, and the application and expenditure thereof, and the making of orders for the payment of sums payable out of any such rate or out of the county stock or county fund, and the preparation and revision of the basis or standard for the county rate; the borrowing of money; the passing of the accounts of and the discharge of the county treasurer; shire halls, county halls, assize courts, judges' lodgings, lock-up houses, court houses, justices' rooms, police stations, and county buildings, works, and property, subject, as to the use of buildings by the quarter sessions and the justices, to the provisions of this Act respecting the joint committee of quarter sessions and the county council; the licensing under any general Act of houses and other places for music or for dancing, and the granting of licences under the Race-

courses Licensing Act, '79; the provision, enlargement, maintenance, management, and visitation of and other dealing with asylums for pauper lunatics; the establishment and maintenance of and the contribution to reformatory and industrial schools; bridges and roads repairable with bridges, and any powers vested by the Highways and Locomotives (Amendment) Act '78, in the county authority; the tables of fees to be taken by and the costs to be allowed to any inspector, analyst, or person holding any office in the county, other than the clerk of the peace and the clerks of the justices; the appointment, removal, and determination of salaries of the county treasurer, the county surveyor, the public analysts, any officer under the Explosives Act '75, and any officers whose remuneration is paid out of the county rate, other than the clerk of the peace and the clerks of the justices; the salary of any coroner whose salary is payable out of the county rate, the fees, allowances, and disbursements allowed to be paid by any such coroner, and the division of the county into coroners' districts, and the assignment of such districts; the division of the county into polling districts for the purposes of parliamentary elections, the appointment of places of election, the places of holding courts for the revision of the lists of voters, and the costs of and other matters to be done for the registration of parliamentary voters; the execution as local authority of the Acts relating to contagious diseases of animals, to destructive insects, to fish conservancy, to wild birds, to weights and measures, and to gas meters, and of the Local Stamp Act, '69; any matters arising under the Riot (Damages) Act '68; the registration of rules of scientific societies; the registration of charitable gifts under 52 Geo. III., ch. 102; the certifying and recording of places of religious worship under 52 Geo. III., ch. 135; the confirmation and record of the rules of loan societies under 3 & 4 Vict. ch. 110; and any other business transferred by this Act. On any vacancy occurring in the office of coroner for a county, the county council is in future to appoint a fit person, but a person holding this office may not be an alderman or councillor for the county for which he is coroner. The county councils are to have power to purchase or take over existing bridges not being at present county bridges, and to erect new bridges; and there is to be transferred to them the business of the justices of the county out of sessions in respect of the licensing of houses or places for the public performance of stage plays, and of the execution as local authority of the Explosives Act, '75. There is reserved to quarter sessions business in relation to appeals against the basis or standard for the county rate, or against that or any other rate, and all business not transferred by the Act. The powers of quarter sessions with respect to the county police are to be exercised through a standing joint committee of the quarter sessions and county council, but nothing is to affect the powers, duties and liabilities of the justices as conservators of the peace, or the obligation of the police to obey their lawful orders given in that behalf. The Local Government Board is empowered to make from time to time a provisional order (which is subject to confirmation by Parliament) for transferring to county councils certain powers of the Privy Council, the Secretary of State, the Board of Trade, the Local Government Board, the Education De-

partment, or any other Government department, conferred by or in pursuance of any statute and appearing to relate to matters arising within the county, and to be of an administrative character. The entire maintenance of main roads is vested in the councils, though an urban authority may claim to retain the powers and duties of maintaining and repairing a main road within its district, and the council is to make an annual payment towards the cost of the same; the council and any district council may contract for the undertaking by the latter of the maintenance, repair, and other dealing with any main road, and the county council is empowered to contribute to the cost of maintenance, repair and improvement of any highway or public pathway in the county, although the same is not a main road. The county council is to have power, in addition to any other authority, to enforce the provisions of the Rivers Pollution Prevention Act '76 in relation to so much of any stream as is situate within any part of their county; to oppose bills in Parliament, to make bye-laws, and to appoint a medical officer of health. The proceeds of the duties on local taxation licences are, after the financial year ending on the 31st day of March, '89, to be paid by the Commissioners of Inland Revenue into the Bank of England to the local taxation account, and the amount ascertained to be the proceeds of the duties collected in each administrative county is to be paid to the council of each county. The licence duties referred to are those for the sale of intoxicating liquors by retail, to deal in game, for beer dealers, spirit dealers, sweets dealers, wine dealers, refreshment-house keepers, dogs, killing game, guns, appraisers, auctioneers, tobacco dealers, carriages, trade carts, locomotives, horses and mules, horse dealers, armorial bearings, male servants, hawkers, house agents, pawnbrokers, and plate dealers. The county councils are also to receive four-fifths of one-half of the probate duties. The probate duty grant is to be distributed in proportion to the share received by each county during the financial year '87-8 out of the grants heretofore made in aid of local rates, which will cease to be granted after the passing of this Act (see FINANCE, NATIONAL). All sums received by a county council in respect of licence duties or the probate duty grant are to be applied in paying the costs incurred in respect thereof, or otherwise chargeable thereon; in payment of the sums required to be paid in substitution for local grants, and of the grants required to be made in respect of costs of union officers; and in repaying to the general county account of the county fund the costs on account of general county purposes for which the whole of the area of the county is liable to be assessed to county contributions; provision is also made for the application of the surplus, if any. The sums to be paid by the county councils in substitution for local grants are, towards the remuneration of teachers in poor law schools, to public vaccinators, school fees for pauper children sent to a public elementary school outside the workhouse, to every local authority by whom a medical officer of health or inspector of nuisances is paid one-half of the salary of such officer; towards the remuneration of registrars of births and deaths; four shillings per week towards the maintenance of each pauper lunatic; for compensation payable to certain county officers; and one-half of the

costs for the pay and clothing of the police—in the case of the Metropolitan Police the various county councils concerned having to pay to the receiver of police in each year a sum bearing such proportion to the sum actually raised in the same year by rates from the parishes in that county for the said purpose as the Secretary of State certifies to be the proportion which would have been contributed out of the Exchequer under the arrangement in force during the financial year next before the passing of the Act. Each of the following boroughs is for the purposes of the Act to be an administrative county of itself: i.e.—Barnow, Bath, Birkenhead, Birmingham, Blackburn, Bolton, Bootle-cum-Linacre, Bradford, Brighton, Bristol, Burnley, Bury, Canterbury, Cardiff, Chester, Coventry, Croydon, Derby, Devonport, Dudley, Exeter, Gateshead, Gloucester, Great Yarmouth, Halifax, Hanley, Hastings, Huddersfield, Ipswich, Kingston-upon-Hull, Leeds, Leicester, Lincoln, Liverpool, Manchester, Middlesbrough, Newcastle-upon-Tyne, Northampton, Norwich, Nottingham, Oldham, Plymouth, Portsmouth, Preston, Reading, Rochdale, Saint Helen's, Salford, Sheffield, Southampton, South Shields, Stockport, Sunderland, Swansea, Walsall, West Bromwich, West Ham, Wigan, Wolverhampton, Worcester, York. The mayor, aldermen, and burgesses of each county borough are, subject to certain modifications, to have all the powers of a county council under the Act in so far as they are not already in possession of or subject to the same, but they will still be governed in many respects by the Municipal Corporations Act; and the provisions of the Local Government Act with respect to the constitution, election, proceedings, or position of the county council or the chairman thereof, the county treasurer and other county officers, the standing joint committee of the justices and the council, coroners, gas meters, the transfer to the council of powers relating to county and other rates, and the preparation or revision of the basis or standard for the county rate, are not to apply to county boroughs. Nor is Part IV. of the Act, relating to finance, to apply, save so far as is expressly provided. Provision is made for an adjustment of the financial relations between counties and county boroughs by agreement or by the Commissioners (the Earl of Derby, Mr. Shaw Lefevre, M.P., Mr. J. L. Wharton, M.P., Mr. F. Mowatt, C.B., and Mr. J. J. Henley) appointed under the Act. A quarter-sessions borough not being a county borough, but containing a population of 10,000 or upwards, is to retain its powers as local authority under any Act (save as in this Act expressly mentioned) and under the Municipal Corporations Act, but, subject to these provisions and to other savings, the borough is to form part of the county for the purposes of the Act. In the case of quarter-sessions boroughs of a population of less than 10,000, or in the case of a borough of a population of under 10,000, provision is made for transferring to the county council several of the powers and duties those boroughs at present enjoy. The Metropolitan, as defined by the Local Management Acts, is to be an administrative county of itself, by the name of the administrative county of London. The area in question forms part of the counties of Middlesex, Surrey, and Kent, which part is now to be severed from those counties, and is to have a lord-lieutenant, a sheriff, a commission

of the peace, and a court of quarter sessions of its own; though for the purpose of the jurisdiction of the justices under such commission and of such county, as well as for other non-administrative purposes, the City of London may continue a separate county, with its own sheriffs, who are, however, no longer to be jointly Sheriff of Middlesex. The number of county councillors for the administrative county of London is to be 118, or double the number of members (59) returned by the parliamentary boroughs in the Metropolis; each borough or each division thereof being an electoral division for the purposes of the Act; the number of county aldermen in the county of London is not to exceed one-sixth of the whole number of the county councillors; the powers, duties and liabilities of the Metropolitan Board of Works are to be transferred to the London County Council, and the Board is to cease to exist. The Metropolitan Police remain under the control of the Home Secretary, the City is placed in the position of a quarter-sessions borough, and retains control of its own police; the Common Council, and in any other part of the Metropolis the district board, may claim to retain the power of maintaining and repairing the main road. The Sheriffs of the City of London are not to have any authority except in the City, and a Sheriff is to be appointed by the Crown for that part of Middlesex which is outside the county of London. The London County Council may petition Her Majesty to appoint a barrister of not less than ten years' standing to be paid chairman or deputy chairman, or one of the paid deputy chairmen, as the case may be, of the quarter sessions for the county of London. The rights claimed by the Court of Common Council to appoint to the offices of Common Serjeant and Judge of the City of London court are to cease, and in any future vacancy in each of the said offices, the Queen is to appoint a duly qualified barrister to be such common serjeant or judge; and from and after the next vacancy no recorder is to exercise any judicial functions unless he is appointed by Her Majesty to exercise such functions. The London County Council is to pay to each poor law union within its limits such sums as the Local Government Board may certify to be due from time to time in substitution for local grants towards the remuneration of poor law medical officers, and towards the costs of drugs and medical appliances, and is also to grant to such unions 4d. per head per day for every indoor pauper. The London County Council may from time to time appoint any fit person to be deputy chairman, and to hold office during the term of office of the chairman, and may pay to such deputy chairman such remuneration as they may from time to time think fit. Part IV. of the Act enables a county council, with the consent of the Local Government Board, to borrow, for purchasing any land, or building any building authorised by any Act, for any permanent work which they are authorised to execute or do, for making advances in aid of the emigration, or colonisation, of inhabitants of the county, with a guarantee for a repayment of such advances from any local authority in the county, or the Government of any colony; and for any purpose for which quarter sessions or the county council are authorised to borrow; but where the total debt of the county council exceeds, or if the proposed loan is borrowed will exceed, the amount of one-tenth of the annual rateable value of the property in the county, the amount

shall not be borrowed except in pursuance of a provisional order made by the Local Government Board, to be confirmed by Parliament. Loans under this section are to be repaid within a period not exceeding thirty years; an annual budget is to be submitted to each county council. The supplemental provisions of the Act include certain regulations for bicycles, etc. The first election of county councillors was appointed for January '89, and the county councillors elected at the first election were to retire on the ordinary day of election in November in the third year after the passing of the Act; and of the first county aldermen one half, to be determined by ballot, were to retire in November in the third year after the passing of the Act, and the remaining half were to retire in November in the sixth year; but by the County Councils Elections Act, 1891, the ordinary day of election of county councillors in each county is to be such day between the 1st and 8th day of March as the County Council may fix, and if no date is so fixed is to be the 8th day of March. The 16th day of March or such other day within ten days after the ordinary day of retirement of county councillors (which is now to be the 8th of March in every third year) as the council may from time to time fix is in substitution for the 4th of Nov. to be the ordinary day of election of the chairman and of the aldermen, and the day for holding a quarterly meeting. The next County Council elections will therefore take place in March, and one half the aldermen will continue in office until March '95, instead of until Nov. '94. Further grants in aid of county and county borough funds were made by the Local Taxation (Customs and Excise) Act, 90. See FINANCE, NATIONAL; and COUNTY COUNCILS.

Local Government Board, which was constituted August 19th, 1871, under an Act passed earlier in the same year, was established to take over all the powers and duties vested in or imposed on the Poor Law Board (which Board from that time ceased to exist) under the Acts relating to the relief of the poor, the powers vested in or imposed on the Home Secretary in regard to the registration of births, deaths and marriages, public health, local government, sanitary matters, baths and washhouses, public improvements, towns improvement, artisans' and labourers' dwellings, returns as to local taxation, and the powers and duties of the Privy Council with regard to the prevention of disease and vaccination (*q.v.*). Since that time its powers have been increased, and its sphere and operations extended by many statutes. The Board consists of a president and of certain *ex-officio* members, all of whom are members of the Government for the time being. The president is assisted by a parliamentary secretary, a permanent secretary (who is Sir Hugh Owen, K.C.B.), and a numerous staff of officers and inspectors, etc. The duties of the Department include a general supervision and control of the administration of the Poor Law (*q.v.*), the inspection especially of Metropolitan vagrant wards, workhouse schools, and the regulation of infirmaries; and it may authorise the emigration of orphan and deserted children. Its medical department includes a medical inspector and staff for general sanitary purposes, under it being the National Vaccine Establishment and the animal vaccine lymph stations. It may order the appointment

by sanitary authorities of medical officers of health and inspectors of nuisances, may constitute a port sanitary authority in certain cases, carry out local inquiries as to special epidemics, and may make orders as to dairies and cowsheds. It inspects alkali works and canal boats. It has certain statutory powers as to bridges and highways. It examines the accounts of boards of guardians and other local bodies, and may make disallowances and surcharges. It may sanction, after due inquiry by members of its staff, the borrowing of loans for cemeteries, sanitary improvements, improvement schemes, workhouse buildings, water supply, baths and washhouses, and for other purposes; and it satisfies itself that any sums advanced by the Public Works Loans Commissioners are applied to the work for which they were intended. It grants provisional orders for the constitution or the alteration of unions and the division of parishes, for the acquisition of land, and for certain other local objects. It reports to Parliament upon local bills, and it publishes periodical returns as to the prevalence and cost of pauperism, sanitary matters, vaccination, local taxation and the valuation of property, and the financial position of the local authorities of England and Wales. It exercises numerous and important functions under the Local Government Act. For example, it determines the number and apportionment of county councillors in certain cases; it may make provisional orders transferring certain powers under local Acts to a county council, and the powers possessed by certain Government departments and other authorities under general Acts to county councils generally; it may, on the application of two or more local authorities, grant a provisional order creating a body capable of dealing comprehensively with the whole of a river under the Rivers Pollution Prevention Act; it may grant an order for altering the boundary of any county or borough, or constituting any borough having a population of not less than 50,000 into a county borough, or for uniting two county boroughs, —all of which provisional orders are subject to confirmation by Parliament. Notice of a petition for the grant of a charter of incorporation to a new borough must be sent to it, and any representations it may make are to be considered by the Privy Council; it may in certain cases arbitrate regarding the amount to be paid by the county council to an urban authority for the maintenance of main roads; it certifies as to the share heretofore received by each county out of the grants in aid of local rates, this being the basis on which the Probate Duty Grant is to be distributed; it certifies the amount due from county councils in substitution for local grants for Poor-Law purposes; county councils cannot borrow for certain purposes without its consent; it prescribes regulations as to the creation, issue, etc., of county stock; and it appoints the district auditors who are to audit the county accounts. A water examiner under the Board reports on the condition of the water supplied by the eight Metropolitan Water Companies. The powers of supervision and control exercised by the Department extend over the Metropolitan Asylums Board. Under the Census Act '90 the Local Government Board was the central superintending authority in England, and prescribed the necessary forms and instructions which

were prepared and issued by the Registrar-General in reference to the Census of '91.

Local Government in Rural Districts. See Session, sect. 33.

Local Option. This phrase is now applied to such legislation as would enable the inhabitants of districts to reduce or extinguish the sale of intoxicating liquors in their own midst. The Local Option resolution was first moved by Sir Wilfrid Lawson on March 11th, 1879, and again on March 5th, '80, being rejected by majorities of 88 and 114. But on June 18th, '80, he again brought it on in the Parliament recently elected, and it was carried by a majority of 29. In '81 another motion was carried by 42 majority, and a third motion in '83 by a majority of 87. There has yet been no legislation on the subject, but it is believed that some means will be adopted before long by which the issue or renewal of licences will be put under the power of localities. There are several schemes of Local Option seeking to effect a reform in the licensing system, but Sir W. Lawson and the United Kingdom Alliance are only desirous of a power of direct veto, by which the electors of any place might veto, if so pleased, the issue of all licences for the sale of liquor, and thus stop among themselves the sale of strong drink with its attendant evils. The phrase "Local Option" is borrowed from a letter by Mr. Gladstone in '68, when, writing on the subject of the Permissive Bill, he said that he was disposed to "let in the principle of local option wherever it is found satisfactory." The difficulty which has hitherto stood in the way of Local Option in the liquor trade has been that of deciding what considerations should determine a "locality," who should be the constituents, and what should be the majority necessary to vote the abolition of the trade. A further question is that of compensation to those who have invested in the trade in a locality where a subsequent vote excludes it.

Local Taxation. From the return just issued for the year 1889-90 it appears that the total amount of poor rates raised during the year was £15,820,594, including £80,502 contributed by Government in lieu of poor rate. Of this amount the following sums were paid on precepts to other than Poor-Law authorities:—

Payments for county, borough, or police rates	£6,238,420
„ to highway boards or rural sanitary authorities for highway purposes	738,101
„ to burial boards	113,094
„ to rural sanitary authorities for sanitary purposes	156,202
„ to school boards	790,713
„ to commissioners of baths and washhouses	21,530
„ to free library commissioners . .	8,345
„ to urban sanitary authorities for school attendance committee expenses	4,832
„ to conservators of commons . .	165
Total	£8,071,408

The expenditure (excluding that defrayed out of loans and payments, other than contributions under precepts, to other local authorities) amounted to £17,735,714, of which £8,557,199 was spent on purposes altogether unconnected

with the relief of the poor. The principal items of the expenditure on the relief of the poor, and purposes connected therewith, were:—

In-maintenance	£1,899,648
Out-relief	2,453,860
Maintenance of lunatics in asylums or licensed houses	1,221,718
Workhouse or other loans repaid, and interest thereon	605,327
Salaries and rations of officers, and superannuation allowances	1,394,687
Other expenses	859,104
Total	£8,434,345

The expenditure on purposes unconnected with the relief of the poor was as follows:—

Payments to local authorities other than Poor-Law authorities	£8,071,402
School attendance committee expenses	42,850
Payments on account of the Registration (Births, Deaths, etc.) Acts	92,682
Vaccination fees and expenses	85,606
Parliamentary and municipal registration, and cost of jury lists	193,821
School fees for non-pauper children	36,481
Other expenses	34,357
Total	£8,557,199

The expenditure partly connected with the relief of the poor and also with other purposes was:—

Costs of legal proceedings	£54,800
Payments under the Union Assessment Committee Acts	72,681
Salaries and superannuation allowances of parochial officers, and other expenses partly connected and partly unconnected with the relief of the poor	616,689
Total	£744,170

Loch, Sir Henry, G.C.M.G., K.C.B., Chief Commissioner of the Cape. In the course of his diplomatic career was taken prisoner during the war with China, and subjected to much cruelty and insult. With Mr. Bowby, correspondent of the *Times*, his fellow-prisoner, he was carried about in a cage by his captors and exhibited to the natives. After his liberation he returned to England, and was appointed Governor of the Isle of Man, where he effected many public improvements and legislative reforms, including the reconstitution of the House of Keys. He was subsequently appointed to the Mines department of Her Majesty's Woods and Forests. Afterwards became Governor of Victoria, where he made himself very popular. G.C.M.G. '87. He was appointed (April '89) to succeed Sir Hercules Robinson as Chief Commissioner at the Cape. Arrived in England with Mr. Cecil Rhodes (Feb. 2nd, '91), and after a short visit returned to the Cape.

Lockyer, Joseph Norman, F.R.S., was b. at Rugby 1836. Appointed to the War Office ('57), and editor of *Army Regulations* ('65). He was subsequently transferred to the Science and Art Department. Elected F.R.S. ('69). He was chief of the *English Government Expedition to Sicily* ('70), and to *India* ('71). Bakerian Lecturer, '88. Inaugurated the series

of Saturday afternoon lectures at South Kensington Museum (Feb. '89). He has published several works on astronomy, and has done much to advance the interests of that science. The Syllabus of Physiography recently issued by the Science and Art Department for the guidance of students and teachers of elementary physics was prepared by Mr. Lockyer. He was awarded the *Janssen Prize* for Astronomy by the Academy of Sciences ('90). Mr. L. is the editor of *Nature*. Published recently an erudite work entitled "The Meteoritic Hypothesis."

Loire Maritime Canal. From Paris, Aug. 13th, '91, it was announced that this canal, which was begun in '81, would probably be opened in Jan. '92. It has cost 18 million francs, and will permit vessels of about 18 ft. draught to get up to Nantes at low tide.

London Chamber of Commerce, The. Incorporated under the Limited Liability Act, Oct. '87. First President, Mr. Chas. Magniac (then M.P.); Second President, Mr. J. Herbert Tritton; Third President, Rt. Hon. Sir John Lubbock, Bart, P.C., M.P., etc. The L. C. C. takes cognisance of all questions affecting the good of the community at large, and which from time to time occupy the attention of the mercantile world. Among these topics may be mentioned the Anglo-French, Spanish and many other Treaty negotiations, the annexation of Burmah, the Russo-Chinese Treaty of Kuldja, foreign telegraph rates, Postal Reforms, Railway Rates, British interests in Africa, etc. A number of subjects, both home and foreign, similar to these are considered yearly by the meetings, and whatever steps after due deliberation are considered advisable to be taken upon them, by way of petitioning Parliament or communicating with Government departments, are adopted. The Chamber, too, has frequently been consulted confidentially by Government concerning matters affecting trade. The affairs of the Chamber are governed by a Council. From its first formation the Chamber has adopted the principle of dividing itself into sections, each dealing with some particular subject, and thirty-four trades have already been organised in this way. The Chamber has on its premises the nucleus of a valuable commercial library, to which presentations have been made by the late Mr. Samuel Morley, Sir John Lubbock, M.P., and others. The principal work effected in '91 was the continuation of an effective opposition by the Chamber, in conjunction with other bodies, to the proposals of the railway companies under the *Railway and Canal Traffic Act* of '88, opposition to the *Artificial Manures, etc. (Adulteration) Bill*—which was eventually dropped—the *Inflammable Liquids Bill*—introduced by the Home Secretary, and withdrawn in face of the powerful opposition organised mainly by the Chamber, reporting to the Board of Trade Committee, in respect of the proposed new French Customs Tariff, and numerous other matters of more or less importance to commercial men. The scheme of *Commercial Education* (*q.v.*), on which the Chamber has been engaged for some five years past, was further adopted by schools and teaching institutions, the first examination for junior commercial certificates taking place in March '90, and the second in June '91. A special feature of the proceedings of the Chamber is the delivery of addresses by specialists on a variety of subjects. In this way, in '91,

Mr. Arthur Cohen, O.C., dealt with "Instruments of Value"; Mr. E. A. Maund with "Trade Prospects in Zambesia"; Sir Geo. Baden Powell, K.C.M.G., M.P., with a "New Mail Route to China and Australia via the Canadian Pacific Railway"; Admiral Grant with "The State of Trade in the South American Republics" and Mr. H. E. Russell with "British Trade Prospects in the Soudan." **President**, Sir J. Lubbock, Bart., M.P. **Organ**, *Chamber of Commerce Journal* (monthly). **Office**, Rotolph House, E.C. **Sec. and Editor**, Mr. K. B. Murray.

London Congregational Union. This, the only society representing the interests of London Congregationalists, was formed in March 1873. The limits of its operations are comprised within the area known as Greater London, including the whole of Middlesex, and such portions of Surrey, Kent, Essex and Herts as are within twelve miles of Charing Cross, these being divided into ten districts. The objects of the Union are to promote the spiritual intercommunion of the Congregational churches of the Metropolis, to aid such of them as are weak, to advance their common religious and social interests, and further to promote church extension. An annual average of about £3500 is expended in aiding churches to support their ministers and in extending and consolidating mission work. In addition, grants are made in aid of Chapel Building, and Free Loans are granted for a term of years from a fund amounting to £11,050. About £19,000 has been raised during the last seven years for children's breakfasts, and other philanthropic work. Upwards of 220,000 garments have been distributed. Mr. E. Wilson Gates is the Superintendent of the philanthropic work. The membership of the Union consists of the representatives of affiliated churches and of ministerial, personal and honorary members. The Council consists of sixty members; thirty ministerial and thirty non-ministerial, together with the Chairman, ex-Chairman, Chairman-elect, Treasurers, and Secretary. Each District Committee is entitled to nominate for the Council in the proportion of one member for every seven affiliated churches in the district. Fourteen members retire annually, and these are not eligible for reappointment before the following annual election. The chairman for '92 is Rev. Alfred Rowland, LL.B., B.A. **Offices**, Memorial Hall, Farringdon St., E.C. **Sec.**, Rev. A. Mearns.

London, Corporation of the City of, consists of the whole body of the citizens or freemen, under the style of "the Mayor, Commonalty, and Citizens." The small portion of this great Metropolis which is comprised within the City and its liberties is divided into 37 wards, including Bridge Without. There is an alderman for this ward, but no freemen and no common councillors. Each of the other wards, with the exception of the two Cripplelegate wards (which return an alderman jointly), elects one alderman and a number of common councillors varying from 4 to 16, but amounting in all to a total of 232. An alderman is elected when a vacancy occurs, and holds office for life; the Councillors are elected on St. Thomas's Day, and hold office for one year, but are of course eligible for re-election. The electors are in each case freemen, who may have obtained their freedom by birth, apprenticeship, purchase, or gift; but who must be rated householders before they

can vote at a ward-mote, as a meeting of the ward is termed. A liveryman is a freeman who, by payment of a fee, has entered the livery of, one or other of the City companies or guilds, and was first so called because he was entitled to wear the livery of his company. He has the right to vote at the elections of Lord Mayor, sheriffs, chamberlain, and other Corporation officers, and also for M.P.s for the City. The Lord Mayor is elected on Sept. 29th by the liverymen of the several companies assembled together at the Guildhall, and as it is termed in Common Hall, and to be eligible he must have served as sheriff of London. The Livery may select any alderman thus qualified, but they almost invariably accept the names of the two senior aldermen who have not passed the civic chair. A poll, to be taken by ballot, may however be demanded, if necessary. The names of the two selected aldermen are then submitted to the general body of the aldermen, who choose usually the first, but sometimes, for a special reason, prefer the second. The Lord Mayor elect is presented to the Lord Chancellor to receive the assent of the Crown to the election; he is sworn before the retiring Lord Mayor and aldermen on Nov. 8th, and on Nov. 9th he is escorted by the citizens in procession to the Royal Courts of Justice to be presented to the Lord Chief Justice and again sworn. The mayoralty thus commenced lasts a year, but the same alderman has in some instances been re-elected for a second, and in ancient times for even a third period of service. His public duties absorb every moment of the Lord Mayor's time, and the £10,000 annually voted by the Corporation does not anything like cover his expenses while in office. He is expected to preside during the day over meetings for public or benevolent objects, and to take part in many important ceremonies: to open schools, distribute prizes, initiate subscriptions for relief of distress; and by night to entertain eminent and distinguished personages at his official residence, or to preside at Charity Festivals. As head of the Corporation he presides at Common Hall, the Court of Aldermen, and the Court of Common Council, and may have to attend committees, and the Commissioners of Sewers; he presides at the justice room of the Mansion House, and is first commissioner of the Central Criminal Court; he is a trustee of St. Paul's and a governor of the Royal Hospitals and other institutions, and several charities. He is head of the Thames Conservancy Board. He is styled "right honourable," and, although not actually of the Privy Council, he attends when, on the demise of the Crown, the new sovereign is proclaimed; and at the coronation he is present as chief butler, receiving therefor a golden cup and cover. [The present Lord Mayor is Alderman Evans, (q.v.), while the Lord Mayor's private secretary is Mr. W. J. Soulsby (q.v.), Mansion House.] The alderman of the ward presides over the ward-mote for the election of common councillors. Each alderman is a justice of the peace, and may preside at the Guildhall or Mansion House justice rooms. The aldermen are the bench of magistrates for the City, the visiting justices to the prisons; they admit freemen, and decide disputes at ward elections. When a vacancy in the aldermanic representation of the ward of Bridge Without occurs, they choose one of their number, usually the senior alderman, to fill it, whose successor in the ward

he retires from is elected in the usual manner. **The Lord Mayor** is elected in the Court of Common Council, the full title of which is "Lord Mayor, Alderman, and Commons of the City of London in Common Council assembled," and no business can be done unless some of each body be present. **The Common Council manages the financial and general affairs of the Corporation**, has charge of its own police (see METROPOLITAN AND CITY POLICE), lets its lands, has full power over its funds, and has charge of certain of the Thames bridges. **The Recorder** (Sir T. Chambers, Q.C., salary £3500, and £57 as steward of Southwark) presents the Lord Mayor elect to the Lord Chancellor and to the Lord Chief Justice, is principal adviser of the Lord Mayor, and attends him on all occasions of State ceremony. He tries cases in the Mayor's Court, is one of the judges in the Central Criminal Court, and is chairman of quarter sessions for the City. This officer is appointed for life by the Court of Aldermen, but from and after the next vacancy he is not to exercise any judicial functions unless he is appointed by Her Majesty to exercise such functions. **The Chamberlain** (Mr. Benjamin Scott, F.R.A.S., salary £2500, who has held this office since 1858) is elected by the Livery on Midsummer Day, and comes up annually for re-election. He receives the revenues of the Corporation or City cash, pays all salaries, charges, and outgoings, and has the custody of accounts, admits all duly qualified persons to the freedom, and is custodian of the records relating to freemen. **The Common Serjeant** (Sir W. T. Charley, Q.C., D.C.L., salary £2500) attends the Lord Mayor on all state occasions, and is present at meetings of the Court of Aldermen or Common Council; he is a legal adviser of the Corporation, one of the commissioners at the Central Criminal Court, a judge of the Mayor's Court, and acts on certain occasions as Deputy Recorder. **The Town Clerk** or Common Clerk (Sir J. Monckton, F.S.A. (q.v.), salary £3500) keeps the charters and records of the City, and attends all courts held before the Lord Mayor and aldermen. He signs documents with his surname only. **The Remembrancer** (Mr. G. P. Goldney, salary £2000) attends the Lord Mayor on certain days, puts the Corporation in mind of the business to be transacted, attends the Parliament House during session, and watches the interests of the Corporation in all legislative matters. **The Sword Bearer** (Mr. Wm. ar) carries the sword, being the emblem of justice, before the Lord Mayor. The last four are appointed by the Common Council. In any future vacancy in the offices of Common Serjeant and Judge of the City of London Court, the rights claimed by the Court of Common Council to appoint to such offices are, under the Local Government Act, to cease, and it shall be lawful for the Queen to appoint a duly qualified barrister to be such Common Serjeant or Judge. See also CORPORATION OF LONDON.

London, County Council for. See COUNTY COUNCILS, sect. 4.

London Great Tower (see last ed.). On July 25th, '91, at the invitation of the Tower Company, a large party made an inspection of the Wembley Park estate, which is being laid out as a pleasure ground. The estate consists of 280 acres of well-wooded land between Willesden and Harrow, and the Metropolitan Railway Company have already opened a station there. One-half of the estate is to be

devoted to building, and the rest to be laid out as a park with lake. The tower will stand on an eminence 174 ft. above sea level, and will be 16 ft. higher than the Eiffel Tower at Paris (about 1,200 ft. in all). The designs submitted will not be strictly adhered to, and there will be two lifts, one the "Express," taking the passengers direct to the top in about 24 minutes, and the other stopping at each stage. Sir Benjamin Baker was appointed engineer of the enterprise. On Oct. 21st, the Company took 124 acres of the Wembley Park estate on a lease of 999 years.

London-Paris Telephone. See POST OFFICE AND ELECTRICITY.

London, Rt. Hon. and Rt. Rev. Frederick Temple, Lord Bishop of. This see was founded at a very early date, the bishops formerly possessing archiepiscopal powers. The income of the see is £10,000, and in precedence it ranks after Canterbury and York. His lordship is the son of the late Lieut.-Governor of Sierra Leone, and was educated at Tiverton Grammar School and Balliol Coll., Oxford, graduating B.A. (double first, '42), B.D. and D.D. ('58). Formerly his lordship was Fellow and Mathematical Tutor of his College, and was appointed Principal of the Training College at Kneller Hall, Twickenham ('48), resigning this appointment '55. Appointed ('58) **Head Master of Rugby School**, a member of Lord Taunton's Education Commission ('64), Chaplain-in-ordinary to Her Majesty; Bishop of Exeter ('69), translated to London ('85). His lordship is the author of the opening essay, "Education of the World," in the "Essays and Reviews." His lordship is the author of "Sermons Preached at Rugby" ('58-65), and "The Relation between Science and Religion, being the Bampton Lectures for '84."

London Salvage Corps. Was established in 1868, when the London Fire Engine Establishment was transferred to the Metropolitan Board of Works by the Fire Insurance Companies, and re-formed as the Metropolitan Fire Brigade. The S. C. was established by and has since been maintained at the expense of the **Fire Insurance Companies**, who bear the cost rateably. It is managed by a Committee of the leading officials of the Companies, the Secretary of each of which is a member. Mr. E. Brace Hall is the Chief Officer of the Corps. The remainder of the Corps consists of 5 superintendents, 10 foremen, 18 first, 20 second, 40 third class men and 7 coachmen. A good system of pensioning and insuring the lives of the members exists, somewhat similar to that of the Metropolitan Fire Brigade (q.v.). The number of fires attended in '90 (latest return) by the S. C. was 19,941, at which 6257 salvage services were rendered by the Corps. The number of watching duties performed was 204,603, which has caused the employment of temporary assistance. The receipts of the Corps for '90 amounted to £29,585 4s. 8d., made up as follows: viz., £4,714 for rate in aid from the Fire Insurance Companies, £14,008 12s. 6d. for services and turn-outs, £750 from the Wharf and Warehouse Committee, £1,426 0s. 6d. from rents, £421 2s. 7d. from interests, and £6,353 19s. 7d. from watching. The expenditure was £29,074 9s. 10d., which, among numerous other items, includes £11,851 7s. 1d. for salaries, £7,547 16s. 3d. for rents and taxes, and £1,074 13s. 4d. for coach and horse hire. The Corps has five stations, and owns a great number

of salvage vans. All the stations are in communication by telephone, and with the Chief Office and superior stations of each District of the Metropolitan Fire Brigade. Headquarters of the S. C., Watling Street, E.C.

London School Board. See SCHOOL BOARD FOR LONDON.

London Subway Railways. See CITY AND SOUTH LONDON RAILWAY, and CENTRAL LONDON RAILWAY, also previous eds.

London University is an examining body with the power of conferring degrees, which it does under its 4th royal charter, dated 1863. In '78 it received an additional charter admitting women to all degrees without exception. Besides holding examinations in London, the University extends them when required to the provinces and the colonies. From its foundation, in '36, to '89 inclusive, it had examined 71,719 candidates. Lord Derby is the Chancellor, and Sir James Paget the Vice-Chancellor. Parliamentary representative, Sir John Lubbock, Bart. The degrees with their distinguishing hoods are:—**L.L.D.** (*hood* scarlet cloth, with a lining of blue silk); **L.L.B.** (*h.* black silk, with an edging of blue silk); **A.M.** (*h.* black silk, with an edging of blue silk, with an edging of white silk, with an edging of blue silk); **M.D.** (*h.* scarlet cloth, with a lining of violet silk); **M.S.** (*h.* black silk, with a lining of violet silk); **M.B.** and **B.S.** (*h.* black silk, with an edging of violet silk; if a member of Convocation, black silk or stuff, with a lining of violet silk, edged with violet silk); **D.Sc.** (*h.* scarlet cloth, lined with gold-coloured silk); **B.Sc.** (*h.* black silk or stuff, edged on the inside with gold-coloured silk, or, if a member of Convocation, lined with white silk edged with gold-coloured silk); **D.Lit.** (*h.* scarlet cloth, lined with russet-brown silk); **M.A.** (black silk, lined with russet-brown silk); **B.A.** (*h.* black silk or stuff, edged on inside with russet-brown silk, or, if a member of Convocation, with a lining of white silk, edged with russet-brown silk); **D.Mus.** (*h.* blue silk, with a lining of white watered silk, or, if a member of Convocation, scarlet cloth, with a lining of white watered silk); **B.Mus.** (*h.* blue silk, with a lining of white watered silk). A necessary preliminary to proceeding in any faculty is the passing of the **Matriculation Examination**. For the regulations of this and other examinations apply to the Registrar, Mr. A. Milman, M.A. Univ., Burlington Gardens, Piccadilly. Consult *London University Calendar*.

London Wesleyan Mission. The. This movement was the outcome of the interest aroused by the "Bitter Cry" issued in '85 by the Congregational Union. On March 10th, '85, a great meeting was held in the City Road Wesleyan Chapel to initiate a work amongst the outcast classes of London. A large sum of money was speedily raised, and the work was started. (1) In the **East End** by the Rev. Peter Thompson, at St. George's-in-the-East, who, assisted by several lay agents—men and women—has since extended his work to "Paddy's Goose" (a notorious old public-house in Ratcliff Highway, now used as a mission hall), Wilton's Theatre, the Seamen's Chapel, Commercial Rd. and Old Gravel Lane. (2) **St. John's Square, Clerkenwell**, by the Rev. J. E. Wakerley. This branch is intended as an effort amongst the working rather than the outcast classes, though both are aimed at. The chapel at St. John's Square was an old one, worked under the ordinary Wesleyan rules, with a very small

congregation. In three years the congregation has been increased from about 100 to 1000, and is extending on all sides, and a working men's club and girls' parlour have now been added; the Leysian Mission, Whitecross Street and Camden Street, are also under the care of the superintendent of this branch. (3) What is known as the **West London Mission**, at St. James's Hall, Prince's Hall, Wardour Hall, Cleveland Hall, Lincoln House, Katherine House, and Wiclif House, with the Rev. Hugh Price Hughes (*g.v.*) at the head, assisted by the Revs. Mark Guy Pearse (*g.v.*), T. M. Taylor, B.A., and a staff of lay agents. Orchestral and military bands are used for the musical part of the services at St. James's Hall, social and high-class entertainments at Wardour Hall, houses for the lady workers of the mission to reside in—these ladies wearing a uniform and being called "Sisters of the People"—all indicate the broad views held by the superintendent, Mr. Hughes. The **South Branch**, Rev. J. H. Hopkins, Superintendent, embraces Long Lane and Locksfield's Chapels, with John Street and Wild's Rents. Lay agents are working in Islington, Gt. Queen St., Westminster, Poplar, South Norwood, and Oakley Place. **Hon. Sec.**, Rev. J. Ernest Clapham; **Sec.**, Rev. W. D. Walters; **Treas.**, Rev. Walford Green and Mr. R. W. Perks. **Offices**, Wesleyan Mission House, Bishopsgate St., E.C.

Lonsdale-Shrewsbury Match. See TURF.

Lopes, The Rt. Hon. Sir Henry Charles, Bart., 3rd son of the late Sir Ralph Lopes, was b. at Devonport 1828, and ed. at Winchester School and Balliol Coll., Oxford. Called to the bar at the Inner Temple ('52). Joining the Western Circuit, he soon became a leading junior. Elected to Parliament in the Conservative interest as member for Taunton ('68-74), Q.C. ('69); M.P. for Frome ('74-6). Appointed to a judgeship in the Court of Common Pleas ('76), and a Lord Justice of Appeal ('85).

Lord Campbell's Act. By this Act, passed in 1846, and more precisely entitled "An Act for Compensating the Families of Persons Killed by Accidents," it is provided that when the death of any person is occasioned by such a wrongful act or default as would (if death had not ensued) have entitled the party injured to recover damages in respect thereof, then the person who would in that case have been liable shall still be liable to an action for damages, notwithstanding the death of the injured party. Every such action must be for the benefit of the wife, husband, parent, and child of the deceased, and must be brought by or in the name of his executor or administrator. The jury may give such damages as they think proportioned to the injury resulting from the death to the parties respectively for whose benefit the action is brought; and the amount so recovered, after deducting costs not recovered from the defendant, is to be divided among the parties, in such shares as the verdict shall direct. No more than one action lies in respect of the same subject-matter; and every action must be commenced within twelve calendar months after the death of the injured person. The plaintiff must deliver to the defendant full particulars of the person or persons on whose behalf the action is brought, and of the nature of the claim in respect of which he seeks to recover damages. Damages under this Act can be recovered only where pecuniary advantage or

the reasonable expectation of such advantage has been lost in consequence of the injured person's death. No damage can be given for funeral expenses or the cost of mourning. On the other hand, the receipt of insurance money cannot be taken into account in reduction of damages. The Act is chiefly important in its bearing on railway accidents.

Lord Chamberlain. Offices in the sovereign's household, in mediæval times, ranked equally as to dignity with offices of State. One of the most important of these domestic offices was that of Chamberlain, who had supervision of the royal household above stairs. The Lord Chamberlain of England still exercises this duty, having the control of the establishment attached to the chapels royal; of officers and servants attached to the royal chambers, except of those of the bedchamber; and over the medical men of the household. The royal tradesmen are appointed by him. He directs all great royal ceremonies, handing the Queen to and from her carriage. He receives all applications to attend levées and drawing-rooms. He superintends the royal wardrobe and the jewel house at the Tower. He is licenser of theatres and plays, his power extending to the cities of London and Westminster, and certain other parts of the metropolis, as well as to those places within which the sovereign may reside occasionally. The power of licensing theatres elsewhere belongs to justices. Theatres licensed by letters patent from the Crown do not, even in the foregoing places, require the Lord Chamberlain's licence. One copy of every new play, prologue, or epilogue, - or new addition to an old play, prologue, or epilogue, - intended to be produced at any theatre in Great Britain, must be sent to the Lord Chamberlain at least seven days before it is first acted or produced. An account of the theatre where, and the time when, it is to be acted or produced, must be signed by the manager. In the event of its being disallowed by the Lord Chamberlain, either before or after the expiry of the seven days, it must not be presented. It is lawful for the Lord Chamberlain to disallow it, if he considers it fitting for him so to do, "for the preservation of good manners, decorum, or the public peace." A fine of £50 may be levied on any person who presents a piece either before it has been allowed, or subsequent to its being disallowed, while the licence of the theatre where it was presented becomes void.

Lord Chief Justice of England. See COLERIDGE, LORD.

Lord Great Chamberlain. A State office of great antiquity entirely distinct from that of Lord Chamberlain of the Household. The Lord Great Chamberlain assists, with the Earl Marshal, at the ceremony of the introduction of new peers; he issues tickets for the opening and prorogation of Parliament, and orders of admission for viewing the House of Lords when Parliament is not sitting. He arranges the preparation of Westminster Hall for a coronation, the trial of a peer, or for any other ceremony taking place therein. He walks on the right of Her Majesty when she opens Parliament in person. The office is hereditary, and at present is held by Lord Willoughby de Eresby.

Lord Mayor's Court. An action will lie in the Lord Mayor's Court when a debtor "shall dwell or carry on business within the City of

London," or if the cause of action arises in the City.

Lords, House of. See PEERAGE and ENGLISH POLITICAL PARTIES.

Lords Justices were appointed by William III. to govern England during his absence in 1694. Two Lords Justices, assigned to the Court of Appeal in Chancery, were selected Oct. 1st, 1851, and the salary was fixed at £6000. There are now five **Lords Justices**—Sir Edward E. Kay, Sir N. Lindley, Sir C. S. C. Bowen, Sir E. Fry, and Sir H. C. Lopes, each of whom receives a salary of £5000.

Lords of Appeal. See PEERAGE.

Lords Spiritual and Temporal. See PEERS.

Lorne, John Geo. Edward Henry Sutherland, Marquis of, K.T., P.C., G.C.M.G., the eldest son of the Duke of Argyll and husband of H.R.H. Princess Louise, was b. 1845. Ed. at Eton, St. Andrews, and Trin. Coll., Camb. Represented Argyllshire in the Liberal interest '68-78. Married the Princess Louise '71. Unsuccessfully contested Hampstead '85. Appointed Governor-General of Canada '78, where he achieved a great success, the Princess and himself attaining great popularity. In Sept. '91 his lordship was invited to be the Unionist candidate for one of the divisions of Bradford.

Lourenzo Marquez. The port and settlement in Delagoa Bay (*q.v.*). Now a rising town. Belongs to Portugal, which has a garrison there. Is the starting-point of the railway to Transvaal gold-fields, and hence likely to become a place of consequence.

Lowe, Major-General Sir Drury Curzon Drury, K.C.B., was b. in 1830. Entering the army in '54, his promotion was as follows:—captain ('56), major ('62), lieutenant-colonel ('66), colonel ('71), major-general ('81). Served with the 17th Lancers in the Crimea, and in Indian campaign ('58-59). Led the charge at the battle of Ulundi, where he was wounded. Served also in the Boer and Egyptian campaigns. Obtained possession of Cairo and the surrender of Arabi Pacha, for which achievements he received the thanks of Parliament and was created K.C.B.

Low, Sidney James, editor of the *St. James's Gazette*, was b. in 1858, and ed. at King's Coll. School. Obtained a scholarship at Balliol Coll., Oxford, in '77, and graduated B.A. (First Class in Final School of Modern History) three years later. Became lecturer at King's College in '83, as deputy to Prof. S. R. Gardiner. Was co-editor of "The Dictionary of English History," published in '84. Mr. L. has contributed articles to the *Fortnightly Review*, *Blackwood's Magazine*, and the *Contemporary Review*. Succeeded Mr. F. Greenwood in the editorship of the "St. James's Gazette" ('88), with which journal he had previously been connected. He wrote on "Lowell in his Poetry" in the *Fortnightly* for Sept. '91, and on "The Rise of the Suburbs," in the *Contemporary* for October.

Lubbock, Right Hon. Sir John Bart., P.C., M.P., was b. in London, 1834. Ed. at Eton. Entered '48 his father's bank in Lombard St., becoming a partner in '50. M.P. for Maidstone from '70 to '80, when he was elected by the Univ. of London, which he still represents. No less than twenty public measures of importance (the principal being the *Bank Holidays Act* and the *Bills of Exchange Act*) owe their existence mainly to his influence and exertions. He has recently devoted himself to the promotion of the *Shop Hours Bill*. Sir J. L. is also distinguished as a scientist. In '65 he published

"Pre-historic Times," in '70 the "Origin of Civilisation and the Primitive Condition of Man," and in '88 "The Senses, Instincts, and Intelligence of the Animals, with special reference to Insects," and "The Pleasures of Life" has attained to its twentieth edition. He is also the author of various works on Ants, Bees and Wasps, besides many other valuable scientific works. He has received the hon. degrees of D.C.L. from Oxford and LL.D. from Dublin, Cambridge and Edinburgh, and held the office of Vice-Chancellor of the Univ. of London, which he resigned in '80, on becoming the parliamentary representative of the University. Sir John is a Liberal-Unionist. He was returned at the head of the poll for the City Division for the London County Council Jan 17th, '89, and was subsequently elected Vice-Chairman of that body. On the retirement of Lord Rosebery from the chairmanship, Sir John was elected to this position (July '90), and was re-elected at the statutory meeting held on Nov. 7th. He has intimated his intention of resigning in March '92.

Luderitzland and Angra Pequena. A German colony on the west coast of Africa. Administered by the German West African Society. Coast extends from Walfisch Bay to the Orange River. Inland it is bounded by the 20th meridian E. long., including Great Namaqualand. **Angra Pequena**, now called Luderitz Bight, is the port and nucleus of the settlement, with Moravian missionary village of Bethany further inland. Regular sea communication with the Cape has been established. The German Government annexed the territory in '84-5. See DAMAKLAND and COLONIES OF EUROPEAN POWERS.

Lunacy Act, '91. See SESSION, sect. 84.

Lunacy Inquiry in '91. An inquiry which had extended over a considerable period was concluded on July 23rd, '91, by Mr. Bulwer, Q.C., Master in Lunacy, and a special jury of seventeen. The examination was as to the mental condition of Mrs. Cathcart, of Wootton Lodge, Staffordshire, a lady possessed of considerable property. On the part of her husband, it was alleged that the lady was subject to delusions, and ought to be placed under control, and a committee appointed to administer her estate. Medical evidence was called in support of this view, but, on the other hand, a number of specialists testified that the respondent was capable of managing her own affairs. Her delusions, it was argued, were productive of danger neither to herself nor to

others, and she had behaved with calmness and self-control under trying circumstances. In the result the jury, by a majority of thirteen, found that Mrs. Cathcart was of sound mind, and capable of managing herself and her own affairs. An application in the Court of Appeal, that the Court should exercise its discretion given by section 109 of the Lunacy Act '90, was heard on Nov. 10th, but was adjourned.

Luxemburg. The King of the Netherlands is Grand-Duke of Luxemburg, and nominates the Government; but by the Treaty of London, 1867, Luxemburg is declared neutral territory. Area, 1700 sq. m., pop. 217,447. Capital, Luxemburg, pop. 17,964. For commercial purposes the Grand-Duchy is included in the German Zollverein. The Chamber of Deputies consists of 42 members, elected directly by the cantons, for six years. See NETHERLANDS.

Lyall, Edna (Miss Ada Ellen Bayly), the well-known novelist, is the youngest daughter of the late Mr. R. Bayly, a barrister of the Inner Temple. She commenced her literary career at an early age, and her books have attained a very widespread popularity. They include "Donovan" (which inculcates the lesson of charity in religious differences), "We Two," "In the Golden Days," "The Autobiography of a Slander," "Derrick Vaughan," "Knight Errant," and "A Hardy Norseman." During '91, Miss L. issued "Max Heretford's Dream." **Lytton, Rt. Hon. Edwd. Robt. Bulwer-Lytton**, 2nd Baron and 1st Earl of, only son of the late Lord Lytton, the novelist and dramatist, was b. in 1831. Ed. at Harrow and the Univ. of Bonn, and at an early age gave promise of literary genius by the publication of "Olympestra and other Poems," under the *nom de plume* of "Owen Meredith." He early entered the diplomatic service. In '63 he was appointed Secretary of Legation at Copenhagen, and the following year served in the same capacity at Athens. He subsequently became *chargé d'affaires* at Lisbon, and at Madrid, and Vienna, and in '72 was appointed secretary of the embassy to Paris. Two years later he was sent as Ambassador to Lisbon, and in '76 was appointed Viceroy of India. Lord L. resigned simultaneously with Lord Beaconsfield after the defeat of the Conservative Ministry in '80, and was raised to the rank of an earl in the same year. He was in '87 appointed Ambassador to Paris. Lord L. is the author of "Lucille," "Tannhäuser," "Fables and Songs," "Glennaveril," etc., and of a Life of his father. In '90 appeared from his pen "The Ring of Amasis."

M

McCarthy, Justin, M.P., was b. at Cork in 1830, and educated in that city. In '53 he commenced his career as a journalist in connection with a Liverpool paper, and in '60 joined the staff of the *Morning Star* as parliamentary reporter, becoming in '64 chief editor. In '68 he severed his connection with the *Morning Star*, and subsequently visited the United States. On his return in '72 he joined the editorial staff of the *Daily News*, from which he retired in '84, but which he has since rejoined. Mr. McCarthy represented Longford '79-85. He

unsuccessfully contested Derry at the general election of '85, but was returned by a large majority for Longford. In '86 he again contested Derry, against Mr. (now Sir) C. E. Lewis, who was returned by a majority of three. On petition, however, Mr. McCarthy was declared to be the sitting member. He is also well known as a novelist and historian, and, besides being the author of "A Fair Saxon," "Dear Lady Disdain," "Linley Rochester," "Camilla," etc., he has written "A History of Our Own Times," "The Epoch of Reform," and

"History of the Four Georges." In '88 Mr. McCarthy brought out "The Right Honourable" and "The Ladies' Gallery" (which latter he wrote in conjunction with Mrs. Campbell Fraed). On the disruption of the Irish Parliamentary party in Dec. '90, Mr. M. was elected chairman of that section which repudiated the leadership of Mr. Parnell. Mr. M. published a short life of Sir R. Peel in March '91.

MacCunn, Hamish, the composer, was b. at Greenock, 1868. Gained a scholarship at the Royal College of Music. His "**Lay of the Last Minstrel**" first brought him into public notice; and, prior to the death of Mr. Carl Rosa, he had been commissioned by that gentleman to write an opera entitled "**Waverley**." An overture by Mr. M., which was produced at the Crystal Palace in '87, has brought him much popularity. A recent work is "**The Cameronian's Dream**." Mr. M.'s "**Ship of the Fiend**" was produced at Norwich (Oct. '90).

Macdonald, Dr. George, poet and novelist, was b. 1824, at Huntly, Aberdeenshire. Ed. at Aberdeen Univ., and subsequently at Highbury Independent Coll. with the idea of becoming a Congregational minister. He afterwards, however, decided to devote himself to literature. His views are extremely broad and liberal, and the charm of his style has a peculiar fascination. His best-known works are "David Elginbrod," "Alec Forbes," "Adela Cathcart," "The Point of a Story of Second Sight," "Annals of a Quiet Neighbourhood," "The Seaboard Parish," "Robert Falconer," "The Vicar's Daughter," "Thomas Wingfield, Curate," "The Marquis of Lossie," "At the Back of the North Wind," "The Gifts of the Child Christ," "The Wise Woman, a Parable," etc. Dr. M. is also an eloquent preacher and lecturer, and pays annual visits to England from Bordighera, where he resides. In '91 he published "There and Back."

Mace of the House of Commons. At the meeting of a new Parliament this symbol of authority is brought into the House by the Sergeant-at-Arms and placed under the table, but is moved on to the table immediately the Speaker has been elected and has seated himself in the chair. Henceforth when the Speaker enters and leaves the House at the beginning and end of every sitting, he is accompanied by the Sergeant bearing the mace. While the House is sitting it is placed on the table. When the Speaker leaves the chair and the House goes into Committee it is placed under the table, to be replaced on the House resuming. At all State ceremonies at which the Speaker is present there too is the mace. When a witness or other person is in custody at the bar the Sergeant removes the mace from the table, and bearing it upon his shoulder, stands near to the witness. According to a note in Sir T. May's valuable work on the law proceedings and usage of Parliament, the mace now in use dates from the restoration of Charles II. The previous mace was Cromwell's "bauble," and has been supposed by some to be still in Jamaica; but recent investigations by no means support this assumption.

Macintyre, Margaret, the popular vocalist, is a daughter of General Macintyre, late of the Royal Artillery. She received her musical training at Dr. Wyld's branch of the London Academy of Music, at Brighton, afterwards studying with Signor Garcia in the London Academy of Music. The bronze medal of the

Academy was won by her in '83, the silver medal in '84, and the gold medal in '85. She is the holder of an Associate's diploma. On the occasion of the Abbé Listz's visit, Miss M. sang the soprano music in his oratorio "St. Elizabeth," to the great satisfaction of the composer. Her immediate success as "**Michaela**" in "**Carmen**" (May '88) has been followed by speedy recognition of her high vocal talents in opera as well as in oratorio. As "**Rebecca**" she sang in "**Ivanhoe**" at the Royal English Opera-House. At the **Handel Festival**, and also at the leading festivals in '91, Miss M. sang with great ability.

Mackenzie, Alexander Campbell, composer, was b. at Edinburgh 1847. He studied and played as violinist in Germany ('57-62), when he became King's Scholar at the Royal Academy of Music, London. He composed a violin concerto for the Birmingham festival of '85, which was very favourably received. He has produced two operas, "**Colomba**" and "**The Troubadour**," both brought out at Drury Lane by Mr. Carl Rosa, the last-named in the summer of '86. In the autumn of the same year his cantata "**The Story of Sayid**" was brought forward at the Leeds Festival. He was elected Principal of the Royal Academy of Music (q.v.) in Feb. '88, in succession to the late Sir G. Macfarren. Dr. M.'s musical setting for "**Ravenswood**," at the Lyceum Theatre (Sept. '90), was eminently successful. At the Birmingham Festival '91 his new work, entitled "**Veni, Creator Spiritus**," was produced successfully.

Mackenzie, Sir Morell, M.D., was b. at Leytonstone, Essex, 1837. Ed. at the London Hospital and the medical schools at Paris and Vienna; M.D. Univ. of London. Sir M. M. has been for some years physician to the London Hospital, and lecturer at that institution on diseases of the throat. In recognition of his services to her august relative, the late Emperor Frederick, Her Majesty conferred a knighthood upon Dr. Mackenzie in '88. Shortly before his death the Emperor also conferred upon Sir Morell the **Grand Cross of the Hohenzollern Order**, with the **Star** of the same Order. To vindicate his treatment of the late Emperor, Dr. M. published in '88 "**The Fatal Illness of Frederick the Noble**." Sir Morell is the author of standard works on diseases of the throat, and founded the **Hospital in Golden Square** for the treatment of those diseases. He claims the merit of having introduced the laryngoscope into English practice. He resigned his connection with the College of Physicians at the close of '88.

MacMahon, Ex-President Marshal Marie Edmé Patrick Maurice de, Duke of Magenta, was b. of an Irish family, at Sully, France, July 13th, 1808. He was educated for the army at St. Cyr. From '30 to '48 Captain MacMahon was mostly engaged in the **Algerian war**. He distinguished himself in the storming of Constantine. Major in '40, and Colonel of the Foreign Legion, he was made a General in the **Crimean war**, and succeeded General Canrobert at the head of a division. For his gallantry in storming the **Malakoff** he received the G.C.L.H. and K.G.C.B. In the **Franco-Italian war** he came unexpectedly upon the Austrians at **Magenta**, and defeated them. For this deed he was created **Field-Marshal** and **Duke of Magenta**. He was made Governor of Algeria in '64. In the **Franco-Prussian war** he

commanded the First Army Corps. He was forced to retreat before the Crown Prince after two preliminary battles, and suffered a crushing defeat, after having been severely wounded at Sedan. He was commander-in-chief of the French army at Versailles, which invested Paris under the Commune. In Nov. '73 Marshal MacMahon was elected President of the Republic for a term of seven years, but resigned Jan. '79. He was succeeded by M. Grévy, and has since retired from political life, although still a familiar figure in Parisian life.

Macnaghten, Edward, Lord, son of Sir Edw. Macnaghten, Bart., was b. 1830. Ed. at Cambridge. Called to the bar '57; Q.C. '80. He represented in Parliament co. Antrim '80-'85, and N. Antrim '85-'87, as a Conservative. Succeeded Lord Blackburn as Lord of Appeal in Ordinary ('89), with a life peerage.

MacNell, Rev. John, the successor to Rev. Dr. Oswald Dykes at Regent Square Presbyterian Church, was connected for some years with railway work—being at one time a railway porter at Inverskip. Afterwards he was engaged as a booking-clerk, but his power as a public speaker soon denoted another career for him; and in 1877 he entered Edinburgh University, and at the conclusion of his college course entered on mission work for a time. His first pastorate commenced at McCrie-Roxburgh Church, Edinburgh, where his remarkable success soon compelled the holding of the services in a circus, capable of accommodating 4000 persons. In '89 he removed to Regent Square. Paid a visit to the United States in Sept. '91.

Macwhirter, John, A.R.A., was b. 1839, at Slateford, near Edinburgh. Elected Associate of the Royal Academy ('79). Hon. member of the Royal Scottish Academy ('82). Mr. M. has painted some excellent pictures of Highland scenery. Among his recent works are "Autumn Evening," "Edinburgh from Salisbury Crags," "Shores of Iona," and "Constantinople and the Golden Horn from Eyoub." In the Royal Academy '91 he exhibited "A Highland Bay" and "Bolton Abbey and Woods."

Madagascar. Native name Nossi Dambo. A large island separated by the Mozambique Channel from south-eastern Africa. Now virtually a French Protectorate. It is about 975 miles long by 358 broad, area 228,500 sq. m., pop. 3,500,000. Capital Antananarivo, a striking and well-built town of pop. 100,000, upon a lofty hill about two hundred miles inland. Ports are Tamatave, pop. 10,000, on E.; Mojanga, on N.W. An enormous mountain mass traverses the island from north to south. The soil on the eastern slopes is fertile, and the island has rich deposits of silver, copper, iron, and salt, and magnificent forests of valuable timber. Coal is found in the north-west; cattle, hides, gum, indiarubber, wax, cotton, sugar, vanilla, rice, lard, and coffee are exported to Mauritius, Réunion, and Europe. Climate very hurtful to Europeans, especially on the east coast. There are no large animals, but crocodiles abound in the rivers, and the lakes are remarkable for their enormous harvests of fish, which, with rice, are chief articles of diet amongst the poorer classes. Immense herds of cattle roam over the grassy plains. Cattle herding and agriculture are the principal occupations. Government an absolute monarchy, the Queen (Ranavalona III.) being assisted by a Council

of nobles and heads of clans chosen by herself. Power really in the hands of Prime Minister (Rainilaiarivony), who is husband of the Queen. By treaty, December 1885, a French Resident, with military escort, resides at the Court and controls foreign relations. A band of robbers attacked the branch of the Comptoir d'Escompte at Antananarivo (Nov. 6th, '90), and pillaged the house of the French deputy-consul and the Roman Catholic mission. One hundred of the chief inhabitants of Belanona went to the capital to complain of the cruelty and cupidity of the Governor Ramiakatra. They had to wait eight months for an interview, and on being received were warned of the danger of unfounded complaints. On their return they were stopped by the Governor's Hova soldiers and ordered to encamp on a hill, and the next morning they were surrounded by the soldiers, and many of them, with their wives and children, butchered, to the number of 278. Some escaped, and reached the Prime Minister on Jan. 12th, '91, and one hundred soldiers were at once despatched to arrest the Governor. A Bill was passed (March 12th) by the French Chamber establishing French tribunals with jurisdiction in all cases affecting Europeans. It was reported (25th) that Ramiakatra and his brother had been executed on the spot where the massacre took place. News was received (Oct. 30th) that the town of Majunga had been destroyed by fire, only ten houses being left standing. Dr. Beziat, medical officer of the French colony at Suberviville, was assassinated by bandits. The relations between the Malagasy and the French grew very strained (Nov.) in consequence of the latter claiming the right to give consuls their *exequaturs*, which the former denied.

Madeira Islands. A group off N.W. African coast, belonging to Portugal, and regarded as an integral part of the kingdom. Area, 505 sq. m., pop. 132,223. Capital and port Funchal, a fine town of 20,000. Some disturbances took place (Oct. '91) in consequence of the increase in the price of grain. The military transport *India* conveyed a large quantity of corn to Funchal, and the Government contracted for 100,000 barrels from the United States to relieve the distress.

Madras. See INDIA. For Ministry, etc., see DIPLOMATIC.

Magazine Rifle. See ARMY, BRITISH, and SESSION, sect. 34.

Mahaffy, Rev. John Pentland, D.D., was b. in Switzerland, 1839. Received his early education in Germany, but at the age of seventeen matriculated at Trinity College, Dublin, where he graduated in '59 with high honours both in Classics and Philosophy. Since '71 he has held the chair of Ancient History in that college. In '82 he was elected an honorary Fellow of Queen's College, Oxford. Prof. M. is a kind of "Admirable Crichton," being an excellent musician, an expert angler, a crack shot, and an accomplished cricketer, as well as an eminent scholar and philosopher. He was for some time precentor of the Chapel at Trinity College. He has recently contributed, with the collaboration of Mr. Arthur Gilman, "Alexander's Empire" to "The Story of the Nations" Series, and has also written "A Sketch of the Life and Teaching of Descartes." During '90 he published "The Greek World under Roman Sway."

Malta. Anciently *Melita*. Situated in the Mediterranean, 56 miles south of Sicily. Is a British Crown colony and stronghold. With smaller islands, Gozo and Cumino, area 117 sq. m., pop. 163,850, exclusive of garrison, about 10,000.—**Capital Valetta**, a fine city, impregnable fortified, commanding a noble harbour. It is a great naval station, with dockyards and arsenals, and seat of some commerce. To the west of Valetta is Porto de San Paolo, the traditional scene of St. Paul's shipwreck. — **Executive** in the hands of a military Governor and Executive Council. — **A New Constitution** was provided for by letters patent issued in Dec. '87. Legislative Council to consist of Governor as president, without vote; 6 official members; 4 members who represent the clergy, nobility, landowners, the University, and merchants, on basis of £60 franchise; and 10 members elected by present electorate, but for single constituencies instead of *scrutin de liste* as formerly. Elected members to have full control of finance and local matters, and 3 of them to be salaried members of Executive Council. Right of veto reserved to Governor; right of legislation by letters patent or order in council reserved to Crown. Salaries and pensions provided for by permanent civil list of £38,000. A **Royal Commission** to divide the dependency into electorates was appointed.—The forts require 25,000 men to man them in case of siege. There is a regiment of Malta Fencible Artillery. For financial statistics see BRITISH EMPIRE, etc. (table). Sir H. A. Smyth succeeded Sir Henry Torrens as governor of the island in March, '90. The statue of Queen Victoria, subscribed for by the inhabitants of the island, was unveiled by Lady Smyth, the wife of the Governor (August '91). For Governor, etc., see DIPLOMATIC.

Man. See ISLE OF MAN.

Manchester Grammar School. Founded in 1515 by Hugh Oldham, Bishop of Exeter, and others. The school has three main branches, classical, modern, and scientific. **Three scholarships** of the value of £55 each are given yearly to boys going to the University; and the school has a number of close scholarships at Wadham and Brasenose College, Oxford, and St. John's College, Cambridge. **High Master**, J. E. King, M.A., Fellow and late Tutor of Lincoln College, Oxford. **Motto**, *Sapere aude*. **Alumni**—De Quincey, Harrison Ainsworth, Jas. Bradshaw (the Manchester martyr), General Drinkwater, John Byrom, Prebendary Smith.

Manchester New College, founded in Manchester 1786, now at Oxford, "exists for the purpose of promoting the study of Philosophy, Theology, and Religion, without insisting upon the adoption of particular doctrines." No subscription or doctrinal statement is required either of trustees, professors, or students. Exhibitions and free admission to lectures and classes are given to students for the ministry, without restriction as to the sect in which they will minister. The lectures are open to all persons without payment of fees. **Principal**, Rev. James Drummond, M.A. (Oxon.) LL.D. The centenary of the institution of the College was celebrated in '86. The ceremony of laying a stone of dedication took place Oct. 20th, '91.

Manchester, Rt. Rev. James Moorhouse, Lord Bishop of. The see was founded 1847; income £4200. His lordship was b. at Shef-

field, '26. Educated at St. John's Coll., Cambridge, graduated B.A., Sen. Opt., '53, M.A. '60, D.D. *jure dig.* '76. Was ordained deacon '53, and priest '54. Consecrated Lord Bishop of Melbourne '76, and was translated to Manchester '86. Formerly curate of St. Neots '53-5, Sheffield '55-9, Horsey '59-61; perpetual curate of St. John, Fitzroy Square, '61-7; vicar of Paddington and rural dean '67-76; Warburtonian Lecturer '74; chaplain-in-ordinary to the Queen, and prebendary of Caddington Major in St. Paul's Cathedral '74-6. **Hulsean Lecturer** ("Our Lord Jesus Christ the Subject of Growth in Wisdom") '65.

Manchester Ship Canal. This great engineering scheme, which is to convert the cotton metropolis, Manchester, into a seaport, was introduced in the shape of a Parliamentary Bill early in the Session of 1883. (For early history of this scheme, the original project, and the amended plan, see previous eds.) On Nov. 11th, '87, the works were commenced at **Eastham Ferry**, on the Cheshire side of the Mersey. On Jan. 3rd, '91, the first vessel specially built for this canal trade was launched by Messrs. McIlwaine and McColl of Belfast. The new pioneer steamer named the *Manchester* is intended for a direct service between Belfast and Manchester, calling at Liverpool. She is built of steel, 180 ft. long, and 14 ft. deep. At a meeting on Jan. 29th it was resolved to issue the remaining portion (£453,000) of the First Mortgage Debentures, which amount in the aggregate to £1,812,000. The half-yearly report discussed at the meeting of Feb. 3rd referred to certain disputes with the contractors, and to the fact that the Company, having come to an agreement, took over the works from Nov. 24th, the only pecuniary interest of the executors of the late Mr. Walker now being a share of the proceeds to be realised from the sale of the plant, which cost £943,610, on the completion of the work. It was also intimated that more capital (£1,700,000) would be required, and that negotiations had been opened with the Manchester corporation for financial assistance. The Sub-Committee of the Corporation, in their report recommending that such assistance be given, said that they found that up to Dec. '90 over 9 millions had been spent upon the canal, and that nearly 4 millions was still needed; they thought that 2½ millions would be enough for them to advance, but recommended borrowing powers up to 3 millions. A special meeting of the City Council on March 9th adopted the recommendation. The Bill received the Royal assent on July 26th. The first lock at Weston Marsh, to take the traffic between the river Weaver and the Ship Canal, was opened on April 16th. It is 315 ft. long, 42½ ft. broad, and 16 ft. deep, having three pairs of gates worked by hydraulic power. On June 18th the first water was admitted into the Eastham section of the main canal, which is about 4 miles long, 170 ft. wide, and 26 ft. deep, and the lock gates were opened for the first time on July 2nd. On July 24th a large embankment, 250 ft. wide, fell into the Eastham section during high tide, blocking also the exit from the Shropshire Union Canal; it was afterwards stated that this embankment was only a temporary affair placed to test the strength of the tide, and more permanent works were at once commenced. The first flotilla from Ellesmere Port passed down the canal into the Mersey on July 16th. On July

18th a ballast train fell over an embankment and killed 10 navvies, injuring 6 more. The half-yearly meeting was held in August, satisfactory progress was reported, and Sir J. C. Lee, Deputy-Chairman, gave some details of the financial position. He said that, after receiving the Corporation loan of 3 millions, there was an apparent surplus of £700,000. The Ship Canal Committee of the Manchester Corporation, in a report issued on Aug. 21st, stated that the amount expended up to Aug. 21st was £20,359,597. The second section of the canal was filled by the end of September, there being 26 ft. of water on the 26th of that month, the two sections completing 11 miles of canal in working order. The formal opening took place on September 29th. It was then stated that the Engineer, Mr. Leader Williams, expected to finish the whole canal by the end of '92.

Manchester (Thirlmere) Water Supply. This great work is still in progress, and a general idea of its engineering features was given in our '90 edition.

Manchester Unity Friendly Society. See OFFERINGS.

Manilla. Capital of the Spanish colony of the Philippine Islands (*q.v.*); pop. 270,000.

Manipur. Much attention was drawn to this native state in North-Eastern India by the insurrection of the Senaputty in March '81. Manipur is bounded on the north by the Assam Valley, on the east and south by Upper Burma, and on the west by the Chachai district. Its population, according to the census of '81, was 221,070; its area is 8,000 sq. miles. The revenue of the State is supposed to be between Rs. 50,000 and Rs. 60,000. Its military force, which includes artillery, cavalry, infantry and irregulars, numbers 27,000. When the first warlike operations took place between Burma and Great Britain Manipur was assisted by the latter. Gumbheer Singh was appointed Rajah, and, on his decease in '44, his son Chandra Kirti Sing ascended the throne. The Senaputty acted at this time as Regent. Owing to struggles and political strife, the young Rajah abdicated, but was restored to his position in '50. At the time of the Indian Mutiny he rendered good service to the British. A resident was ultimately stationed at the capital, and he was responsible to the Chief Commissioner of Assam. The Maharajah, Sui Chandra Singh, has latterly been in a position of great difficulty, his authority being often denied. Summary punishment having been administered to the insurrectionists in '87, matters grew quieter. The Maharajah, however, in '88 threatened to expel the Senaputty for a brutal sentence of flogging. For details of the rising in March '91 see INDIA. See also SESSION, sect. 35.

Manitoba. A province of the Dominion of Canada, formerly known as the Red River Settlement; entered the Dominion in 1870. It takes its name from Lake Manitoba, which is situated 60 miles S.W. of Lake Winnipeg. Area, 73,720 sq. mi.; pop. 130,000. Capital Winnipeg, at the junction of the Assiniboine and Red rivers. The Province is divided into counties, which are grouped into eastern, central, and western. District of Keewatin now under government of Manitoba. General surface a level prairie, 80 feet above Lake Winnipeg and 700 feet above the level of the sea. Principal streams the Red River, which rises in Minnesota, U.S., flows north through the

province for 140 miles, and empties itself into Lake Winnipeg. Climate healthy, but great extremes of temperature. Owing to dryness of atmosphere, winter cold not felt severely, snow falls lightly, and horses winter on the prairies without shelter. Soil very fertile, wheat being staple crop, and yields abundantly, twenty-five bushels to the acre being commonly raised. All other cereals, roots, and fruits of Europe thrive well. Flax and hemp have also been grown with success. The prairie grasses furnish excellent pasturage and good hay. Large numbers of horses, cattle, sheep, and swine are raised. Wood is scarce, and is chiefly confined to narrow strips along the Red and Assiniboine rivers. Principal trees are elm, oak, maple, and poplar, spruce, cedar and fir also occurring; the ash-leaved maple yields sugar. Rivers and lakes swarm with fish of several kinds. Game is plentiful, and coal abounds throughout the province.—Executive vested in a Lieutenant-Governor appointed by the Governor-General of the Dominion, and an Executive Council, consisting of 5 members, with a Legislative Assembly, numbering 31 members, elected by districts for four years. Three members are called to the Dominion Senate, and five elected to the House of Commons. Religion and education are provided for in Winnipeg and other centres. Laws are enacted to protect and further agriculture, and stringently enforced. Grain-growing and other kinds of farming are the main industries. The Canadian Pacific Railway (*q.v.*) traverses the province; there are local branches, a junction with the United States systems, and a line is to be built through Keewatin to Hudson Bay. See CANADA; and for Ministry see DIPLOMACY.

Mann, Tom, the well-known Labour Leader was b. at Foleshill, Warwickshire, on April 15th, 1856. In his youth he worked in a mine until '70, when his family removed to Birmingham. Seven years later he came to London, and became connected with the Amalgamated Engineers, for the secretariat of which union he is now a candidate. He worked at Messrs. Thornycroft's for some time, but since the great Dock strike of '89 he has been prominently before the public as one of the principal organisers of dock-labourers. He also took a leading part in the Hay's Wharf strike in Jan. '90. He has been President of the Dock, Wharf, Riverside, and General Labourers' Union of Great Britain, Ireland, and the Netherlands (*q.v.*), but announced his resignation in Sept. '91. As a speaker of great power, Mr. Mann is in great request at labour demonstrations in all parts of the United Kingdom, and his organising methods have been beyond doubt most successful.

Manning, His Eminence Henry Edward, Cardinal Archbishop of Westminster, was b. 1808. Educated at Harrow and Balliol Coll., Oxford. Graduated ('30), and became Fellow of Merton Coll. Rector of Lavington and Graffham, Sussex ('34-40); Archdeacon of Winchester ('40-51). Resigned these preferments and joined the Church of Rome. He was ordained a priest of the Roman Catholic Church ('51), and appointed rector of St. Helen's and St. Mary's, Bayswater, where he founded a congregation entitled the "Oblates of St. Charles Borromeo." The degree of D.D. was conferred upon him at Rome. On the death of Cardinal Wiseman he succeeded him as Archbishop of

Westminster ('65); Cardinal ('75). Besides numerous volumes of sermons, he has written a large number of works on the doctrines of the Church of Rome and its relations with civil society, including "The Temporal Power of the Pope," a reply to Mr. Gladstone's "Exposition," as to the Vatican Decrees ('75), "The True Story of the Vatican Council," etc. Cardinal Manning takes a leading part in all the social and philanthropic movements in the Metropolis; and is also an earnest supporter of temperance, being President of the Catholic Total Abstinence League of the Cross. The celebration of the Cardinal's episcopal jubilee took place on Sunday (June 8th, 90). During '91 His Eminence made few public appearances, but articles from his pen attracted attention.

Mansfield College, Oxford. Established for the education of men for the Nonconformist ministry, but its classes are open to all persons possessed of the requisite academic qualifications. It is purely theological, and its students must, before entering on its distinctive studies, be graduates of some recognised university. It has two kinds of Scholarships: (1) Arts, value £60 a year, tenable by undergraduates at any college in Oxford (other than Mansfield). The men who hold these are scholars, but not students, of the College. They become the latter only after they have taken their degree. (2) Theological, value £60 a year, with tuition free, tenable during the course at Mansfield, which extends over three years. These can be held only by graduates in honours who have distinguished themselves in the entrance examination. The College buildings were opened on Oct. 15th, '89. A Settlement in connection with the College, at Canning Town, E., has been formed, and is called "Mansfield House." The staff of the College consists of: Principal, Rev. A. M. Fairbairn, D.D.; Vice-Principal, Mr. J. Massie, M.A.; Lecturers, Mr. J. V. Bartlett, M.A., and Mr. A. S. Peake, M.A.; Special Lecturer, Professor W. M. Ramsay, M.A.; Bursar, Mr. N. H. Smith, M.A.

Manual Instruction. Two considerable forces have been at work during the past ten years, tending to the development of Manual and Technical Instruction in our Public Elementary Schools. On the one hand, were men of the scientific standing of Sir Henry Roscoe, Sir Bernhard Samuelson, and Sir Philip Magnus, who complained that our system of instruction has been too purely bookish and literary, and devoid of all scientific training. On the other hand,—and still more potent as a factor,—has been the dread lest the extraordinary efforts of the continental countries to educate their industrial classes in such a manner as to render them expert workmen, skilled in the sciences underlying their handicrafts, might result in serious damage to our great manufacturing industries. Sir Henry Roscoe, M.F., speaking before the Royal Commission on the Elementary Education Acts, urged that we had no right, as a nation, to expect to retain supremacy in the manufacturing industries unless our present system of primary instruction, which in his opinion tended to manufacture clerks, and not artisans, were exchanged for one of such a character as to lead up to that higher technical training which is necessary both for the workmen engaged in our industries, and for the superior workman and foreman. In further evidence given by him, Sir H. Roscoe still more unsparingly

condemned the system prevailing, and his words deserve quoting. He says: "It seems to me that the English system of education has been hitherto almost entirely of a literary character, and that science has been practically ignored. Our school system seems to me to have been handed down from the Middle Ages, and to be founded more on authority and on books rather than on an appeal to nature and to experiment." Mr. Balchin, a distinguished headmaster under the London School Board, said: "As a matter of fact, the vast majority of our London School Board boys will become artisans or journeymen, mechanics or labourers. This being so, let the friends of elementary education ask themselves this question: Do the instruction and training of the boys in our elementary schools, during their last year or two of their school life, aim in the direction of the workshop and factory or in that of the office and counter? I have not the least hesitation in saying that, so far as the work of Standards V., VI. and VII. indicate any aim at all, it is in the direction of the office, rather than in that of the shop. . . . I have not the least intention of recommending that boys while at school should be taught the trade of carpenter, builder, cabinet-maker, stonemason, or engineer. I want to incline the boys' minds in that direction." The Royal Commission defined Technical Instruction as "instruction in those scientific or artistic principles which underlie the industrial occupations of the people (including especially handicrafts, manufactures, mining, and agricultural labour, as well as instruction in the manual practice involved in the application of these principles." In discussing the question of the introduction of manual and technical instruction into the elementary schools the Royal Commissioners said: "We are well aware that in introducing manual or technical instruction into our elementary schools there is danger lest the new subject should interfere with the general curriculum of the schools, or in any way hinder the scholars from acquiring a complete mastery of the necessary subjects of a sound primary education. But bearing this in mind, the following evidence of Sir Philip Magnus seems to us fairly to indicate what should be our aim in the matter. "I have suggested that drawing should be taught generally in our public elementary schools; that more attention should be devoted to the teaching of science than at present is given to it; that handicraft instruction should be introduced after a certain standard. Lastly, I think that further encouragement should be given to instruction in evening schools, in order that the children may not forget the knowledge and the skill which they have acquired in the elementary schools, and which they will need to apply when they come to take advantage of the excellent science, art and technical classes which are now organised in different parts of the country." With such powerful advocacy before them, for manual teaching, and evening continuation schools, the Royal Commission were distinctly in their favour. They were greatly impressed by what has been done in Birmingham, in "The Seventh Standard School." The teaching in this school is laid out for a three years' course, one year in the seventh standard, and two years in connection with South Kensington. In the second year the scholars spend three hours per diem in the workshop, one hour and a half during

school time, and one hour and a half in the evening. "The object of the workshop instruction is to teach the meaning, the nature and the use of workshop tools, and to give manipulative skill in their employment, together with information regarding the principles of tools, and the properties of the materials used. The schoolroom is connected with the workshop, and a practical mechanic is employed, who gives workshop instruction, and who supplies the headmaster with specimens of work, which are explained by the latter in the drawing-room. The headmaster explains the connection of the parts with one another, teaches the scholars to make a drawing to scale, and shows the required views of the model under examination. The scholar goes to the workshop and makes an article from the drawing to scale. This completed, he measures, it, and makes a second drawing to scale. This is a typical school, of which we shall presently see many copies in our great industrial centres. The **National Association for the Promotion of Technical and Secondary Education**, which has been in existence some five years, and has the Marquis of Hartington for its president, has been energetically at work, endeavouring to influence public opinion, and the various local authorities, which, under the Technical Instruction Acts of '89, and '91, and the Local Taxation Act, '90, are empowered to provide for Technical instruction in their districts. The society (whose office is at 14, Dean's Yard, Westminster) has published numerous valuable pamphlets, and is prepared to advise any local authorities who may apply to them as to the best means of establishing schools, and utilising the funds at their disposal. The last report of the society is a record of extraordinary success, and it may safely be predicted that within the next five years every county and county borough in the kingdom, will have made provision for special technical or handicraft teaching within its jurisdiction. Let us give one instance of what has already been done in the county of Bedford. Here the sum to be expended is about £4,400 a year. The scheme provides for (a) agricultural evening classes in rural elementary schools, conducted by trained teachers; (b) instruction in dairy work, rural economy, horticulture, farriery, etc., organised by the Bedfordshire Agricultural Society; (c) instruction in the chemistry of dyeing, strawplait, etc., for the Luton district; (d) science and art instruction in Bedford and other centres. Meantime, the great Borough School Boards have awaked to the importance of handicraft teaching in their schools, and as the New Code of the Education Department now includes it as a subject that may be entered in the Time Tables of the schools, a rapid extension may be expected. The School Boards for London, Birmingham, Leeds, Liverpool, Manchester, and Sheffield may be especially mentioned. At the end of the present year the **Sheffield School Board** hope to have a school for manual and other technical instruction in every important section of the town. Under the head of Manual Instruction the Sheffield Board give teaching in ordinary wood-working in tools, turning in wood and metal, metal spinning, etc. At Liverpool, during the winter of '91, classes of fifty boys each received instruction in wood-carving once a week at ten centres in the city, and the success of the

experiment is leading to further development. At **Manchester** great success has attended the efforts of the Board in this direction. Here there is a training school for the purpose of giving instruction to adult teachers in wood-work and drawing, in order to qualify them as teachers in elementary schools. Instruction in the characteristic properties and uses of woods is given; the general structure of cone-bearing and leafy timber trees; the meaning of seasoning timber; effects of shrinkage and warping. In respect of tools instruction is given in the use of all wood-working tools, and the methods of using nails, screws and glue. The **London School Board** in '90 had three centres for Manual Instruction on the north side of the Thames, and three on the south. Five hundred and eighty boys were receiving instruction one half-day per week. Classes are conducted in rooms fitted with benches, vices and carpenters' tools, under the direction of an organising instructor, and three practical artisans. The expenses have been paid by the Guilds' Institute and the Drapers' Company, and the results have been very satisfactory. Under the able superintendence of Mr. George Ricks, one of the Inspectors of the London Board, "Hand and Eye Training," and instruction in Sloyd (or Swedish wood-carving), is being largely introduced. Indeed, it may safely be said that in the course of a few years, some form of manual instruction will find a place in every elementary school. Readers desirous of further information should obtain the report of the National Association for the Promotion of Technical Education; the reports of the School Board Clerks' Conferences in '90-91, printed in the *School Board Chronicle*; the reports of the Royal Commission on Technical Education in foreign countries; and the very valuable books by Mr. Ricks on "Hand and Eye Training," published by Cassell & Co. See also **TECHNICAL EDUCATION. Manufacturing Inventions, '91. See INVENTIONS.**

Marine Biological Laboratories. Institutions near the sea-shore, provided with dredging apparatus, tanks, and scientific instruments, for scientific study. The object is the study of marine animals, for the twofold purpose of gaining information as to the habits of our food fish and extending our knowledge of marine zoology and botany. They are thus of commercial and scientific importance. On the European and American coasts several laboratories are in existence. Of the former the one on the Mediterranean at Naples, founded by Dr. Dohrn, is the most important. Its cost has been about £200,000, and its annual expenses are about £4000. A marine laboratory has recently been established in Japan, under Professor Mitsukuri. The **United States Fish Commission** have erected several small laboratories, and are now laying out £10,000 on one at **Wood's Hole**, and £20,000 on fishponds protected by piers of masonry. This Commission has received in all from the Imperial revenue some £300,000. In England a **Marine Biological Association** has been founded, towards which a site at **Plymouth**, a sum of money, and a small annual income has been granted by the Government. The **Fishmongers'** and other City Companies, the leading English scientific societies, and private individuals have subscribed. Altogether above £15,000 has been raised. The Laboratory was formally opened on June 30th, '88,

since when a large number of naturalists have made use of the facilities afforded by it for research. The record of work done in the Laboratory is to be found in the *Journal of the Association*, published at Plymouth. Pres., Professor Ray Lankester; Sec. and resident director, W. L. Calderwood.

Marine Insurance, '91. See INSURANCE.

Marines, Royal. This corps, of which H.R.H. the Duke of Edinburgh is hon. colonel, is a military body specially organised and trained for service in the fleet as well as on shore. It constitutes an important part of the naval forces of the country, and is supported by funds taken in the Naval votes. The strength of the corps for '91-92 amounts to 13,879, of which 353 are commissioned officers, 26 warrant officers, 877 staff sergeants and sergeants, 560 buglers and musicians, and 12,063 rank and file. The wages and allowances for these numbers amount to £444,311. Whenever an emergency arises, and there is an opportunity for active service, the Marines are certain to be the first force drawn upon and largely represented. In nearly all the naval and military operations in which this country has been engaged the marines have played a prominent part, and their motto, "Per mare, per terram," aptly describes the nature of their duties. The Royal Marines are divided into two corps—the Royal Marine Artillery (*Blue Marines*) and the Royal Marine Light Infantry (*Red Marines*). The former have their headquarters at Eastney (near Portsmouth); the latter at Chatham, Forton (near Gosport), and Plymouth. There is also at Walmer (near Deal) a recruit depot, where all newly raised men for both branches are sent to receive preliminary instruction. The Royal Marines are recruited under the long service system, and there is never any lack of applicants to this corps *d'élite*. The accepted candidates, whether officers or privates, are picked men, far above the average standard of the army. The recruiting office for London is at 22, Spring Gardens, but men are also entered at Bristol, Birmingham, Cambridge, Derby, Edinburgh, Exeter, Gloucester, Hull, Greenock, Wakefield, Liverpool, Reading, Salisbury, and Taunton. As a rule, one-half the force is embarked for duty in Her Majesty's ships, the remainder being at headquarters, revising drills. It is from these men in the depôts that battalions of marines have been formed for co-operating with land forces abroad in Egypt, Soudan and elsewhere. A parliamentary paper, No. 129, dated March 4th, '91, shows the training, pay and pensions of officers up to and including the rank of captain Royal Marine Artillery. Price twopence. During the year, the policy styled by Sir Drummond Jervoise "Home Rule for the Navy" (*q.v.* NAVY, BRITISH), of placing the coaling stations under the control of the Admiralty, rather than the War Office, was warmly advocated in the House of Commons by the late Sir John Pope Hennessy and others. It was contended that they are essentially naval, not military stations, and that they would be much more suitably garrisoned by Royal Marines than by landmen. The First Lord of the Admiralty, who opposed the proposal, but by no means heartily, did so on the plea that it would add to expense, while he confessed that it would probably conduce to increased efficiency. It would probably be economy in the long run to increase this splendid corps,

and the First Lord intimated that if found feasible something might be done in the way suggested at the Falkland Islands and Hong Kong.

Markets, Principal London. Besides innumerable local markets, London contains thirteen principal markets, of which eight are owned by the Corporation of London. These are the London Central Markets, Smithfield, the Central Fish Market, Farringdon Market, Smithfield Hay Market, the Metropolitan Cattle Market, Leadenhall Market, Billingsgate Market, and the Foreign Cattle Market, Deptford. The five others are Spitalfields Market, belonging to Sir Julian Goldsmid, M.P., and certain Freeholders; Shadwell Fish Market, owned by a former Billingsgate Trading Company; Stratford Market, established by the Great Eastern Railway Company; and the Borough Vegetable Market, which belongs to Trustees, who apply the profits to the reduction of the poor-rate in the parish of St. Saviour. Of these, the Corporation markets are held under charters, aided by statutory powers. The Borough, Shadwell, and Stratford Markets, established under Acts of Parliament, and Covent Garden and Spitalfields are held under charters granted by Charles II., the rights and duties of the owner of the former being defined and regulated by Acts of Parliament. The Central Markets at Smithfield, on the site of which a live cattle market formerly stood, were opened in 1869, the total cost of their erection amounting to close upon £1,750,000. The total delivery of meat, poultry, and provisions for the year '90 was 209,730 tons 15 cwt., producing in toll, at the rate of a 3d. for every 21 lbs., £35,303 8s. 4d. These figures are considerably in excess of former years, and represent an increase of 134½ per cent. upon the tolls and deliveries during the first year the market was opened. Classifying the supplies under separate heads, the total delivery is made up as follows:—

Country—killed	108,000
Town—killed	74,503
General foreign meat and produce	26,864
American killed fresh meat	56,085
Australian and New Zealand killed fresh meat	34,759

A comparison with previous years shows a large increase in the supply of chilled and frozen meat. The total delivery of American-killed meat for the year was 56,085 tons, and of Australian and New Zealand, 34,759 tons. The letting of shops in the market is invested in the markets' committee of the Corporation, who submit their recommendations to the Court of Common Council. The average rent of premises is at the rate of 12d. per sq. foot per week, or 6s. 6d. per year. In close proximity to the Central Meat Market is the Central Fish Market, forming part of a scheme for a general market for the sale of all articles of merchandise. The Metropolitan Cattle Market, at Islington, was opened by the late Prince Consort in '65, and replaced the cattle market formerly held at Smithfield. The continued restrictions upon the importation of cattle and sheep from abroad, and the increasing quantity of dead meat consigned direct to the Central Markets at Smithfield, has somewhat decreased the figures of recent years. The total number of animals received in the market in '90 was 882,760, comprised as follows:—

Beasts . . . 140,005	Pigs . . . 4788
Sheep . . . 712,375	Horses . . . 6152
Calves . . . 15,740	Donkeys . . . 3700

A pedlars' market, which forms one of the sights of London, is held here on Fridays. The **Foreign Cattle Market**, at Deptford, built on the site of a former Government dockyard, was erected at a cost of about £80,000, and is used exclusively for the reception of foreign cattle, which are slaughtered within ten days of their arrival. The number of animals landed in '90 was 306,878, producing in wharfage and lairage and market dues, £46,946 11s. Attached to the market is the steamship *Racoon*, used for the transhipment of cattle at the mouth of the river. In the course of a year it made 238 trips, transhipping 63,012 beasts. Chill-rooms have recently been erected here at considerable cost, and were opened by the Lord Mayor in June '91. The weight of fish brought into Billingsgate Market in '90 was as under:—

Land borne	82,884
Water „	45,950
	<hr/> 128,834

yielding in toll, £5,597 10s. 3d. A new fruit and vegetable market is now in course of construction in Charterhouse Street, and will be opened in the early part of '92. This is intended to replace Farringdon Market, which, under the Markets Act, falls into disuse.

Markets and Fairs, Weighing of Cattle Act. See SESSION, sect. 86.

Mark Twain. See CLEMENS.

Marks, Henry Stacy, R.A., was b. in London Sept. 13th, 1829, and studied at Leigh's school, becoming student at the Royal Academy at the age of twenty-two. In '53 his first picture, entitled "Dogberry examining Conrad and Borachio," was exhibited at the R.A., and was followed by "Toothache in the Middle Ages," "Dogberry's Charge to the Watch," "St. Francis Preaching to the Birds," "Old Friends," and "From Sunny Seas." Many of his subjects have been of a humorous nature, and the exhibitions of his pictures of bird life attracted in '89 and again in '90 a large amount of public notice. Many public buildings have been decorated by Mr. Marks—notably Eaton Hall. The proscenium frieze of the Gaiety Theatre, as well as the decorative work for the Prince's Theatre, Manchester, has been executed by Mr. M. In the Royal Academy '91 his picture entitled "A Select Committee" excited not a little amusement.

Marlborough, Rt. Rev. Alfred Earle, D.D., Bishop of, Bishop Suffragan of London, was b. 1832. Ed. at Oxford, and ordained deacon in '58. For some time vicar of Marlborough and afterwards of West Alvington, in the diocese of Exeter. Appointed Archdeacon of Totnes in '72, and Canon Residentiary and Prebendary of Exeter in '65. Recently appointed as rector of St. Michael's, Cornhill, and Bishop Suffragan of London, under the title of Bishop of Marlborough.

Marlborough College, Wiltshire. Founded 1843, incorporated by Royal charter '45, received additional charter '53. Exhibitions to Universities, one each of £50, £40, and £30 for three years, offered annually, and every three years the "Old Marlburian," £50, the Council Exhibition £30, and Leaf Exhibition £22 10s., fall vacant. Scholarships filled annually: 26 "Foundation," for sons of clergy, £30;

2 "Senior," £50; 6 "Junior," £30; 1 "House," £80, open; Minor Scholarships for Modern Languages, etc. Pupils, 580. Head Master, Rev. G. C. Bell, M.A.

Marriage Acts Amendment Bill. See SESSION, sect. 87.

Marriage of Nonconformists (Attendance of Registrars) Bill. See SESSION, sect. 88.

Marriage Regulations. The age of consent is fourteen in males and twelve in females, and it is not now necessary to have the consent of parents or guardians to the marriage by licence of minors. A marriage in a false name, unless by the connivance of both parties, is valid. An English subject marrying a foreign woman should be careful that she has, as far as she herself is concerned, carried out all the regulations in force in her own country dealing with the questions of consent of parents, notices, etc., or the marriage may be declared void; and an English woman marrying a foreigner should see that the laws on the same points as to the man have been obeyed, or the marriage may be declared void. If a British embassy or legation exist in a foreign town, two British subjects can be there married on making a formal declaration before one of the secretaries in the chancery, and then proceeding to have the marriage ceremony performed by the chaplain in the chapel of the embassy. If no religious ceremony be desired the consul can act as a registrar, but fourteen days' notice of the marriage must then be given. In Great Britain marriage can be had in four ways—by special licence, by common licence, by publication of banns, and before a registrar. In the case of a licence, one of the parties must have resided at least fifteen days in the parish or district where the ceremony is to be performed. The common licence can be obtained at the registry office of the bishop of the diocese, or from any surrogate of such bishop. One of the parties must personally apply for the licence, and make affidavit that there is no legal impediment to the marriage. The fees amount from £2 2s. 6d. to £3 3s. The common licence fixes the time and place of the ceremony. The special licence can only be obtained by one of the parties attending at the Faculty Office, Doctors' Commons, and showing good grounds for the granting of it, and they are rarely issued. The fees amount to about £30, and the licence empowers the parties to be married at any time, in any church, chapel, or other meet and convenient place. In the case of banns, they must be published in the church of the parish in which both parties or each of them reside for three consecutive Sundays, and the ceremony must be performed within three months of the final publication in one of the two churches, a certificate of the publication in the other church being given to the minister performing the ceremony. If the marriage is to be before a registrar, one of the parties must give notice to the registrar of the district, in which he must have dwelt for seven days. If the parties are in two districts, notice must be given to the registrar of each district. Notice will then be placed on the notice board of the office for twenty-one days, after which the certificate issues and the marriage may be celebrated (a) at the superintendent registrar's office without a religious ceremony, or (b) in any building certified as a place of worship, and registered as a place for the solemnisation of marriage,

but in presence of the district registrar and two or more credible witnesses, (c) according to the rites of the Church of England, in a church situated within the district of the registrar who issued the certificate, or (d) according to the usages of the Quakers or Jews. The fees for the certificate are 2s. for the superintendent registrar, and 5s. to the registrar. The registrar may also issue a licence as well as a certificate, in which case, for a fee of 1s., the notice is entered in the marriage notice book, which is open at all reasonable times to all who wish to inspect it. In this case notice need not be given to more than one registrar, and the notice need not be exhibited on the board as in the previous case, and the certificate may be issued in one instead of twenty-one days. The fees are, for the licence, £2 4s. 6d. to the superintendent registrar, and 10s. to the registrar, and the ceremony may be performed in any of the ways—(a) (b) or (c)—above mentioned, except according to the rites of the Church of England (d). All marriages, except those by special licence, must be performed between the hours of 8 a.m. and 3 p.m., in buildings with open doors. All marriages must be registered, if performed by a clergyman of the Church of England, by the clergyman, who transmits a copy to the superintendent registrar; in other cases by the district registrar, or the registering officer of the Quakers, or the secretary of the synagogue among the Jews.

Marriages, Dec. 90 to Nov. 91. The following is a list of some of the more important marriages of the year:—

Allsopp, Capt. the Hon. Herbert T., b. of Lord Hindlip—Edith Mary, 4th d. of Mr. and Hon. Mrs. Okeover (Aug. 11)
Ashley, Rt. Hon. Evelyn, s. of 7th Earl of Shaftesbury—Lady Alice Cole, d. of late Earl of Enniskillen (June 30)
Ashton, Hubert Shorrocks, and s. of R. S. Ashton, J.P., of Wilpshire, Lancs.—Victoria Alexandrina, e. d. of late Major-General Sir John E. W. Inglis, K.C.B., D.C.L., of Binfield, Beckenham (Oct. 3)
Astley, Thurlow, 3rd s. of late Sir Francis Astley, Bart.—Henrietta, and d. of late Hon. Henry Hanbury-Tracy (Aug. 5)
Astor, John Jacob—Ava Willing (Feb. 17)
Aukland, Lord—Sybil Constance, e. d. of Col. G. M. Hutton (April 2)
Avonmore, Algernon William, 6th Viscount—Mabel Sara, and d. of Mr. George Evans, of Gortmerron, Dungannon (Dec. 17, '90)
Baines, Talbot, y. s. of Fredk. Baines, of Leeds—Caroline Agnes, and d. of J. G. Talbot, M.P. (Oct. 13)
Balfour, James, o. s. of James Spencer Balfour, M.P.—Ethel Maud, e. d. of R. J. Sisson, J.P., of Talardy, St. Asaph (July 1)
Bambridge, George Fredk., private secretary to H.R.H. the Duke of Edinburgh—Ada, and d. late Lieut.-Col. J. F. Baddeley (Jan. 28)
Barnes, Arthur Gorell, J.P., e. s. of Alfred Barnes, M.P.—Everilda Maria, 5th d. of Henry Frederick Beaumont, M.P. (July 16)
Barran, Henry, s. of J. Barran, M.P.—Rosalie Mary, e. d. of Edgar Flower, of The Hill, Stratford-on-Avon (Feb. 10)
Barrett, Victor, Baron de, of Brandon Park, Suffolk—Ethel, e. d. of Mr. Arthur Wolton (June 9)
Barry, Edward Arthur, s. of F. Tress Barry, M.P.—Eleanor Margaret, e. d. of Colonel Courtenay H. S. Scott (Feb. 10)

Beaumont, W. B., M.P.—Edith Althea, wid. of Sir George P. Pomeroy Colley, who was killed in the Zulu war (Feb. 17)
Bell, Charles Wentworth—Edith Mary, d. of Michael Biddulph, M.P. (March 31)
Berkeley, Capt. Hastings, s. of late Lord Berkeley—Aline, d. of Mr. Harris, British Consul for the Department of the Alpes-Maritimes (Jan. 28)
Bickford-Smith, Roanden Albert Henry, e. s. of W. Bickford-Smith, M.P.—Caroline Louisa Marianne, o. d. of J. E. Hilary Skinner (July 30)
Bramley, Frank, artist—Katherine Glenly, 3rd d. of John Graham, of Huntingstile, Grasmere (Oct. 17)
Brenton, Francis Garford—Alice Bruce, d. of Sir John Puleston, M.P. (March 12)
Burns, James C., s. of Sir John Burns, Bart.—Charlotte M. E. Nugent Dunbar, d. of late R. N. Dunbar, of Machemore (April 2)
Calverley, Horace, of the 5th Dragon Guards—Louisa Mary, y. d. of Sir Brydges Henniker, Registrar-General of the United Kingdom (Jan. 6)
Calvert, William, e. s. of Colonel Calvert, of Oakley Court—Beatrice, y. d. of Rt. Hon. George Cubitt, M.P. (April 8)
Castelupe, Viscount, s. of Earl De La Warr—Hon. Muriel A. Brassey, 2nd d. of Lord Brassey (Aug. 4)
Capell, Hon. Arthur A., y. s. of Earl of Essex—Miss Townsend Wilson, e. d. of late Lieut.-Col. Townsend Wilson, of the Coldstream Guards (Dec. 23, '90)
Carden, Sir J. Craven, Bart.—Sybil, o. d. of late General Valentine Baker (Feb. 10)
Carnegie, Lord, e. s. of Earl of Southesk—Ethel Mary Elizabeth Bannerman, o. d. of late Sir Alex. Bannerman, of Elsieck (Aug. 1)
Cave, Harold Watkins, e. s. of Hon. Sir Lewis William Cave, a Judge of the High Court of Justice—Frances Maude, and d. of J. Darlington, D.L., Boulton Hall, Warwickshire (Sept. 23)
Close, Major, 13th Hussars—Lady Muriel Stuart, e. d. of Earl of Castle Stuart (June 2)
Cooke, William Russell—Margaret Mary Dilke, wid. of Ashton W. Dilke, late M.P. for Newcastle (Sept. 19)
Corbet, Reginald—Hon. Katharine Russell, y. d. of late Lord de Clifford (April 23)
Crossman, Robert, e. s. of Maj.-Gen. Sir W. Crossman, M.P.—Lizzie Helen, y. d. of late Capt. E. L. Clogstoun (April 9)
Cuffe, Hon. Otway F. Seymour, 3rd s. of late Earl of Desart—Hon. Elizabeth Blanche Emma, e. d. of Lord St. Levan (July 22)
Curzon, Hon. Alfred N., 2nd s. of Lord Scarsdale—Henrietta Mary, d. of late Hon. Spencer D. Montagu (April 29)
Daudet, Léon, s. of Alphonse Daudet, the famous novelist—Jeanne, g.-d. of late Victor Hugo (Feb. 12)
Davis, Sir Francis Boileau, Bart.—Ella Alice, o. d. of Rev. Conrad S. Green, of Buxton (April 30)
Dimdale, Charles, s. of Baron Dimdale, M.P.—Mrs. Hastings, d. of Sir Brydges Henniker, Bart. (April 2)
Douglas, Francis John, and surviving s. of late Sir G. Douglas, Bart.—Fanny Augusta, y. d. of Sir George Meyrick, Bart., of Hinton Admiral, Hants (Sept. 2)
Driver, Dr. Samuel R., Regius Professor of Hebrew and Canon of Christ Church, Oxford

- Mabel, *o. d.* of late Edmund Burr, of Burgh-next-Aylsham (July 7)
- Dudley**, William, 2nd Earl of—Rachel Gurney, *d.* of Mr. Charles Gurney, and adopted *d.* of Duke of Bedford (Sept. 14)
- Dyke**, Reginald Hart, *s.* of late Sir Percyvall Hart Dyke—Guinevere, *y. d.* of Lady Alfred Paget (Oct. 22)
- Emmott**, Charles, *s.* of Thomas Emmott, of Brookfield, Oldham—Lady Constance Campbell, *y. d.* of Duke of Argyll (June 27)
- Emonde**, Sir Thomas H. Grattan, Bart., M.P.—Alice Barbara, *d.* of Patrick Donovan, J.P., of Frogmore, Tralee (July 21)
- Feilden**, William Henry, *e. s.* of Sir William Leyland Feilden—Evelyn Mary, *d.* of Sir Morton Manningham Buller (April 22)
- Fergusson**, Thomas Colyer, *s.* of Sir James R. Fergusson, Bart.—Beatrice Stanley, only surviving *d.* of Professor Max Müller (Jan. 30)
- Ferne**, William T., M.D.—Hon. Jane Adèle, *d.* of 3rd Baron Lord Graves (Jan. 8)
- FitzGerald**, Lord Henry, *b. d.* of Duke of Leinster—Inez, *d.* of Commander Casberd-Butcher, of The Elms, Taplow (Jan. 21)
- Folkestone**, Viscount—Julia, *o. d.* of late Mr. C. Balfour, of Newton Don, and cousin of the Chief Secretary for Ireland (Jan. 20)
- Fry**, John Pease, *e. s.* Theodore Fry, M.P.—Margaret Theodora, *e. d.* of F. E. Fox, of Crownhill, Devon (June 4)
- Gordon-Gumming**, Sir William, Bart.—Florence Josephine, *d.* of late Commodore Garner, of New York (June 10)
- Graves-Sawle**, Colonel, Coldstream Guards, *e. s.* of Sir C. B. Graves-Sawle—Harriet Augusta, *e. d.* of Mr. Vernon-Wentworth (Feb. 9)
- Greville**, Hon. Ronald, *e. s.* of Lord Greville—Margaret Anderson, *step-d.* of Wm. M'Ewan, M.P. (April 25)
- Hall**, Alex. Nelson, *e. s.* of A. W. Hall, M.P., of Barton Abbey, Oxon—Susan Isabel, *e. d.* of Col. G. C. Porter, Fairford Park, Gloucestershire (Aug. 4)
- Hamilton**, Lord Ernest, M.P., *y. s.* of late Duke of Abercorn—Pamela, *d.* of Frederick A. Campbell, late Equerry to H.R.H. Princess Louise, Marchioness of Lorne (June 2)
- Hardcastle**, Rev. Edward H., vicar of Weston, and 2nd *s.* of Edward Hardcastle, M.P.—Harriet Mackinnon, *d.* of late Dr. Samuel Crompton, of Cranleigh (Aug. 1)
- Hardinge**, Capt. the Hon. Henry, Rifle Brigade, *e. s.* Visct. Hardinge—Mary Francis Nevill, 3rd *d.* of Hon. Ralph Nevill (July 8)
- Heathcote**, Gilbert Redvers, *s.* of Sir William Heathcote, Bart.—Pauline, *e. d.* of late Sir Arthur Wilson Trevelyan, Bart. (Oct. 15)
- Heron-Allen**, Edward, Necromancer of "Ye Sette of Odd Volumes"—Marianna, *d.* of Rudolph Lehmann (July 1)
- Holms**, Douglas Lyon, *e. s.* of late John Holms, ex-M.P.—Eileen Mary, *e. surv. d.* of Sir Charles Russell, Q.C., M.P. (Feb. 4)
- Hopkinson**, Albert, M.B., *s.* of John Hopkinson—Olga, *d.* of Sir Philip Cunliffe Owen, K.C.B. (Oct. 22)
- Howard of Glossop**, Lord—Hyacinthe, 5th *d.* of late William Scott-Kerr (April 6)
- Hoyle**, Rev. Joshua Fielding, 2nd *s.* of Isaac Hoyle, M.P.—Zoe, *d.* of late Rt. Hon. and Most Rev. William Thomson, Archbishop of York (Feb. 3)
- Irby**, Hon. Gilbert Neville, *y. s.* of late Lord Boston—Eame, *d.* of late Mr. G. Oldham Edwards, of Redland Court, Bristol (Jan. 1)
- Isham**, Charles, *s.* of Bradley Isham, N.Y.—Mary, *e. d.* of Robert Todd Lincoln, the U.S.A. minister, and *grand-d.* of the late President Abraham Lincoln (Sept. 2)
- Jackson**, Sir Robert W., C.B.—Gertrude Gelston, *y. d.* of Robert F. Daye (April 7)
- Johnstone**, Hon. Louis, 5th *s.* of Lord Derwent—Gwendoline, *e. d.* of H. C. Talbot (Jan. 8)
- Keppel**, Hon. George, 2nd Gordon Highlanders, 3rd *s.* of Earl of Albemarle—Alice, *y. d.* of late Admiral Sir William Edmonstone, Bart., C.B. (June 1)
- King**, Sir Charles S., Bart.—Sophia Louisa, *o. d.* of R. Bolton-Davis, J.P., of Leverford Park, Oxford (June 3)
- Lambart**, Capt. E. A., R.H.A.—Mary Louisa, *e. d.* of Sir James Walker, of Sand Hutton, York (April 14)
- Lane**, W. J., M.P.—Miss Mary Armstrong (Jan. 21)
- Lascelles**, Rev. Maurice George, 4th *s.* of Hon. G. E. Lascelles—Jane Barbara, *e. d.* of Robert B. Woodd, of Woodlands, Hampstead (July 8)
- Lawson**, Wilfrid, *e. s.* of Sir Wilfrid Lawson, Bart., M.P.—Mary Camilla, *y. d.* of late Turner A. Macan, of Elstow (April 28)
- Leigh**, James Hamilton—Mabel Constance, *e. s.* of L. J. Jennings, M.P. (April 30)
- Leighton**, Bryan Mawddy, *e. s.* of Sir B. Leighton—Margaret, *d.* of Major J. Fletcher, of Saltoun (Dec. 3, '90)
- Le Strange**, Roland, *e. s.* of Mr. Le Strange, of Hunstanton—Hon. Agneta Frances Delaval Astley, *sis.* of Lord Hastings (Oct. 22)
- Lloyd**, Capt. W. Neville, of the Royal Artillery—Ella Margaret, *o. d.* Dr. Percy-Cust, Dean of York (July 23)
- Lopes**, Henry York Buller, *e. s.* of Sir Massey Lopes—Lady Albeitha Louisa Florence Edgcombe, 2nd *d.* of Earl of Mount Edgcombe (Oct. 10)
- Macartney**, Mervyn—Miss Ritchie, *d.* of Rt. Hon. C. T. Ritchie, M.P. (July 8)
- Mackenzie**, Kenneth John, *s.* of Kenneth Mackenzie—Hon. Marjory Louisa, *e. d.* Viscount Stormont (April 8)
- Maitland**, Richard Anthony Fuller, *s.* of Thos. Fuller Maitland, of Garth, Breconshire—Adelaide Laura, 3rd *d.* of Right Hon. G. Cubitt, M.P. (Oct. 20)
- Matthews**, Philip, Lord Mayor of York—Constance, *d.* of late T. R. Storey, of Nottingham (March 10)
- Melville**, Visct.—Hon. Violet Cochrane-Baillie, *y. d.* of late Lord Lamington (June 18)
- Michaelovitch**, Imperial Grand Duke Michael, cousin of the Czar of Russia—Countess Sophie de Merenberg, *d.* of Prince Nicholas of Nassau (March)
- McNeill**, Charles Fitzroy Ponsonby, 3rd *s.* of Col. Duncan McNeill—Lady Hilda Rous, 4th *d.* of late Earl of Stradbroke (Jan. 31)
- Moncrieff**, Col. Sir Colin Scott, K.C.M.G., C.S.I.—Mary Deborah, 2nd *d.* of Arthur Albright, of Mariemont (Dec. 30, '90)
- Montgomery**, Col. William Edward, of the Scots Guards—Alberta Victoria, *e. d.* of General Sir Henry Ponsonby, Keeper of the Privy Purse and Private Secretary to Her Majesty the Queen, in whose presence the wedding ceremony was performed at the Guards' Chapel, Wellington Barracks (June 22)
- Moystyn**, Maj.-Gen. the Hon. Savage, C.B.—Emily, *d.* of Rev. G. E. Welby (April 22)
- Mowbray**, Rev. E. G. L., rector of Dursley, and *y. s.* of Sir John R. Mowbray, Bart., M.P.—

Caroline, 3rd d. of late Lieut.-Gen. G. T. Field. R.A. (Jan. 27)

Newton-Butler, Lord, *e. s.* of Earl of Lanesborough—Gwladys, *d.* of late Maj.-Gen. Sir H. Tombs, V.C., K.C.B. (Jan. 31)

Norman, Henry, well-known Journalist, who acted as Special Commissioner of the *Pall Mall Gazette*—Menie Muriel Dowie, authoress of "A Girl among the Karpathians" (Sept.)

Paravicini, Percy de, *y. s.* of late Baron de Paravicini—Lady Marcia Cholmondeley (May 21)

Parry, F. Sidney, 2nd *s.* of late Bishop of Dover—Anna M., *y. d.* of Rev. the Hon. Canon W. H. Fremantle, of Canterbury (Oct. 1)

Patchitch, M., Prime Minister of Servia—Mlle. Doukovich (June 7)

Preston, Capt. the Hon. Edward, *b.* of Lord Gormanston—Annie, 2nd *d.* of Mr. Samuel Grimshawe, of Errwood Park, Cheshire (Jan. 21)

Rees, John David, *s.* of late Lodwick Wm. Rees—Mary, 3rd *d.* of General the Hon. Sir James Dormer, K.C.B. (Sept. 9)

Reuter, George de, 2nd *s.* of Baron de Reuter—Maud, *o. d.* of late Mr. John Potter, of Philadelphia (April 30)

Roberts, Charles Henry, Fellow and Tutor of Exeter Coll., Oxford—Lady Cecilia Howard, 2nd *d.* of Earl of Carlisle (April 7)

Rodney, Lord—Hon. Corisande Evelyn Vere Guest, 2nd *d.* of Lord Wimborne (Jan. 24)

Russell, Arthur, *e. s.* of Sir Charles Russell, Q.C., M.P.—Florence, *d.* of Prof. Cuming, M.D., Queen's Coll., Belfast (Oct. 7)

Russell, Hon. Francis Rollo, *s.* of late Earl Russell—Gertrude, *e. d.* of Henry Joachim and niece of Herr Joachim, the eminent violinist (April 28)

Samuel, Edward Leven, *s.* of Sir Saul Samuel—Ray, *y. d.* of Abraham Cohen (Sept. 30)

Scott-Moncrieff, Robert—Hamilton Dora, 2nd *d.* of Sir Noel Paton (June 2)

Sergison, Charles W., of the Scots Guards—Ilon, Florence Hanbury-Tracy, 2nd *d.* of Lord Sudeley (June 24)

Staples, Henry John, *e. s.* of late Sir John Staples, K.C.M.G.—Constance J. Leacroft (Sept. 15)

Stewart, Hon. Randolph, 2nd *s.* of late Earl of Galloway—Amy Minnie, *o. d.* of Mr. Cliffe, of Bellevue, co. Wexford (June 3)

Story, Julian Russell, *s.* of W. W. Story—Emma Hayden Eames, the well-known opera singer (Aug. 1)

Taylor, Philip Beauchamp, Captain in the Royal Artillery, *e. s.* of Maj.-Gen. Markham L. Taylor—Annie Emily, *e. d.* of Sir Spencer Maryon-Wilson, Bart. (Aug. 6)

Terry, Fredk., well-known actor—Julia Emelie Neilson, whose *role* in "The Dancing Girl" brought her into public notice (Oct. 2)

Thicknesse, Philip, *s.* of Bishop of Leicester—Daisy, *d.* of late Dr. Oakley, Dean of Manchester (April 27)

Tilkin, Felix, who, under the stage name of "Ivan Caryll," directs the music at the Lyric Theatre—Geraldine Ullmar, well known from her acting in *La Cigale* (March 30)

Tinsley, J. H., and *s.* of late J. Tinsley, of Graffie Hall, Cheshire—Miss Jackson, *e. d.* of Right Hon. W. L. Jackson, M.P. (Oct. 20)

Walter, Godfrey, *s.* of John Walter, Bearwood, Berks—Edith, *d.* of Robert Smith, Goldings, Hertford (July 23)

Ward-Humphreys, George Herbert, L.R.C.P., of Cheltenham—Sophie, *e. d.* of Briggs Priest-

ley, M.P., of Ferncliffe, Apperley Bridge, Yorkshire (July 29)

Williams, Arthur Vaughan, *s.* of late Judge Vaughan Williams—Evelyn, *o. d.* of Thomas Gooch, of Hemel Hempstead (Aug. 1)

Willshire, Lieut.-Col. Sir Arthur, Bart.—Frederica, *y. d.* of Sir Sanford Freeling, K.C.M.G. (July 22)

Wright, Sir Robert S., Judge of the High Court of Justice—Merriell Mabel Emily, *d.* of late Rev. Seymour Chermide, rector of Wilton (Aug. 11)

Marriage with a Deceased Wife's Sister.

The following list gives a brief *resumé* of the history of this movement to change the existing law in regard to marriage with a deceased wife's sister. Before 1533, marriages of consanguinity and affinity were wholly governed by Canon Law. Such marriages were voidable (1533-1835). In the latter year, Lord Lyndhurst's Act made past marriages of affinity valid, future marriages void. The House of Commons rejected the prohibitory clause, but afterwards were persuaded to accept it temporarily.

'41—	LORDS.	Lord Wharnccliffe's Bill lost without a division.
'42—	COMMONS.	Lord Francis Egerton's Bill lost, 123 to 100.
'47—	A Royal Commission appointed to examine the Marriage Laws.	
'49—	Feb. 2.	COMMONS. Rt. Hon. J. Stuart-Wortley brought in Bill.
	June 20.	" Second Reading, 177 to 143.
'50—	Feb. 7.	COMMONS. Mr. Stuart-Wortley. First reading, 149 to 65.
	Mar. 6.	" Second reading, 182 to 130.
	July 10.	" Third reading, 144 to 134.
'51—	Apr. 25.	LORDS. Lord St. Germans Bill lost, 50 to 16.

The attempts at legislation between '51 and '75 were frequent, but unsuccessful in obtaining their object. From '75 until '91, the following have been the results obtained in the House of Lords and in the House of Commons:—

'75—	Feb. 9.	COMMONS.	Sir T. Chambers' Bill read first time.
	Feb. 17.	"	Second reading moved, Bill lost, 142 to 171.
'78—	May 6.	LORDS.	Second reading, lost, 101 to 81.
'80—	June 25.	"	Second reading lost, 101 to 90.
'82—	June 12.	"	Second reading lost, 132 to 128.
'83—	June 11.	"	Second reading carried, 165 to 138.
	" 28.	"	Third reading lost, 145 to 140.
'84—	May 6.	COMMONS.	Resolution carried, 238 to 127.
'86—	May 24.	LORDS.	Bill second reading lost, 149 to 127.
'88—	Apr. 18.	COMMONS.	Second reading carried, 239 to 182.
'89—	May 9.	LORDS.	Second reading lost, 147 to 120.
'90—	Apr. 30.	COMMONS.	Second reading carried, 222 to 155.

'91—Feb. 11. COMMONS. Second reading carried, 202 to 155.
 „—June 10. „ Committee Stage.

Successive majorities for the Bill in Committee.
 —107 to 36; 141 to 60; 136 to 78; 153 to 74; 174 to 74; 266 to 92; 213 to 53; 175 to 94. **Colonial Bill**—The same in principle as previous measure (Deceased Wife's Sister Bill), but intended to make marriages of this class legally contracted in the Colonies legal also in England:—

'77—Feb. 28. COMMONS. Second reading carried, 192 to 141.

'78—Feb. 27. „ Second reading carried, 182 to 161.

In both of these years the Conservatives were in power. In the second year (1878) the Government opposed the bill, and were, as above, defeated. **Scotch Bill.** The object of this bill was to make such marriages legal in Scotland, where the highest authorities believe them to be already legal. But there is a doubt. '80 April 31d, Commons, and Reading carried 184 to 131. Thus this struggle has been going on in England for more than fifty years. It arose as early as '35, out of a bill brought in by Lord Lyndhurst, with the real object of legitimating the present Duke of Beaufort, whose father had married the deceased wife's half sister, having as issue of the second marriage the present Duke. By process in an Ecclesiastical Court the latter's claim to the title and estates might have been set aside. To gain his primary object Lord Lyndhurst consented to a demand of the Bishops that the bill should make all future marriages of the kind void *ab initio*, instead, as he intended, of their being made voidable only within two years of the date of contract, and afterwards not liable to be called in question. The Commons (the Conservatives being in power) strenuously opposed what had now become the Bishops' Bill, and threw it out on the Second Reading. On the very urgent representations of the Government, however, to the effect that most serious issues to individuals depended on the immediate passing of the measures at last agreed, with the universal understanding that the Act was to come up for revision the following year. The Government, however, did not carry out this intention; the Bishops have consequently had their way. From Feb. '75, the present bill has never failed to gain a large majority, averaging about sixty, in the House of Commons. **The Colonies.**—These marriages are legal in every Christian country in the world, except the United Kingdom. They have been specially legalised under the sanction of the Crown in each of the Australian Colonies, in Canada, Barbados, Ceylon and the Mauritius. Bills similar to the English Bill have also been passed in Natal (twice) and New Zealand. These were, however, refused ratification (by the Crown) for special or technical reasons. Throughout India marriages of the kind are universally legal among all sects and creeds except European Protestants. In all the colonies not here named they become legal in all respects on the death of the husband or wife. **Opposed to the existing law is the Marriage Reform Association**, of which the Sec. is Mr. T. Paynter Allen. Its office is at 21, Parliament Street, S.W. Defending the law as it stands is the **Marriage Law Defence Union**, of which the Sec. is Mr. G. J. Murray

1, King Street, Westminster. See also **SESSION**, sect. 89.

Married Women's Property Law on, in '91. *In re Shelton* (Chancery Division, July 9th, '91) raised a question whether a legacy of £1,000 to a married woman was bound by a settlement made on her marriage. It appeared that the lady was married in '80, when she was an infant, and that the settlement contained a covenant by her husband and herself to settle her after-acquired property. The legacy of £1,000 was bequeathed to the lady absolutely in '89, and in Dec., '90, the lady was divorced on the petition of her husband. In July, '90 the executors of the will paid the £1,000 to the trustees of the settlement. The lady had since remained, and it was contended that she was entitled to disaffirm the settlement. It was, however, submitted by the executors and trustees that, even if she could disaffirm, the fund was bound by the covenant of the husband. To this it was replied that the legacy was the separate property of the lady by virtue of sect. 5 of the Married Woman's Property Act, '82, which provides that a married woman married before '83 shall be entitled to have and to hold as her separate property all property her title to which shall accrue after '82. Mr. Justice Chitty held that the legacy had been rightly paid to the trustees.

Married Women (Maintenance in case of Desertion) Act, '86. This Act provides that it shall be lawful for any married woman deserted by her husband to summon him before two justices in petty sessions or a stipendiary magistrate. If satisfied that the husband, being able partly or wholly to maintain his wife, or wife and family, has wilfully neglected to do so, and has deserted his wife, the justices or magistrate may order him to pay to her such weekly sum not exceeding £2 as may be considered to be in accordance with his means and any means the wife may have for her support, the payment to be enforced in the same way as the payment of money under an affiliation order. The order may be varied by the justices or the magistrate upon proof given that the means of husband or wife have varied since the order was made. No order for payment shall be made in favour of a wife proved to have committed adultery, unless such adultery has been condoned; and any such order may be discharged upon proof that the wife since the making thereof has committed adultery. The Act does not extend to Scotland.

Marseilles Drainage. On Oct. 8th, '91, was celebrated in a public manner a great scheme for the drainage of the town. The scheme adopted was devised by M. Cartier, the total length of piping being 112 miles, and the outfall some distance out at sea. As Marseilles is the principal French port of entry for vessels from the tropics, the health of the place is considered of national importance, and the works were deemed imperative, as the death rate had reached 32 per 1,000.

Marshall, Wm. Calder (retired), R.A., was b. in Edinburgh 1833, and received training under Chantrey and Bailey. First exhibited at the Royal Academy in '35; A.R.A., '44; R.A., '52. He has chiefly devoted himself to classical and poetical subjects. Many commissions have been received by Mr. Marshall from the Art Union, whose prize of £500 was rewarded to him for his "Dancing Girl Reposing." The statues of

Lord Clarendon and Lord Somers were executed by him for the Houses of Parliament, and those of Sir R. Peel in Manchester and Jenner and Campbell in London are from his chisel. In '57 he was awarded the first prize of £700 for a design for a national memorial of the Duke of Wellington. Mr. M. has not recently exhibited at the Academy. He resigned his membership of the Royal Academy (Dec. '90).

Martin, Sir Theodore, K.C.B., was b. in Edinburgh 1816. Ed. at the High School and University of Edinburgh, subsequently practising as a solicitor in that city. In '46 he removed to London, and in '58, under the *nom de plume* of "Bon Gaultier," published, with the assistance of the late Professor Aytoun, his "Book of Ballads," and a translation of the "Poems and Ballads of Goethe." His "Life of the Prince Consort" was written by command of her Majesty, who, on the completion of the work in '80, created him a K.C.B. The most important of his other works are translations of "Odes of Horace," the Complete Works of Horace, (Ehlerschlager's dramas, *Corregio* and *Aladin*, Goethe's *Faust*, the "Vita Nuova" of Dante, and Henrik Hertz's drama *King Ren's Daughter*, and a "Life of Lord Lyndhurst." In '51 he married the celebrated actress Helen Faucit. Sir T. M. was elected Rector of the University of St. Andrews in '80.

Martineau, Rev. James, D.D., LL.D., comes of an old Huguenot family. He is a brother of the late Harriet Martineau, and was b. at Norwich 1805. Educated at Norwich Grammar School, Dr. Lant Carpenter's School at Bristol, and Manchester New College (q.v.). He entered the Unitarian ministry in '28. After officiating for some years as minister in Dublin and Liverpool, accepted the chair of *Mental and Moral Philosophy at Manchester New College* '41. Was minister of Little Portland Street Chapel '50, and Principal of Manchester New College '63. Many eminent men, including Darwin and Lyell, were occasional worshippers at Little Portland Street Chapel during Dr. M.'s pastorate. He retired from the ministry in '73, and from the professorate in '86. Dr. M. is a voluminous writer on ethical and theological questions, and amongst the best known of his works are "Studies of Christianity," "The Seat of Authority in Religion," "Modern Materialism," "Ideal Substitutes for God Considered," "Hours of Thought on Sacred Things," "Types of Ethical Theory," and "Study of Religion" ('88). Dr. M. is hon. LL.D. Harvard and D.D. Leyden and Edinburgh, and D.C.L. Oxford, '88. Issued (Dec. '90) a work entitled "Essays, Reviews, and Addresses."

Martinique. A West Indian island of the Windward group. It is a French colony. Area 379 sq. m.; pop. 169,232. **Fort Royal** (or Fort de France) is the seat of government; **St. Pierre**, pop. 18,000, the principal town. Originally settled by France in 1635, it has several times been in English hands, but was finally confirmed to France in 1814. See COLONIES OF EUROPEAN POWERS.

Mashonaland is a portion of British Zambesia, and is comprised within the sphere of influence over which the British South African Co. exercise rights. At the end of '90 the Royal Geographical Society voted £200 to Mr. Theodore Bent for the purpose of exploring the ruins at Zimbabwe, which had been known since the sixteenth century. The ruins were found to contain many phallic images, vases etc. and

are supposed to prove that the Phœnicians visited and possibly colonised the spot. At the end of Sept. '91 there were about 2,000 white men in the country, including 600 policemen. The Tuli Trading Association, formed of merchants of Kimberley and Port Elizabeth, deliver provisions at Fort Tuli between the 15th and 22nd of the month, and arrangements were also made for the delivery during the dry season of daily supplies for 3,000 men. There were also numerous storekeepers who sold clothing and ordinary food at reasonable prices. The great difficulty was that of transport, for which there are three routes—one by the Transvaal, the second by the Bechuanaland or health route, and the third and quickest by the Pungwe, *via* Port Beira. By the convention between Great Britain and Portugal, the latter was pledged to build a railway to the boundary of the British sphere of influence. There are several steamers going right up the river, but there is about 60 miles of tortuously country. If the railway be laid Fort Salisbury will soon become an important centre. The country is healthy, climate salubrious, and the soil fertile. The country round Fort Salisbury is well watered and wooded, and is a gold-bearing district. The Portuguese have a fortnightly postal service from Massi Kesse to the coast, and a road has been made from Fort Salisbury to Massi Kesse.

Massey, Gerald, poet and lecturer, was b. at Tunst 1828. His parents being very poor, his childhood was passed under all the distressing circumstances to which children were liable previous to the adoption of the Factory Acts. At the age of fifteen he obtained a situation as errand boy at Messrs. Swan and Edgar's, Regent Street, and picked up his education by reading at the second-hand bookstalls at such odd moments as he could spare. He subsequently became editor of a Radical paper, the *Spirit of Freedom*, and in '54 published the "Ballad of Babe Christabel and other Poems," which attracted the attention of Walter Savage Landor, who pointed out the great promise which the young poet gave in this volume. Mr. M. subsequently published other poems, which won for him great popularity; and for some years he wrote the poetical criticisms for the *Athenæum*. Mr. M. has also devoted much attention to the subject of spiritualism, and has lectured with great success in England, America, and the Colonies. Mr. M. was some years ago placed as a pensioner on the Civil List in recognition of his services to literature as "a poet sprung from the people." He has recently completed his new work on *Shakespeare*, and published "My Lyriol Life," '89.

Massowah. An island and town at the entrance of a bay on the African coast of the Red Sea, about 330 miles N. of the Straits of Babel-Mandeb. It is the natural port and commercial outlet for Tigre and Northern Abyssinia. Was an Egyptian possession till 1885-6, when taken possession of by Italy. War with Abyssinia soon broke out, and some reverse was at first experienced by the Italians, who, afterwards reinforced, have effectually made good their position, and have occupied territory to some distance inland, through which they are now pushing a railway. Massowah has been fortified, and its development as an Italian dependency may be anticipated.

Master and Servant, Law as to, in '91. A traveller employed by a food company agreed that he would not, in the event of

his engagement being terminated, call upon the firm's customers to solicit orders. He subsequently entered the services of a rival company, and called upon the customers of his late employers. It was held that the covenant was not void as being in restraint of trade, and that his former employers were entitled to an injunction. (*Mills v. Dunham*, Court of Appeal, Jan. 29th, '91.) In a case heard in the Bedford County Court, Feb. 19th, where a groom had been dismissed before a month's notice had expired, because he grew a moustache, contrary to the wishes of his mistress, judgment was given against the employer.—An important decision as to the extent to which the Chancery Courts will interfere with contracts for personal service was given by the Court of Appeal (March '91). The *Whitwood Chemical Company* had engaged *Mr. Hardman* as manager for a term of ten years, and there was an agreement by which it was provided that he should devote the whole of his time to the company's business. On the other hand, there was no corresponding stipulation that he would give none of it to any other business. He consequently joined another company in the same neighbourhood in the character of a director. His contention was that he was able to devote the whole of the ordinary business hours to his original employers, but the *Whitwood Company* applied to the Chancery Division to restrain him from giving any of his time to then rivals. Mr. Justice Kekewich granted the injunction, but the Court of Appeal set it aside, declining to go beyond the strict letter of the agreement. It held that Mr. Hardman, not having bound himself to serve no other company, was at perfect liberty to do so, provided that it did not interfere with his attention to the interests of the plaintiffs; while if it did there was a sufficient remedy to be had in an ordinary action for breach of agreement.—In the case of *Armstrong v. The South London Tramway Company* (HAZELL'S ANNUAL, '91, p. 399), the Court of Appeal gave an important decision towards the close of '90. The plaintiff was a conductor in the service of the defendants, and signed an agreement, by which all wages due to him might be retained in case of breach of the rules, and the manager was to be the sole judge whether any breach had been committed, his certificate to be conclusive in all courts. A dispute having arisen, the manager, without allowing the conductor a hearing, gave a certificate depriving him of wages due. The Queen's Bench Division held, that although the agreement was oppressive, yet, as the conductor had signed it, he was bound by it. The Court of Appeal, however, held, reversing this decision, that the man ought to have been first heard, and that under the circumstances, his wages must be paid to him.—In a case in the Westminster County Court, where a female servant had been dismissed because she had declined to wear a cap, and where there had been no agreement that she should be so attired, a verdict was given against her employer, who had summarily dismissed her.—The Court of Appeal (Oct. 27th, '91) held, that a grocer's assistant is not a workman within the meaning of the Employers' and Workmen's Act, and therefore could not be summarily convicted by a magistrate for leaving his employment. (*Bound v. Laurence*.)

Matabeleland. An extensive country in

South Africa between the Limpopo and middle Zambezi rivers, north of *Transvaal* and *Bechuanaland*. Is mountainous, and has been famous from a very early age for its productive gold mines. Ancient ruins of unknown origin have been seen here by Mauch, who passed through the country. Was conquered fifty years ago by King Moselekatse and a Matabele army, the native tribes, Mashona and Makalaka, subdued and incorporated, and a military despotism set up on the model of Chaka's in Zululand. This endures under Lo Benguela, successor of Moselekatse. Its proximity to the British Protectorate, and its auriferous wealth, are also likely to bring Matabeleland into public attention ere long. The Matabeles (near kinsmen of the Zulus) are numerous, warlike, drilled in regiments, every able-bodied man a soldier, and they are said to be well armed. The king is an absolute autocrat, possessing unquestioned authority.

Mathew, Sir James Charles, was b. in 1830. Educated at Trinity College, Dublin, where he was *Senior Moderator* and *Gold Medalist*. Called to the bar at Lincoln's Inn ('54). He was a member of the South-Eastern Circuit, and, like Lord Justice Bowen and Mr. Justice A. L. Smith, had not taken silk when he was appointed a *Judge of the Queen's Bench Division*. Just previously Mr. Mathew had acted as a member of the Committee on the subject of the "Costs of Legal Proceedings." Mr. Justice Mathew was the third Catholic judge appointed since the Catholic Emancipation Act.

Matthews, Rt. Hon. Henry, M.P. for East Division of Birmingham, and Home Secretary, is the son of the Hon. Henry Matthews, late puisne judge of Ceylon, where he was born in 1826. He was educated partly on the Continent and partly in England. Having graduated at the Univ. of Paris B.A., he studied at Univ. Coll., London, and subsequently graduated B.A. and LL.B. at the London Univ., where he obtained the Univ. Law Scholarship of £50 a year for three years. In the same year he was appointed a Fellow of Univ. Coll., the only other Fellow of the year being Bagchot the economist. In '45, when he was only eighteen, Mr. Matthews was admitted at Lincoln's Inn, and in '50 he was called to the bar. Eighteen years later he took silk, was elected a Benchor of Lincoln's Inn, and was returned to the House of Commons as Independent Conservative member for Dungarvan. From '72 to '76 he acted as *Examiner in Common Law* to the Council of Legal Education. In '85 he unsuccessfully contested North Birmingham as a Conservative. In July '86 he contested East Birmingham, and by the fusion of the Unionist Liberals with the Conservatives was returned. When Lord Salisbury formed his second administration after the general election, Mr. Matthews was appointed *Home Secretary*. He has been connected with several *causes célèbres*, notably the *Borghese case*, the *Slade case*, *Lyon v. Home* (the spiritualist), *Boulton and Park*, the *Tichborne case*, *Armstrong case*, and the *Crawford divorce case*. He delivered an important speech at Accrington in Nov. '91.

Mauritius. So named by the first Dutch occupiers in 1598, after Prince Maurice of Holland. An island in the Indian Ocean 500 miles east of Madagascar, 2000 miles from India, and 2300 from the Cape. It is a British Crown colony. Area 708 sq. m., pop. 368,245. The island is divided into nine districts. Capital

and chief port is **Port Louis**, pop. 30,000, connected with other centres by lines of railway and excellent macadamised roads. Dependent appanages of the colony, under the administration of its governor, are various groups in the Indian Ocean. The **Seychelles**, **Rodriguez**, the **Amirantes**, **Diego Garcia**, and the **Chagos Islands**, are the chief of them. Total area about 350 sq. m., pop. 16,000. **Mauritius** is mountainous, the highest peaks attaining 2700 feet. A Governor presides over administration, which is conducted by Executive and Legislative Councils, both of Crown nominees. For financial statistics, see **BRITISH EMPIRE**, etc. (table). The capital is strongly defended, but former large garrison reduced to 400. There is now a constabulary of about 1,000. The Church of England and the Roman Catholic bodies receive some State aid. There is a Royal College, and also many Government and other schools. The Dutch abandoned the island in 1710. In 1721 the French took possession, and the island was then called **Ile de France**. A British force under Abercrombie captured Mauritius in 1810, since when it has remained a colony of England.—**Sir Chas. Cameron Lees**, K.C.M.G., Governor of Barbados, was appointed Governor of Mauritius, in succession to Sir John P. Hennessy (Oct. '89).

May-Day Demonstrations. See **LABOUR**.

Meat Supply of London. See **MARKETS**, **PRINCIPAL LONDON**.

Melbourne. Capital of **Victoria** (*q.v.*), on **Port Philip**; pop. 427,000.

Mercantile Marine of the World. The total number of steamships and sailing vessels in the world, of 100 tons register and upwards, in '91, is 32,328, and their estimated tonnage about 22,839,958 tons. According to **Lloyd's Register of British and Foreign Shipping**, from July 1st, '91, to June 30th, '92, from which the following statistical tables are taken, the number of such ships belonging to the different countries in the world are as given in Table A. The number of sailing vessels of all countries is 20,621, with a net tonnage of 9,123,449 tons. The number belonging to the above-mentioned nations and our Colonies are given in Table B. The number of steamships in the world is 11,706, having a gross tonnage of 13,616,509. Of these steamers, the numbers owned by the before-mentioned countries are given in Table C. Table D shows the number and tonnage of all ships of 100 tons and upwards built by each of the several countries of the world during '90, as recorded in "Lloyd's Register." Table E shows the material of construction of which vessels of 100 tons and upwards were built in the world in '90, and their tonnage. Table F gives an account of the number of ships classed by each of the principal classification societies of the world.—The late **Liverpool Underwriters' Registry** is now amalgamated with **Lloyd's Register**. The figures stated above as to the latter do not include ships classed in the Society's Yacht Register. **Germany** and **France** are the only two foreign nations which build any appreciable number of iron and steel ships, though **Sweden** and **Norway** construct what merchantmen they require. There is but little for British shipbuilders to fear from competition with France, but much from Germany, as the latter is fast becoming a shipbuilding country, and now builds about two-thirds of her large requirements. No nation, however, except the United Kingdom,

can now supply a demand for shipbuilding beyond itself. At the end of the first half of '91 there was a far less amount of tonnage building in the United Kingdom and preparing for construction exclusive of war ships than for corresponding periods. It appears that there are building of steamers 673,064 tons, and of sailing vessels 161,907 tons. These figures include ships for foreign account, which represent about 15 per cent. of the total. Preparations were made for building 75,649 tons of

steamers and 69,850 tons of sailing vessels at the end of June, as compared with 111,739 tons of steamers and 77,730 tons of sailing vessels at the end of the previous quarter, and 215,288 tons of steamers and 77,430 tons of sailing vessels at the end of '90. This reduced production applies more to the Clyde than the east coast of England. To a very large extent the new tonnage consists of sailing vessels, and consequently the effective increased carrying power is much less than of recent years, when the production has mainly been steam tonnage. The tonnage of sailing vessels now

building is larger than for many years, and for the year will exceed the losses, whereas for a very long period the inverse ratio has been the result. For the first half of '90 the losses of steamers have been about 270,500 tons, and of sailing vessels 100,900 tons. During the same period the steamers added to the British register represent 381,000 tons, and sailing ships 100,800 tons. In each case the figures include ships sold to or purchased from foreigners. The net increase has been about 170,500 tons of steamers, which is equal to about 2 per cent. of the total number of British merchant

Kingdom, exclusive of ships built for foreigners in '90, are as under, viz. :-

steamers. If new steamers only continue to be ordered on a similar limited scale to that prevailing in the last eighteen months, the effect will soon be noticed in the value of steamers and in freights. The present production of sailing vessels is thought to be in excess of the regular requirements of the market, whereby they will soon prove unremunerative. The number and net tonnage of ships built at the leading shipbuilding ports in the United

with a tonnage of 73,251,203. Of these 154,980, with a tonnage of 12,213,636, were sailing vessels, and 187,590, with a tonnage of 61,037,567, were steamers. The number of foreign sailing ships which entered were 14,894, having a tonnage of 4,287,752, and the number of foreign steamers 12,611, having a tonnage of 7,035,460. The number of ships that cleared were: British sailing vessels, 131,394 of 11,124,557 tons; and British steamers, 180,745 of 57,473,531 tons; foreign sailing vessels, 14,919 of 4,281,191 tons; and foreign steamers, 12,388 of 6,886,752 tons. The total number and tonnage of British and foreign ships which entered and cleared with

cargoes and in ballast coastwise at ports in the United Kingdom were: Entered, 377,240, having a tonnage of 47,738,612. Of these 150,641 were sailing vessels, with a tonnage of 10,270,254, and 156,599 steamers of 37,468,358 tons. The ships cleared numbered 276,270, with a tonnage of 42,317,876, of which 127,426, with a tonnage of 9,038,022, were sailing vessels, and 148,844 steamers of 42,117,876 tons. The total number and tonnage of the registered ships of the United Kingdom used in the home and foreign trades, and the number of persons employed therein, in the year '90, are given in the following table:—

	Number.	Tonnage.	Persons employed.		
			British.	Foreign.	Total.
Sailing vessels	11,570	2,893,572	72,199	11,809	84,008
Steam	5,855	5,021,764	113,948	15,418	151,890
Totals	17,425	7,915,336	186,147	27,227	236,108

Since '40 the British shipping trade has increased more than eight times, while foreign ships have not increased sevenfold. Norway and Germany principally compete with Great Britain. The former nation has about 25 per cent. of the foreign shipping, and Germany about 22 per cent. Holland, Denmark, France, Sweden and Spain come next in order. The British tonnage was increased last year by 1,500,000 tons, while foreign tonnage only increased by 900,000 tons. Great improvement has been made in steamships during the last six years by triple-expansion engines, whereby much economy in fuel is effected. With this type of engine and 160 lb. boiler pressure the consumption of coal is about 17 lb. per h.p. per hour, which is only about one-third of the fuel required to develop this power in '45. There is a tendency to increase the present high pressure. For several years Messrs. Denny & Co., of Dumbarton, have been constructing, both for new steamers and for altering the machinery of old ones, engines on the quadruple-expansion principle, whereby the steam is successively expanded through four cylinders with 180 lb. boiler pressure. This, it is stated, will cause a further saving in coal; and as means are devised for using even higher pressures there will be further economy in propelling progress. Much difference of opinion exists respecting forced draught, and it is a question far from being satisfactorily settled. In the mercantile marine its successes are more numerous than its failures; but it has been found that in the ships of the Navy it has proved a failure, and is only used therein in cases of emergency. It appears that the cause of this failure is that the tubes leak at the combustion chamber ends when forced draught is used. An excellent paper was read on the subject at the Institution of Marine Engineers on Oct. 10th, '89, and several cases were mentioned in which, owing to lack of attention to details, faulty design of boilers, or inferior arrangement of forced draught, bad results had followed. It was, however, stated by the chairman, in summing up the arguments, that, with a few improvements and the construction of boilers

to meet the conditions of forced draught, its general introduction into the merchant service would be accepted without question. This opinion is still entertained, and it is confirmed by the fact that forced draught is and has been used with great effect in the latest ocean liners, including the *Trentonic* and *Majestic* of the White Star Line, and the *City of Paris* and *City of New York* of the Inman and International Line. The White Star steamers are fitted with hot-air blast apparatus, on Howden's system, while the Inman and International ships work under a different forced-draught method, being fitted with closed stokeholes and cold blast appliances. Mr. W. A. Martin, of the firm of W. A. Martin & Co., furnace engineers, of Focker Street, Blackfriars Road, London, has introduced and patented a system of **Induced Draught**. Under this new system it is claimed that there will be increased work out of the boilers at a less expenditure of fuel, and the stokehole, open as it is to the free air, becomes almost the coolest part of the ship, whereby stoking will be less laborious and difficult, and the impinging of the blast upon the tube plate will be greatly diminished. His plan is to draw the hot air through the tubes by a fan placed at the foot of the furnace instead of forcing it through the tubes by fans in the stokehole. Experiments with induced draught have been made at the Admiralty dockyards at Portsmouth with a boiler from H.M.S. *Polyphemus*, from which it appears that a boiler can be steamed at a much higher rate with induced than with forced draught, and with perfect safety. The *Marine Engineer* states that the difference between these two draughts is that the former will easily double the boiler power, and it may be trebled without incurring any damage to the boiler. The coal also gives a higher rate of work than is generally obtained, because the gases are thoroughly consumed with induced draught, whereas they escape with natural or forced draught for lack of power in such to efficiently burn the coal. During the last seven years first-class ocean passenger ships have been better constructed than previously, both for safety and speed,

while the comfort of passengers has been further improved, and especially in the enlargement of cabins, and better food and sanitary accommodation, and the installation of the electric light. As regards the extraordinary speed of ocean steamers during the most noteworthy are those between Queenstown and

New York and Southampton and New York. The twin-screw steamers *Tautonic* and *Majestic* of the White Star Line, built by Messrs. Harland and Wolff, of Belfast, which are now the swiftest ocean steamers in the world, have during the nine months ending Sept. '91 made nine voyages to and from New York in less than six

days, the average of the nine trips being 5 days 21 hours and 6 minutes. At the end of July the *Majestic* crossed from Queenstown to New York in 5 days 18 hours and 8 minutes, the fastest passage on record up to that date. Her daily runs were: 470, 501, 497, 501, 491, and 317 = 2777 knots; average speed, 20.11 knots per hour. But even this rapid passage was in turn surpassed by the *Majestic's* sister ship *Tautonic*, which was propelled from Queenstown to New York in the middle of August in 5 days 16 hours and 31 minutes, thus taking

in 5 days 21 hours and 22 minutes. This is the fastest eastward passage made across the Atlantic. Her daily runs were, 447, 456, 462, 466, 456, and 504 = 2791 knots; average speed 19.74 knots per hour. The twin screw steamer *City of New York* of the Inman and International Line in September crossed from Sandy Hook, near New York, to Queenstown, in 5 days 22 hours and 50 minutes. Her

daily runs were 44, 436, 461, 460, 462, 462, and 452 knots. In the previous month she made the eastern voyage between these places in 6 days and 51 minutes. Her daily speed was 60, 425, 450, 462, 450, 458, and 470 knots. In the same month she made a western passage in 6 days 1 hour and 15 minutes, her daily runs being 441, 478, 454, 491, 473, and 437 knots. In a previous western voyage made in March, which was performed in 6 days 2 hours and 10 minutes, she was propelled on the second day 502, on the fourth 501, on the fifth 500, and on the sixth 503 knots. In three consecutive days steaming she made 1504 knots. The twin screw steamer *City of Paris*, of the same line, crossed from Queenstown to Sandy Hook in 6 days 1 hour and 56 minutes. On the third day she was driven 503, and on the fifth 500 knots. The westward passage, between Southampton and New York, was performed by the *Furst Bismarck*, of the Hamburg-American Line, in 6 days 14 hours and 15 minutes in May. Her daily speed was 426, 471, 475, 494, 481, 498, 239 = 3086 knots; average, 19.5 knots. In the same month her homeward voyage was performed in 6 days 13 hours and 25 minutes. Her daily runs were: 89, 449, 462, 462, 452, 458, 460, and 282 = 3114 knots. Average, 19.78 knots. In September she crossed from New York to Southampton in 6 days 12 hours and 58 minutes. Her daily runs were 411, 451, 450, 452, 460, 464, and 360 knots = 3084 knots; average, 19.4 knots. The *Normannia* of this line was propelled in this eastern route in July in 6 days 15 hours and 15 minutes. Her daily runs were 348, 451, 450, 448, 452, 460, 456, and 18 = 3083 knots; average, 19.35 knots. The *Columbia*, also of the Hamburg-American Line, made the outward voyage in 6 days and 15 hours in October. Her daily runs were 345, 445, 435, 445, 463, 453, 459 = 3045 knots; average, 19.15 knots. It was expected by the shipping community that the *Havel* and *Spree*, two new ocean liners belonging to the North-German Lloyd's Line, would have made one or more passages in '91 to equal at least the speed of the *Normannia* and *Columbia*, of the Hamburg-American Line, but they have not done so. It is, however, highly creditable to the North-German Lloyd's Company that they possess a greater number of very fast ocean steamers than any company in the world, which must be self-evident to those who are aware of the high speed records of the *Spree*, *Havel*, *Lahn*, *Trave*, *Saale*, *Aller*, *Fulda*, *Werra*, *Eider*, *Emis*, and *Elbe*. After the speed record of the *Columbia* in '91, the best for this year is that of the magnificent screw steamer *La Touraine*, belonging to the General Transatlantic Company, and which is run on their line between Havre and New York. In June she made the voyage between these ports, a distance of 3154 knots, at an average speed of 18.33 knots an hour. Her daily runs were 64, 443, 450, 450, 432, 456, 469, and 390. On the Pacific the record has been appreciably lowered from Yokohama to Vancouver by the *Empress of Japan*, belonging to the Canadian Pacific Railway Company. On Aug. 19th she left Yokohama at 8.45 a.m., and arrived at the Royal Roads off Victoria at 4.24 a.m. on the 29th, thus making the voyage in 9 days 19 hours and 39 minutes. As the Canadian Pacific Railway Company wished to try how quickly the transit of mails from the far East to London could be accomplished, they despatched a special train

from Vancouver with the mails and passengers from this steamship at 1.8 p.m. on the day of her arrival. This train, which only consisted of one mail and baggage car and one sleeping car, ran to Brookville, Ontario, a distance of 2792 miles, in 76 hours and 31 minutes, the average speed being 36.23 miles an hour. The train at Brookville crossed the ferry to Morris-town, where it entered the Rome, Watertown and Ogdensburg Line, and ran to Utica. There it got on the New York, Central and Hudson River systems, and reached New York on Sept. 2nd. From Morris-town to that city the distance is 361 miles, which was covered in 6.58 hours, the rate being 51.81 miles an hour. The mails were put on board the *City of New York*, which sailed at 6.30 a.m. on Sept. 2nd, and were landed in London at 10.10 a.m. on the 6th of that month, although the mails had to be taken on to Liverpool instead of being left at Queenstown. They were brought to London from Liverpool by a special train in 3 hours and 49 minutes. This performance is said to be a marvellous one, as the whole time taken in the transit of mails from Japan to London was under 21 days. The voyage to the Cape has been greatly reduced by the *Scot*, of the Union Line. She was built and engined by Messrs. Denny Bros., of Dumbarton. Her gross tonnage is 6850, and her indicated horse-power 12,000. She is employed in the mail service between Southampton and the Cape Colony and Natal. On her first outward voyage she left Southampton on July 25th at 6.49 p.m., and arrived at Capetown at 4.41 a.m. on Aug. 10th, after a voyage of 15 days 9 hours and 52 minutes gross, and 15 days 2 hours and 10 minutes net steaming time. Her average speed was 16.5 knots an hour, and her daily runs were 310, 421, 412, 275 (stoppage at Madeira) 400, 395, 400, 401, 390, 398, 372, 192, 350, 388, 396, and 274. On the homeward voyage the *Scot* left Capetown at 6.31 p.m. on Sept. 2nd, and arrived at Plymouth at 4.18 p.m. on the 17th, after a gross passage of 14 days 21 hours and 45 minutes, and a net steaming time of 14 days 16 hours and 15 minutes. Her average speed was 16.7 knots per hour. The daily runs were as under—viz., 298, 412, 407, 412, 415, 404, 416, 397, 384, 403, 393, 331, 361, 389, 388, 73. These voyages are much shorter than those performed by the *Dunottar Castle*, of the Castle Line, which was the fastest steamer to the Cape in '90. Her fastest steaming time in '91 was from Capetown to Plymouth, about ninety miles nearer than Southampton, in August, being 15 days and 12 hours. She was detained on the passage five hours. A rapid voyage was made from Marseilles to Sydney, at the rate of 16 knots an hour by the new ocean liner *Polynesian*, belonging to the Messageries Maritimes Company. Of the more important new ocean liners which were built in '91 are the following: (1) For the Atlantic service *La Touraine*, of the General Transatlantic Company, of 8000 tons and 184 knots speed, by the owners at their shipbuilding yard at St. Nazaire. (2) For the Australian service the *Opbir*, for the Orient Company, 6500 tons and 18 knots speed, by Napier & Sons, Glasgow; and the *Polynesian*, for the Messageries Maritimes Company, at their La Ciotat Yard near Marseilles, 6425 tons and 164 knots speed. (3) For the Cape service the *Scot*, for the Union Steamship Company, 6850 tons and 17 knots speed, by Denny Bros. at Dumbarton. (4) For the Vancouver, Japan

and China service the *Empress of China* and the *Empress of Japan*, for the Canadian Pacific Railway Company, of 5905 tons respectively and 17 knots speed, by the Naval Construction and Armaments Company, of Barrow-in-Furness. Of the more important ocean liners building are the following: (1) For the Atlantic service two mammoth steamers, alleged to be larger than any afloat, and to have a greater speed, if this can be provided, than any existing steamer, for the Cunard Steamship Company, by the Fairfield Shipbuilding and Engineering Company, Glasgow. (2) For the Australian service the *Himalaya* and *Australia*, for the Peninsular and Oriental Steam Navigation Company, of 7000 tons and 18 knots speed, by Caird & Co., of Glenock; and the *Tasmanian* and *Armand Béhu*, for the Messageries Maritimes Company, of 6500 tons and 16½ knots speed, by the owners at their La Ciotat Shipbuilding Yard, near Marseilles. For the West Indies and Mexican Service *La Navarre*, of 6500 tons and 17 knots speed, and *General Chanzy*, of 2200 tons and 19 knots speed, for the General Transatlantic Company, at their yard at St. Nazaire. Liberal subsidies have been given for the encouragement of the building of steamships capable of being converted into cruisers during war by Great Britain, France, Germany, Italy, and the United States. The following is a list of the reserved merchant steamers held by the owners for the use of the British Admiralty, viz. :—

Name.	Owners.	Gross Tonnage.	Average Ocean Speed.
Majestic . . .	W. Star Co.	10,000	20½
Teutonic . . .	" "	10,000	20½

There are numerous steamships on the Admiralty list complying with Admiralty conditions as regards sub-divisions which have no national tie. They are suitable for receiving

an armament, but there is no contract with their owners except the promise of preference for occasional state employment. To meet the demand of the American public for a direct and expeditious means of reaching the shores of the Mediterranean during the fall and the winter months by the better class of ocean liners, the North German Lloyds Company despatch one of their superior steamers every five weeks from New York to Genoa. The route follows the latitude of New York across the Atlantic, and passes through the Straits of Gibraltar into the Mediterranean. The voyage can generally be made in about eleven days. Special express trains are run in connection with the fast steamers leaving Liverpool and Southampton for New York, and also in connection with leading liners on other routes. The new Peninsula and Oriental special Brindisi express train, composed of sleeping and restaurant cars, in connection with the 3 p.m. club train from London every Friday to Paris answers an important requirement by voyagers to the East and Australia who wish to economise time. There is a scheme afloat for making **Milford Haven** a port of call for Atlantic steamers. A line of the very fast ocean steamers are building in the United States, to run between North America and Milford direct, not only for the carriage of mails and passengers, but light and perishable goods, at a reduced rate. Another project is to run a service of fast steamers between Milford and a point on the extreme east of the Labrador coast, presumably at St. Charles's Bay, from whence steamers can easily run to Milford Haven in 94 hours, as the distance from St. Charles's Bay to Milford is only 1870 miles, as against 3070 from New York to Liverpool. The time to be saved on the new route by a 20-knot steamer would be about 60 hours. The projected new route on the American side will form a straight line from the great West of the United States and Chicago to England. The proposed new route would therefore enable passengers to reach Chicago or England in about two days. So favourably does Milford now appear to be regarded as a first port of call for taking and landing the North American mails, that the Journal of the Liverpool Chamber of Commerce states that if the postal authorities of this country should resolve to raise Milford to this position there will be no difficulty in Liverpool steamers calling there to take and leave the Transatlantic mails. In consequence of the considerable increase of shipping at Milford during the last two or three years when it was only a sub-port it has recently been made a port, and a customs office has been established there. As regards freights these have been very low on the whole up to Dec. '91, and particularly in the eastern trade. They are comparatively good, however, for the American and Australasian shipments, but are subject to fluctuate considerably. A few interesting particulars are given upon steam freights in '90 by Augier Bros. in their report on the subject for that year. In '90 all freights and values of steamship property suddenly relapsed from the high points reached in that year to about the lowest sums obtained during the long depression in this trade from '83 to '87. The decline began early in spring, and continued rapidly until the close of the year. This grievance was greatly aggravated by the abnormally high cost of coal, wages and all

working expenses. The rates then ruling left a heavy loss in working for all but cheaply built new steamers, namely, from £6 10s. to £7 per ton for good ships, with triple expansion engines of the best type, and from 9 to 10 knots speed. The United States, River Plate and Black Sea trades gave the most support to the great cargo-carrying ships, and only declined towards late in autumn. The Indian and Chinese traffic was comparatively small throughout the year, and Mediterranean and Baltic freights were small from early spring to the close of the year. Outward freights declined very conspicuously, and remained at unusually low rates throughout the year; the only exception was a short spurt in sugar and other cargoes to the United States from British and continental ports during the autumn, occasioned by the M'Kinley tariff. In no respect has the great struggle between capital and labour manifested itself so conspicuously as in the British shipping industry. So much have the shipowners connected with it been harassed and injured in their business by the system of dictation, boycotting and oppression of the Seamen's and Firemen's and other unions of labourers employed in this industry, that a Shipowners' Federation (see LABOUR) of shipowners' companies and persons whose interests are closely connected with the shipping trade was formed in September '90 to take united action in all matters relating to shipping, and to protect and indemnify its members against all losses they sustain through any action which, in the opinion of the Federation, is calculated to advance the interests of the trade. The Federation represents about seven-eighths of the tonnage of the United Kingdom, and which employ about 200,000 men. The Institution of Naval Architects was founded in '60. Its objects are to promote the improvement of ships and of all that particularly belongs to them, firstly, by the bringing together of those results of experience which so many shipbuilders, marine engineers, naval officers, yachtsmen and others acquire independently of each other in various parts of the country, and which, though almost valueless when unconnected, tend much to improve our ships when brought together in the printed Transactions of an institution; secondly, by the carrying out by the collective agency of the substitution of such experimental and other inquiries as may be deemed essential to the promotion of the science and art of shipbuilding, but which are of too great magnitude for private persons to individually undertake; and, thirdly, by the examination of new inventions and the investigation of those professional questions which frequently arise and which were left undecided before the establishment of this institution, because no public body to which professional reference could be made then existed. The Institution of Engineers and Shipbuilders in Scotland (founded in '57), the North-East Coast Institution of Engineers and Shipbuilders (established in '85), and the Institute of Marine Engineers (founded in '89), do much good in promoting a knowledge of shipbuilding and marine engineering by having papers read and discussed at their meetings.

Merchandise Marks Acts, '91. See SESSION, sect. 80.

Merchandise Marks Act, Case under in '91. An important judgment under this Act was delivered by the magistrate at the Marlborough

Street Police Court. The defendants were auctioneers, and it appeared that among a number of pianofortes consigned to them for sale were two instruments which had false trade descriptions in the sense that the names of well-known piano manufacturers were attached to pianos which they had not made. A heavy penalty was imposed upon the defendants, but on appeal Sir P. Edlin reduced the fine in each case to £1. It was pointed out that it was upon the defendants to show that they had taken reasonable precautions to ascertain the genuineness of the trade descriptions in question.

Merchant Taylors' School, London. Founded (1561) by Sir Thomas White, founder of St. John's College, Oxford, and the court of the Merchant Taylors' Company. The company remains the governing body of the school, which has always continued a day school. In 1875 it was reorganised, enlarged, and removed from Suffolk Lane to its present site in **Chancery Square**. Twenty-six scholarships, and exhibitions of £36 and £100 for five and seven years, to St. John's College, Oxford; others, ranging from £60, to Cambridge—altogether 39. Pupils 500; on entrance must be over nine and under fourteen. **Head Master**, Rev. W. Baker, D.D. **Sec.**, C. Waters, M.A. **Motto**—*Homo plantat, homo irrigat, sed Deus dat incrementum*. A **Merchant Taylors' School Mission** has recently been founded at Shacklewell, West Hackney; **Missioner**, Rev. W. A. Buck, M.A.

Meredith, George, poet and novelist, is a native of Hampshire, and was b. 1828. After studying for some time in Germany he commenced his literary career with the publication of a volume of poems in '51. This was followed by the "**Shaving of Shagpat, an Arabian Entertainment**" ('55), "**Faring, a Legend of Cologne**" ('57), "**The Ordeal of Richard Feveil**" ('59), "**Modern Love: Poems and Ballads**" ('62), "**Enitha in England**" ('64), "**Rhoda Fleming**" ('65), "**Vittoria**" ('66), "**The Adventures of Harry Richmond**" ('71), "**The Egoist**" ('79), "**The Tragic Comedians**" ('81), "**Poems and Lyrics of the Joy of Earth**" ('83), and "**Diana of the Crossways**" ('85). In '91 M. M. published a new novel entitled "**One of our Conquerors**."

Merv. An oasis in Central Asia, situated almost midway between Meshed and Bokhara, and Herat and Khiva. In ancient times the city of Merv, now in ruins, was famous for its vast size, magnificence, and prosperity. The locality became notorious when Russia, having conquered Khiva in 1873, threatened to occupy the oasis. The oasis has an area of 1600 square miles, and a population of a quarter of a million Turcomans. There is no town of Merv; the thickly packed prosperous settlements spread over the oasis constituting what is recognised under that name. About 10,000 troops are maintained in the oasis, distant 200 miles from Herat, and also including in its administrative area Pendsch, half that distance from the key of India.

Messenger Services. A great advance has been made in the course of the year with the establishment in London of boy messenger services. So manifold and evident are the advantages to be derived from the employment of messengers, properly organised and controlled, upon the thousand and one errands in ordinary daily life, that rapid growth of the system in the metropolis and in the large towns of the country may be confidently predicted.

In America, messenger service companies have for many years been established in the principal cities, New York alone possessing three or four rival companies. Brought over to England, the idea received practical shape in '87, when **The Boy Messengers, Limited**, was incorporated, and stations, each supplied with a staff of boy messengers, were opened in different parts of London. It was soon found that the demand for the services of messengers, which quickly increased, required the use of the **Electric Call wires**, that it might be adequately met. In its endeavour to introduce the additional facilities the original company found itself hampered by legal difficulties under the Post Office and Telegraph Acts, and protracted negotiations with the Postmaster-General were the result. In March and April an agreement was arrived at under which the Post Office, while protecting its own monopoly by the establishment of a boy messenger service of its own, granted licences to the two companies already working, allowing them to carry on their business. Shortly afterwards, these two "The Boy Messengers and Electrical Call Company, Limited" (which had taken over the "Boy Messengers, Limited") and the "District Messenger Service and News Company," began full operations. With but slight variations the methods of working employed by both companies are the same, and the following outline description applies equally to each. The company takes an office, and proceeds to form a circuit with a radius of about five minutes' distance from the centre. Subscribers or customers receive call boxes in their houses, wires placing them in immediate connection with the centre, at which a staff of messengers is kept in instant readiness, and which is itself directly connected with the nearest police and fire stations. A simple arrangement of signals through the call box signifies to the circuit office the message of the customer, whether Messenger, Doctor, Cab, Fire, or Police. With the message the number of the call box is registered, and the address of the customer, kept for reference in a special drawer corresponding to the number is easily ascertained. Thus within a few minutes, with the least possible delay, a messenger is at the disposal of the customer, whether for carrying letters, parcels, running errands, or executing commissions, a doctor may be at his patient's door, the fire engine at work before the conflagration has made serious headway, and the police at hand to arrest the burglar in the act of robbery. Besides these ordinary calls, the uses to which the messengers of the companies are put are very numerous and of great variety. They are employed for offices, shops, theatres, public halls, and clubs, they meet trains, engage hotel rooms or lodgings, fetch luggage, and make arrangements of all kinds. Trustworthiness being essential, great pains are taken by the companies to secure messenger boys of good character and intelligence. The boys undergo preliminary tests as to sound health, knowledge of locality, and habits of promptness, and subsequently are drilled for the better discharge of their duties. They are uniformed, and encouraged by a system of record and prize medals to perform their tasks rapidly and efficiently. The companies guarantee the safe delivery of property up to £20 value. As regards the **Boy Messengers and Electric Call Company, Limited**, the following particulars

may be interesting. The Hon. Patrick Bowles Lyon, Managing Director; Sec., Mr. Loftus D. Tottenham. **Central Office**, Star Yard, Carey Street, W.C. It has offices at Billiter House, Billiter Street, E.C.; 36, Gresham Street, E.C.; 63, Cannon Street, E.C.; 4, Creed Lane, Ludgate Hill, E.C.; 26, Cophall Avenue, E.C.; 39, Haymarket; 18, Great George Street, Westminster; 242, Oxford Street; 132, Euston Road; with **official stations** at the House of Commons, the Royal Courts of Justice, the Stock Exchange, the Wool Exchange, the Corn Exchange, the Metal Exchange, and elsewhere. Its **tariff** is 3d. per mile, 6d. per hour; 2s. 6d. and 3s. per day; 10s. 6d. and 12s. 6d. per week; cab, 2d.; police and fire, 2s. The **District Messenger Service and News Company, Limited**, has its chief offices at 50 and 51, Jame Street, London, E.C. **General Manager**, Mr. Chas. T. Russell; **Sec.**, Mr. Arthur Lord. The **district offices** are: Trafalgar Square, S.W.; 4, Charing Cross; Windsor Hotel, 42, Victoria Street, S.W.; 82, Gloucester Road, South Kensington, S.W.; 2, Holbein Place, Sloane Square, S.W.; Prince's Hall, 193, Piccadilly, W.; 30, Ladbroke Grove Road, Notting Hill Station; 269, Regent Street, W.; 51, Lime Street, E.C.; Park Side, Hyde Park Corner, W.; 27, Chancery Lane, W.C.; 66, Queen Victoria Street, E.C.; and Charing Cross District Railway Station; and other offices are to be opened at South Kensington, St. John's Wood, Hyde Park, and elsewhere. Its **charges** are: half mile or under, 3d.; over half mile to 1 mile, 6d.; over 1 to 1½ mile, 9d.; detention of messengers over five minutes, at the rate of 1d. for each five minutes; cab calls from 7 a.m. to 10 p.m., 2d. each, from 10 p.m. to 7 a.m., 4d. each; letters or telegrams to nearest Post Office, 7 a.m. to 8 p.m., 2d.; 8 p.m. to 7 a.m., and Sunday, 4d.; messengers by the hour, 8d., exclusive of bus or railway fares. Special terms for messengers by the day, week, or month on application to the district office.

Metropolitan Asylums Board. See **Poor Law**.

Metropolitan Fire Brigade (established Jan. 1st, 1866). During the twenty-five years of its existence the strength and appliances of the Brigade have been more than quadrupled, although no material alteration has been made in the constitution of the force, which consists of 55 land stations, 4 floating stations, 52 hose-cart stations, 179 fire escape stations, 9 steam fire engines on barges, 47 land steam fire engines, 95 manual engines, 33 miles of hose, 105 hose-carts and reels, 8 steam tugs, 13 barges, 224 fire escapes, 9 long fire ladders, 9 ladder vans, and 707 officers and men. The **chief officer**, **Captain Shaw**, who had had the command of the Brigade since its commencement, resigned his post in Oct. '91; and his duties, prior to the appointment of a successor, are being performed by the **second officer**, **Mr. J. Sexton Simonds**, appointed '81. The area protected by the Brigade is about 118 square miles, including the City and County of London, and extends from Highgate in the North to Sydenham in the South, and from Roehampton in the West to Plumstead in the East. An excellent system of **Fire Alarm telegraphs and telephones** between fire stations, and to police stations and to public and other buildings, is provided. At the end of '89 every land station had an appreciable method of fire alarm which gave about 365 call points within the Brigade area. The substitution of telephones for telegraphs is now com-

pleted throughout the whole of the system. The total annual expenditure of the Metropolitan Fire Brigade is about £136,000. Of this sum the fire insurance companies contribute £27,000; the Government £10,000, for the protection of the public buildings; and the ratepayers £99,000. The last published report of the London fires in '90 shows an increase of 217 as compared with those in '89. The number of calls for fires, or supposed fires, received during the year was 3546. Of these 768 were false alarms, 223 proved to be only chimney alarms, and 2555 were calls for fires, of which 153 resulted in serious damage, and 2402 in slight damage. The total distance run by the fire-engines of the Brigade was 65,455 miles, the number of journeys of the engines being 33,261. **Headquarters**, Southwark Bridge Road, S.E.

Metropolitan Hospital Sunday Fund.

For a long period it has been customary on the Continent to make a special collection on one Sunday in the year in the churches for the hospitals in the district. The practice is now pretty general in this country. The Metropolitan Hospital Sunday Fund was started in '73 by the late Dr. James Wakley, editor of the *Lancet*, and by the then Lord Mayor, Sir Sydney H. Waterlow, Bart., who is still its Vice-President. The total sum collected on behalf of the Hospital Sunday Fund during '90 was £12,700. Report of the Council is published in the third week of December. **Sec.**, H. N. Cusance; **address**, Mansion House, E.C. There are also one or more days set apart, as the delegates of the Hospital Saturday Fund (which is quite distinct from the Hospital Sunday Fund) may from year to year determine, for collection in aid of Hospitals and Dispensaries under the auspices of the Hospital Saturday Fund. The total collected in '91 by the street collection amounted to £5096, and from the workshops £15,287, making a total of £20,333, which was divided amongst 141 hospitals (*q.v.*), dispensaries and other institutions. The offices of the latter fund are at 59, Farringdon Road, E.C. **Sec.**, R. Frewer.

Metropolitan Hospitals Committee. See Session, sect. 129.

Metropolitan Police. Established by Act of Parliament (1829), and the protection of the district by watchmen was discontinued by that statute and entirely intrusted to the then newly appointed force. The Metropolitan police area is 688.31 sq. miles, and embraces all places within a radius of fifteen miles of Charing Cross, except the City of London, which has its own police. The Metropolitan police district consists of twenty-one land divisions, in addition to its jurisdiction on the river Thames. Every division is under the immediate charge of a superintendent, and the subdivisions under that of inspectors. A certain number of beats are provided in each subdivision to be patrolled by constables, and are visited by sergeants who have sections of beats allotted to them for this purpose, and who report to their inspectors the occurrences thereon. The sections are also supervised by the inspectors both day and night, and very frequently by the superintendent. The former officers send reports daily to their superintendents respecting public matters in their subdivisions, and the superintendent furnishes daily reports to the Commissioner concerning occurrences in the division under his charge.

Each subdivision has a station house in charge of inspectors, who are sometimes assisted by sergeants. Mounted police patrol the more distant parts of the outer subdivisions. In each division there are from thirty to forty men selected as a reserve force to carry out special duties, headed by an inspector and assisted by several sergeants. The supreme government of the Metropolitan police is vested in the Commissioner appointed by and acting under the control of the Home Secretary. This office is now held by Sir Edward Bradford, K.C.B. (*q.v.*). There are three Assistant Commissioners—Mr. Bruce, Dr. Anderson and Mr. Howard—and five Chief Constables. Latest returns for the year ending '90 give the strength as 15,264, comprising 31 superintendents, 858 inspectors, 1534 sergeants, and 12,841 constables. There is also a receiver, a chief surgeon, two surveyors, and about thirty Civil Service clerks. There are local surgeons of the police in the divisions. The most important branch of the police not engaged in ordinary divisional duty is the Criminal Investigation Department, which was organised in '78 under a "director," and is now presided over by Dr. Anderson, assistant commissioner. A part of this service is at Scotland Yard, and consists of a superintendent, five chief and three first-class inspectors, seven second-class inspectors, and about fifteen sergeants. There is also another part of the service in each division, under the charge of an inspector, responsible to the director. The number of members belonging to each branch is regulated according to circumstances. The Convict Supervision Office, established in '79, is a branch of the Criminal Investigation Department. It registers the names and particulars of discharged convicts on licence, and other criminals under police supervision in England, and retains photographs and marks of these persons, under the provisions of the Prevention of Crimes Act of '71. The development and progress of this office, has been immense, and the amount of good it has done in co-operation with Discharged Prisoners' Aid Societies and otherwise for the repression of crime, not only in the metropolis but throughout the provinces, cannot be exaggerated. The number of licence holders and supervisees registered by the Metropolitan Police from '64 to the end of December '90, was 40,701; the number of persons subject to police supervision in the Metropolis under the Prevention of Crimes Act was 21,388; the photographs of penal servitude convicts and supervisees received and entered in the books of the Convict Supervision Office in '90 was 7249; the number of licence-holders and supervisees liberated or removed into the Metropolitan Police District in '90 was 860; and into other districts of Great Britain 978, making a total of 1838; the number of licence-holders, supervisees, and expees apprehended for fresh offences during '90 (including the offence of failing to report), was 701, of whom 627 were re-convicted. Among other departments of the Metropolitan police are the executive branch, the public carriage branch, the lost property branch, and the common lodging-house branch. Satisfactory provisions are made for rewards for diligence and praiseworthy acts by the police, as well as for punishment for breach of discipline. Appreciable regulations also exist for promotion and testing by examination the qualifications of members to fill the higher

offices. Provision is made by the Police Act '90 for payment of pensions for life to all ranks in the force who have completed 25 years' approved service; and the pension is to be not less than $\frac{1}{3}$, or more than $\frac{2}{3}$, of his annual pay, with an addition of not less than $\frac{1}{3}$, or more than $\frac{2}{3}$, of such pay for every year of approved service above 25 years, so that the pension shall not exceed more than $\frac{2}{3}$ of his yearly pay. Provisions are also made for payment of pensions to policemen who have served a less number of years, and who are incapacitated by injuries in the performance of their duty. Those who have served less than 15 years, and are mentally or physically incompetent to do duty, may be paid a gratuity. Pensions are to be paid to the widows and allowances to the children of a member of the force who dies from the effect of an injury received in the execution of his duty. Gratuities may also be granted in other cases to the widow and children of a policeman who dies from any other cause while in the force. Gratuities may also be paid to the widow and children of such a member to whom a pension has been granted if he dies within twelve months afterwards. The Pension Fund is made up from various sources. Towards this sums at a rate of not more than 2½ per cent. on the pay of each person is to be deducted, and such stoppages of pay during sickness, and such fines for misconduct, as may be provided by the regulations respecting the force. For grave misconduct a member of this body may be deprived of a pension. The ratable value of the Metropolitan area for '90 was £35,452,993. The police rate is now fixed at 9d. in the £, of which 4d. in the pound is payable out of the Local Taxation Account under the Local Government Act of '88. The pay of the Metropolitan Police Force alone was for '90 £1,206,287. A report is prepared annually by the Commissioner for the Home Secretary, and is by the latter presented to the House of Commons.

Metropolitan Public Gardens Association. The invasion of bricks and mortar at almost every point of the green border-land of London, and the increasing congestion of the population within, have made the provision of Metropolitan recreation grounds necessary for sanitary, if for no other reasons. The difficulty of securing breathing spaces is annually increasing; and would probably be insurmountable, but for the action of the Metropolitan Public Gardens Association. Some of its income has in past years been subscribed on the condition that it should be expended in wages to the "unemployed," but since '88 it has suffered great diminution owing to the absence of any Mansion House funds for the purpose, from which grants have hitherto been obtained, and to the deaths, in '90 especially, of several generous supporters. The laying-out of disused burial and other grounds, the provision of seats and the planting of trees in thoroughfares, the formation of public gymnasia, opposing threatened encroachments upon commons, open spaces, burial-grounds, etc., are part of the work of this society. Funds are urgently needed at the present time, when many grounds, representing over twenty acres of open space, await laying out at an estimated cost of £5000. Income in '90 was £3650. More than sixty gardens and playgrounds (total area over eighty acres) have been laid out since the Association was formed in '83. **Chairman,**

The Earl of Meath; **Sec.,** Basil Holmes, 83, Lancaster Gate, W.

Metropolitan Radical Association. An organisation of the London working men's clubs for political purposes. It issued in July '90 a labour programme of a strongly socialistic character. **Hon. Sec.,** James Tims, L.C.C., 6, Queen Anne Terrace, Battersea, S.W.

Mexico. A country forming the southern extremity of North America, and stretching into Central America. Bounded on the north by the states of Texas, New Mexico, Arizona, and California; on the south by Guatemala and British Honduras. Area, 741,791 sq. m.; pop. 11,488,664. Capital **Mexico**, pop. 300,000. Chief ports on Gulf of Mexico are Vera Cruz, Campeche, and Tampico; on the Pacific, Mazatlan and Guaymas. Besides these some twelve important cities. Divided into twenty-seven states, one territory, and one district.—The mineral wealth is great, comprising gold, silver, mercury, iron, tin, zinc, lead, antimony, arsenic, and sodic carbonate. **The Republic** is governed by a President and Ministry. There is a Senate, each state electing two members, and a House of Representatives elected by universal suffrage. The states have also their individual autonomous local governments. Prevailing religion Roman Catholic; but all sects tolerated, and none state-aided or allowed to possess land. Primary education nominally compulsory, but the law is not enforced. There are some 10,720 schools publicly supported. There is an army of 28,000 on the peace footing, raised to 160,000 in time of war. The navy consists of five small gunboats.—Industries comprise mining and smelting of silver and other metals, agriculture, and cattle-herding. **Revenue** ('90), \$17,900,000; **expenditure**, \$36,729,542; debt about £42,000,000; **imports** ('89), \$44,500,000; **exports**, \$60,158,424. There are 5,012 miles of railway. Capital joined to New York by rail. Of the inhabitants 19 per cent. are Europeans or of European origin, 38 per cent. are Indians, and 43 per cent. are of mixed race. Proclamation of independence, 1810; Emperor Hurbide shot and republic proclaimed, '24; Emperor Maximilian shot and republic again proclaimed, '67. Of late years there has been decided progress and less disorder. The opening of railways and spread of education are aiding in the development of this fine country.—There was a severe shock of earthquake (Dec. 2nd, '90). It was announced (31st) that the President had approved the Bill admitting United States corn free of duty. '91. General Cayetano Sanaberg died (Feb. 8th) from wounds inflicted by soldiers who had been arrested for insubordination. The troops succeeded in killing Demetrio Jauregui and his band of six robbers who had for long ravaged the State of Jalisco. It was reported (Oct. 4th) that there had been an outbreak amongst the Indians in the Tlaximago district arising from the colonisation of their lands by German settlers. The Indians attacked the German settlement by night and butchered 200 men, women, and children. News was received that the Yaqui Indians had declared war, and had entered on the campaign.

Mexico (Valley of Drainage). This work, it was stated in Nov. '91, is divided into two parts, a tunnel and a canal, the former being about 6½ miles long and the latter about 20 miles. It dates from the time of the Emperor Maximilian, when the engineers determined

the levels, and it was continued intermittently until March '88, when an English firm, Messrs. Read & Campbell, undertook the task. Since then various modifications have been made, and the contract date for completion is March '94. The canal connects the drainage system of the city with the tunnel, and 7 miles of it had been completed in '89, when the contract was handed over to Messrs. S. Pearson & Son, of London.

Middlesex, County Council for. See COUNTY COUNCILS.

Middlesex Registry Act, '91. See SESSION, sect. 80.

Milan Obrenovitch I, ex-King of Serbia, was b. 1854, at Jassy, in Moldavia. He studied at Paris, at the Lycée Louis-le-Grand. The assassination of his cousin, Prince Michael, caused his recall to Serbia, where he was proclaimed prince at the age of fourteen. A Council of Regency administered the government till the Prince came of age ('72). In '75 he married the Princess of Stourdza, from whom he is now divorced, and by whom he has a son, Prince Alexander. Owing to the troubles arising out of disagreement with the Queen, he abdicated in favour of his son March 6th, '89, but retained the command of the Army. Visited England in the early part of '91, but was not received at Court. Met his son, King Alexander of Serbia, and journeyed in Switzerland and France in his company (Aug.).

Millaïs, Sir J. Everett, Bart, R.A., was b. at Southampton 1829. At the age of eleven he became a student at the Royal Academy, gaining the principal prizes for drawing. His first picture "Pizarro seizing the Inca of Peru," was exhibited at the Academy ('49). In conjunction with Dante Rossetti and Holman Hunt he set up a school of painting from nature, which obtained the title of "pre-Raphaelite," and published a periodical entitled "The Germ, or Art and Poetry," in support of this school ('50). He was elected an A.R.A. ('53) and became R.A. ('63). He has exhibited a large number of pictures up to the present time. A large and representative collection of his works, embracing from his earliest to his latest styles, and illustrating his emancipation from the trammels of "pre-Raphaelism," was exhibited at the Grosvenor Gallery in '87. Sir J. E. M. was decorated with the "Legion of Honour" ('78), and a baronetcy was conferred upon him ('83). In the Royal Academy '91 he exhibited "Glen Birnam" and some admirable portraits.

Military and Naval Men Deceased (Dec. '90 to Nov. '91). See OBITUARY.

Militia, The.—The militia is a force which has proved its value whenever the country has been involved in any serious military enterprise. It is a reserve which is always available for immediate embodiment. Of late years it has become somewhat reduced in numbers, owing, it may be, to a want of proper official encouragement; but its officers are a loyal and industrious body of soldiers who do their utmost to maintain the force in a condition of efficiency. They are not, however, supported as they should be by fact in administrative authority, and to this fact has to be attributed, to a great extent, the falling off of returns. At the training of '90, the last year for which official records are forthcoming, the total of those actually present during training was 99,628 of all ranks, i.e., Artillery, 13,784, Engineers, 1,640, and Infantry, 84,204. The total establishment is 135,722; viz.,

England, 89,087, Scotland, 15,720, and Ireland, 30,015.

Ministerial Summary.—In his statement on the Army estimates for 1891-92, the Rt. Hon. E. Stanhope, the Secretary of State for the War Department, said "the number of enrolled Militiamen has decreased in the last twelve months by 1,865. Considering the revival in trade, and the facilities given to Militiamen to purchase releases from their engagements, this decrease in numbers can scarcely cause surprise. It would have been more marked, but for the revision of Militia establishments last year, which provided for increase in those localities where recruits could be more easily obtained. The recommendations of Lord Harris's Committee are being followed in the extension of the course of musketry for recruits, the issue of flannel shirts, and in the provision of greater comforts to Militiamen under canvas. The reports of the inspecting officers are almost uniformly creditable to the Militia. Much zeal is evinced in all ranks during the training." **Regimental Details.**

—From an official return showing the number of all ranks present at training in the year '90, it appears that the strongest regiments (over 1,000) are: Scottish Rifles (Head-quarters, Hamilton) 1,729; Worcestershire (Worcester), 1,611; Manchester Regiment (Ashton-under-Lyne), 1,432; Highland Light Infantry (Inverness), 1,315; King's Liverpool Regt. (Warrington), 1,233; Sherwood Foresters (Nottingham), 1,158; Royal Lancaster Regiment (Lancaster), 1,103; Northamptonshire Regiment (Northampton), 1,101; Cameron Highlanders (Inverness), 1,061; Lancashire Fusiliers (Bury), 1,044; there are three who mustered more than 1,000—viz. the 3rd and 4th Royal West Kent (Maidstone), 972; 4th Durham Light Infantry (Newcastle-on-Tyne), 940; and 3rd Seaforth Highlanders (Dingwall), 939. The musters run down from this to 371, in the case of an Irish battalion, which was the smallest recorded. **Transfers to the Army, etc.**—The number of Militiamen who joined the Regular Army, Royal Navy, and Royal Marines during the year '90 was 13,107. The number of recruits enlisted for the Militia during the year was 35,634. The Inspector-General of Recruiting says in his annual report, dated Feb. 13th, '91—"The larger number of Militiamen who each year join the Line amounting to about one-third of the total number enlisted, unquestionably causes a drain upon the Militia, and leads to the belief, on the part of some, that recruiting for the Militia should be conducted on independent lines; but the benefits to the territorial regiments of allowing men who desire it, to make the Militia a stepping-stone into the Line, appear overwhelmingly great; and it further seems doubtful, in view of the numbers required annually from each territorial area, whether any such change of system would not set up a competition between the services which does not now exist. Apart from the men who join the Militia on leaving the Regular Army, the real mainstay of the Militia should be the wage-earning classes, with fixed residences in the County, a source which in prosperous times is apt, from more causes than one, to run dry. In this connection officers commanding Regimental Districts, under instruction from H.R.H. the Commander-in-Chief, have recently, without making appeals to patriotism, which in the circumstances would probably be mistaken, addressed themselves to the great employers of labour, pointing out the great advantages which

the country, and they specially, derive from a suspension of the Ballot Act. Their representations have been, in most cases, cordially received, and if followed up it may be hoped that the serious drain proceeding from discharge by purchase and desertion, amounting in the past year to 18,251 men, may be brought within more reasonable limits." In answer to this explanation, many Militia Commanding Officers argue that they are placed in difficult positions by the continual drain of transfers to the Line, whereas the number of trained soldiers coming to them from the Line is comparatively small. The system of all Continental armies is reversed in fact, as the Reserve has to feed the Army, whereas under the short service system, as it is carried out in the case of Continental nations, the Army feeds the Reserve. The strain of the existing system falls very severely on the Militia, and it is but right that Commanding Officers, and Officers generally, should have every allowance made for them under all the circumstances of the situation. **The Militia Committee and its Results.**

The following changes have been made in the force, upon the recommendation of the Committee, presided over by Lord Harris, which reported two years ago (1) **Recruiting.**—

Recruiting in excess of establishment has been allowed in certain cases. (2) **Discharges by purchase (Recruits).**—Recruits purchasing their discharge at end of recruits drill, are not now allowed to take away their boots and shirts.

(3) **Militia Non-Commissioned Officers.**—Old Line Non-Commissioned Officers are given an annual bounty of £3, and have their pay raised to that of the Permanent Staff, on accepting Non-Commissioned Officers' rank in the Militia. (4) **Musketry Course (a).**—The recruits' course is extended from 40 to 80 rounds. (b) The recruit also goes through musketry course with his company. (5) **Drilling on Enlistment (a).**—The Militia Colonel is encouraged to visit the Depot to inspect his recruits. (b) A Militia Officer may always be employed at the Depot, when not less than forty Militia recruits are training there. (c) The recruits' musketry course to be carried out at the Headquarters of his Militia brigade or battalion. For this purpose the drill of the recruit on enlistment to be reduced by seven days, so that he may be trained in musketry immediately before the training of the regiment for a period of fourteen days. (6) **Training in Camp.**—Tent boards to be provided when necessary, upon the recommendation of General Officers Commanding Districts. (7) **Clothing.**—Flannel shirts to be issued gradually. (8) **Instruction of Officers (a).**—Increased opportunities to be given to Militia Officers to attend at Woolwich and Hythe, so that no brigade or battalion shall be without at least one artillery or musketry instructor. An assistant instructor to be allowed when recommended. (b) Subaltern Officers to be required to attend for two months' instruction, either at a school or with a Line regiment, as well as to attend the annual training, during their first twelve months' service. They to receive pay and allowances whilst under instruction. (9) **Title.** The Militia to be no longer included in the title "Auxiliary Forces," but to be styled "The Militia." **Appointment of Officers.**—The Lord-Lieutenant of a County recommends for the consideration of the Secretary of State for War, for submission to Her Majesty, the names of candidates for first appointments as subaltern

officers in the Militia. Candidates must not be less than seventeen years of age. If a Lord-Lieutenant fails to recommend the name of a gentleman within thirty days after the date of the official letter from the War Office, notifying a vacancy to have occurred, his power of recommendation lapses, and it devolves upon the Commanding Officer to recommend a gentleman for the vacant commission. A subaltern appointed to the Militia is expected within the first year of his service to pass the examination in drill, musketry, and regimental duties necessary to enable him to retain his commission. If an officer fails to obtain his certificate he can be examined again within six months, and in the event of a second failure he has to resign his commission. Cavalry and artillery officers appointed from the Regular Army to infantry battalions have to obtain certificates in infantry drill, and in like manner infantry officers appointed to artillery brigades have to obtain artillery certificates. **Commands and Retirement of Officers.**—All appointments as Commanding Officers made subsequent to April 1st, '90, are for a tenure of five years. An extension of command will, however, be given upon the recommendation of General Officers commanding districts. Officers who held command July 1st, '87, are allowed to retain their appointments up to the age of sixty-two, but can be extended if thought desirable. Officers appointed Lieut.-Colonel subsequent to July 1st, '87, have to retire at fifty-five, but can be extended for five years. Majors who held that rank on July 1st, '87, are retired at fifty-five, those appointed subsequently at fifty. Captains have to retire at fifty. But extensions are permitted on the same terms as in the case of Lieut.-Colonels. **Recruiting and terms of Enlistment.**—

Militia recruiting is conducted by officers commanding Regimental Districts, officers commanding Auxiliary Artillery Districts, and Commanding Royal Engineers, acting under orders from the Inspector-General of Recruiting. The recruit is enlisted for six years, and may re-engage if under forty-five years of age for a further period of four years. Recruits are liable, at any time after enlistment, to be assembled for preliminary drill for such period not exceeding six months, as may be directed from time to time by the Secretary of State for War. Brigades and regiments are called out annually for twenty-seven days' training, which may be extended to fifty-six days if deemed expedient. **Militia Reserve.**—The quota of men to be enlisted in the Militia Reserve is one-third of the establishment of gunners in each unit of Artillery, and one-fourth of the establishment of sappers and privates in each unit of Engineers or of Infantry. Men volunteering must be over nineteen years of age, have served two trainings, and bear good characters. The Reserve engagement coincides with the Militia engagement. Men entering the Militia Reserve are required when called up to enter upon any service (in case of national emergency), and required to fulfil all conditions of service attaching to an ordinary Militia engagement.

Mill Hill School (London, N.W.). Founded 1807, reconstituted under direction of the Court of Chancery '69. Awards the "Bousfield" scholarship of about £50, tenable either at University College or New College, London, for three years. Also several Ministerial Exhibitions (about £45 a year) and Entrance Scholarships (£30 to £50). Pupils, 150. Motto, *Et virtutem*,

of musas. The "Old Mill-Hillians" Club (President, the Earl of Stamford) numbers 370 members. **Head Master.** J. D. McClure, M.A., LL.M.

Mines, Proposed Secretary for. See **SECTION**, sect. 36.

Mines. Royal Commission on Explosions in. The following are the members of this Commission: Rt. Hon. Joseph Chamberlain, M.P. (Chairman), Rt. Hon. Lord Rayleigh, Sir Wm. T. Lewis, Prof. Harold B. Dixon, Mr. Emerson Bainbridge, and Mr. Charles Fenwick, M.P. The Sec. of the Commission is Mr. John Wilson, 23, Great George Street, S.W.

Mining Royalties. A Royal Commission was appointed in the session of '89 to inquire into the terms* and conditions under which the royalties are paid, as well as the economic operation thereof upon the mining operations of the country. It is further to inquire into the terms and conditions under which mining enterprise is conducted in India, the Colonies, and foreign countries, by the system of concession or otherwise, and the economical operation thereof. The **Commissioners** are the Earl of Northbrook, Lord Macnaghten, Sir William Thomas Lewis, Messrs. William Abraham, M.P., Alfred Barnes, M.P., Thomas Burt, M.P., David Dale, George Baker Forster, Henry Hucks Gibbs, M.P., Archibald Hood (President of the Mining Association of Great Britain), George Auldjo Jameson, William Kennick, M.P., John Knowles, Joseph Edwin Crawford Munro, LL.D., William Coles Pendarves, Christopher Talbot Kingston, Frederick Parker Rhodes, Robert Chisholm Robertson, Josiah Thomas, Charles Algernon Whitmore, M.P., and Nicholas Wood, M.P.

Ministry. When a Ministry resigns it is the function of the Sovereign to call upon some person to form another administration. There is no restriction upon the Royal choice, but the statesman usually selected is the leader of the opposing party in one of the two Houses. If the individual chosen undertake the task of forming a ministry, he commences by nominating his Cabinet, taking himself the principal position, which is variously designated as head of the Government, or First Minister, or Prime Minister, or Premier. The offices which invariably give the holder **Cabinet rank** are those of First Lord of the Treasury, Lord Chancellor, Lord President of the Council, the Secretaries of State for the Home Department, Foreign Affairs, the Colonies, for War, and for India, Chancellor of the Exchequer, and First Lord of the Admiralty. For many years the **Prime Minister** of the day took the office of First Lord of the Treasury himself, but Lord Salisbury has twice given that position to another member of the Cabinet, and associated with himself the office of Foreign Secretary. The Prime Minister may be First Lord of the Treasury and Chancellor of the Exchequer, or First Lord of the Treasury and Lord Privy Seal. The other offices, the holders of which may or may not be in the Cabinet, include those of Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works, Postmaster General, Lord Lieutenant of Ireland, Lord Chancellor of Ireland, Chief Secretary for Ireland, Secretary for Scotland, President of the Board of Trade, President of the Local Government Board. **Appointments to all these offices, and to many others, a full list of which follows this article,**

are made by, or on the recommendation of, the new Prime Minister, and each person so appointed may hold office as long as he does. Cabinets vary in number from eleven or twelve to sixteen or seventeen; their members are necessarily Privy Counsellors, and their deliberations are confidential. If a Cabinet minister was in office before election there is no re-election necessary, as there is when the acceptance of office comes after a general election. Ministers holding office direct from the Crown, on going from one such office to another do not vacate their seats. There is, in effect, no limit to the duration of a ministry but the confidence of the Commons; it will not now resign upon the adverse vote of the House of Lords, nor if it be defeated upon a trifling matter in the Commons, but only when it is placed in a minority there upon some question of importance. In such a case the Prime Minister either places his resignation in the hands of Her Majesty, or asks leave to appeal to the country, and should the latter course be decided upon a general election follows. If the elections go against the Government, it is now the custom for the ministry to resign and a new administration to be formed before the meeting of the new Parliament. The chief Executive power, though theoretically vested in the Crown, is actually exercised by the Cabinet, which is responsible to Parliament, and to the House of Commons more especially, for all its acts. While each minister conducts the ordinary business of his own office without reference to his colleagues, the most important business of every office is brought under the consideration of the whole Cabinet, who in Parliament are bound to act together on all executive questions. From an early period the kings of England were advised on public affairs by a **privy council; matters of State being discussed in the sovereign's presence, and the result determined by vote subject to his pleasure. The selection by the sovereign of a few of the whole number was no doubt the origin of the Cabinet Council. It was not until the Restoration, says Macaulay, that the interior council began to attract general notice. "It at length drew to itself the chief executive power, and has now been regarded, during several generations, as an essential part of our polity. Yet, strange to say, it still continues to be altogether unknown to our law; the names of the noblemen and gentlemen who compose it are never officially announced to the public; no record is kept of its meetings and resolutions; nor has its existence ever been recognised by any Act of Parliament." The sovereign cannot now constitutionally preside at a Cabinet Council. "The Cabinet," says Mr. Gladstone ("Gleanings of Past Years"), "is the threshold hinge that connects together for action the British constitution of King or Queen, Lords and Commons. . . . Every one of its members acts in three capacities: as administrator of a department of State, as member of a legislative chamber, and as a confidential adviser of the Crown. Two at least of them add to those three characters a fourth; for in each House of Parliament it is indispensable that one of the principal ministers should be what is termed its leader." We now give a full list of all those who go out of office at a change of ministry, and under corresponding headings throughout this work will be found a summary of the powers and duties exercised by many of them. See **PARLIAMENT.****

Ministries from 1880 to 1891.

Notes.—The names of Cabinet Ministers are indicated by an asterisk (*). In columns 1, 2, 3, and 4, the names of those forming the original administrations are printed in roman type, and those who took any particular office subsequently in *italics*.

OFFICE AND SALARY.	Mr. Gladstone's 2nd Administration (Apr. '80—June '85).	Ld. Salisbury's 1st Administration (June '85—Jan. '86).	Mr. Gladstone's 3rd Administration (Jan.—July '86).	Ld. Salisbury's 2nd Administration (formed July '86).	Ld. Salisbury's and Ad. as at present constituted (Nov. 18th, 91).

Mineralogy. Mineralogy having been raised from the catalogue (descriptive) level to the rank of an experimental science by the application of the principles of chemistry and physics, one of the chief contributions to mineralogy during '91 naturally came from a chemist, who is also a physicist. In a lecture delivered at the Royal Institution, on May 15th, **Prof. Livinge** endeavoured to show, by quasi-mathematical reasoning, that crystalline forms, with all their regularity and symmetry, are the outcome of the accepted principles of mechanics. The only forces he invoked were those that produce the rise of a liquid with a capillary tube, and the surface tension at the boundary of two substances which do not mix. Another important contribution to the natural history of crystals was made by **Prof. Judd** in a lecture at the Royal Institution on Jan. 30th. Prof. Judd restated some of the fundamental laws of crystallography, of which the two following are of most interest by reason of their analogy to similar laws regarding the growth of certain lower organisms: (1) "Crystals possess the power of resuming their growth after interruption; and there appears to be no limit to the time after which this resumption of growth may take place. 2. If a crystal be broken or mutilated in any way whatever, it possesses the power of repairing its injuries during subsequent growth." Most of the recent advances in geological mineralogy have been made by the examination of their transparent sections of pieces of rock, examined under the microscope by the aid of polarised light. Largely by this means (as well as by chemistry) it has been shown that the crust on our globe is made up of crystals and crystal fragments in all stages of growth and decay. As an illustration of the methods of chemical and microscopical petrology, by which the history of the crust-forming rock masses is being brought to light, there may be instanced **Prof. Sollas'** memorandum (*Transactions of the Royal Irish Academy*, Jan. '91) on the "Histology and Physiology of the Granites of Limerick." Another phase of recent mineralogical activity is seen in the mineral syntheses, so numerously effected of late, that there remain very few of the more common rock-forming minerals which have not been artificially prepared in the laboratory. The list has been further reduced by **Kroustchhoff** artificially reproducing, in well-formed crystals, the mineral hornblende (see *Comptes Rendus*, April '91). By a series of ingenious experiments in the Geological Laboratory of Edinburgh University, **Alexander Johnstone** has accurately determined the conditions under which the various forms of the mineral pyrites are produced in nature, upsetting, by his results, the theory of **Belmen**. Amongst the new minerals discovered are (1) **agularite** (called after the discoverer, **Senor Aguilar**, Mexico), of the composition Ag_2S, Ag_2Se (see *American Journal of Science*, May '91), and (2) titanate of manganese ($MnTiO_3$), found in the neighbourhood of **Hartstigen** by **Dr. Hamberg** (see *Geol. Foeren i Stockholm*, 12 Band, 598). In a paper contributed to *Nature* (March 19th), **Mr. Orask** showed that instances of disturbance of the compass on ships in North-West Australian waters were due to the action of magnetic minerals at the bottom of the sea adjacent to the ship. In the collection of rocks brought home by **Prof. Haddon** from **Torres Straits** further evidence

has been found in favour of the belief that the famous "Eozoon" is not an organic but a purely mineral structure—a disputed point which long afforded one of the vexed problems of paleontology. At the April meeting of the Manchester Geological Society **Mr. Tonge** contrasted British mining in '89 and '51. In '51 there were rather more than 50,000,000 tons of coal and other minerals raised; in '89 185,187,260 tons. In '51 there were 216,217 persons employed above and below ground in coal mining; in '89 564,735. In '51 there were 984 deaths caused by accidents in and about mines, being at the rate of 4.56 persons per 1,000 employed; in '89 there were 1,366 deaths being at the rate of 1.88 per 1,000 employed. In '51 there was 1 death from accident for every 200 persons employed; in '89 1 for every 530, the degree of safety being two and a half times greater in '89 than in '51.

Mines. The official statistics dealing with the mines in the United Kingdom and the Isle of Man for '90 are very interesting, and some of the more important are appended. The number employed in and about all the mines was 655,287, of whom 5599 were females, the aggregate increase being 48,132. The total number of fatal accidents was 896, and the total number of deaths occasioned thereby 1206, being a decrease of 13 in the number of fatal accidents, and an increase of 78 in the number of lives lost, compared with the totals of the preceding year. There was 1 death for 543 persons employed, which was more favourable than the ratio, 1 in 538, of the preceding year. The total number of persons employed in and about the mines under the Coal Mines Regulation Act was 613,233, of whom 4206 were females working above ground, the aggregate increase being 40,498, compared with the preceding year. There were 861 fatal accidents and 1160 deaths, the number of accidents being 13 more than in the preceding year, and the number of deaths being 90 more. There was 1 fatal accident for every 712 persons employed, and 1 death for every 528 persons employed. The accident ratio was more favourable, but the death ratio slightly less, so than in the preceding year. The total number of persons employed in and about mines, including those employed on private branch railways and tramways, and in washing and coking coal on premises adjacent to or belonging to the mines, was 674,434, of whom 5800 were females above ground. The number of persons employed on private branch railways and tramways, and in washing and coking coal on premises adjacent to or belonging to the mines, was 19,147, of whom 491 were females. The number of fatal accidents was 31, and the number of deaths resulting therefrom was 34. There was 1 fatal accident for every 580, and 1 death for every 503 persons employed, which are more favourable ratios than in the preceding year. The total number of persons employed under the **Metaliferous Mines Regulation Act** was 42,054, of whom 1393 were females employed above ground. There were 38 fatal accidents and 46 deaths, the number of accidents being 26 less and the number of deaths 18 less than in the preceding year. There was 1 fatal accident for every 1106 persons employed, and 1 death for every 994 persons employed, which were more favourable ratios than in any preceding year. The total quantity of mineral wrought in the different districts was 194,605,887 tons, of which 181,614,288

was coal and 8,117,476 ironstone, the rest being fire-clay, oil shale and other minerals, making a total increase of 4,972,231 tons compared with the preceding year. There was an increase of 4,697,564 tons of coal, but a decrease of 153,066 tons of ironstone. The ratios of the fatal accidents and the deaths to the number of persons employed in and about mines under the present and former Coal Mines Acts showed that the occupation of the miner is now more than twice as safe as it was at the commencement of the Mining Acts, the average ratio under the first Act being 1 death in every 233 persons employed, under the second Act 1 death in 258, under the third Act 1 death in 312, under the fourth Act 1 death in 466, whilst for the present year it is 1 in 528—a much more favourable ratio. From the ratios of accidents and deaths to the number of persons employed and tons of mineral wrought in each of the districts, a general average is obtained of 226,023 tons of mineral for every fatal accident, and only 167,763 for every death, as compared with the slightly less favourable quantity of 223,624 tons per fatal accident, and the considerably more favourable quantity of 178,227 tons per death in the preceding year. A table of the hours of the deceased persons' shifts in which the fatal accidents happened shows that in only 5 cases had those to whom the accidents occurred worked more than 12 hours' overtime. **Explosions.** '91. To the end of June there were only 16 deaths from explosions in coal mines, as against 276 in the same period of '90, and 54 in '89. The explosions were: Beamish pit, Newcastle-on-Tyne (Feb. 10th), 2 deaths; Apedale Colliery, Staffordshire (April 2nd), 10; Elkrington Colliery, Middleton (April 26th), 1; Moss Mine, Ashton-under-Lyne (May 14th), 1; Caerphilly, South Wales, 1.

Mint, The Royal. The existence of a mint in this country is of very ancient date, regulations concerning it having been made as early as 928, by Athelstan. The present building was erected between 1806-10, at a cost of £262,000. It was somewhat injured by fire in '15, but repaired. By an Act passed April 4th, '70, the mastership of the Mint was absorbed in the office of Chancellor of the Exchequer, and the duties were devolved upon the deputy-master of the Mint. The report for '90 shows that the gold coined during that year amounted to £7,680,756, the silver to £1,694,688, and the bronze to £90,285. Of the gold £1,121,600 was in half-sovereigns. The withdrawals from circulation during the year amounted to £2,463,148, and the cost to the State of the withdrawal was £51,299. The average loss in weight of the sovereigns was 2'236 grains, and of the half-sovereigns 3'046 grains. The net addition to the silver circulation of England and Wales, deducting withdrawals, was £865,175. The number of three-penny-pieces issued amounted to £57,495. The mean price of silver during the year was 58d. per oz. higher than in '89, and the seignorage was only 35d. per cent., as against 54 in '89. In the bronze coinage £2,170 was in farthings, £22,930 in halfpence, and the total issue exceeded that of '89 by £24,000. In the melting-house, 192 tons of gold, 388 tons of silver, and 74 tons of copper were melted and cast into bars for coinage, and 4½ tons granulated for alloy. Eighty-eight million coins were struck of 25 denominations, and of these 17,500,000 were rejected in the weighing room, being incorrect in weight, imperfect in ring, or

defective in coinage; 36,009 assays were made. During the year a discoloured parchment was discovered amongst the old records of the Mint. It was described as "an exact survey of the ground plot or plan of His Majesty's Office of Mint in the Tower of London." It was dated Feb. 26th, 1700-1, and it is supposed to have been prepared by order of Sir Isaac Newton, who became Master of the Mint in 1699. The Mint buildings were situated between the rampart and the inner ward of the Tower, and appear to have followed the line of the ramparts all round, except on the river front, and included houses for the Master and Warden. The present Deputy-Master is Sir C. W. Fremantle.

Missionary Societies. The earliest missionary operations in modern times were carried on by the Jesuits in Japan, where great progress was made; but their work was overthrown, and the missionaries expelled before the sixteenth century. They also carried on operations in China and India. **The Society for the Propagation of the Gospel in Foreign Parts** was established by Act of Parliament in 1647, and work commenced amongst the North American Indians. Frederick IV. of Denmark founded a mission on the coast of Coremandel in the beginning of the eighteenth century. **The Moravian Church** was the first to begin missionary operations in its corporate character by establishing mission stations at the Cape of Good Hope, in the West Indies, Labrador, Greenland, and in many other parts of the world. **The Baptist Missionary Society** was founded in 1792, the **London Missionary Society** in 1795, the **Church Missionary Society** at the commencement of the present century, and the **Wesleyan-Methodist Missionary Society** in 1814. The following details are extracted from the last published reports of each society.—**Baptist Missionary Society.** Received on behalf of the Society during 1890-91, £66,011; deficiency on the operations of the year £10,561. In India operations are carried on in Western India, Bengal and the North-West Provinces; there are 151 stations and sub-stations, 54 European missionaries, and 100 native evangelists. In the Island of Ceylon there are 107 stations and sub-stations, 1 European missionaries, and 22 evangelists. In China the principal stations are in Shansi and Shantung; there are 122 stations and sub-stations, 21 European missionaries, and 18 native evangelists. In Palestine the chief station is at Nablus, and there are 4 sub-stations and 1 European missionary. Africa has 4 stations on the Lower Congo and 6 on the Upper Congo. There are 27 European missionaries at work, and 6 native evangelists. Mission work is also carried on in the West Indies; at Jamaica; and in Norway, Brittany and Italy. The statistics for 1889-90 summarised show the following results: missionaries, 127; self-supporting churches, 61; evangelists, 736; baptised, 3802; number of members, 50,227; day-school teachers, 381; Sabbath-school teachers, 2244; day-scholars, 17,153; Sabbath-scholars, 27,146. **Mission House, 19, Fournival St., Holborn, E.C.**—**The Church Missionary Society** labours in West Africa (Sierra Leone, Lagos and Yoruba country, and the Niger); in Eastern Equatorial Africa (Mombasa, Taita and Chagga, Usagara, Unyamwezi, etc., and Uganda). Palestine (Jerusalem, Nazareth, Salt, Nablus, Jaffa, Gaza, and Hauran). In India it has five missions, having headquarters in Calcutta, Lahore, Bombay, Madras, and Travancore and Cochin. Besides

these, mission work is carried on in Egypt, Arabia, Persia, Ceylon, the Mauritius, China, Japan, New Zealand, North-west America, and the North Pacific. The summary of the work shows the following results:—Stations, 327; Missionaries in hol orders, including European, Eurasian, native clergymen, female teachers, and native unordained teachers, 4358; native adherents, the great majority baptised, 195,463; native communicants, 50,005; schools, 1720; scholars, 70,311. **Mission House**, Salisbury Square, Fleet Street, London.—**London Missionary Society**. Amount received in year 1890-91, £114,293 4s. 1d. Mission operations carried on in China, at Hong Kong, Canton, Amoy, Chiang Chiu, Shanghai, Hankow, Hiau Kan, Chung King, Tientsin, Chi Chou, Peking, and Mongolia. In India at Calcutta, Berhampore, Benares, Mirzapore, Singrovi, Kumaon, Almora, and Raneë Khet, in the north; and at Belgaum, Bellary, Gooty, Cuddapah, Bangalore, Tripatoor, Salem, Coimbatore, Madras, and Vizagapatam. Also in the kingdom of Travancore and other places in southern India. In Madagascar 28 principal stations are sustained. In South Africa there are 11 and in Central Africa 3 stations. Mission work is also carried on in the West Indies and Polynesia. A general summary shows that the Society has 196 European missionaries and 5410 native agents; 67,797 Church members, and 276,521 native adherents, while they conduct 2003 native schools, with 108,497 scholars. The total amount raised and appropriated at mission stations was £224,433 11s. 1d. **Mission House**, 14, Blomfield Street, London Wall, E.C.—**Primitivo Methodist Missionary Society**. The total receipts of this society for the year ending March 31st, '91, amounted to £15,186 11s. 6d. This comprises £14,876 subscribed to the general fund, and £313 1s. 1d. given to the African fund. See, Rev. J. Travis, 71, Freegrove Rd., Holloway, N.—**Wesleyan Methodist Missionary Society**. The total sum received in '90 (last statement to hand) from the home districts amounted to £100,04 7s. 5d. Ireland £4872 15s. 6d., foreign districts £4879 19s. 11d.; these sums, with a number of extraordinary receipts, amounting to £11,377 4s. 2d., made a total of £122,072 6s. 3d. The expenditure was £132,885 18s. 6d., leaving a deficiency, inclusive of the debt of 1889 (£8563 11s. 3d.) of £19,377 5s. 6d. Mission operations carried on in France, Germany, Italy, Spain and Portugal, and Malta; in four districts of Ceylon, seven districts of India, two districts in China, in Southern and Western Africa, and in the West Indies. The summary of the year gives the following results:—Circuits, 1519; chapels and preaching places, 3130; missionaries, 551; other paid agents, 2721; unpaid agents, 10,001; full church members, 113,437; on trial for church-membership, 18,765; scholars, 100,688. **Mission House**, Bishopsgate St. Within.

Mivart, St. George, F.R.S., was b. 1827. Ed. at Harrow, King's Coll., London, and St. Mary's Coll., Oxon. Called to the bar in '51, but abandoned the law for the study of natural history. He joined the Roman Catholic Church in '44. Appointed lecturer at St. Mary's Hospital '62. He is the author of "The Genesis of Species," a work of much power, in which he grapples with Mr. Darwin's theories of evolution. Mr. M. does not dispute the existence of the principle of evolution, but contends that it does not extend to men. Among other works written by Mr. Mivart are "Man and Apes," "Lessons

in Nature," "Contemporary Evolution," "Defence of Freedom and Liberty of Conscience," "The Cat," etc.

Mombasa-Victoria-Nyanza Railway (see last ed.). This line from Mombasa, on the East African Coast, to Kavirondo, on Lake Victoria Nyanza, will be 600 miles long, 2 feet gauge; the railway will be the property of the British East Africa Co. It was inaugurated on Aug. 26th, '90. A supplementary estimate was delivered to Parliament on July 17th, '91, for a grant in aid amounting to £20,000 in furtherance of this railway. On July 20th, Sir W. Harcourt having intimated that the estimate would be opposed, the Chancellor of the Exchequer said it would not be proceeded with this session. An article appeared in the *Times* of Sept. 28th, pointing out that in consequence of the State-aid efforts of the German East Africa Company, the British Company had been compelled to push forward at once to Uganda. It was now found that for a time the resources of the company were exhausted, and without such aid as that suggested for the railway, Uganda would have to be abandoned. On Oct. 8th the British and Foreign Anti-Slavery Society published a letter, which had been forwarded to the Premier, in favour of the railway.

Mommson, Theodor, eminent German jurist and historian, was b. at Garding, Schleswig, 1817. Educated at the Univ. of Kiel. Professor of law successively at Leipzig, Zurich, Breslau, and Berlin; and in '82 he was tried on a charge of labelling Prince Bismarck, and was acquitted. His best known works, in addition to his splendid collection of Latin inscriptions, are his "Earliest Inhabitants of Italy," and "History of Rome." On the occasion of his seventieth birthday, in November '87, a congratulatory address was sent to him by members of Oxford University, signed by sixty-two Dons.

Monaco. A principality, surrounded on all sides by the French department of Alps Maritimes, except to the south where it borders on the sea. Consists mainly of the town of Monaco, and its suburbs, 9 miles north-east of Nice! Area 9 sq. m., pop. 12,548; pop. of town 3242. Italian in language and traditions, but virtually under French control. Noted casino, where gambling is licensed. At the end of '89 the Prince of Monaco died at the Chateau Marchais, near Saon, in the department of Aisne, and was succeeded by his son, Prince Albert of Monaco.

Monckton, Sir John Braddick, the Town Clerk of the City of London, was b. 1832, and is the son of the late Mr. John Monckton, of Maidstone. After being ed. at Rugby, was admitted a solicitor nearly thirty years ago, and practised for many years. Elected Town Clerk in '73, and has been annually reappointed ever since. He is one of Her Majesty's Lieutenants, for the City of London, a Past Grand Warden of Freemasons of England, and he is decorated with the Belgian Order of Leopold, the Saviour of Greece, the Lion and the Sun of Persia, and the Golden Lion of Nassau. His wife, Lady Monckton, is an accomplished actress.

Money Lending, Law as to, in '91. A singular money lending transaction was exposed in the case of *Parker v. Brand* (Queen's Bench Division, April 23rd, '91). The plaintiff, a money lender, sent the defendant, a clergyman, one of his circulars, and the defendant wrote to inquire upon what terms he could borrow £100.

He was informed: "We are willing to make the advance of £100 at six months, the charge for which will be £30. Should this meet your views, please sign the enclosed note for £100, and on returning it to us we will remit you a cheque or note for the amount." The note for £100 was returned, signed by the clergyman, and the money lender sent his cheque for £70, deducting the £30 which was to be paid for the loan of £100. The clergyman wrote that he wanted the loan of £100, and that he had supposed the £30 was to be paid at the end of the six months. The money lender replied that he could have £30 on a fresh note, and sent him a note for £50, which he signed and returned, receiving upon it £35, the remaining £15 being deducted for interest. The notes were not paid, and the money lender brought an action on the two notes for £100 and £50. The Judge at Chambers (Mr. Justice Wright) made an order than on payment by the defendant of £105 (the amount received), with interest at 5 per cent. from the date of the note, the action should be stayed; otherwise that there should be leave to defend as to the residue. The plaintiff, the money lender, appealed, but the Queen's Bench Division upheld the order.

Money Market. The money market in this country is composed of three groups of dealers—the Bank of England, the private and joint-stock banks, and the bill brokers (discount houses). The last named, as their title indicates, act as intermediaries between the banks, finding money for those who want to discount bills, and bills for those who want to invest money. The banks, on the other hand, collect and utilise the deposits entrusted to them by the public, issue notes, etc. There is, however, a great distinction between the Bank of England and the other banks of the country. The **Bank of England** is not only the banker of the Government, but also the bankers' bank. All the other banks keep their bullion reserves at the Bank of England, and it is this circumstance which gives that establishment its special importance as the centre of our monetary system. The **Bank's reserve** is really the banking reserve of the entire kingdom, and for this reason it forms the barometer of the **Money Market**. We work, as it is said, on a "one reserve" system, and the value of money in this country mainly depends upon the amount of reserve held by the Bank of England. The **discount rates** quoted by the other banks and bill brokers, who collectively are called "the market," are generally below the Bank of England rate; and one reason for this is, that there is a very important difference between "gold" and "money" as these terms are technically used. It is quite possible to discover that gold is scarce, whilst money is plentiful. For example, the Bank's reserve may be low,—which means that gold is scarce,—but if under such circumstances the bill brokers or merchants borrow money from the Bank for ten days or a month, the supply of money in the market would immediately be plentiful, although the Bank's stock of bullion would not have been increased by a sovereign. This is what is constantly occurring, and the level at which the private deposits at the Bank of England stand is therefore a very important element in controlling the course of market rates. The "price of gold" is another expression which constantly puzzles the public. It seems strange that anything can have a

price measured in terms of itself, but the paradox is easily explained. By law the Mint is compelled to coin gold sovereigns for any person tendering bar gold at the rate of £3 17s. 10d. per ounce; but, owing to the time taken by that establishment in minting, importers usually resort to the Bank of England, and sell it outright at the buying-price fixed by law for that institution—viz., £3 17s. 9d. As, however, the Bank, when selling bar gold, only does so at the price of £3 17s. 10d., the difference of 1d. per ounce allows bullion brokers to make a profit in times when gold is in demand for export by intercepting imported gold and selling it to the exporters at a little below the Bank's price. The **gold movements** at the Bank are the result of banking operations made either on home or foreign account. The internal movements are remarkably regular. There is always an outflow of cash to the provinces during the spring and autumn, and a subsequent reflux of money to London in the early summer and the winter. These movements, however, have become less important during recent years. It is the **foreign movements** of gold that are of chief interest; and as regards these, the only law, if law it can be called, is that gold usually tends to leave the country during the autumn. It is then that we frequently export gold to the United States in payment for imports; and it is then, too, that the Continent and other parts of the world often draw upon our gold reserve for payments on foreign loans subscribed for here during the earlier part of the year. The **Bank's reserve** is seldom allowed to fall below £10,000,000. A fair average is £13,000,000 to £14,000,000. The **Bank rate** is never reduced below 2 per cent., and it has never exceeded 10 per cent. See STOCK EXCHANGE, MOVEMENTS OF.

Money Orders. See POST OFFICE.

Monier-Williams, Sir Monier, distinguished Orientalist, was b. at Bombay 1819, of which Presidency his father was Surveyor-Gen. Educated at King's Coll. Lond., and Balliol and Univ. Colleges, Oxford. **Professor of Sanscrit at Haileybury** '44-58, and in '60 **Boden Sanscrit Professor at Oxford**. Prof. M.-W. is the author of a well-known **Sanscrit Grammar**, an **English and Sanscrit Dictionary**, and has edited a number of **Oriental classics**. His "Hindooism," "Modern India and the Indians," and "Religious Thought and Life in India," are amongst the most popular of his writings. Professor M.-W. has been instrumental in founding an **Indian Institute** and a **School of Indian Studies** at Oxford. He represented the **Government of India** at the **International Congress of Orientalists** at Berlin, in '81, and was knighted in '86. Was appointed **Duff Lecturer** at Edinburgh, '88.

Monte Carlo. The casino at **Monaco (q.v.)**. First stone laid in '58. The **total annual income** from the gaming tables is about £800,000, the average daily profit from a roulette table being £200. To Prince Albert of Monaco the sum of £50,000 is paid annually for the concession to play. The **Société Anonyme des Bains de Mer et du Cercle des Etrangers** de Monaco holds a contract, which was made with the late Prince Charles, and expires in 1913. It has practically to bear the cost of spiritual and temporal government for the Principality. The present Prince has a high reputation for scientific and literary tastes. During the week ending March 14th, '91, the bank at the tables

was broken many times, no less than £20,000 being carried off by the gamblers on that day.

Montenegro. A principality under the patriarchal rule of Prince Nicholas I. (*q.v.*), which is practically absolute, though nominally shared with a council of eight, half elected by the inhabitants capable of bearing arms, and half nominated by the prince. Area (including town and district of Dulcigno, ceded by Turkey in 1880), 3630 sq. m.; pop., 236,600. Capital, Cetinje. pop. 1500. Prevailing religion, Greek Church, Education compulsory and free. — **History.** '91. The Government sent a strong body of troops to the Albanian frontier in consequence of the disturbances in the district of Tirana. The severe winter and heavy snow falls in Jan. caused severe and general distress. An important seizure of arms and ammunition was made (Sept.) on the right bank of the Bojane, in Montenegrin territory. The munitions seized comprised 289 rifles, 270 revolvers, 136,000 cartridges, and 105,000 caps, which were found concealed in a secret store, belonging to the Malissory, the frontier tribe which had been causing some anxiety.

Montenegro, Prince of. See NICHOLAS I.

Montmorency Falls (Quebec), Utilisation. These falls are already used for electric lighting purposes in the city, and in May '91 it was reported that a number of local capitalists had secured permission from the Provincial Government to erect dams to raise the level of Snow Lake. From this lake flow the head waters of the Montmorency, and it is intended to increase the power of the falls where the river comes over the cliff into the St. Lawrence for manufacturing purposes.

Montreal. The largest and most attractive city in Canada, and the present commercial and financial centre of the Dominion. Pop. 200,000. Situated on the St. Lawrence river, in the province of Quebec (*q.v.*).

Montserrat. A British West Indian island, forming a presidency of the Leeward Islands. Capital, Plymouth. Governed as a Presidency of the Leeward Islands. Education well provided for. For financial statistics, see BRITISH EMPIRE, etc. (table). Montserrat was colonised by English in 1632. It passed into French hands for a time, but was finally restored in 1784.

Moravians, The. A body of Christians, thought to have formed at one time a part of the *Russites*. Withdrew into Moravia in the fifteenth century. In 1722 they formed a settlement called "The Watch of the Lord" on the estate of Count Zinzendorf. There were 500 members of the Church in 1727. The Society was introduced into England by Count Zinzendorf in 1738. In 1817 a London Association was formed. They also founded settlements abroad in 1732. The following are the numbers for '91 of day schools in the mission provinces, together with the number of teachers and scholars: Greenland, schools, 34; teachers, 39; scholars, 436. Labrador, 6 schools, 5 teachers, 200 scholars; N. America, 2 schools; Jamaica, 75 schools, 284 teachers, 7320 scholars; St. Thomas and St. John, 7 schools, 12 teachers, 395 scholars; Antigua, 13 schools, 85 teachers, 1781 scholars; St. Kitts, 7 schools, 32 teachers, 863 scholars; Barbados, 20 schools, 39 teachers, 2962 scholars; Tobago, 6 schools, 61 teachers, 812 scholars; Demerara, 1 school, 12 teachers,

156 schools; Mosquito Coast, 11 schools, 12 teachers, 630 scholars; Surinam, 18 schools, 60 teachers, 2200 scholars; W. South Africa, 19 schools, 58 teachers, 2228 scholars; E. South Africa, 15 schools, 27 teachers, 760 scholars; Australia, 2 schools, 21 scholars; Central Asia, 2 schools, 11 teachers, 110 scholars. In the Sunday Schools, of which there are 106, there are 1114 teachers, 7376 adults, and 8447 children. See MISSIONARY SOCIETIES.

Morisonianism, a name used to designate the principles held by members of the Evangelical Union, formed by Dr. Morison and others, in May 1843, of those who disagreed with the doctrine held by the Presbyterian Churches that Christ only died for the elect. Evangelical Unionism first originated in 1841, when its founder and three other ministers separated from the United Secession Church. The Evangelical Union Churches, which are mainly confined to Scotland, have a theological hall, where a number of students attend; and a weekly official organ, the *Christian News*. Many of the ministers, all of whom are total abstainers, have settled in England in Congregational churches, which are somewhat similar in church government. In all there are about ninety E. U. churches. The distinctive tenets are that the Divine Father loves all, the Divine Saviour died for all, and the Divine Spirit strives with all.

Morley, Rt. Hon. John, M.P. was b. at Blackburn 1838. Ed. at Cheltenham and at Lincoln Coll., Oxford, where he graduated B.A. ('59). Subsequently called to the bar at Lincoln's Inn ('73). Hon. LL.D. of Glasgow Univ. Author of various works on the French *Philosophers of the eighteenth century*, of an essay on *Compromise*, a "Life of Cobden" and of "Edmund Burke." He has also recently published an essay on aphorisms. He was for some time editor of the *Literary Gazette*, the title of which he altered to *The Parthenon*, and for fifteen years ('67-82) conducted the *Fortnightly Review* (*q.v.*). For three years he was editor of the *Pall Mall Gazette* (*q.v.*), with which he terminated his connection in '83, on his acceptance of the editorship of *Macmillan's Magazine*, from which he retired in '85. In '60 Mr. Morley unsuccessfully contested Blackburn as a Liberal. He was also defeated in Westminster in '80. Three years later, however, he succeeded at Newcastle-on-Tyne, for which he has sat ever since. When Mr. Gladstone propounded his Home Rule scheme he found in Mr. Morley one of his ablest and most enthusiastic supporters. Mr. M. subsequently became *Chief Secretary for Ireland*. He is one of the five Liberals who met (Jan. '87) for the purpose of discovering a *modus vivendi* for the reunion of the Liberal party. In '88 he visited Dublin in company with Lord Ripon, and was received with demonstrations of the most extraordinary enthusiasm. His literary work received an addition in '89 in the shape of "Walpole," in the "Twelve English Statesmen Series." Mr. M. was called as a witness (March 25th, '91) at the Cork Assizes with relation to occurrences during the trial for conspiracy at Tipperary in Sept. '90. Delivered important speeches at Cambridge (Sept.) and at Newcastle (Oct.), dealing with the Liberal programme.

"**Morning Advertiser**," a daily paper founded Feb. 8th, 1794, is the recognised

organ of the licensed victuallers. It possesses distinctive features of its own; while being Liberal and Independent and Constitutional in politics, it is not exclusively the advocate of any one party. Editor, *Thos. Wright (q.v.)*. Offices, 127, Fleet Street, E.C.

"**Morning Post**" (daily). Conservative in its politics, it is the fashionable chronicle of the party, giving events of interest among the higher circles of society. It also, in addition to news of the day, home and foreign, gives critiques on literature, science, and art. Offices, Wellington Street, Strand.

Morocco. The westernmost of the Barbary States, occupying the N.W. corner of Africa. An empire consisting of the kingdoms of Fez and Morocco, and the territories of Suse, Draha, and Taflet, with the oasis of Twat. Area (estimated) about 260,000 square miles. Population estimated at from 2,500,000 to 5,000,000. There are three capitals: Fez (pop. 80,000), Morocco (pop. 50,000), Mequinez (pop. 56,000). Chief ports are Mogador and Tangier, on the Atlantic; Tetuan and some smaller places on the Mediterranean. Taflet is the point of arrival and departure for the caravans through the Sahara. Ruled by a sultan, *Muley-Hassan (q.v.)*, usually styled "emperor" by Europeans. He is absolute, but the tribes beyond the mountains scarcely acknowledge his authority. The sultan is head of religion as well as of the state. He has six ministers, from whom he receives advice, and through whom he carries on the executive: Vizier, Ministers for Home and Foreign Affairs, Chief Chamberlain, Chief Treasurer, and Chief Administrator of Customs. Disciplined standing army 10,000 infantry, 400 cavalry, and some artillery; militia infantry 10,000, cavalry 10,000; irregular forces 40,000. Imperial revenue about £500,000 per annum. Imports ('88), £1,515,065; exports, £1,129,257. Trade chiefly with Great Britain, France, and Germany.—'91. Mr. W. B. Harris, a young Englishman, staying at Wazan, and a guest of the Sherifs, was attacked by Muley Thami, third son of the Great Sherif, on Christmas Eve. He was not seriously hurt, but on his appeal to the elder Sherifs, Muley Thami received one hundred and forty lashes, was put in irons, and sent to prison; the slaves who assisted him were also punished. Sir W. Kirby-Green, British minister, went on a special mission to the Sultan (Feb.), and as a result the Government agreed to pay £50,000 in settlement of the claims arising out of the murder of some persons connected with a British factory at Cape Juby in '89. In Sept. Captain Ingfield, on behalf of Queen Victoria, presented an elephant to the Sultan. In the interior fighting broke out (Nov.) between the Moorish Arabs and Kabyles. It was reported (7th) that a plot had been formed by Muley Ismail, the Sultan's favourite brother, to depose the Sultan and assume the throne. The plot, however, was discovered and defeated. (For relations of Morocco with Spain see SPAIN; and for Ministry see DIPLOMATIC.)

Morocco, Sultan of. See MULEY-HASSAN.

Morris, Lewis, author of the "Epic of Hades," "Songs of Two Worlds," "Gwen," "The Ode of Life," "Songs Unsung," etc., originally published anonymously as the productions of "A New Writer," was b. in Carmarthen. Graduated First Class in Classics at Jesus College, Oxford,

1855. Called to the bar '61, and ('80) served on the Committee of Inquiry into Intermediate and Higher Education in Wales. He succeeded the late Mr. W. Adam as vice-chairman of the political committee of the Reform Club. He unsuccessfully contested Pembroke as a Home Ruler in '86. Mr. M. (Jan. '88) received a silver medal from Her Majesty in recognition of his Jubilee Ode. His last book of poetry is entitled "A Vision of Saints."

Morris, Michael, Lord. Lord of Appeal in Ordinary, was b. 1827. Ed. at Trinity Coll., Dublin, becoming Senior Moderator and Gold Medalist '47; called to the Irish bar at the King's Inns, Dublin, '49, and became Q.C. in '63. Has held the offices of Solicitor-General and Attorney-General for Ireland, and represented Galway for a time in the House of Commons. Appointed a member of the Privy Council for Ireland in '66, and for England in '89. Chief Justice of the Common Pleas in Ireland, and afterwards became Lord Chief Justice of Ireland. Has taken a great interest in the progress of education in Ireland. Created a baronet in '85. Elevated to the House of Lords as "life peer" on his appointment as Lord of Appeal (Dec. '89).

Morris, William, artist and poet, was b. at Walthamstow in 1834, and ed. at Marlborough and Exeter Col. Oxford. Mr. M. turned his attention for some time to the study of architecture and in '68, together with his friends Dante G. Rossetti and Burne Jones, endeavoured to elevate the artistic taste of the public. For this purpose a business of "art fabrics," wall-papers, and stained glass, was started. Though undertaken rather as an artistic venture than as a business speculation, the concern has been extremely successful. Mr. M. published in '67 his poem "The Life and Death of Jason," which was followed in '68-70 by "The Earthly Paradise," a series of twenty-four romantic tales. His later works include "Love is Enough," "The Story of Sigurd the Volsung," and "Hopes and Fears for Art." He has recently translated the Odyssey of Homer, and in conjunction with Mr. Eirik Magnusson rendered into English verse a number of Icelandic Stories. Mr. W. M. is one of the leaders of the Socialist Movement in England. A book by him, entitled "The Glistening Plain," was published in '90, while in '91 there appeared "News from Nowhere." Spoke on "Pic-Raphaelite Painters" at Birmingham (Oct. 2nd).

Mortmain and Charitable Uses Act, '91
See SESSION, sect. 91.

Mount-Stephen, George, 1st Lord, was b. at Duftown, Scotland, in June 1829. Emigrated, in '50, to Canada, and became merchant in Montreal, amassing an immense fortune. In '78 he was chosen President of the Bank of Montreal. Having become interested in railways; was placed at the head of the company that constructed the Canadian Pacific Railway, and became first president of the road in '81. In '87, as a memorial of the Queen's jubilee, he and Sir Donald Smith gave £250,000 to found the Victoria Hospital at Montreal. Was created baronet in '86 for his public services in connection with the Canadian Pacific Railway. Received a Peerage (May '91).

Mozambique. A Portuguese possession on the east coast of Africa, nominally extending from Cape Delgado to Delagca Bay, over 1,200

miles, with area 382,683 sq. m., pop. 350,000. In reality the Portuguese only occupy a few points, to which their authority is limited. The chief of these settlements on the coast, mostly on islands, are Mozambique (the capital), Quillimane (at one of the entrances to the Zambesi), Sofala, Inhambane, and Lourenço Marques, in Delagoa Bay. Up the Zambesi 120 miles is Sena, of little importance; 200 miles up is Tete, and 500 miles up the stations of Zumbo and Chicova. This territory has been in Portuguese hands since 1497, yet nothing has been done by them to open up the country. Government and trade are in the most debased condition. A small military force, composed of convicts and natives, is little respected. The slave trade continues in spite of laws against it. The coast is unhealthy, but rich in products. Gold has been worked at some places inland. Recently a splendid harbour has been discovered—Nakala, in Fernao Veloso Bay. Some portions of the inland border are now being opened up by the Blantyre Mission of the Universities' African Missions. The Mozambique Company contracted with Mr. Van Laun, of London, to construct a railway between the Mozambique coast and the British sphere of influence in Manicaland.

Muley-Hassan, the reigning Sultan of Morocco, was b. 1831, and succeeded his father, the Sultan Sidi-Mohamed, September '73. The popular title by which his subjects recognise him is "Emir-al-Mumenn" (Prince of True Believers).

Müller, Frederick Max, was b. 1823. Ed. at Leipsic Univ., where he graduated ('43). Studied for some time in Paris, and ('46) came to England, where he found employment in collating MSS. at the East Indian Museum and at the Bodleian. Appointed ('50) Deputy Taylorian Professor, and ('54) Taylorian Professor at Oxford. First Professor of Comparative Philology in Oxford ('68), with which University he has been associated ever since. Professor Müller is one of the eight foreign members of the Institute of France, and is a Knight of the *Ordre pour le Mérite*. He is an honorary LL.D. of Edinburgh and Cambridge. Among his published works are "The Rig-Veda: Translation from the Sacred Books of the East," "The Religions of India," "A Survey of Languages," "Buddhism and Buddhist Pilgrims," "Lectures on the Science of Language," "Chips from a German Workshop," "Biographical Essays," "Biographies of Words and the Home of the Aryans," etc. Elected Gifford Lecturer on Natural Theology at Glasgow Univ. '89.

Murray, David, A.R.A., was b. 1849, and after commercial experience devoted himself especially to the painting of Scotch scenery, in which he excels. In '82 a picture of "Glen Sannox" attracted attention in the Academy. He is an associate of the Scottish Academy, and was elected A.R.A. in Jan. '91. He exhibited more than a hundred water-colour sketches at the Fine Art Society. A picture by Mr. M., entitled "My Love has gone a-Sailing," was purchased for the nation under the Chantry bequest. In the Royal Academy '91 his pictures were "Gorse" and "The Bridge."

Murray, David Christie, author and actor, was b. April 13th, 1847, at West Bromwich, where he was ed. Entering journalism, he

was connected with the *Birmingham Morning News*, the *Scotsman*, the *Daily News*, and the *World*. He was *Times* special correspondent through the Russo-Turkish war. "A Life's Atonement" was his first important novel, and was published in '79 in *Chambers' Journal*. Other books followed, including "Hearts," "The Way of the World," and "Wild Darrie," ('89), and "The Bishop's Bible" (in collaboration with Mr. H. Herman). Mr. Murray has recently returned from a tour in Australia, where he appeared on the stage.

Muscat. For Political Agent see DIPLOMATIC.

Museums. The last few years has witnessed a remarkable development of these institutions, while many additions to their number have been made. It is now recognised that they are not intended as mere receptacles for curiosities, or, as Prof. Flower has so aptly said, that their portals should bear the legend, "Kubbish may be shot here." On the contrary, they must be, if anything at all, educational in aim, and scientific in their arrangement, yet withal, appealing to the understanding of the people. Of London museums it is almost unnecessary to speak. Foremost stands our National Institution, with its great branch the new Natural History Museum at South Kensington, probably now the finest of its class in the world. South Kensington Museum, the Guildhall, Bethnal Green, the Sloane Museum, and others, also afford Londoners the highest educational and scientific advantages. At the universities are the Fitzwilliam Museum at Cambridge, the Ashmolean, and the new Pitt-Rivers Museum at Oxford, the latter a striking illustration of private munificence. Dublin and Edinburgh are similarly provided with first-class museums. The foregoing are examples of state-aided or specially endowed institutions, and necessarily occupy a different position to provincial rate supported museums; those attached to schools and colleges for teaching purposes; and museums belonging to local societies. The first named are becoming increasingly important, and many of them have very able curators. Some have a free library attached, and occasionally a recognised art gallery, as at Maidstone, and Nottingham. It is very probable that further legislation will shortly enable this class of institution to levy a higher rate than hitherto for maintenance. The latest addition to their number is at Hastings, where one is in course of formation. The Museums Association was founded for the advancement of museums generally, and for the promotion of intercourse between curators. The first annual meeting was held at Liverpool in '90. President, Rev. H. H. Higgins. This year the association met at Cambridge, under the presidency of Mr. J. W. Clark, M.A.

Museums and Gymnasiums Act, '91. See SESSION, sect. 92.

Museums, Sunday Opening of. See SESSION, sect. 42.

Music in '91. With scarcely an exception, each of our leading native composers contributed some new work to the record of the year, and in a few instances the interest evinced by the musical public was altogether uncommon. Particularly was this the case with Sir Arthur Sullivan's romantic opera "Ivanhoe," written for the inauguration of Mr. D'Oyly Carte's new

English Opera House in Cambridge Circus, and Professor Stanford's oratorio "Eden," specially composed for the Birmingham Triennial Festival in October; whilst as regards productions from foreign pens considerable attention was attracted to the Requiem introduced by Dvorak at the Birmingham meeting, and to Mascagni's powerful one-act opera "Cavalleria Rusticana," which, after an unchecked success of over eighteen months throughout Italy and in various other parts of the Continent, was made the chief feature of an autumn opera season by Signor Lago at the Shaftesbury Theatre in the middle of October. The year was also marked by a Handel Festival at the Crystal Palace, and by the recurrence of the Chester and Hereford (Three Choirs) gatherings. The first of these in order was that at Sydenham in June, when honour to the mighty Saxon was again fitly paid by the performance of "Messiah" on the Monday, and "Israel in Egypt" on the Friday, with a lengthy selection from oratorios, cantatas, operas, and instrumental compositions on the intervening Wednesday. This was according to a custom that could scarcely be improved upon, since it represented the many-sidedness of Handel's genius. A special feature of the Selection programme was a "Gloria Patri" for double choirs and double orchestra, composed in Rome in 1707, when Handel was in his twenty-third year, and probably never previously performed. Some portions of the Chandos anthem "O come, let us sing," were also fresh to the Crystal Palace. The executive force was of the wonted strength and completeness, and Mr. August Manns again warranted his appointment as conductor of such a vast assemblage. The attendance at this (the tenth) triennial festival did not equal the highest figures yet attained, namely, 87,734 in '83, but it reached the very respectable total of 80,796 for the three days and preliminary public rehearsal. Considering that a Handel celebration is now very far from "a new thing," such an issue was eminently satisfactory. The next musical festival was at Chester, where distinct success accompanied the performance of a new cantata called "Rudel," by Dr. Joseph Bridge, the organist of the cathedral. In September came the Hereford meeting, under the conductorship, for the first time, of Mr. Robertson Sinclair, who was appointed the cathedral organist on the death, in '89, of Dr. Langdon Colborne. The absolute novelties here were a motet by Dr. H. J. Edwards for Soprano solo, chorus and orchestra, entitled "Praise to the Holiest," the words from Cardinal Newman's "The Dream of Gerontius"; "A Song of Judgment," a sacred cantata by Dr. C. Harford Lloyd, so closely associated with the Three Choirs annual gathering; and Dr. Hubert Parry's setting of "De Profundis." The latter, written for twelve part chorus, orchestra and soprano solo, proved one of the most notable compositions dated this year. The massiveness and sublimity of effect, no less than the working skill exhibited in the simultaneous working of the three separate choirs, justified the designation of "the English Bach," being applied to a composer who during the past four years has made such rapid advance on the road to abiding fame. Noticeable revivals were Sir Arthur Sullivan's "Te Deum," Sir John Stainer's "St. Mary Magdalen," and Spohr's "Calvary." In more than one respect Mr. Sinclair showed a progressive spirit, and, favoured by splendid weather, the festival on

the banks of the Wye was even more successful than had been hoped for. The diminution of late years in the receipts of the Birmingham Festival, whether there was an abundance or a paucity of novelties, demonstrated the desirability of a change in the arrangements. It being thought that the autumn holiday-making proclivities of the present generation had a great deal to do with the matter, it was decided to postpone the festival from the last week in August, when it has been generally held, until the beginning of October. This proved a step in the right direction. The Town Hall was well filled at each of the eight performances. Besides the novelties by Stanford and Dvorak respectively above referred to, there was a new and elegant setting by Dr. A. C. Mackenzie of the "Veni, Creator Spiritus," as paraphrased by Dryden. "Eden" is in every way a remarkable work, original in design and execution. The poem by Mr. Robert Bridges, arranged in dramatic form, was issued separately some time before the performance. With its first act opening in "Heaven," and comprising the hymning of the new creation by the angels; with the second act devoted to the fierce maledictions and vain strivings of the fiends surrounding Satan in "Hell"; and with the illustration of the Fall in the "Garden of Eden," followed by Adam's vision of the various plagues afflicting earth as the penalty of his sin, and concluding with the promise of the advent of Christ, it afforded abundant scope for a composer resolved to cast aside the bonds of the conventional. A composition so unlike any other known oratorio—the nearest approach, perhaps, being M. Benoit's "Lucifer" heard at the Royal Albert Hall a few years back—could not but evoke considerable discussion. The difference of opinion concerning Professor Stanford's work did not extend to the Requiem Mass of Dvorak. Of this, high commendation was unanimous. The breadth, dignity and pathetic force contained in each section were as warmly recognised as the technical ingenuity and general structural merit, entitling it to a place beside the "Stabat Mater," by which the composer acquired his reputation. There can be no doubt that this "Requiem" is a noble addition to sacred musical art. Dvorak came to this country expressly to conduct the work he had specially written for Birmingham. The only other distinguished composer who honoured England with his company professionally was Signor Sgambati, who by invitation brought to the Philharmonic Society his "Sinfonia Epitafium." At the close of January musical attention was absorbed by Mr. D'Oyly Carte's production of Sir Arthur Sullivan's opera *Ivanhoe*. This was a rather curious experiment. It had been often said that the comparative apathy evinced by British lovers of opera towards works of the more elaborate and thoroughly modern school penned by their own countrymen was in part due to the inability or objection of most operatic organisations to present an important novelty a sufficient number of times to make the public conversant with its merits. In reply it was pleaded that as one party of vocalists could not be expected to endure the strain of singing the same arduous characters night after night, frequent changes of programme were compulsory. Determined to give Sir Arthur Sullivan's first serious opera (the book by Mr. Julian Sturgis) every chance, Mr. D'Oyly Carte hit upon the plan of

doubling and in a few instances trebling the cast of principals, so that all the more hard-worked singers could obtain the prescribed rest. By this means the opera, magnificently mounted, could be played every evening, and the supporters of English lyric art be afforded time for accurately gauging the quality of the composition. The three companies were introduced at the first three representations, and the scheme of alternation was found to work extremely well. Although to many who had hitherto known Sullivan simply in connection with delightfully comic operas at the Savoy, and with platform ballads, it seemed strange that his pen should produce dramatic music of a vigorous and occasionally stern description, "*Ivanhoe*" was universally accepted as an able work warranting the hope that further efforts of a like order might diversify the composer's popular essays in another vein. Before the season terminated it had attained over a hundred and fifty consecutive performances—a circumstance unequalled in the history of English opera of the grand type. "*Ivanhoe*," it may be added, brought into favour several vocalists hitherto but little known. Among these were Mr. Eugene Udin (the Sir Brian), Mr. Norman Salmon (King Richard), and Mr. Avon Saxon (the burly Friar Tuck, whose song, "Ho! jolly Jenkin," and musical dialogue with the Black Knight in the forest, so vividly recalled the bright humour of the Savoy productions). Mr. D'Oyly Carte's announcement that he hoped this work would virtually prove the foundation of a national opera worthy of the name was widely endorsed, but as our supply of composers is hardly extensive enough just at present to meet the managerial demand for operas of the calibre of "*Ivanhoe*," resort to the Continent is still necessary. This was the explanation of Mr. D'Oyly Carte securing an English version of M. André Messager's "*La Basoche*" successfully produced at the re-opening of the house in Nov. Of foreign opera Sir Augustus Harris enjoyed a monopoly until the autumn. Having an exceedingly numerous force of distinguished vocalists at his command, he entered in April at Covent Garden upon a season of no less than sixteen weeks. There were ninety-four representations in all of twenty operas, most of which required great scenic preparation. The "bright particular stars" among the better known artists were Mesdames Albani, Melba and De Lussan, the Brothers De Reszke, and MM. Lassalle, Maurel and Ravelli. The Sisters Ravogli, who in Signor Lago's autumn season in '90 had given new life to Gluck's *Orfeo*, joined Sir Augustus Harris, and opened the season with this work. A notable success was achieved by M. Van Dyck, a Dutch tenor who had acquitted himself most satisfactorily at the Wagnerian performances at Bayreuth. Here he made a host of friends in Massenet's *Manon* and in *Faust*, the only operas in which it was practicable for him to sing during his short stay here. Miss Eames, an American soprano, who had high credentials from Paris, was also well received here, and particularly distinguished herself as Margherita and as the heroine of Gounod's unjustly neglected *Mireille*. Another addition to Sir Augustus Harris' repertoire was *Tannhäuser*, with Madame Albani, Signor Perotti and M. Maurel as the three principals. The famous French baritone, by the way, had several opportunities during the season of

illustrating his theory of voice-colour, previously expounded in a lecture at the Lyceum Theatre, by playing such contrasted parts as Rigoletto, Wolfram, Federico di Telramondo, Germont père, Di-Nevers and Iago. Besides repeating such approved assumptions as Juliet and Lucia, Madame Melba redeemed a promise made the preceding year by appearing in the secondary part of Michaela in "*Carmen*" to the wicked gipsy of Mlle. Zélie de Lussan, the Don José of M. Jean de Reszke, and the Escamillo of M. Lassalle—together a cast unexampled for attractiveness, and in which the services of the Australian *prima donna* were thoroughly appreciated. The special event of the season, however, was the production of Verdi's "*Otello*" with M. Jean de Reszke as the Moor, Madame Albanias Desdemona, and M. Maurel (as already stated) in his original character of the treacherous Ancient. Interest was augmented by some postponements in consequence of the indisposition of the celebrated Polish tenor, who in undertaking a character hitherto identified in this country (at the Lyceum in '89) with Tamagno, was of course anxious to appear at his best. The performance, whether lyrically or dramatically, was not a whit disappointing. Towards the close of the season "*La Luce dell Asia*," a new cantata transformed into an opera, by Mr. Isidore de Lara, was announced, but circumstances arose to compel postponement. The presence of the German Emperor in London was made the occasion for a State performance at the Opera, when a splendid spectacle was presented before the curtain by the brilliant uniforms, the numerous gathering of Imperial and Royal personages in the huge central box, and the extraordinary decorative display of flowers. The programme consisted of the first act of "*Lohengrin*," scenes from "*Romeo et Juliette*" and "*Orfeo*," and the third act of "*Les Huguenots*." For political reasons, none of the eminent French artists in the company took part in this gala representation. The Emperor also attended a concert at the Royal Albert Hall, at which a miscellaneous selection had as pendant the principal scenes from Sir Arthur Sullivan's "*The Golden Legend*." For the operatic performances in Oct. and Nov., Sir A. Harris had for mainstay several of the famed artists of the Parisian Opera Comique, with M. Leon Jehin as conductor. With this assistance he was enabled to present for the first time in this country Gounod's *Philemon et Baucis* and M. Bruneau's *Le Rêve*, both of course in French. The votaries of light comic opera were furnished during the year at the Prince of Wales's with Mr. De Koven's "*Maid Marian*," destined to give way to the musical dumb-show play "*L'Enfant Prodigue*"; at the Criterion with "*Miss Decima*," a version of the notorious "*Miss Helyett*" with M. Audran's pretty music; and at the Savoy with Mr. Edward Solomon's "*The Nautch Girl*." The latter, which was the first important work produced at Mr. D'Oyly Carte's Strand establishment without the signature "Gilbert and Sullivan," was eventually preceded by an amusing little piece called "*Captain Billy*," music by Mr. François Cellier. At the Lyric in October the deserving "*La Cigale*" celebrated its birthday. The students of the Royal Academy of Music gave an excellent performance of Gounod's "*The Mock Doctor*," which was also taken in hand by a company

headed by Mr. Richard Temple. The Saturday afternoon concerts at the **Crystal Palace** were again noticeable for the unsurpassed efficiency of the performances under the baton of Mr. Manns, and for the abundant evidences of the resolve to keep abreast of the time. Besides Signor Spambati's work before mentioned, the veteran **Philharmonic Society** included in the performances of the season Mr. Charles E. Stephens' Symphony in G minor, and Dr. Mackenzie conducted his effective music composed for the play "**Havenswood**" at the Lyceum. The **Royal Choral Society** with old and modern oratorios; the **Symphony Concerts** conducted by Mr. Henschel; the Monday and Saturday **Popular Concerts** with the choicest of chamber compositions; the **Handel Society**; **Sir Charles Hallé's** Concerts, the **Sarasate** and **Albeniz** Concerts; the **Wind Instrument Chamber Music Society**, and the leading amateur associations also sustained their prestige. The custom of offering oratorios during the Lenten season was revived by Sir Augustus Harris, who in this way several nights turned Covent Garden Theatre to good account. Promenade concerts were held here in the early autumn for a few weeks. The **Richter Concerts** at St. James's Hall as usual relied mainly upon Wagner and Beethoven, but room was found for a few novelties, conspicuous among which was a stirring setting by Professor Stanford for choir and orchestra of Campbell's poem, "**The Battle of the Baltic**," the favourable verdict passed upon which was soon after endorsed at the Hereford Festival. The **Bach Choir** produced a new Mass by Mr. A. Somervell without forfeiting its pretensions to judgment and earnestness. The more interesting miscellaneous

events of the year included farewell of the public platform by **Mr. Sims Reeves** (in May at the Royal Albert Hall) after a brilliant career extending over half a century, the event being productive of much sympathy and countless testimonies of respect; the reappearance of **Mr. Santley** and **Madame Patey** after their respective lengthy tours in far-distant climes; the **Tonic Sol-fa** Jubilee gatherings; a performance of **Messiah** in Westminster Abbey in Nov. in aid of the Royal Society of Musicians; the celebrations at home and abroad of the centenary of **Mozart's** death; the representations of "**Tannhäuser**" at Bayreuth; and the performances in Paris, after preliminary threatenings that came to naught, of Wagner's "**Lohengrin**."

Mutsu Hito, the present Mikado (or Emperor) of Japan, was b. 1852. Ascended the throne in '67. His reign has been marked by great reforms, prompted by a liberal spirit, resulting in abolishing entirely the feudal system which has impeded the general progress of the country. Under the rule of the present Mikado, Japan has entered into an unprecedented era of prosperity. Civilisation has made rapid progress, and the introduction of Western arts and ideas has secured for Japan a foremost place amongst the Asiatic nations. He has recently given the Japanese a parliamentary constitution based on European principles. See JAPAN.

Mysore. For Resident, see DIPLOMATIC.

N

Naples Elevated Railway. In June '91 it was reported that the "highest" elevated railway was to be built at Naples, to connect the central part of the city with the high ground. In some places the railway will rest on towers 128 feet high, fitted with elevators. M. Adolfo Aveno is the engineer, and the estimated cost £250,000. The trains will be run by electricity, generated by a waterfall on the river Serreno.

Napoleon Victor, son of Prince Napoleon and Princess Clotilde, was b. 1862. When his father, after the death of the Prince Imperial in '79, took the position of head of the house of Bonaparte, the claim was disputed by M. Paul de Cassagnac and several other Imperialists, who put forward the young Prince Victor as his father's rival. But this move was not encouraged by the son, though the latter, it is understood, was nominated in the Prince Imperial's will as his successor. When the Expulsion Bill of '86 became law, the Prince and his father were exiled from France.

Nasr-ed-Din, Shah of Persia, son of the late Mehemet Shah, was b. 1829. He ascended the throne in '48. At the age of fourteen he was made Governor of Azerbeidjin. On his accession he was for some time guided by the counsels of the Ameer, Mirza Taghi, who was appointed Grand Vizier. The Ameer, being a man of great ability and energy, instituted

many reforms, and was rewarded for his eminent services with the hand of the Shah's sister in marriage. The jealousy of courtiers, however, subsequently influenced the Shah's mind against the Grand Vizier, who was banished and, according to some accounts, murdered. The Shah's position, owing to the rival claims of England and Russia for influence at his court, and for commercial intercourse with his subjects, is not an easy one. He has shown his desire to cultivate closer relationships with England by the commercial concessions he granted last year in a convention obtained through the influence of Sir Henry Drummond Wolff. The Shah made a tour of Europe in '73, and again in '89, when he was favourably received in England and elsewhere.

Natal. A British colony on the south-east coast of Africa, discovered by Vasco de Gama on Christmas Day 1497, and hence named *Terra Natalis*. Sea-board extends from the Umfama river on S., to the Tugela on N., a distance of 170 miles. Zululand borders the colony on the N.E., Transvaal on N., Orange Free State and Basutoland on W., Transkeian Territories on S.W. Area 24,000 sq. m.; pop. 477,100. Capital Pietermaritzburg, pop. 15,767; the only port is D'Urban. Other centres inland are Verulam, Isipingo, Richmond, Ladysmith, etc. The colony is divided into

fourteen districts. The colony has representative government. There is a Governor, an Executive Council of officials, and a Legislative Council of thirty members, of whom seven are nominated by the Governor and the remainder elected by property-holders in the boroughs and counties. Religion well provided for by denominational bodies, but no State aid. There are 13 Government schools, 30 aided, besides others, and 85 native and Indian schools. There is a force of 179 mounted police and 1,285 volunteers. Revenue, June 30th, '91, £1,112,372; expenditure, £1,026,984; exports, £1,315,625; imports, £3,602,809.—'91 The Legislative Council (Feb. 10th) passed a Bill for giving the Colony responsible government, with a single Chamber of 17 elected members, and a Cabinet of six, the seats to be redistributed on the basis of population. See ZULULAND, SWAZILAND, TRANSVAAL, etc.; and for Executive Council, etc., see DIPLOMATIC.

National Association for the Advancement of Art, and its Application to Industry. Was founded for the purpose of holding of Art Congresses in the principal manufacturing towns of the kingdom to discuss problems of a practical nature connected with the welfare of the Arts, Fine and Applied. Bears the same relation to Art that the British Association (*q.v.*) bears to Science. The first Congress was held at Liverpool Dec. '88, the second at Edinburgh Oct. 27th to Nov. 1st, '89, the third at Birmingham, Nov. 4th to 8th, '90. Hon. Sec., Lionel Cust. Office, 22, Albemarle St., W.

National Footpath Preservation Society. This was formed Sept. 30th, 1884, for the "preservation of ancient foot and bridle paths, and all other rights of way by land and water, fishing, vacant spaces, as village greens, roadside slips of land, etc." Branch societies have been formed at Henley, Kendal, Lancaster, Ackworth, Keswick, Carlisle, Cardiff, Leicester, Bristol, Wirral District, Goddington, Whitby, Northampton, Scarborough, and elsewhere. The Society publishes a lengthy list of Vice-Presidents, the Duke of Westminster being Patron, and Lord Ribblesdale the President. The subscription is 5s. a year, but a 10s. *ad.* subscription entitles the member to legal advice gratis. Complaints may be addressed either to the local Footpath Society or to the Sec. and Surveyor, Mr. Henry Allnutt, 42, Essex St., Strand, W.C.

National Gallery. (For earlier history see ed. '88.) The present trustees of the Gallery, in the order of their nomination, are:—Sir Henry Layard, Sir William H. Gregory, Lord Northbourne, Viscount Hardinge, the Right Hon. Lord Savile, G.C.B., and the Earl of Carlisle. The Director is Sir F. W. Burton; the Keeper and Secretary is Mr. Charles L. Eastlake; the Clerk being Mr. George E. Ambrose. The abolition of the autumnal recess, during which the Gallery was formerly closed for six weeks; the extended hours for keeping the collection open to the inspection of visitors; and the annual grant by means of which the contents of the library have been supplemented, are all recent measures which indicate that the trustees and director are keeping pace with the times. What was for a long time urgently needed—viz., a new edition of the official catalogue—was published in '89, after enlargement and revision. The National Gallery, as may be supposed, contains by far the best examples of the English school of painting to be found,

comprising as it does the masterpieces of Turner, Reynolds, Landseer, Gainsborough, Wilkie, Romney, Constable, Herring, Callcott, Etty, and others. On the other hand, the foreign masters are well represented, the paintings including works of Raphael, Rembrandt, Vandyck, Rubens, Cuyt, Teniers, Correggio, Titian, Holbein, Velasquez, Murillo, and others. Among the additions during '90 were "The Ambassadors," by Holbein; "Portrait of the Spanish Admiral Pulido-Pareja," by Velasquez, and the "Portrait of an Italian Nobleman," by Moroni, which were purchased from the Longford Castle Collection for a sum of £55,000, of which sum the Government provided £25,000, and Lord Rothschild, Lord Iveagh, and Mr. Charles Cotes each contributed £10,000. "The Origin of the Milky Way," by Tintoretto, and "Unfaithfulness," by Paul Veronese, were purchased from the Earl of Darnley. The "Ecce Homo," ascribed to Giovanni Bellini, was purchased from the Perkins Collection. The total number of pictures purchased was thirteen, at a cost of £58,740 5s. A portrait of Miss Caroline Fry (afterwards Mrs. William Wilson), by Sir Thomas Lawrence, was bequeathed to the Gallery by Mr. William Wilson; the "Portrait of Girolamo Savonarola," by a painter of the Florentine School, was presented by Dr. William Rudford, and the "Portrait of a Man" by Juan Bautista del Maza Martinez, was presented by Mr. C. H. Crompton-Roberts. The Gallery was visited during the year by 539,960 persons on the public days, showing a daily average on such days (208 in number) of 2,595; on students' days, 41,202 persons were admitted, paying fees amounting to £1,045 1s., which shows an increase on the sum—£994 11s.—received in '89. The total number of students' attendances was 24,300; 1,170 oil-colour copies of pictures were made, 558 from the works of 95 old masters, and 612 from the works of 44 modern painters. The Gallery is open to the public on Mondays, Tuesdays, Wednesdays, and Saturdays, and on payment of a fee of sixpence on the students' days, Thursday and Friday. Much information, compiled independently of the National Gallery Authorities, may be found in Mr. E. T. Cook's "Guide to the National Gallery," and also in "The National Gallery," *Pall Mall Gazette Extra*, while official details appear in an *Annual Report* issued by the director.

National Liberal Federation, The. (For history see ed. '88.) The headquarters of the Federation are at 42, Parliament Street, Westminster, S.W. President, Mr. Robt. Spence Watson, LL.D.; Sec., Mr. F. Schnadhorst; Asst. Sec., Mr. Robt. A. Hudson.

National Pensions. See STATE PENSIONS.

National Society for the Prevention of Cruelty to Children has for its object the prevention of the cruel treatment, wrongful neglect, or improper employment of children, also all conduct by which life or limb or health is wrongfully endangered or sacrificed, or by which morals are imperilled or depraved. These objects are sought to be secured by (1) remonstrance and moral suasion; (2) enforcement of existing laws; (3) promotion of any amendment of the law that may be necessary or desirable. Hon. Director, Rev. Benj. Waugh. Organ, *The Child's Guardian*; Editor, Rev. B. Waugh. Central Office (where a shelter

for children is provided), 7, Harpur Street, Bloomsbury, W.C.

National Union of Teachers, The, founded 1870.—**Objects:** (1) promoting the spread of education; (2) bringing practical knowledge to bear on educational legislation; (3) uniting the teachers of public elementary schools in a strong professional organisation; and (4) watching the interests and advancing the welfare of teachers. The Union includes local associations and district unions, consisting of not less than three local associations, whose object is to guide public opinion in various ways. **Conferences** are held at Easter. There are now more than 360 local associations in England and Wales with over 16,000 members. There are a **Provident Society, Benevolent Fund and Orphanages** in connection with the Union.

Sec., T. F. Heller, Office, 71, Russell Square, W.C.
Naval Manœuvres, British, '91 (for 1887, 1888, '89, and '90, per eds. '90 and '91). Before proceeding to describe the manœuvres of '91 and their result, it should be pointed out that it is by no means necessary that mobilisation should always be followed by these operations.

Mobilisation may be considered a short title for the arrangements made for putting the Navy on a war footing, and for giving it the needed expansion to fulfil its additional duties in face of an emergency. **Manœuvres** are for testing *material* and training *personnel*. A trial mobilisation may be, and is frequently, made without moving a man or commissioning a ship. Once a year, however, it has now become usual to hoist the pennant in a certain number of extra ships, that the manœuvres may be carried out on a large scale, and that flag officers may have an opportunity of handling fleets such as they might be called on to command in time of war. This mobilisation is of a partial nature, and, as a rule, is merely such a step as might be taken at any time when hostilities threatened. It is effected by placing the men in the training establishments, and the officers who are on half pay or harbour vessels, on board those ships in the dockyards which are immediately ready for sea. Naturally the time for this partial mobilisation is made to synchronise as nearly as possible with the date at which the classes for instruction close, so that the studies of officers and men in gunnery and torpedo work may be interfered with as little as needs be. It is thus a matter of common knowledge when the operation is likely to take place, and there is no secrecy about it, such as there should be about the usual tests for mobilisation, if they are to be of practical value. For two years obstacles of a diplomatic nature have prevented the manœuvres being carried out as early as they should be, but this year nothing interfered, and the partial mobilisation took place on July 8th, a week after the classes ended, and the men became available. Reports had been current that a scarcity of men existed, but these were shown to have little foundation, for no difficulty occurred in manning 76 ships, or only two less than in the previous year. In '90 the number of battle-ships was 18; in '91, 20; cruisers, 24–21; gun-vessels and gun-boats, 6–11; coast defence ships, 5–0; miscellaneous vessels, 3–4; and torpedo boats, 22–20. In addition to the vessels specially commissioned for the manœuvres, there were also several which had hoisted the pennant as reliefs for ships on foreign stations, and these were temporarily detained at home to take part in the

operations. An entirely new departure was made in '91 in the *scheme of operations*. Hitherto the ships have been divided into two strong squadrons, which have been opposed to one another; but on this occasion three distinct sets of manœuvres were carried out by four separate squadrons. The principal of these were supposed to have a tactical character, and consisted of a series of exercises performed by two independent fleets, one of which assembled in the Downs and operated in the North Sea; the other met at Portland and exercised in the Atlantic. The secondary manœuvres consisted of operations in the St. George's Channel, and were undertaken by two small squadrons opposed to one another, one of them comprising a strong flotilla of torpedo boats. Before the manœuvres proper took place each fleet and squadron made an introductory cruise, so that the instructive evolutions of fleet anchoring and getting under way could be practised. After the manœuvres a period was devoted to target practice, and special orders were given that this target practice in mobilised and newly commissioned ships was only to be carried out when the guns' crews had grown accustomed to their work, practice from aiming rifles fitted to the guns being carried out previously, so as to insure a careful performance. An attempt was made to ascertain what arrangements could be made at the home ports at short notice for the landing—after a general action with the enemy—of a considerable number of wounded requiring hospital treatment. Instructions were issued to the captain of each vessel, as he returned to port after the operations, to communicate by telegraph to the Commander-in-Chief the aggregate number of assumed wounded he had on board requiring hospital treatment. And suitable means of conveyance for the transport of the assumed wounded men from the ships to the hospital was provided, reports of the steps taken being sent to the Admiralty. The objects of the tactical manœuvres were as follows: Enemy's fleets were supposed to be coming from the Baltic and the Bay of Biscay, and the Northern and Western British fleets respectively were supposed to be about to engage them, with a view to ascertaining (1) the best organisation in which to engage a hostile fleet, taking into consideration the mixed nature of the opposed force; (2) the grouping of a fleet, in order that the weak points of one ship might be counterbalanced by the disposition of others; (3) the most advantageous position for the admiral's ship; (4) the position of the smaller vessels, scouts, look-out and converging vessels with regard to the main body of the fleet; and (5) distant signalling. In order that these points might be practically tested, the officers in command were instructed to detach vessels from their fleet to represent an enemy's cruisers, the scouts of the hostile fleet. These vessels were to endeavour to ascertain the position of the British fleet without being themselves discovered. Further, the fleets were to be subdivided, that parts might represent the hostile squadrons, and then to pass one another in different formations at a high rate of speed, opening fire on one another with blank charges as they passed, so as to give an idea of a fleet action. As will be seen from the story of the operations, various causes interfered to lessen the value of these manœuvres; but that results of some importance will be obtained from the

reports of the various officers can scarcely be questioned. In the St. George's Channel the object of the minor set of manœuvres was to ascertain (1) what form the tactics of torpedo boats should assume in endeavouring to harass an enemy by surprising his ships when insufficiently protected in port or at sea, by raiding signal stations and by destroying railway lines; (2) what is the most advantageous method of employing small speedy cruisers to prevent torpedo boats operating for this purpose, and as a protection to larger ships of war when cruising off a hostile coast. Before the operations commenced the Admiralty issued a circular to the press, in which it was stated that, as to those taking place in the North Sea and Atlantic, they would possess no interest for the general public, and so it was presumed that no newspaper would wish to be represented at them; while, as regards those taking place in the St. George's Channel, there was no accommodation for correspondents on board the ships engaged. An exception, however, was made in the case of the *Times*, and when this was discovered the other London dailies and many of the provincial papers practically boycotted the manœuvres altogether, and as a result but little interest was taken in the operations by the general public. In this respect a great contrast was offered to the state of things existing in previous years. The northern fleet, which began to assemble in the Downs on July 8th, left its anchorage there on the 15th to proceed on the preliminary cruise. The composition of this fleet is noteworthy. It contained an unusual proportion of first class battle-ships of the latest types, and of fast cruisers, and was rendered exceptionally powerful by its homogeneity and the uniformity of speed and coal endurance of its constituted parts. Hitherto the squadrons brought together for these manœuvres have been of such a miscellaneous character, and the ships—in speed, turning power, range of guns, and other particulars—of such varied standards, as to be quite incapable of advantageously manœuvring together. This northern fleet was thus rendered formidable to a degree which has never been surpassed on any previous occasions by an assemblage of the sea forces of a single power. Aldeburgh, Cromer, Scarborough, Tynemouth, St. Andrew's Bay, were visited, the fleet evolutions of an ordinary character being carried out during the daytime at ten-knot speed, and the anchors dropped every night. On the 21st the fleet arrived at Queensferry, and the operation of coaling was at once proceeded with. On the 25th the fleet put to sea, and took a N.E. course until the latitude of the Shetland Islands was reached. Sunday, the 26th, was spent quietly, the main body of the fleet being kept together; but the cruisers scouted at extreme signalling distance. On the 27th the morning was spent at target practice with "tube cannon," the big guns being pointed and laid for the floating targets; but rifle bullets only were fired. At midday the course was altered to the southward, and during the afternoon the battle-ships exercised at fleet evolutions, chiefly in subdivisional formation, the smaller vessels keeping within the lines of the larger vessels as if for protection. The same evening the *Pallas* and *Mersey* were ordered to part company, and to steer a prescribed course until a given time; afterwards they were to try and discover the whereabouts

of the main fleet. On the 28th bad weather prevailed; but there were more evolutions, which, however, had to be suspended as a gale came on. The rough weather afforded an opportunity for observing the behaviour of the ships. The *Times* correspondent reported that the "admirals" could not have fought their forward guns; that the *Hero* and *Conqueror* rolled so heavily as to expose their sides below the armoured belt; the *Sans Pareil* and *Nile*, were comparatively steady, but the low freeboard of all the battle-ships allowed the sea to sweep their upper decks. Of the cruisers, the *Immortalité* was very steady; but the *Latona* rolled, and the *Iris* pitched considerably. On the 29th, the sea having abated, the fleet was divided into two squadrons, and engaged in a series of encounters as hostile fleets. Four encounters took place; in the first both divisions attacked in single column line ahead; in the second the British formed an indented line, the hostile squadron still being in line ahead; in the third instance the British again formed line ahead, the hostile squadron forming in quarter-line to starboard; and in the fourth and final charge the British engaged in two groups in quarter-line formation, while the hostile fleet assumed that of the indented line. As the ships passed and re-passed one another guns were kept aimed on the opposing vessels, and the officers were ordered to steer their vessels from the conning towers. Lessons in the higher branch of tactical movements that is to say, the most advantageous formations, in which to engage an enemy, are reported to have been obtained from this afternoon's work; but eminent professional authorities who were present have expressed grave doubts about its usefulness for this purpose. The *Mersey* and *Pallas* rejoined the fleet apparently without having fulfilled the object for which they separated. On the 30th, at noon, the original scheme of operations was changed, orders being received from the Admiralty for the fleet to proceed to the Downs, an enemy's fleet having, it was assumed, entered the English Channel. A full-speed run of rather over than under 13 knots was at once commenced from about the vicinity of the Humber to the North Foreland, which latter point was sighted on the 31st at 7 a.m. This run demonstrated the ability of the northern fleet to manœuvre at from 12 to 13 knots; but the torpedo gun-boats could only maintain the speed of the squadron with difficulty. From this time until Aug. 4th, when the fleet dispersed, the manœuvres assumed a character which, in the opinion of an acute and experienced observer, was "neither novel, instructive, nor interesting." The same critic sums up the cruise of the northern squadron thus: "If the Admiralty had resolved to discredit the whole system of manœuvres, and to exhibit it to the country in a light so palpably ridiculous as to make all such manœuvres impossible for the future, a plain man might think that it had adapted its means to the end with quite admirable ingenuity." The cruise of the western division commenced on July 24th, when the fleet left Portland. Tactics under steam, target practice, and exercises in mooring and weighing were carried out until the 26th, when Berehaven was reached. Of the appearance of the fleet an officer on board one of the ships writes: "We look like a small edition of the Seppings Gallery at the Naval Exhibition, and

as little homogeneous as a fleet well could be." The division, after coaling, put to sea on the 23rd, and two vessels, the *Narrissus* and *Barham*, were then detached to cruise in the vicinity of Ushant until the 28th, when they were supposed to represent the scouts of an enemy, and were to endeavour to discover the whereabouts and strength of the British fleet without being themselves discovered. Various manoeuvres and exercises, similar to those of the northern division, were carried out in the meanwhile, until, on the afternoon of the 24th, the *Forth*, one of the look-out vessels of the British Fleet, sighted the hostile cruisers. The signals of the *Forth* brought the *Blonde* and *Superb* to her assistance. An engagement and chase at full speed ensued, which served to exhibit the steaming qualities of the cruisers, the *Barham* distancing her competitors with 22 knots, while the others were doing about 21. Fleet manoeuvres, gun and torpedo practices, completed the operations, which ceased upon the western division arriving at Torbay on Aug. 1st. The operations in the St. George's Channel were more interesting, if not more instructive, than those of the larger squadrons. The Blue Squadron, including the flotilla of torpedo boats, assembled at Queenstown on July 14th, and on the 16th left to take up assigned positions on the east coast of Ireland. By the 20th the squadron was stationed as follows: At Carrickfergus, the *Hector* and 4 torpedo boats; at Carlingford, the *Magnet* and 4 boats; at Kingstown, the *Bellisle* and 3 boats; at Wicklow, the *Traveller* and 3 boats; at Wexford, the *Hearty* and 3 boats; at Waterford, the *Curlew* and 4 boats. The Red Squadron, which had assembled at Torbay, left that anchorage on the 16th, arriving next day at Milford Haven, which was to be their headquarters. After coaling the squadron proceeded down the Haven, and anchored in Dale Bay. On the 22nd war was declared at noon, and the Red cruisers put to sea, the battle-ships remaining at anchor with nets out. During the evening the cruisers sighted some of the Blue torpedo boats, and chased them to Bardsey Island, claiming to have put 2 out of action. Early the following morning (23rd) the *Rattlesnake* claimed to have put No. 65 boat out of action, and the *Skippuck* registered a claim against two other boats. At 6 a.m. the Red Squadron proceeded to sea, and at daylight next morning (24th) attacked the *Bellisle* and her small craft at Kingstown; the engagement lasted four hours, when the defending force was declared to have been destroyed. On the Red Squadron putting to sea the *Gossamer* rejoined, and reported that 9 torpedo boats had been seen off St. Anne's Head on the night of the 23rd, of which she claimed to have captured 3 soon after noon on the 24th. On the same night, as the Red Squadron were proceeding northwards, torpedo boats No. 74, 75, and 67 attacked the Squadron and the first-named torpedoed the *Northampton*. It was claimed, however, for the ironclad that she destroyed her antagonist before the missile was discharged. On the morning of the 25th Captain Long attempted to repeat his offensive operations at Belfast, but found the enemy too well protected by a mine field and other defences; his squadron thereupon proceeded to Luce Bay, and there anchored, putting nets round the ships, and taking other precautions. In this anchorage the squadron was twice

attacked by torpedo boats; but, owing to the missiles failing to run, the Reds claim to have destroyed the boats before they did any damage. The squadron left Luce Bay on the morning of the 29th, and in the course of the following night was twice attacked, and the *Northampton* again torpedoed. On the morning of the 28th the torpedo boat shelter at Wicklow was theoretically destroyed, in a similar manner to that at Kingstown. On the 29th the Red Squadron re-anchored in Dale Roads, and prepared for an attack which was delivered at 1.30 a.m. on the 30th and failed. War terminated at noon the same day. The torpedo boats which chiefly distinguished themselves seem to have been Nos. 45, 74, 25, and 83; but all were handled with great skill and ability. The operations do not appear to have taught many new lessons, but they have given added emphasis to many which were only half learnt. It may easily be that, owing to the action of the Admiralty in the matter of press representation, a great mistake will be made. The only correspondent afloat accompanied the Red Squadron, and from his point of view is inclined to minimise the importance of the torpedo. It is probable, however, that if correspondents had been present on the other side, another tale would have been told. In any case it will be unwise to underrate the power of these engines of naval warfare. It is probable that armoured casemates are safer from the attack of torpedo boats when at sea, although in harbour nets, booms, submarine mines, and shore batteries seem to give added protection. Nets, however, are clumsy contrivances, mines of little use as a deterrent to torpedo boats, and the heavy guns of land defences no great protection. At sea plenty of small speedy cruisers, and in port swarms of guard-boats in addition to these, form the best defence against torpedo boat attack; search lights, if low down and fixed, are also of value. But, above all, ceaseless vigilance on the part of the defenders is essential, and the continual watchfulness and anxiety must bring such a heavy strain upon the physical and mental powers of officers and men, that it must needs be taken largely into account. The offensive tactics undertaken by Captain Long with the Red ships cannot be too highly commended. Although a great improvement is reported in the torpedoes, a number of defects were made apparent in ships and boats during the exercises. Two of the cruisers developed defects in their condensers, four out of six of the new torpedo gun-boats broke down, and several torpedo boats came to grief. On the whole, however, casualties were not so numerous as in previous years. In the torpedo boat attacks the difficulty of distinguishing friend from foe was again made manifest. Moreover, the rules were so obviously favourable to the ships, as to largely lessen the value of the operations for instructional purposes.

Navy, The British. (For concise history of Navy from early times to end of French war see ed. '87; for continuation of history and modern progress see eds. '88, '89, '90 and '91.) The total cost of the Navy for the financial year '91-92 is estimated at £14,215,100, showing an apparent increase of £428,500 over the estimated cost for '90-91. This increase is associated with an increase of duties, the custody of Naval Ordnance Stores having been transferred from the War Office to the Admiralty. The net

increase to the Navy votes is actually £358,500. The various heads of expenditure are:—

Effective Services:—

A. No. of officers, seamen, boys, coastguard and royal marine . . .	71,000
1. Wages, etc., of above . . .	£3,404,000
2. Victualling and clothing . . .	1,145,800
3. Medical establishments and services . . .	122,700
4. Martial law . . .	11,700
5. Educational service . . .	75,500
6. Scientific services . . .	61,300
7. Royal Naval Reserves . . .	153,100
8. Shipbuilding, repairs, maintenance, etc.:—	
Section 1. Personnel . . .	1,751,800
" 2. Material . . .	1,862,700
" 3. Contract work . . .	1,260,800
9. Naval armaments . . .	1,528,700
10. Works, Buildings, and their repairs, at home and abroad . . .	417,000
11. Miscellaneous effective services . . .	140,400
12. Admiralty Office . . .	221,100
Total . . .	£12,157,200

Non-Effective Services.—

13. Half-pay, reserved and retired pay . . .	779,200
14. Naval and Marine pensions and compassionate allowances . . .	924,700
15. Civil pensions and gratuities . . .	310,200
Total . . .	2,023,100
16. Additional naval force for service in Australasian waters . . .	34,800
Grand Total . . .	£14,215,100

The number of officers, seamen, etc., borne is increased by 3,000, and therefore vote 1, wages, has been augmented, the additional ratings consisting largely of the mechanic class, which is highly paid. The victualling vote is also increased owing to the same cause. An advance has been made in the wages of dockyard workmen, which causes an increase of £78,000. On the other hand, an increased appropriation is anticipated from the Indian Government in aid of naval funds for work done in Indian waters. The full subsidy payable by the Australasian colonies, £126,000, has become due owing to the vessels for the additional naval force in their waters having been completed. The amount expended upon new construction in '90-91 is estimated at £3,140,938 on the dockyard programme, and £3,512,804 on the contract programme. In '91-92 the expenditure is estimated at £3,879,119 for the former and £3,547,733 for the latter. If these estimates should be realised, the total outlay up to March 31st, '92, on the vessels building under the Naval Defence Act, and in the completion of those in hand prior to April 1st, '89, will amount to £9,585,168 on dockyard and £7,930,751 on the contract vessels. The estimated amount to be expended in new construction for the year '91-92, to maintain the fleet at its standard of strength, as on April 1st, '91, is £2,033,703. The principal naval event of the year was the visit of Her Majesty to Portsmouth Dockyard, to be present at the christening of two new ships; and the next in importance the visit of the French Channel Squadron, under Vice-Admiral Gervais, to Spithead, with the unrestricted opening of the dockyard at

Portsmouth to the French naval officers and foreign journalists. Both of these events are connected with the great change which has come over naval administration within the last few years; but they are still more intimately associated with the change which is taking place in public opinion with regard to the Imperial Policy of Defence. Owing to the fact that, since Trafalgar gave to this nation the command of the seas, the Navy has never been challenged to prove its ability to retain that position, to the glamour which the victories of our own and continental armies have thrown over the exploits of land forces, to the military aspirations which are now instilled into British schoolboys by encouraging them to become volunteer soldiers, and to other less obvious causes, what may be called the spirit of militarism has gradually obscured the precedence which the Navy must always have over the Army in the case of this empire if its integrity is to be maintained. It has been forgotten that this country is placed in circumstances which must profoundly modify any deduction from the science and practice of other nations. There are signs now that the true significance of this state of things is being grasped by the rulers of the country, and the events referred to above are not among the least of them. It is thirty-seven years since the Queen had christened a British man-of-war, and rightly or wrongly the Navy cherished the notion that in the quarter from whence it has every right to expect support and encouragement there existed an altogether inexplicable coldness and disregard. Her Majesty's visit and kindly words will go a long way towards dissipating this feeling. Attended by the Prince of Wales, the Duke of Edinburgh, and the Duke of Connaught, with a brilliant suite of naval and military officers, including Admiral Baron von der Goltz, representing the German Emperor, the Queen, on Feb. 26th, christened the *Royal Sovereign*, battle-ship, and the *Royal Arthur*, cruiser. These vessels afford a remarkable indication of the progress which has been made with the ships ordered under the N.D.A., for less than eighteen months before they had an existence merely on paper. To appreciate in full the advance which has been made in new construction, the vessels building should be classified in groups, with the sources from which their cost is met:—1. *Contract ships of old programme*; cost met out of annual estimate. 2. *Contract ships of N.D.A.*; paid for by special provision under N.D.A., and repayable by an annuity charged on the Consolidated Fund. 3. *Australasian flotilla*; cost defrayed out of Consolidated Fund, repayable by an annuity chargeable on the naval votes. 4. *Dockyard built ships*; cost met out of annual estimate. Of Group 1, the *Blenheim*, cruiser, is the only one still in the hands of the contractor (Oct. 1st); she was laid down in Oct. '88 at the Thames Iron Works and was to have been completed this year. The *Sanspareil*, battle-ship, laid down by the same firm in '85, is now practically complete. The *Bellona*, cruiser, laid down in '88 at Messrs. Hawthorn, Leslie & Co., is also complete, so that by next March all the vessels in this group will have been completed. In Group 2 there are four first-class battle-ships, five first-class cruisers, and seventeen second-class cruisers. The battle-ships are all well advanced, and two are launched. The first-class cruisers will all be launched before next March;

more than half of the second-class cruisers have been launched; several have been delivered, and one has been commissioned. Six torpedo gunboats have been placed out to contract this year, and they are to be completed in eighteen months. The completion of the five cruisers and two torpedo gunboats of **Group 3** has been delayed by the conditions of the market, both as regards labour and materials; but the main cause of delay was the difficulty which arose in connection with their boilers. This difficulty was never surmounted, and the ships were finally taken over without a satisfactory completion of the maximum forced draught trials embodied in the contracts. The natural draught trials have, however, been most satisfactory, and instead of only 16½ knots, which was the contract measured mile speed, a mean speed of 17½ knots was attained during a period of eight hours' continuous steaming, and on the measured mile 18½ knots. The novel arrangement by which these vessels were completed for sea, with the exception of their ammunition and consumable stores, at the works of the contractors, proved to be most advantageous. All the vessels have been commissioned, left England early in the year, and have since arrived in Australian waters, where three of them—the *Wallaroo*, *Mildura*, and *Karrakatta*—will pay off, and be laid up in reserve. **Group 4** includes dockyard built ships both of the old and new programmes. Of the former the *Nile*, battleship, laid down in '86 at Pembroke, has been commissioned, and is now on the Mediterranean station. The *Blake*, first-class cruiser, laid down in '88 at Chatham, will make her machinery trials in Nov. '91; and the *Vulcan*, torpedo depot ship, laid down in '88 at Portsmouth, is ready for the pennant. The third-class cruisers—*Barham*, *Barracona*, *Blanche*, and *Blonde*—have also completed their trials; but it has not been considered expedient to try any of these vessels with the maximum of forced draught. The torpedo gunboats—*Salamander*, *Sparrow*, *Sheldrake*, and *Skipjack*—have been completed; but owing to troubles in connection with machinery and construction, the building of new vessels of this class has been purposely delayed in order to benefit by experience obtained from trial of those already in commission. The reports have been, on the whole, satisfactory; but many alterations will be made in the new vessels with a view to improvement. Of the ships then ordered and commenced in the dockyard before '89-90, all with the exception of the *Blake* will be practically completed this year. The number of ships building or to be built in the dockyard, under the N.D.A., was thirty-eight; of these all but ten are being advanced rapidly. Of the four battleships the *Royal Sovereign*, the *Empress of India* (late *Renown*), and *Hood*—of the four first-class cruisers the *Edgar*, the *Royal Arthur* (late *Centaur*), and *Hawke*—of the second-class cruisers the *Andromache*, *Apollo*, and *Brilliant*—of the third-class cruisers the *Pearl*, *Pallas*, *Philomel*, and *Phæbe*—and of the torpedo gunboats the *Gossamer* and *Gleaner*—have been launched. In the First Lord's explanatory statement a description of the designs of the two new second-class battle-ships of the N.D.A., and of some modifications in the designs of new cruisers, are given. The *Centurion* and *Barfleur*, building at Portsmouth and Chatham respectively, will be 360 feet in length, 70 feet in breadth, and have a displacement of 10,500

tons; estimated speed from 18 to 18½ knots with forced draught, 17 knots with natural draught; coal supply at designed load draught 750 tons; armament—four 10 in. 29-ton guns in two barbettes, ten 47 q.F. guns, seventeen 6-pounder and 3-pounder q.F. guns; five torpedo tubes above water, two torpedo tubes submerged. A full description of the disposition of the armament, armour, and of other arrangements for offence and defence in these vessels will be found in the report. The *Royal Arthur* and *Crescent* have been now given a forecastle upon which two 6 in. q.F. guns will be mounted as bow-chasers in vessels of one 9½ in. gun carried by other vessels of this class. The eight second-class cruisers now laid down and styled the *Ashua* class will have a length of 320 feet, breadth 49 feet 6 in., displacement 4,360 tons; estimated speed, R.V., 19½ knots, N.D. 18½ knots; armament—two 6 in. q.F. guns, bow and stern chase, eight 4 in. q.F. on the broadside, nine 6-pounder and 3-pounder q.F. guns; four torpedo tubes for the new pattern 18 in. Woolwich torpedo. The upper deck is about eight feet higher in the *Ashua* than in the *Apollo* class, and all the broadside armament is carried on it. The new torpedo gunboats are also heavier in design than those first laid down. The propelling machinery for several dockyard built ships has recently been made in the workshops of those establishments, it being found impossible to keep the different workmen and plant necessary for dealing in an emergency with the repairs of the Fleet profitably employed at other times on small work. The experiment has been most successful both in the quality and cost of the work done. The *Pheasant*, *Partridge*, *Lapwing*, *King dove*, and *Gossamer*, have been thus engined; machinery for the *Rupert*, *Astræa*, *Phæbe*, and *Gleaner* is also under way; and that for the *Fox*, *Forle*, *Hermione*, and *Hebe* is to be taken in hand this year. This association work upon the machinery and hulls will be closely watched, and the results, as regards economy and efficiency, thoroughly tested. The re-arming and re-engineing of the older ironclads progresses. The *Thunderer*, in addition to undergoing a thorough repair in the hull, and being fitted with a new flying deck, has been provided with a set of modern triple expansion engines, capable of developing 7,000 H.P. She has also been fitted with four 10 in. 29-ton B.L. guns, a new type which this vessel is the first to carry, and which re-place her 35-ton muzzle loaders. The total length of the new guns is 26 feet 10 in., tapering from an extreme diameter of 43 in. at the breach to 16 in. at the muzzle; the weight of the projectile is 500 lb., the charge 352 lb., and the muzzle energy 14,540 foot tons. The guns are operated by manual labour, and there is an appreciable saving in weight which can be utilised in other ways. Similar work is being done upon the *Devastation*, *Rupert*, and *Hercules*, the last-named having been chosen as the successor of the *Bellerophon*, to carry the flag on the West Indian station. The *Alexandra* has had new boilers fitted, and her armament partly altered; the *Achilles* and *Minotaur* have been similarly dealt with, but their primary batteries remain unaltered. The *Superb* has been re-engined and boilered. In connection with this subject the signs by which Admiral of the Fleet Sir Thomas Symonds says you may know an obsolete ship are useful: (a) Insufficient cellular subdivision below water;

(b) the possession, together or separately, of a single screw, worn out or patched boilers, and antiquated machinery; (c) lack of high speed owing to above or other causes; (d) exposed and unprotected steering gear; (e) soft iron armour; (f) discredited ordnance. Tested in these respects he declares many of our ships to be obsolete; and when met with the rejoinder that so are those of foreigners, he points out that while the existence of the empire depends upon the efficiency of its Navy this is not the case with any other European Power. During the year, says the First Lord's report, the satisfactory rate of progress in the manufacture and supply of guns for the Navy has been maintained. With regard to the adoption of hand-worked mountings instead of hydraulic mechanism for guns, it is pointed out that the latter is simpler, and that, therefore, it has been decided not to adopt the former for ordnance heavier than the 10 in. 29-ton gun mentioned above, which is to form part of the armament of the second-class battle-ships. The most important advance in naval ordnance has been the completion of the new 6 in. 100-pounder q.f. gun and its mounting. As many as six rounds a minute have been fired with this gun; but to employ its full power, smokeless powder must be used. Arrangements are said to be in progress for issuing smokeless powder to certain ships for further trial under service conditions. On March 31st last the Admiralty assumed entire control of the custody of all naval ordnance stores at Portsmouth, Devonport, Chatham, and Woolwich; and in the course of the year further arrangements have been made for transferring the ordnance depôts abroad to the same department. It is exceedingly unlikely that this reorganisation will be beneficial for some time to come; for, with the exception of a few posts which were made for Admiralty clerks, the old staff was taken on with the ordnance, and thus there is every chance of the old evils of War Office maladministration being perpetuated. A number of efficient and able naval officers of the gunnery, engineering, and marine corps might have been given the control of the new department; but under the pretext that cost of management would thereby have been increased, this reform was not effected. With regard to the personnel of the Navy, vote A, which stood in '89 at 62,600, has been raised during the year to 71,000, and will be worked up by '94 to 75,000. The increase to the establishment will consist mainly of highly trained men. With a view also to consider how far the Royal Naval Reserve is a trustworthy auxiliary force upon which the naval authorities can in any emergency rely with confidence, a committee was appointed to inquire and report on the subject. A first report was issued by this committee early in the year dealing solely with the naval artillery volunteers, and recommending that they be either abolished or transformed into marine artillerymen. That this recommendation had been anticipated seems probable, for the authorities at once stopped any further recruiting, and in spite of protests from many influential men and bodies, naval volunteering has been, to all intents and purposes, entirely abolished. No sound reasons were given for this act, and it is apparently due to a feeling that jealousy exists between the Naval Reserve, or Militia, and the Naval Volunteers, and that, by sacrificing the latter, the popularity or efficiency of the former may

in some way be increased. The first annual dinner of the Naval Reserve took place almost contemporaneously with the issue of the report, and at that dinner Admiral Sir George Tryon, Chairman of the Committee, presided. With a view to an increased provision of officers for the new men-of-war, steps have been taken to reduce the numbers afloat in non-fighting vessels, and also to shorten the general course of study for officers at the Naval College, and of gunnery and torpedo instruction for all but those who show special aptitude and ability. In future also the gunnery course of the seamen class, which was optional, will be made compulsory, but it will at the same time be shortened. Two important changes have been made with regard to the reserve of ships and men at the home ports. The control of the reserve was given, on Sept. 1st, to the Commanders-in-Chief at Portsmouth, Devonport, and Sheerness. Henceforth it will consist of two divisions. The A division will be composed of vessels ready for commissioning, and for which crews have been told off; the B division of vessels, which have been temporarily removed from the A division for dockyard repairs, which are not sufficiently grave to necessitate such vessels being wholly transferred to the Second-class Reserve. An additional captain has been appointed to each port, to take charge of the vessels in the First-class Reserve, and he will command the sea-going flagships, which have now taken the place of the old wooden line of battle-ships at the ports. The second change affects the Medway division only, where for some time an impediment to rapid mobilisation has been defective available resources of personnel. The Sheerness barracks have been converted into a gunnery school, and the depôt is now located at Chatham, so that this reserve is now placed on a par with those at the other ports. The favourable results anticipated from the substitution of commodious buildings on shore for the old hulks, in which the seamen were previously accommodated, have been fully realised in the case of Whale Island and Keyham Barracks, and the extension of the system is recognised as a matter of urgent necessity. A question of vast importance to the Empire was raised early in the year by an article contributed to the *Nineteenth Century* magazine by Major-General Sir Drummond Jervoise. Under the somewhat misleading title of "Home Rule for the Navy," this officer suggested, and strongly advocated, that measures should be at once taken by which the Navy should undertake the defence of the naval ports and coaling stations, and be in time of war responsible for the safety of their own bases of operation. The proposal was received with considerable opposition, but it was at the same time shown that there are very many officers in both sea and land services, and those among the foremost thinkers and leaders of their profession, who firmly believe that until this transfer of duties is made a very weak link must remain in the defensive girdle of the country. That this belief is very widespread was further shown by a discussion which on two days took place at the Royal United Service Institution upon a paper read by Sir Drummond Jervoise, and entitled the "Supremacy of the Navy." It is officially admitted that if such a change could be carried out it would tend to secure the unity of action and responsibility which are

now lacking, and which Lord Hartington's committee described as unsatisfactory and dangerous, and would in an emergency secure the rapid utilisation of all available resources for whatever movement the emergency of the moment might require. The objection is that the transfers of men and money, material and buildings, which such a change entails, would revolutionise the proportions the Army and Navy now bear to one another, vested interests would be interfered with, and that the older officers are averse to any alteration so radical in its bearings. Other questions which have received attention either in the Houses of Parliament or in the columns of the Press are: The training and supply of British seamen, particularly with regard to the numbers required for the expansion of the Navy from a peace to a war footing. Sir Geoffrey Hornby had some able letters in the *Times* on the subject. The education of naval officers, and the hard case of the naval lieutenants. That something ought to be done to improve the prospects of the latter grade of officers is not denied, but the Treasury will not sanction the necessary expense. **Progressive pay** and the creation of a grade between those of lieutenant and commander, to which promotion shall be by seniority, appears the most simple means for removing the existing dissatisfaction. **Promotion from the ranks** of the men before the mast has also been discussed, the question having been raised by a circular issued by some of the warrant officers. This appeal was repudiated by the bluejackets, and those responsible for its issue eventually withdrew it, and published an amended version, which met with a like fate. At the same time a very general feeling found expression as to the beneficial influence upon **recruiting**, which a practical scheme giving further opportunity to the foremost hands to reach the quarter-deck would have. Among the noteworthy incidents of the year have been a number of international interchanges of **naval visits**. A visit of a British squadron to Toulon was returned by the French Fleet at Malta. A British squadron also visited Piume, where the Emperor of Austria went on board the flagship, and an interchange of courtesies took place between the Austrian and British officers, which may be looked upon as a return for those which took place when the Austrian squadron visited Spithead in '90. A visit was made to Venice at the time of the launch of the Italian battle-ship *Sialia*, in the presence of King Humbert and his Queen. The most important of these visits, politically speaking, is that of the French Channel squadron to Copenhagen, Christiania, and Copenhadt. At the last-named port a most enthusiastic reception was accorded to the Frenchmen by the Russians. On their homeward voyage this fleet called at Spithead, and, in conjunction with a British squadron, was reviewed by Her Majesty. The officers and men were fêted at Portsmouth, and welcomed heartily by their confrères of the British Navy. One of the chief episodes of the visit was the inspection of the Dockyard and Gunners School mentioned above, everything likely to interest sailors being shown to the guests, who were afterwards entertained at Whale Island. In addition to the French officers a number of press representatives from all the principal countries in the world were present on this occasion, and offered the same privileges. This throwing open of the arsenal

to public inspection at a time when our standard of **naval strength** stands so high,—and our readiness for defensive war is so much more complete than it has been for so many years—was clever; and what they were shown impressed the visitors deeply. German, Austrian and French Fleets having visited Spithead, it is not improbable that next year may see an Italian Fleet in the same anchorage. During the year Captain A. Moore, R.N., was sent to Australia to confer with the Australian military commandants regarding the **defences of Thursday Island** and Port Darwin, and some surprise has been expressed at the Australian colonists not putting their coast defences into the hands of naval officers. A few officers of the **Victorian naval force** have received permission to serve in British men-of-war, and have arrived home to take up their appointments. The question of precedence of naval commanders-in-chief in the Colonies has been settled. **Magazine rifles** have been supplied to the naval gunnery schools for trial. Prince George of Wales, who early in the year opened the Jamaica Exhibition, has since returned home and paid off the *Thrush*, being afterwards promoted to Commander. In March a lamentable catastrophe occurred at Gibraltar, a passenger vessel, the *Utopia*, being carried by the tide across the ram of a man-of-war as she was entering the harbour in the evening, sank with the loss of the greater number of those on board. Owing chiefly to the exertions of the officers and men of the Channel squadron a great many lives were saved, but for some unexplained reason their exertions have met with no official recognition. The destruction of the Chilean warship *Blanco Encalada* (FOREIGN NAVIES, q.v.) by a torpedo has renewed attention in these engines of warfare. A new factory is being built between Portland and Weymouth for the manufacture of **Mr. Whitehead's torpedoes**. The newest model has a diameter of 18 inches, with a speed of nearly 30 knots for long range and a speed of 32 to 33 knots for short range. The charge is 240 lbs. of gun-cotton. The torpedo which sank the *Blanco Encalada* contained about 40 lbs. of gun-cotton. The N.D.A. has been assented to by the Queensland Legislature. In a paper read before the Institute of Naval Architects, Sir N. Barnaby, late Chief Constructor of the Navy, reviewing recent progress in naval architecture advocated the building of a number of comparatively small ships for the line of battle rather than a few larger ones. It appears, however, to be the opinion of our most experienced naval officers that if a first-class ship, with her concentration of power and her superior fighting capability in rough water because of her great size, had to meet at sea a group of smaller vessels, the chances would be in favour of the larger vessel, providing that she had proportionate speed. A strong feeling exists that the time has come to draft another programme of construction if the standard of strength fixed two years ago is to be maintained. Mr. A. B. Forwood, in a speech at Blackpool, declared that if any Chancellor of the Exchequer reduces the expense of ship-building for any one year less than £2,500,000, or thereabouts, it will not only be uneconomical, but would be jeopardising the best interests of the country. Two unfortunate mishaps, attended with loss of life, have to be chronicled. Four young midshipmen, belonging to the *Warspite*, went away in canoes from Esquimalt

Present state of the British Navy.

on a fishing excursion, and, owing to some unknown cause, were all drowned. By the bursting of a 6 in. (Mark II.) 31 cwt. N.L.R. gun on board the *Cordelia*, on the Australian station, two officers and four men lost their lives. The gun was of similar pattern to one which burst on board the *Active* in '82. The cause of the mishap is unexplained. Admiral Sir W. Graham, President of the Royal Navy College, Greenwich, having retired, Admiral Sir Vesey Hamilton relinquished his post as First Sea Lord at the Admiralty to succeed him, and was himself succeeded in the post of Chief Naval Adviser to the Cabinet by Admiral Sir Anthony Hoskins. Admiral the Earl of Clanwilliam has succeeded Sir J. Commerell as Commander-in-Chief at Portsmouth, and Admiral Sir George Tryon, Sir Anthony Hoskins as Commander-in-Chief in the Mediterranean. Sir George Tryon's place at the Reserve Office has been taken by Rear-Admiral R. O'B. Fitzroy. Vice-Admiral Sir Fred Richards has succeeded Vice-Admiral Salmon in China, and

Rear-Admiral J. C. Robinson has succeeded Sir Edmund Fremantle in the East Indies. Rear-Admiral Adeane has taken the place of Rear-Admiral Loftus F. Jones as second in command of the Channel Squadron. As superintendent of Portsmouth Dockyard Rear-Admiral Gordon has been succeeded by Rear-Admiral Fisher, and at Devonport Vice-Admiral Sir Walter Hunt Grubbe has been followed by Sir Robert More Molyneux. Rear-Admiral Compton Domville has become Director of Naval Ordnance, and Rear-Admiral H. F. Cleveland Vice-President of the Ordnance Committee. Vessels launched during '90-91 were:—*Sybilie*, *Apollo*, *Spartan*, *Thetis*, *Assaye*, *Royal Sovereign*, *Royal Arthur*, *Hawke*, *Tribune*, *Indefatigable*, *Empress of India*, *Sappho*, *Brilliant*, *Intrepid*, *Hood*, *Plassy*, *Endymion*, *Retribution*, and *Royal Oak*. The vessels which have been ordered in private yards during the year are the *Niger*, *Jason*, and *Jaseur* from the Ship Construction Co. at Barrow; the *Renard* and the *Onyx* from Laird's, of Birkenhead;

and the *Speedy* from Thorneycroft's, at Chiswick. The number of vessels on each station on Oct. 1st was:—Mediterranean, 29; North America, 10; South East Coast of America, 4; Pacific, 7; Cape and West Coast of Africa, 14; East Indies, 9; China, 19; Australia, 15; Training Squadron, 4; Particular Service, 10; and Surveying Service, 7. The interest aroused by the Naval Exhibition has produced a heavy crop of naval literature, among which may be noticed:—"The Sea Service," "Modern Naval Artillery," "All about the Royal Navy," "Life in the Navy," and the "History of the Victory." The fifth edition of the *Exhibition Catalogue* contains matter indispensable to the naval student, the art section compiled by Professors J. K. Laughton and Montagu Burrows, Mr. Laird-Clowes and Commander C. N. Robinson being particularly valuable. Other works of reference are Brassey's "British Navy" (5 vols., 1882); "The Naval Annual" from '86 to '91; Mr. White's (Chief Constructor of the Navy) "Naval Architecture" (new edition, 1889); Sir E. J. Reed ("Steel Shipbuilding and Modern Ships of War"); Colomb's "Naval Warfare"; Mahan's, "Influence of Sea Power upon History"; Lloyd's "Warships of the World"; Bedford's "Sailor's Pocket Book"; Sleeman on Torpedoes (new edition, 1889); Bainbridge-Hoff on naval tactics; Nordenfeldt on machine guns, Hovgaard on submarine boats, and "The Development of Navies," by Captain Fardley-Wilmut and Mr. R. C. Oldknow. For tables illustrating the present state of the British Navy (battleships, coast-defence ships, and harbour-defence ships) see p. 468. For cruisers ordered, or in process of completion, see pp. 468-469. For armoured and unarmoured cruisers, see below.

Neale, Edward Vassiltart, was b. April 2nd, 1810, at Taplow Rectory. He was ed. privately, and at Oriel College, Oxford, where he was a contemporary of Mr. Gladstone, Cardinal Manning and F. D. Maurice. Having made a long tour abroad, he was called to the Bar, but found greater attractions in social

questions, joining Maurice in founding the Society for Promoting Working Men's Associations. Mr. N. spent largely in furthering various experiments of co-operative production and distribution, anticipating the later development of co-operation. The early associations of workmen in London, however—such as a builders' association, an ironworks in South-wark, and a "Central Agency" distributive store—were financial failures, and Mr. N. and his friends, convinced that preliminary education was needed, turned their attention to establishing such organisations as the *Working Men's College* (q.v.). Meanwhile the co-operative idea was gaining a stronghold in the North of England, and when a movement was set on foot for the federation of the various co-operative societies, Mr. N. gave his active support; acting as chairman at the preliminary meetings for organising the *First Congress*, which was held in London in '69. He became a member of the Central Board of the Co-operative Union in '72, and in '75 became *General Secretary*. He held that office until '91, when he resigned. He has often acted as delegate to foreign co-operative congresses. His life-long labours in the cause of co-operation have won for him universal respect.

Neckar (Lauffen Falls) Utilisation. On Aug. 25th, '91, at the Electrical Exhibition, Frankfort-on-Main, the utilisation of these falls on the Neckar for the purpose of generating electricity was exemplified by the illumination of the electric lamps, the current being conveyed by cable 108 miles. The potential at Lauffen is 25,000 volts. A technical description of the work was published in the *Times* of Sept. 12th, 17th, and 28th, and Oct. 2nd, the correspondent being of opinion that the transmission was the most important experiment of the kind yet known. It seems that a water power of 1600 horses is derived through a separate channel from the river, about a mile above Lauffen. The local cement works, probably the largest in Europe, utilise 600 horse-power by means of two Girard turbines; a third turbine of 300 horse-power drives the dynamo generating the current for the power transmission. There is a head of water of 3'8 metres, and the turbines make 30 revolutions per minute, and the dynamo 150 revolutions; the latter is coupled direct with its turbine. The useful energy recovered in Frankfort is about 75 per cent. of the energy expended in Lauffen. The *Engineer* of Sept. 18th and 25th, and Oct. 2nd, gave illustrated articles upon this important electrical experiment.

Negligence, Law as to, in '91. An extraordinary point of law, which arose out of the Armagh railway disaster, came before the Queen's Bench Division in Dublin (Jan. 26th, '91). A Mrs. Walker was a passenger by the train, and, being at the time *en route*, she subsequently gave birth to a deformed child. She instituted an action, claiming damages on the ground that the child was injured by the accident. The Court, however, held that the child was not *in esse* at the time of the accident, and that such an action could not lie. It was stated that the company had paid the mother of the child £800 in respect of her own injuries.—A passenger who sustained injury through leaving a train on the side on which there was no platform, that being the side on which she had originally entered the train, brought an action for negligence, it being contended that the

railway company ought to have had a proper light to show passengers that they could not safely get out on the side on which they had entered. It was held that there was negligence in not sufficiently lighting the station, and that the plaintiff was entitled to recover (Queen's Bench Division, Jan. 26th, '91).—A singular case was that of *Taylor v. the London and North Western Railway Co.* (Queen's Bench Division, May 9th, '91). The plaintiff was the widow of an engine-driver employed by the Lancashire and Yorkshire Railway Co., who was killed near Bradley station on the defendant's railway, owing to his head coming in contact with the column of a bridge as he leaned over the engine to see what had gone wrong with it. It was alleged that there was a curve near the bridge, as a result of which the engine canted towards the column; and it was admitted that after the accident three inches were chipped off the face of the column. On the other hand, it was pleaded that the bridge had been passed by the Board of Trade, that Lancashire and Yorkshire engines were larger than those of the London and North Western Company, who could not prevent the former company from running over their line, and that there was a want of care on the part of the engine-driver in looking out. The jury found a verdict for the plaintiff, with £200 damages. A woman, on arriving at a level crossing, found the large gates over the road closed, but the small gates for foot passengers open. She attempted to cross the line when a train was about two hundred yards away, but was knocked down and killed. She was very old, deaf, blind, and otherwise infirm. A county court jury awarded the husband £75 damages, and an appeal to the Queen's Bench Division was dismissed (*Haines v. London and North-Western Railway Co.*, May 14th, '91).—In a case heard in the Walsall County Court (May 18th, '91), the father of a young woman who was killed at a level crossing on the London and North Western Railway Company's line, brought an action for damages. It was held that the Company had no authority, either by Act of Parliament, or by the order of two justices in petty sessions, to construct the crossing, and the Judge held that, in the absence of proof as to the right to construct the crossing, there was negligence on the part of the Company. A verdict was given for the plaintiff, but execution was stayed in view of an appeal.—In *Coburn v. the Great Northern Railway* (Court of Appeal, June 24th, '91), it was held that where there was a curve in the line near a railway station at which passengers had to go from one platform to the other by a level crossing, the driver of an express train ought to have whistled, and that the Company's porters ought also to have given some warning that the train was about to pass through the station. Judgment was therefore entered for the plaintiff.—In the case of the *North British Railway Co. v. Wood* (pauper) (House of Lords, July 2nd, '91), the respondent, a commission agent and commercial traveller, forty-seven years of age, brought an action against the appellant for personal injuries which he had sustained in an accident which occurred upon their line in June '88. After the accident, the respondent signed a receipt for £27, received by him from the Company "in full of all claim." The respondent alleged that he was not in a fit condition to transact business when he

signed the document, and the Court below found for him with £300 damages. The House of Lords reversed the decision, holding that the respondent was bound by the document he had signed, and that there was no evidence that he did not sufficiently understand what he was doing when he put his signature to it.—In *Newman v. the London and South Western Railway Co.*, the husband of the plaintiff was killed at Sunningdale station, in July '89. He had alighted from the train, and while going across the line in front of the engine to gain the other platform, was knocked down and killed by a train coming in the opposite direction. The evidence showed that the deceased could have seen the approaching train a considerable distance off, that the driver of the train whistled to warn him, and that it was only after he had seen the train a short distance away that he proceeded to cross the rails, it being then too late, as events proved. A jury in the Queen's Bench Division gave a verdict for the widow for £300, but the Judge declined to enter judgment on the ground that there was no negligence. On appeal (Court of Appeal, April 30th, '91), the view of the learned Judge was upheld, it being considered that the deceased brought about his own death by want of care.—In *Loader v. the London and India Docks Joint Committee* (Queen's Bench Division, May 13th, '91), the plaintiff, a stevedore's man, fell into the dock owing to the slipping of the "table top," a board extending from the vessel to the quay, which, as the vessel drifted, moved while he was upon it. It was held that the defendants were under no legal obligation to alter the moorings of the ship as she sank while being loaded, and that the plaintiff was not entitled to recover.—In *Air and another v. the Vestry of Paddington* (Queen's Bench Division, June 4th, '91), the plaintiffs recovered £311 for injuries which resulted to the occupants of their carriage and to the vehicle itself, owing to the horse being frightened by two steam rollers, which were letting off steam preparatory to being housed for the night, and in reference to which proper notice or warning to passengers using the highway was not given.—The death of a horse was caused by the animal taking fright at a traction engine which was upon the public highway. In the county court the Judge found against the owner, on the ground that there was no negligent driving of the engine, and refused to consider the point whether a traction engine was a nuisance upon the highway. Mr. Justice Day, on appeal, held that the case must be remitted to the county court, for a traction engine might be a nuisance at common law though the statutory requirements were fulfilled (*Bantwick v. Rogers*, Queen's Bench Division, May 14th, '91).—A pony attached to a cart, and left unattended by the driver, ran away, and two persons who were crossing the street were knocked down and hurt, one of them seriously. A Queen's Bench jury awarded them £500 and £20 damages respectively (*Mutt v. Mason, and Fry v. Mason*, Dec. 9th, '90).—In *Vennell v. Meakin*, heard in the Chancery Division Aug. 11th, '91, the plaintiff had advanced the sum of £500 upon the security of a second mortgage, of some houses, but the property proved to be an insufficient security. The defendant, a surveyor, had made reports with reference to the value of the houses in question, his professional opinion being that they afforded sufficient security. It was held that he had been guilty

of negligence, and that the plaintiff was entitled to be repaid, with interest, the sum of £500, which had been advanced on the faith of the defendant's reports.

Netherlands, Political Parties in the. The political parties in the States-General are divided into **Liberals** and **Anti-Liberals**, the latter being composed chiefly of such opposite elements as **Catholics** and **Orthodox Protestants**, who are also called **Conservatives**. In the **Upper House**, or **First Chamber**, which consists of 50 members, the **Liberals** number 34, the **Catholics** 10, and the **Orthodox Protestants** 6. The members of the **First Chamber** are elected for 9 years, one-third retiring every 3 years. The **Lower House**, or **Second Chamber**, is composed of 100 members, who are elected for 4 years under a limited manhood suffrage. The present **Lower House**, which was elected in June '91, is composed of 54 **Liberals** and 46 **Anti-Liberals**, the latter being thus divided: **Orthodox Protestants**, or **Conservatives**, 20; **Catholics**, 25; and one **Radical**. There are 280,000 electors in Holland. About 200,000 polled, as many as 90 per cent. of the electors voting. It was announced (July 8th, '91) that the Cabinet had placed their resignation in the hands of the Queen Regent. A new ministry was formed in August. M. Tak van Poortvliet acting as Premier and Minister of the Interior. The office of Minister of Justice was filled by M. Smidt; that of Minister of Waterstaat by M. Lely. The Minister of Colonies is M. van Dedem, and the Minister of Finance is M. Pieron. M. van Tienhoven took the portfolio of Minister of Foreign Affairs. The War Minister is Col. Seyffardt, and M. Jansen is Minister of Marine.

Netherlands, The. A kingdom under Queen **Wilhelmina** (*q.v.*). Queen-Regent **Emma**, of the House of Orange. Area, excluding **Luxemburg** (*q.v.*), 124,048; estimated pop. in '89, 4,505,937. Constitution of 1848 vests executive in the sovereign, and legislative authority in the States-General, sitting in two chambers: the first, consisting of 93 members, elected by the provincial States; the second, of 86 members, elected by ballot, one to every 45,000 of population. Every two years one-half of the second and every three years one-third of the first chamber retire by rotation, unless dissolved by the king, in which case new elections must take place within forty days. The second chamber alone possesses the initiative in legislation; the upper house having the right of approval or rejection, but not of amendment. The king has a veto. Alterations in constitution to be made by two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new States-General. Entire liberty and social equality granted to all religions. **Estimated revenue**, '90, 122,209,000 guilders; **expenditure**, 135,074,987 guilds.; **debt**, £89,459,485; **imports**, '86, 1,277,093,000 guilds.; **exports**, 1,714,806,000 guilds. (For army and navy see **FOREIGN ARMIES** and **FOREIGN NAVIES**.) Its colonies include Java and territories in Sumatra, Borneo, and numerous other islands in the Eastern Archipelago; Curaçao and five other small islands in the West Indies, and Surinam in South America. (For history to '90 see previous eds.).—**History.** The funeral of the late King took place (Dec. 4th, '90) with great pomp. It was attended by representatives of many of the foreign Powers, and there were about 50,000 visitors in the Hague. Queen

Emma (8th) took the oath as Regent during her daughter's minority. The Dutch Indian Budget for '91 showed a deficit of 23,000,000 fl. The Dutch High Court of Justice decided that officials must take the oath of allegiance to "King," and not "Queen," **Wilhelmina**. The Second Chamber threw out the Bill (Feb. 6th) for renewing the mail contracts with the Netherlands Co. and the Rotterdam Lloyd Co. It also passed a Bill fixing the Queen's civil list at 600,000 fl. The young Queen and her mother paid a visit to Rotterdam (May 30th), where she laid the first stones of a new quay and a new hospital. A meeting of the Amsterdam section of the Dutch Social Democratic League (June 28th) reproached the Government with spending a large sum of money on the reception of a foreign monarch, while it did nothing for the workers who had suffered during the winter. The Cabinet handed in its resignation (July 8th). A bronze tablet, placed on the outside wall of St. Peter's Church, Leyden, in memory of the Rev. John Robinson, M.A., "Father of the Independents," was unveiled (24th). The International Agricultural Congress was opened (Sept. 7th) at the Hague, under the presidency of M. Méline; it closed (12th). The Queen-Regent opened the new Parliament (15th). The Budget for '92, was presented (18th). The revenue was estimated at 127,600,000 fl., and expenditure at 130,000,000 fl. The Dutch East Indian Budget for '92 presented in the Second Chamber (19th), showed a deficit of 16,800,000 fl.

Nevis. A British West Indian island included in the presidency of **St. Christopher**, of the federal colony of the **Leeward Islands**. Area (including **Redonda**) 50 sq. m.; pop. 11,864. Capital, **Charlestown**. The island is simply a single cone-shaped mountain, surrounded by a margin of low lands. **Redonda** is a dependent islet. **Statistics** included in those of St. Christopher (see **BRITISH EMPIRE**, etc., table). The colony was independent till 1883.

New Brunswick. A province of the Dominion of Canada. It lies along the Bay of Fundy. Area 27,322 sq. m.; pop. 321,233. Capital **Fredericton**; chief commercial centre **St. John**. Divided into fifteen counties.—**Chief rivers** are the St. John and the Miramichi, which are navigable in part. **Administered** by a Lieut.-Governor and Executive Council. The people elect a Legislative Council and a House of Assembly. The Province has ten seats in the Dominion Senate and sixteen in the House of Commons. Religion abundantly provided for. Both high and elementary education publicly provided and supported—the latter free, but not compulsory. The history of New Brunswick is comprehended in that of Nova Scotia until 1784, when it was made a separate Government. Joined the Dominion in 1867. See CANADA; and for Executive Council, etc., see DIPLOMATIC.

Newcastle, Right Rev. Ernest Roland Wilberforce, D.D., first Bishop of, was b. at Briggstone, Isle of Wight, 1840. Is the third son of the late Dr. Wilberforce, successively Bishop of Oxford and Winchester, and grandson of **Samuel Wilberforce**, the emancipator. Ed. at Exeter Coll., Oxford, where he graduated in '64. Ordained deacon the same year by his father, and appointed curate of Cuddesdon, Oxon. Subsequently held the curacy of Lea, Lincs., the rectory of Middleton Stoney, Oxon. ('66-'73), and the vicarage of Seaford, Liverpool. Appointed Canon of Winchester ('78); Sub-Abmoner

to the Queen (77-82). On the formation of the bishopric of Newfoundland Dr. W. received the first appointment ('82).

Newfoundland. A British colony and island lying across the mouth of the Gulf of St. Lawrence. Area 40,000 sq. m., excluding that part of the territory of Labrador on the mainland which appertains to this colony; pop. 109,623. Capital St. John's—pop. 28,610. Villages on Avalon Peninsula. Atlantic table lands in Heart's Content Harbour. Interior uninhabited. Great Bank to southward, shallow seas where Gulf Stream and Arctic Current meet; ever foggy, but teeming with fish, especially cod. Governor and responsible Ministry form Executive. Two houses of parliament: Legislative Council of 15 members, called by Governor; House of Assembly of 33 members, elected every four years on house tenancy suffrage. Religion chiefly divided between Anglican, Roman Catholic, and Wesleyan bodies. Education denominational. There are no defences.—**History.** A terrible storm occurred (Dec.), by which a large amount of damage was caused to both houses and shipping. Mr. James Fraser, of Halifax, instituted (25th) an action for \$8000 damages against Sir Baldwin Walker, commander of H.M. cruiser *Emerald*, for compelling him to cease fishing for lobster in Boone Bay. At the latter end of December and the beginning of Jan. '91, the indignation against the renewal of the *modus vivendi* became more acute, and anti-British leagues were formed all over the island. The agitation in the island was kept up, until eventually Great Britain and France agreed to refer the questions at issue to arbitration, and (March 11th) an agreement was signed to maintain the *status quo* until the decision of the arbitrators. The following were selected as the arbitrators: M. de Martens, Professor of International Law at the University of St. Petersburg; M. Rivier, Consul-General of Switzerland at Brussels, President of the Institute of International Law; and M. Giam, formerly member of the Supreme Court of Norway.—During '91 the indignation of the islanders waxed strong on hearing that the *modus vivendi* with France was extended for twelve months, and many threats were made by orators and the press of seeking union with the United States (Jan.). In the following month the Governor opened the Legislature, and in the course of his speech said that the proposals of the Imperial Government for the withdrawal of the French colony had not been favourably received by the French Government. Further excitement was caused by the report that the proposed Reciprocity Trade Convention with the United States was not to be assented to by the Imperial Government, and the House of Assembly unanimously resolved (Feb. 12th): "That this House has learned with alarm and indignation that the British Government, at the instance of Canada, withholds its assent to the Reciprocity Trade Convention between this colony and the United States, and regards such action as hostile to the best interests of Newfoundland, and a violation of the obligations of Her Majesty's Ministers who authorised the conclusion of the treaty." A secret meeting of the House of Assembly was held (13th), when, on the motion of the Hon. Robert Bond, Colonial Secretary, the following resolutions were passed, and ordered to be telegraphed to Lord Knuts-

ford: "That this House views with profound disappointment and alarm the failure of Her Majesty's Government to carry out its solemn obligations to the colony, and is aware of the interference of Canada in the matter; and that this House cannot fail to appreciate the same as a menace to the independence of the colony. The members of this House emphatically protest against the interests of the colony being made subservient to those of the Dominion, and regard the delay in ratifying the Convention aforesaid as entirely unjustifiable, and as evidencing an utter disregard on the part of Her Majesty's Government for the well-being and prosperity of the colony. It is also resolved that the delay occasioned by Her Majesty's Government not ratifying the said Convention is regarded by this Legislature as unfriendly to the colony, and as calculated permanently to disturb the loyalty for which the colony in the past has been remarkable. It is further resolved that this Legislature most strongly urges upon Her Majesty's Government the immediate fulfilment of its pledge to the colony by ratifying the said Convention." These resolutions were confirmed (March). An agreement between France and Britain to refer the question to arbitration was signed (12th). Some uneasiness was caused by the complaint that new French lobster factories had been erected at Port-au-Port Bay, which was urged as an encroachment on British territory. In the case of Mr. Baird against Sir Baldwin Walker for closing his lobster factory on the French shore in June last, the Court gave a decision (18th) in favour of Mr. Baird. A despatch was received from Lord Knutsford to the effect that the *modus vivendi* would be continued until the award of the arbitrators, and that meanwhile Parliament would be asked to pass legislation to enforce it. The two Newfoundland Chambers telegraphed to Lord Knutsford, asking that the legislation might be postponed till the views of the colony were placed before the Government. The Chambers appointed five of their members as a delegation to London to confer on the fisheries question; they were the Hon. A. W. Harvey and Mr. Munroe, Ministers of the Council; the Hon. G. H. Emerson, Speaker of the House of Assembly; Sir William Whiteway, Premier; Mr. Morine, Leader of the Opposition; and Mr. F. D. Shea, President of the Legislative Council. Meanwhile mass meetings were held throughout the colony protesting against the Imperial action. In consequence of the interference of Canada, the Newfoundland Government ordered that Canadian fishermen should not be allowed to purchase bait on the island, and Canada retaliated by refusing bait or fish to any British subjects. Cruisers were sent to Newfoundland to prevent the purchase of bait. In April some Fortune Bay fishermen endeavoured to run the blockade and carry bait to St. Pierre to supply the French fishermen. On another occasion serious riots took place in Placentia Bay, and seventy vessels escaped with bait, which they carried to St. Pierre. Lord Knutsford telegraphed (May 1st) to the Governor that the colony had the option of passing a local Act to enforce the observance of the *modus vivendi* and the treaties, or of referring the disputed points to arbitration. The delegates in England telegraphed in favour of a local Act. Both Houses passed (9th) the following: "Resolved that this House will adopt such legislation as may

be necessary to carry into effect the proposals made to the Imperial Government and Parliament by the delegation now in London." Mr. Morine arrived from London with the draft Bill agreed upon with Lord Knutsford; its operation was limited to the end of '93. Both Houses passed the Bill (23rd). Two French warships on the French shore took up the fishermen's lobster traps, and the Admiral announced that he would enforce the exclusive claims of the French to all the fish in the waters. On the passing of the local Act Lord Knutsford's Bill in the Imperial Parliament was allowed to drop, much to the general satisfaction. The Governor was directed (June) by the Colonial Office to withdraw his assent to the order prohibiting Canadian fishermen obtaining bait in Newfoundland waters, and the order consequently expired. By order of Sir Baldwin Walker sixty British lobster factories were closed on the French shore (July) under the *modus vivendi*. The order was subsequently relaxed, and one of the puisne judges was appointed to investigate the losses sustained by the people of St. George's Bay through the enforcement of the French treaties. A new herring bank a hundred miles long was discovered off the west coast of the island (Nov.) by Mr. Nielsen, Superintendent of Fisheries.

Newfoundland Fisheries Bill. See SESSION, sect. 93.

New Guinea, or Papua. An island lying directly N. of Australia, and after Australia the largest island in the world. It is about 1490 miles from E. to W., with a breadth at centre of 410 miles. The area is now computed to be 305,900 sq. m. That half of the island lying west of the 141st meridian is assigned to Holland, and comprises 150,755 sq. m. The boundary between the German territory on the north, now called **Kaiser Wilhelm's Land**, and the English territory on the south starts from the N.E. coast on the 8th parallel of S. lat., and follows it to intersection with 147th meridian; thence N.W. to intersection of 6° S. lat. with 144° E. long.; thence W.N.W. to intersection of 5° S. lat. and 141° E. long. Adjacent islands north of 8° S. lat. are German, south of that parallel English. **Kaiser Wilhelm's Land** contains 70,300 sq. m.; pop. 109,000; the English territory 86,457 sq. m., pop. 135,000, with **Port Moresby** as the official centre. British New Guinea comprises, besides that portion of the mainland described, the whole of the Lousiade and D'Entrecasteaux, the Woodlark and Trobriand groups of islands, in some of the larger of which there are probably as many as 5000 inhabitants. The policy of the Government is not to alienate any lands until the country and its people are better known. It is hoped that the natives may be trained eventually to utilise their tribal lands for commercial purposes. In '91 it was reported from Brisbane (Jan. 9th) that the Tugaree head-hunting tribe had massacred forty villagers in the western district. A force of police was sent to the assistance of Mr. Cameron, the resident magistrate. For Commissioners, etc., see DIPLOMATIC. See also QUEENSLAND, and COLONIES OF EUROPEAN POWERS.

New Hebrides. A long chain of volcanic islands in western Polynesia, lying W. of Fiji and N.E. of New Caledonia. Area about 3000 sq. m.

New Jerusalem Church. The New Church, whose members are commonly called "Swe-

denborgians," because they accept the system of Scriptural interpretation contained in the writings of Emanuel Swedenborg (b. 1688; d. 1772), by whose instrumentality they believe the Lord has effected His Second Coming by unfolding the internal or spiritual sense of the Divine Word. The doctrines of this sense, together with the science of correspondences which constitutes the key by which that sense may be unlocked—are set forth in Swedenborg's theological writings. The fundamental doctrines taught are, that the Lord Jesus Christ, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of Father, Son and Holy Spirit, answering to the trinity in man of soul, body, and their operation together; and that in order to be saved it is necessary to believe in Him, and to keep the commandments by shunning the evils therein forbidden, as sins against Him. Swedenborg's writings were first extensively made known in this country by a clergyman of the Church of England, the **Rev. John Clowes**, rector of St. John's, Manchester, who translated a great number of Swedenborg's works, including his greatest work, the "**Arcana Coelestia**" (13 vols.). Another clergyman, the **Rev. William Hill**, translated the work second only in importance to it, the "**Apocalypse Explained**" (6 vols.). The **Rev. Thomas Hartley**, rector of Winwick, translated "**Heaven and Hell**." Very early, some drawn from the ranks of the Methodist preachers and other students of Swedenborg, formed a separate organisation for worship (1788), which has continued and increased. There are now (Ang. '91) 82 societies, with 6204 registered members. They have Sunday-schools with 7642 children, and day-schools with 5300 scholars. There are fourteen societies in London and its neighbourhood. Their statistics, however, fail to tell the number of their receivers, who have always consisted of separatists and non-separatists—the latter sometimes from their isolation, but sometimes from principle, worshipping in the Established Church or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a **Conference**, which meets annually, and consists of all the ministers and of from one to three representatives from each society, according to the number of its members. **Swedenborg Society**, 36, Bloomsbury St., was founded 1810 for translating, printing, and circulating Swedenborg's works. They may be had in fourteen languages. The Church also possesses its own orphanage, its college for training candidates for the ministry, its National Missionary Institution, and other associations formed to forward its propaganda.

Newman, Francis W., brother of the late Cardinal Newman, was b. 1805. Ed. at Worcester Coll., Oxford, graduating ('26) double first. Became Fellow of Balliol College in '26, but four years later he resigned, having conscientious scruples about signing the Thirty-nine Articles. Classical tutor at Bristol Coll. ('34), and subsequently held a similar post in Manchester New College. Latin Professor in Univ. Coll., London ('46-63). He is the author of numerous works, of which the best is "**Phases of Faith**." Mr. N. takes a great interest in vegetarianism. In '89 he published

"Anglo-Saxon Abolition of Slavery." Published in Jan. '91 "Contributions chiefly to the early history of the late Cardinal Newman."
Newnham College. See HIGHER EDUCATION OF WOMEN.

New Republic, or Nieuwe Republiek. Was formed in Zululand 1886-7, by a party of Transvaal Boers. Lies on the northern and western side of Zululand, adjacent to the Transvaal and Swaziland. Area 1380 sq. m.; pop. very limited. Capital Vryheid. On the death of Cetewayo his rule had been usurped by the chief Usibepu. Dinizulu, son of Cetewayo, sought and obtained Boer assistance against the usurper, and, as the price of it, ceded territory to the Boers. This they were gradually increasing by various means, when they came into collision with the British authorities, which resulted in negotiation. The New Republic was then defined and delimited, and the remainder of Zululand annexed by Great Britain, including all the coast. See ZULULAND, SWAZILAND, AMATONGALAND, etc.

New South Wales. The oldest of the British colonies in Australia. Was founded as a penal settlement in 1788. Originally embraced half the continent. Since 1859 it extends from lat. 28° 10' to lat. 37° 28' S. It has Queensland on the north, and Victoria on the south. From the sea upon the east it stretches to long. 141° E., which meridian divides it from South Australia. Greatest length 900 miles; greatest breadth 850 miles; total area 310,700 sq. miles; pop. 1,179,000. Capital Sydney, on Port Jackson; pop. 361,240. It is a splendid city, and is the oldest, and still the most important, in all Australasia. Among other great public institutions of Sydney may be mentioned the Royal Mint, University, Free Library, National Gallery, and Observatory. Besides the metropolis are 46 boroughs and 45 municipalities. Leading large towns are Albury, Bathurst, Deniliquin, Goulburn, Grafton, Hay, Maitland, Newcastle, Parramatta, Tamworth, Wagga-Wagga, Wollongong, and Yass.—New South Wales is divided into districts and counties. Of the latter there are now 141; but only 20, which occupy the earlier settled territories near the coast, have much individuality. The remainder are part of the 13 pastoral districts. Of these districts, which are extensive regions, Murrumbidgee, Lachlan, Wellington, Bligh and Darling are good grazing lands; Liverpool Plains, New England, Macleay, and Clarence are suitable for agriculture; Monaro is a high and rugged table-land; Gwydir and Albert are both pastoral and agricultural; Warrego partly barren.—Ruled by a Governor and responsible Ministry. Legislative power is vested in a Parliament of two houses. The upper, or Legislative Council, consists at present of 71 members (the number is unlimited, but is not to be less than 21) appointed by the Governor for life. The lower house, or Legislative Assembly, is composed of 137 members, elected triennially by 74 constituencies on a basis of manhood suffrage. Members are paid the sum of £300 a year. The Ministry is responsible to the Legislative Assembly. New South Wales as yet refrains from taking part in the Federal Council of Australasia. Education under Government control. For latest financial statistics see BRITISH EMPIRE, etc. (table). There are 2182 miles of railway open, including the line which connects with the Victorian system at Albury, besides

that almost finished to connect with Queensland. There are 23,668 miles of telegraph line. Staple export is wool, increased to present amount of about 300,000,000 lb. per annum, value £10,000,000.—**History.** '91. The Earl of Jersey, the newly appointed Governor, arrived at Sydney (Jan. 15th), where he received a hearty welcome. He was sworn in by the Chief Justice, and addresses of welcome were presented. A great fire occurred at Gibb's Wharf, Sydney, doing damage to the extent of £50,000. The Australian Federation Convention was opened at Sydney (March 2nd), under the presidency of Sir Henry Parkes (see AUSTRALIAN FEDERATION CONVENTION). During the Easter volunteer manoeuvres at Sydney, while mines were being placed at the entrance to the harbour, one exploded, killing two officers and two men, and wounding eight others. The report of the Railway Commissioners (May 6th) for the half-year ending March 31st, which has just been published, shows a very favourable return. The total mileage—namely, 2182 miles—has not increased, yet the revenue has risen from £1,421,197 to £1,555,275, thus showing an increase of £133,878, or nearly a quarter of a million pounds, a greater sum than ever before reached, and equal to an additional 8½d. earned by each of the 4,318,000 train miles. The expenditure for the half-year amounted to £927,194, as compared with £811,899, being an increased expenditure of £115,295, against an increased revenue of £213,878, resulting in a net gain for the half-year of £118,583. Parliament was opened at Sydney by the Governor, Lord Jersey (19th), who, in the course of his speech, announced the introduction of the following amongst other Bills: "To confer upon the people the advantages of self-government; to amend the electoral law by abolishing plural voting and dividing the colony into single electorates; to regulate coal mining; to provide for the conservation of water in the remoter parts of the interior; to amend the licensing law in the direction of local option; and, finally, a Bill providing for the constitution of Courts of conciliation and tribunals of arbitration, and making other provision for the settlement of trade disputes. Parliament was dissolved (June 6th). Lord Jersey was installed Grand Master of the Freemasons in New South Wales; three thousand brethren were present. The Murray overflowed its banks (July 14th), and did great damage to the surrounding country. Parliament was opened (15th). The Legislative Assembly rejected (30th) by 57 votes to 34 the motion of Sir Henry Parkes in favour of woman suffrage. Serious trouble occurred during the month owing to the strike of the Unionist shearers, who were largely replaced by free men. Eventually matters were settled by a conference between employers and men (Aug. 7th) at Sydney. During the strike considerable property was destroyed. The revenue for the quarter ended Sept. 30th amounted to £2,458,000, being a decrease of £46,000 as compared with the same period of 1890. The Customs returns showed an increase of £69,000 and railways of £66,000, while the revenue from stamps decreased £103,000 and from land £37,000. The revenue for the year ending Sept. 30th was £9,900,000, being an increase of £500,000 as compared with the year which ended on Sept. 30th, '90. The Government was defeated on the question of the insertion of eight hours' clauses in the Coal Mines Regulation Bill, and

Sir H. Parkes determined to resign. Mr. G. R. Dibbs undertook to form a new cabinet (18th), and succeeded in doing so on the 23rd. See DIPLOMATIC. The tailors and tailoresses of Sydney struck for higher wages (28th). The Australian Banking Co. suspended payment (Nov. 2nd), owing to a panic amongst the depositors. The balance sheet for June showed that the liabilities were £73,000, and the assets £101,000.

New York, Jersey City, and Brooklyn Tunnel. (For an earlier reference to these schemes, see NEW YORK BAY, in last ed.) In Feb. '91, it was reported that two great schemes were on foot to connect Brooklyn, which is situated on Long Island, and separated from New York by the East River, with the main lines of railway on the Jersey shore of New York Bay and Hudson River. The first part of the scheme appears to be the construction of a tunnel from Staten Island, under the Bay to a point south of Brooklyn; it would be 4½ miles long, having 1½ miles under water, and the cost is given at 5 million dollars for the tunnel, or 7 millions in all. The other project is for a tunnel crossing the East River, touching New York, and continuing across Hudson River to Jersey City, affording both local and through services, while an underground line is further suggested for New York. The complete scheme involves 42 miles of tunnel and a cost of 60 million dollars. The Brooklyn section is 6000 ft. long. The tunnel is 26 ft. wide and 20 ft. high, and costing 1½ million dollars a mile. Train cars are at present ferried across to Brooklyn and the Long Island railway.

New York Underground Railway. (See ed. '88.) It was again reported in this country in April '91, that a company for constructing an underground railway had been formed. The total length of the tunnels was given at 42 miles, involving an outlay of 12 millions sterling, and £6000 had been spent in trial borings and preliminary works. Most of the tunnelling will be in rock, and nearly 100 ft. below the surface.

New Zealand. A colony of the British Empire, consisting of a group of islands in the South Pacific, about 1500 miles E. by S. from Australia. There are two large islands: **North Island**, or Ahinemaui, 500 m. by 250, area 45,687 sq. m.; **South Island**, or Te Wahi Pōnamu, 500 m. by 200, area 57,579 sq. m.; also Stewart Island, area 1000 sq. m.; Chatham and Auckland Islands at some distance E. and S., area 377 sq. m. Total area 104,403 sq. m. Population 620,279, exclusive of the Maories, who number 41,969. Capital **Wellington**, pop. (including suburbs) 29,000; chief cities, Dunedin, 46,200; Auckland, 36,000; Christchurch, 37,000. Other rising and important towns, mostly seaports, taken in order of size, are Invercargill, Nelson, Oamaru, Napier, Thames, Wanganui, Lyttelton, Timaru, New Plymouth, Hokitika, Greymouth, Masterton, and Blenheim. Country divided into 63 counties, which are subdivided into ridings and boroughs. The original provinces, now called "provincial districts," have no longer any political importance.—**Main Islands** are separated by Cook Strait, on north of which is **Port Nicholson** and the capital. Coast is much indented by bays and harbours, estuaries and firths. Chief rivers are N. Wairoa, Thames, Waikato, and Wanganui in North Island; Wairau, Buller, Grey, Waitaki, Taieri, Clutha, Mataura, and Waiau, in South Island; also many smaller streams. Surface rugged. Vol-

canoes and volcanic belt across centre of North Island. Alpine chain descends along west coast of South Island. Its eastern slopes are the great grazing region. Lakes numerous. Taupo in North, Wakatipu in South Island are largest. Famous "Hot Lakes" and geyser regions between Taupo and Bay of Plenty, where the **Tarawera Eruption** occurred in June 1886. Government is carried on by a Governor, who is advised by a responsible Ministry. Of the two houses of parliament, the Legislative Council consists of 47 members nominated by the Governor for life, the House of Representatives of 95 members elected triennially on a manhood suffrage. Maori representatives sit in both Houses, two in the Upper and four in the Lower. New Zealand took no part in the Federal Conference of Australasia. There is no State-aided church, but most Christian sects are well provided for. Education is compulsory, free and secular. The New Zealand University is an examining board, chartered to grant degrees. Affiliated to it are the Otago University (Dunedin), the Canterbury College (Christchurch), and University College (Auckland), besides some minor institutions. Ports defended by heavy batteries, mines, and torpedo-boats. There are 10,132 volunteers, and 482 armed constabulary. Manufacture is progressing well, particularly as regards woollens. There are 1806 miles of railway, which extent is being rapidly increased, as well as numerous roads, and water communication. Telegraph line, 4790 miles. There are over 200 daily, weekly and monthly periodicals. The land under cultivation amounted in '89 to 7,527,420 acres. The general elections resulted (Dec. 90) in their representatives being equally divided between the Government and Opposition. Wellington was visited by a flood, which destroyed the records in the cellars of the House of Parliament.—'91. The Budget for '91-2 introduced (Jan. 23rd) estimated revenue at £4,250,000, and expenditure at £4,094,000. A new Cabinet was formed (24th). The Earl of Onslow opened the Parliament at Wellington (27th). The revenue for the financial year '90-1 was £4,316,000, giving an increase of £106,000 over the previous year. Parliament was opened (June 11th). The House of Representatives passed a Bill (Sept. 4th) giving residential suffrage to women, and qualifying them for election to Parliament. A Payment of Members Bill was passed through Parliament, to raise the salary of members to £2400 and to provide that they should not be liable to attachment by any Court, or to seizure under any process. For Ministry, etc., see DIPLOMATIC. The Government of New Zealand have completed an arrangement with Messrs. Eyre & Spottiswoode, of East Harding Street, E.C., whereby the more important of their publications will now be placed on sale in this country. The actuaries' report showed that the total profits of the New Zealand Government Life Insurance Department were £239,000, of which £200,000 was recommended to be divided as bonus. It was announced (17th) that the Earl of Onslow had sent in his resignation on the ground of urgent private affairs.

Next-of-Kin Agents. It was held (Queen's Bench Division, April 10th, '91), that the next-of-kin agent is not entitled to inspect the list of names of persons from whom stock has been transferred by the Bank of England to the National Debt Commissioners as unclaimed.

Apparently, only persons interested, or *bond* applicants on their behalf, are entitled to the inspection, and a next-of-kin agent is held to be neither. It was stated in the course of the case that these agents were in the habit of circulating lists relating to amounts which had long since been paid, and that their lists were frequently used for the purposes of extortion. (*The Queen v. The Bank of England.*)

Niagara Utilisation. (See previous eds.) On Feb. 9th, '91, it was announced that the Cataract Construction Company having invited draft schemes for the utilisation and distribution of about 125,000 horse power, had appointed the following International Commission to adjudicate upon the plans sent in: Sir W. Thomson, F.R.S., president; Dr. Coleman Sellers, Professor of Engineering Practice at the Stevens Institute, Hoboken, N. J.; Prof. E. Mascart, Paris; and Colonel Turietini, Geneva. A second, and four third prizes, were awarded for projects combining the development of power and its distribution; and a first, and two second prizes, for projects for the hydraulic development of the power. The prize takers included competitors at Geneva, Paris, Berlin, Zurich, Buda-Pesth, and in America, and also Prof. A. Lupton, Leeds; and Mr. J. Sturgeon, who conceived a joint hydraulic scheme. No prize was awarded in the section, "Projects for the distribution of the power." In May, it was reported that the water power tunnel had been definitely located by the engineers. It was decided that the portal should be $1\frac{1}{2}$ ft. above the average water level of the lower river, and the tunnel from here should be carried on an up grade of 5.4 per cent., chiefly penetrating limestone rock. In October it was reported in this country that the power tunnel which was commenced on Oct. 4th, '90, was making rapid progress, a total of 2187 ft. having been finished out of 6530 ft., and it was anticipated that the tunnel to the canal would be finished by the middle of Feb. '92.

Nicaragua, a Central American republic, bounded on the N. by Honduras, S. by Costa Rica, W. by the Pacific, and E. by the Caribbean Sea. Is governed by President, Senate, and House of Representatives, elected by universal suffrage. Area 49,500 sq. m.; pop. 500,000. Total revenue in '88 \$3,814,140; expenditure \$4,024,602; imports \$1,735,885; exports \$911,519. Public internal debt \$1,592,000; foreign debt, about \$285,000, contracted in '87. Army about 10,000, including police and militia. Exports, coffee, india-rubber, and cattle.—**History.** Dr. Robt. Sacusa resigned the presidency (Dec. 25th, '90). Col. Ignacio Chacez was appointed Chief Magistrate for two months, to be succeeded by Dr. Sacusa as President for four years. During '91 there were fears of a revolution to oust Señor Sacusa, and precautions were taken by the Government to prevent an outbreak. On Aug. 25rd ex-Presidents Chamono and Zavala, Señor Rivas, Generals Guzman and Rodriguez, were arrested and imprisoned. The prison was attacked by the citizens, and in the fight the chief of police and six soldiers were killed, and fifty citizens shot. The next day the prisoners were escorted to the frontier, and forbidden to return on pain of death. Military law was proclaimed. The proclamation was withdrawn (Sept. 11th). An attempt was made (Oct. 12th) to assassinate the President. The

would-be assassin was captured. For Ministry, etc., see DIPLOMATIC.

Nicaragua Ship Canal. (For previous history, see last ed.) In Dec. '90, the continued progress of the work, especially the dredging of the harbour bar, was reported in this country, also that the Nicaraguan Government Commission had reported that the expenditure stipulated for in the concession had been made, the concession being thus finally confirmed, leaving the company ten years in which to complete the canal. An important statement was cabled from Washington on Jan. 11th, '91, to the effect that Senator Sherman had introduced a bill proposing to give the credit of the Government to the scheme by guaranteeing the payment of the principal and interest of a new issue of bonds. The bill proposed that the capital stock of the company should not exceed 20 millions sterling (the existing nominal stock), and that first mortgage bonds to that amount bearing 3 per cent. be issued, dated Jan. 1st, '91, and payable Jan. 1st, '91, the mortgage to be a first lien, under the laws of Nicaragua and Costa Rica. Mr. Miller, chairman of the company, subsequently (Jan. 28th) stated that this action on the part of the Government was spontaneous. He added that the cost of construction was estimated at 65 million dollars, of which 4 millions had already been spent; the canal would be finished in six years from the time of commencement. In the Senate, on Feb. 20th, Senator Vest, of Missouri, attacked the bill, which was defended by Senator Edmunds, of Vermont. The discussion was concluded on Feb. 27th, when the bill was abandoned, there being a pressure of bills before the Senate. On the night of April 1st, Mr. Warner Miller, President of the Nicaragua Canal Construction Company and party, who were on their way to the scene of operations, were wrecked on the Roncador Reef, 100 miles north-east of Greytown, but fortunately no lives were lost. In the course of a speech delivered at San Francisco, on May and, during his tour President Harrison said he was "a thorough believer" in the canal. The *Engineer* of June 12th, July 3rd and Aug. 14th, gave exhaustive illustrated articles on the canal works, in which it stated that the line finally adopted shows a total length of 169.4 miles, of which 26.79 is in excavation, 56.5 through Lake Nicaragua, 21.6 in the Descado, and San Francisco and Tola basins, and 64.5 through the river San Juan. There are three locks, each at the eastern and western divides.

Nicholas I., the reigning Prince or Hospodar of Montenegro, was b. Oct. 7th, 1841. After an educational course at Trieste and Paris, he succeeded his uncle, who had been assassinated, Aug. '60. He married, in the same year, the daughter of the Vice-President of the Council of State. During '90 the thirtieth anniversary of his accession was celebrated, and a present from the Tsar of Russia was received by the Prince. He was invited to be present at the festivities celebrating the Czar's silver wedding.

Nicoll, W. Robertson, LL.D., was born Oct. 10th, '51, at the Free Church manse, Auchindoir, Aberdeenshire. He studied first at the University of Aberdeen, graduating M.A. in '70; next at the Free Church College, Aberdeen, until '74, when he was ordained minister of the Free Church, Duftown, from which in '77 he was transferred to the Free

Church, Kelso. In succession to Dr. S. Cox, he became *Editor* of the *Expositor*, in '84. In the following year ill-health compelled him to give up public speaking. In Nov. '86 he came to London, and started the *British Weekly*, which has been remarkable for the introduction of new writers to the public. The degree of LL.D. was conferred in '90, upon him by the University of Aberdeen. Dr. N. is the author of many theological works, in addition to a "Life of James Macdonell, of the *Times*" ('89), a "Memoir of Professor Elmslie" ('90), and has been engaged for a long time on "The Victorian Era of English Literature: a Biographical and Critical History." He has projected and edited "The Expositor's Bible," "The Theological Educator," "The Clerical Library," "The Household Library of Exposition," etc. In Oct. '91 Dr. N. commenced the *Bookman*, a monthly literary journal, which quickly attained success.

Niger Districts. A British protectorate in West Africa since 1884. Extends over the delta from the Rio del Key and up the Niger to the Benue, its great eastern tributary. In '87 was added the entire coast from Lagos to the Rio del Key, and territories in the Niger basin acquired by the Royal Niger Company.

Nightingale, Florence, was born at Florence, May 20, 1820. Nursing engrossed her attention from an early age, and she studied at not a few institutions, including Kaiserswerth. She greatly assisted the Government's Sanatorium, Harley Street. The Crimean War led her to offer herself as organiser of nurses at the seat of war. A letter from Lord Herbert, requesting this same service, was on its way to her before her offer reached the Secretary of War. Of her beautiful work at this period, it is unnecessary to speak. The public collected £50,000 as a testimonial of their appreciation, but Miss N. desired that the sum should be used for the foundation of a nurses' training institution. She is *authoress* of "Notes on Hospitals," "Notes on Nursing," both of which books have had a very large circulation.

Nilsson, Madame Christine, one of the greatest operatic singers of the present day, was b. near Vexjö, in Sweden, in 1843. At first she travelled about the country playing and singing at fairs, when M. Tornetholm, accidentally hearing her, made her his *protégée*, placing her under the care of Mr. Franz Berwald, of Stockholm, MM. Masset and Wurtel, at Paris, for her musical education. She made her first appearance, which was very successful, at the Théâtre Lyrique, Paris, in the part of Violetta in "La Traviata." She visited London in '67, and the United States in '70. She again visited London, and sang at Drury Lane. In '83-4 she made a brilliantly successful tour in the United States. In '72 she married M. Auguste Rouzard, who died in '82; and subsequently married at Paris the Count A. de Miranda. In June '88 Mme. N. appeared at a farewell concert at the Albert Hall, and received a rapturous reception. The Comtesse has made a unique collection of fans. In '91 she paid Mr. Sims Reeves the high compliment of singing at his farewell concert.

Nitrate of Soda. See TRADE in '91.

Noms de Plume, etc. The word *nom-de-plume* is not known in French, in which language the proper equivalent is *nom-de-guerre*. The following list of pseudonyms or pen-names deals chiefly with modern and

English or American writers; it includes some initials and maiden names used by married ladies in authorship.

[* implies only occasional or early use.]

- A., Major* C. B. Coles.
A.K.H.B. Rev. A. K. H. Boyd.
A.L.O.E. (= A Lady of England) Charlotte Maria Tucker.
Acheta Domestica Miss L. M. Budgen.
Adeler, Max Chas. Heber Clark.
Alexander, Mrs. Mrs. A. F. Hector.
Alexander the Corrector Alexander Cruden.
**Alcibiades* Lord Tennyson
Punch, 1846.
Ali Baba Aberigh Mackay.
Ally Sloper Chas. H. Ross.
**Almaviva* Clement Scott.
**Amateur Angler* Edward Marston.
Amateur Casual, An Jas. Greenwood.
**Amicus ("Times")* Sir Thos. Fairbairn.
Ange-Bénigne Mme. de Molènes.
Anstey, F. F. Anstey Guthrie.
**Antyanus* Dr. P. Hergenroether.
A Raven's Feather Ll. F. W. Jewitt.
Angles, Mrs. now Mrs. Hungerford
Aristocratic Tont T. Wood.
**Atlas ("World")* Edmund Yates.
Auber Forrester Anne Aubertine Woodward.
**Augustsohn, W.* W. von Kotzebue.
**Aunt Fanny* Mrs. Fanny Barrow.
"Hester Miss G. M. Craik.
"Judy Mrs. Alfred Gatty.
"Kitty Maria Jane Macintosh
"Louisa Mrs. Valentine.
Autocrat of the Breakfast Table O. W. Holmes.
Azamat Batuk N. L. Thueblin.
B ("Times") Lord Bramwell.
**Bab* W. S. Gilbert.
**Baptiste* Alphonse Daudet.
Barker, Lady now Lady F. N. Broom.
Barrister ("Sat. Rev.") Sir J. F. Stephen.
Basil Richard Ashe King.
Beaumont, Averil Mrs. Marg. Hunt.
Bede, Cuthbert Rev. Edw. Bradley.
Beet-Master Dr. John Cumming.
Bell, Acton Anne Brontë.
"Currier Charlotte Nicholls (n. Brontë).
"Ellis Emily Jane Brontë.
Bertall Chas. A. D'Arnoxx.
**Birwick, Mary* Adel. Anne Procter.
Besieged Resident in Paris H. Labouchere.
Baltina Eliz. von Arnim.
Bibliophile Jacob Paul Lacroix.
Buckerdye, John C. H. Cook.
Bickerstaff, Isaac Jon. Swift; and Steel in *Tatler*.
Bideford Postman E. Caperne.
**Biglow, Hosca* J. Russell Lowell.
Billings, Josh Henry W. Shaw.
Bly, Nellie Elizabeth Cochrane Pink.
Bodkin, Tammas W. D. Latta.
Boldredwood, Rolf T. A. Browne.
**Bon Gaultier* Sir Theod. Martin and W. E. Aytoun.
**Boz* Chas. Dickens.
Braddon, Miss M. E. now Mrs. John Maxwell.
Breitmann, Hans Chas. G. Leland.
**Brooke, Nelsie* Mrs. E. Ross.
Brown, Mrs. Geo. Rose.
Brown, Pisistratus William Black.

Brown, Tom . . . Thos. Hughes.
Browne, Matthew . . . W. B. Rands.
Browne, Phillis . . . Mrs. Hamer.
Brownrigg, Henry . . . Douglas Jerrold.
Buntline, Ned . . . E. Z. C. Judson.
Bystander . . . Goldwin Smith.
C. . . . Mrs. Southey.
C. A. W. . . . C. A. Wheeler.
Caballero, Fernan . . . Cecilia Bohl de Faber y Larrea.
Cahban . . . M. Bergerat, also Jules Clartie.
Carle . . . Victorien Sardou.
Carmen Sylva . . . Queen of Roumania.
Carroll, Lewis . . . C. L. Dodgson.
Caveat Emptor . . . Sir Geo. Stephen.
Cavendish . . . H. Jones.
Caxton, Pistratus . . . 1st Lord Lytton.
Cecil . . . Cour. Tongue.
Cecil, Davenant . . . Rev. Deiwent Cole-ridge.
Censor ("Don't") . . . O. B. Bunce.
Cham (caricaturist) . . . Am. de. de Noé.
Champfleury . . . Jules Fleury.
Charlist Parson, A . . . Chas. Kingsley.
Cherith . . . Mrs. Fanny Surtees.
Cincinnati . . . Wm. Plumer.
Claribel (song writer) . . . Mrs. Barnard.
Neishbotham, Jrd. . . . Sir W. Scott.
Queen of the World . . . O. Goldsmith.
Chadpole, Tim . . . Richard Lower.
Ch. . . . Joseph Addison.
Chatterback, Capt. . . . Sir Walter Scott.
Coffin, Joshua . . . H. W. Longfellow.
Columbanus . . . Dr. C. O'Connor.
Conway, Hugh . . . F. J. Fargus.
Cornwall, Barry . . . B. W. Procter.
Cotton, R. T. . . . Mortimer Collins.

Zadriel . . . Lieut. R. J. Morrison.
**Zeta* . . . J. Anthony Froide.
Zeta ("Graphic") . . . John Lovell.

Norfolk Island. Discovered by Capt. Cook, Oct. 9th, 1774; 600 miles from New Zealand, 900 miles from Australia; length 5 miles, breadth 3 miles. Pop. (Dec. 18th '89), 713. Occupied as a penal settlement Aug. 15th, '26; abandoned May 7th, '55. Mutineers from the *Bounty* removed there May '56. Governed by an annually elected chief magistrate and two councillors, who take their instructions from the Governor of New South Wales.

Norman, General Sir Henry W., G.C.B., G.C.M.G., C.I.E. Governor of Queensland, has had a distinguished military career. He

joined the Bengal army in 1844, and served through the Indian Mutiny of '57-9. Was present at the relief of Lucknow, where his horse was shot under him. Appointed in '84 the Governor of Jamaica, and, on the occasion of colonial opposition to the choice of Sir H. Blake, Sir Henry received the Governorship of Queensland, which he assumed in April '89.

Norman-Neruda, Madame (Lady Hallé), the well-known violinist, comes of a family which for generations has been famous for its musical talent, and was b. at Brinn in 1840. After education by Jansa, Wilhelmine Neruda made her *début* with her sister at Vienna in '46. She at once excited enthusiasm by her wonderful execution despite the smallness of her hands. After a continental tour she made her first appearance in London at a philanthropic concert in '49, playing one of De Beriot's concertos. Several ensuing years passed in travelling, for the most part in Russia. In '64 Mlle. N. played at the Conservatoire, Paris, and popular enthusiasm at once hailed her as a queen of the violin. After her marriage with a Swedish musician, Ludwig Norman she again visited the Metropolis, and played at concerts in '66, taking first violin at the Popular Concerts. Every succeeding musical season the English have welcomed Mme. Norman-Neruda at the chief classical concerts. Her second marriage (with Sir Charles Hallé, the eminent pianist) took place in July '88 at the Brompton Oratory. In '91 both Sir Charles and Lady H. went on a musical tour to Australia, which was attended with great success, returning to England in the autumn.

North Sea and Baltic Canal (see 1889 and previous editions). This canal was commenced on June 3rd, '87, and is described in the *Times* of Dec. 6th, '89, as portion of a scheme of German coast defence. It is now under construction, and is intended to unite the Gulf of Kiel with the mouth of the Elbe, running from Holtenau by way of Rendsburg to a point midway between Brunsbüttel and St. Margarethen, a few miles below Hamburg. Its latest measurements are thus given: 61 miles long, 196 feet broad at water level, 85 feet at bottom, and 28 feet deep, there being a lock at each end. The largest German warship will be able to enter at all states of the tide, and pass through in eight hours. It was also stated in the article that it was intended to supplement this strategical waterway by means of another canal traversing Hanover from Neuhaus, opposite Brunsbüttel to Bremerhaven, at the mouth of the Weser; and it will then be possible to pass between Kiel and Wilhelmshaven on what are practically inland waters.

North, Sir Ford, was b. at Liverpool, 1830. Ed. at Winchester and at Oxford. Called to the bar at the Inner Temple ('56). Obtained a large practice in the equity courts and at the Lancaster Chancery and Palatine Courts. Q.C. ('77). On the elevation of Mr. Justice Lindley to the Court of Appeal ('81), Mr. North was appointed a judge of the Queen's Bench Division of the High Court of Justice. He was subsequently transferred to the Chancery Division, for which his training has especially fitted him.

Northern Territory. That portion of South Australia (q.v.) lying north of 26° S. lat., and between 120° and 138° E. long. Annexed to the colony in 1863. S.W. capital Palmerston (on the noble harbour of Port Darwin). The outlet for a very large extent of country, and the

commercial centre of the trade of the north coast. The Territory possesses a coast line, counting the chief inlets, of 2,000 miles. Local administration, with a Resident and officials appointed by Government of mother colony.

North-West Territories. A province or group of provinces of the Dominion of Canada, as yet hardly organised. Including Labrador, District of Keewatin, and Great Prairie Territory to Rocky Mountains; area 2,553,337 sq. m.; pop. 56,446, and 45,472 aborigines; taken as the region westward from Lake Superior to the Rocky Mountains, and northwards from the boundary to the 60° parallel, area 500,000 sq. m., a territory equal to the British Islands, France, and Germany combined. Capital **Regina**. Contains great lakes and large navigable rivers—the Mackenzie, Slave, Peace, Saskatchewan, among the chief. Great fertile region, similar in character to Manitoba, divided into districts: **Assiniboia**, 95,000 sq. m.; **Saskatchewan**, 114,000 sq. m.; **Alberta**, 100,000 sq. m.; **Athabasca**, 122,000 sq. m. These are destined to become separate provinces. Resources enormous, agricultural, pastoral, mining. 10,000 miles navigable rivers. Railway across. — Administered by Lieut.-Governor and Council of five. Electoral districts in course of formation. General features, land laws, etc., as in **Manitoba** (*q.v.*) See **CANADA**; and for Executive Council, etc., see **DIPLOMATIC**.

Norwegian Political Parties. In the Storting (Feb. 23rd, '91) a motion, demanding greater independence for Norway in the foreign policy of Norway and Sweden, was carried by 59 to 55 votes, with the result that M. Stang's ministry resigned. Attention was directed to the position of politics in Norway during March '91 by the overthrow of the Cabinet presided over by M. Stang. The Liberal leader, **M. Steen**, after much difficulty, succeeded in forming a new ministry as follows: President of the Cabinet and Minister of Finance, **M. Steen**; Minister of Public Works and Revision, **M. Nyom**; Minister of Education and Public Worship, **M. Wexelsen**; Minister of Justice, **M. Gram**; Minister of the Interior, **M. Konow**; Minister of National Defence, **M. Holst**. In the Storting parties were divided as follows: Liberals, 38; Conservatives, 53; Moderate Liberals, 23. The first returns of the elections to the Storting were announced in Sept. '91. Of 114 elections, 98 had been concluded (Nov. 18th), leaving parties in the following position: Anti-Unionists, 58; Moderate Liberals, 14; and the Right, 26.

Norway. See **SWEDEN**.

Norwich, Rt. Rev. and Hon. John Thomas Felham, D.D., Lord Bishop of, was b. in 1811, and ed. at Westminster School and Christ Church, Oxford. He was successively rector of Burgh Apton, incumbent of Christ Church, Hampstead, and rector of Marylebone. Appointed **Bishop of Norwich** '57.

Nossi Bé. A small island on N.W. coast of Madagascar, held by France since 1843; and a flourishing trade-port.

Nova Scotia. A province of the Dominion of Canada. It is a peninsula connected by narrow isthmus with New Brunswick. Incorporated with it is **Cape Breton Island**, formerly distinct colony. Area 20,907 sq. m.; pop. 440,572. Capital **Halifax**, pop. 40,000; a fine city and

harbour, also an Imperial military and naval station. Divided into 18 counties.—Administered by a Lieut.-Governor and Executive. The people elect a Legislative Council and a House of Assembly. The Province has 10 seats in the Dominion Senate and 21 in the House of Commons. Education receives some Government support, and is free and to some extent compulsory. The colony was originally a French one, and then called **Acadia**; ceded to England 1714; entered Dominion 1867.—'91. A terrible explosion occurred (Feb. 21st) at the Springhill mines; the death-roll was 100. A terrible fire occurred in Halifax (Oct. 2nd), which destroyed 10 wharves and 35 warehouses, 1500 barrels of petroleum, and an enormous quantity of flour, fish, etc., were destroyed. See **CANADA**; and for Executive Council, etc., see **DIPLOMATIC**.

Nurses, Queen Victoria's Jubilee Institute for (Rural District Branch). The object of this branch of the Institute is to promote, in country districts, trained midwifery and nursing. Under the name of the Rural Nursing Association this work was for some time performed, but now that association has become absorbed in the Rural District Branch of the Institute. **Hon. Sec., Mrs. Malleson, Dixon Manor, Winchcombe K.S.O., Gloucestershire.**

Nurses, Royal British Association of, is a professional organisation of trained nurses, with a membership of over 3000. Its objects are to improve the status of the nursing profession and to carry out benevolent schemes for the advantage of members. It seeks incorporation by Royal Charter, with power of registering nurses and midwives. Pending the granting of the Charter, the Association has formed a Register of Trained Nurses. Over 1700 nurses have already been registered, and the first copy of the register (*as. 6d.*) issued. **Sec., Miss Paul, 8, Oxford Circus Avenue, Oxford Street, W.**

Nurses, The Royal National Pension Fund for, which was inaugurated in 1887, is now established on a permanent basis, under the presidency of Her Royal Highness the Princess of Wales, with His Royal Highness the Prince of Wales as patron. The founder of the Fund is **Mr. Henry C. Buidett**, and its successful establishment was largely due to the munificence of Lord Rothschild, Mr. Henry H. Gibbs, M.P., Mr. E. A. Hambro, and the late Mr. Junius S. Morgan, who first deposited with the Accountant-General in Chancery, as security for the policy-holders, and then made over absolutely as a free gift to the Fund, the princely sum of £20,000. Mr. Junius S. Morgan gave a second donation of £5000 to the Donation Bonus Fund; and others have given donations and subscriptions, which have raised this Fund to over £40,000. The Benevolent Fund, which was raised by the nurses as a memorial to the late Junius S. Morgan, and which has been largely supplemented by members of Mr. Morgan's family, has now been fully constituted, and is administered by trustees and an advisory committee in connection with the Pension Fund. The constitution of the Royal National Pension Fund provides for the continuous growth of the Donation Bonus Fund and Morgan Benevolent Fund by means of donations and annual subscriptions from those who are interested in nursing, and from authorities who train and employ nurses. Persons

wishing to become governors of the Pension Fund may qualify by annual subscriptions of two or five guineas, or by the payment of one sum of £25 or £50 respectively, according to the privileges desired. The chief object of the Fund is to afford to nurses an absolutely safe means of providing, at the lowest possible cost to themselves, an allowance during incapacity for work caused by sickness or accident, and a certain income for their declining years. This object will be carried out by receiving and investing such fixed periodical sums as those who join the Fund can afford, by adding

to the pensions all the profits arising from any source, and by supplementing those sums from a Donation Bonus Fund, created and maintained by those interested in nurses and nursing institutions. Office, 8, King Street, Cheapside, E.C. **Manager**, Mr. Edward T. Clifford.

Nyassa. A great lake in the south-east of Central Africa, 350 miles long, averaging 38 broad; 1600 ft. above the sea level, average depth over 100 fathoms, teems with fish. See ZAMBESI, MOZAMBIQUE, etc.

Oaks, The. See TURF.
Oath, Parliamentary. See HOUSE OF COMMONS.

Obituary (Dec. '90 to Nov. 18th, '91).

*. The date of decease is given after each name, and in cases in which it could not be exactly ascertained the letter *a* is affixed to denote that the death took place at about that time. The italic figures after each name indicate the age of deceased. Where no mention is made of the year, the death took place in '91.

ROYALTY AND RULERS.

Baden, Princess Elizabeth of, *c.* of Grand Duke (May 15), 55

Bakari, Fumo, formerly Sultan of Vitu (Jan.)

- Osborn**, Alderman Samuel, mayor of Sheffield (July 7)
- Peyrat**, Alphonse, French senator and journalist (Jan. 1), 78
- Pike**, Chas., C.M.G., treasurer of the Gold Coast since '85 (Aug. 9), 41
- Pine**, Sir Benjamin C. C., K.C.M.G., who held official appointments at Sierra Leone, Natal, Gold Coast Settlements, and was Governor of W. Australia, the Virgin Islands, and the Leeward Isles, at various periods (Feb. 26), 77
- Piper**, Count, Swedish Minister Extraordinary and Envoy Extraordinary in London '77-89 (Sept. 24), 71
- Pouyer-Quertier**, M., French Minister of Finance

'71, and great advocate of Protection (April 2), 70

Fryce, Robt. Davies, Lord-Lieutenant of Merionethshire since '84 (Aug. 21), 71

Quinton, James Wallace, of the Bengal Civil Service, who, after sending *ultimatum* to the Regent demanding the surrender of Senapati, was killed at the Manipur disaster (March 24)

Rao, Sir Madhava, K.C.S.I., one of the foremost politicians in India (April 4)

Richard, Emile, Pres. of the Paris Municipality, to which office he was elected in '90 (Dec. 27, '90), 47

Rittinghausen, a leader of the German democracy (Jan. 5)

Robertson, Sir John, K.C.M.G., three times Premier of New South Wales (May 7), 75

Roehow, Herr von, Vice-Pres. of the Prussian Upper Chamber (Jan. 16a)

Saadullah Pasha, Turkish ambassador at Vienna (Jan. 18)

St. John, Sir Oliver Beauchamp Coventry, who acted as resident in Hyderabad, Cashmir, Mysore, etc. (June), 53

Sanjo, Prince, President of the Japanese Court Council and Keeper of the Great Seal (Feb. 16a)

Sinkinson, Edward J., LL.D., Financial Sec. to the Supreme Govt. of India (Jan. 1), 41

Stoasa, Chevalier C. D. W., Consul for Servia at Liverpool (April 2), 69

Stokes, Scott Nasmyth, who was senior Roman Catholic Inspector of Schools (Aug. 1), 70

Swift, Hon. J. F., U.S.A. Minister to Japan (March 10)

Thonissen, Jean Joseph, at one time Belgian Minister of the Interior (Aug. 16), 75

Tseung-Kwotsuen [or Kuo-chuan], famous Chinese statesman, who commanded the Imperial forces in the defence of Hunan in '52; governor of Shansi from '65 to '81, and became Viceroy in '83 of the Liang or Two Kiang; an enlightened member of a very distinguished Chinese family (Dec. 24a, '90), 71

Weld, Sir Fredk. A., who was premier of New Zealand '64-5, and held, subsequently, many appointments (July 20), 68

Windom, Hon. Wm., United States Secretary of the Treasury, who died suddenly during a banquet in New York, at which he had delivered a speech on finance (Jan. 29), 63

Windthorst, Dr. Ludwig, the leader of the Roman Catholic party in the German Reichstag, which he entered in '67 (March 14), 79

Winram, William, Speaker of the Manitoba Legislature (Feb. 12)

Yao, Chang, governor of the Shantung province of China (Oct.)

York, Alderman Matthews, Lord Mayor of (Sept. 6), 53

COMMERCIAL.

Antrobus, Robert L., partner in Coutts' Bank (March 5), 33

Beauchamp, John, well-known supporter of Wesleyan movements (Dec. 21, '90), 61

Beck, Joseph, L.C.C., and Chief Commoner of the Corporation of London (April 18), 62

Bullough, John, well known in Accrington (Feb. 25), 53

Chapman, D. B., who retired from the firm of Overend, Gurney & Co., nine years previous to that firm's fall (April 18), 67

Cliff, William, most benevolent citizen of Liverpool, engaged in shipping (June 2), 79

Crossley, Louis John, inventor of the "Cross-

ley" telephone transmitter, for which he received £20,000 (Sept. 1), 49

Debenham, Thos. N., of Messrs. Debenham, Tewson, Farmer, & Bridgewater (Nov. 12)

Deek, M., the head of the famous pottery works at Severs, in which he had commenced as a journeyman (May 16)

Derbyshire, George, Inspector of the London Bankers' Clearing-House for the last 40 years (May 9), 69

Douglas, Archibald D. B., director of the Naval Construction and Armaments Company, Ltd. (April), 52

Fox, Edwin, member of the well-known firm of auctioneers (March 30), 71

Gabriel, Ald Sir Thos., Bart. See BARONETS.

Hansard, Thomas Curson, who was connected for many years with the editing of "Hansard's Debates" (Nov. 12), 78

Jamrach, Chas., eminent naturalist; importer and exporter of all kinds of animals (Sept. 6), 76

Kennard, Coleridge John, managing director for some time of the firm of Heywood, Kennards & Co., Ltd., and founder of the *Evening News* (Dec. 25, '90), 61

Latter, Henry J., general manager of the Central Bank of London, and formerly connected with the Bank of England (Jan. 9), 68

Lock, George, one of the original founders of the eminent publishing firm of Ward and Lock (now Ward, Lock, Bowden, & Co.) (Aug.), 59

M'Henry, James, well known in railway circles (May 20), 74

Mocatta, A. de Mattos (April 18), 38

Morris, Ashurst, partner in the well-known legal firm (Dec. 17, '90), 27

Scott, Hudson, head of the firm of well-known Carlisle lithographers (Feb. 11), 83

Tait, Sir Peter (Dec. 15, '90), 62

Tobin, James Aspinall, ex-Mayor of Liverpool (April 16), 73

Walker, Benjamin, head of the firm of Tannett, Walker & Co. (April 14), 70

Walker, John, general manager of the North British Railway Co. (April 24), 62

Williams, Sydney, member of the firm of Williams & Norgate, the well-known publishers (Sept. 1), 74

Wood, Richard J., who was manager of the *Weekly Dispatch* for 50 years (April 10), 86

MISCELLANEOUS.

Adam, William, of Taunton, reputed to be centenarian (Feb. 22), 106

Baines, William, whose imprisonment for refusal to pay church rates excited political interest in '40 (Jan. 14a), 84

Barkas, Thomas Pallister, distinguished citizen of Newcastle (July 13), 73

Barnum, Phineas T., who had been before the public for 60 years as lecturer, author and proprietor of the "Greatest Show on Earth" exploited General Tom Thumb, Madame Jenny Lind, and other celebrities; visited England in '89 in connection with his show at Olympia (April 7), 80

Barratt, Edward, member of the Surrey County Cricket Eleven '76-85 (Feb. 27), 46

Beal, James, member of the London County Council, hon. sec. Metropolitan Municipal Association; well-known politician and agitator for various reforms (June 11), 62

Blavatsky, Helena Petrovna, co-founder of Theosophy, daughter of Colonel Peter Hahn

was born at Ekaterinoslov in '31. She was married in '48 to General Blavatsky, who was nearly four times her own age. The marriage was a failure, and Mdme. Blavatsky left her husband, and spent several years travelling in Europe, America, and India. Her biographer asserts that in '56 she penetrated in disguise into Tibet. She returned to Europe in '58, and took part in the spiritualist movement. She again visited India, and remained there till '71. In that year she tried, at Cairo, to found a spiritualist society, but without success. Mdme. Blavatsky went to the United States of America in '75, and after some years' residence she became a naturalised American citizen. It was in America her connection with spiritualism ceased. In Oct. '75, in conjunction with Colonel Olcott and others, she founded, according to her account, under the guidance of certain sages of the East, the Theosophical Society. She went again, in '80, to India, to spread Theosophy (*q.v.*), and remained there till '84. Since that date she lived mainly in London, and continued to devote her energies to Theosophy until her death (May 8), 60.

Bodichon, Madme. (*née* Barbara Leigh Smith), who took a foremost position in the establishment of Girton College and other educational and social movements (June 11), 61.

Bowes, John L., generous resident at Grasse (Aug. 20), 65.

Burnett, Lionel, c.s. Mrs. Hodgson Burnett, the authoress, who was understood to have sketched the character of "Little Lord Fauntleroy" from him (Dec. 7, '90), 16.

Cobden, Margaret, y. d. late Richard Cobden, M.P. (Sept. 29), 59.

Colfavru, M., head of the Grand Orient Freemasons (May 18), 71.

Collins, George, member of the School Board for London, and President of the National Union of Elementary Teachers (April 24).

Crampel, Paul, French explorer in Africa (April 9).

Cruikshank, Eliza, wid. of George Cruikshank, the famous cartoonist (Dec. 13, '90), 82.

Dominis, John Owen, consort of Queen Liliuokalani (Aug. 27).

Drummond, Maria, wid. of Thomas Drummond, Under Secretary for Ireland '35-40; she was the adopted *d.* of "Conversation Sharp," and was widely acquainted with various celebrities of the day (Jan. 15), 80.

Evans, Mrs., mother of the Lord Mayor of London (Nov. 5).

Gosden, John, well-known horse breeder (Nov. 81).

Grievos, Mackenzie, well-known supporter of the French turf (Jan. 4), 80.

Harrison, W. W., M.A., of Brasenose College, Oxford, who had been Esquire Bedell for 30 years, and was the last to fill that office (March 62).

Hannay, Mary Agnes, wid. Dr. Alexander Hannay (Oct. 23).

Haydon, George H., who did much exploration work in Australia fifty years ago (Nov. 9), 69.

Hornby, Augusta Eliza, w. Rev. Dr. J. J. Hornby, Provost of Eton (June 3).

Hunter, Joseph, Yorkshire county cricketer (Jan. 22), 55.

Hutchings, Wm. A., superintendent of the B. district Metropolitan Fire Brigade (Aug. 10), 51.

Jerome, Leonard W., father of Lady Randolph Churchill (March 3), 73.

Lewes, Charles Lee, c.s. late Geo. Henry Lewes; he was constituted the residuary legatee of "Geo. Eliot"; returned to the London County Council as one of the representatives of St. Pancras; occasional writer in the Reviews (Feb. 26), 48.

Lort, William, well-known judge at agricultural shows (May 23), 67.

Masanoo, Prof. Nakamura, known as the "Japanese Socrates;" translator of several English works, including Mill's "Essay on Liberty," into Japanese; life member of the Japanese House of Peers (July), 67.

Midwinter, W., formerly member of the Gloucestershire County Cricket Eleven (Dec. 2, '90), 38.

Mundella, Mary, w. of the Rt. Hon. A. J., M.P. (Dec. 14, '90).

Nightingall, John, well-known jockey and trainer (Nov. 13), 58.

Oko Jumbo, well-known opponent of King Ja Ja (July 27), 70.

Parr, George, veteran cricketer, who made his first appearance at Lord's in '45; captained the Notts County team for some years (June 23), 65.

Paulsen, Louis, great German chess-player (Aug. 18).

Peel, Adelaide, w. of the Rt. Hon. A. Peel, M.P., Speaker of the House of Commons (Dec. 5, '90).

Perceval, Louise, d. of the late Mr. Spencer Perceval, who was assassinated when Premier in 1812 (Sept.), 87.

Pilling, Richd., who figured as wicket-keeper in the Lancashire County Cricket Eleven '77-89 (March 28), 35.

Quain, Isabella Agnes, w. of Sir Richard Quain, Bart., M.D. (Oct. 25), 63.

Redpath, James, Irish Nationalist lecturer (Feb. 9), 57.

Reed, Margaret, wid. Sir Chas. Reed, M.P. (June 9), 73.

Waddington, Madame, mother of the French ambassador in London (July 3), 91.

Villers-Wilkes, Emma, philanthropic benefactor of Birmingham (Sept.).

O'Brien, Sir Peter, Bart., Lord Chief Justice of Ireland, is the son of Mr. J. O'Brien, M.P. for Limerick 1841-52; was ed. at Trin. Coll., Dublin, and called to the bar '65. Appointed C.C. '80, and Solicitor-General of Ireland in '87, becoming Attorney-General a few months after. In the administration of the Crimes Act of '87 Mr. O'Brien incurred much unpopularity, being concerned in the Gweedore trials and the case of Father M'Fadden. His elevation to the Bench as Lord Chief Justice was notified towards the end of '89, and was the subject of discussion in the House of Commons. In June '91 he was created a baronet.

O'Brien, William, M.P., was b. in 1852, and was ed. at the Diocesan Coll., Cloyne. Devoting himself to journalism, he wrote for the *Freeman's Journal*, and became connected in a prominent manner with *United Ireland*. Entered parliament as a Nationalist; represented Mallow '83-5, and the S. Div. of co. Tyrone '85-6. He was elected as M.P. for N.E. Div. of Cork in '87, which constituency he still represents. He was committed to prison in '88, under the operation of the Crimes Act, his imprisonment exciting much interest from various incidents connected therewith. During '90 he published a novel entitled "When we were Boys," which,

dealing with Irish life, attracted much attention. Being summoned to appear at Tipperary on a political charge in Sept. '90, he escaped with Mr. Dillon to Cherbourg, and sailed for the United States, where he addressed many meetings. Arrested, and imprisoned in Ireland (Feb. '91), on this charge. Released from Galway gaol, Mr. O'Brien delivered an important speech at Malrow in Aug. '91.

O'Connor, Thomas Power, M.P., was b. at Athlone, 1848; graduated M.A. Queen's Univ. From an early age has been engaged in literary work both in Dublin and London. Was elected for Galway at the general election of '80 as a Home Ruler, and took a prominent part in the debates in Parliament. Visited America for the Land League in '81. Was present at the *Irish-American Convention* of '81, with Mr. Haly (q.v.) and Father Sheehy. Returned to England in May '82. In '85 Mr. O'C. was elected for the Scotland division of Liverpool, and for Galway borough, but chose to represent the former. Has written "Lord Beaconsfield: a Biography," "Gladstone's House of Commons," "The Parnell Movement," "Dead Man's Island," and many tales and essays. **President of the National League in England and Scotland.** Was the founder, in '88, and the first editor of the *Star*, but severed his connection with this newspaper in July '90. After a visit to the United States he founded the *Sunday Sun* in May '91. He wrote a biography of Mr. Parnell in October.

Oddfellows, Independent Order of (Manchester Unity, Friendly Society). According to the report, ending July '91, the total adult membership is 673,073. It has also 65,120 juvenile members. The total capital of the Order is £7,630,228 15s. 10d. The summary of receipts and expenditure for the year ending December 31st, '90, is to the following effect. Receipts—contributions to sick and funeral fund, £736,315 8s.; interest, £257,421 7s. 11d.; admission, £7,296 10s. 4d. Expenditure—sickness benefits, £614,240 10s.; funerals, £138,619 19s. 6d. Excess of receipts over expenditure was, therefore, £248,175 5s. 9d. **Grand Master**, John Bythway, Station Hill, Kidderminster. **Secretary**, Thomas Collins, 97, Grosvenor Street, Chorlton-on-Medlock, Manchester.

Ohio and Lake Erie Ship Canal. The report of a Commission appointed by the Legislature of Pennsylvania two years ago was published in this country in April '91. They recommended a route from Lake Erie to Conneaut Lake, thence through the Shenango Valley of Western Pennsylvania to Pittsburg, 129 miles. The dimensions are—depth, 14 ft., with locks to pass a vessel 300 ft. long by 44 ft. beam; and to supply the summit level of the canal near Pierpont, eight reservoirs were proposed, with an average storage capacity of 2,050,412 cubic ft. The total cost is estimated at £26,375,190. The Commission estimated that, by the year 1900, the stock of ore to come from the lake regions will be 8,507,000 tons annually.

Oldham Co-operative Cotton Mills. Nowhere has the co-operative, or limited liability, principle been applied to production on a larger scale, or with greater results, than in the Lancashire town of Oldham. Industrial enterprises, such as machine-works and manufacturing sheds, as well as banks and insurance companies, are carried on with great spirit by co-operative associations of workpeople. The co-operative cotton-mills, however, give the town

a distinctive character. The Oldham Industrial Co-operative Society were pioneers in establishing the Sun Mill in '58 as a manufacturing, and afterwards as a spinning mill. Between '67 and '75 a number of similar ventures were started, the years '74 and '75 seeing a "floating mania." This was followed by the severe crisis of '76-'79, during which time quarterly dividends, ranging, in twenty-three of the largest mills, from 5 to 30 per cent., gradually disappeared, and an estimated depreciation of over £1,000,000 took place in the shares of sixty limited liability mills. The co-operative mills, however, proved themselves able to meet the strain of bad times, and to the rigid economy and constant supervision in the management of the mills is to be attributed, in a great measure, the success of the cotton industry of Great Britain in its contest with foreign competition. At the beginning of '91 the joint-stock spinning companies numbered 85, with a share capital of £3,291,803; and an indebtedness, through loans, etc., of £3,020,002. The total profit gained from the previous twelve months' working was £375,303, or 7½ per cent. per annum. Encouraged by this success, and wishing to free themselves from the control of the Liverpool Cotton Exchange, the managers of the Oldham and Ashton districts' cotton-mills, unfortunately, in many instances, undertook speculations in cotton "futures." The great shrinkage in the prices of cotton and yarn during the summer of '91 led to disappointing results, and severe losses were announced in the working of many mills at the stock-taking for the third quarter of the year. Out of 43 companies making declarations, 28 showed losses as against 15 announcing profits.

Oliphant, Mrs. Margaret, one of the most vigorous and popular of modern novelists, was b. near Musselburgh, Midlothian, 1828. Her maiden name was Wilson. In addition to her numerous works of fiction (the first of which—"Passages in the Life of Mrs. Margaret Maitland of Sunnyside"—established her reputation before she was twenty-one), she has contributed "Dante" and "Cervantes" to the well-known series "Foreign Classics for English Readers," and written "S. Francis of Assisi," "The Makers of Florence," and "Literary History of England." In '88 she published "The Second Son," and a "Memoir of Principal Tulloch, D.D.," and in '89 "Neighbours on the Green"; "Lady Car: the Sequel of a Life"; and "A Poor Gentleman." Her novels are remarkable for their accurate delineation of Scottish characteristics. Her recent works include "The Duke's Daughter and the Fugitives," "Kirsteen," "Mrs. Blencarrow's Troubles," and "Sons and Daughters" ('90), "Janet," "Royal Edinburgh," and "The Marriage of Elinor" ('91).

Omnibuses, Metropolitan. These were started in London, in 1829, by Mr. Shillibeer, formerly a coachmaker in Paris. They were drawn by three horses, and carried 22 persons inside. In 49 smaller and far more convenient buses began running in London, which conveyed 12 passengers inside and 2 outside. In '57, outside seats along the centre of the road were introduced, and in '81 the London Road Car Company first used garden seats across the top of their buses, so that passengers using them face the front. Improved staircases were also provided by that company for outside passengers. The London Omnibus Carriage Company have recently further added to the

comfort of inside passengers by placing the wheels under the body of their vehicles, whereby broader seats and a wider passage between them is provided. **Statutory regulations** were made for omnibuses in the metropolis in '53. The number of omnibuses for which **proprietors' licences** were issued in '90 was 2210, being 118 in excess of those granted in '89. Last year 168 **new omnibuses** were brought into use, and the builders have adopted in them various improvements. Thirty-five 'buses were rejected as unfit for public use when submitted for a licence, as the regulations were not complied with. As the result of monthly night inspections during '90, 29 'buses were reported as unfit for use, and notices were served on the proprietors, forbidding their further use until again seen and found fit. The attention of the Commissioners of the Police for the metropolis has in several instances been drawn to the smallness of the horses used in hauling 'buses; and in every case where there appeared reasonable grounds for the complaint, the use of such horses for these vehicles was prohibited. The want of **uniformity in the fares** of metropolitan omnibuses has been the cause of many complaints, but these must be expected so long as the law permits a proprietor to select his own route and charge his own fares. Although overcrowding of 'buses extensively prevails, the police do all they can to stop this grievance. The **London General Omnibus Company**, established in '56, owns by far the greatest number of vehicles and horses in the metropolis. In the half-year ending June 30th, '91, the number of **passengers** carried by the company's omnibuses was 53,843,477. The average number of these vehicles working on **week-days** was 860, and on **Sundays** 735. In consequence, however, of the strike by drivers, conductors, horse keepers etc., the omnibuses only ran 25 weeks during the last half-year. The **average receipts** for passengers per omnibus per week was £14 16s. 0.28d., and the average fare per passenger 1.42d. The average earnings per mile run amounted to 8'49d., and the total number of **miles run** was 9,001,730. The gross receipts for the half-year ending June 30th, came to £318,275 11s. 9d. for ordinary omnibus traffic and private hire, £7,789 11s. 8d. for advertising in and upon omnibuses, £1104 10s. 11d. for manure, making the **total receipts** £326,779 14s. 4d. The exceptionally severe and long winter was the main cause of the unsatisfactory traffic receipts compared with the corresponding period of '90; but the loss of a week's earnings owing to the strike also seriously affected the total for the half-year. The **total expenses** on revenue account during the half-year were £352,811 2s. 8d., being an increase of £34,993 13s. 1d. over such expenses in the corresponding half-year of '90. In their last report the directors state that "the large increase in the expenses of the half-year arises principally from three causes, viz., the higher price paid for corn, the heavy mortality of the horses, and the increase of 19 in the average number of omnibuses run. The average price of maize in half-year ending June 30th, '90, was 19s. 1d. per quarter, in half-year ending June 30th, '91, it was £1 7s. 4½d. per quarter, an increase of 8s. 3½d. per quarter. The increase in the cost of grain in the half-year as compared with the corresponding half of '90 was £20,595 3s. 6d. The number of **horses lost by death and sold** in half-year ending June 30th, '90, was 1002; in the past half-year

the number sold and died was 1237, an increase of 235, involving an extra expenditure of £7454 12s. 6d." In the beginning of June last the directors instituted a **ticket check** on the receipt of fares by the conductors, and at the same time considerably increased the wages of their men. This action was immediately followed by a **strike** (see LABOUR, '91) on their part, nominally against the long hours they had to work and for further increase in their pay. The Board at once conceded the shorter hours, but without the increased pay demanded, and five days later the strike ceased. The loss suffered by the company owing to the total stoppage of their business for a week was very heavy. The decrease in the hours of labour increases wages to a large amount, but the use of tickets has greatly increased the gross receipts of the company, and is likely to further improve its net revenue. In the half-year 43 new omnibuses were built at the company's factory and issued for service. The number of the company's omnibus horses on June 30th, '91, was 9796, being 123 in excess of the stock at the end of June '90. The **average price paid per horse** during the half-year was £35 18. 10d., as against £31 3s. 11d. in '90. The number of carcasses sold was 797, and of living horses 440, compared with 612 carcasses and 390 living horses in the corresponding period of '90. Among the more interesting items of expense for the last financial half-year of the company £383 18s. 6d. figures for excise licences; £1072 14s. 8d. for police licences; £74,135 0s. 8d. for drivers' and conductors' wages; £25,667 1s. 11d. for horsekeepers' wages; £120,028 8s. 4d. for provender, including cost of preparation, cartage, lighterage, and depot expenses; £3,744 1s. 11d. for bedding; £10,173 9s. 7d. for shoeing; and £1551 3s. 3d. for veterinary service. For the half-year ending June 30th, '91, the number of **passengers** carried by the **London Road Car Company** numbered 18,667,951. At that time the company's rolling stock consisted of 261 pair-horse cars, and 15 single-horse cars. The number of **horses** it then had was 2716; the number of horses sold and died during that half-year numbered 200. The average number of pair-horse cars working was 218, and the average number of single-horse cars 13. Owing to the omnibus strike they were only used for 25 weeks during the half-year. The weekly average traffic receipts per car came to £17 2s. 2d.; and the average expense per car amounted to £16 9s. 6d. The **total gross receipts** for the half-year were £98,794 11s. 1d., and the **total expenditure** came to £95,669 5s. 5d., leaving a balance at the credit of revenue account of £3125 5s. 8d. A profit of £2473 0s. 8d. was made during the half-year. The general reserve fund was £19,580 19s., and the leases and building renewal fund £7,533 11s. 5d. The exceptionally severe weather of the early part of the half-year, followed by heavy fogs, and again by bad weather during the Easter and Whitsuntide holidays, all adversely affected traffic receipts. In the early part of June, when traffic receipts were at their best, the **busmen's strike** occurred, and caused serious loss to the company. Owing to the rise in the price of forage, expenditure was also increased. The receipts of the company for advertising in cars amounted to £2,265 2s. 6d. The sum expended for police licences and excise duty was £747 18s. 8d.; for provender £35,322 1s. 2d.; for bedding £1,331 19s. 10d.; and for shoeing £2,173 3s. 5d.

"One Man, One Vote." See SESSION, sect. 38.

Onslow, William Hillier, K.C.M.G., 4th Earl of, Governor of New Zealand, was b. 1853. Ed. at Eton, and Exeter Coll., Oxford. Succeeded to the peerage '70. Is High Steward of Guildford. Appointed Lord-in-Waiting to H.M. '80, and again in '86. One of the delegates at the Conference on the Sugar Question '87. His lordship formed one of the Lords Committee on the Sweating System, '88. Lord Onslow was Under Sec. of State for the Colonies from '87 to '88, and Parliamentary Sec. to the Board of Trade Feb. to Nov. '88, in which latter month he was gazetted Governor of New Zealand in succession to Sir W. D. Jervois. His lordship has quickly attained great popularity in New Zealand. During '91 the Earl visited the Uriwera country, this being the first occasion on which the representative of the Queen has visited this part of the North Island. In Nov. it was announced that his lordship would resign the Governorship in '92.

Ontario, a province of the Dominion of Canada. It extends along the north shores of the great lakes, and is important as containing the Dominion metropolis, **Ottawa** (pop. 118,403). Provincial capital **Toronto**, pop. 86,445, on Lake Ontario, the second city in Canada in wealth and population. Besides the two capitals, important towns are Hamilton (pop. 41,280), London (pop. 26,047), Guelph, St. Catharines, Brantford, Belleville, and Chatham.—Divided into some forty-six established counties, eighty-eight electoral districts, etc.—Administered by a Lieut.-Governor and responsible Ministry. There is only one Chamber, the Legislative Assembly, elected for four years by 88 constituencies. Ontario has 24 seats in the Dominion Senate and 92 in the House of Commons.—Ontario, called Upper Canada, became British after the fall of Quebec and the formal cession in 1763. It joined with other provinces to form the Dominion in 1867. See CANADA, and, for Executive Council, see DIPLOMACY.

Opera Season, '91. See MUSIC.

Opium Traffic. See SESSION, sect. 24.

Orange Free State. An independent Dutch republic in South Africa. It has Cape Colony on S. and S.W., Bechuanaland on N.W., Transvaal on N., Natal on E., Basutoland on S.E. Area estimated at 41,500 sq. m.; pop. 113,518, of whom 67,022 are whites. It is divided into 17 districts. Capital, **Bloemfontein**; pop. 2567. Other centres are Ladybrand, Winburg, Kroonstad, Harrismith, Fauresmith, etc. Executive vested in President (Judge Reitz, elected '89), elected every five years by universal suffrage, and a Council appointed by the Volksraad. There is also a Landrost appointed to each of the districts by the President, if confirmed by the Volksraad. The latter consists of 56 members, elected by universal suffrage for four years, half of whom vacate their seats every two years. Roman-Dutch law prevails. There is a Supreme Court of three judges, and a Circuit Court. The State is, generally, prosperous and orderly. It was formed in 1856-60, when Dutch Boers, becoming disaffected towards the new British Government at the Cape, "trekked" northward into the wilds in large numbers. Their outrages on the natives, and the wars that resulted, obliged the British authorities to annex Natal in '40, and the Orange River Sovereignty—as it was then called—in '48. However, by con-

vention in '54, it was declared to be "a free and independent state," and has since remained so under the title of Orange Free State. A constitution was proclaimed in that year, and was amended in '66 and '79.—'91. President Reitz made his annual tour through the State (Sept.), and at Harrismith said it was not likely that the Transvaal would give the stipulated six months' notice under the Potchefstroom Convention, in the view of the Delagoa Bay Railway, and the Free State Railway. See also NATAL and CAPE COLONY.

Orchardson, William Quiller, R.A., was b. 1835. First exhibited in Edinburgh, his native city, under the auspices of the Royal Scottish Academy. Elected an Associate of the Royal Academy '68. His "Challenge" and "Christopher Sly" at the Paris Exhibition secured the approval of the French critics, and obtained for the painter one of the few medals awarded to British artists. His "Napoleon I. on Board H.M.S. Bellerophon," exhibited at the Royal Academy in '80, was purchased under the terms of the Chantrey bequest. R.A. 1877. The hon. degree of LL.D. was conferred on him by Oxford Univ. '90. In the Royal Academy '91 his picture "An Enigma" attracted attention.

"Order of the Day," in parliamentary language, is a Bill, or other matter, which the House has ordered to be taken into consideration on a particular day.

Ordnance Survey Office is a department under Government for the preparation of maps and plans of the United Kingdom, which are issued on various scales. The survey was commenced many years ago, and is approaching completion.

Ordnance, Surveyor-General of the. See WAR OFFICE, ARMY, etc.

Orientalists, Ninth International Congress of under the presidency of Dr. Taylor, Master of St. John's Coll., Camb. This Congress held its meetings from Sept. 1st to 12th, '91. Amongst topics discussed were "Dwari Races and Dwari Worship" (a paper on which was read by Mr. R. G. Haliburton), "The Worship of the Saligame Stone and Cognate Cults" (paper by Mr. C. G. Leland), "Oriental Education" (paper by Dr. G. W. Leitner, the secretary of the Congress), "Prehistoric Remains in South India" (paper by Mr. F. Fawcett), "Early Egyptian Buildings" (paper by Mr. Flinders Petrie), "Sumatra Explorations" (paper by Mr. Claine). An extremely able paper was read by Dr. Bellew on "The Ethnology of Afghanistan," and in the discussion which followed the Hon. G. N. Curzon, M.P., spoke. An excursion to the Oriental University Institute, of which Dr. Leitner is director, occupied the Congress on Sept. 5th. In the second week of its session the Congress heard papers on the "Growing Importance of the Japanese Language" (Mr. Daigoro Goh), "Official Relations with Orientals" (Sir R. Meade), "Social Relations of Europeans and Orientals" (Gen. T. Dennehy), "Europeans in Barbary" (Mr. J. E. Budgett Meakin), "Indian Ocean of Antiquity" (Dr. H. Schlichter), "Labour and the Talmud" (Mr. Hermann Gollancz), and "The Origins of Civilisation" (Mr. Stuart Glennie). The Congress was entertained by its President during a pleasant visit to Cambridge.

Oscar II., King of Sweden and Norway, was b. 1829. Is a great-grandson of Napoleon I.'s famous general, Marshal Bernadotte, the first

King of the new independent kingdom of Norway. He ascended the throne in '72, in succession to his brother Charles XV. He is an excellent scholar and writer, and has translated Goethe's "*Faust*" into Swedish. Issued in '88 a volume of minor poems under his *nom de plume* of "Oscar Frederik." He married, in '57, the Princess Sophia of Nassau, by whom he has issue four sons. In Aug. '88 his Majesty visited the Emperor William II. at Berlin.

Oswald, Eugene, President of Carlyle Society, was b. at Heidelberg, 1826; M.A. and Ph.D. of Göttingen; has been for many years a resident in England. Instructor at the Royal Naval College, Greenwich. Has extensively contributed to periodicals and newspapers—English, French, German and Portuguese—also to cyclopædias. Introduced into England the political speculations of W. von Humboldt—"The Sphere and Duties of Government" (with J. Coulthard); and, in connection with the Early English Text Society, Thomasin of Ciriachia and the "Early German Courtesy Books"; into Germany, Walter Savage Landor in "*Männer und Frauen*." Wrote also "Austria in 1868," "Thomas Carlyle, ein Lebensbild," etc. Now engaged on Muret's great Anglo-German dictionary. Became in '91 secretary to the English Goethe Society.

Ottoman Empire. See TURKEY and for Ministry, etc., see DIPLOMATIC.

"Ouida" (Mlle. Louise De la Ramé) was b. at Bury St. Edmunds in 1840. She adopted the *nom de plume* of "Ouida" in memory of her childish pronunciation of her own name "Louisa." She commenced when very young to contribute to *Colburn's New Monthly*. The scenes of many of her stories are laid in Italy, where she is now a resident. Her works are very numerous, and comprise the following amongst many: "Held in Bondage," "Chandos," "Idalia," "Under Two Flags," "Pelle Farine," "In a Winter City," "In Maremma," "Bimbi," "Wanda," "Othmar," and "Gulderoy" '89. During '90 two new books, "Syrin" and "Ruffino," were issued from the pen of "Ouida." A characteristic letter from her, entitled "New Literary Factors," appeared in the *Times* (May '91). Her last book is "Santa Barbara."

Oulesse, Walter William, R.A. was b. in Jersey 1848. Ed. at Victoria Coll. Becoming a student of the Royal Academy ('64), he took a silver medal in the Antique school. He has constantly exhibited at Burlington House since '69, his first works being subject pictures, of which the principal were "Home Again," and "An Incident in the French Revolution." In '72, on the advice of Sir J. Millais, Mr. Oulesse took to portrait painting, and has since devoted himself with great success to that branch of his profession. Elected R.A. '81. Created Chevalier of the French Legion of Honour '89. He exhibited a portrait of Mr. John Morley, M.P., at the Royal Academy '91. Elected hon. member of the Munich Academy of Arts (Nov.).

Ouse River and Navigation. This is a scheme floated in Oct. '91 with a capital of £35,000, to acquire and considerably improve the navigation of the Great Ouse, and to extend the system from Bedford to a point where it can join the Grand Junction Canal, thus bringing the manufacturing districts of the North and Midlands into water communication with the Wash at King's Lynn.

Owen, Sir Richard, K.C.B., F.R.S., the veteran comparative anatomist, was b. at Lan-

caster 1804. Ed. at Lancaster Grammar School and the Medical Schools of Edinburgh Univ. and Paris. After being in practice for a short time as a surgeon, in London, he became, through the influence of Dr. Abernethy, assistant curator of the Hunterian Museum. In '34 he was appointed Professor of Comparative Anatomy at St. Bartholomew's Hospital, in '36 first Hunterian Professor in the same subject at the Royal College of Surgeons, and in '56 Superintendent of the Natural History Department in the British Museum. Prof. O., from the examination in '39 of a fossil bone sent to him from New Zealand, propounded a theory of the existence in remote ages, of a bird more gigantic than the ostrich; and the accuracy of his theory was subsequently, by the discovery of the whole fossil, established beyond doubt. This led him to the adoption of his famous theory of the extinction of species. He is a voluminous writer on the subject to which his scientific researches have been successfully devoted. He is an honorary graduate of several universities, a corresponding member of various foreign scientific associations, and in recognition of his eminent services was ('73) created a K.C.B.

Owens College, Manchester. John Owens a liberal Churchman, vexed with the tests at the Universities, bequeathed, on his death in 1846, £96,654 for the purpose of founding this college, which commenced with 62 students. In '72, when their number had risen to 337, the old Quay Street buildings became too small, and, with the extension of the Glasgow University extension, the Owens College Extension Fund was started and ultimately reached £217,354; the old buildings being sold for £13,000. Present era of college history commences with the opening of the new buildings and the amalgamation with the Manchester Medical School in '73. Further and rapid development was promoted by the Clifton bequest of £21,571, and the yet more princely Beyer bequest of £100,243 in '76. Since that date, also, bequests have been very numerous, including the Wrigley, Asa Lees, Motherall bequests, amounting to £10,000 each, and several others, ranging from £500 and less. In '83 further additions to the college buildings became necessary, and were built; and, four years later, the new Beyer Laboratories and the Natural History Museums were erected, at a cost of £80,000. The accommodation of the Medical Department having proved insufficient, a tender of £31,755 has been accepted for the provision of the additional buildings required. In '88 the Sir Joseph Whitworth bequests to the College (supplemented by the liberality of his residuary legatees) amounted to over £50,000. Total students ('91) 861, composed of 429 art students, 61 women, and 371 medical students. The admission of women was sanctioned by the Extension Act, though John Owens only contemplated the admission of male students. The question of mixed education had not become prominent, if it had arisen in his day. There are two halls of residence—the "Hulme" (conducted on Church lines) and the "Dalton," both for men only. The College receives annually £1800 from Government, £1000 from the Manchester Hulme Trust, and £1000 from the Manchester Corporation (under the Technical Instruction and Local Taxation Acts). Principal, A. W. Ward, Litt.D., LL.D. Registrar, H. W. Holder, M.A.

Oxford and Cambridge Boat Race. See AQUATICS.

Oxford and Cambridge Cricket Match. See CRICKET.

Oxford, County Council for. See COUNTY COUNCILS.

Oxford, Rt. Rev. William Stubbs, Lord Bishop of, was b. in 1825, and ed. at Ripon grammar school and Christ Church, Oxford, where he graduated 1st class Lit. Hum. and 3rd class Math. '48, became a Fellow of Trinity College, and proceeded M.A. '51, D.D. by decree of Convocation '79. Ordained deacon '48, and priest '50. **Regius Professor of Modern History at Oxford** '66, and has held various other appointments of importance at the University. **Author of many learned works,** amongst which are "Registrum Sacrum Anglicanum," "Select Charters and other Illustrations of English Constitutional History, from the Earliest Period to the Reign of Edward I.," and "The Constitutional History of England in its Origin and Development." Formerly his lordship was vicar of Navestock, Essex ('50-67). Examiner in the School of Law and Modern History ('65-6), Select Preacher ('70), Examiner in the School of Theology ('71-2), and of Modern History ('73-6, and '81); rector of Cholderton, Wilts ('75-9), Canon of St. Paul's ('79-84). Consecrated Bishop of Chester (April 25th, '84) and translated to Oxford in '89. He is the 32nd bishop of the See.

Oxford University. This seems to have grown up in the twelfth century, and is one of the three oldest universities of Europe, the other two being Paris and Bologna. The number of students seems to have greatly varied at different periods of its history, and now is about 3,000, it having received considerable impetus from the great Tractarian movement, and the reforms introduced by the University Commissions. By the **Oxford Reform Act (1854)** the present constitution was fixed. The government of the University is in the hands of three bodies—the **Heldomadal Council**, of about twenty members; **Congregation**, which includes all resident graduates; and **Convocation**, which is made up of all graduates whose names are on the register. The following is the list of colleges in the University: **Founded (1249), University—Head, J. F. Bright, D.D.—Undergraduates, 107; (1262), Balliol, Benjamin Jowett, M.A., 180; (1270), Merton, Hon. G. C. Brodrick, D.C.L., 191; (1314), Exeter, W. W. Jackson, M.A., 147; (1326), Oriel, D. B. Monro, M.A., 98; (1340), Queen's, J. R. Magrath, D.D., 125; (1386), New, J. E. Sewell, D.D., 240; (1427), Lincoln, W. W. Merry, D.D., 95; (1437), All Souls, Sir W. R. Anson, D.C.L., 5; (1456), Magdalen, T. H. Warren, M.A., 170; (1509), Brasenose, C. B. Heberden, M.A., 121; (1516), Corpus, T. Fowler, D.D., 87; (1532), Christ Church,**

F. Paget, D.D. (designate), 281; (1554), Trinity, H. G. Woods, M.A., 165; (1555), St. John's, J. Bellamy, D.D., 122; (1571), Jesus, H. D. Harper, D.D., 89; (1613), Wadham, G. E. Thorley, M.A., 104; (1624), Pembroke, Evan Evans, D.D., 62; (1714), Worcester, W. Inge, M.A., 114; (1869), Keble, Robt. James Wilson, 186; (1874), Hertford, H. Boyd, D.D., 80. **Halls:** (1260), St. Edmund's, E. Moore, D.D., 43; (1325), St. Mary, D. P. Chase, D.D., 33; (1392), "Non-collegiate," and students at private Halls, 300: Total, 3,145. Since '68 students have been enabled to become members of the university without joining any college or hall; they are known as "Non-collegiate." In '80 arrangements were made for the affiliation of provincial colleges, of which privilege St. David's College, Lampeter, University College, Nottingham, and Firth College, Sheffield, have availed themselves. The examinations for the degree of Bachelor are **Responsions** (Smalls), **First Public Examination** (Moderations, Honours, or Pass), **Second Public Examination** (Finals, Honours, or Pass). Residence for twelve terms is required, of which there are four in the year. **Honours** may be taken in **Letteræ Humaniores** (Ancient History and Philosophy), **Mathematics**, **Jurisprudence**, **Modern History**, **Theology**, **Natural Science**, and **Oriental Languages**. **Women** are admitted to the same examinations, but do not receive degrees. There are three halls for their reception—**Somerville Hall**, **Lady Margaret Hall**, and **St. Hugh's Hall**. St. Alban Hall and New Inn Hall have been respectively annexed to Merton College and Balliol College, in accordance with the decision of the last Royal Commission. Similarly St. Mary's Hall is destined to be united with Oriel College, and St. Edmund's Hall with Queen's College. (See Article on HIGHER EDUCATION OF WOMEN.) Mansfield College (*q.v.*), with Dr. Fairbairn as Principal, was opened in October '89, and an institution for Unitarians is in process of establishment. **Degrees.** **D.D.** (*hood* scarlet cloth, lined with black silk); **B.D.** (*h. plain black silk*); **M.A.** (*h. black silk, lined with red silk*); **B.A.** (*h. black corded silk, trimmed with white fur*); **M.D.** (*h. scarlet cloth, lined with crimson silk*); **M.B.** (*h. dark blue silk, lined with white fur*); **D.C.L.** (*h. scarlet cloth, lined with crimson silk*); **B.C.L.** (*h. pale blue silk, lined with white fur*); **Mus. D.** (*h. white silk, lined with crimson silk brocade*); **Mus. B.** (*h. pale blue silk, lined with white fur*).—**Chancellor**, The Marquis of Salisbury, K.G.; **Vice-Chancellor**, Henry Boyd, D.D. (Hertford); **Parliamentary representatives**, Sir J. R. Mowbray, Bart., and Mr. J. G. Talbot. **Proctors** for '91-2, Rev. W. H. Hutton, St. John's; Rev. L. A. Selby Bigge, University.

P

Paget, Sir James, Bart., F.R.S., D.C.L. Oxon., was b. at Great Yarmouth 1814. He is **Sergeant-Surgeon Extraordinary to the Queen, Surgeon to the Prince of Wales**, and Consulting Surgeon to St. Bartholomew's Hospital. Created a baronet '71, and appointed **President of the College of Surgeons** '75. Is author of the "Pathological Catalogue of the Museum of the College of Surgeons," "Lectures on Surgical Pathology," and other books. Was a

member of the Royal Commission which inquired, in '71, into the position of London hospitals in case of epidemic.

"**Pall Mall Gazette.**" Evening newspaper and review. Established 1865, by George Smith, of Smith, Elder & Co. Transferred to Henry Yates Thompson, his son-in-law, in '80. First number appeared Feb. 7th, '65. Edited first by Frederick Greenwood, next ('80) by John Morley, who in turn was succeeded in '83 by

W. T. Stead (q.v.). Its characteristics are the three 'I.s'—Independence, Interviewing, and Illustration. It is the first daily illustrated English newspaper. Originally issued at 2d. It was first published at 1d. Jan. 1st, '82. Editor, Mr. E. T. Cook, M.A. (q.v.). "**Fall Mail Budget**" (weekly), is an illustrated summary of news of the week with special cartoon. **Offices**, 2, Northumberland Street, Strand.

Panama Canal. (For previous history see *ed.* '90.) Reports dated Oct. 25th, '90, stated that the works were in a state of ruin, heavy rains having caused great earth slides. The *Paix* of Dec. 16th reported that an agreement had been entered into with the Colombian Government extending the time for the completion of the work. On Dec. 23rd the terms were telegraphed from New York as follows: The company to pay for the land expropriations on the isthmus, as well as the garrison expenses, amounting to 10 million francs, in five annual instalments, deducting the Government debt of 5 million francs in privileged shares, 26 months being allowed to reorganise the company and renew the work. The text was published by the *Figaro* on Jan. 19th, '91. From Paris, Jan. 10th, '91, came a report that M. Hennelet de Gontel, chairman of the Share and Bondholders Central Committee, had issued a circular to the 600 district committees, proposing an annual lottery of 20 million tickets, by means of which to complete the work, the Government having promised to introduce the necessary bill. One result of the cessation of work on the Isthmus was shown in an official report from Jamaica, which reached this country early in '91, in which an account was given of the steps taken to repatriate some thousands of destitute Jamaicans. The return of M. Bonaparte Wyse with the new concession was reported from Paris on April 20th. He issued a long report, in which he advocated the formation of a lake of about 20 million acres, and estimated the maximum cost of completion of the canal at 6 million francs. A telegram, dated Paris, June 11th, stated that on account of various complaints made to the Public Prosecutor it had been determined to institute an inquiry into the official action of M. de Lesseps and others of the Canal Administration. A telegram of Aug. 9th from the French capital stated that the company's 500 fr. shares were at 27½ fr. An article on the judicial inquiry and domiciliary visits then proceeding, contributed by its Paris correspondent, was published in the *Times* of Sept. 11th.

Pan-American Railway Scheme. In March '90 it was reported that at the International American Conference, held at Washington, a resolution was agreed to for the construction of a great railroad connecting all or a majority of the nations represented, the line to be declared for ever neutral. It was recommended that a commission of engineers be appointed to study the possible route, etc., which is to aim at connecting the principal cities, existing lines to be utilised. According to a Washington telegram of May 19th, President Harrison sent to Congress a letter from Secretary Blaine, who estimated the U.S. share of the survey expenses at \$65,000. The President recommended Congress to proceed with the matter. The *Times* of Nov. 10th contained a summary of an important report (200 pages) on this matter, prefaced with an address signed by President Harrison. The delegates at the conference

were from the United States, Peru, Guatemala, Colombia, Costa Rica, Uruguay, Paraguay, Brazil, Honduras, Mexico, Bolivia, Venezuela, Argentina, Nicaragua, Salvador, and Ecuador. Canada was not represented, and is not mentioned in the report, but it is suggested that the scheme is intended as a set-off against her trans-continental line.

Paraguay. Republic of. One of the most rising states of South America, situated between the rivers Parana and Paraguay. Capital, **Aunconio**, pop. about 25,000. Area, about 145,000 sq. m.; it is therefore about one-fifth larger than the United Kingdom of Great Britain and Ireland. It is governed by a President elected every four years, a Congress consisting of a Senate and a Chamber of Deputies, and five Ministers of State chosen by the President. The State religion is Roman Catholic, but all others are tolerated. **Revenue** ('88), \$3,551,445; **expenditure**, \$2,791,558; the **internal debt** at the beginning of '89 amounted to \$1,068,260; **external debt** \$18,564,763. **Imports** ('88) \$3,289,757; **exports**, \$2,588,608. During the five years war, '65 to '70, against three of its most powerful neighbours, the country was completely ruined; but now, owing to the extraordinary riches of its soil, to its very healthy climate and its central geographical position, it is making such rapid strides that it will very soon become one of the most important states of South America. A railway of about 92 miles is now in work, and another 30 miles will be opened very shortly. Concessions have been granted for about 300 miles more.—'91. It was reported (Oct. 21st) that there had been an attempt to bring about a revolution, but that the rising had been quickly suppressed. The rebels fled across the river, and were disarmed by the Argentine troops.

Parcel Post, The. See **Post Office**.

Paris, Comte de, son of the late Duc d'Orléans, and grandson of King Louis Philippe, was b. 1838. He was ed. in England, having left France after the overturn of the monarchy in '48. He and his brother the Duc de Chartres served on the staff of General McClellan during part of the American Civil War. He married in '64 the eldest daughter of the Duc de Montpensier, and has three children. After the death, in '85, of the Comte de Chambord, the head of the **Royal House of France**, the Comte de Paris was acknowledged by nearly all the Legitimists as his successor. In '86, on the passing of the Expulsion Bill, the Comte de Paris once more left for England. After his return from the United States he allied himself with the Liberals and Republicans against the Empire, and subsequently with the Legitimists against M. Thiers. He is the **author** of an interesting and comprehensive work in six volumes on **English Trade Unions**. He has recently withdrawn from active politics, and resides at Stowe House, in Buckinghamshire.

Paris Metropolitan Railways. (Some account of this matter was given in our *eds.* of '88 and '89.) On July 25th, '91, the Municipality agreed to a scheme, the chief feature of which is an underground line from the Arc de Triomphe *via* the Place de l'Opéra to the Bastille, and an overground line round the southern boulevards to the Trocadero, where it again becomes underground to the Arc de Triomphe. It was stated that a complete understanding had been arrived at between the Minister of Public Works and the nine companies who pro

pose to provide four millions sterling for the execution of the undertaking, the Compagnie du Nord alone offering a million.

Paris Ship Canal. The project of opening up the port of Paris to the sea by the canalisation of the river Seine, which has often been discussed, was definitely revived by the announcement, at the end of '89, that a scheme had been formulated by M. Bouquet de la Grye, and been generally approved (see previous eds.). It was stated in March '91 that the plans were completed, the final estimates being: length of canal 180 kiloms., and depth 6.20 metres; total cost 135 million francs, to be expended as follows: land 4.6 millions, earthworks 67.5, locks and dams 10.6, railway works 10.6, bridges 10, and administrative works 22 million francs. The voyage from sea to capital is calculated at 17 hours, and the charge is fixed at 64 francs a ton for up and return voyage.

Paris Water Supply (see ed. '89). In connection with the water supply scheme from the sources of the Vigne and Verneuil now in progress, it was reported in April '91 that a proposal to erect a great bridge across the Seine between St. Cloud and Suresnes had been submitted to the Minister of Public Works. It was at first proposed to construct only a small aqueduct across the river, but the inhabitants of St. Cloud demanded a large structure by way of compensation for the St. Cloud reservoir. The idea is to build a combined aqueduct and railway bridge, allowing a connection between the Auteuil and Molineux lines.

Parker, Rev. Joseph, D.D., minister of the City Temple, Holborn Viaduct, was b. at Hexham, 1830. Ed. at Univ. Coll., London '52. Ordained in the Congregational body '53. Has held the following church appointments: Banbury ('53), Manchester '58, London, City Temple ('69). Chairman of Congregational Union of England and Wales '84, of London Congregational Board '87, and of London Congregational Union '90. Founder of Nottingham Congregational Institute. Dr. Parker, in addition to being a popular and vigorous preacher, is also an author of repute. Among numerous works written by him may be mentioned "The Paraclete," "Ecce Deus," "Springdale Abbey," "Inner Life of Christ" (3 vols.), "Apostolic Life" (3 vols.), "Weaver Stephen," and "The People's Prayer-Book." Dr. Parker in '88 visited the United States, and on his return held a series of noonday conversations at the City Temple with working men. He has for some time past been engaged on the "People's Bible," which may be regarded as the *magnum opus* of his literary labours. In July '91 he delivered the farewell message to the International Congregational Council.

Parkes, Sir Henry, K.C.M.G., is the son of an agricultural labourer, and was b. at Stoneleigh, Warwickshire, '15. He emigrated to Sydney in '39. Returned to the New South Wales Parliament as member for Sydney in '54. Became Colonial Secretary '66, and distinguished himself by carrying the New South Wales Public Schools Act. Prime Minister '72-5, '77, '78-89. Sir Henry has been distinguished for his successful advocacy of *Free Trade*. He is one of the remarkable men who have risen to political eminence through journalism. For seven years ('49-56) he conducted the *Empire*, a daily newspaper of Sydney. He visited England in '61, in '81, and again in '87 as

the representative of New South Wales at the Colonial Conference which met in London, and which has been described by Lord Rosebery as the "inauguration of Imperial Federation." On that subject Sir Henry issued an important manifesto in Oct. '89. Presided over the great Conference which considered the question of Australasian Federation at Sydney in April '91.

Parliament is composed of the Sovereign and the three Estates of the Realm, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Temporal sitting together and forming the House of Lords. The Sovereign alone has the power of summoning or proroguing or dissolving Parliament, and gives the Royal Assent to measures which have passed both Houses. On the first day of the meeting of a new Parliament the Clerk of the Crown delivers to the Clerk of the House of Commons a list of the names of the members returned at the general election. Members are then summoned to the House of Peers, and the Royal pleasure is signified by the Lords Commissioners that the Commons do proceed to elect their Speaker (*q.v.*). On the following day the Speaker elect is presented to the Lords Commissioners for the Royal approbation. If the same Government be in office as had been in power at the dissolution, the swearing-in of members goes forward for a week or so, and then Parliament is formally opened; but if there should have been a change of Government after the general election, then members of the administration who hold office direct from the Crown will have vacated their seats, and the leading members of the Government present in the Commons will be the Secretaries to the Treasury. This was the state of affairs in 1874, '80, and August '86, on which occasions authority to issue writs for the re-election of Ministers was given by the Crown, through the Royal Commissioners, within a few days after the election of Speaker, and there was then a short adjournment for the re-elections before Parliament was opened. But as in January 1886 the Ministry had not gone out of office, there were no writs to be issued for re-election, and consequently there was no need for any adjournment, and Parliament was opened nine days after it met. Parliament is sometimes opened by Her Majesty in person—this being now the only occasion during a session on which the Queen is personally present—but more frequently by Royal Commission. In either case the Speaker and the Commons are summoned (see *BLACK ROB*) to hear Her Majesty's Speech. This is read sometimes by the Sovereign, but more often when Her Majesty is present by the Lord Chancellor; and it is always delivered by him when Parliament is opened by Commission. At the resumption of business in the evening of the day on which Parliament is opened, an address in reply to the gracious Message from the Throne is moved in each House. After the mover and seconder have spoken, some critical remarks upon public affairs are usually made by the Leader of the Opposition, and the Leader of the House replies. The debate on the Address in the Lords is usually finished on one evening. The debate in the Commons had for some years extended over several nights, but at the commencement of the session of '90-91 the address which, instead of a long series of paragraphs echoing the various points in the message

from the Throne, was confined to a simple expression of thanks, was agreed to at one sitting. So soon as the Address has been agreed to by the Commons, the House decides that it will on a future day resolve itself into a Committee of Supply, and into a Committee of Ways and Means (see SUPPLY, and WAYS AND MEANS). The Houses at their ordinary daily sittings consider private business (see BILL, PARLIAMENTARY), Petitions are presented, questions are put to Ministers, motions are made and discussed, and public bills are submitted by the Government and by private members. The House, on resuming after an adjournment, takes up business at the stage where it had been left at the previous sitting; but a prorogation ends all uncompleted public business. Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary; and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign. When Parliament is about to be dissolved by the Crown on the advice of her Ministers it is customary to prorogue on a given day, and in the evening of the same day to issue the proclamation of dissolution. The writs are posted the same night, and are made returnable not less than thirty-five days after date. But although the new Parliament cannot in any case be summoned to meet in less than thirty-five days after the day of dissolution, it may happen when the general election is over that no necessity for an early meeting of Parliament exists, and in such case the new Parliament may be prorogued by proclamation until a later date. Should it, however, be found desirable to call Parliament together for the despatch of business on an earlier day than that to which it stands prorogued by proclamation, whether that prorogation has taken place before the first meeting of a new Parliament, or during the ordinary recess between sessions, or if the House be adjourned for a longer period than fourteen days, it is in the power of the Crown to call Parliament together by proclamation for the despatch of business in six days from the date of such proclamation. See also HOUSE OF COMMONS; PEERAGE; and PARLIAMENTARY PROCEDURE.

Parliamentary Bar. Some interest was occasioned (March '91) by a correspondence between Mr. Pope, Q.C., leader of the Parliamentary Bar, and Mr. Hanbury, M.P., with reference to the conduct of proceedings before Committees of the House of Commons. Mr. Hanbury, as chairman of one of these committees, intimated that no counsel would be allowed to cross-examine a witness who had not heard his examination in chief. Mr. Hanbury justified his ruling by precedents on the part of Parliamentary Committees in '47 and '61, and maintained that suitors must inevitably suffer if their leading counsel were permitted to be absent during the greater part of their case. On the other hand, Mr. Pope, Q.C., challenged the competency of any committee to limit the right of petitioners or of counsel, and alleged that the decisions of '47 and '61 had been found so unworkable that they had ever since been abandoned. In the course of the

controversy the Attorney-General wrote that in his view the enforcement of any such rule as that laid down by Mr. Hanbury would work great injustice.

Parliamentary Papers consist of the notices of questions, resolutions, votes, and proceedings in both Houses of Parliament issued daily during the session; the official **Blue Books**, **Drab Books**, and **White Books** (so called from the colour of their covers) are Papers prepared by the different Government departments, and presented by command of Her Majesty to both Houses of Parliament, and also of all reports and returns specially ordered to be printed by either House. As soon as possible after the close of each session lists are prepared of all the papers printed and issued during the year, and are procurable, as also the **Journals of the proceedings of the House of Lords and House of Commons** (price 10s. per volume). To the general public the papers are issued on the following terms: Single papers, Blue Books, etc., are charged for at the rate of one halfpenny per sheet of four pages, excepting in instances where special prices are fixed; but for an annual subscription of £20 subscribers can obtain all the Parliamentary publications issued during the year; an annual subscription of £16 entitles the subscriber to all the Parliamentary Papers excepting the daily votes and proceedings, which can be had separately for an annual subscription of £3; and the reports on petitions and appendix to the votes, which can also be had separately for an annual subscription of £1. The papers of each House can also be had separately. The annual subscription for the House of Lords papers is £10, and for the House of Commons papers £15, or in each case £1 10s. less without the daily votes and proceedings. An additional charge is made for delivery within the town district, according to distance, and a charge of 10s. or 20s. for packing and sending by post or rail the votes or papers respectively. **Lists of the papers for each year**, giving title and price, and later ones, even the postage, can be sent post free for 4d. The **Parliamentary Publishers** are Messrs. Eyre and Spottiswoode, East Harding St., London, E.C., and 32, Abingdon St., Westminster, S.W.; Messrs. J. Menzies and Co., Hanover Street, Edinburgh; and Messrs. Hodges, Figgis and Co., 104, Grafton St., Dublin.

Parliamentary Procedure. The Houses of Lords and Commons differ from each other not only in regard to their constitution, but likewise in respect to their powers and methods of procedure. It is in the House of Peers, for instance, that the Sovereign meets Parliament, and the formal ceremonies connected with the opening or proroguing of the Legislature are gone through. On these occasions, as also when the royal assent is given to public or private bills, the "faithful commons" merely attend in their lordships' House. But, on the other hand, the House of Commons has an individuality of its own, which is yearly becoming more marked. Its powers and privileges are enormous: it is in the Lower Chamber exclusively that the national estimates are voted, and it is in the Commons that the majority of important legislative proposals are initiated. The powers of the Lord Chancellor, who presides over the deliberations of the House of Lords, differ widely from those exercised by

the Speaker of the House of Commons. He is not the judge of questions of order, and if two or more peers rise together the House itself decides who shall first be heard. The simple duties of the Lord Chancellor (who need not necessarily be a peer) consist in "putting the question," and he is not debarred from taking part in a debate. He has, however, no casting vote in divisions, and if the numbers are equal the "not-contents" prevail. Another peculiarity of procedure in the House of Lords is that the speakers do not address the presiding peer but the whole House. With regard to the origination of bills, the House of Lords has exclusive power concerning those relating to a **restitution in blood** and a **restitution in honours**. It has always been held that bills of "**pains and penalties**," or other measures founded on oral testimony, should originate in the Lords; and until 1871 the House of Commons had not the power which their lordships had of examining witnesses on oath. The **Royal Assent** to bills is always given in the House of Lords, more frequently by commission than otherwise; and it is a curious circumstance that the French language is still employed in connection therewith. When a public bill is approved, the clerk says, "*Le roy (or, la reine) le veut.*" If the measure be a private one he says, "*Sout fait comme il est desire.*" Should the bill have subsidies for its object, the official says, "*Le roi (or, la reine) remercie ses loyaux sujets, accepte leur benevolence, et aussi le veut.*" If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "*Le roi (or, la reine) s'aviserá.*" This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707. The most striking feature in connection with the procedure of the **House of Commons** is the wide power vested in the **Speaker**. This great officer must have been anciently, as at present, the organ or spokesman of the Commons, although in modern times he is more occupied in presiding over the deliberations of the House than in delivering speeches on their behalf. Unlike the Lord Chancellor, the Speaker must abstain from debating, unless in committee of the whole House; and even there he rarely takes advantage of his right. The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the casting voice. The chief duty of the Speaker undoubtedly is the preservation of order, with respect to which the rules of the House of Commons are very stringent. It is out of order, for instance, for a member of Parliament to refer to any other member by name; he must speak of him as "the hon. member for so-and-so." Again, all remarks must be addressed to the Chair, and not to the House. It is likewise out of order to speak in direct terms of any proceedings of the other House of Parliament, unless they have been formally made known by "**message**," or recorded on the minutes of the House of Peers. When a reference to the proceedings of the House of Lords is desired, however, the difficulty is got over by alluding to what has transpired "**in another place.**" It is irregular, too, to refer to the opinions of the Sovereign, speeches and messages from the Throne being regarded as the sentiments of the Ministry alone. The rules of procedure passed in the

year 1882 (see '86, '87, and '88 editions), provided among other things that a member who **disregarded** the authority of the chair might under a new standing order (Order in Debate) be "**named**" by the Speaker, and suspended from the service of the House, on the first occasion for a week, on the second for a fortnight, and on the third, or any subsequent occasion, for a month; empowered the Speaker, when in his opinion a subject has been **adequately discussed**, and it was the evident sense of the House that the "**question be now put**," to so inform the House, when a motion to close the debate might be made, and placed restriction upon the practice of making motions of adjournment. In the House of Commons no public bill can be introduced without leave. (See **BILL, PARLIAMENTARY.**) Only the **royal assent** can convert a bill into an Act of Parliament. It occasionally happens that the opponents of a bill are not desirous of meeting the motion for its second reading with a direct negative. An amendment is therefore proposed to the effect that the bill "be read this day three months," or "this day six months," it being understood that three months or six months hence the House will not be sitting. In the cases of motions in respect to which the House is also unwilling to come to a decision, "**the previous question**" may be carried, in which case the other business of the day is at once proceeded with. The business of both Houses of Parliament, but more especially of the House of Commons, is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the mace is removed by the Sergeant-at-Arms, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in **Committee of Supply** (*q.v.*), while in **Committee of Ways and Means** (*q.v.*) resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also grand committees, **Select Committees** chosen for specific purposes, and committees for the consideration of private bills. What is termed a **hybrid committee** is nominated partly by the House of Commons and partly by the Committee of Selection. No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by his acceptance of the "**Chiltern Hundreds.**" No office having emolument attached can be conferred on a member of the House of Commons without his vacating his seat; and therefore by obtaining "the stewardship of Her Majesty's Chiltern Hundreds, the stewardship of the Manor of Poyning, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties. In cases where appointments are not directly conferred by the Crown, but by the heads of departments, a member need not resign his seat; and by the Reform Act of '67 it was specially enacted that members already in office should not vacate their seats on accepting other Crown appointments. The first Salisbury administration, in Jan. '86, made new rules of procedure one of their principal measures; Mr. Gladstone on succeeding them in office adopted the main principles indicated, and a **Select Committee** appointed by the House of Commons to inquire into the **rules of procedure** of the House held their first meeting March 2nd, '86, the Mar

quies of Hartington having been elected chairman at a preliminary meeting on March 18th. (For the names of the Committee, and the substance of the important recommendations they made, see ed. '87.) At the commencement of the session of '87 the Government proposed certain draft *Rules of Procedure* for the acceptance of the House of Commons, (for the text of these see ed. '88), but the only one of them which was adopted, and that after many modifications had been made in it, was that which has reference to the *Closure of Debate*. This was found to work somewhat inconveniently inasmuch as it necessitated the presence of not less than 201 members to enforce the closure when the minority numbers 40 or upwards. At the commencement of the session of '88 the subject was once again brought under the notice of the Commons, and being discussed in a conciliatory and non-party spirit was very speedily and satisfactorily disposed of. Subjoined is the *substance of the new rules* then adopted.—**I. Sittings of the House.** Provides that unless the House shall otherwise order, the House shall meet every Monday, Tuesday, Thursday and Friday, at 3 o'clock, and shall, unless previously adjourned, sit till 1 o'clock a.m., when the Speaker shall adjourn the House without question put, unless a bill originating in Committee of Ways and Means, or unless proceedings made in pursuance of any Act of Parliament or standing order, or otherwise exempted from the operation of the standing order, be then under consideration. At midnight on Mondays, Tuesdays, Thursdays, and Fridays, except as aforesaid, and at half-past 5 on Wednesdays, the proceedings on any business then under consideration are to be interrupted, any dilatory motion which may be before the House is to lapse without question put; and the business then under consideration, and any business subsequently appointed, is to be appointed for the next day on which the House shall sit, unless the Speaker ascertains by the preponderance of voices that a majority of the House desires that such business should be deferred until a later day. On the interruption of business the closure may be moved, and in such case the Speaker or Chairman is not to leave the chair until the questions consequent thereon have been decided. After the business under consideration at midnight, or at 5.30 on Wednesdays, has been disposed of, no opposed business is to be taken. A motion may be made by a Minister of the Crown at the commencement of public business, to be decided without amendment or debate, to the effect that the proceedings on any specified business if under discussion at midnight that night be not interrupted under this standing order. The Chairman of Ways and Means may take the chair as Deputy Speaker, when requested to do so by the Speaker, without any formal communication to the House; and the Speaker is to nominate, at the commencement of every session, a panel of not more than five members, to act as temporary Chairmen of Committees when requested by the Chairman of Ways and Means.—**II. Closure of Debate.** Questions for the closure of debate are to be decided in the affirmative, if when a division be taken it appears by the numbers declared from the Chair, that not less than one hundred members voted in the majority in support of the motion (the standing order of '82 which left it to the Speaker to take the initiative for the closure of a debate was repealed).—

III. Disorderly Conduct. "That Mr. Speaker or the Chairman do order members whose conduct is grossly disorderly to withdraw immediately from the House during the remainder of that day's sitting; and that the serjeant-at-arms do act on such orders as he may receive from the Chair, in pursuance of this resolution. But if, on any occasion, Mr. Speaker or the Chairman deems that his powers under this Standing Order are inadequate, he may name such member or members in pursuance of the Standing Order (Order in Debate), or he may call upon the House to adjudge upon the conduct of such member or members. Provided always, that members who are ordered to withdraw under this Standing Order, or who are suspended from the service of the House under the Standing Order (Order in Debate), shall forthwith withdraw from the precincts of the House, subject, however, in the case of such suspended members, to the proviso in that Standing Order regarding their service on Private Bill Committees."—**IV. Irrelevances or Repetition.** Mr. Speaker or the Chairman, after having called the attention of the House or of the Committee to the conduct of a member who persists in irrelevance, or tedious repetition either of his own arguments or of the arguments used by other members in debate, may direct him to discontinue his speech. (This is only a slight modification of the standing order of '82).—**V. Motions for Adjournment in abuse of the Rules of the House.** "That, if Mr. Speaker, or the Chairman of a Committee of the whole House, shall be of opinion that a Motion for the adjournment of a debate, or of the House, during any debate, or that the Chairman do report progress, or do leave the Chair, is an abuse of the rules of the House, he may forthwith put the question thereupon from the Chair, or he may decline to propose the question thereupon to the House."—**VI. Government Business.** "That on days on which the Government business has priority, the Government may arrange such Government business, whether Orders of the Day or Notices of Motions, in such order as they may think fit."—**VII. Committees of the whole House.** That whenever an Order of the Day is read for the House to resolve itself into Committee (not being a Committee to consider a message from the Crown, or the Committee of Supply, or of Ways and Means) Mr. Speaker shall leave the Chair without putting any question, and the House shall thereupon resolve itself into such Committee, unless notice of an instruction thereto has been given, when such instruction shall be first disposed of.—**VIII. Amendments on Report.** That upon the report stage of any bill no amendment may be proposed which could not have been proposed in Committee without an instruction from the House.—**IX. Divisions.** That Mr. Speaker, or the Chairman, may, after the lapse of two minutes as indicated by the sand-glass, if in his opinion the division is frivolously or vexatiously claimed, take the vote of the House or Committee by calling upon the members who support, and who challenge his decision, successively to rise in their places, and he shall thereupon, as he thinks fit, either declare the determination of the House or Committee, or name tellers for a division. And, in case there is no division, the Speaker or Chairman shall declare to the House or the Committee the number of the minority who had challenged his decision, and their names

shall be thereupon taken down in the House and printed with the lists of divisions.—**X.** Address in Answer to the Queen's Speech. That the stages of Committee and Report on the Address to Her Majesty to convey the thanks of the House for Her Majesty's most gracious Speech to both Houses of Parliament at the opening of the session be discontinued.

—**XI.** Public Bills. That after Whitsuntide public bills, other than Government bills, be arranged on the Order-book so as to give priority to the bills most advanced, and that Lords' amendments to public Bills appointed to be considered be placed first, to be followed by third readings, considerations of report, bills in progress in Committee, bills appointed for Committee, and second readings.

—**XII.** Standing Committees. The resolutions of '82 relating to the constitution and proceedings of standing (or grand) committees for the consideration (1) of bills relating to law and courts of justice and legal procedure, and (2) to trade, shipping, and manufactures, were revived, trade being ordered to include agriculture and fishing. Other resolutions passed by the House provided that motions for bills and for the nomination of select committees, might be set down for consideration at the commencement of public business, and that, if such motions were opposed, the Speaker, after permitting if he thinks fit a brief explanatory statement from the member who moves, and from the member who opposes, any such motion respectively, may put the question thereon, or the question that the debate be adjourned; that when the House meets at 2 o'clock for a morning sitting, the sitting shall be suspended at 7 (no opposed business to be taken after 10 minutes to 7), and shall be resumed at 9, and continued, unless previously adjourned, until 1 o'clock a.m., when the Speaker is to adjourn the House without question put, unless business exempted from the operation of the Standing Order sittings of the House be then under consideration. It will thus be seen that when the House meets at 3, opposed business is as a rule not taken after midnight, but that when it meets at 2 o'clock opposed business may be proceeded with until 1 a.m. On Wednesdays the House meets at noon, opposed business is not taken after 5.30, and the House adjourns at 6. Several old standing orders, which were inconsistent with or which had been superseded by the new rules, were repealed, among them being the well-known half-past twelve rule. For the proposals made during '90 in reference to the suspension of public bills see SESSION, sect. 83, in ed. of '91. See also the article PARLIAMENT, ante.

Parliamentary Session, '90-91. See SESSION.

Parliaments, Clerk of the. An officer of the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading Clerk, is performed such duties as making minutes of the proceedings, swearing peers and witnesses, and signifying the Royal assent to bills which have passed both Houses. The Clerk of the House of Commons acts as chairman and is addressed by members during the election of Speaker. All members are sworn by him and introduced to the Speaker, and the roll is subscribed under his supervision. He reads the order of the day, turns a sand-glass

when a division is called, reads petitions if required, and takes charge of accounts and papers. He, like the Clerk of the Parliaments, is appointed by the Crown, and is associated with two clerks assistant, who make minutes of the proceedings. The office of Clerk of the Parliaments is held by Mr. Henry J. L. Graham; and Mr. Reginald Palgrave, C.B., is Clerk of the House of Commons.

Parry, Charles Hubert Hastings, musical composer, was born 1848, and ed. at Eton, and Christ Church, Oxford. He attained the degree of Mus. Bac. while at school, and early showed musical abilities of a high order. Received instruction from Dr. Elvey and Sir G. Macfarren. In addition to many settings to anthems, Dr. P. has composed various sonatas and overtures. His adaptation of "Prometheus Unbound" (Shelley) was produced at the Gloucester Musical Festival in '80. His oratorio "Judith," produced at the Birmingham Musical Festival in '88, was a great success. To the Leeds Festival ('89) Dr. P. contributed a setting of Pope's ode on St. Cecilia's Day, which was given at Worcester Sept. '90. A new cantata, by him, entitled "L'Allegro ed Il Penseroso," was successful at the Norwich Festival in Oct. '90.

Pasteur, Louis, was b. at Dôle, Jura, 1822; Ed. at the University of Jena '40, taking his doctor's degree in '47. Appointed Professor of Physic at the Faculty of Sciences, Strasburg '48, and subsequently held other appointments. Awarded the Rumford Medal '56 for his researches on the polarisation of light. Elected one of fifty foreign members of the Royal Society of London in '69. In '74 the National Assembly accorded to M. Pasteur, as a reward chiefly for his investigations on fermentation, a life annuity of 12,000 francs. Member of the French Academy '82. Awarded in same year the Albert Medal of the Society of Arts for his researches in connection with fermentation, the preservation of wines, and the propagation of zymotic diseases in silkworms and domestic animals. In the following year an English Commission of eminent scientists was dispatched by the Government to investigate M. Pasteur's method for the treatment of this disease, and reported to the effect that he had made a valuable discovery.

Patey, Janet Monach, the eminent contralto singer, was born in London 1842, and received musical training at an early age, making her debut at Birmingham Town Hall. In '66 her marriage with Mr. J. G. Patey, who was himself an opera-singer of note, took place. In '67 she sang at the Worcester Festival, and since '70 has been considered the leading contralto singer for oratorios or concerts. In '71 she made a successful American tour; and in '75 her singing of "O Best in the Lord" at the Paris Conservatoire created such a sensation that the directors took the unusual course of presenting her with a commemorative medal. In most of the new oratorios produced within the last twenty years Mme. P. has sung. Visited Australia in '90, returning to England in '91, after a most successful tour.

Patents and how to get them. During recent years, owing to the removal of much hampering legislation, the opportunities for protecting new inventions and improvements upon older ones by letters patent have been

greatly facilitated, while at the same time the initial cost has been lessened. The right to patent and the privileges which go with it are denied to no one of either sex, and we have thus simply to consider **what is patentable**, and the interests of the patentee in his property. As regards the first, there are limitations which require careful consideration, otherwise great loss of time and much expense will be incurred; the second are many and various. The two principal points to bear in mind in patenting are **novelty and utility**. You can protect entirely new devices having a **new bearing**; new devices which **improve** upon existing contrivances having a certain end, and which may be already patented; new devices **improving processes**; and you can protect **new methods of application** of old ideas to well-known objects. In regard to all these there are obviously degrees of utility and novelty. A patent is essentially a **restricted monopoly**, and the inventor is therefore called upon to observe certain limitations. His protection extends over a period of **fourteen years**, but he can extend it at the end of that term for a similar period if the resources of the patent are shown to have been insufficiently developed. Before the actual date of patenting an invention may not be used for profit, either secretly or publicly. For example, a man who has been privately applying some new process with profit, or invented an article, and sold it, cannot take out letters patent, as the law only recognises his monopoly from the date of patenting. But this does not apply if it is simply a question of experimenting upon its value, while the incomplete experiments of another will not invalidate claim. Patents are issued at the Patent Office, 25, Southampton Buildings, W.C. (Hours 10 till 4), under the seal of the office. The application is called a **specification**, it being a record of claim, wherein are set forth the title of the invention, and the particular nature of the claim. It must be made upon a form obtained from the "Comptroller-General" (Sir H. Reader Lack), and must conform strictly to the **prescribed regulations**. But it is to be noted that the responsibility for sufficiency in specification, and the risk of infringement, or in other words a valid claim, rests with the patentee. In taking out a patent the question arises as to the desirability of doing it through **patent agencies**. We can only say that such a course is decidedly to the interest of the patentee, but he must go only to a respectable agent. A competent patent agent will save him a world of trouble. He will draw his claim so as not to infringe upon another's; if he has legal combined with technical experience the patentee will profit by it; he will advise upon its probable commercial value and productiveness; and will secure a comprehensive specification. (As patents, too, are **saleable articles**, an agent is the one who will effect sales to the best advantage, whether before or after letters patent. Indeed, so many points present themselves, that to avoid a sea of difficulty the inventor had best early consult an agent. They are now compelled to register themselves, and the incorporation this year by Royal Charter of the Institute of Patent Agents affords inventors a needful security. An inventor, in the first place, must make application for a patent on a form obtained from the Comptroller-General, in which he declares that he is in possession of an invention (the title being

given), that he is the true and first inventor, and that it is not in use by any one else to the best of his knowledge, and therefore prays that a patent may be granted. His statement of the invention must be written or printed upon strong wide-ruled paper, on one side only, 13 in. x 8 in., with left-hand margin of 2 in. If a **provisional specification**, a form additional to the above declares briefly its nature; on the other hand, if a **complete specification**, a full description must be furnished on another form, with the following distinct claim: "Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is [there follow the features of novelty claimed]. Should drawings accompany either, they must be executed to scale on sheets 14 in. x 8 in., or 13 in. x 16 in., on drawing paper of smooth, good quality, using absolutely black Indian ink, and uniform in line and shade (see **specimen** in Comptroller's Report '90). Applications are liable to adverse judgment by the Patent Office, and to **outside opposition**; in the former case ten days or more notice is given the applicant, and he may **amend** under certain regulations; in the latter, notice of opposition is made on a special form, the grounds being stated. When a provisional or complete specification is accepted, the inventor is informed of it; it is advertised in the official journal; and is open to inspection by the public at the Patent Office on payment of a fee of one shilling, while certified copies of entries can be had at the rate of one hundred words for fourpence. We may now say a word as to **fees**. Supposing the patent is straightforward in character, they are, in brief: **up to sealing**, on application for provisional protection, £1; on filing complete specification, £3. On application to amend specification, **up to sealing**, £1 10s.; ditto, **after sealing**, £3. If a patentee intends at the end of the fourth or eighth year from the date of patent to keep the same in force, he must pay a fee of £50 or £100 (as the case may be) before the expiration of such years; but he can pay, if he likes, **annual fees** in lieu during the term of the patent, that is until and inclusive of the thirteenth year. They begin with £10, gradually increasing to a last payment of £20. It may here be mentioned that patent fees will probably be considered by Parliament ere long with a view to lowering them. The scope of this article has not allowed our dealing with applications for patents **communicated from abroad**, which are, however, entertained, as also all inventions requiring international and colonial arrangements for their furtherance. Special forms of procedure in these cases are necessary. The inventor, in conclusion, is advised to consult the "Current Report of the Comptroller-General of Patents, '90" (Eyre & Spottiswoode, price 6d.); also, "Illustrated Official Journal (Patents)," published Wednesdays, price 6d., which contains **abridgments of patents, and illustrations**. Copies of specifications can be had, on payment of the published price, at 38, Cursitor Street, E.C. The above may all be consulted also at the Patent Office Free Library, Southampton Buildings, Chancery Lane, where admirable facilities exist for readers.

Patmore, Coventry Kearsley Deighton, is a native of Woodford, Essex, where he was b. in 1823. In '44 he made his *début* as an author, but it was not until '54 that he estab-

lished his reputation by the publication of the first part of "**The Angel in the House**" (a story of a young man's "maiden passion for a maid"). He has since published "A Garland of Poems for Children," "The Unknown Eros," "Amelia," and a memoir of Barry Cornwall. Mr. P. was assistant librarian of the British Museum '46-'68. He has been called by his admirers "The English Petrarch."

Paton, Sir Joseph Noel P., R.S.A., was b. 1821, and first became known by his outline etchings illustrative of Shakespeare and Shelley. Was a successful competitor in the Westminster Hall competitions of '45 and '47, his "Quarrel of Oberon and Titania," and "Reconciliation of Oberon and Titania," being purchased for large sums for the Scottish National Gallery. His allegory "The Pursuit of Pleasure," "Home," "In Memoriam," and "Mors Janua Vitæ," have all been engraved. "**Dawn: Luther at Erfurt**," is considered by many his finest work. In '61 Sir Noel issued a volume entitled "Poems by a Painter." Appointed the Queen's Limner for Scotland in '65, knighted '67, LL.D. Edinburgh ('76). Sir N. Paton has of late years devoted his attention almost exclusively to the painting of religious subjects.

Patti, Madame Adelina Florinda, was b. at Madrid in 1843. Was trained professionally under Maurice Strakosch, and made her first appearance on the stage at New York in '50. She first appeared in London in '61, in the character of Amina in "**La Sonnambula**" at Covent Garden, and became the favourite *prima donna* of the day. In '70 she received from the Emperor of Russia the Order of Merit, and the appointment of First Singer at the Imperial Court. She married in '68 M. Roger de Caluzac, marquis de Caux, from whom she was divorced in '83. She has since married Signor Nicolini, the tenor singer. While singing at a concert at the San Francisco Opera House ('87) a lunatic threw a bomb, which fortunately occasioned no injury to Madame Patti. Early in '88 she accepted an engagement to sing in the **Argentine Republic**. Her tour through that State was the most successful she ever made. The total receipts for 24 entertainments reached £70,000, and Madame Patti received £1600 per night, or £600 more than she was guaranteed. In Nov. '88 Madame Patti sang in Gounod's opera "**Romeo and Juliet**" in Paris, the composer himself conducting. In Dec. '89 she commenced an operatic tour in the United States under the directions of Mr. Abbey. Sang with brilliant success in Berlin (Feb. '91). A theatre, which she had erected at Craig-y-nos, her Welsh residence, was opened on Aug. 12th.

Payn, James, was b. at Cheltenham, 1830. Educated at Eton and Trinity Coll., Cambridge. Became editor of *Chambers's Journal* in '58. Contributed to that periodical "**Lost Sir Masingberd**," which placed him in the front rank of romancers. His subsequent novels include "**By Proxy**," "**Cecil's Tryst**," "**Married Beneath Him**," "**Not Wooded, but Won**," "**High Spirits**," "**Kit**," "**The Heir of the Ages**," and numerous others. In '85 he became editor of *Cornhill*. Mr. P. is father-in-law of the editor of the *Times*. During '88 he commenced a series of weekly notes in the *Illustrated London News*, some of which have been reprinted in book form. His later works include "The

Burnt Million," "The Word and the Will," "Sunny Stories and Some Shady Ones" ('91).

Pearse, Rev. Mark Guy, Wesleyan Methodist minister and author, was b. in 1842, at Camborne. His early life in Cornwall, together with his keen and sympathetic insight into the character of the Cornish people, have contributed a distinctive feature to all his sermons and writings. In '61 he entered as a medical student at St. Bartholomew's Hospital. He was at that time a Methodist local preacher; but, there being little scope for a local preacher in a London circuit, he was before long induced to give himself up to the Wesleyan ministry. His first pastoral charge was in Leeds, where he commenced his labours in '63. He afterwards "travelled" in the Brixton Hill, Ipswich, Bedford, Highbury and Westminster circuits. After a period of retirement he resumed his ministry at Launceston, and next went to Bristol, where some books on the theme of entire consecration were written by him. "**Daniel Quorn and His Religious Notions**," a remarkable sketch of pious Cornish character was published in '74. Mr. P. is also a powerful temperance orator. Has been recently associated with the **London Wesleyan Mission** (q.v.). Mr. P. visited Australia in '91, returning in September.

Pearson, John L., R.A., is a native of Durham. Devoting himself to the study of architecture, he soon achieved distinction by his design for St. Peter's Church, Vauxhall, which is groined throughout with brick and stone. He acted as architect for **Truro Cathedral**, and for many years has been the architect of Lincoln Cathedral. The restoration of the buildings on the west side of Westminster Hall was carried out under his superintendence. Elected **R.A.** in '74, and six years later became **R.A.** Other recent work by Mr. P. has been in connection with Sidney Sussex Coll., Camb., and the Univ. Library, Camb.

Pedro II. (de Alcantara), ex-Emperor of Brazil, was b. 1825, at Rio Janeiro. On the abdication of Dom Pedro I. (his father), in '31, he succeeded to the throne, but as he was not of age, the affairs of the country were administered by a Council of Regency till '40. He is a man of a very high order of intelligence, and well known in Europe, the principal capitals of which he has repeatedly visited. He did a great deal to develop the material resources of his country, and ('71) issued an Imperial decree for the gradual abolition of slavery. The total emancipation of the slaves in his dominion was effected in '88. In consequence of a revolution, the Emperor was compelled to leave the country (Nov. '89).

Peel, The Rt. Hon. Arthur Wellesley, M.P., P.C., Speaker of the House of Commons, is the youngest son of the late Rt. Hon. Sir Robert Peel, and was b. 1829. Ed. at Eton and Balliol Coll., Oxford (graduated M.A.), Hon. D.C.L. '87. Has held the following official appointments: Parliamentary Secretary to the Poor Law Board ('68-71); Parliamentary Secretary to the Board of Trade ('71-3); Patronage Secretary to the Treasury ('73-4); Under-Secretary for the Home Department ('80). He is D.L. and J.P. for Warwickshire and Bedfordshire. Returned as a Liberal M.P. for Warwick ('65-85); re-elected (L.U.) Warwick and Leamington '85-6.

He was appointed Speaker during Mr. Gladstone's second administration, on the retirement of Sir Henry Brand, now Viscount Hampden, in '84.

Peers, English, Deceased (Dec. '90 to Nov. '91). See OBITUARY.

Peers in the House of Commons. See SESSION, sect. 39.

Peers, Principal Officers of House of.

Peers who have been Commoners. The following list of names formerly borne in public life by gentlemen who are now members of the House of Lords, and whose present title is dissimilar to their surname, will be found of assistance in making references to the peerage. A few titles of courtesy are included, but the general list of these is given elsewhere.

Commoner.	Peer.
Adderley, Sir Chas., M.P.	Norton, L.
Allsopp, Mr. S. C., M.P.	Hindlip, L.
Althorp, Lord, M.P.	Spencer, E.
Andover, Visct., M.P.	Suffolk and Berks, E.
Anson, Visct., M.P.	Lichfield, E.
Baring, Mr. T. G., M.P.	Northbrook, E.
Bass, Sir Michael A., M.P.	Burton, J.
Beckett, Sir Edmund	Grimthorpe, L.
Bective, Earl of, M.P.	Headfort, M.
Berkeley, Col. F. W., M.P.	Fitzhardinge, L.
Bourke, Mr. R., M.P.	Connemara, L.
Bowmont, Marq. of, M.P.	Roxburghe, D.
Brabazon, Lord	Meath, E.
Brand, Sir H., M.P.	Hampden, V.
Brett, Sir W. B., M.P.	Esher, L.
Brodick, Mr. W., M.P.	Mildeton, V.
Bruce, Mr. Henry, M.P.	Aberdare, L.
Burghley, Lord, M.P.	Exeter, M.
Burke, Visct., M.P.	Clanricarde, M.
Campbell, Mr. W. F.,	Stratheden & Campbell, L.
M.P.	bell, L.

Commoner.	Peer.
Castlereagh, Visct., M.P.	Londonberry, M.
Castlerosse, Visct., M.P.	Kenmare, E.
Cavendish, Lord, M.P.	Devonshire, D.
Cecil, Lord Robert, M.P.	Salisbury, M.
Cholmondeley, Mr. H., M.P.	Delamere, L.
Cochrane-Baillie, Mr. M.P.	Lamington, L.
Cole, Visct., M.P.	Enniskillen, E.
Corry, Mr. Montagu	Rowton, L.
Cotton, Major W. H.	
Stapleton, M.P.	Combermere, V.
Cranborne, Visct., M.P.	Salisbury, M.
Crichton, Visct., M.P.	Erne, M.
Cunliffe-Lister, Mr. S.	Masham, L.
Cust, Mr. A. W., M.P.	Brownlow, E.
Dalkeith, Earl of, M.P.	Buccleuch, D.
De Grey, Mr. T., M.P.	Walsingham, L.
Denison, Mr. W. H., M.P.	Londesborough, E.
Dodson, Mr. J. G., M.P.	Monk Bretton, L.
Duncombe, Mr. W. E., M.P.	Feverham, E.
Dundas, Mr. L., M.P.	Zetland, E.
Dungarvan, Visct.	Cork, E.
Ebrington, Visct., M.P.	Fortescue, E.
Elcho, Lord, M.P.	Wemyss, E.
Eslington, Lord, M.P.	Ravensworth, E.
Fellowes, Capt., M.P.	De Ramsey, L.
Finch-Hatton, Mr. M., M.P.	Winchilsea, E.
Fitz-Patrick, Mr. B., M.P.	Castletown, L.
Fortescue, Mr. C., M.P.	Clermont and Carlingford, L.
Fremantle, Mr. T. F.	Cottesloe, L.
Garlies, Lord, M.P.	Galloway, E.
Gathorne - Hardy, Mr., M.P.	Cranbrook, V.
Gibson, Mr. Edw., M.P.	Ashbourne, E.
Giffard, Sir H., M.P.	Halsbury, L.
Godetich, Visct., M.P.	Ripon, M.
Gore-Langton, Mr. W. S., M.P.	Temple, E.
Greville - Nugent, Mr., M.P.	Greville, L.
Grimston, Visct., M.P.	Verulam, E.
Grosvenor, Earl, M.P.	Westminster, D.
Grosvenor, Ld. Rd., M.P.	Stalbridge, L.
Grosvenor, Ld. Rob., M.P.	Ebury, L.
Guinness, Sir A. E., M.P.	Ardilaun, L.
Guinness, Sir E. Cecil, Bart.	Iveagh, L.
Hamilton, Marq. of, M.P.	Abercorn, D.
Hanbury-Tracy, Mr. C., M.P.	Sudeley, L.
Hay, Lord W., M.P.	Tweeddale, M.
Heathcote, Mr. G. H., M.P.	Willoughby de Eresby, L.
Hinchinbrook, Visct., M.P.	Sandwich, E.
Holland, Sir Henry T., M.P.	Knutsford, L.
Howick, Visct., M.P.	Grey, E.
Hubbard, Mr. E., M.P.	Addington, L.
James, Sir W., M.P.	Northbourne, L.
Johnstone, Sir H., M.P.	Derwent, L.
Knatchbull - Hugessen, Mr. E., M.P.	Brabourne, L.
Lawley, Mr. Beilby, M.P.	Wenlock, L.
Lewisham, Lord, M.P.	Dartmouth, E.
Liddell, Mr. H., M.P.	Ravensworth, E.
Lindsay, Lord, M.P.	Crawford, E.
Lowe, Mr. Robert, M.P.	Sherbrooke, V.
Loyd-Lindsay, Sir R., M.P.	Wantage, L.
Lumley, Sir John S.	Savile, L.
Lymington, Lord, M.P.	Portsmouth, E.
Lyttelton, Mr. C. G., M.P.	Cobham, V.
Macduff, Visct., M.P.	Fife, D.

Commoner.	Peer.
Mahon, Visct., M.P. ...	Stanhope, E.
Marjoribanks, Sir D.	
Coutts, M.P. ...	Tweedmouth, L.
Manners, Lord John, M.P.	Rutland, D.
March, Earl of, M.P. ...	Richmond and Grosvenor, E. [don, D.
Milles, Mr. G. W., M.P. ...	Sondes, E. [don, D.
Mills, Sir Charles, M.P.	Hillingdon, L.
Milton, Visct., M.P. ...	Fitzwilliam, E.

Yarmouth, Earl of, M.P.	Leconfield, L.
	Hertford, M.

Peerage. Peers are created by the Sovereign, and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainer for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own containing the five temporal ranks or degrees, and precedence in each degree depended upon the date of the creation of the title. Thus in each country the dukes came first, and took precedence of each other in order of date of title; then came the marquises, earls, viscounts, and barons, precedence in each rank being similarly governed by priority of patent. At the union with Scotland, in 1707, it was arranged that the Scotch peerages should rank after the English peerages then in existence, according to degree, and the Scotch dukedoms were accordingly placed in order of date after all the English dukedoms, and so on through the other ranks. The Act of Union also provided that the Scotch peers should be represented in the House of Lords by a portion of their number only, and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date

from before the year 1707. From that time until the Union with Ireland the peerages created were either Irish or of Great Britain, the latter alone giving seats in the House of Lords, and taking precedence according to degree next after the English and Scotch peerages. The Act of Union with Ireland provided that peers of that kingdom should take precedence next after peers of Great Britain according to rank, and that Ireland should be represented in the House of Lords by a portion of her peers only. It was further enacted that one new Irish peerage might be created on the extinction of three existing Irish peerages, and that when the number should be reduced to one hundred, if one peerage became extinct one other might be created. The peerages of the United Kingdom and of Ireland created since the Union take precedence according to rank and date of patent next after those of Ireland which were in existence at the Union, but of the two classes only the peerages of the United Kingdom give of themselves a seat in the House of Lords. There is no limit to the increase of these but the pleasure of the Sovereign. The peerage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. There are at present 86 Scotch peers and 177 Irish peers, but many of these are peers of the United Kingdom also, or are representative peers, and as such are entitled to sit in the House of Lords. In order to avoid repetition in the separate lists given below it was thought desirable to include the information relating to all lords of Parliament under the head of the HOUSE OF LORDS, and to put in the separate lists of Scotch and Irish peers only those who are not so included. **The House of Lords** is composed of two of the estates of the realm, the lords spiritual and temporal (see PARLIAMENT). The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the voidance of a see decreases the total number of lords spiritual to less than twenty-six, and then in order of seniority of appointment. The Bishop of Sodor and Man is not included in this rotation, and has no seat in Parliament. A bishop ceases to be a lord of Parliament on resigning his see. The temporal lords may be divided into peers whose right to sit and vote in the House is hereditary, representative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the Scottish peers send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until parliament is dissolved. The Irish peers elect twenty-eight representatives for life. The Lords of Appeal, of whom there may not be more than four appointed, enjoy the dignity of a baron for life. By the Act of '76 they were to lose the right to sit and vote on

resigning office; but by the Appellate Jurisdiction Act of '87 any retired lord of appeal may sit and vote as a member of the House of Lords during his life. The peers temporal are divided into dukes, marquises, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or Irish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Argyll sits as Baron Sundridge and Hamilton, and the Duke of Buccleuch as Earl of Doncaster. The lords spiritual and temporal sit together, and all have an equal voice and vote in the house, whatever may be their rank. As in the House of Commons, each peer must be present to record his vote, the practice of peers giving proxies having been discontinued. A newly created peer, or one elevated to a higher title, is introduced by two other peers of his own degree, who are accompanied by the **Earl Marshal** (the hereditary office of the Duke of Norfolk), the **Lord Great Chamberlain** (Lord Willoughby de Eresby is now Lord Great Chamberlain), all in their parliamentary robes, attended by **Garter King of Arms** (Sir Albert Woods has long held this office), and **Black Rod** (Sir J. Drummond). The procession enters the house at the bar, and bows three times on the way to the woolsack, where the peer kneeling presents his patent and writ to the Lord Chancellor. Both these documents are read by the clerk, and the oath is administered to the peer at the table, and he subscribes the roll. He is then with further formalities conducted to one of the benches of the house, the position chosen varying with the rank of the new peer, where he and his introducers bow thrice to the Lord Chancellor, by whom he is afterwards congratulated. Peers are robed on these occasions, and at the opening of parliament by Her Majesty, but wear their ordinary dress when the House is sitting for business. A bishop is introduced by two other bishops, but without many of the formalities described above, representative peers simply present their writs, and are sworn like peers succeeding to a title. (See also PARLIAMENTARY PROCEDURE.) The peers place themselves somewhat differently to the commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but in the Lords there are, near the bar, a few seats known as the cross benches, the occupants of which face the woolsack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble lords who give a rigid adhesion to neither great party, and are of what the late Earl Granville once happily termed the "cross-bench mind." The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in power. The other lords sit as the commons do,—the leader of the House and his colleagues in the Ministry on the front bench to the right of the woolsack, his supporters taking their places on the benches behind him, and the leader of the Opposition in that House and the ex-Ministers on the left front bench, behind them their adherents. The two parties cross the House on a change of ministry, as the Commons do. There is no arrangement of peers according to rank, the different degrees sitting together indiscriminately if of the same political complexion. The House of Lords

has both legislative and judicial powers. It is the highest appellate court of the United Kingdom: it may in certain cases try members of its own body, it tries any person who may be impeached by the House of Commons, and it also decides claims to the peerage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as ex-lord chancellors and the lords of appeal in ordinary. It may sit during a Parliamentary recess, and its hours of business are from 10.30 a.m. to 4 p.m. In the following list the number to the immediate left of each title denotes the order in which the lords spiritual and temporal stand upon the roll of Garter King of Arms—that is, their relative rank and precedence in the House of Lords, the necessary corrections having been made up to Nov. 19th, '91. The Prince of Wales is first on the roll, and next are the Royal Dukes of Edinburgh, Connaught, Clarence and Avondale, Albany, and Cambridge, who are followed in turn by the Archbishop of Canterbury, the Lord Chancellor, the Archbishop of York, the Lord President of the Council, and the Lord Privy Seal. After these come the dukes, beginning with His Grace of Norfolk, Earl Marshal and Premier Duke of England, then the marquises, earls, viscounts, bishops, and barons, Lord Masham, as junior baron, being last upon the list. It will be understood, from what is written above, and from an inspection of the list, how essentially the order in which peers are named on Garter's roll differs from the precedence existing among the peers of the three kingdoms collectively. Lord Masham's number (569) is 4 in excess of the total of the lords spiritual and temporal, the discrepancy being caused by the following 9 lords being named twice on the roll:—Lord Halsbury as Lord High Chancellor and as Lord Halsbury, Viscount Cranbrook as such and as Lord President, Earl Cadogan as such and as Lord Privy Seal, the Earl of Mount-Edgcombe as such and as Lord Steward, the Earl of Lathom as such and as Lord Chamberlain, Viscount Powerscourt and Earl de Montalt each as an Irish representative peer, and also as a peer of the United Kingdom, the Earl of Strathmore and Kinghorne as a Scotch representative peer and a baron of the United Kingdom, and Lord Knutsford as such and as a Secretary of State. The date of creation refers only to the present title, and does not indicate the year in which the peer or his ancestor may have been first admitted to the House of Lords. The initials S.R.P. and I.R.P. are used to signify that the lord is a Scotch or Irish representative peer. The abbreviations *u., s., b., m., h.b., and g.s.* will be readily understood to mean nephew, son, brother, uncle, half-brother, and grandson. P.C. is used where the peer is a Privy Councillor, and L.L. stands for Lord Lieutenant. The following is the present composition of the House of Lords:—Peers of the Blood Royal, 6; Archbishops, 2; Dukes, 21; Marquises, 21; Earls, 119; Viscounts, 28; Bishops, 24; Barons, 294; Scotch Representative Peers, 15 (one vacancy). Irish Representative Peers, 28: total, 558. Thirteen of the foregoing are minors, two are reckoned both as peers of the United Kingdom and Irish representative peers, and one is reckoned as a peer of the United Kingdom and as a Scotch representative peer, so that the actual voting strength of the House is now 542.

Penal Servitude Act, '91. See SESSION, sect. 94.

Pensions. See STATE PENSIONS.

People's Palace for East London. The, opened May '87 by Her Majesty, is situated in the busy thoroughfare of the Mile End Road. It provides for the vast population of the East End a large hall for concerts, entertainments, etc.; a library and reading-rooms, gymnasias, swimming baths, social meeting rooms, game rooms, refreshment rooms, and trade shops and technical schools. The last-named department is intended to instruct youths in their trades, and is subdivided into day and evening departments. Great stress is laid upon this feature as a social factor of great probable importance. These trade training schools, built, equipped, and now carried on by them at a cost of £20,000 by the Drapers' Company, were opened by the Master and Wardens of the Company Oct. 5th, '88. The site will have cost in all £22,400. The "Palace" idea is a resuscitation and development of the Beaumont Philosophical Institute, established nearly half a century since in Mile End, the trustees of which are some

own Right.

of England or of the United Kingdom.

twenty gentlemen closely identified with the East End. Sir Edward Cecil Guinness (now Lord Iveagh) notified (July '89) to the trustees his intention of increasing his original donation of £9000 for the erection of a winter garden to a sum of £14,000, in order that the people of East London may be provided with a complete and perfect winter garden of the best possible design. *Patron, the Queen; Treasurer, Mr. S. Charrington, M.P. Offices of the Trust, People's Palace, Mile End Road, E.*

Perpetual Pensions In July '90 there was laid before the House of Commons a copy of Treasury Minute dated July 15th, '90, on the subject of determining some of the remaining perpetual pensions; in which document the Lords of the Treasury stated the terms on which they proposed, under the powers conferred upon them by statute, to contract for the redemption of some of the remaining perpetual pensions and allowances. (1) **The Duke of St. Albans.** The office of **Master Surveyor and Keeper of the Hawks** was, together with the emoluments attaching thereto, granted to the Duke of St. Albans, and the heirs male of his body, by letters patent of King James II. in 1689. The emoluments, of which the net amount is £965, were originally charged on the revenues at the disposal of the Crown; in 1833 they were charged by the Act 3 & 4 Will. IV. c. 86 on the Land Revenues of the Crown; and in '66 they were transferred by the Act 29 & 30 Vict. c. 62 from those revenues to the Consolidated Fund. The Lords of the Treasury proposed that this payment of £965 should be commuted for 19 years' purchase of it.—(2) **The Duke of Hamilton.** The hereditary office of **Keeper of the Palace and Gardens, etc., of Holyrood**, with right to appoint one or more sub-keepers, and also with right to the fees and duties attached thereto, was granted by King Charles I., in 1646, to James, Duke of Hamilton,

which grant was subsequently ratified by Act of Parliament. The fees and allowances were, on the accession of King George I., converted into fixed money payments consisting of (1) salary of the keeper, £45 10s. *od.*; allowances to deputy-keeper, £50; and porter, £37 15s. *4d.*: total £133 5s. *4d.*, which payments were transferred in 1832 from the hereditary revenues of Scotland to the Consolidated Fund by the Act 2 & 3 Will. IV. c. 116. The Treasury proposed—(1) that the salary of the Hereditary Keeper (£45 10s.) should be commuted for 22 years' purchase of it, and (2) that the allowances payable to the deputy-keeper and porter (£87 15s. *4d.*) should determine on the resignation or demise of the present recipients of these allowances.—(3) **Marquis of Downshire.** By letters patent of King Charles II., in 1666, Arthur Hill and his heirs and assigns for ever were appointed to the office of **Constable of the Fort of Hillsborough** in County Down, with salary and expenses charged on the revenues of the King in Scotland: viz., salary of constable, (gross) £60 16s. *8d.*, (net) £54 3s. *4d.*; pay, etc., of warders, (gross) £182 10s., (net) £162 10s.; gross total, £234 6s. *8d.*; net total, £216 13s. *4d.* Lord Downshire is the representative of the original grantee, and to him the payment, which was transferred to the Consolidated Fund by the Act 1 & 2 Vict. c. 95, continues to be made. The Treasury proposed—that (1) the salary attached to the Constableness of the Fort of Hillsborough (£54 3s. *4d.*) should be commuted for 25 years' purchase; and (2) that the pay of the warders (£162 10s.) should determine on the resignation or demise of the present recipients of allowances.—(4) **Lord Exmouth.** A pension of £2000 a year, charged on the Consolidated Fund was granted in 1814 by the Act 54 Geo. III. c. 164 to Lord Exmouth and his heirs male to whom the title should descend, in consideration of the "distinguished service" which he had rendered as a naval commander. The Treasury

proposed that this pension shall be commuted for 26-945 years' purchase.—(5) Lord Rodney. A pension of £2000 a year, charged on the Consolidated Fund, was granted to Lord Rodney in consideration of his "eminent naval services." The original grant, made in 1783, pursuant to the Act 23 Geo. III. c. 86 was for his life, and to the next heirs male of his body; but in 1793 the pension was, by the Act 33 Geo. III. c. 77, made perpetual by being granted to all future heirs on whom the title of Lord Rodney should descend. The Treasury proposed that this pension should be commuted for 26-945 years' purchase. In fulfilment of an undertaking given by the First Lord and Chancellor of the Exchequer that the House of Commons should have an opportunity of passing an opinion upon each agreement to commute before such agreement became binding, and before money was paid in execution thereof, a copy of this minute was laid before the House, and a discussion was raised upon it during last session (see Session, sect. 40). The resolution brought forward on that occasion having been rejected, the Government were in a position to give effect to the proposals contained on the minute, and have done so in at least two cases, viz., the payment to the Master of the Hawks, and the salary of the Constable of Hillsborough Fort. For pensions for naval and military services, etc., during '90-91, see FINANCE, NATIONAL.

Persia (Iran). An independent Asiatic state lying between Turkey and Afghanistan, three times as large as France (628,000 sq. m.), with a pop. of 7,653,600. **Revenue** ('86-7) amounted to £1,750,000—£280,000 being raised from customs and £1,470,000 from direct taxes. **Expenditure** amounted to £1,630,000. There is no public debt. England does trade with South Persia to the extent of £1,000,000 a year. In recognition of the services of the Imperial Bank of Persia the Shah conferred (Dec. 1st, '90) on Mr. Rabino and Mr. Baker, chief and deputy manager, the Order of the Lion and Sun. '91. Sheikh Jamal-ed-Din, the well-known anti-English agitator, was expelled from Persia (Jan. 12th). The concession to the Imperial Tobacco Corporation of Persia was officially recognised (Feb.). The *Iran* announced (Mar. 14th) that Mirza Malcolm Khan, late ambassador in London, was deprived of his titles, honours, and rank. During the Ramazan (May 19th) a fanatic Mollah at Shiraz preached against Europeans. He was warned by the Government to desist, but did not comply, and he was sent to Kerbula. The family incited a riot, in which the people fired on the soldiers, who then used their arms, killing three persons and wounding others. An anonymous petition was presented to the Shah (June) asking him at once to carry out the following reforms:—First, the establishment of an efficient control over the finances of the country, so as to insure the employment of the public money for public purposes and the economic improvement of the kingdom; secondly, the suppression of polygamy, which, as the petitioners set forth, is the real cause of Persian depopulation; thirdly, the promulgation of a law guaranteeing absolute freedom to all creeds; and, fourthly, the creation of a representative system giving the people its due share in the management of public affairs. About forty persons were arrested in connection with the petition. An English girl, Miss Greenfield, was carried off in May by Kurds,

and was taken to the Turkish Consulate at So-uj-Bulak. A Persian force was sent to rescue her at the end of June. Negotiations took place during July, and at the end of the month Miss Greenfield declared that she voluntarily left her home and adopted Islamism. Emir Nizam, governor of Talestz, was recalled (Sept.). There was a disturbance in Mesled (Oct.) against the tobacco monopoly, but it soon subsided. For Ministry, etc., see DIPLOMATIC.

Persia, Shah of. See NASR-ED-DIN.

Persian Gulf, etc. For Residents, etc., see DIPLOMATIC.

Peru. A republic on W. coast of S. America. Area, 503,000 sq. m.; est. pop. ('88), 2,699,945. Cap., Lima; pop. 101,488. The disastrous war with Chili completely shattered the power of Peru, and ended in an ignominious peace. **Constitution** modelled on that of the United States, the legislative power being vested in a Senate elected by the provinces, two delegates from each, and a House of Representatives nominated by electoral colleges of provinces and parishes, one for every 20,000 inhabitants. **Executive** in the hands of a President elected for four years. Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion. **Revenue** was until recently derived from sale of guano and customs duties; direct taxation did not exist. **Total revenue** ('90), \$14,900,000; **estimated expenditure**, \$10,950,000; **imports**, \$25,000,000; **exports**, \$30,000,000. There was a revolutionary attempt outside Lima (Dec. 3rd); it was frustrated after the loss of forty lives. In '91 the Cabinet resigned (Aug.), the Ministers refusing to answer interpolations as to the attempted revolt. A new Ministry was constructed as follows:—Señor Justimano Borgoño, Premier and Minister of War; Señor Juan Elmore, Minister for Foreign Affairs; Señor Herrera, Minister of Interior; Señor Zepa, Minister of Justice; Señor Carbajal, Minister of Finance.

Peterborough, Rt. Rev. Mandell Creighton, D.D., 27th Bishop of, was b. in 1842. The see of Peterborough was founded in 1541. The new Bishop was ordained priest in '73, and received the living of Embsay two years later. He was appointed Rural Dean of Alnwick in '79, and Hon. Canon in Newcastle diocese ('82). After five years' occupancy of a canon's stall at Worcester he was transferred early in '91 to the Windsor Chapter. As author of the "History of the Papacy during the Period of the Reformation," and as editor of the *English Historical Review*, Dr. C. had attained a literary eminence. He became **Dixie Professor of Ecclesiastical History** at Cambridge in '84. He is LL.D. (Glasgow) and D.C.L. (Durham). He was appointed to succeed the late Dr. Magee as **Bishop of Peterborough** in Feb. '91. Consecrated in Westminster Abbey (April 25th), and enthroned in Peterborough Cathedral (May 16th).

Petitions to Parliament, Law as to, in '91. In the Westminster County Court (Aug. 13th, '91) an elector of South St. Pancras brought an action against Sir Julian Goldsmid, M.P., for damages for refusing to present a petition to the House of Commons. The plaintiff's case was that he sent a petition to the defendant, his member, and that it was returned to him by one of the clerks of the House of Commons on the ground that as it reflected on the character of a judge it could not be received. Subse-

quently the plaintiff sent another petition to Sir J. Goldsmid, which he returned and refused to present. The county court judge held that the second petition was as objectionable as the first, and gave judgment for the defendant.

Petrie, William Flinders, was b. 1853, and, after a private education, commenced in '75 the surveys which have proved of such value to archaeologists. British antiquities occupied his attention till '80, when he surveyed the pyramids of Gizeh. The temple at Tanis was excavated by him in '84, and after this exploit followed the discovery and excavation of **Naukratis** ('85) and **Nebesheh** and **Daphne** ('86). Photographing monuments and surveying the pyramids of **Dahshur** was Mr. P.'s work in the following year. A series of Roman portraits were found in the course of his excavations at **Hawara** in '88. He opened the pyramid here, and unearthed the ruins of **Gurob** and **Kahun**, in addition to opening the pyramid of **I Uahm** in '89 and '90. His last service has been the discovery and excavation of **Lachish**. Details of his work have been published by Mr. P., who has also written a volume on "Inductive Metrology." In '91 he issued a book entitled "Illahun, Kahun, and Gurob."

Pettie, John, K.A., was b. at Edinburgh, 1839, and contributed his earliest works to the Royal Scottish Academy. Removing to London in '62, the productions of his brush rapidly obtained notice, and he was elected A.R.A. in '66. Many of his works have been engraved. Mr. P. was elected R.A. ('73) in the place of Sir Edwin Landseer.

Pettitt, Henry, distinguished writer and dramatist, made a brief appearance on the stage, Sadlers Wells, at the age of fifteen. A play which he had written together with Mr. Paul Meritt turning out a great success at the Grecian Theatre, determined Mr. P. in taking up dramatic writing as a regular profession. His leading works are "Queen's Evidence," "Black Flag," "The World" (in collaboration with Messrs. Meritt and Harris), "Taken from Life," "Pluck" (Pettitt and Harris), "In the Ranks" (Pettitt and G. R. Sims), "Human Nature" (Pettitt and Harris), "Harbour Lights" (Pettitt and Sims), "Bells of Haslemere" (Pettitt and Grundy), "Hands Across the Sea," "Faust up to Date" (Pettitt and Sims), "The Silver Falls," "London Day by Day" (Pettitt and Sims), and "A Million of Money" (Pettitt and Harris). In Sept. '91 Mr. P.'s new play, "A Sailor's Knot," was produced at Drury Lane Theatre.

Philippine Islands. A large group of the Asiatic Archipelago, and a Spanish colony. Capital **Manilla**. Ruled by a Governor-General, who is also supreme over the Caroline, Sulu, and Marianne Islands.

Philpott, Rt. Rev. Henry, D.D., ex-Bishop of Worcester, was b. at Chichester 1807. Ed. at St. Catharine's Coll., Cambridge (senior wrangler and Smith's prizeman); elected a Fellow, and (45) Master of his College and Canon Residentiary of Norwich; ordained deacon '31, priest '33; was subsequently chaplain to the late Prince Consort. Consecrated to this see 61. His resignation was notified during '90, to the deep regret of all in his see.

Photography. See **SHORTHAND**.

Photographic Chart of the Sky. The following observatories take part in this work (see **ASTRONOMY**), which is portioned out in zones or belts. The last column shows the

number of photographs to be taken at each station:—

Observatory.	Latitude.	Zone in dec.	No. of plates.
Greenwich .	51° 29' N.	+90° to +65°	1149
Rome .	41° 54' "	+64 " +55	1040
Catania .	37° 30' "	+54 " +47	1008
Helsingfors .	60° 9' "	+46 " +40	1008
Potsdam .	52° 23' "	+39 " +32	1232
Oxford .	51° 46' "	+31 " +25	1180
Paris .	48° 50' "	+24 " +18	1260
Bois deaux .	44° 50' "	+17 " +11	1260
Toulouse .	43° 37' "	+10 " +5	1080
Algiers .	36° 48' "	+4 " -2	1260
San Fernando .	36° 28' "	-3 " -9	1260

Sydney .	33° 52' "	-52 " -64	1400
Melbourne .	37° 50' "	-65 " -90	1149

Photography '91. Last year we were able to chronicle a slight advance in connection with **photography in natural colours**, through the experiments of **Heri Veress**. The past year has also had its sensation in the same direction, based upon the experiments of **M. Lippmann**. Capt. Abney, speaking upon the subject at the '91 Camera Club Conference, said that he had seen the plates, that they really did show the colours of the spectrum by reflected light, but not by transmitted light. Capt. Abney further said that as his idea of photography in natural colours was the production of a pigment which would register the various colours thrown on the plate, he felt that photography in natural colours was as far off as before M. Lippmann's discovery. However successful **automatic photography** promised to be, and in the experimental stage it nearly reached perfection, the practical working has proved very unsatisfactory. Possibly the financial position of the several companies formed to work the machines has also militated against their success. There would appear to be a revival of **ferrotype work**—the production of a photograph as a positive, **M. Nicvsky**, a Russian, having brought out a new ferrotype plate which gives a very beautiful picture. In America this class of photography, under the name of "tin-types," obtains to a large extent. **Reproduction processes** have been brought to great perfection, and certainly one entirely new process has proved a success both from an artistic and commercial point. It is an improvement upon the well-known **Woodbury process**, and has been given the name of **Woodbury-gravure**. In this process the necessity for trimming and mounting the reproduction, due to the difficulty of obtaining a clean margin, has been dispensed with. It is now possible to copy a photograph; or, for the matter of that, any drawing or painting, on to any sheet of paper, very much facilitating the work. **Woodbury-gravures** are far more beautiful than collotype, and can be produced in any colour with matt surface if required, or made to so closely resemble either a silver or platinum type print, that it is almost impossible to detect them. A very fine example of the possibilities of the process was published in November in

Photographs of the Year, in which book twelve of the notable photographs exhibited at the '91 Exhibition of the Photographic Society of Great Britain have been reproduced. The exhibition contained many very beautiful specimens of photography, and it had been felt that now a permanent and artistic process was available it would be a great pity not to reproduce some of the more notable photographs in a form which would fittingly mark the importance of photography, and show the varying work of some of the most prominent photographers in the kingdom. Exhibitions have been held at Edinburgh, Liverpool, Glasgow and Cardiff. Probably Liverpool had the largest attendance, but Glasgow had the best collection of photographs. At these exhibitions evenings are in part devoted to the showing of "lantern slides" made from photographic negatives illustrating certain districts, travels, etc., etc. There are many very prominent lecturers now who illustrate their lectures by means of lantern slides made from negatives taken by themselves. Lantern work has received great support from Mr. W. T. Stead, the able editor of the *Review of Reviews*, who was prompted, by reading an article in the *Photographic Quarterly* on the "Optical Lantern as an Aid to Teaching," by C. H. Bothamley, F.I.C., F.C.S., to establish a Lantern Mission, which is now in successful operation, and has for its object the instruction and amusement for the very poor in our great cities. A large body of volunteer lecturers and operators have been got together, and there is no doubt but that the mission will do a great work. So far has the use of the optical lantern been carried, that it is no uncommon thing for a sermon to be illustrated by its means. This has been done upon several occasions at the memorial church built at Clumber by the Duke of Newcastle. No more vivid manner of teaching Bible history could be conceived. Considerable advance has been made in film photography; and although by far the larger proportion of the sensitive films used in this country are made in America, British manufacturers are now thoroughly alive to the requirements of the market, and English films will before long hold their own against all comers. A very sensitive film is now being manufactured in Paris, the "Cristallos," and excellent results are to be obtained upon it. The year '91 has witnessed a revival in stereoscopic photography, perhaps the most beautiful of any of the many applications of photography. At Manchester, a club entirely composed of workers with the stereoscope has been formed. It is now so easy to convert an ordinary half-plate camera in order to take stereoscopic pictures, that there is every prospect of amateurs taking up the work. Photographers, amateur and professional, join together in the formation of clubs, societies, associations, etc., for the advancement of photography. In most large towns in the kingdom there is now established a photographic centre. In London the Camera Club (Hon. Sec., Mr. G. Davison), with seven hundred and fifty members, holds the premier position. It has a club house, which is used for social as well as photographic purposes, with studio, enlarging room, dark rooms, laboratories, all fitted with the most modern apparatus and appliances. During the winter season one night a week, "Thursday evenings," is devoted to lectures, demonstrations and discussions on photography. An

annual conference is held, and periodically "one-man exhibitions" of photography. The club may now be called the photographic centre of the world.—Books on Photography (see previous issues) include: "Materia Photographica" (Leaper); "Military Photography" (Wheeler); "One Hundred Photographic Formulae" (Ingles Rogers); "Gelatin-Chloride Printing" (Woodbury); "Photography applied to the Microscope" (Mills); "Photographs of the Year" (Robinson & Hastings); "Holidays with the Camera" (Hastings); "Photography in a Nutshell" (Kernel); "Evening Work for Amateur Photographers" (Hepworth); "Development" (Clark); "Art of Retouching" (Hubert); "Optical Projection" (J. Wright); "Photography for Architects" (Mills); "Photography for Amateurs" (Hepworth).

"Pictorial World, The." Founded Mar. '74. An illustrated newspaper, published weekly. It was re-modelled in '91, and its price was altered to threepence. Office, Strand, W.C.

Pike's Peak Railway. It was stated in Oct. '89 that arrangements were completed for the construction of a railway up Pike's Peak, Colorado, a rack-rail line, on an improved principle, the line being 9 miles long, with about 42 of curves. The maximum gradient is 25 per cent., and the sharpest curve 16 degrees—395 ft. radius. The trains run at about five miles an hour. In Sept. '90 it was announced that the work was approaching completion. The chief difficulty was with the labourers, who had to become acclimatised to work at an altitude of 74,000 feet. The line was opened for traffic in the midsummer of '91, the first regular train reaching the top, 14,147 feet above sea-level, on June 30th.

Pilatus Mountain Tower. According to a statement published in this country in March '91, a scheme had been inaugurated to erect a tower of steel on the top of the Esel, 840 ft. high, with a base of 300 ft. diameter, and a summit platform 120 ft. square. It is hoped to finish the tower by '95. It is stated that although Pilatus is often enveloped by cloud this is never more than 90 ft. in height.

Pinero, Arthur Wing, dramatic author, was b. in London in 1855. Commencing a legal career, he afterwards became connected with the stage, and acted at the Lyceum and Haymarket Theatres. Devoting himself to play-writing he produced his first piece, which was entitled "Two can Play at that Game," at the Lyceum. Other plays from his pen include "£200 a Year" ('77), "The Money Spinner" ('80), "The Squire" ('81), "Lords and Commons," and "The Rocket" ('83). Later productions are "The Magistrate," which was very successful in '85, "Sweet Lavender," "The Profligate," and "In Chancery." His play, "Lady Bountiful," produced at the Garrick Theatre in March '91, proved very attractive. On Oct. 24th his new play, entitled "The Times," had a successful introduction. Mr. P. published on the same day the words of the play.

Pinsk Marshes Drainage. Some account of this great work, which is still going on, was given in our eds. of '88, '89, and '90. The Marsh district is one-fifth larger than Scotland, being on the Russian borders of Galicia, and the Government of the Czar determined upon the work of reclamation in '70, troops being chiefly employed under a staff of military engineers. Towards the close of '90, it was stated that the work of canalisation was pro-

ceeding rapidly, not less than 185 square miles having been drained on the banks of the Pripet, and more than seven million acres of meadowland reclaimed. Forests, hitherto inaccessible, were beginning to be profitable.

Fisciculture. See FISH CULTURE.

Pitman, Isaac, the inventor of Pitman's well-known system of shorthand writing, was b. at Trowbridge, 1813. Ed. at the Borough Rd. College of the British and Foreign School Society, becoming afterwards master of the British School at Barton-on-Humber. He removed to Bath in '39, where he subsequently established the *Phonetic Institute*, and set up a press for printing his own handbooks of phonetic shorthand, and a series of classical works in phonetic type. Mr. P. is editor of the *Phonetic Journal*, which is devoted to the advocacy of writing and spelling reform.

Places of Worship Enfranchisement Bill. See SESSION, sect. 95.

Poet Laureate, is an office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV., the first patent being granted in 1630. It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III. Amongst those who have held this office may be mentioned Dryden, Southey, Wordsworth, etc. **Lord Tennyson** is the present Poet Laureate (appointed 1850).

Police and Constabulary. According to the latest official return (issued Oct. '91) the total number of police and constabulary in **England and Wales** was 30,221. This number gave one constable for every 752 of the estimated population for '90. Since the year '79 the increase in the total number of police and constabulary in England and Wales has been 7,733, or 24½ per cent., but allowing for the augmented population the real increase during the last decade has been but trifling. The average cost per man in '90 was £98 18s. 5d. Five years previously ('84) the average cost per man was £99 9s. 0d. The borough, etc., constables are in the proportion of 1 for every 672·6 of the population of the boroughs and places having constables under local Acts; the county constabulary of 1 for every 1134·3 of the population of the counties, exclusive of the boroughs, etc.; the Metropolitan Police, deducting the number employed in Her Majesty's dockyards, parks, etc., of 1 for every 349·1 of the population of the Metropolitan Police District; and the City of London Police of 1 for every 56·5 of the City population. The cost of the police and constabulary for each of the years ending Sept. 29th, '89 and '90 respectively, was £3,734,916 and £3,846,508.—**Ireland.** The total strength of the **Irish Constabulary** is about 15,000. The force consists of two bodies: viz., **The Royal Irish Constabulary**, which numbers nearly 13,000 men, and the **Dublin Metropolitan Police**, about 1200. The proportion of police for the estimated population of Ireland is about 29 for every 100,000 of the people. The total cost of the police establishment of Ireland is about a million and a half per annum. The Irish constabulary is a semi-military body.—

Scotland. According to the latest official return, the Scottish Constabulary numbers 4355, and its cost in '88 was £378,510 08s. 4d. See also CITY and METROPOLITAN POLICE.

Police Courts. City: **Mansion House**, presided over by the Lord Mayor; Chief Clerk, C. G. Douglas. **Guildhall**, presided over by the Aldermen; Chief Clerk, H. G. Savill. **Metropolitan:** **Bow Street**, Covent Garden, Magistrates, Sir J. Bridge, Knt., J. Vaughan and F. Lushington, Esqs.; Chief Clerk, J. Alexander. **Olerkenwell**, King's Cross Road, Magistrates, J. R. W. Bros and H. Smith, Haden Corser, Esqs.; Chief Clerk, H. Cavendish. **Lambeth**, Lower Kennington Lane, Magistrates, A. A. Hopkins and R. J. Biron, Q.C., Esqs.; Chief Clerk, T. C. Martin. **Great Marlborough Street**, Magistrates, R. Milnes Newton and J. L. Hannay, Esqs.; Chief Clerk, J. R. Lyell. **Marylebone**, Seymour Place, Magistrates, W. M. Cooke and Montagu Williams, Q.C., Esqs.; Chief Clerk, W. Tate. **Southwark**, Blackman Street, Magistrates, W. Slade and E. N. F. Fenwick, Esqs.; Chief Clerk, H. Nairn. **North London**, Stoke Newington, Magistrates, J. R. W. Bros, H. Smith and Haden Corser, Esqs.; Chief Clerk, H. Titterton. **Thames**, Arbour Street East, Stepney, Magistrates, F. Mead and John Dickinson, Esqs.; Chief Clerk, J. R. Sayer. **Westminster**, Rochester Row, Magistrates, Albert de Ruten and Jas. Sheil, Esqs.; Chief Clerk, A. H. Safford. **Worship Street**, Magistrates, H. J. Bushby and John Rose, Esqs.; Chief Clerk, E. Leigh. **West London** (Hammersmith), Vernon Street, Magistrates, H. C. Bennett, A. C. Plowden, and G. L. Denman, Esqs.; Chief Clerk, F. E. Lowrie. **Wandsworth**, Love Lane, Magistrates, H. Curtis Bennett, A. C. Plowden, and G. L. Denman, Esqs.; Chief Clerk, G. A. Bird. **Greenwich and Woolwich**, Magistrates, R. H. Bullock-Marsham and Gilbert G. Kennedy, Esqs.; Chief Clerk, H. P. Newton. **West Ham**, West Ham Lane, Stratford, Magistrates, E. Bagallay, Esq., and the Borough Justices; Chief Clerk, W. H. Fowler. The Clerkenwell and North London police courts are together served by three magistrates, as are also Wandsworth and West London. **Hours of Sitting:** **Mansion House**, 12 to 2; **Guildhall**, 10 to 4; **Greenwich**, 10 to 1·30; **Woolwich**, 2·30 to 5. **All other Courts**, 10 to 5.

Pollock, Sir Charles Edward, who comes of an old legal family, was b. in 1823, and called to the bar at the Inner Temple in '47. For the first five years he had hardly any practice, being engaged in the production of legal literary works, which ultimately secured him considerable reputation. Q.C. '66. Appointed a Baron of the Exchequer '73. Baron Pollock is a Judge whose patience and courtesy are proverbial, and he is highly popular with the bar.

Pollock, Walter Herries, son of Sir W. F. Pollock, was b. 1850. Ed. at Eton, and Trin. Coll., Cambridge, where he took classical honours '71. Called to the bar at the Inner Temple '74. After having been some time on the staff, Mr. Pollock became editor of the *Saturday Review* ('83). Mr. P. issued in '89 "A Nine Men's Morrice." Issued in Feb. '91 a book of poems. Mr. P. is one of the most expert swordsmen of the day.

Polo. (For early history see ed. '90.) Matches between the Hurlingham and Ranelagh Clubs, Oxford and Cambridge Universities, and various counties are played annually; but the contests for the Inter-regimental Cup

evoke, perhaps, the greatest interest. The final match for this coveted prize was played at Hurlingham, on July 7th, between the 9th Lancers (represented by Major Lamont, Captain W. Jenner, Captain F. Colvin, and Captain Hon. C. Willoughby) and the 15th Hussars (represented by Captain P. Bewicke, Mr. H. Dundas, Captain T. de Crespigny, and Mr. J. Hargreaves), and resulted in favour of the former, for the third year in succession, by three goals to two. On the same ground, on July 11th, the deciding contest for the County Cup was fought between teams representing the Liverpool and Ashted Clubs (those playing for the great seaport city being Mr. W. H. Walker, Mr. A. Tyer, Mr. C. E. Mason, and Mr. G. H. Pilkington; whose opponents were Captain Barry, Mr. Walter A. Peake, Hon. Gilbert Willoughby, and Mr. R. G. Milne), the latter sustaining a crushing defeat by six goals to love. The final round for the Infantry Cup, instituted in '90, was decided on July 18th, also on the Hurlingham Club ground, where the 5th (Northumberland) Fusiliers (Captain St. George Henry, Captain Hon. Charles Lambton, Captain Witaker, and Captain Thomas Pilcher) retained the trophy by defeating the Buffs (Mr. E. G. Bainbridge, Mr. H. F. Sparrow, Mr. E. Williams, and Mr. N. H. Virtue) by nine goals to love. The final tie of the All Ireland Open Cup competition was played on Sept 5th between the 13th Hussars (Captain M. Laren, Mr. Robertson-Aikman, Mr. Wyse, and Captain Pedder) and the 9th Hussars (Captain Chaloner, Captain Goring, Captain Oswald, and Mr. Slade Gully) by nine goals to four.

Polytechnic, Regent Street. With a view of further developing the movement on behalf of young men to whom Mr. Quintin Hogg (*q.v.*) had shown such generosity, he purchased in '80 for £50,000 the old Polytechnic, Regent St., and converted it into a great technical and recreative school. The institution has been a great success, about 9000 students having attended its classes during the last twelve months. The cost of maintaining it is about £15,000 a year, about £9000 of which is provided by class fees. Previous to '89 the deficit of £6000 was annually made up by Mr. Hogg, who has altogether spent about £100,000 upon his scheme. The Charity Commissioners, with a view to placing the institution on a permanent financial basis, have granted £2,500 per annum towards the regular expenditure. A similar amount will be made up by voluntary contributions. A Young Women's Institute has also been founded in premises adjoining the Polytechnic, and promises to be as successful as the latter.

Poor-Law. The English poor-law is contained in many statutes, the earliest being that of the 43rd year of Elizabeth, and in innumerable reported cases. But the modern system of poor-relief was established by the **Poor-Law Amendment Act of 1834**. Under this Act the parishes which had formerly been areas for poor-law purposes were grouped into unions, a market town being generally taken for the centre. There are in England and Wales (1891) 648 unions and parishes, the population of which parishes numbered 25,972,119 in '81. Within each union was established a board of guardians, consisting firstly of all county justices residing within the union, who have seats *ex officio*; and secondly of guardians elected by the several parishes of the union. The

parishes differ much in size, and small parishes may be grouped for representation, but every parish of 300 inhabitants must have at least one representative. The electors in each parish are the owners and ratepayers. In either character an elector may have any number of plural votes not exceeding six, one vote for every £50 rating; so that the maximum number of votes which can be given by any one person is twelve. The qualification of a guardian is fixed in each case by the Local Government Board, and ranges from £10 to £40 rating. The elections take place every April, the term of office being annual. A board of guardians has usually a clerk, a treasurer, registrars of births and deaths, medical, vaccination, workhouse, and relieving officers. They may employ paid valuers and collectors, and form committees of their own number for the relief of the poor in the different parts of the union. All boards of guardians are largely controlled by the Local Government Board (*q.v.*), which by its general orders regulates the mode of their election, their procedure, their finance, and their administrative methods, whilst by its special orders it compels observance of the law in particular cases. The expenses of poor-relief are defrayed out of the poor-rate levied in each union upon a special valuation. A valuation list is prepared by the overseers of each parish, and after publication is sent to the assessment committee of the guardians, who must hear objections. After altering the list as they think proper, the committee approve and sign it. From the decision of the committee there is an appeal to quarter sessions. Relief is either indoor or outdoor relief. The former is the relief given in the workhouse, while the latter is the relief given in money, medicine, etc., to people living in their own homes. The number of persons receiving relief has diminished of late years, partly because of the greater strictness in granting outdoor relief. The total number of persons receiving relief in England and Wales on Jan. 1st, '91, was 774,905, a decrease of 12,640 compared with the number for the corresponding date of '90. The indoor paupers (excluding pauper lunatics) numbered 192,942, and the outdoor 581,963. Beside the administration of poor-relief other important functions under the Public Health Acts, the Elementary Education Acts, and many other Acts, have been assigned to the guardians of the poor. During the year ended the 25th of March '90 (to which date the latest returns are made up), the total amount of poor rates received, including receipts in aid of poor rates, in England and Wales, was £17,789,210. The total expenditure in actual relief of the poor, during the same time, was £8,434,345. The other Poor-Law authorities, who exercise powers in relation to the relief of the poor, are (1) The Metropolitan Asylums Board, who are the Managers of the Metropolitan Asylum District, constituted under the Metropolitan Poor Act (1867) for the reception and relief of fever and small-pox patients and the insane poor chargeable to the unions and parishes in the district; (2) The Managers of two Metropolitan Sick Asylum Districts, constituted under the same Act; and (3) The Managers of School Districts formed under the Poor Law Amendment Act (1844) for the maintenance of district schools.

Pope, The. His Holiness Leo XIII., the 258th Roman Pontiff, son of Count Ludovico Pecci, was b. at Carpineto, 1810. Ed. at

the Jesuit Coll. of Viterbo ('18-24). Entered the School of Collegio Romano ('24), where he greatly distinguished himself, and proceeded to the College of Noble Ecclesiastics. Having become a Doctor of Laws, he was made by Pope Gregory XVI. Referendary of the Segnatura ('37). Took holy orders, and was consecrated priest ('37) by Cardinal Carlo Odescalchi. The title of "Prothonotary Apostolic" was bestowed on him by Pope Gregory, who also appointed him Apostolic delegate in succession at Benevento, Perugia, and Spoleto. Was sent as nuncio to Belgium ('43), and created shortly after Archbishop of Damietta; nominated Bishop of Perugia ('46); created cardinal ('53). Elected Pope Feb. 20th, '78, and took the title of Leo XIII. Among the events of his Holiness' reign may be mentioned the restoration of the hierarchy in Scotland, the contest with Germany, the Kulturkampf, the now famous Falk Laws, and the *rapprochement* with Prince Bismarck. On the occasion of the dispute between Germany and Spain over the Caroline Islands, the Pope acted as arbiter, to the satisfaction of both parties. Towards the close

of '87 and the beginning of '88 Rome was the centre of great rejoicings in connection with the Papal Jubilee, intended to commemorate the 50th year of his Holiness' assumption of holy orders. In May ('88) a decree was issued by his Holiness, denouncing in general terms the methods adopted by some of the Irish leaders in the *Plan of Campaign*. On 13th Oct., '88, he received a visit from the Emperor William II. of Germany. Issued in June '91 an important Encyclical on Labour, which gave rise to much discussion.

Port Hamilton. This station of the British navy consists of three small islands situated about forty miles south of Corea (*q.v.*), commanding the straits of that name which lead from the China Seas to the Japanese Sea. The largest island, *Sodo*, is $3\frac{1}{2}$ miles long by a mile broad, and towers to a height of 650 feet; *Sunhodo*, the next in size, has only half the area, the highest point being 780 feet; the third, *Observatory Island*, is still smaller. The three inclose a harbour two miles long by a mile broad, and from nine to twelve fathoms in depth. The population in all is about 2,000, who follow agricultural pursuits.

Population and Area of the United Kingdom. The following is the latest official list (issued '91) of the population of England and Wales:—

Divisions and Registration Counties.	Population.		Marriages. Quarter ending 30th July, 91.	Births. Quarter ending 30th Sept. 91.	Deaths. Quarter ending 30th Sept. 91.
	Enumerated on 4th April, 1881.	Enumerated on 1st April, 1891.			
ENGLAND . . .	25,974,439	29,001,018	52,543	224,089	116,469
Divisions:					
I. London . . .	3,815,704	4,211,055	8,195	32,222	18,069
II. South-Eastern . . .	2,487,542	2,867,476	4,598	19,482	9,333
III. South Midland . . .	1,596,259	1,863,866	2,575	13,367	6,190
IV. Eastern . . .	1,343,524	1,575,260	2,243	11,936	5,612
V. South-Western . . .	1,859,511	1,908,934	3,173	13,180	6,790
VI. West Midland . . .	3,029,310	3,244,634	5,846	25,598	12,596
VII. North Midland . . .	1,637,865	1,806,089	3,506	13,940	6,710

X. Northern . . .	1,624,214	1,863,120	3,834	16,741	8,358
XI. Welsh . . .	1,577,559	1,776,120	3,503	14,654	7,675

Area. The total area of the United Kingdom is 121,481 sq. m., of which England comprises 50,823 sq. m.; Scotland, 30,417 sq. m.; Wales, 7,363 sq. m.; Ireland, 32,583 sq. m.; Isle of Man, 220 sq. m.; Channel Islands, 75 sq. m. In Great Britain in '90 the total cultivable land was divided as follows: corn crops, 8,033,133 acres; green crops, 3,297,528; flax, 2,455; hops, 54,551; bare fallow, etc., 508,119; clover and mature grasses, 4,808,819; permanent pasture, 16,017,492. Horses, 1,432,629; cattle, 6,508,632; sheep, 27,272,459; pigs, 2,773,609. In Ireland the division was as follows: corn crops, 1,514,607 acres; green crops, 1,214,396; flax, 96,871; bare fallow, etc., 15,538; clover, grasses, pasture, etc., 12,304,265. Horses, 523,384; cattle, 4,240,753; sheep, 4,323,805; pigs, 1,570,279.

Population of the World. Some very important statistics are given on this subject in the eighth edition of the *Bevölkerung der Erde*. The following table gives the area and population of the great divisions of the earth's surface according to the latest data:—

	Sq. Miles.	Pop.	To 1 sq. mile.
Europe (1) . . .	3,756,860	35,7379,000	94
Asia (2) . . .	17,530,686	825,954,000	47
Africa (3) . . .	11,277,364	103,953,000	14
America (4) . . .	14,801,402	121,713,000	8
Australia (5) . . .	2,991,442	3,230,000	1
Oceanic Islands . . .	73,120	7,420,000	10
Polar Regions . . .	1,730,810	80,400	—
Total . . .	52,821,684	1,479,729,400	

(1) Without Iceland, Nova Zembla, Atlantic Islands, etc. (2) Without Arctic Islands. (3) Without Madagascar, etc. (4) Without Arctic Regions. (5) The Continent and Tasmania.

Porto Rico. See **Puerto Rico**.

Port Said. A town and seaport of Egypt, on the Suez Canal, to which it owes its existence. Named after Said Pasha, patron of the enterprise. Pop. (in '82) 16,560. Essentially a coal

ing station for steamers, and dependent on the canal trade.

Portugal. Kingdom in S.W. Europe, under Louis I. of the House of Braganza. Area (including the Azores and Madeira, which are regarded as an integral part of the kingdom), 34,038 sq. m.; pop., 4,708,178. Constitution of 1826 (amended in 1852) recognises four powers—the legislative, executive, judicial, and moderating—the last being vested in a hereditary king. Two legislative chambers, the Peers and the Deputies, collectively called the Cortes. The peers, unlimited in number, are nominated by the Crown for life. The deputies are directly elected for four years by all registered citizens, twenty-one years of age, who can read and write, and possess an annual income of £22. Madeira and the Azores are included politically in the mother country. The Cortes meet at specified periods, without intervention of the king, who has no veto on a law twice passed. State religion is Roman Catholic; all others tolerated. **Estimated revenue**, '90-'91, £8,817,403; **expenditure**, £9,576,160; **debt**, £134,298,994; **imports**, '88, 17,981,438 m.; **exports**, 32,955,776 m. (milreis = 48. sd.).—**History.** In Nov. '90 the Britic expedition, under Captain Paiva, had an action with the natives, when the loss was heavy on both sides. The 250th anniversary of the independence of Portugal was celebrated (Dec. 1st). A dispute in the Manica country between the British South Africa Co. and the Mozambique Co. as to the flying of the British flag by the Chief Mutaca was reported (7th) as followed by fighting, in which the British defeated the Portuguese forces. It was stated (8th) that the Governor of Manicaland was in a position to repel any invasion by the forces of the South African Co. The Governor of Mozambique telegraphed to Lisbon (10th) that he had heard of no violence on the part of the agents of the British South Africa Co., but the Governor of Manica would hold an inquiry. It was reported (14th) that a mob attacked the British Consulate at Quillimane, on Wednesday (10th), but the report was stated to be an exaggeration (15th). A contract for a loan of three millions sterling to the Portuguese Government was signed at Paris. The university students offered themselves for enrolment as volunteers for Manicaland, but eventually their services were declined. The expedition from Lisbon to Africa was to consist of 759 men and 33 officers; the destination was expected to be Mozambique. The report of the Governor of Manica was to the effect that the English first attacked and hauled down the Portuguese flag. Official information was received at Lisbon (19th) that the British Government had requested the British South African Co. to withdraw from Massikesse. The transfer of the Madrid-Caures-Portugal and Plasencia railway to Astorga railways was approved by the Royal Portuguese Railway Co. (20th). The Powers replied to a note from the Government that the Manica question should be treated so as to avoid a collision between the British and Portuguese. Mr. G. S. Batcheller, the new United States Minister, presented his credentials (30th). It was reported (31st) that four hundred Portuguese volunteers were conveyed from Delagoa Bay to Beira to serve in the Manica country, having signed an agreement to fight the British if required.—**21.** Gen. Joubert visited Portugal, where he had an audience of the King. The Cortes was opened by the King (Jan. 2nd), and

adjourned (3rd). An extraordinary credit of 100 contos of reis for the military expedition to Mozambique was authorised (5th). The Mozambique Co. increased its capital to £100,000. It was announced (11th) that Senhor de Soveral was appointed minister to St. James's. The King decorated (13th) Lieutenant Continho for maintaining the prestige of Portugal on the Zambesi. The steamer *Malange* left Lisbon (15th) with the first half of the military expedition for the defence of Manica. Col. Pavia d'Andrade landed at Belem (19th). An endeavour was made by representatives of the British South African Co. and the Mozambique Co. to come to an arrangement, but (28th) the Portuguese Government forbade the latter to make any arrangement with the former. The 9th Chasseurs Regiment revolted at Oporto (31st), and were joined by other bodies of troops and some civilians. The revolt was quelled in a short time, and the military and civilians who took part in it tried by court-martial, military law being declared in force for one month. A collision occurred between the Municipal Guard and loyal troops and the rebels, when nine persons were killed and forty-eight wounded. The second part of the Mozambique expedition left Lisbon (Feb. 12th). General Correia da Silva was arrested at Lisbon on the charge of taking part in the revolt at Oporto. The Government (22nd) ordered the closing of all Socialist and Republican clubs. A provisional contract for a loan of ten millions sterling was signed (26th), founded on the concession of the tobacco monopoly, for thirty-five years. The court-martial on the Oporto revolt began (28th). The Cortes opened (March 4th). Queen Amelia took under her protection the family of Captain Seitao, the leader of the revolt of Oporto, and offered similar help to other families under similar circumstances. In consequence of the small amount of gold in the banks a decree was issued (May 11th) postponing the execution of all financial engagements for sixty days. A new ministry was formed (22nd). It was stated (25th) that the total indebtedness of the State was £138,672,744. Conflicts took place between the representatives of the British, Portuguese and African Companies, the latter declaring the route up the Lungwe closed. It was reported (June 8th) that the river was open to the British flag. A decree was published (26th) prohibiting the importation of matches. The estimates for '91-'92 were adopted by the Chamber. The Government ordered the coining of a large sum of money in silver at Birmingham. The Chamber of Deputies approved the Congo Treaty (July 5th). A credit of 7200 contos of reis for the purchase of metal to be coined was voted by the Chamber (6th). The decree suspending bank payments expired (10th). The Bank of Portugal issued notes of the value of 500 and 1000 reis, payable in silver to the amount of 2,000 contos. Money changers speculated largely in notes, and great excitement resulted; tradesmen also refused notes, except at great depreciation (19th). The Government granted (28th) three Royal charters in the province of Mozambique, the first to the Mozambique Co. according to the terms of the charter, with slight modifications, the royalty being 7½ per cent. A similar charter to the Serpa Pinto Group for the country extending from the river Sabi to the Limpopo;

and the third charter, for the territory between the river Rovuma to the river Lurio, inclusive of the Portuguese shore on Lake Nyassa, to the Carvalho Group. The King and Queen inaugurated the Beira Baixa railway (Sept. 6th). The birthday of the King and Queen was celebrated in Lisbon (28th); the former signed a decree pardoning the whole of the Oporto rebels. The coal deposits in the island of St. Vincent were granted for ninety-nine years to Senhor Machado, and of the territory north of the Mozambique to the river Lurio to Count Daupias & Co. A royal decree was issued (Oct. 12th) effecting an important transformation in the administration of the present province of Mozambique, which was henceforth to be denominated the State of East Africa, and divided into two provinces, to be named respectively the province of Mozambique and the province of Lourenço Marques. The former would embrace jurisdiction over all Portuguese territory in East Africa north of the Zambezi, and the latter all the territory to the south of that river. The Mozambique Co. was, by new statutes (13th), converted into a limited liability company, of indefinite duration, to hold the Beira Railway for ninety-nine years. The first issue of shares would be 40,000. (For army and navy see FOREIGN ARMIES AND NAVIES; for history, 70-89, see our previous editions; for colonies see COLONIES OF EUROPEAN POWERS); see also ANGLO-PORTUGUESE CONVENTION.

Portugal, Carlos I., King of, was b. Sept. 28, 1863, and bore the title of Duke of Braganza. Married (36) a daughter of the Comte de Paris. Succeeded to the throne Oct. '89. The king welcomed the deposed Emperor of Brazil to his country at the close of '89. His birthday in '91, coincident with the birthday of the Queen, was made the occasion of a pardon of those concerned in the Oporto riots.

Portuguese Political Parties. The legislature of Portugal is the Cortes Graes, consisting of two houses, the *Camara dos Pares* and the *Camara dos Deputados*. By a law passed in '85 hereditary peerages are being abolished by gradual process, and ultimately the king's right to nominate peers will be limited to the number of a hundred, exclusive of royal princes. In addition there are 50 elective peers, who must be more than 35 years of age. The second chamber is composed of members with an income of not less than 300 milreis per annum. They are elected under a system of universal suffrage every four years, and number about 170. They are divided roughly into Conservatives, Progressists and Republicans; but there are sub-divisions and independent groups. At the last election (March '90) 157 out of the 170 were classified as 114 *Conservatives*, 30 *Progressists*, 10 *Monarchists* of other shades and 3 *Republicans*. The ministry, which was formed with great difficulty as late as Oct. '90, and its chief, General D'Abreu-e-Souza, declared to the Cortes that his Government did not represent any particular party, but appealed for the help of parliament to settle the financial affairs of the country and the unfortunate difference between Great Britain and Portugal. The Progressists, the Conservatives, and a so-called National Party were represented in General D'Abreu-e-Souza's coalition Government. In April '91, the Republican party lost their leader, Col. Garcia, by death, and Gen. Latino Coelho's death

(Aug.) further inflicted a loss upon the party. On the resignation of the Cabinet in May '91, both Count San Januario and Senhor Serpa Pimental failed to form a ministry. On May 21st, the following ministry was formed: General Joao Chrysostomo, President and War General; Senhor Lopo Vaz, Minister of the Interior and of Public Instruction; Senhor Moraes Carvalho, Minister of Justice; Senhor Julio de Vilhena, Minister of Marine; Senhor Marianno Carvalho, Minister of Finance; Conde de Valdom, Minister of Foreign Affairs; Senhor Franco Castello Branco, Minister of Public Works. Of the new ministers, four rank as Regeneradores, the remainder being Progressists. The Lisbon municipal elections took place Nov. 15th, when the Monarchists polled 12,928 votes, and the Republicans 5339.

Possession of Game Bill. See SESSION, sect 951.

Positivism. The philosophical and religious system of Auguste Comte (1798-1857). The chief principles of the former side of the system are: (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows: mathematics, astronomy, physics, chemistry, biology, sociology, morals; and (2) The doctrine of the "three steps" through which the human mind has to pass in the investigation of phenomena—viz., the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the *cultus* of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical or doctrinal basis, corresponding to the theology of the supernatural religions; but besides this, it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or *régime* of positive religion Comte would include the political and social side of his system. The former involves the establishment of an international republic, consisting of the five great nations of Western Europe, which is ultimately destined to lead the whole world; the latter the reorganisation of society on the basis of a double direction—that of the temporal or material authority, and that of the spiritual or educating body. Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the *Revue Occidentale*, and Comte's apartments are kept as a place of meeting. Other groups exist in other cities of France, of the Continent, of America, both North and South, and in five or six cities in England. In London the principal places of meeting are Newton Hall, Fetter Lane, E.C.; and Chapel Street, W.C., and Fonthill Road, North London, N. In both of these halls the various Positivist publications may be obtained.

Postal Orders. See POST OFFICE.

Post Office. The late Sir R. Hill introduced penny postage in 1840. Since that date rates have been low and the progress of the service has been extraordinary. As regards events in connection with the Post Office in '91, the following must be noted. In May Sir Arthur Blackwood, K.C.B., and Mr. H. Buxton Forman represented Great Britain at the Congress of the International Postal Union in Vienna. They were accompanied by Messrs. C. A. King and L. A. Marshall, of the General Post Office. On May 25th the representatives of New South Wales, Victoria, Queensland, West

Australia, South Australia, Tasmania, and New Zealand agreed, on behalf of their colonies, to join the Union after Oct. 1st, '91. The death of the Postmaster-General, the Rt. Hon. H. C. Raikes, took place on Aug. 24th. His successor, Sir James Fergusson, Bart., M.P. (q.v.), was appointed in Sept. For the year ending March 31st, '91, 1,705,800,000 letters were delivered in the United Kingdom, an increase of 3'4 per cent. on the number in the preceding year, and an average of 45'2 to each person. Grouping letters, post cards, book packages, circulars and newspapers together, 2,577,700,000 deliveries were made, being an average of 68'4 to each person. Of the total number about 85'2 per cent. were delivered in England and Wales, 29'7 per cent. being delivered in the London postal district alone, 8'9 per cent. in Scotland, and 5'9 per cent. in Ireland. The number of registered letters was 11,357,197, a decrease of '006 per cent. An offer made by Messrs. De la Rue to terminate before its legal close the contract entered into by them for the supply of postcards, stamps, wrappers, etc., for ten years from '80, was accepted, and a new contract negotiated from Jan. 1st, '89, the effect of which is to diminish the payments to Messrs. De la Rue by some £26,000 a year, and this has rendered possible a reduction (1st July, '89) in the price of postcards, the public being able now to obtain a packet of ten stout cards for 6d., instead of 8d. for a packet of twelve; and 5½d. for a packet of ten thin cards, instead of 7d. for a packet of twelve. The above reduction in price may lead to a further increase of the volume of halfpenny matter, which, in the opinion of the Select Committee on Revenue Estimates, is carried on at a loss. New post offices were opened in 447 places, and 1,010 letter boxes added, making the total number of receptacles 49,643, of which 18,809 are Post Offices; and 750 additional licences were issued for the sale of stamps. In the year ending March 31st, '91, the expenditure in the purchase of sites and buildings was £27,804. The new head office for the eastern district of London, situated in the Whitechapel Road, and erected at a cost of about £25,000, has been occupied; and new Crown post offices have been completed at Ballinasloe, Barrow-in-Furness, Birmingham, Dumfermline, Balls Bridge (Dublin), Inverness, Kelso, Nuneaton, South Shields, and Woolwich. Considerable progress has been made with the construction of the new building in St. Martin's-le-Grand, which it is expected will be completed in '93 or '94. It is interesting to note that the Postmaster-General holds in London alone some 30 freehold properties, roughly estimated at a value of 2½ millions sterling, the money for which has been voted by the House of Commons, and charged to current expenditure in various years. The permanent staff of the Post Office is 63,868, including 8877 females. The number added in the year ending March 31st, '91, was 2814. Besides these there are about 55,000 persons, of whom 6000 are females, employed by local postmasters. The list of retired officers in receipt of pensions shows a total of 3367 in '89, their pensions amounting to £177,498 a year. The number of direct mails despatched has been increased by 136, and those received by 20. A travelling post office was (April 1st, '90) attached to the train leaving Waterloo at 5.50 a.m. for letters posted in London in the evening, or brought in by the evening mails

from the south of England, and the return service reaches Waterloo at 5.46 p.m. In connection with the travelling post office running between Queenborough and London it has been found that, by altering the time of departure of a morning mail train for King's Cross, and completing the sorting in the train, it is possible to deliver letters in the West Riding and other localities in time for replies, to be sent by the continental mails leaving London the same night. An express delivery service was introduced in London on March 25th, and subsequently extended to the provinces, by means of which, for a small fixed charge, a message, letter, or parcel can be sent by a special messenger from 925 post offices in London, and numerous offices in the provinces. The rate charged, in addition to the ordinary postage is:—

For the first mile and under . . . 2d.

For every succeeding mile or part

of a mile

3d.

Since Aug. 1st it has been possible to post a letter to any express delivery office, and have it sent thence by special messenger. The subscribers to post office telephone exchanges and holders of private wires can summon the messengers without extra charge. Considerable time will be gained by the use of these facilities, especially in a rural district with only one delivery a day. From Feb. 1st the railway companies were empowered to carry single letters, which are either delivered to the addressees at the railway stations, or forwarded by post from the most convenient points on the railway. In the first three months 37,000 letters were sent this way. At considerable extra cost the Post Office is extending the concession of entire relief from duty on alternate Sundays to postmen throughout the United Kingdom. Regarding foreign and colonial mails, postage on letters for the Cape of Good Hope, Natal, etc., wholly by sea, has been reduced from 6d. to 4d. per ½ oz. the mail leaving London every Friday morning; and by making use of the "South Express" service, from Paris to Lisbon, letters posted in time to be included in the Continental mail despatched at 8.25 a.m. on Saturdays can at the previous rate of postage, 6d. ½ oz., be sent on to catch the mail at Lisbon, the result being that a letter may now be conveyed from London to the Cape of Good Hope in twenty instead of twenty-three days. A weekly all-sea service to the Australasian colonies, at a cheap rate of 4d. per ½ oz., began on Jan. 1st, '89, and to the end of March about 25,000 letters had been sent by that route. Postcards costing 2d. may now be sent to Australasia and Fiji by the all-sea route, and cards costing 3d. by the quicker route, *via* France and Italy. Daily communication is now established with Constantinople, *via* Servia. A further reduction was secured in '90 in the rates payable to the French and Italian administrators for the transit by a special train service throughout France and Italy of the mails between England and the East, and a saving of between £5000 and £6000 has been secured. This reduction, taken with that effected in '87 represents a total saving of nearly £26,000 a year, without any loss of efficiency. The French administrator at the same time agreed to bear the cost of the transfer of the mails from the steamers at Calais, thereby saving this country about £1000 a year. By arrangement with the Royal Mail and the

Pacific Steam Navigation Companies a yearly loss of about £2600 has also been effected in the transmission of closed foreign mails by English packets to South America. The ordinary letter rates to and from India and the Colonies were reduced to 2½d. on Jan. 1st, which has added about £100,000 a year to the loss on the service. The concessions held by the Submarine Telegraph Co. expired in Jan. '89, but were extended to March. In compliance with representations in Parliament from commercial and other bodies, that a direct system of international telegraphic communication, without the intervention of a private company, should be established between England and the neighbouring Continental states, the Post Office did not renew the concessions, but entered into negotiations with the German, French, Dutch, and Belgian Governments for the direct transmission of telegrams between the telegraph department of this country and the telegraph administrations of the other countries concerned. The cables, plant, and offices of the Submarine Co., in Throgmorton Avenue and at various points on the coast, were purchased by the Post Office, and 70 of the staff of the Company taken over by the Department. The capital amount expended by England in this transaction was £67,163; and on April 1st '90, new business was commenced with a uniform rate to France, Germany, Holland, and Belgium, of 2d. per word, with a minimum of 10d. for a message. During '91 there was a large increase in the number of such telegrams, due to the reduction of rates and charges and improved service. The gross revenue of the Post Office for the year was £11,091,863. The net revenue was £9,843,268. The expenditure was £1,248,505. The Postmaster-General is the parliamentary head; the permanent chief is the Secretary, Sir Arthur Blackwood, K.C.B. There are also a financial secretary (Mr. Algernon Turner, C.B.) and four under-secretaries. Inland letters, books and parcels sent prepaid to any part of the United Kingdom are charged as in the following table:—

Weight not exceeding	Letter Post.	Book Post.	Parcel Post.	
			Weight.	Charge.
lb. oz.	s. d.	s. d.	lb.	s. d.
0 1	0 1	0 0½	Not ex. 1	0 3
0 2	0 1½	0 0½	" 2	0 4½
0 4	0 2	0 1	" 3	0 6
0 6	0 2½	0 1½	" 4	0 7½
0 8	0 3	0 2	" 5	0 9
0 10	0 3½	0 2½	" 6	0 10½
0 12	0 4	0 3	" 7	1 0
			" 8	1 1½
			" 9	1 3
			" 10	1 4½
			" 11	1 6

One halfpenny for every additional two ounces.

No letter may be more than 18 inches in length, 9 in width, or 6 in depth, unless sent to or from a Government office. The weight is unlimited. Double postage is charged on delivery if the postage of books, letters, or patterns be not paid in advance. If the postage be insufficient, double the deficiency will be charged. The postage must be prepaid by means of ordinary postage stamps, to be affixed by the sender. The words *Parcel Post* should be written or printed on the left-hand side of

the parcel, immediately above the address. The greatest length allowed for an inland parcel is 3 ft. 6 in., while the length and girth combined may be as much as 6 ft. (Thus a parcel measuring 3 ft. 6 in. in length may measure as much as 2 ft. 6 in. in girth; or a shorter parcel may be thicker, for, if it measure no more than 3 ft., it may measure 3 ft. round the thickest part.) Parcels must not be posted in an ordinary letter-box, but must be handed over the counter of a post-office to the proper officer, by whom the size, weight and postage of each parcel is tested before being accepted. Certain parcels are prohibited being sent: such as those bearing or containing writing or marks of an offensive or indecent character; or containing gunpowder, cartridges, lucifer matches, or other explosive or combustible material, live animals, or any substance likely to cause injury to other parcels or to the officers of the Post Office; while parcels containing such articles as eggs, fish, meat or other animal matter, or knives and other sharp instruments, can only be sent if so packed as to prevent all risk or injury to other parcels. Liquid matter must be contained in bottles, cases or cans, securely stopped; and bottles and other glass articles must be so packed as to be secure from breakage. There is a continuously steady growth in Parcel Post business. For the year ending March '91, 46,287,956 parcels were carried for £1,035,773. The railway companies take 55 per cent. of the postage on railway-borne parcels. This department is being energetically worked by the authorities, who in the summer months make a special delivery of parcels in Covent Garden market for the convenience of fruit growers. Special facilities have also been made for the collection of the parcels of private firms. This branch of Post Office business is steadily increasing. The number of parcels despatched from England to foreign countries and to the colonies was 1,148,320, an increase of 122,428 on the previous year. The number received from abroad was 394,925, an increase of 42,940. The Parcel Post has been extended to Mauritius, Iceland, the Faroe Islands, Samoa, Tonga, Uruguay, Tahiti, Obock, the Argentine Republic, the Congo State, and Gaboon; the rates to Cape of Good Hope, Canada, St. Helena, Ascension, Gibraltar, Malta and Tangier have been reduced, and the weight for parcels to Canada raised from 4 lb. to 5 lb. The rules of the Inland Samples Post have recently been modified, to the advantage of traders sending patterns on approval for return.—**REGISTRATION OF INLAND PARCELS.** On June 1st, '91, a new series of rules as to loss or damage of inland parcels came into force. They provided that in the case of parcels for which a certificate of posting shall have been obtained, compensation up to £3, instead of up to £1, will be given without payment of any fee; but, as at present, compensation will not be given for any other unregistered inland postal packets. No separate fees for insurance will be charged; but, on prepayment of a single fee (in which will be included the ordinary registration fee of 2d.), in addition to postage, any inland postal packet may be registered, and compensation in the event of loss or damage may be secured up to £25. The fees payable on registering inland letters, parcels and other postal packets, and the respective limits of compensation, will be as follows:—Fee, 2d., limit of compensation,

£5; 3d., £10; 4d., £15; 5d., £20; 6d., £25. The general rules governing the inland registered letter post will apply to registered parcels; and those rules, as well as the rules for the inland parcel post, will remain unchanged, except as follows:—A system of payment in full for damage, whether to letters or to parcels, will in all cases be followed, instead of the present proportionate system. Rural postmen will receive for registration any letter, parcel, post-card, book-packet, newspaper, or sample packet, whether the fee be 2d. or more than 2d. The registered parcel post will be available for watches and jewellery, which it has hitherto been necessary to exclude from compensation when sent by the parcel post. Unregistered parcels found to contain money, watches, or jewellery, or on the cover of which is written or impressed the word "Registered" or any other word or phrase to the like effect, or marked in such a way as to indicate special value, will be compulsorily registered, and charged on delivery with a fee of 8d. in addition to the ordinary postage; but compulsory registration will in no case give a title to compensation. As in the case of all other registered articles, an official receipt will be taken on delivery of each registered parcel; and, by preparing a further fee of 2d., the sender of a registered letter or parcel may obtain, in due course, an acknowledgment of delivery signed by the recipient. The public are reminded that, as a necessary condition of compensation in any case, the contents of the letter or parcel must have been safely packed and enclosed in a reasonably strong cover, case, or wrapper, fastened securely, and in a manner calculated to preserve the contents from abstraction or damage in the post. The sender of a letter or parcel intended to be registered must write on the cover, over the address, the word "Registered," and the amount of the fee proper to the value up to which he desires to secure compensation, thus—"Registered 2d.," "Registered 3d.," and so on. This scheme applies only to the United Kingdom, the Channel Islands, and the Isle of Man, and not at present to letters or parcels addressed to places abroad.—**POST OFFICE SAVINGS BANKS.** The late Sir C. W. Sikes, of Huddersfield, originated the Post Office Savings Bank scheme, which came into operation in 1861. Deposits of one shilling and upwards are received, subject to the limits of £30 in one year and £150 in all, exclusive of interest at the rate of £2 10s. per annum. Pennies may be saved by the use of Mr. Chetwynd's postage-stamp-saving slips, which, when they bear twelve stamps, are accepted by the Post Office as a shilling deposit. This branch of the Post Office business showed an increase for the year ending Dec 31st, '90. The amount deposited was £20,990,692, as against £19,814,308 in '89. The total amount standing to the credit of depositors, including interest, at the end of '90 was £67,634,807, an increase of £4,635,187, as compared with an increase of £4,443,226 in '89. The average amount of each deposit was £2 7s. 10d., as against £2 8s. 11d. in '89. This total is inclusive of the sum of £1,553,355 interest credited to depositors. The number of Savings Bank accounts opened in '90 was 997,283, and 677,778 were closed. The total number of accounts open at the end of the year was 4,827,314, or 319,503 more than in '89. The total number of Post Offices open for the

transaction of Savings Bank business on Dec. 31st, '90, was 9681, or 328 more than in '89. The number of Registered Friendly Societies authorised during the year to open accounts without limit as to amount in the Post Office Savings Bank was 734, and the number of Provident and Charitable Societies authorised to open accounts during the year was 2472. Only 275 Penny Banks invested their funds during '90, as compared with 284 in '89. Of the number last year 122 were connected with schools, of which 39 were board schools. During the year 22 Trustee Savings Banks were closed, and deposits amounting to £525,410 and stock investment of the nominal value of £3784 were transferred to the Post Office, in addition to deposits amounting to £54,539, and £3034 stock transferred in the ordinary course of business. The scheme by which depositors can become holders of Government Stock was initiated by the late Mr. Fawcett, when Postmaster-General, and has proved highly beneficial to the thrifty. During the year ending Dec. 31st, '90, there was a slight increase in Government Stock investment business by the Post Office. The amount invested was £1,125,310, as compared with £1,003,368 the previous year. The following new regulations affecting stock investments are now in force: reducing the minimum sum which can be invested from £10 to 15s.; transference of stock in the names of holders from the Post Office to the Bank of England books. Under these regulations 204 transfers were made in '90. In July '89 the Local Loans 3 per cent. stock was made available for purchase through the Savings Bank; but although every effort was made to give the fact publicity, the number of investments was comparatively small.—**LIFE ASSURANCE AND ANNUITIES.** This system was first instituted in '65, and has not been taken advantage of by the public to the extent that was anticipated, though, since the adoption by the late Mr. Fawcett of a scheme devised by Mr. James J. Cardin, an improvement has set in. The business for '90 showed that the total number of life insurances in existence on Dec. 31st was 6661. Insurers and purchasers of annuities become savings bank depositors, and premiums are payable through savings bank accounts, and are deducted therefrom without trouble to depositors. Persons of either sex may insure their lives with the Post Office for any amount not less than £5 or more than £100, the limits of age being 14 years as the minimum and 65 as the maximum, or 8 years as the minimum if the amount assured does not exceed £5. Immediate or Deferred Annuities are granted to any person not under five years of age for any amount between £1 and £100. Deferred annuities are granted either with or without the return of the purchase money. Husband and wife may each be insured to the full amount of £100, or purchase an annuity of £100. Insurances for sums not exceeding £25 are granted without medical examination, but if the insurer die before the second premium becomes payable, only the amount of his first premium will be paid, and if he die before the third premium is payable, only half the sum insured becomes due to his representatives. (For fuller account of the system see ed. '88, or obtain papers from any post office savings bank.) The Postmaster-General invites applications similar in object to an arrangement entered upon in

'89 with the authorities of Oxford College, by which 19 Deferred Annuities on the lives of college servants, on the "money returnable" system, were granted, and thus a system of providing pensions established through the agency of the Post Office.—**POSTAL ORDERS.** First brought into operation in '81. The system was devised by the late Mr. George Chetwynd, C.B., and has proved highly successful. With postal orders no letter of advice is used, and the orders are sold to the public like postage stamps. They must be cashed within three months from the last day of the month of issue, and when crossed become payable only to a banker. If not presented within the period named they become liable to a deduction of an amount equal to the original poundage for each three-monthly period, or part thereof, of delay. Fourteen denominations of orders are issued, the poundage varying from $\frac{1}{4}$ d. for a 1s. order to $\frac{1}{4}$ d. for a 20s. order. Broken amounts can be made up by postage stamps (not exceeding fivepence) affixed to the face of the order. Postal orders are issued in most of the colonies, and in India, Gibraltar, Malta, and Constantinople. A large staff of lady clerks is employed at headquarters on postal order business, and ladies are also largely employed in the Savings Bank Department. The postal order business for the year ending March 31st, '91, showed an increase. The amount transmitted by means of orders was £19,178,367, or £1,440,565 more than in '89-90. The number of orders issued in the United Kingdom was 48,841,765. The denominations most used by the public are 1s., 2s., 4s., 10s., and 20s. The system is under the direction of the Receiver and Accountant-General of the Post Office.—**MONEY ORDERS.** The system of money orders was founded in 1792 by three post-office officials, somewhat in the nature of a private speculation. In 1838 the system was incorporated with the Post Office, and since that date has rapidly developed. It insures almost perfect immunity from risk by the means of a letter of advice. The rates charged were reduced in Sept. '87, and now are: $\frac{1}{4}$ d. for sums of £1 and under; $\frac{1}{4}$ d. for sums over £1 but not exceeding £2; $\frac{1}{4}$ d. for sums over £2 but not exceeding £4; $\frac{1}{4}$ d. for sums over £4 but not exceeding £7; and $\frac{1}{4}$ d. for sums over £7 and not exceeding £10, the largest sum for which an order is issued. Money orders should be presented within twelve months from the month of issue. Foreign or Colonial money orders are also issued, payable in India, the United States, Australia, Canada, the Cape of Good Hope, in almost all our colonies, and in the following foreign countries—viz., Austria, Hungary, Belgium, Denmark (including Danish West Indies), Dutch East Indian Possessions, Egypt, France, Germany, Hawaii (Sandwich Islands), Holland, Iceland, Italy, Japan, Norway, Portugal, Sweden, Switzerland, and the United States. The rates charged are: for sums not exceeding £2, $\frac{1}{4}$ d.; £5, 1s.; £7, 1s. 6d.; and £10, 2s. The total number of money orders of all descriptions issued in the year ended March 31st, '91 (last return), was 9,239,005, and the amount transmitted was £44,933,463, or £601,071 more than the year before.—**POSTAL TELEGRAPH DEPARTMENT.** Since the Government took over in 1870 the wires of the various private companies there has been a marvellous development of the telegraphic system.

The public and the newspaper press have benefited largely by the transfer. The rates for press messages are still 1s. for every 100 words transmitted between 6 p.m. and 9 a.m., and 1s. for every 75 words between 9 a.m. and 6 p.m. to a single address, with an additional charge of $\frac{1}{4}$ d. for every 100 words, or 75 words as the case may be of the same telegraphic communication so transmitted to every additional address. The rate for ordinary messages was reduced in '85 to $\frac{1}{4}$ d. a word, including the addresses, with a minimum charge of $\frac{1}{4}$ d. for the first twelve words. The number of Post Offices open for telegraph business is 5,912, of which 219 were opened during the year, and railway offices 1,715, of which 36 were opened during the year. Most of these offices (except the large receiving offices in London and other centres) are open from 8 a.m. to 8 p.m. Postmasters may, however, accept telegrams after the usual hours, provided the terminal office be open, or its attention can be gained. Excluding foreign, press, and free telegrams, the returns for the year '90-91 show 54,116,413 inland telegrams. There is an annual deficit on the working of the telegraph system. For '90-91 it was £198,181, as against £219,926 the preceding year. The average value of ordinary inland telegrams was 7.87d., as compared with 7.95d. in '89-90. The increase in the number of ordinary inland telegrams was at the rate of 6.5 per cent. There has, however, been a serious increase, at the rate of nearly 19 per cent., in the number of telegrams on the business of railway companies transmitted without charge by the Post Office, under obligations incurred in pursuance of the statutes under which their telegraphic business and the use of their systems for telegraphic purposes were acquired by the Government. At 8d. each these free messages would have yielded in '90-91 over £51,000 to that department. A very large staff of telegraphists is employed—over 2000 at the Central Office in St. Martin's-le-Grand alone. The instruments chiefly used are the Morse Sounder, Wheatstone automatic, and the Hughes' type printer. The chief regulations for foreign telegrams are founded upon the International Telegraph Convention, according to which regulations foreign telegrams are divided into three classes—viz., ordinary, code, and cypher. European code telegrams may be sent in any of the languages in use in Europe; or Latin may be employed; but no such telegram may contain words of more than one language. Cypher telegrams must be composed exclusively of figures, or of letters. The length allowed for a single word is, in European telegrams fifteen letters, and in extra-European telegrams ten letters. Any person may register an abbreviated or arbitrary address, a privilege taken advantage of by nearly every large user of the wires, on payment of a fee of a guinea a year. The process of placing the wires underground wherever possible has been considerably extended during the year ending March last. Of the lines of wire entering the Central Station in London, not one is open. On April 1st a new telephone line between Paris and London was opened to the public, and a conversation can be held at a charge of eight shillings for three minutes. See also article on TELEGRAPH CHARGES.—**TELEGRAPH MONEY ORDERS.** On Sept. 2nd, '89, the Postmaster-General experimentally inaugurated a system of Inland Telegraph Money

Orders, thus offering to the public the advantage of insuring the payment of money at post offices by telegraph. No single Telegraph Money Order can be issued for a greater amount than £10. The commission is as follows:—For sums not exceeding £1, 4d.; above £1 and not exceeding £2, 6d.; above £2 and not exceeding £4, 8d.; above £4 and not exceeding £7, 10d.; above £7 and not exceeding £10, 1s. In addition to the commission, a charge is made at the ordinary inland rate for the official telegram authorising payment at the office of payment and for the repetition thereof; the minimum being 9d. The telegraph charges only cover the cost of transmitting the official telegram of advice to the postmaster of the office of payment and its repetition. Any telegraphic communication which the remitter may wish to despatch to the payee must be paid for at the ordinary inland rate, the minimum being 6d. The order issued to the remitter should be retained as a receipt. Any person expecting a remittance by telegraph must attend at the office of payment, where, on his producing satisfactory evidence that he is the person entitled to receive the money, and on his stating the name of the remitter and signing a receipt, payment of the amount will be made. The Money Order Offices at which Telegraph Money Orders are issued are the principal offices in the following cities and towns: England—London, Birmingham, Brighton, Bristol, Cardiff, Leeds, Liverpool, Manchester, Margate, Newcastle-on-Tyne, Portsmouth, Scarborough; Scotland—Dundee, Edinburgh, Glasgow; Ireland—Belfast, Cork, Dublin. These regulations are to remain in force for one year only. The machinery is simple. A person desiring to pay money by telegraph must apply for a money order in the usual way, writing across the form "by telegraph." The money order form prepared by the Post Office official will be crossed "remitted by telegraph," and handed to the remitter by way of receipt. There will then be telegraphed to the paying office an order for the payment of the sum desired to the person named in the order; and upon the recipient, who will have been advised by the sender of the despatch of the money, presenting himself for payment, the paying postmaster will hand the sum over and obtain a receipt for it. It will be seen that the system might lead to difficulty if extended to village post offices, where ready cash is scarce; and for the present it is confined to some of the chief centres of correspondence. At the time of writing the public have not sufficiently taken advantage of the new facilities to enable the Post Office authorities to judge whether the experiment will lead to the establishment of the system as a permanent branch of Post Office work. Should it prove a success—as it has already done on the Continent—it is capable of wide extension beyond the cities and towns named above. But it has not been much used by the public, though it is said to be growing in favour. The number of telegraph money orders issued was 30,196, of the value of £112,570.—**POSTAL UNION.** The. Established July 1st, '75, as the result of the Postal Congress held at Berne in '74, at which a treaty was signed by all European States except France, by the United States of America, and by Egypt. A Postal Congress, to discuss points and to consider propositions affecting the Union, assembles once every five years, at

which delegates from all the States concerned meet. An International Postal Congress was held at Vienna, May 20th, '91. The Postmaster-General, in Nov., issued an instruction to the surveyors of the Post Office throughout the kingdom to the effect that future vacancies, whether temporary or permanent, among the rural and provincial town postmen are to be preferentially filled by the appointment of soldiers of good character belonging to the reserve, or having served their time. About 16,000 places will be gradually opened to soldiers. The men will have to pass the prescribed Civil Service examinations, and their characters to be certified by the military authorities.

Powayan (India) Steam Tramway. This line, which is described as the pioneer of light-feeder railways in the North-West, and is 31 miles long, was inspected and passed for passengers and goods traffic on July 15th, '91. It extends from a joint transhipment platform on the Oudh and Kohikund Railway at Shah-jehanpur, to Khotar, a town six miles from Milani, where there is a station on the Lucknow, Sitapur and Sibraman Railway. It is laid along the arm of a public road, and is of 2½ ft. gauge.

Poynter, Edward John, R.A., b. 1835. Studied art both in England and on the Continent. Elected A.R.A. '69. Appointed Slade Professor of Art at Univ. Coll., London '71, and subsequently became Director of Art, and Principal of the National Art Training School at South Kensington. His successful pictures include portraits of Lieut.-Gen. Sir Gerald Graham and the Marquis of Ripon, the latter for the Government House at Calcutta. Other of his well known paintings are "Israel in Egypt," "Rhodope," "The Festival," "The Golden Age," "Atalanta's Race," "The Fortune Teller," "Zenobia," and "Diadumene." He published in '79 "Ten Lectures on Art." Elected R.A. '76. Mr. P.'s picture, on which he has long been engaged, representing "The Meeting of Solomon and the Queen of Sheba," was exhibited in '90.

Preceptors, College of. Established 1846, incorporated by Royal Charter '49, "for the purpose of promoting sound learning and of advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of his profession, and by providing for the periodical session of a competent Board of Examiners to ascertain and give certificates of the acquirements and fitness for their office of persons engaged or desiring to be engaged in the education of youth." With this view the charter empowers the College to hold examinations of teachers and schools, and to grant diplomas and certificates to such persons as pass these examinations satisfactorily. To effect these objects, two plans of examination have been established:—(1) That of teachers, to ascertain their qualifications and fitness to take part in the work of instruction; (2) that of pupils, to test their progress, and to afford

at once to the teacher and to the public a satisfactory criterion of the value of the instruction they receive. The diplomas granted by the College to teachers are of three grades—Associate, Licentiate, and Fellow; and a distinctive feature of the examinations is, that in all cases the theory and practice of education is an obligatory subject for each grade. In '90 the number of candidates examined for certificates exceeded 16,000. About 4800 schools, both public and private, are now brought under the influence of the College. Visiting examiners are also appointed by the College for the inspection and examination of public and private schools. In '73 the Council of the College instituted a Professorship (the first established in this country) of the Science and Art of Education, and regular courses of lectures for teachers are delivered in the College lecture-hall. The new buildings were opened by H.R.H. the Prince of Wales, March 30th, '87. The College also conducts the Preliminary Examinations of the Pharmaceutical Society and the Royal Veterinary College, as well as those for the commercial certificates of the London Chamber of Commerce. Offices, Bloomsbury Sq. Organ, *Educational Times*.

Presbyterianism is church government by presbyters, and by presbyters only. (For further definitions and history see previous eds.)* The Presbyterian Church of England consists of 289 fully organised congregations and 10 preaching stations, providing accommodation for 152,075 persons, besides a large number of fully equipped mission stations in connection with town congregations, with an average attendance of about 12,000 persons. The number of ministers, including professors, is 304, with 21 ordained and 10 medical missionaries in the foreign field, besides 2 missionary teachers and 17 lady missionaries. There are also 26 licentiates, and 24 theological students preparing for the ministry. The property of the Church is estimated at £1,509,000, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustentation Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad. Of the existing places of worship 155 have been erected since '51, their value being estimated at £751,999; 28 of the existing congregations trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 219 have been established within the present century. The revival of Presbyterianism in England in the earlier portion of the present century was due to the influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in '46. The English section of that Synod united with the older Presbyterian body in England in '76, so forming the Presbyterian Church of England. The total income of the Church in '89 was £239,284—£39,614 of the amount being for missionary and other general objects. The backbone of the Church finance is the Sustentation Fund, which since '78 has secured for the body of the ministers, excluding a limited number under special arrangements, a mini-

um income of £200. Under this scheme 92 congregations were aid-receiving in '90 to the amount of £5315 7s. 4d., as against 103 in '78 to the amount of £6443 7s. 6d., the average amount of aid required being at date £57 15s. per congregation, as against £62 10s. in '78. The Church is therefore steadily consolidating.—The centenary of the establishment of the Presbyterian Assembly in America was celebrated in '88. Gen. Sec., J. Thorburn McGaw, D.D., 7, East India Avenue, Leadenhall St., E.C. Financial Sec., Mr. John Leggat.

Price of Gold. See MONEY MARKET.

Prime Minister is he who at the summons of the sovereign has succeeded in forming an administration, of which he is the head, and which may be named after him. It may be assumed that those who accept office under him agree with his policy in the main. Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own patronage is very extensive. In forming an administration, he selects all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacancies occur the archbishops, bishops and deans and the highest judges are appointed, and over one hundred Crown livings are filled; and upon his recommendation that the most envied temporal titles and honourable distinctions—peerages, baronetcies, and the Garter, for example—are conferred, and such high appointments as the Lord Lieutenantcy of Ireland, the Viceroyalty of India, the principal ambassadorships and colonial governorships, and the lord lieutenancies of counties are made by the Crown. He is the leader of the House of Parliament of which he is a member. Yet as Prime Minister he enjoys no legal precedence over his colleagues, his official existence being indeed not recognised by statute.

Primitive Methodism had its origin in Staffordshire in 1810, Mr. Hugh Bourne, a Wesleyan lay-preacher, being its founder. The ten persons forming the first class at Standley had never previously belonged to any other church; Primitive Methodism cannot therefore be regarded as a "split." Mr. Bourne, who had no intention of founding another sect, was at length prevailed upon to take it under his care, and to form other classes, which in time developed into "societies." The first Conference was held in '20. Primitive Methodism has now 588 stations in the United Kingdom, and a membership second only to the Wesleyans. It has missions in Southern Western and Central Africa, in South Australia, New Zealand, and Queensland. It has a training college for ministers at Manchester, and colleges for youths at York and Birmingham, also an orphanage at Alresford. Its Book-room profits last year amounted to £4316 15s. 2½d.; its missionary income was £18,499 12s. 7d.; and the premium revenue of the Connexional Fire Insurance Co., £1731 4s. 0d. Latest statistics: Members, 194,453; increase for

the year, 1166; ministers, 1079; local preachers, 16,403; class leaders, 10,481; places of worship, 4482; rented rooms, etc., 1399; hearers, 586,417; value of Connexional property, £3,329,648 15s. 3d.; debt upon Connexional property, £1,668,263 10s. 7d.; Sabbath schools, 4275; teachers, 61,402; scholars, 435,912. *Miss Seco*, Rev. Primrose League. A league originated in 1883, in memory of the late Earl of Beaconsfield, and so called because on the anniversary of his death every member wears a bunch of primroses. The members, who include both sexes, are styled *Knights, Dames, and Associates*, and their branches are called "*Habitations*." The members of the *Primrose League* took an active part in the last electoral campaign, and exercised considerable influence in London and its neighbourhood in favour of the Constitutional-Unionist candidates. *Grand Master*, Marquis of Salisbury, K.G.; *Chairman of Grand Council and Chancellor of the League*, Sir Algernon Borthwick, Bart., M.P. Members enrolled up to Sept. '91 are 7,033,657, including Scotland, divided among 2161 *Habitations*. *Habitations* have been established in India, Malta, Cyprus, Sydney, British Honduras, Mauritius, Hong Kong, etc. *Vice-Chancellor*, G. S. Lane-Fox, 6A, Victoria Street, S.W. *Official Organ*, *The Primrose League Gazette* (weekly).

Prince Edward Island. A province of the Dominion of Canada. It lies in St. Lawrence Gulf, north of Nova Scotia and between New Brunswick and Cape Breton. Area 2,133 sq. m.; pop. 108,891. Capital *Charlottetown*, pop. 11,485. Divided into three counties. *Administered* by a Lieut.-Governor and Executive Council. The people elect a Legislative Council of thirteen members and a House of Assembly of thirty. The Province has four seats in the Dominion Senate and seven in the House of Commons. Education is State-aided, free, and compulsory. Entered Dominion 1873. See CANADA.

Printing. See TYPES.

Prisons constitute an important department in our home administration. The Chief Office is at the *Home Office*. In the maintenance of prisons in England £466,000 a year is required; and in Scotland £109,000. There are four prisons in the Metropolis known as Her Majesty's Prisons, and the number of convict prisons throughout the country is fourteen, of which Millbank, Portland, Chatham, and Wormwood Scrubs are the best known; besides these, there is a large number of local prisons. The number of prisoners received, during the year ended March 31st, '91, in local prisons under sentence of the ordinary courts, was 140,632, besides 1,526 soldiers and sailors sentenced by courts-martial. There were also 8,401 persons imprisoned as debtors or on civil processes, making a total of 150,559. The corresponding numbers for the preceding year were respectively: Convicted by the ordinary Courts, 145,268; by courts-martial, 1,243; debtors and

civil process, 8,926; total, 155,437. The population of the prisons on March 31st, '91, was 12,814, having been 13,745 at the end of the previous year. The average daily population in '90-91 was 13,495—viz., 11,118 males and 2,377 females. In the previous year it was 14,389—viz., 11,852 males and 2,537 females. If the increase due to retaining convicts under sentence of penal servitude in local prisons be deducted, the average daily population would be 13,076 in '90-91, and 13,877 in the previous year. The average population of local or short sentence prisoners was, therefore, lower by 801 in '90-91 than in the previous year. In '87-88, the population was 20,833; in '85-86, 16,619. The highest number of prisoners shown in any of the monthly returns was 14,662 on Oct. 7th, '90, and the lowest was 11,919 on Jan. 6th, '91; the highest number being 2101 per cent. above the lowest number, which latter was less by 1729 than the corresponding number in the previous year. The decrease in the number of juvenile prisoners under 16 years of age during the last 204 years, is remarkable. In '70 the number was 9,908; in '80, 7,416; and in '90, 4,366. A return enumerating the cases in which the Probation of First Offenders Act, 1887, was applied in Metropolitan police and five other large provincial districts during the years '88, '89, '90, shows that of the total number—namely, 2,530—only 169, or 6.6 per cent., have been called upon to appear and receive judgment, or are known to have been subsequently convicted of a fresh offence. The number of deaths from natural causes was 103, giving a death-rate of 7.6; having been 252 in 1879, giving a death-rate of 12.7. There were only five cases of suicide, as against an average of 73 per annum in the 12 previous years. The number of male convicts received into convict prisons under fresh sentences during the same year was 605, besides 80 with licences revoked or recommitted to serve out the period remitted from their former sentences. The number of female convicts received into the convict prisons was 73, besides 22 with licences revoked or recommitted to serve out the period remitted from their former sentences. The number of sentences of penal servitude passed by ordinary Courts in England and Wales in '90-729—was lower than in any previous year. The average number of persons sentenced to penal servitude during the five years ended Dec. 31st, '59, was 2,580; Dec. 31st, '64, 2,800; Dec. 31st, '69, 1,978; Dec. 31st, '74, 1,622; Dec. 31st, '79, 1,633; Dec. 31st, '84, 1,427; Dec. 31st, '89, 945; Dec. 31st, '90, 729, the population having increased from 19,257,000 in '59 to 29,407,649 in '90. The total number in custody under sentence of penal servitude in Great Britain, Gibraltar and Western Australia was, in Dec. '60, 11666; and in July '91, 5334. The labour of the convicts has been used in the construction and maintenance of prison buildings; in the manufacture and repair of clothing, bedding, utensils, etc., required for the use of officers and prisoners; in the preparation of the food of prisoners, in washing their clothing, and in various services connected with the internal economy of the prisons, including the enforcement of a high degree of cleanliness. In addition, convict labour has been largely devoted to the performance of works, to the construction of buildings, and to the manufacture of a multiplicity of articles for the Admiralty, the War Department, the Post-Office, and other public departments.

The Medical Inspector states that the mortality in the prisons was very low. Only 36 deaths occurred among prisoners from natural causes, being 7·4 per 1,000 of the daily average population—a rate lower than any heretofore recorded. The diminution of crime since '82 had resulted in eight convict prisons being assigned to other public purposes. Consult "Penological and Preventive Principles," by W. Talfallack ('89).

Private Bill Procedure (Scotland) Bill. See SESSION, sect. 98.

Privilege of M.P.s. An important point as to the privilege of members of Parliament was decided by Mr. Justice Williams, sitting in Bankruptcy, Aug. 7th, '91. In '75 a sequestration was issued in Scotland against the estate of one Walter Armstrong. A Mr. Lindsay was made trustee, and on May 20th, '91, he applied to the Sheriff substitute of Roxburghshire for an order that Mr. Isaacson, M.P. for Stepney, should attend, and be examined with reference to the debtor's affairs. In the English Bankruptcy Court this order was backed by Mr. Registrar Giffard. On July 11th Mr. Isaacson attended the proceedings, but refused to be sworn, whereupon an application was made to Mr. Justice Williams to commit him for contempt. The principal point raised was whether Mr. Isaacson's position as a member of Parliament did not protect him against committal, and Mr. Justice Williams, reviewing the authorities, held that it did, and that therefore the decree of the Sheriff substitute and of the Registrar could not be enforced in the way desired.

Privileges, Committee for. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the House of Lords, a body which is composed of the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

Privy Council Office. See CIVIL SERVICE.

Prinsep, Valentine C., A.R.A., b. 1838, and though intended originally for the Indian Civil Service, preferred the profession of an artist. His paintings, which are regularly exhibited at the Academy, are held in high reputation for their power and vigour of design, and the excellence of their colouring. He has published a work on Indian travels, entitled "Imperial India." Elected an A.R.A. '79. In '91 his novel "Virginia" was issued.

Prize du Jockey Club. See TURF.

Privy Council (see MINISTRY). A body of persons nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born British subject, and as he is created by the sovereign, so he can be removed from the list at her pleasure. It is customary to include in the body the royal princes and the archbishops; several of the principal officers of State and of the Household become privy councillors by virtue

of their office; the principal secretaries of state are of course sworn of the Council before they can take part in the deliberations of the select number of the body which we know as the Cabinet Council; the Judge-Advocate-General is always included; and the rank is bestowed upon ambassadors and the principal colonial governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Any privy councillor may act as a justice of the peace. The Lord President of the Council is appointed by letters patent under the great seal; his duty is to manage the debates in council, to propose matters from the sovereign at the council table, and to report to Her Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the new sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the establishment of quarantine when it may be necessary, the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times as it may deem necessary and desirable. Royal proclamations, summoning or proroguing or dissolving Parliament, and for many other purposes, are made by and with the advice of the P.C. before being issued. Several public departments have grown out of or are even now committees of the Council. The Board of Trade (*q.v.*), though now an entirely separate department, is still officially entitled the Committee of Council for Trade. The Education Department, with its own vice-president, is a Committee of the Privy Council, and there are besides a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judicial Committee for appellate business. Included among the powers and duties of the newly-established BOARD OF AGRICULTURE (*q.v.*) are many which were formerly discharged by the Agricultural Dept. of the Privy Council.—The Privy Council in Ireland, a smaller body than that in England, advises the Lord-Lieut., and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only.—As the Privy Council in Great Britain and the Privy Council in Ireland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Nov. 19th, '91. In the second column is given the date on which each Privy Councillor was sworn in. The word "Peer" is inserted in the third column to signify that some particulars regarding the public life of the noble lord referred to are given under the head of "Peerage"; and "M.P." is meant to refer the reader to our list of the House of Commons. In cases where the Privy Councillor is neither Peer nor M.P. some biographical facts are appended. All Privy Councillors should be addressed as "Right Honourable."

Alphabetical List of Privy Council in Great Britain.

Lord President—The Rt. Hon. Visct. Cranbrook, G.C.S.I.

1	2	
Aberdare, Lord . . .	'64, April .	Peer.
Aberdeen, Earl of . .	'86, Feb. .	Peer.

Clerk of the Council—Sir William S. B. Kaye, C.B., Q.C., LL.D.

* For biographical facts relative to these right hon. gentlemen see Her Majesty's Privy Council above.

Probate, Legacy, and Succession Duties. The law relating to these duties is intricate and bulky. Their general nature may be shortly explained. (1) **Probate Duty.**—Every will of personal property must be deposited in the Probate, Divorce, and Admiralty Division of the High Court, a copy thereof being given to the executor. This copy is called the probate, and formerly bore a graduated stamp. Hence the name of probate duty given to the stamp duty upon such personal property as passes by will or by intestacy, the stamp in the latter case having been affixed to the letters of administration. The stamp is now affixed to the affidavit required from the person applying for probate or letters of administration. The duty is levied on the following scale, debts and funeral expenses being deducted in every case:—

Estates not exceeding in value—

£100; no duty.

£500; duty at the rate of £1 for every £50 or fraction of £50.

£1000; duty at the rate of £1 5s. for every £50 or fraction of £50.

Estates exceeding in value

£1000; duty at the rate of £3 for every £100 or fraction of £100.

Where the gross value of the estate does not exceed £300 it is cleared of duty by depositing with the proper officer 15s. for fees of court and 30s. for stamp duty. (2) **Legacy Duty.**—Upon payment or delivery of any legacy, or of the share taken by any person in the event of an intestacy, the legatee or recipient of the share must give a stamped receipt. The stamp duty in these cases is known as legacy duty. It is not levied upon any legacy or share out of a personal estate of less than £100 in all, nor upon any legacy or share taken by the husband or wife of the deceased, or by any child, grandchild, etc., or any parent, grandparent, etc., of the deceased, or by any of the royal family. Where the legacy, etc., is taken by a brother or sister of the deceased or by any of their descendants, the duty is at the rate of £4 per cent. Where the legacy, etc., is taken by an uncle or aunt or by any of their descendants, the duty is at the rate of £5 per cent. Where the legacy, etc., is taken by a grand-uncle or grand-aunt or by any of their descendants, the duty is at the rate of £6 per cent. And in all other cases the duty is at the rate of £10 per cent.

(3) **Succession Duty.**—The probate duty can be levied only upon personal estate, because only such estate passes through the hands of executor or administrator. Legacy duty can be levied only upon fragments of the personal estate given by will or taken under an intestacy. But there are other modes in which personal property may devolve from the dead to the living, and real property so devolves as much as personal. By the Succession Duty Act of 1853, a duty graduated like legacy duty is imposed on every succession, whether to real or personal property, not covered by legacy duty. For the purpose of this Act real property upon devolution is taken to be of value equal to the value of an annuity for the life of the successor, and equal in amount to the annual value of the estate. The duty upon a succession to real property is paid in eight equal instalments, the first falling due twelve months after the successor becomes entitled, and the others at successive intervals of half a year.

Provident Medical Association, Metropolitan. Established for the purpose of securing the supply of medical attendance and medicine during sickness to the families of the wage-earning classes throughout London by the payment of a weekly sum, regulated by the number in each family. Sixteen branches already established. **Chairman**, Mr. W. Bousfield, J.P. **Sec.**, Chas. H. Warren, 5, Lamb's Conduit St., Bloombury, W.C.

Provincial Colleges (non-Theological). The foundation of Owens College, Manchester (*q.v.*) led the way in a movement which, aided by the stimulus of "University Extension" (*q.v.*), has during the last twelve to fifteen years spread to many of the large non-university towns of Great Britain. The following is a list of such institutions, with date of foundation: Durham University College of Physical Science, at Newcastle-on-Tyne, 1871; University College of Wales, Aberystwith, '72; Yorkshire College, Leeds, '74; University College, Bristol, '76; Firth College, Sheffield, '79; Mason College, Birmingham, '80 (originally a "Science" college, but extended in '81 so as to include a Faculty of Arts); University College, Nottingham, '81; University College, Liverpool, '82; University College, Dundee, '83; University College of South Wales and Monmouthshire, Cardiff, '83; University College of North Wales, Bangor, '84. The scheme of most of these colleges is to provide a higher education after the type of University College, or King's College, London, and they all (except Newcastle) include chairs belonging to "Arts" subjects, though several of them began as pure "Science" colleges. See EDUCATION.

Prussia. See GERMANY; and for Ministry, etc., see DIPLOMACY.

Pseudonyms. See NOMS DE PLUME.

Psychical Research. The Society for. Founded 1882, under the presidency of Professor H. Sidgwick, of Cambridge, "for the purpose of making an organised attempt to investigate that large group of debatable phenomena designated by such terms as mesmeric, psychical, and spiritualistic." The main work of the Society has hitherto been the examination of telepathy (see HYPNOTISM). Reports of a number of varied and careful experiments in induced telepathic communication are published in the "Proceedings," and a large collection of spontaneous cases has been published in a book entitled "Phantasms of the Living." The Society has about 650 members and associates; and an allied society has recently been established in the United States. **Hon. Secs.**, Messrs. F. W. H. Myers and F. Podmore. **Offices and Library**, 19, Buckingham St., Adelphi, W.C.

Public Health (London) Act. '91. See Session, sect. 100.

Public Libraries Acts, '75-7. Under these Acts the town council of any borough, local board of any local board district, and vestry of any parish, may, and upon the request in writing of ten ratepayers shall, by means either of a public meeting, or by the issue and

collection of voting papers, take the sense of the ratepayers on the establishment of a free library or museum. Should there be a majority of votes in the affirmative the town council or local board may establish and maintain such a library or museum; but a vestry must appoint for that purpose not less than three nor more than nine ratepayers to act as commissioners. The commissioners go out of office one-third at the end of each year, and are to meet once every month. The property of the library, etc., is vested in the commissioners, local board or town council, who may impose any rate not exceeding a penny in the pound, and raise loans where necessary. They cannot do this, however, without the consent of their vestry. No charge is to be made for admission to the library or museum. If the majority of ratepayers voting is adverse to doing anything, the question cannot again be put to the vote until one year has elapsed. A parish wishing to adopt the Acts may for that purpose unite with any other place which has adopted them if the local authority of that place consent. **Public Libraries Act Amendment Act, '87**, empowers the library authority to establish and maintain a lending library without providing any separate building for containing the same. The power of adopting the principal Act is extended to district boards in the Metropolis, without depriving any vestry within such district where the Act is not in force of the power to set it in motion. The **Public Libraries Acts Amendment Act, '90**, enacts that all voters for all purposes of the Libraries (England) Acts shall be, where the library district is a borough or part of a borough, the burgesses of that borough and the burgesses enrolled in respect of qualifications in such part respectively, and elsewhere the county electors registered in respect of qualifications in the library district. The procedure for ascertaining the opinion of the voters for any purpose of the Acts is to be by voting papers, and not otherwise. The Acts may be adopted subject to a condition that the maximum library rate shall not exceed a halfpenny or three farthings in the pound; but such limitation may subsequently be removed, providing that no levy shall exceed a rate of one penny in the pound for any one year except in the City of London. Power is given to grant charity lands for library purposes. See **LIBRARIES**.

Public Schools of England. Many of the great public schools are richly endowed, and since the report of the Royal Commission their condition has greatly improved, and in several new schemes have been adopted which have resulted in increased benefit flowing from the endowment. See under various alphabetical headings.

Public Works Loans Act, '91. See **SESSION**, sect. 101.

Public Works Loans Commissioners are an unpaid body who regulate the conditions upon which loans may be granted by the National Debt Commissioners to local bodies for baths and washhouses, burial grounds, conservancy and improvement of rivers, main drainage, docks, harbours, piers, improvement of towns, labourers' dwellings, lighthouses, lunatic asylums, police stations in counties and boroughs, public libraries and museums, schoolhouses, water works, and other sani-

tary and local purposes. Office, 3, Bank Buildings, E.C.

"Punch." The well-known illustrated satirical weekly was founded July 17th, 1841. Its first editor was **Mr. Mark Lemon**, to whom succeeded **Mr. Shirley Brooks**, **Mr. Tom Taylor**, and **Mr. F. C. Burnand** (*q.v.*), its present editor. Among its many talented artists on the staff, may be noticed **Mr. John Tenniel** (*q.v.*), **Mr. Harry Furniss** (*q.v.*), **Mr. Du Maurier** (*q.v.*), **Mr. Linley Sambourne**, **Mr. E. T. Reed**, and among its literary contributors on the *Punch* staff are **Mr. Lucy ("Toby")** (*q.v.*), **Mr. A. à Beckett** (*q.v.*), **Mr. Anstey-Guthrie**, author of *"Vice Versa."* On the auxiliary staff are **Messrs. Bernard Partridge**, **J. P. Atkinson**, and **E. J. Wheeler**. During '91, *Punch* celebrated its jubilee, which called forth universal congratulations.

Pungwé-Massi Kesse Railway. At a meeting of the directors of the Mozambique Company, held at Lisbon on Nov. 10th, '91, it was stated that **M. Poulhin**, the engineer for the original company, had surveyed four routes from Beira, and the directors of the present company had decided upon the Pungwé as the best from the coast. The alignment, as a matter of fact, starts from the river Pungwé opposite Inhambaio, 12 miles from Beira. It goes 12 miles to Jobo on the Busi, 12 miles from the mouth of the river, which is navigable to this point for ships drawing 20 ft., as is the case on the Pungwé. From Jobo the line crosses wooded plains, passing through Meforga and Gomani to Massi Kesse. The total length is under 200 miles. The longest bridge, which is over the river Banduri, has a span of 80 metres, and the next longest are three of 50 metres each; the land from the Pungwé to Jobo being marshy piles will be used. The gradient seldom exceeds 1 in 100 over the first 150 miles; but on approaching Massi Kesse the gradient in places is 25 in 100. A tunnel a mile long may be required. It is understood that the British South Africa Company and the Mozambique will assist each other. It is hoped to begin work in April '92, and complete the first 100 miles by December, the cost of this section being estimated at £600,000. The British Company's line to Fort Salisbury will branch off at the bridge over the Muncene near Massi Kesse.

Punjab. See **INDIA**; and for Ministry, etc., see **DIPLOMATIC**.

Purchase of Land and Congested Districts (Ireland) Bill. See **SESSION**, sect. 102.

Purchase of Land (Ireland), Act, '91. See **SESSION**, sect. 103.

Pyrenees Tunnel. Early in June '91 it was announced that the Spanish War Ministry had given its consent for the construction of a railway tunnel through the Pyrenees between France and Spain. The tunnel, which will be the first long one in the mountains, will connect the Pau-Oleiron with the Ilusca-Canfranc lines through the central range, thus making a third railway from France to Spain, the other two being the coast line from Bayonne to San Sebastian on the west, and that from Perpignan to Figueras on the east. The tunnel will be five miles long, three of which are in Spanish territory.

Q

Quain, Sir Richard, Bart., M.D., F.R.S., was b. 1817, and after being articled to a surgeon-apothecary in Limerick, joined the faculty of Univ. Coll., London. For a period of five years he remained house physician. In '43 the College elected him a Fellow. On six occasions he has been nominated a Crown representative on the General Medical Council, of which he is President. The greatest of his many important works is the "Dictionary of Medicine." Created a baronet Jan. '91. Lady Quain died on Oct. 25th, to the sincere regret of a large circle of friends.

Quakers. See FRIENDS.

Quebec, a province of the Dominion of Canada. It lies eastward of Ontario, occupying both banks of the St. Lawrence. Area 193,355 sq. m.; pop. 1,359,027; mostly descendants of original French colonists. Capital **Quebec**, pop. 65,000; a picturesque, impregnable fortress, with historic associations. **Montreal**, a splendid city, chief seaport, head of St. Lawrence navigation. Other towns are Three Rivers, Levis, Sorel, St. Hyacinthe, Sherbrooke. — Divided into districts and 63 counties. — **Administered** by a Lieut.-Governor and responsible Ministry. A Legislative Council of 24 members appointed for life by the Lieut.-Governor. Legislative Assembly elected by 65 constituencies. Quebec has 24 seats in the Dominion Senate and 65 in the House of Commons. Religion chiefly Roman Catholic. Education superior, denominational. Primary education obligatory, not free, under local control. See CANADA; and for Executive Council see DIPLOMATIC.

Queensland. The most recently organised of the Australian colonies. Comprises the N.E. section of the continent, immediately N. of New South Wales. On the W. it is divided from South Australia by 141st meridian of E. long. from New South Wales boundary to 26° S. lat., thence by 138th meridian to Gulf of Carpentaria. It is 1300 miles from N. to S., and 800 miles from E. to W., including 668,497 sq. m. of area. Population, 406,658. The capital is **Brisbane** (pop. 90,000), situated on the river Brisbane, 500 miles N. of Sydney; and is a thriving city, rapidly increasing, and provided with various excellent institutions. Other leading towns are Cooktown, Gympie, Ipswich, Mackay, Maryborough, Rockhampton, Bundaberg, Toowoomba, Townsville, Warwick, and Charters Towers, with a number of other rising municipalities and townships. — The colony is divided into 12 districts; a very small portion being subdivided into 37 counties. For other purposes there are 17 municipalities, 10 boroughs, 5 shires, and 103 divisions. — **Executive** vested in Governor and responsible Ministry. Parliament consists of two houses: Legislative Council and Legislative Assembly. The former is composed of 39 members, nominated by the Governor on the advice of the Ministry. The latter has 72 members elected quinquennially on a manhood suffrage basis. The members are paid £300 a year. The colony is represented in the Federal Council of Australasia. There is no State Church. Chief sects are Church of England, Roman Catholic, and Presbyterian. Valuable land grants were formerly made to these bodies, which they now retain free from tax-

tion. Education is free and secular, and is well provided for in every branch. It is under control of the Minister for Education. There are about 570 primary schools, at which about 68,000 children receive instruction. Defence is provided for by a militia and volunteer force, including engineers and four batteries of artillery of 4475 officers and men. Besides these there are 700 armed constabulary, naval brigade, two torpedo boats and several gunboats. — For latest financial statistics see BRITISH EMPIRE, etc. (table). The debate on Sir S. Griffith's proposals, for the division of Queensland was adjourned (Nov. 29th, '90). Mr. Thomas Archer was succeeded by Sir J. Garrick as Agent-General in London. The Premier, Sir S. Griffith, left Brisbane (Dec. 13th) on a three weeks' tour in Northern Queensland. The Legislature rejected the proposal to divide the colony into three provinces. A drapery house at Brisbane was burnt; damage £70,000. An apparently endless supply of sapphires was discovered at Withersfield, on the Central Railway. '91. Some members of the Queensland Shearing Union refused the agreement drawn up by the Australian Pastoralists' Union; the latter sent two hundred non-union men to do the work at Clermont. On this (Feb. 16th) one hundred armed unionists went to try and persuade the free men to leave work, or forcibly compel them to do so. In anticipation of a conflict the police seized all the guns and ammunition they could find, and a detachment of artillery and troops was despatched to Clermont (20th). In March the position got more acute, and more troops were sent to the spot. The unionists cut the telegraph wires and attempted to wreck the trains conveying the troops. The state of affairs became more critical, and the Government adopted severe measures (March 26th) of repression, arresting twenty prominent unionists. At the beginning of May the strikers began to return to work, and the strike was formally declared ended (June 13th). It was alleged that some of the strikers cut the piles of a railway bridge during the strike. Several were arrested and one turned Queen's evidence. The Navy Defence Bill passed the Assembly (July 8th). The estimated revenue for '91-'2 was £3,675,200 and the expenditure £3,647,693. (For Ministry etc., see DIPLOMATIC.)

Queen's Speeches. See SESSION, sects. 2-4.

Quicksilver. The United States has been one of the largest producers of quicksilver for any country, supplying 497,675 flasks of 764 lbs each out of the total world's production of 1,993,611 flasks between '80 and '90. This is equal to about 37 per cent. The output, however, is decreasing, as in '89 it was only 26,464 flasks against 60,851 flasks in '81. This reduction is attributed to low prices rather than to any failing of the mines. The Chu California mine is the **New Almaden**. The deposit was first found by Indians, who use it for paint—ground *cinnabar* being made into vermilion. The Spaniards then tried to work it for silver at the beginning of this century. In '45 a Mexican worked it first for mercury but operations were suspended during the Mexican war, and they were not resumed until '48. A company of Mexicans and English took

it up in '50, and held it for eight years, during which time the product averaged a value of more than one million dollars per annum. Operations then ceased owing to litigation. There are other productive mines in America, the richest yielding 1734 per cent., and the poorest 0.286 per cent. of quick-silver. The mines in other countries keep a steady output. The Almaden mine in Spain has produced 485,939 flasks in the last decade, the Idria mine in Austria 133,557, and the Italian mines 66,440, making the total production of the principal foreign mines 685,936 flasks. The Almaden

product varies little from year to year, the range in the decade being from 44,989 in 1881, to 53,279 in 1887. This mine dates back to the days of Pliny, the Romans extracting 700,000 lbs. per annum. The Idria product has gone up as steadily as the American has gone down, mounting from 10,510 in '80 to 15,295 in '89. These mines have been worked four centuries, and are owned by the Government. The Italian figures show an even greater increase, going from 3,410 in '80 to 10,000 in '89. In China, Mexico, Peru and Persia, the ore has been discovered, but not worked to any extent.

R

Racquets (or **Rackets**). This game was first played in England between the 13th and 14th centuries, with the naked hand, then with gloved hands, and later on thongs were bound round the right hand so as to make the ball rebound with greater force. The **Queen's Club**, West Kensington, is now the most popular resort of racquet players. Mr. H. Philipson having beaten Major Spens on this ground on April 25th, '91, by three games to two, thus being the penultimate match to decide who should meet Mr. P. Ashworth, the holder of the championship, the first and last-named met at the same enclosure on the following Saturday. Again Mr. Philipson won by three games to two, having scored seventy aces against sixty-six, and thus became **amateur champion** of the year. On May 5th, also at Queen's Club, Messrs. P. Ashworth (Cambridge) and E. L. Metcalfe (Oxford) defeated Messrs. Meyrick Jones and A. Martyn (both of whom learned the game at Rugby), after an indifferent display in the final of the amateur doubles championship, by four games to love. The **professional championship** contest and a stake of £200 was concluded on May 2nd, P. Latham, the holder, having been challenged by W. Standing. The conditions of the match were the best of two rubbers, each of seven games, one to be played at Prince's Club, the other at the Queen's Club; in the event of each player winning a rubber the result to depend upon a majority of games, and if these be equal the maker of the greater number of aces to be the victor. The first rubber was played at Prince's Club on April 25th, and the result left Standing in a hopeless position, his opponent having scored four games to love, with sixty aces to thirty-two. At the second meeting Latham again had matters all his own way, and won the rubber by four games to one, with sixty-eight aces to forty-four. Mr. G. F. Vernon (scratch), the well-known cricketer and once famous football-player, won the **Prince's Club Handicap** on May 6th, having in turn beaten the Hon. C. Brownlow (5), Mr. A. W. Cotton (8), Mr. C. H. de Rougemont (scratch), Mr. J. H. B. Noble (scratch), and finally Mr. L. Mievill (4). The **Queen's Club Handicap** did not fill. The **inter-University matches** were commenced at the West Kensington ground on the last day of Feb. with the double game, in which the Oxford representatives (Messrs. E. L. Metcalfe and F. S. Cockayne) beat those of Cambridge (Messrs. P. Ashworth and E. H. Miles) by four games to three. In the single match played on the fol-

lowing afternoon, Mr. Metcalfe (Oxford) was outmatched at all points by Mr. Ashworth (Cambridge), who won a love rubber, with forty-five aces to twelve. The competition for the **Public Schools Challenge Cup** opened at Queen's Club on April 13th. Eleven schools entered, and in the first round Eton (W. Burns and F. C. France-Hayhurst) beat Rossall (A. P. O'Hara and B. P. F. Faunthorpe) by four games to love; byes were accorded Charterhouse, Wellington (the runnets up in the '90 competition), Haileybury (Marlborough withdrawn), Rugby (Cheltenham withdrawn), Malvern, Harrow (the holders), and Winchester. In the second round, Wellington (R. H. Raphael and G. J. Mordaunt) beat Charterhouse (A. D. Erskine and W. G. H. Price) by four games to one; Rugby (J. A. Nicholls and W. J. Fletcher) beat Haileybury (C. P. Dixon and L. Woodhouse) by four games to one; Malvern (H. K. and W. L. Foster) beat Eton by four games to two; and Winchester (R. L. Ricketts and C. Wigram) defeated Harrow (C. F. Ridgway and F. H. Clayton) by four games to three. In the third round Wellington beat Rugby by four games to one, Malvern beat Winchester by four games to three. In the final, on the fourth day, Wellington defeated Malvern, after a close and interesting game, and thus gained possession of the Cup for the first time.

Railway Companies' Return Tickets Bill.

Railway Rates Bills. See SESSION, sect. 106.

Railway Servants (Hours of Labour) Committee. See SESSION, sect. 130.

Railways. The latest returns for the year 90, issued by the Board of Trade, prove the last twelve months to have been of exceptional prosperity to the railway companies. Increase of revenue, and a proportionate increase in working expenses, result in the net earnings amounting to 5 per cent. more than in '88. Not much increase of capital can be noted. In '89 the capital amounted to £876,595,166, while in '90 it showed an increase of twenty-one millions. The **traffic receipts** for '89 reached a total (from passengers, goods and miscellaneous receipts) of £77,025,017; in '90 the total was £79,948,000. Regarding the **working expenditure**, the total amounted to £40,994,116 in '89; in '90 this reached the total of £43,188,000. Working expenses having increased one percentage of profit, subsidised to 4.10 in '90, as against 4.21 in '89, while for '90 it was 4.10. The **total of net earnings** for '90 reached the sum of £36,750,000. In '88 there were 19,812 miles of rail, with 10,772

of double mileage; in '89 the mileage amounted to 19,043, with 10,853 of double mileage; while in '90 it amounted to 20,073. The increase in receipts, as regards passengers, is due to the greater number of third-class passengers. **Passenger receipts** in '89 were £32,630,744, and in '90 £34,328,000. **Goods receipts** in '89 reached the sum of £41,086,333, and in '90 they had increased to £43,220,000. **Miscellaneous receipts** from £3,307,960 in '89 increased to £3,400,000 in '90. A satisfactory cause of the increase in revenue was that arising from the carriage of merchandise and minerals. In '89 there were 217,750,000 tons of minerals carried, but in '90 the tonnage had risen to 215,765,000. As to general merchandise, the result is no less noteworthy, as indicating an improvement in the trade of the country. The demand for higher wages has led to an increased cost of working and of materials. In '91 legislation has chiefly occupied the thoughts of railway officials. The questions affecting railways and traders were so numerous that it is not surprising to note that legal expenses in '90 amounted to £341,000, as against £269,000 in the previous year. The Board of Trade inquiry was the source of much interest, and was the scene of strenuous advocacy of the claims and privileges of the railway companies, but it is now to be hoped that a peaceful era will permit of still greater development of the railway system. The extraordinary increase in the number of third-class passengers (724,697,000 in '90 as against 682,420,000 in '89) has not been attended with any decrease in the number of first-class and second-class travellers. The net earnings, practically speaking, have been stationary, and the whole statistics point to a satisfactory continuance of prosperity in the United Kingdom. According to a report issued by the Board of Trade, 1076 persons were killed in the working of railways during '90, and 4721 were injured. See **ZONE RAILWAY SYSTEM**.

Ranavalona III., Queen of Madagascar, was b. in '61. She is great-granddaughter of Rahety, sister of the king who ruled over the island 1787-1810. She succeeded Queen Ranavalona II. in '83, having been nominated by her as the future Queen. She married the Prime Minister, Rainilaiarivony, soon after ascending the throne. She was crowned in Nov. '83.

Rawlinson, Sir Henry Creswicke, Bart., G.C.B., F.R.S., was b. at Chadlington, Oxon, 1810, and is a brother of the Rev. Canon Rawlinson, in conjunction with whom and Sir G. Wilkinson, the famous edition of the works of Herodotus was produced. Ed. at Ealing School. Entered the service of the old **East India Company** in '27, and served with distinction on various special missions, especially in **Persia** ('33), and **Afghanistan** ('40-43), and rendered distinguished service during that eventful period. He held **Kandahar** against all external and internal enemies. Subsequently appointed **Consul of Bagdad** '50, and **Consul-General in Turkey** '51. Created **K.C.B.** in '56, and in the same year appointed a **director of the East India Company**. In '59 he was **special envoy to the Shah of Persia**. Sir H. is as distinguished for his **Oriental scholarship** as for his diplomatic, military, and administrative ability, and has contributed largely to the literature of **Eastern antiquities**, besides rendering invaluable service in aiding the interpretation of **cuneiform inscriptions**. Elevated from the rank of a **K.C.B.** to that of **G.C.B.**, '89. Hon. D.C.L.

Oxford, LL.D. Camb., F.R.S., and a corresponding member of the Institute of France. Received a **baronetcy** Jan. 1st, '91.

Rayleigh, John Wm. Strutt, D.C.L., LL.D., F.R.S., 3rd Lord, was b. 1842. Educated at Trinity College, Cambridge; B.A.; **Senior Wrangler** and **1st Smith's Prizeman** '65; Hon. D.C.L. Oxford, and McGill Univ. Montreal. He is a Cambridge Commissioner under the Oxford and Cambridge Universities Act '77; formerly **Professor of Experimental Physics at Cambridge**. Succeeded Professor Tyndall in the professorship of **Natural Philosophy at the Royal Institution**. He is one of the secretaries of the **Royal Society**.

Record Office, Public. These public records are preserved in this office, which is situated between Chancery Lane and Fetter Lane. They include the ancient records, which previous to the erection of this building were stored in the Chapter-house of Westminster Abbey, the Tower, the Rolls Chapel, and the Queen's Remembrancer's Office. Among the more interesting books at the office is the **Domesday Book of William the Conqueror**. A **Record Commission** was established in 1800 to search the records, examine their state, and publish such of them as they thought of sufficient interest. Their first publication was made in 1802, and the series is being continued. The Master of the Rolls was made guardian of these records in 1838.

Redemption of Tithe Rent-Charge Royal Commission. The chairman of this Commission is the Rt. Hon. Lord Basing, while the other members are the Rt. Hon. George Cubitt, M.P., Rt. Hon. H. H. Fowler, M.P., Sir H. Hussey Vivian, Bart., M.P., Mr. F. Meadows White, Q.C., Mr. W. J. Beadel, M.P., and Mr. C. N. Dalton. The Secretary of the commission is Mr. J. Graham, 32, Abingdon St., S.W.

Reeves, John Sims, was b. at Shooter's Hill, near London, 1821. Was early trained to music by his father, and at the age of fourteen became organist of North Cray Church. He also became a proficient violinist, and sometimes undertook the duty of orchestral leader. He studied harmony and counterpoint under Mr. H. Calcott. In his eighteenth year he made his *début* at Newcastle-on-Tyne theatre as the gipsy boy in "Guy Mannering" "for the benefit of the late tenor, George Barker." He subsequently obtained an engagement at the Grecian Theatre, London, where he sang under the name of Mr. Johnson; but in 1847, in "The Bride of Lammermoor," at Drury Lane, then under the management of Macready, he first showed his full powers. Although very successful, he soon left the stage for the concert-room, and in oratorio and ballad singing has achieved the highest distinction. In '43 he studied in Paris and afterwards at Milan, where he sang at La Scala. After his return to London he soon established his reputation as the first of modern tenors. He married Miss Emma Luccombe, a well-known singer in her day. On May 11th, '91, Mr. R. retired from the profession he had adorned for 50 many years at a brilliant concert held at the Albert Hall. He is now devoting himself to vocal tuition.

Reformatory and Industrial Schools Act, '91. See Session, sect. 107a.

Registration, Parliamentary. The right to vote in the election of a member of parliament is confined to those adult males whose names appear on the register of voters then in

force for some county or borough. Most of the law as to the compilation of the register and the qualifications for enrolment thereon is contained in some **fifty or sixty Acts of Parliament**, but these are subject in some measure to the principles of the common law, and liable to alteration in several particulars by **Order in Council**. So complicated a system cannot be explained in a brief article. For practical purposes the register may be considered as divided into two parts. (1) The **ownership voters' list** contains the names of those entitled as **owners** of land or houses exceeding certain specified values. This list remains the same from year to year, subject to the removal of the names of men who have died or have disposed of their property, and to the addition of the names of those who make written claims to have their names inserted, and (if so required) prove such claims to the satisfaction of the **revising barrister**. (2) The **occupiers' list** contains the names of those entitled as (a) **householders**, (b) **occupiers of land or buildings rented at £10 a year**, and (c) **lodgers**. It is the duty of the **overseers** of each parish to make out and publish lists of the persons whom they believe to be entitled as **occupiers** in classes (a) and (b). Any person whose name is omitted from the overseer's list of occupiers, and every person who has **lodged for twelve months in the same house** (occupying rooms worth £10 per annum, *unfurnished*), may send a **claim** in writing to the overseers. Any person whose name appears on a list of electors may object to the name of any other person appearing therein. Written notice of such objection must be given both to the overseers and to the person objected to. On a given date the overseers publish a list of the names of all persons who have sent in claims or have been objected to. Copies of all the lists that have been published are then forwarded by the overseers to the clerk of the peace of the county, or (in the case of municipal boroughs) to the town clerk. He prepares an abstract of such lists of claims and objections, and transmits it to the revising barrister for his district. A sufficient number of **revising barristers** are to be appointed every year, for London and Middlesex by the Lord Chief Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds **open court** for the **revision of the list** in each borough and at or near every polling place in the county. The clerk of the peace, or town clerk, and the overseers, must attend. The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to insert or omit names as he finds just. An **appeal** lies from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express sanction. The **list of voters** as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who must have it printed in a book and delivered to the sheriff; in the case of a borough to the town clerk, who must have it printed in a book and delivered to the returning officer. The clerk of the peace or town clerk must **keep printed copies of the register for sale** at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names. (For further information on the subject see "Rogers on Registration.") In the case of

any person not having his name on any list of voters, or in case of his receiving a notice of objection, he should apply to the **registration agent** for his district of the political party to which he belongs. Such agents are appointed and paid by the various party organisations in most constituencies, and make it their business to know the intricacies of the law on the subject. Their names will generally be found in advertisements dealing with registration inserted in the local party papers in the months of July and August in any year.

Reichsrath. See AUSTRIAN POLITICAL PARTIES, and AUSTRIA-HUNGARY.

Reichstag. See GERMANY, and GERMAN POLITICAL PARTIES.

Reid, George, President of the Royal Scottish Academy, is a native of Aberdeen. He was elected **A.R.S.A.** in '70, and became **R.S.A.** eight years afterwards. Is considered one of the ablest of Scotch portrait painters. Recent examples of his art are portraits of the late Mr. Graham Murray and Lord Trayner. In the National Gallery of Scotland hangs an admirable landscape by him, entitled "Dornoch." Elected President of the R.S.A., in place of the late Sir W. F. Douglas, on Aug. 8th, '91.

Reid, T. Wemyss, was b. at Newcastle-on-Tyne 1842. Beginning journalistic life at the early age of fourteen, in '64 he became **editor** of the *Preston Guardian*, and '70 to '86 **editor** of the *Leeds Mercury*, which he conducted with so much ability that it speedily ranked as one of the most influential provincial newspapers. Mr. Reid has written several highly successful books. His monograph on "**Charlotte Brontë**" admirably supplements Mrs. Gaskell's "Life." His novels "**Gladys Fane**" and "**Mauleverer's Millions**" have commanded a very wide circulation. "**Cabinet Portraits**" and "**Politicians of To-day**" are telling sketches of leading statesmen. In '87 he accepted the position of general manager to Messrs. Cassell & Co., Limited. Mr. Reid is the author of "**The Life of the Right Hon. W. E. Forster**," published July '88. With the commencement of '90 he came prominently into notice as editor of the *Speaker*. His "**Life of Lord Houghton**" was a decided literary success.

Religious Disabilities Removal Bill. See SESSION, sect. 108.

Religious Tract Society. The (instituted 1799), has for its object the circulation of religious books and tracts throughout the British dominions and foreign countries. The business of the Society is conducted by a committee chosen annually in London, and consists of four ministers and eight laymen, and of six trustees, half the number being members of the Church of England, and the other half Nonconformists. The Society has in its catalogue some 4000 separate tracts and handbills, books, etc., for adults, besides books and tracts for children. The well-known *Leisure Hour* and almost equally well known *Sunday at Home* are published by this Society. Circulation of the Society's publications for '90-91, 73,244,100. Income for '90, from subscriptions, donations, etc., £24,943 3s. Grants in money, paper, publications, etc., £39,512 14s. 3d. Secs., Revs. L. B. White, D.D., and S. G. Green, D.D. **Association Secs., England**, Rev. Cyril Williams, Rev. Wm. Williams, Rev. W. J. Wilkins. **Wales**, Rev. Thomas Levi. **Scotland**, Rev. Dr. Cathcart. **Ireland**, Rev. William Irwin, D.D. **Continent**, Rev. J. Craig, D.D.,

Corresponding, D. J. Legg. Offices, 56, Paternoster Row, E.C.

Renan, Ernest, was b. Feb. 27th, 1823, at Treguier, in Brittany. He was intended for the Church, and studied in the Seminary of Saint Sulpice, at Paris, which he left to devote himself to the study of Oriental languages. He won the Volney prize with his work, "Histoire Générale et Systèmes Comparés des Langues Sémitiques." Was appointed (51) to a post in the Manuscript Department of the Bibliothèque Nationale, becoming five years later a member of the Academy of Inscriptions. Appointed (60) to a mission to Palestine and Syria, which led him to investigations into the origin of Christianity. On his return he was appointed Professor of Oriental Languages in the College of France, but meeting with stormy manifestations from the Catholic students, discontinued his professorial work. In '63 he published his famous work "La Vie de Jésus," which roused the active hostility of the clerical party and led to the deprivation of his professorship. In '70 he again became Professor of Oriental Languages in the College of France, and was elected a member of the French Academy '78. In '80 he received the Cross of the Legion of Honour; Grand Officer May '88. In '84 M. Renan delivered the Hibbert Lecture. He wrote in '85 "Le Prêtre du Nemi," and during '86 published the first part of a new work, "The Origin of the Bible" and "L'Abbesse Jouarre." His latest works are the "History of the People of Israel till the time of King David" ('89), and "Dramas Philosophiques." During '91 he has delivered more than one public address.

Rent Distress for. See DISTRESS FOR RENT, LAW ON.

Repton School, Derbyshire. Founded 1557; reorganised 1874. Pupils, 305. Twenty assistant masters. Head Master, W. M. Furneaux, M.A.

Rhine-Maas Canal. It was stated in Nov. '91 that a Belgo-Dutch syndicate had promoted a scheme for the construction of a waterway from the Rhine at Uerdingen, *via* Crefeld and Neersen, to Gladbach. From Gladbach the canal would proceed *via* Rheydt and Odenkirchen in a westerly direction to Roermond and the Maas, the connection thus being established with the Belgian and Dutch canal systems.

Rhodes, Cecil, "the Diamond King," and Premier of the Cape, is the younger son of an English gentleman of moderate means. After education at college he went out to Africa, where he at first met with but little success. At a time when the De Beers mine (with which his name has since been so prominently connected) was anything but prosperous, Mr. R. combined various Kimberley mines under his direction, and amassed a large fortune. Cape politics attracted him, and he represented West Barkly for a short period, and held a position in the ministry of Sir T. Scanlon. His gift of £10,000 in support of the cause of Home Rule attracted much attention, when he was recently in England. He has been the prime mover in obtaining mining rights over Matabeleland. On the fall of the Spriggs Ministry, a new government, with Mr. R. as Prime Minister, took office at the Cape (July 17th, '90), and already he has given evidence of statesmanship. Reached England, on a visit with relation to African partition, on Feb. 2nd, '91, and was entertained by the Duke of Fife, Lord Rothschild, and by many of the leaders

of society. Conferred with Lord Salisbury, and returned to the Cape.

Ribble Navigation (see '90 ed.). The Commission appointed under the Ribble Navigation Act of '89 reopened at Westminster, on Feb. 10th, '91, the inquiry into the partially completed scheme to convert Preston into a seaport, having special reference to the procuring a waterway for sea-going vessels. Sir G. Nares (chairman) presided, the other Commissioners, being Sir C. Hartley, C.E., and Mr. Wolfe Barry, C.E. The Chairman said that since the close of the inquiry, in '89, soundings had been taken in the Ribble estuary, and they were prepared to take evidence as to the channel to be adopted for maintaining a fixed waterway. The Commission sat four days, and it was then announced that the estuary would be visited and a report issued. Meanwhile the work at the Preston Dock has been carried on in accordance with the suggestion contained in the interim report of the Commission, issued in Oct. '89, and it may be completed next year. The final report of the Commission was issued on Aug. 18th. They said the three courses for the waterway were the north channel, running past St. Anne's-on-Sea; the south channel, past Southport; and the central channel. They suggested the central channel as the most direct course. As to the question of the cost (£756,000), they only ventured to recommend the provision of a fixed channel from Lytham to the fourteenth mile, the cost of which they estimated at £220,000, and a prolongation could be considered when the results of this work had been seen. On the financial and rating considerations, the Commissioners stated that when the borrowing powers are exhausted, at the end of '91, the total expenditure will be over £1,000,000, which means a rate of 2s. 8d. in the £. The original scheme cannot be completed without an addition of £816,000, meaning a possible maximum rate of 4s. 9d.; therefore, in their recommendation, they only went so far as to involve an addition of 8s. 6d. to the 2s. 8d. The Commissioners add, "Even if the works are carried out, there still remain many difficulties of navigation for large vessels in a tidal channel sixteen miles in length." At a meeting of the Town Council on Sept. 17th, it was decided that it was not advisable to make any application to Parliament next session.

Richardson, Benjamin Ward, M.D., F.R.S., was b. 1828, at Somerby, Leicestershire. Graduated in medicine at the Univ. of St. Andrews '54, Fellow of the College of Physicians '61. In '65 he conducted an experimental research which resulted in the detection of a special poisonous product in connection with the spreading of contagious diseases, to which he gave the name of *septine*. Discovered '66 the application of ether spray for the local abolition of pain in surgical operations. Dr. Richardson's numerous contributions to medical and scientific literature have been directed to the advancement of medical practice by the experimental method. In '68 he was publicly presented with a testimonial, consisting of a microscope by Ross and 1,000 guineas. His writings on hygienic matters have attracted a great deal of attention, as also have his researches in alcohol in relation to its action on man, and on the diseases incident to modern civilisation. Dr. Richardson is a noted cyclist and President of the Society of Cyclists. Author of the *Asclepiad*. In '88 he published a novel,

entitled "**The Son of a Star.**" In '91 his literary work included the "Life of Thomas Sopwith," which he edited.

Richter, Hans, was b. at Raab, in Hungary, 1843. After receiving a musical education, he became conductor at the National Theatre, Munich '68, at the Pesth Theatre '71, and at the Court Opera Theatre in Vienna '75. Conducted the famous **Wagner Festival** at Bayreuth in '76, when a shower of orders descended on him from the gratified German princes. In '80 he conducted his first concerta in London, and created much astonishment by leading the greatest works entirely *memoriter*. His concerta have been annually continued. He has also conducted fine performances of German operas in London. He acted as conductor of the Birmingham Musical Festival in October '91.

Rifle Ranges. See SESSION, sects. 107 and 131.

Rigg, Rev. James H. D.D., well-known Wesleyan minister, was b. in 1821, at New-castle-on-Tyne. The son of a Wesleyan minister, he was ed. at Old Kingswood School, where he was, later, a teacher. Entering the Wesleyan ministry in '45, he was appointed, twenty years afterwards, Chairman of the Kent District. In '68 Dr. R. became **Principal of the Wesleyan Training College**, and in '78 **Chairman of the Wesleyan Conference**. Dr. R. has presided over the "Second London District" for many years. He was an original member of the School Board for London. He was a member of the Royal Commission on Elementary Education, which sat '86-88. As author of "**The Living Wesley**," of which an enlarged edition appeared in '91, and of many other books, including a "Comparative View of Church Organisations, Primitive and Protestant," Dr. R. has attained wide notice. He has held the post of Clerical Treasurer of the Wesleyan Missionary Society for many years, and was elected, in '90, **Chairman of the London Methodist Council**.

Ripon, Right Rev. William Boyd Carpenter, D.D., D.C.L., Bishop of, was b. 1841. Ed. at Cambridge, where he graduated Senior Optime '64; Vicar of St. James', Holloway '70, Christ's Church, Paddington, '79; Canon of Windsor '82; Bishop of Ripon '84. **Hulsean Lecturer** in '79; **Bampton Lecturer** in '87, when he selected the subject of "The Permanent Elements of Religion," and this was published in '89. His lordship has also written "A Commentary on the Book of Revelation." **Hon. D.C.L. (Oxon.)**, '89. Dr. C. is well known for the literary grace of his utterances.

Ristitch, John, Servian statesman, was b. in 1819 in Servia. Ed. in Germany, and also in France. He began his official career in the Ministry of the Interior, under Prince Karageorgevitch, and soon rose to a leading position in that department. In '58 he was made secretary to the embassy sent to Constantinople by Obrenovitch III., and became afterwards Servian Envoy at the Porte. In '67 he was appointed Servian Minister of Foreign Affairs, and when Obrenovitch was assassinated he was the Envoy sent from the Provisional Government at Belgrade to bring home Prince Milan from Paris. From '68 to '72, during the minority of Prince Milan, M. Ristitch was member of the Council of Regency. When Prince Milan became King,

M. Ristitch became his Minister for Foreign Affairs, and subsequently President of the Servian Council of State. In '88 he resigned, and was succeeded by M. Christich. He played a very prominent part in the events that led to the Russo-Turkish war of '77-8. After the various dissensions between King Milan and the Servian Government, M. Ristitch became **Chief Regent** during the minority of the young King Alexander, and in his company visited the Czar and the Emperor of Austria in the summer of '91.

Ritchie, Right Hon. Charles Thomson, P.C., M.P., was b. at Dundee, 1838. Settled in London some years ago, and joined the firm of W. Ritchie & Son, East India merchants and jute spinners. At the general election of '74 he contested the **Tower Hamlets**, and was returned in the Conservative interest. He was again returned in '80. Since '85 he has sat for **St. George's Division**. He first brought himself into public notice by the active part he took in the **Anti-Sugar Bounties Agitation**. On the accession of Lord Salisbury to power after the resignation of Mr. Gladstone in '85, Mr. R.'s services were rewarded with the **Secretaryship to the Admiralty**. In Lord Salisbury's second administration Mr. Ritchie was appointed **President of the Local Government Board**, a post which he at first held without a seat in the Cabinet, but was subsequently promoted to **Cabinet rank**. During the session of '88 he added greatly to his reputation for administrative ability by the success with which he carried through the **Local Government Bill**.

Rivière, Briton, R.A., was b. in London 1840. Studied art under his father at Oxford, where he also graduated. Has exhibited regularly at the Royal Academy since '64, and many of his works have been engraved on steel, while others have been etched. Elected R.A. '78, R.A. '81. His picture "**Of a Fool and his Folly there is no End**" proved one of the most popular contributions to the Royal Academy in '89. The hon. degree of D.C.L. was conferred on him by Oxford University, June '91.

Roberts, Rev. R. Henry, B.A., Vice-President of the Baptist Union of England and Wales, was b. at Carmarthen, July 19th, 1838. Entering the Baptist College at Stoke's Croft in '57, he graduated B.A. (Lond. Univ.). Has held only two pastorates, at the Baptist Church in Derby Road, Bootle ('61-69), and at **Ladbroke Grove Chapel**, Cornwall Road, Notting Hill. He has remained at the latter since '69. Preached before the Baptist Missionary Society in '82. In the ordinary course he will be **President of the Baptist Union** in '93.

Roberts, Sir Frederick, G.C.B., V.C., son of Sir Abraham Roberts, G.C.B., was b. 1832. Appointed lieutenant in the Bengal Artillery '51; captain '60; served with distinction in the Indian Mutiny, and received the **Victoria Cross**. Took part in the **Abyssinian war** '68, as Assistant Quartermaster-General, and obtained the brevet rank of Lieut.-Colonel. In '72 he was made C.B. for his services in the Looshai Expeditionary Force. In the **Afghan war** of '78 Major-General Roberts commanded the column sent to operate through the Koorum Valley, and surmounting the difficulties of the Peiwar Pass, gained a brilliant victory at Charasiab and entered Cabul. On the investiture of Candahar by Ayoub Khan he rapidly performed

the march from Cabul to Candahar (one of the most brilliant military feats of modern times), and utterly defeated the Pretender. For these services he was created ('81) a baronet, G.C.B., and C.I.E. General Roberts was sent ('81) to take command of the forces against the Boers in South Africa, but was recalled on his arrival at Cape Town in consequence of peace being made. He succeeded Sir Donald Stewart in the command of the Indian army.

Robertson, Right Hon. James Patrick Bannermann, Q.C., Lord Justice General in the High Court of Justice in Scotland, was b. in 1845 at Fortvirot. He was ed. at the Royal High School and the University of Edinburgh, graduating M.A. in '64. Called to the Scottish Bar three years later, and became Q.C. in '85. He was appointed **Solicitor-General for Scotland** in '85, when he entered Parliament as M.P. for Buteshire. In Aug. '86 he was again appointed to this office. He succeeded Mr. Macdonald as **Lord Advocate for Scotland** two years later, and was sworn a member of the Privy Council. Mr. R. quickly achieved a reputation in the House of Commons in connection with the passing of the Local Government Act for Scotland. He is distinguished for the remarkable speed of his utterance. In Sept. '91, on the death of the Rt. Hon. John Inglis (Lord Glenferrie), he was appointed **Lord Justice General of Scotland** and President of the Court of Session.

Robinson, John R., editor and manager of the *Daily News* (q.v.), is the son of the Rev. R. Robinson, and was b. at Witham, Essex. He has been associated with this newspaper since '56, having been for some length of time editor of the evening paper published by the proprietors of the *Daily News*, under the name of *The Express*. For many years Mr. R. was a constant contributor to the columns of the *American press*, especially to the *Boston Advertiser* and the *Chicago Tribune*. Appointed the sole manager of the *Daily News* '88, and became editor '87. His illness in January '91 excited sympathy.

Robinson, Rt. Hon. Sir Hercules George Robert, Bart., G.C.M.G., was b. in 1824. Entering the army, he served for a long period in the 87th Fusiliers. Successively he was appointed **Governor of Hong-Kong** ('59-65), Ceylon, New South Wales ('72-78), New Zealand, and the Cape of Good Hope. When affairs in the Transvaal were causing alarm in '85, he acted as President of the Royal Commission. Next year he was engaged in inquiries as to matters in Mauritius. Created a baronet Jan. '91.

Rochester, Rt. Rev. Randall Thomas Davidson, D.D., Lord Bishop of. The see was founded in 604, and has an income of £3100. His lordship, the 99th bishop in succession, was b. in 1848. He was educated at Harrow, and Trin. Coll., Oxford, where he graduated ('71) in honours in Law and History. Curate at Dartford, but became ('77) **chaplain and private secretary** to the Archbishop of Canterbury, whose second daughter he married a year later. The conferences of Bishops held in '78 and '88 were indebted for much labour to Dr. D. In '82 H.M. the Queen appointed him her **sub-almoner and hon. chaplain and preacher** at Canterbury Cathedral. On Dr. Benson's succession to the Primacy, Dr. D. retained the offices he held under the late Dr. Tait; but in '83 he was appointed **Dean of Windsor** and

resident chaplain to the Queen. Dr. D. has been a writer on many historical subjects, and is the author of the "Origin and History of the Lambeth Conferences," and edited (with Canon Benham) the "Life of Dr. Tait." He is a trustee of the British Museum. The degree of D.D. by diploma was conferred on his lordship by Oxford. He was elected in May to an Hon. Fellowship at Queen's College, Oxford. His appointment to the bishopric of Rochester on Dr. Thorold's translation to the see of Winchester was notified in Oct. '90. Consecrated (April 25th, '91) in Westminster Abbey, and enthroned in Rochester Cathedral (Oct. 22nd).

Rodriguez. An island in the Indian Ocean, 344 miles east of Mauritius, of which British colony it is a dependency. Administration is provided for by a Civil Commissioner appointed by the Governor of Mauritius. Rodriguez was annexed in 1814. See BRITISH EMPIRE.

Rogers, Rev. J. Guinness, B.A., well-known Congregational minister and writer, was ed. at Trin. Coll., Dublin, and graduated at Dublin Univ. in '43, afterwards studying for the ministry at Lancashire Independent College. His first pastorate was at St. James's Church, Newcastle-upon-Tyne ('46), migrating to Ashton-under-Lyne five years later. In '65 he succeeded the Rev. J. Hill at Grafton Square, Clapham, where he celebrated his semi-jubilee in '90. Was elected **Chairman of the Congregational Union of England and Wales** in '75, and in the annual meetings of the Union he has always taken an active part. It was at Mr. R.'s invitation, in '79, that a conference of ministers of various denominations assembled in London, and this was followed by conferences of young men and of organists. His literary labours have extended over many journals—notably the *Congregationalist*, the *Contemporary Review*, the *British Quarterly* and the *Congregational Review*. In the domain of politics Mr. R. has been a notable Nonconformist leader.

"**Rogue Bonds.**" See STOCK EXCHANGE, LAW ON.

Roman Catholic Bishops. The following is a list of the bishops in Great Britain:—

ENGLAND AND WALES. Province of Westminster.

NAME.	DIOCESE.
H. E. Henry Edward, Cardinal Manning (Archbishop).	Westminster.
Rt. Rev. W. Weathers (Aux.)	
" " Edward Ilsey . . .	Birmingham.
" " William Clifford . . .	Clifton.
" " T. W. Wilkinson . . .	Hexham and Newcastle.
" " William Gordon . . .	Leeds.
" " Bernard O'Reilly . . .	Liverpool.
" " Richard Lacy . . .	Middlesbrough.
" " J. C. Hedley . . .	Newport and Menevia.
" " Arthur Riddell . . .	Northampton.
" " Edward Bagshawe . . .	Nottingham.
" " Wm. Vaughan . . .	Plymouth.
" " C. Graham (Coadj.) . . .	
" " John Virtue . . .	Portsmouth.
" " Herbert Vaughan . . .	Salford.
" " Edmund Knight . . .	Shrewsbury.
" " John Butt . . .	Southwark.

SCOTLAND.*

Province of St. Andrews and Edinburgh.

NAME.	DIOCESE.
Most Rev. Wm. Smith (Abp.).	St. And. & Edin.
Rt. Rev. Hugh Macdonald	Aberdeen.
" " Angus Macdonald	Argyll and the Isles.
" " James A. Smith	Dunkeld.
" " John McLachlan	Galloway.
Most Rev. Charles Eyre	Archbishop of Glasgow.

* The four Bishops of Scotland are suffragans of the Archbishop of St. Andrews and Edinburgh. The Abp. of Glasgow has no suffragans.

IRELAND.

Province of Armagh.

NAME.	DIOCESE.
Most Rev. Michael Logue (Abp.).	Armagh.
Primate of all Ireland	Ardagh and Clonmacnoise.
Rt. Rev. Bartholomew Woodlock	Clogher.
Rt. Rev. James Donnelly	Derry.
" " John Keys O'Doherty	Down and Connor.
" " Patrick McAlister	Dromore.
" " Thomas MacGivern	Kilmore.
" " Edward Magennis	Meath.
" " Thomas Nulty	Raphoe.
" " Patrick O'Donnell	

Province of Dublin.

NAME.	DIOCESE.
Most Rev. W. J. Walsh (Archbishop), Primate of Ireland	Dublin.
Rt. Rev. N. Donnelly (Aux.)	Ferns.
" " James Browne	Kildare and Leighlin.
" " James Lynch	Ossory.
" " M. Comerford (Coadj.)	
" " Abraham Brownrigg	

Province of Cashel (and Emly).*

NAME.	DIOCESE.
Most Rev. Thomas Croke (Abp.)	Cashel.
Rt. Rev. John MacCarthy	Cloyne.
" " Thomas O'Callaghan	Cork.
" " John Coffey	Kerry and Ardhoe.
" " Thomas McRedmond	Killaloe.
" " Edward O'Dwyer	Limerick.
" " William Fitzgerald	Ross.
" " (Vacant)	Waterford and Lismore.

* The diocese of Emly is permanently under the administration of the Archbishop of Cashel, and that of Kilfenora under the Bp. of Galway.

Province of Tuam.

NAME.	DIOCESE.
Most Rev. John MacEvilly (Archbishop)	Tuam.
Rt. Rev. John Lyster	Achonry.
" " Patrick Duggan	Clonfert.
" " John Healy (Coadj.)	Elphin.
" " Laurence Gillooly	Galway and Kilmacduagh.
" " Francis MacCormack	Killala.
" " Hugh Conway	

Roman Catholic Church. The name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Peter, and under the bishops subject to him. Its essential parts are the Pope, bishops, pastors—so far as they are priests—and laity. The distinctive characteristic of the Roman Church is the supremacy of the Papacy. Its doctrines, like those of the rest of Christendom, are to be found in the articles of the Nicene Creed. After the Council of Trent, in the Profession of Faith of Pope Pius IV., were added the article on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities. The Immaculate Conception of the Virgin Mary and Papal Infallibility were defined as articles of faith in 1854 and '70 respectively. One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross. Scripture and tradition are appealed to in support of this and other doctrines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is a great distinction between what is of doctrine and what of discipline; the former belonging to the deposit of faith taught by Christ and the Apostles, which is unvariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances. The **Sacred College of Cardinals**—70 in number, after the 70 disciples—are the supreme council or senate of the Church and the advisers of the sovereign pontiff, and at the death of a pope they elect his successor. They preside over the 19 Roman congregations or departments for ecclesiastical affairs, and thus represent the Pope in the regular exercise of his pontifical authority. The total number of Catholics over the world, ruled by about 1,100 archbishops and bishops, is estimated at 220,000,000; of which there are in **Great Britain and Ireland** about 5,650,000 (i.e., nearly 4,000,000 in Ireland, and about 1,680,000 in Great Britain); and in the rest of Europe more than 100,000,000. **Ireland** is divided into four metropolitan provinces, subdivided into 27 dioceses, ruled by 4 archbishops and 23 bishops. The number of priests amounts to about 3500, serving 2382 churches and chapels, situated in 1087 parishes. The 27 archbishops and bishops of **Great Britain** consist of: 1st, for England and Wales, 1 archbishop (of Westminster), with 14 suffragans (besides 2 bishops-auxiliary); 2ndly, for Scotland, 2 archbishops

(one of St. Andrews and Edinburgh and one of Glasgow), with 4 suffragans. The total number of priests of England and Wales is 2478, serving 1335 churches, chapels, and stations; of Scotland 352, serving 335 churches, chapels, and stations. The United States has over 10,000,000 Catholics, 87 archbishops and bishops, 8332 priests, 7523 churches and chapels, and 634,000 pupils in parish schools. In the British possessions of North America there are about 2,400,000 Catholics, 26 archbishops and bishops, about 2550 priests, 2350 churches and chapels and stations, 238 academies, and 4122 parish schools. From statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be inferred how complete is the organisation of the Church, and how vigorously she exercises the forces at her command for the extension of the Catholic faith. During '91 there have been six deaths among the Cardinals, but only two creations. The Pope's Encyclical on Labour created widespread interest. For Papal Ministry see DIPLOMATIC.

Rome, Electric Lighting of. It was reported in Nov. '91 that the authorities had decided to light the city by electricity. The power is to be obtained from the beautiful falls of the Teverone, and the current will be transmitted eighteen miles. Two hundred lamps are to be installed through the whole length of the Corso, the Via Nazionale, the Corso Vittoria Emmanuele, and other streets, and will be hung over the middle of the roadways, as in other Italian cities.

Romer, Sir Robert, Q.C., was ed. at Trinity Hall, Camb., where he became Senior Wrangler and Equal Smith's Prizeman, 1861. Fellow of his college in the same year. Called to the bar at Lincoln's Inn '67, and joined the South-eastern Circuit. Examiner in Civil Law at Camb. '69-70. Q.C. '81, and Benchers '84. Member of the Bar Committee since '83. Married a daughter of the late Mark Lemon, editor of *Punch*. Appointed Judge in the Chancery Division Nov. '90, and received the honour of knighthood.

Roscoe, Sir Henry Enfield, M.P., V.P.R.S., LL.D., grandson of Roscoe the historian, was b. in 1833, and was ed. at Univ. Coll., London, and Heidelberg. Sir H., who was Professor of Chemistry at Owens College, '58 to '86, is chiefly distinguished for his investigations and discoveries relative to the chemical action of light, and on the metal vanadium. In conjunction with Prof. Schorlemmer he published the well-known "Treatise on Chemistry" (6 vols.). Sir H. R. is also the author of "Lessons in Elementary Chemistry," which has been translated into many languages, and of "Lectures on Spectrum Analysis." He is an Hon. D.C.L. of Oxford, an LL.D. of Cambridge, Dublin, and Montreal, an Hon. M.D. of Heidelberg, member of various learned societies, and served on the recent Royal Commission on Technical Instruction, also on the Commission of Inquiry into the Pasteur method for the treatment of hydrophobia, and was, '88, appointed consulting chemist to the Metropolitan Board of Works with a view to the deodorisation of sewage at the Barking outfalls. President of the British Association '87. He sits for South Manchester as an advanced Liberal.

Rosebery, Archibald Philip Primrose, P.C.,

5th Earl of (creat. 1793); Baron Rosebery (1828), by which title he sits in the House of Lords, was b. in London, '47; ed. at Eton and Christ Church, Oxford; mar. '78 Hannah, dau. of the late Baron Mayer de Rothschild, M.P.; she died in Nov. '90; succeeded his grandfather in '68. Appointed a commissioner to inquire into endowments in Scotland '72; Under Secretary of State, Home Office '81-3; elected Rector of the University of Edinburgh '80; was Lord Privy Seal, and First Commissioner of Works '85. On the accession to power of Mr. Gladstone in the beginning of '86, Lord Rosebery attained the distinguished post of Secretary for Foreign Affairs. He held the portfolio for only six months, until the fall of Mr. Gladstone's Government in June. Lord Rosebery has cast in his fortunes fully with Mr. Gladstone, and entirely agrees with his Home Rule policy. His lordship is a strong Liberal, and though a peer, moved in '84 for a select committee to inquire into the best means of improving the efficiency of the House of Peers. As a speaker Lord Rosebery is ready and humorous, and Mr. Gladstone has publicly recognised him as one of the younger Liberals who is destined to play a great part in the history of the country. Lord Rosebery is a strong advocate of Imperial Federation (q.v.). He takes a great interest in movements for the improvement of the social condition of the masses, and generously presented a magnificent swimming bath to the People's Palace (q.v.), in the East End of London. Elected, with Sir John Lubbock, for the City division to the London County Council Jan. 17th, '89, and on Feb. 12th appointed Chairman of that body, over whose deliberations he presided with great success. But, owing to his many public duties his lordship felt obliged, despite many requests that he would retain this position, to resign the Chairmanship of the London County Council (June '90). His lordship has not engaged in his usual political and social labours during '91. His monograph on William Pitt the Younger was issued in November.

Rossall School, Fleetwood, Lancashire. Founded 1844. Royal Charter granted Nov. '90. One exhibition of £50 and one of £30 at Oxford or Cambridge, each for three years, offered every year; besides this there are scholarships held in the school, about 12 being offered each year—foundation, senior and junior. Pupils, 370. Head Master, Rev. C. C. Tancock, M.A. The preparatory school, which forms a portion of Rossall, is under the charge of Rev. H. G. D. Tait, M.A., subject to the general supervision of the Head Master.

Roumania. Formerly the autonomous provinces of the Ottoman empire, Moldavia and Wallachia; now a kingdom under Charles I. of Hohenzollern-Sigmaringen, in whom resides the executive power. The legislature is composed of a Senate of 120 members, elected for eight years, and a Chamber elected for four years by all male citizens paying taxes. Education is free and compulsory, but still in a backward condition. Area 48,307 square miles, with a population estimated at about 5,500,000. Estimated revenue for '89-90, 154,427,000 lei; expenditure, 162,600,000 lei (lei = 98d.); debt in '90, 851,412,554 l.; imports in '87, 314,633,000 l.; exports, 265,726,000 l. (See also FOREIGN ARMIES and FOREIGN NAVIES.)—History. The Ministers of Agriculture and Justice resigned (Nov. 28th, '90). M. Cantacuzen was

re-elected President of the Chamber. General Floresco was elected President of the Senate by 53 to 52. Pending the renewal of the commercial treaties which expire in '92 a fixed *ad valorem* duty of 9 per cent. on all foreign goods will probably be levied. '91. The Cabinet resigned (Feb. 27th) because the Senate decided to abandon the discussion of the Public Instruction Bill. A new Ministry was formed (March 4th) (see ROMANIAN POLITICAL PARTIES). Both Chambers were opened by the King in person (May 11th). The King celebrated (21st) the twenty-fifth anniversary of his accession. It was reported (June 20th) that Prince Ferdinand of Hohenzollern had been betrothed to Mdle. Vacaresco, one of the Queen's maids of honour. The question was discussed at a Cabinet Council, when the Ministers were unanimously of opinion that for reasons of State the marriage must be discountenanced. The Government placed military pickets on the frontier to prevent the ingress of Jewish emigrants. After painful negotiations the Queen was induced to part with Mdle. Vacaresco (Sept. 3rd). It was reported (6th) that the Queen was suffering from partial paralysis. The Queen's illness became serious, and she went to Pallanza to obtain perfect rest and quiet, which was found beneficial (24th). King Humbert conferred the Grand Cross of St. Maurice and St. Lazarus on General Floresco, and the Grand Riband of the Order of the Crown of Italy on M. Kandler. A reconciliation was said to have been effected between Prince Ferdinand and Mdle. Vacaresco (Oct.).

Roumania, King of. See CHARLES I.

Roumanian Political Parties. Party politics in Roumania are in a more or less constant state of transition. The legislative power of the country is vested in an elected Senate of 120 members, and a Chamber of Deputies containing 183 members, and elected for four years by three so-called electoral colleges or classes of voters. Those three colleges consist of (1) electors possessed of property insuring an annual income of not less than £50; (2) those paying direct taxes of not less than 20 francs annually; and (3) all Roumanian subjects of full age. Up to the end of 1887 M. Jean Bratiano, who had held office since '75, and his following of Liberals, had been all powerful, the Conservative Opposition having practically ceased to take an active part in the affairs of the nation. In the election of Feb. '88, however, the Opposition improved its position, and in the following month the Bratiano ministry resigned, and gave place to one presided over by M. Rosetti, a prominent member of the "Junimists," or young Conservatives. The present chamber was elected in October '88, the previous one, which only had an existence of some five months, having been dissolved by the king. At that election the Government—which had the advantage of the support of several Liberal Conservatives and Independent Liberals—obtained a very considerable majority in each of the electoral colleges, and reckoned upon the adhesion of some four-fifths of the Chamber. The Bratiano party, which comprised the National and Dissident Liberals, was consequently an insignificant minority. In April '89, owing to the intrigues of the Conservatives, the then Government was compelled to resign, and was succeeded by

a purely Conservative cabinet, under the presidency of M. Lascar Catargi; and this in its turn was displaced on Nov. 16th, '89, by a new ministry under that of General Mano. The Cabinet resigned on Feb. 27th, '91, owing to the abandonment by the Senate of a Bill on public instruction. General Floresco became (March 5th) Premier, without portfolio. The new Cabinet took the oath on the same day. See DIPLOMATIC.

Rowing. See AQUATICS.

Royal Academy of Music. Established in 1822, chiefly owing to the exertions of Lord Burghersh, afterwards Earl of Westmorland, the R. A. M. was incorporated by charter in 1830. Students of all branches of music are catered for, and find ample stimulus to exertion in the large number of scholarships and prizes which are offered for competition. The chief scholarships are the Westmorland, open to ladies and gentlemen in alternate years between the ages of eighteen and twenty-four; the Potter, also open to ladies and gentlemen; the Sterndale Bennett; the Parepa Rosa, founded by the late Carl Rosa, for ladies who have not previously been students at the Academy, the successful candidate being entitled to two years' free musical education; the Sir John Goss; the Thalberg, for pianoforte students; the Henry Smart; the Sainton Dolby; the Liszt; the Hine Gift; and the Macfarren, for composition. Associates pass a qualifying examination, and are entitled to the use of the initials A.R.A.M. Fellows (the number is limited to 100) are elected by the Directors after leaving the Academy. They are solely entitled to use the initials R.A.M. Honorary members are entitled to the initials E.A.M. with the prefix Hon. Musical composers, performers, and teachers, who have not studied at the Academy, can become Licentiates of the Institution by passing a qualifying examination held annually towards the end of December, successful candidates of which are entitled to the use of the initials L.E.A.M. Principal, Dr. A. C. Mackenzie. The Academy is situated in Tenterden Street, Hanover Square, W.

Royal Academy, The, at Burlington House, Piccadilly, was founded in 1768 by George III., who gave it rooms in Somerset House. Thence it was removed to Trafalgar Square (1834), and to the site of its present abode, which it occupies rent-free (1869). The principal objects of the Royal Academy are (1) the establishment of a well-regulated school or academy of design for the gratuitous instruction of students, and (2) the holding of an annual exhibition open to artists of distinguished merit, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The Royal Academy is "a private society," supporting a school from its own resources without any grant of public money. The members are under the superintendence and control of the Sovereign, who confirms all appointments and bye-laws; and the society itself consists of 42 Royal Academicians, at least 80 Associates, and two Associate Engravers. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir Frederick Leighton, Bart. (7.v.). There is a council of 10 members, who succeed by rotation, five retiring every year, the President, the Keeper, and the Treasurer, being *ex-officio*

members. Appended is a list of the Royal Academicians:—

1875 Alma-Tadema, L.	1868 Leighton, Sir F., Bart.
1872 Armitage, H.	1876 Leslie, G. D.
1870 Arnstead, H. H.	1879 Marks, H. S.
1867 Brock, T.	1864 Millais, Sir J. E., Bart.
1868 Burgess, J. B.	1877 Orchardson, W. Q.
1867 Calderon, P. H. (keeper)	1861 Oulless, W. W.
1880 Cole, Vicar	1880 Pearson, J. L.
1867 Cooper, T. S.	1873 Pettie, J.
1877 Davis, H. W. B.	1876 Poynter, E. J.
1861 Dicksee, F.	1881 Rivière, B.
1871 Dobson, W. C. T.	1869 Sant, J.
1864 Faed, T.	1877 Shaw, R. N.
1867 Fildes, S. Luke.	1871 Stokes, L.
1876 Gilbert, Sir J.	1867 Stone, M.
1865 Goadall, F.	1869 Thornycroft, H.
1861 Gow, A. C.	1885 Waterhouse, A.
1881 Graham, P.	1867 Watts, G. F.
1860 Herkomer, H.	1870 Wells, H. T.
1870 Hodgson, J. E. (librarian)	1874 Woolner, T.
1860 Hook, J. C.	1878 Yeaman, W. F.
1864 Horsley, J. C. (treasurer)	

Retired Royal Academicians.

Frith, W. P.	Pickersill, J. R.
Marshall, W. C.	Richmond, G.

Associates.

1880 Birch, C. B.	1883 Macheth, R. W.
1868 Blomfield, Sir A. W.	1879 Mac Whitter, J.
1880 Bodley, G. F.	1886 Moore, H.
1870 Boughton, G. H.	1877 Morris, P. R.
1881 Brett, J.	1871 Murray, David
1885 Burne-Jones, E.	1870 Prinsep, V. C.
1878 Crofts, E.	1888 Richmond, W. B.
1876 Crowe, E.	1870 Staupole, P.
1888 Ford, E. O.	1870 Storey, G. A.

1883 Gregory, E. J.	1867 Waterlow, E. A.
1884 Hunter, C.	1882 Woods, H.
1885 Lander, B. W.	1869 Wylie, W. I.
1886 Lucas, S. J.	1861 Fred A. Eaton, sac

(to whom all communications should be addressed).

The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was nearly £120,000, the whole of which was defrayed out of the funds of the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The result is that a really admirable collection of masterpieces is usually brought together. The exhibition remains open from the first Monday in January for a period of nine weeks. The fine library and books of prints belonging to the Academy are open to students and the general public at certain hours. The Diploma and Gibson Galleries, reached by a staircase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician; the works of J. Gibson, R.A., bequeathed by him; several interesting pictures of old masters, and some fine pieces of sculpture.

Royal Agricultural Society of England.

This, the premier agricultural society of the United Kingdom (though not the first

established) was founded by Royal Charter on the 26th March, 1840. The Charter gives a long list of the national objects which the Society was intended to promote, and which have been well embodied in its motto, "*Practice with Science*." The results of the Society's efforts for what the Royal Warrant calls "*the general advancement of English agriculture*" have been great and striking. It would be impossible in this brief record even to enumerate all the improvements in the different breeds of live stock, and in agricultural machinery, which have arisen from the annual competitions in the Society's showyards, or the advances in scientific knowledge as to the cultivation of the soil, which the Society's experiments and grants to investigators have brought about. It has two sides to its work:

(1) The practical, the chief feature of which is its annual shows, to which the best pedigree animals are brought to compete for the valuable prizes offered by the Society, and still more for the honour of being "Royal" prize-winners, and at which also the newest inventions in agricultural implements and labour-saving appliances are exhibited; (2) The scientific, for which purpose it has equipped and maintains a complete chemical laboratory for the analysis of feeding stuffs, manures, soils, etc., and retains the services of Chemical, Botanical, Entomological, and Veterinary experts in order that its members may have at low rates the best scientific advice obtainable. It controls, moreover, an experimental farm at Woburn, at which elaborate investigations into crops, soils, feeding stuffs, and other matters connected with agriculture are carried on. Its Journal has from the first taken high rank amongst scientific publications, and contains in each quarterly number articles by leading authorities on the most important agricultural questions of the day. The R. A. S. gives prizes and scholarships for competition by agricultural students and pupils at county and middle-class schools, and seeks in many other ways to foster the study of agriculture. The governing body of the Society consists of a president (elected annually), twelve trustees, twelve vice presidents, and fifty members of council, half of whom go out of office each year. The Council meets once a month at the Society's house, 12, Hanover Square, and the business is divided amongst a large number of committees. Three general meetings of members are held in each year: one on the 22nd of May (the anniversary meeting); one in the Society's showyard in the summer; and one in December, usually on the Thursday of the Smithfield Cattle Show week. The number of members is about 17,000, including nearly all the chief landowners and practical farmers and stock breeders of the country. Membership of the Society entitles to the use of a large and well-stocked library of standard books on agricultural subjects, and a reading-room, at which the principal agricultural newspapers and other periodicals can be consulted by members. Provincial veterinary surgeons have been appointed by the Society in each county, for the purpose of enabling members to engage skilled veterinary advice in cases of disease amongst cattle, sheep, or pigs. Members can also consult the professors of the Royal Veterinary College at fixed rates, and have the privilege of sending cattle, sheep, and pigs to the College infirmary. The Society makes annually a con-

siderable grant from its general funds in order that members may obtain at low rates analyses of feeding stuffs, artificial manures, soils, etc., by the Society's consulting chemist (Dr. J. Augustus Voelcker), whom members may also consult either personally or by letter at a small fee. Reports can be obtained by members from the Society's consulting botanist (Mr. W. Carruthers, F.R.S.), on the purity of seeds, and on diseases or weeds affecting farm crops, at a fee of one shilling in each case. The determination of the species of any insect, worm, or other animal which, in any stage of its life, injuriously affects farm crops, with a report on its habits and suggestions as to the methods of prevention or remedy, is made for members by the Society's honorary consulting entomologist (Miss Eleanor A. Ormerod) at a fee of half a crown. The fifty-second annual show of live stock, implements and farm produce was held in the week commencing June 22nd, '91, at Doncaster, and in '92 it will be held at Warwick. Sec., Mr. Ernest Clarke, 12, Hanover Square, W.

Royal Assent. See PARLIAMENT and PARLIAMENTARY PROCEDURE.

Royal College of Music, Kensington Gore, London, S.W., was founded in 1882, under the presidency of H.R.H. the Prince of Wales, and incorporated by Royal Charter. At its commencement the sum of £126,000 was raised by public gifts, and has all been invested. The pupils are of both sexes, and consist of scholars, exhibitioners and students. The **Open Scholarships** are fifty in number; they are gained by competition, and entitle the holder to a thorough and systematic free education in theoretical and practical music. There are also ten **Close Free Scholarships**, for the benefit of persons residing in certain specified localities. The **Exhibitions** are also gained by competition, there being no limit as to age. The following are the most important:—The Council Exhibitions, value £10, £15 and £20, for pupils entering the College, those of one year's standing, and those of two years' standing, respectively; the **Savage Club Exhibition** (£40), the **Uppingham School Exhibition** (£20), and the **Charlotte Holmes Exhibition** (£15). Various prizes are also offered from time to time for competition to pupils in the College. **Associates** need not necessarily be pupils or ex-pupils of the College; they have to pass a qualifying examination, which entitles them to use the initials A.R.C.M. The teaching staff includes a large number of musicians of the highest eminence; amongst others the following gentlemen (who constitute the Board of Professors):—Mr. A. Blume, Prof. J. F. Bridge, Mr. Henry Holmes, Mr. Walter Parratt, Dr. C. Hubert H. Parry, Mr. Ernst Pauer, Prof. C. Villiers Stanford, Mr. Franklin Taylor, Mr. A. Visetti. **Director**, Sir George Grove, D.C.L., LL.D. **Hon. Sec.**, Mr. Charles Morley. **Registrar**, Mr. George Watson. All communications relating to admission, etc., should be addressed to the Registrar.

Royal Colonial Institute. The growth of the R. C. I. (founded 1868) since its incorporation by Royal Charter in '89 has been very rapid. In '78 it numbered 800 fellows, with an annual income of £1331. In '91 the number exceeded 2300, with an annual income of over £7000, exclusive of the building fund. The fact that the **Prince of Wales is President** of the Institute has given it much additional prestige. The

Council is composed of gentlemen well known in connection with the Colonies; and **Sir Montagu Ommanney**, the senior Crown Agent for the Colonies, is **Treasurer**. The objects of the R. C. I. are thus officially set forth:—"To provide a place of meeting for all gentlemen connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs; to establish a **reading-room** and **library**, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a **museum** for the collection and exhibition of Colonial and Indian productions; to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford opportunities for the reading of papers and for holding discussions upon Colonial and Indian subjects generally; and to undertake scientific, literary and statistical investigations in connection with the British Empire. But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a party character." The new premises in **Northumberland Avenue** are commodious, well furnished, and fully supplied with Colonial and other newspapers, books and statistical information; and in the discussion of questions of Colonial interest the Institute is taking an increasingly prominent part. Amongst the matters which engaged the special attention of the Council in 90-91, were the **Investment of Trust Moneys in Colonial Government Stocks**, the **Extension of Commercial Relations between the Mother-country and the Colonies**, the **Meeting of the National Australasian Convention**, the **Grant of Responsible Government to Western Australia**, the **North American and Newfoundland Fisheries question**, the **Extension of British Influence in Africa**, the **Jamaica Exhibition of '91**; the publication, under the auspices of the Institute, of a series of **Educational Works relating to the Colonies**; and the publication of a monthly journal. The papers read during '91 included "British East Africa," by Mr. G. S. Mackenzie; "The Aborigines of Australia," by Mr. E. Greville; "Agricultural and Technical Education in the Colonies," by Mr. H. F. Moore; "Australia as I saw it," by Lord Carrington, G.C.M.G.; "Canada," by the Earl of Aberdeen; "Australasian Defence," by Major-General Sir J. Bevan Edwards, K.C.M.G.; "The Colony of the Leeward Islands," by Mr. D. Morris, M.A.; "Inter-British Trade, and its Influence on the Unity of the Empire," by Mr. C. E. Howard Vincent, C.B., M.P.; and "Matabeleland and Mashonaland," by the Rev. F. H. Surridge,—which are published in the *Proceedings* of the Institute, and are of a very interesting description. On Oct. 1st, '91, there were 1334 resident and 2379 non-resident fellows. The Library contains some 14,000 vols. and pamphlets, and is made readily accessible by the publication of a printed catalogue. **Office**, Northumberland Avenue. **Sec.**, J. S. O'Halloran.

Royal Dublin Society. This society was founded in 1781, and incorporated by royal charter in 1749, for the promotion of husbandry and other useful arts and sciences in Ireland. It has associated with its scientific section the **Royal Geological Society of Ireland** and the **Dublin Scientific Club**. It issues "**Transactions**" and "**Proceedings**," and meetings are held monthly during the session. Three agricultural shows are held each year on the extensive premises of the Society, Balls Bridge

Dublin—viz., spring cattle show in April, horse show in August, and winter show in December. **President**, Earl of Rosse, F.R.S. **Hon. Secs.**, C. Uniacke Townshend and Sir Howard Grubb, F.R.S.

Royal Family, Annuities to, and Civil List. The total amount of the Civil List is £385,000, thus divided: Her Majesty the Queen's privy purse, £60,000; salaries of Her Majesty's household and retired allowances, £131,260; expenses of Her Majesty's household, £172,500; royal bounty, alms and special services, £13,200; unappropriated, £8,040. There are, besides, the Civil List Pensions (*q.v.*), which, in the last financial year amounted to £25,060 18s., making the total amount issued on account of the Civil List £410,060 18s. Her Majesty, as Duchess of Lancaster, also receives the revenues of the Duchy, which amounted in the year for which the last return has been issued to £50,000. The cost of maintenance and repair of certain of the Royal Palaces is defrayed out of the estimates (see FINANCE, NATIONAL, for the amount voted for '91-92). Subjoined are the annuities to the royal family: H.L.M. Victoria, Dowager German Empress (the Princess Royal), £8,000; H.R.H. the Prince of Wales, £40,000; the Princess of Wales, £10,000; Duke of Edinburgh, £25,000; Princess Helena (Princess Christian), £6,000; Princess Louise (Marchioness of Lorne), £6,000; Duke of Connaught, £25,000; Duchess of Albany, £6,000; Princess Beatrice, £6,000; Princess Augusta (Duchess of Mecklenburg-Strelitz), £3,000; Duke of Cambridge, £12,000; Princess Mary of Teck, £5,000; Prince of Wales's children, £36,000—total, £188,000. The Prince of Wales also receives the revenues of the Duchy of Cornwall, which, in the year for which the last return is available, amounted to £64,523.

Royal Geographical Society, 1, Savile Row, W., was founded in 1830. It annually awards various medals to distinguished workers in the cause of geography, and distributes prizes among training colleges for proficiency in this science. It also lends instruments to travellers in various parts of the world. In '91 the **Founder's medal** was given to Sir James Hector, the director of the Geological Survey of New Zealand. The **Patron's medal** was given to Dr. Fridtjof Nansen (*q.v.*). During the year 277 Fellows had been elected, and on May 1st, '91, there was a total of 3579 Fellows. The published *Proceedings* are valuable, as tracing the progress of explorations and discoveries. **Sec.**, Mr. D. W. Freshfield.

Royal Indian Engineering College, The, Coopers Hill, is primarily maintained under the orders of the Secretary of State for India in Council, to educate candidates for Government service in the Indian Public Works, Telegraph and Forest Departments; candidates for the last-named department are selected under special arrangements. **Nominations** to the Indian Telegraph Department are made from among the engineer students at the College at the end of their first year of study. About 50 engineer students are admitted yearly to the College. **Candidates for admission** must be between the ages of 17 and 21 years on the 1st day of July of the year of admission, and of good moral character; they must have received a good general education, and have attained to a sufficient degree of proficiency in elementary mathematics to enable them to follow the College course with advantage. The collegiate

year usually begins at the end of September. Applications for admission as engineer students can be made at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. Candidates whose applications are found satisfactory as to age and character undergo an **examination**, the subjects of which, with all other information, may be obtained at the College, Coopers Hill, Staines, **Sec.**, J. G. Whiffin, R.N.

Royal Institute of British Architects was founded, in 1834, for the general advancement of architecture and for promoting and facilitating the acquirement of the knowledge of the various arts and sciences connected therewith. It was incorporated by Royal Charter in '37, and obtained a new charter in '37, conferring greatly extended powers. A *Kalendar*, giving full particulars of the bye-laws, examinations, and prizes, is published at intervals. **President** for '91-92, Mr. John Macvicar Anderson. **Sec.**, Mr. William H. White. **Offices**, 9, Conduit Street, Hanover Square, W.

Royal Institute of Painters in Water Colours. This Society was founded in 1837, and formerly held its exhibitions in Pall Mall, but in the spring of '83 moved to more commodious galleries at 189, Piccadilly. There is an annual exhibition of water-colour paintings, commencing the third week in March. The walls are open to artists whose works are approved, and members are elected according to the merit which their productions display. **President**, Sir James D. Linton; **Vice-President**, H. G. Hine; **Sec.**, W. T. Blackmore. **Office**, 189, Piccadilly, W.

Royal Institution of Great Britain, The. Founded 1799, and incorporated 1800, "for the diffusing knowledge and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." The Institution was enlarged in 1820. The library contains about 50,000 volumes. **House**: Albemarle St., Piccadilly. **President**, The Duke of Northumberland, K.G., D.C.L., I.L.D. **Hon. Sec.**, Sir F. Bramwell, Bart., D.C.L., F.R.S., V.P.

Royal Irish Academy. A celebrated, scientific and literary society, meeting in Dublin, incorporated by royal charter of Geo. III., 1786, and having 400 members. The Academy publishes "*Transactions*" and "*Proceedings*," containing papers on Science, and Polite Literature and Antiquities—and supervised by committees of 11 and 20 members respectively. The publications will in future appear together and not in separate sections. **President**, Rt. Rev. William Reeves, D.D., Bishop of Down, Connex and Dromore. **Sec.**, E. P. Wright, M.A., M.D.

Royal Masonic Benevolent Institutions and Funds. See FREEMASONRY.

Royal Scottish Academy (incorporated in 1838) during '89 applied for a new charter, by which (if granted) it will consist of three orders—Academicians, Associates, and ordinary members—but the 30 Academicians will be elected by a general assembly of the Academy. It also reduces the number of pictures which each member of the Academy is entitled to exhibit in the annual exhibition from seven to

five. The charter applied for contains many other changes. **President**, Mr. George Reid (q.v.).

Royal Society, Burlington House. A society formed for the pursuit and spread of science (incorporated in 1662 by Charles II.), now famous throughout Europe. Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons from November to June. The Society awards the Copley, Rumford, Royal, Davy, and Darwin medals, each annually, with the exception of the Rumford and Darwin, which are given biennially. The Copley is the most highly prized, and may be awarded to Englishmen or foreigners, and only goes to distinguished savants. Among the recipients have been Benjamin Franklin, Joseph Priestley, Herschel, Davy, Brewster, Faraday, Adams, Owen, Chevreul, Darwin, Wheatstone, Helmholtz, Huxley, and (last year) Prof. Simon Newcomb. Among the presidents have been Sir Isaac Newton, Sir Christopher Wren, Samuel Pepys, Sir Hans Sloane, Martin Folkes, Sir Joseph Banks, Sir Humphry Davy, Sir Joseph Hooker, Prof. Huxley, and Sir Gabriel Stokes. Sir William Thomson, D.C.L., I.L.D. (q.v.), is the present president. There are now upwards of 450 English Fellows and 50 Foreign Members. Fellows elected, '91:—Anderson, William; Bower, Prof. Frederick Orpen, D.Sc.; Conroy, Sir John, Bart., M.A.; Cunningham, Prof. Daniel John, M.D.; Dawson, George Mercer, D.Sc.; Elliott, Edwin Bailey, M.A.; Frankland, Prof. Percy Faraday, B.Sc.; Gilchrist, Percy C.; Halliburton, William Dobinson, M.D.; Heaviside, Oliver; Mair, John Edward, M.A.; Mond, Ludwig; Shaw, William Napier, M.A.; Thompson, Prof. Silvanus Phillips, D.Sc.; Tizard, Capt. Thomas Henry, R.N. The rooms of the Society are enriched with busts and paintings, while the library contains 50,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton. **Secs.**, Prof. M. Foster, M.D., and Lord Rayleigh, D.C.L., Burlington House, Piccadilly. **W. Assistant Sec.**, Herbert Rix, B.A.

Royal Society of Painters in Water Colours. The older of the two Water Colour Societies was founded in 1804, and has held exhibitions annually since that date. The Summer Exhibition is opened to the public towards the end of April, and the Winter Exhibition, which chiefly comprises sketches and studies, opens on the 1st of December. **Sir John Gilbert, R.A., R.W.S.**, is the President, and the number of members is forty, while the number of associated exhibitors is unlimited. The exhibitions of the Society, which are held at their galleries, 5A, Pall Mall East, S.W., are confined to the works of members and associates. **Deputy-Pres.**, Carl Haag, R.W.S.; **Sec.**, Alfred D. Fripp, R.W.S.; **Asst. Sec.**, George L. Ridge. Attached to the Society is an "R.W.S. Art Club," established 1894, for the purpose of holding a series of Conversazioni, to which members are invited to send works of art for exhibition. **Pres.**, Sir John Gilbert, R.A.; **Vice-Pres.**, A. W. Hunt, R.W.S.; **Sec.**, Aubrey Stewart, 71, Mornington Rd., N.W. **Offcs.**, 5A, Pall Mall East.

Royalty Deceased (Dec. '90 to Nov. '91). See OBITUARY.

Royal United Service Institution, Whitehall, S.W., was established in 1831, for the promotion of naval and military science and

art. Having received notice of the intended demolition of the buildings in Whitehall Yard, which the Institution has hitherto occupied, an address was presented to her Majesty the Queen. The address was dated Oct. '90, and set forth the request of the Institution that the Chapel Royal, Whitehall, might be granted to it. Her Majesty instructed the Lord Chamberlain, in Dec. '90, to convey to the Institution her compliance with this desire. On Jan. 1st, '91, therefore, the transference took place. No material interference has been made with the architecture of the structure. The cost of the maintenance of the building will be borne by the institution. The ceiling, adorned with the splendid art of Rubens, forms an additional attraction. The sixtieth annual meeting of the Institution was held on March 7th, '91, under the presidency of the Secretary of State for War, when congratulations were exchanged on the acquisition of the new home for so valuable and useful an institution. **President**, H.R.H. the Duke of Cambridge. **Acting Chairman of the Council**, General Erskine. **Sec. and Curator**, Captain Boughey Burgess.

Royal University of Ireland. See IRELAND, ROYAL UNIVERSITY OF.

Royal Yacht Squadron. See YACHTING. **Rubinstein, Anton Gregor**, was b. near Jassy, 1829. His parents were Russian Jews. At the age of twelve he played in London, which he visited again in '57, and on later occasions. As a composer Rubinstein is very prolific; his "Ocean Symphony" is the best of several such works for full orchestra; and for the stage he has composed many operas, the most popular being the "Demon," (Dimitri Donskoi, and "Nero." The late Czar ennobled him in '69. The jubilee of his public service was celebrated by a fête at St. Petersburg Nov. 18th, '89. It was stated in '91 that he had resigned the post of director of the Musical Conservatoire at St. Petersburg, which he founded in '62. This report was, however, denied.

Rudler, Frederick William, was b. in London 1840. Appointed Curator of the Museum of Practical Geology in '79, and Professor of Natural Science in the University College of Wales from '76 to '79. President of the Anthropological Department of the British Association at Swansea '80. **Vice-President** of the Anthropological Institute, and formerly editor of its Journal. Joint editor of Uge's "Dictionary" (3 vols., '75), and of Stanford's "Europe" ('85). **President of the Geologists' Association** '80.

Rugby School. Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1614. The boys are divided into **foundations** and **non-foundations**. Has, every July, 10 entrance and other scholarships of £100 to £20, and 7 exhibitions tenable for 4 years, 3 of £60 and 4 of £30 annual value. **Pupils**, 480; admission at the age of 12. **Head Master**, Rev. Canon John Percival, LL.D. **Motto**—*Nihil sine laborando*. Some distinguished alumni—Sir Ralph Abercrombie; Cave, Dr. Johnson's friend, and originator of *The Gentleman's Magazine*; Macready, the celebrated actor; Dr. S. Butler, afterwards Master of Shrewsbury School; Walter Savage Landor; T. Hughes; Lord Derby; Dean Stanley; Arthur H. Clough; Matthew Arnold; and M. Waddington, the

French ambassador. In '89 it was decided to establish a Home Mission, in addition to the Fox Memorial Mastership in India, in connection with the School. Consult *Rugby School Register*.

Rural Nursing Association. See NURSES, QUEEN VICTORIA'S JUBILEE INSTITUTE OF.

Ruskin, John, M.A., LL.D., was b. in London 1819. Educated at Christ Church, Oxford, where he gained the Newdigate prize ('39). Having early developed a taste for art, he studied with great success under Copley Fielding and Harding, and having become enamoured of Turner's paintings, then but little appreciated, he commenced a letter in defence of Turner, in response to an attack made on him in *Blackwood's Magazine*. This developed into the celebrated work "Modern Painters," vol. i. ('43), which obtained a great success, though it evoked some sharp criticism on the part of those who dissented from his views. He resided for some time in Italy, and subsequently published the remaining volumes of "Modern Painters," making five (all issued in '46-60). These contained valuable illustrations by himself, and were re-issued December '88. He had previously ('49) written "The Seven Lamps of Architecture," and "The Stones of Venice" ('51-3); both books have been reprinted—the former in '80, and the latter in April '86. He has also written extensively on economic and other questions, and recently has been engaged upon his autobiography, which he is bringing out by fits and starts at irregular intervals under the title of "Fragments." In '87 he published "Hortus Inclusus: Letters from Mr. Ruskin to the Ladies of the Thwaite." A collection of Poems, written by him between the ages of seven and twenty-six, was published in Oct. '91. The work was edited by Mr. W. G. Collingwood.

Ruskin Society of London (Society of the Rose) was established in '81. It invites the help of all earnest friends of Mr. Ruskin and students of his works, and suggests the establishment of local centres as branches or reading societies. It offers public readings, papers and addresses, in exposition of Mr. Ruskin's writings and teachings, to literary and other associations. It possesses thirty volumes of Mr. Ruskin's works, which were presented to the Society by the author. Hon. Sec., Mr. R. F. Butler, London Institution, Finsbury Circus, E.C.

Russell, Dr. W. H., was b. at Lily Vale, co. Dublin, 1821. Entered Trin. Coll., Dublin, and while there commenced his connection with the *Times*. Called to the English bar ('50). Correspondent of the *Times* in the Crimea ('54-5) and was engaged in similar capacity during the progress of the Indian mutiny ('57-8), and its suppression, which afterwards was fully described in "My Diary in India." In '61-2 he was in the United States as correspondent of the *Times* during the civil war of Secession. In '66 he corresponded with the *Times* from the Austrian headquarters during the Austro-Prussian war. In the Franco-German war ('70-71) he was correspondent at the headquarters of the Crown Prince. In '58 he established the *Army and Navy Gazette*. Many records of his journeys have appeared,

including ('90) "A visit to Chile and the Gold Fields."

Russell, Sir Charles, Q.C., M.P., was b. 1833. Educated at Trin. Coll., Dublin. Commenced his career in the gallery of the House of Commons as Parliamentary leader-writer to a Catholic journal. Called to the bar at Lincoln's Inn ('59); appointed Q.C. and elected Bencher of Lincoln's Inn ('72). Returned in the Liberal interest as member for Dundalk ('80-85); South Hackney ('85 and '86). **Attorney-General** in the late Gladstone administration (Feb. '86), when he received the honour of knighthood. As a sound lawyer, acute cross-examiner, and persuasive advocate Sir Charles Russell is without a rival at the English bar. He takes a lively interest in sporting matters; and when the dispute arose about Bend Or, he was offered a brief both for the plaintiff and defendant. He was one of the leading counsel in the Chetwynd and Durham arbitration case, and defended the prisoner in the famous Maybrick murder case Aug. '89. Sir Charles increased his reputation in '89 by his masterly oration at the **Parnell Commission**, where he appeared, with Mr. Asquith, M.P. (q.v.), as counsel for Mr. Parnell. During '91 Sir Charles appeared for the principal defendants in the great Baccarat trial.

Russell, W. Clark, novelist, was b. in New York, 1844, but is of English parentage, being the son of Mr. Henry Russell, the author of "Cheer, Boys, Cheer." Went to sea at the age of thirteen, as a midshipman, and made several voyages to Australia, India, and China. He abandoned a naval career in '65, and ten years later achieved his first literary success in "John Holdsworth, Chief Mate." The warm welcome given to this book led Mr. R. to draw further on his nautical experiences, and his other works include "The Wreck of the Grosvenor," "A Sea Queen," and "Jack's Courtship." He has also contributed to the *Daily Telegraph* many sketches of voyages and naval incidents under the pseudonym of "A Seafarer," but since '88 his connection with that journal has ceased. His latest works are ('89) "Marooned," "The Romance of Jenny Harlowe," "Betwixt the Forelands," "My Shipmate Louise" ('90), and "My Danish Sweetheart" ('91).

Russia. One of the largest of the military powers of Europe. Has a European area of 2,095,504 sq. miles, or, with Asiatic possessions, 8,644,100 sq. miles. The total population ('87, latest return) is 113,354,649 people. The fifty governments of European Russia contain 85,282,101 people, the Vistula Province (Poland) 8,319,797, Finland 2,232,378, the Caucasus 7,458,151, Siberia 4,493,667, and Central Asian possessions (Turkistan and Transcaspia) 5,532,021. The Slavs constitute more than two-thirds of the population (nearly 70,000,000), of whom 5,000,000 are Poles; the rest of the population being made up of Lithuanians, Finns, Germans, Tartars, Jews, Armenians, and a variety of Asiatic peoples. The state religion is Greek Church. The orthodox number 65,549,096, Russo-Greek dissenters 15,000,000, Roman Catholics 8,300,000, Protestants 2,950,000, Jews 3,000,000, Mahometans 2,600,000, and Buddhists, etc., the remainder. **Estimated revenue**, '91, 900,757,570; **expenditure**, 898,889,021 r.; **exports** '88, 793,900,000 r.; **imports**, 390,700,000 r.; **total debt** in '89, 5,631,117,475 r. The Government is an autocracy, the Czar being the supreme ruler and

legislator, and the only source of power in the body politic. (For history '71-'90 see previous year.)—**POLITICAL.** In Dec. '90 the Government instituted a scale of high railway tariffs against Polish industry. The Russian Consuls-General in China met at St. Petersburg (12th) to consider the best method of developing Russian trade with China. The Government forbade the repairing of Polish churches, and then ordered them to be shut up as unsafe. The Government ordered a revision of all titles of nobility not strictly Russian, and documentary evidence must be produced. The measure to apply specially to the Catholic nobility of Poland, the titles of Swedish origin in Finland, to German Lutherans of the Baltic provinces, and the Germans of noble birth who have settled in Russia in the last hundred years. The Council of the Empire framed a project for stamping out the Stundists, who are akin to the Quakers. (18th). The Government declined (19th) to take Bokhara under its immediate authority, but agreed, that if the pretender to the Ameer's throne, Katta-Turra, invaded the State, to at once occupy the capital, and that the country should then be declared to be voluntarily under Russian authority. Later it was enacted that all persons employed on the Polish railways should be Russians, and the Poles, about 14,000, were to be dismissed as soon as possible.—'91. The Government ordered that about 11,000 Austrians and Germans, employed by private firms in Poland, were to be dismissed and expelled. The Government ordered from Messrs. Vickers and Sons, Sheffield, steel armour plates for two gunboats being built in the Admiralty dockyard. After the assassination of General Seliveroff the secret police were reorganised; the head office remained at Paris, but sub-agencies were established at Zurich, Berne, Geneva, Mentone, and Montpelier. The Minister of the Interior issued an order (Jan. 8th) for the expulsion of Jews from the Terek regions of the Caucasus. The estimates for '91 showed a surplus of 1,868,549 r.; extraordinary receipts, 13,750,130 roubles; expenditure, 64,413,500 roubles, showing a deficit of 49,663,361 roubles. The Czar opened the Finnish Diet at Helsingfors (27th), his speech being short and uninteresting; the two speeches in reply reflected bitterly on the unhappy state of the country and its prospects. A strike broke out in the Russian dockyard at St. Petersburg. The Commandant of the Port lost his temper, and was subsequently removed to Vladivostok, and the High Admiral ordered that the just demands of the men should be satisfied. The Minister of Finance announced (Feb.) the transformation of the 5½ per cent. Gold Rentes to 4 per cents., purposing to issue obligations for 70 million roubles to cover the 66,174,000 roubles of Gold Rentes, paying seven roubles on each obligation exchanged. A further effort was made in March to complete the conversion by the issue of a loan of 194 million roubles at 4 per cent. By a decree (April) the Czar renamed most of his regiments, with the result that ten of the reserve battalions were raised to full regiments, increasing the reserve by 20,000 men. The naval forces were also nearly doubled, by a recent order of the Grand Admiral, while six new military strategical roads were ordered to be constructed on the Polish frontier. The Finnish postal service was generalised with that of Russia. A circular was issued from the Czar's Private Cabinet

forbidding the offering of presents to officials and superiors. The Grand Duke Michael Michaelovitch was dismissed from the army for marrying General Ignatieff's daughter without the Czar's consent. An Imperial ukase was issued (May), by which all illegitimate children of Christians, except those proceeding from adultery, may become legitimate upon the marriage of their parents, on condition of proper announcement made by the latter to the judicial authorities; and even in cases where a marriage is declared to have been illegal, and is afterwards judicially annulled, the children of such marriage may obtain all the rights of legitimate offspring. Among the many clauses concerning adoption there is one absolutely forbidding all sectarians from adopting children belonging to the orthodox Russian faith. The persecution of the Jews continued, and edicts were issued which compelled their emigration in large numbers. The number of recruits to be enlisted during '91 was fixed at 262,400. The Czar issued a proclamation announcing the abolition of the Committee for Finnish Affairs attached to the Secretary of State for Finland. The French fleet arrived at Cronstadt (July 21st), and was accorded a brilliant reception, being also visited by the Czar. There was a round of festivities, and the fleet left (Aug. 9th). King Alexander of Serbia arrived at St. Petersburg (4th). It was officially announced (Sept. 17th) that a new Three Per Cent. Loan of 300,000,000 roubles had been concluded. The following firms partook in the issue of the new Russian loan: Crédit Foncier, Paris; Mendelssohn & Co., and Warschauer, Berlin; Hambro & Sons, London; Hope & Co., Amsterdam; Copenhagen Bank. It was reported (Oct.) that the realisation of the Budget for '90 gave a surplus of 65,000,000 roubles, which was to be devoted to the relief of the famine-stricken districts. The Imperial ukase for effecting the further Russification of Finland was issued. Its terms provided that the Secretary of State for Finland should submit to the Russian Ministers for consideration all Finnish legislative proposals which affect the interests of Russia. Further, in future all Imperial decisions and projects of law relating to Finland, all Bills to be laid before the Finnish Diet, as well as the resolutions and petitions of the Finnish Diet, were to be communicated to the Governor-General in the Russian language instead of in the native tongue of the Grand Duchy, as hitherto. Another ordinance directed that only Russians who had graduated at a University, or Finlanders who had a superior education and thoroughly understood the Russian language, should henceforward be appointed to posts in the office of the Secretary of State and in the Chancellery of the Governor-General. The Czar countermanded all State balls, in order that the money usually expended on them might go to the famine relief fund. It was reported (15th) that the new loan had been covered seven and a half times. The applications in England amounted to 12,800 bonds, Russia 218,000, Amsterdam 54,000, Copenhagen 6000. The following are the numbers of bonds subscribed for by some of the chief financial establishments in France: Crédit Foncier, 2,350,000; Banque des Pays Bas, 1,386,000; Crédit Lyonnais, 1,415,000; Banque de Dépôts et Comptes Courants, 335,000; Banque d'Escompte, 253,000; Comptoir National d'Escompte,

564,000; Crédit Industriel, 240,000; Société Générale, 307,000; Banque Mosnier, 331,000. A ukase was issued forbidding the export of linseed cake.—**GENERAL.** The Minister of Finance framed a scheme by which all Russian and foreign insurance companies would be under the control of the Government. The Metropolitan of Odessa received an intimation that he had better enter a monastery, on account of his sermon against the persecution of the Jews. The semi-centennial anniversary of the foundation of the Nonconformist place of worship at St. Petersburg by a few Americans in the reign of the Emperor Nicholas was celebrated (Dec. 18th) by a meeting of the members of that body. The Institute of Experimental Medicine, founded by Prince Alexander Petrovitch of Aldenbourg, at a cost of 200,000 roubles, was opened (20th), and handed over to the Imperial Government. A virulent epidemic of small-pox broke out in the Transcaspian territory. Two Polish emigration agents were sentenced (31st) to one year's imprisonment for endeavouring to decoy peasants to Brazil. '91. An explosion of fire-damp occurred (Jan. 17th) in the Tchewotoneff coal mine; forty miners were killed. A society was formed at St. Petersburg (Feb.) to assist peasants to emigrate to Siberia and the Caucasus. Mufti Mahomed Rau Soultanow, the spiritual chief of the Mussulmans of Orenbourg, arrived at Moscow to petition the Emperor to allow to be replaced those chapters in the Koran which the censor had suppressed. There was great privation in many parts of the country, owing to the partial failure of the crops (Aug.), particularly the rye crop, and an edict was issued forbidding the export of rye. It was announced that the crops had completely failed in thirteen districts, and partially in eight others. The Government allotted 22,000,000 roubles for relief. The Bank of St. Petersburg lent ex-King Milan (Oct.) 2,000,000 fr. at 3½ per cent. The harvest was very bad in all, and a complete failure in many districts of the undermentioned provinces: Nijni Novgorod, Riazan, Toula, Kazan, Simbirsk, Saratov, Voronaje, Penza, Viatka, Samara, Oufa, Tambov, and Orenbourg. In the province of Orel, though the harvest was generally bad, only the districts of Eleti, Livny, and Briansk were famine-stricken. In the province of Kursk, the districts of Novy-Oskol, Stary-Oskol, Time, and Stehigry; in the province of Astrakhan, the districts of Astrakhan, Yenotayevsk, and

Tcherny-Yar; in the province of Kostroma the districts of Vetloug, and Varnavine; in the province of Kherson, the districts of Khetson, Alexandrie, and Ananiev; in the province of Perm, the districts of Kamyslov, Shadrinsk, and Ekaterinborg; in the province of Kharov, the districts of Starobelsk, and Volchansk; and in the province of Tobolsk, the districts of Yalutorovsk, Ishime, and Kurgan. The new ironclad *Navarin*, was launched on the Neva (20th). Reports were received at Vienna (26th) that there had been serious anti-Jewish riots in the province Tchernigoff; Starodoub was looted on Oct. 11th, over forty houses being burned, and property to the value of 4,000,000 roubles destroyed; 22 Jews were reported killed and 200 wounded. A loan of 50,000,000 roubles, it was announced on Nov. 21st, would shortly be placed at the disposal of the central relief committee which is helping sufferers by the famine.—**SOCIAL.** It was stated (Dec. 5th, '90) that the Czar has issued an edict forbidding any of his subjects to enter the Principality of Monaco. There was a grand reception on the Russian New Year's Day (13th) at the Winter Palace. The Emperor assisted (18th) in the annual ceremony of blessing the waters of the Neva. '91. The Archduke Francis Ferdinand of Austria paid a visit to the Czar at St. Petersburg (Feb.), and was most cordially received and entertained. He proceeded to Moscow (14th), where he had apartments in the Kremlin. Prince Bartimiff, who murdered the young actress, Mdlic. Wisnowska, in July '90, was (22nd) sentenced to eight years' penal servitude. The Grand Duchess Olga Feodorovna, aunt of the Czar, committed suicide (April 12th). The Czar refused to give the exiled Grand Duke Nicholas (his first cousin) permission to see his father, who was in a critical condition (May). The Czarwitsch arrived in Russia (Aug. 16th) from his travels abroad and through Siberia. The owners of the collieries of the Don applied to the Government for a subvention of 3,500,000 roubles, to enable them to compete advantageously with the British exporters to Turkey. The young Grand Duchess Paul died Sept. 24th. The remains of the Grand Duchess were interred (30th) in the Cathedral of St. Peter and St. Paul, with all the rites of the orthodox Greek Church. M. de Giers visited Paris (Nov. 20th), and had interviews with President Carnot and the Prime Minister.

Russia, Czar of. See ALEXANDER III.

S

Sahara Coast. In 1887 Spain acquired and annexed on the north-west coast of Africa the seaboard between Morocco and French Senegal, extending from Cape Bojador in 26° N. lat. to Cape Blanco in 30° 45' N. lat. This gives about 500 miles of coast. Inland Spanish territory is to extend 250 miles, and by treaty with sheikhs of Adzerer, still farther. The whole area is computed to be about 75,000 sq. m.; pop. scanty; consisting of nomad tribes. There is only one shallow harbour on the coast, Rio de Oro, where Spain has established a factory. The new possession has been placed

under a Governor, subordinate to the Captain-General of the Canary Islands.

Sahara Railway. In our last edition we gave some particulars of a French scheme for a railway across the Sahara Desert in the direction of Lake Tchad. No actual work appears to have been done up to the end of '90. A Paris telegram of Oct. 14th, '91, reported that according to statements by French merchants arriving at Marseilles from Tripoli, two English engineers had been making surveys, and reported that the south of Tripoli was unsettled, and that the Soudan round Lake

Tchad was the prey of the Senoussi. Railway enterprise in the country was at present unpromising.

St. Albans, Rt. Rev. John Wogan Festing, Lord Bishop of. This see was founded in 1877 by a readjustment of the dioceses of Rochester and Winchester. His lordship, the 2nd bishop, was b. 1835. He was ed. at Wells Theological Coll. and Trin. Coll., Camb., graduating B.A. '60 and M.A. '63. He was ordained deacon in '60 and priest in '61. His ecclesiastical appointments are as follows: Curate at Christ Church, Westminster, '60-'72; vicar of St. Luke's, Berwick Street, '73; vicar of Christ Church, Albany Street, '78; rural dean of St. Pancras '87; prebendary of St. Paul's '88. Dr. Festing's appointment in May '90 to the **Bishopric**, on the resignation of Dr. Cloughton. The bishop has acted as treasurer of the Univ. Mission to Central Africa, and is an able preacher and organiser. Consecrated in St. Paul's June 24th.

St. Andrews University, founded 1411, is thus the most ancient of the Universities of Scotland. It included three separate colleges and corporations: (1) **St. Salvador's** (1450), (2) **St. Leonard's** (1512), and (3) **St. Mary** (1537). In 1747 the two first-named were united and took the faculties of arts and medicine; **St. Mary** being devoted to theology. **Lord Rector**, Marquis of Dufferin and Ava. **Chancellor**, the Duke of Argyll; **Principal**, J. Donaldson, M.A., LL.D. Jointly with Edinburgh University it returns a representative to Parliament—the present member is Sir Charles Pearson. **Registrar**, Mr. J. Maitland Anderson. — **Degrees**. **M.A.** (hood black silk, with red silk lining); **D.D.** (h. violet purple silk or cloth, with white satin lining, to represent the old ermine lining); **LL.D.** (h. scarlet silk or cloth with white satin lining); **M.D.** (h. crimson silk or cloth with white satin lining); **D. Sc.** (h. amaranth silk or cloth with white satin lining). The **Bachelors** in the several faculties—divinity, arts, medicine, and science—have the hoods of their faculties with the gown and cap of M.A. A degree of **L.L.A.** is also granted to women; local examinations held. In Sept. '91 Mr. Henry Jones, formerly Professor of Logic and Philosophy in Univ. Coll. North Wales, became Professor of Logic and Mathematics at this University.

St. Asaph, Rt. Rev. Alfred George Edwards, Lord Bishop of. The see was founded in 1143. Income £4200. His lordship is the 6th bishop. He was b. 1849, and is the youngest prelate on the bench. Ed. at Jesus Coll., Oxon., graduating '74, and was ordained deacon in the same year. Curate of Llandinog and second master of Llandoverly College, '74-'5; Head Master of the same college, '75-'85; Vicar of St. Peter's, Carmarthen, '85; elevated to the episcopal bench '89. Was presented with a costly pastoral staff (Sept. 4th). He took a prominent part in the Church Congress in '91.

St. Christopher, or St. Kitts. A British West Indian island, forming with **Nevis** and **Anguilla** a Presidency of the federal colony of the **Leeward Islands**. Capital, **Basseterre**. The local government is that of a Crown colony, though representatives sit in the Federal Council of the Leeward Islands. A President is the chief official. For statistics see **BRITISH EMPIRE**, etc. (table).

St. Clair Tunnel. See **SARNIA**.

St. Davids, Rt. Rev. William Basil Jones, Lord Bishop of. This see, founded at an early

date, is said to have been originally archiepiscopal. Present income of the see £4,500. His lordship, the 117th bishop, was b. 1822, and ed. at Shrewsbury and Trin. Coll., Oxford. Was Scholar of his college and Ireland Scholar '42. Proceeded M.A. '47 and D.D. '74. Ordained by the Bishop of Oxford deacon '48, priest '53. **Archdeacon of York** '67-'74, Canon Residentiary in York '73-'4, besides other offices held at various times. Consecrated to the bishopric of St. Davids '74. Has written, jointly with Mr. Edward Freeman, "The History and Antiquities of St. Davids," and contributed to Dr. Smith's "Dictionary of the Bible" and the "Speaker's Commentary."

St. Giles' Christian Mission. This Mission carries out the following work:—(1) A free breakfast is provided every morning for all prisoners released from London prisons. (2) Conversation is carried on with boys in custody in their cells, and they are aided on their release. (3) Convicts are assisted on their discharge from prison. (4) Homeless and destitute women and girls, found wandering by the police, are received into Mission homes. (5) Poor children are benefited by residence for a time in the children's holiday home in the country. **Superintendent**, Mr. Geo. Hatton, 4, Ampton Street, Gray's Inn Road. **Seco.**, Mr. Wm. Wheatley, 28 and 29, Brook Street, Holborn.

St. Helena. Discovered by the Portuguese on St. Helena's Day, 1502. Is an island belonging to Great Britain in the South Atlantic, 1140 miles from the African coast. Port and capital is **Jamestown**. For statistics see **BRITISH EMPIRE**, etc. (table). From 1815 till 1821 was the place of exile of Napoleon, and in 1834 came finally under the Crown.

"St. James's Gazette." An evening review and newspaper; founded in 1880; in politics it is a constitutional and independent Conservative organ. In addition to articles on the political questions of the day, it contains interesting papers and sketches on social, literary and scientific topics, an epitome of the news of the morning, and the latest sporting, financial and general intelligence of the afternoon. Its literary standard has usually been considered high. The late Sir Henry Maine wrote frequently for it. Editor, **Mr. S. J. Low** (q.v.). Office, Dorset Street, Whitefriars, E.C.—**"St. James's Budget,"** a weekly edition of the above, circulates widely in the provinces and in the Colonies and India.

St. Lawrence Canal System. Mr. Thomas Monro, M.I.C.E., it was reported in February '91, had been sent over by the Canadian Government to examine and report upon the Manchester Ship Canal (q.v.) in reference to the St. Lawrence system. It was then anticipated that in about three years vessels of over 2000 tons will be able to descend from Duluth, Port Arthur, or Chicago, through the lakes, and the Welland and St. Lawrence canals to Montreal, the channel from thence to the sea having been deepened so as to give 27½ ft. at low water.

St. Lawrence River Bridge. A project for crossing the river St. Lawrence at Quebec has long been talked of, and in May '89 it was reported that arrangements were being made to carry it out. In consideration of the ocean traffic to Montreal, it was necessary to adopt the high level with long spans, and the depth of water presented another difficulty. Plans had, however, been prepared for a cantilever bridge at an estimated cost of 10,000,000 dollars.

The bridge will open up a direct communication between the Canadian Pacific line and the Intercolonial Railway from Quebec to St. John and Halifax, giving the Canadian Pacific an uninterrupted transcontinental line through the Canadian territory for the entire length. In Jan. '91 it was reported that, in answer to a deputation from the company chartered to construct the bridge, Hon. H. Mercier, the Premier, said that if the Federal Government and the Quebec City Corporation declined to assist them, the Provincial Government would help. He was resolved that the bridge should be built and also a tunnel under the heights of Abraham, connecting the bridge with the lower levels north of the citadel; new plans had been prepared.

St. Leger Stakes. See TURF.

St. Leonard's (Hastings) New Pier. This pier was opened on Oct. 28th, '91 by Lady Brassey. The pier starts from the Parade opposite the Western Colonnade, and is carried out on three sets of piles to the pavilion, 200 ft. from the Parade. From here the deck is continued on six sets of piles to the pier head, the total length being 950 ft., a few feet longer than the Hastings pier. The cost of the undertaking was about £30,000.

St. Lucia. A British West Indian island forming part of the Crown colony of the Windward Islands. Capital, Castries. An Administrator presides over local affairs. The whites are mostly French Creoles; the dominant religion Roman Catholic, and education chiefly so; the law is based on old French codes. For financial statistics, etc., see BRITISH EMPIRE, etc. (table).

St. Michael and St. George, the most Distinguished Order of, was instituted in 1818, and enlarged in '68, '77, and '87, and is the order to which subjects of Her Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It consists of the Sovereign, a Grand Master (the Duke of Cambridge), and three classes of members:—

G.C.M.G. . . . Knight Grand Cross.

K.C.M.G. . . . Knight Commander.

C.M.G. . . . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." The first class is to consist of 65 members, exclusive of honorary members and princes of the blood, the second of 150, and the third of 260 members. The motto of the Order is "*Auspicum melioris avi*" ("A pledge of better times"). See KNIGHTHOODS CONFERRED DURING '91.

St. Patrick, Most Illustrious Order of. Established in 1783 by George III., and is to consist of the Sovereign, a Grand Master, who is the Lord Lieutenant of Ireland for the time being, and twenty-two Knights. Its abbreviation is K.P.; its badge a sky-blue ribbon, with motto *Quis separabit?* ("Who shall separate?"). There are, at present, twenty-nine K.P.s, including the sovereign and princes of the blood, and the Lord Lieutenant of Ireland, and subjoined is a list of them:—

The Sovereign.

Lord Lieutenant of Ireland.

Prince of Wales. Duke of Connaught.

Duke of Edinburgh. Duke of Cambridge.

Duke of Clarence. Prince Edward of Saxe-

Weimar.

Earl of Dartrey. Earl of Dunraven.

Earl of Cork. Earl of Carylfort.

Marquis of Dufferin Lord Carlingford.

and Ava. Earl of Howth.

Earl of Charlemont. Lord Monteaigle.

Marquis of Drogheda. Viscount Wolsley.

Marquis of Waterford. Marquis of Headfort.

Earl of Gosford. Marquis of Ormonde.

Viscount Powerscourt. Earl of Erne.

Earl of Kenmare. Earl of Kilmorey.

Earl of Listowel. Earl of Rosse.

Chancellor of the Order, the Chief Secretary for Ireland; Registrar and Ulster King of Arms, Sir J. Bernard Burke, C.B.; Secretary, G. Francis W. Lambart; Genealogist, H. Farnham Burke; Usher of the Black Rod, Col. J. Caulfield.

St. Paul's School, London. Founded A.D. 1509 by John Colet, B.D., Dean of St. Paul's. It is governed under the provisions of a scheme of the Charity Commissioners, dated July 4th, '79. The school consists of 153 foundation scholars, elected by competitive examination, and of so many capitation scholars, as the governors may from time to time decide. The capitation scholars pay a tuition fee of £24 9s. a year. The foundation scholars are exempt from fees. There are now 600 boys in the school, and 33 masters. The governors give annually seven exhibitions, varying in value from £80 to £40, to the scholars proceeding to Oxford and Cambridge, and one exhibition of £50 for two years for a boy proceeding to Royal Academy, Woolwich. Among the alumni of St. Paul's were Milton, Marlborough, etc. Motto, *Fide et literis*. High Master, F. W. Walker, M.A. Bursar, S. Bewsher.

St. Vincent. A British West Indian island forming part of the Crown colony of the Windward Islands. Capital Kingstown, pop. 5593. Chief products, sugar, molasses, rum, and arrowroot. The fisheries are abundantly productive. —An Administrator presides over the local government. For financial statistics, etc., see BRITISH EMPIRE, etc. (table).

Sala, George A. was b. in London in 1828. His father was an Italian, and his mother, a popular singer, was of West Indian origin. Mr. Sala began his literary career in *Household Words* under the auspices of the late Charles Dickens. He was one of the founders of *Temple Bar* magazine, of which he was for some time editor. To this and other periodicals he contributed "The Seven Sons of Mammon," "Captain Dangerous," "Twice Round the Clock," and many other tales and sketches. For many years Mr. Sala has been a leader writer and special correspondent of the *Daily Telegraph*, which journal he has represented at most of the celebrations of historical importance that have taken place in England, Europe, and America during the last thirty years.

Sallsbury, John Wordsworth, D.D., Lord Bishop of (founded 1042), son of the late Bishop of Lincoln, and grand-nephew of the poet Wordsworth, was b. at Harrow 1843, and ed. at Ipswich, Winchester, and New Coll., Oxford, graduating in '65. Ordained deacon in '67 and priest in '69. It is remarkable that Dr. Wordsworth has never held any actual parochial office, though he did good work in various parishes, the whole time having been passed in academical and cathedral appointments. He was Fellow and college tutor of Brasenose, proctor, Grinfield lecturer, select preacher, Bampton Lecturer, Examiner in the Theological Schools, and Examining Chaplain to his father.

In '83 he was appointed Canon of Rochester and **Oriel Professor of Interpretation of Scripture**, and **Bishop of Salisbury '85**. Dr. Wordsworth is a moderate High Churchman, and has written several theological and classical works, the best known of which are the Bampton Lectures for '81.

Salisbury, Robert Arthur Talbot Gascoyne Cecil, K.G., 3rd Marquis of (creat. 1789), was b. at Hatfield in 1830. Educated at Eton and Christ Church College, Oxford, and—as Lord Robert Cecil—was elected for the family borough of Stamford in '53. He received a place in Lord Derby's ministry of '66 as **Secretary of State for India** ('66-7), under the title of Lord Cranborne, which he assumed on the death of his elder brother. Owing to certain divergencies of opinion on the question of the extension of the franchise, to which he was opposed, Lord Cranborne separated himself for a time from his political associates; but on taking his place in the House of Lords at his father's death in '67, as Lord Salisbury, he returned to his old party associations, and soon took rank as the foremost debater of the Upper House. In '64 he was elected **Chancellor of the University of Oxford**. He gradually assumed a high position of authority on Indian and foreign affairs; and when Mr. Disraeli resumed office as Premier in '74, Lord Salisbury became **Secretary for India** ('74-8). He was despatched to Constantinople in '76 to take part in the Conference which was expected to settle the matters in dispute between Russia and Turkey. The Conference failed to attain this result, and the war broke out which ended by the treaty of San Stefano. Lord Salisbury accompanied Lord Beaconsfield to the **Berlin Congress**, which assembled for the purpose of modifying the provisions of that Treaty. The action of the British plenipotentiaries at this Congress principally conduced to effect such modifications as were favourable to Turkey. He was **Secretary for Foreign Affairs** ('78-80). Upon Lord Beaconsfield's death, in '80, Lord Salisbury became the recognised leader of the Conservative party; and when the Gladstone Ministry resigned office in June '85, Her Majesty summoned Lord Salisbury to Balmoral, to form a new ministry, of which he became **Premier**, as well as **Secretary for Foreign Affairs**. The new administration, however, did not last long. The general election in Nov. of the same year did not result favourably to the Government, and a resolution moved by Mr. Jesse Collings, immediately after Parliament met, asking the Government to take up the allotments question, being carried, resulted in the **resignation** of the Government. Mr. Gladstone succeeded Lord Salisbury, but he, too, had a short lease of power, and when the division on the second reading of the Home Rule Bill was taken, on the 8th of June, the Ministers were defeated by a majority of thirty. The general election which took place in the following month was fatal to Mr. Gladstone's Government; the Premier and his colleagues resigned, and Lord Salisbury was sent for by the Queen. His lordship was said to have been desirous of associating the Marquis of Hartington (q.v.) with him in the Government, and was prepared to waive his claims to the Premiership in favour of the leader of the Liberal Unionists. Lord Hartington, however, declined, but promised the general support of himself and his friends to the Government.

A short session of Parliament followed; and in the recess a speech by the Marquis of Salisbury on the **Bulgarian question** attracted much attention, from the countenance it appeared to give to the resistance by Austria of Russia's pretensions to interfere in the Balkan Peninsula. Rumour, indeed, credited his lordship with having entered into some kind of arrangement with Austria-Hungary, by which, in the event of war, England would take the field against Russia. The premier, on the resignation of Lord Randolph Churchill, offered the Chancellorship of the Exchequer (Dec. '86) to Mr. Goschen, who accepted it. Lord Salisbury's tenure of office during the Jubilee year of the Queen's reign will be memorable in his lordship's family for the honour which **Her Majesty** paid him by going in person to visit him at Hatfield. In May '88 Lord S. introduced a Bill into the House of Lords for the reform of that Assembly and the creation of life peers. In the same month his lordship appeared as a witness in the action for libel brought by Mr. Peters against Mr. Bradlaugh. In Nov. '88 his lordship and Lord Hartington were entertained at a banquet by a number of Irish Nonconformists. On the 20th of the same month Lord Salisbury visited Edinburgh, and was warmly received. An action for libel, brought against his lordship by Mr. William O'Brien, and tried before Mr. Justice Stephens at the Manchester assizes, in July '89, broke down. Lord Salisbury was an occasional contributor in his younger days to the *Quarterly Review*, but he now seeks relaxation from the cares of office in scientific rather than in literary pursuits, experimental physics being his favourite study. He spends much of his time in his laboratory at Hatfield, and has lately interested himself in the application of electricity to practical purposes on his estates. His lordship spoke, with a personal interest in the subject, at the banquet to commemorate the jubilee of the Chemical Society (Feb. 24th, '91). Lord S. delivered an important speech on the occasion of the annual grand habitation of the Primrose League (April 21st), in which he said that the membership of the Primrose League was 1,002,097. Was presented to the **freedom of the city of Glasgow** (May 20th), and delivered an admirable speech on foreign policy. In July he had the honour of entertaining the **German Emperor** at Hatfield, which was also visited by the Prince of Naples. He spent the recess at his French chalet.

Salt. See TRADE, '91.

Salvage Corps. See LONDON SALVAGE CORPS.
Salvation Army. A home and foreign missionary society with a quasi-military organisation, having for its object the salvation of the more degraded classes both at home and abroad, which it seeks to reach by special means, including out-door processions accompanied with banners and music, and by addresses in halls, theatres, and other public buildings. **Originated** in the year 1865 by William Booth (q.v.), then a Methodist minister, on a visit to London, the movement was called the Christian Mission until, in 1878, the present name was adopted. The Army is now established in thirty-two countries or colonies, where, under the leadership of about 10,780 officers, whose lives are entirely devoted to the work, it holds an aggregate of about 13,000,000 religious meetings every year. It has laid literature under heavy contribution to the success which has attended

its efforts. The Army has thirty-three weekly newspapers, with a circulation of 41,000,000 copies; fifteen monthly magazines, with a circulation of 2,826,000—the total annual circulation of Army literature being 43,826,000. Of these publications perhaps the *War Cry* is best known. The Army has accumulated property to the extent of about £825,000, and pays rentals to the amount of £225,000 per annum. Its total income, from all sources, amounts to about £800,000. Balance-sheets are issued annually from the International Headquarters, 99, 101, and 103, Queen Victoria St., E.C. The Home Office is at 179, Queen Victoria St., and the International Trade Headquarters are at 98, 100, and 102, Clerkenwell Rd., E.C. There are eighty-eight training garrisons at home and abroad, and twenty-four homes of rest for officers. An Auxiliary League exists, comprising persons in sympathy with the Salvation Army, although not enrolled as members. Of the social work of the Army, which has been attended with great success, there are at present eight branches. Rescue homes, for fallen women, exist to a number of forty; there are fifty-eight "slum posts." Labour Bureaux—a new feature in the social reform department of the Army—has done good service. Other departments of work include prison-gate brigades, food depôts, shelters, factories, and homes for inebriates. In Oct. '90, the publication of Gen. B.'s book, entitled "In Darkest England, and the Way Out," gave rise to much interest in the methods suggested therein for the alleviation of the outcast. The various schemes which were proposed in this important work included rescue homes, over-sea colonies, industrial villages, etc. To General Booth's appeal for £100,000, with which to commence, promises exceeding that sum were received, while the attitude of social reformers towards his theories was decidedly favourable. During '91 the twenty-sixth anniversary of the Army's foundation was celebrated at the Crystal Palace. There were 62,000 persons present. General Booth departed on a tour round the world in the summer, and met with extraordinarily hearty welcomes in Africa and Australia. Riots at Eastbourne were productive of much public discussion as to the legal position of the Army in continuing its band-playing on Sundays. Mrs. Booth's decease was commemorated by a solemn service at the Crystal Palace.

Samoa Islands. This group, in the western Pacific, consists of ten inhabited and two uninhabited islands, with an aggregate population of 35,000 souls; it lies north-east of the Fiji group (*q.v.*). The largest is *Savaii*, described as being twice the size of the Isle of Wight. Baron Pilsach, president of the Municipal Council and the King's chief adviser, resigned his office (Oct.) because some white residents addressed themselves to the king direct instead of through him. Malietoa, the reigning chief, proclaimed Mataafa and his followers, who had shown considerable disaffection, to be rebels, and confiscated their lands at the beginning of November.

Sandown Race Meeting. See TURF.

San Juan River. See NICARAGUA SHIP CANAL.

San Salvador, a republic of Central America, bounded on the south by the Pacific and on the north by Guatemala and Honduras, is governed by a President, Senate, and House of Representatives, elected respectively for

four years, three years, and one year, by married men, or those who can read and write and support themselves. The elections are, however, frequently interrupted by pronunciamientos or military nominations. Area 7728 sq. m.; pop. ('88) 651,130. Capital San Salvador, pop. 13,274. Estimated revenue in '89 \$3,546,539; expenditure \$3,616,472. No foreign debt; internal debt about \$6,013,300. Army, including militia, about 14,000. War with Honduras in '72 and '73.—'91. Congress ratified the treaty of peace between San Salvador and Guatemala. A terrible earthquake occurred (Sept. 10th). The towns of Analquito and Comasagua were completely destroyed, and Cojutepeque, Santa Tecla, San Pedro, and Masahen were practically ruined by the shaking. Many persons were killed. A formal treaty of peace was signed between San Salvador and Honduras (Oct.). See DIPLOMATIC.

Sant, James, R.A., was b. 1820. He first exhibited "fancy subjects," generally of single figures, and frequently of children; and these, being engraved, made him widely known. As examples may be mentioned the "Infant Samuel," the "Infant Timothy," "Little Red Riding Hood," and "Dick Whittington." Mr. Sant's later years have been almost entirely devoted to portrait painting, his style being thoroughly graceful and refined. He excels particularly in his pictures of children. Appointed Principal Painter in Ordinary to Her Majesty. Elected R.A. '70.

Santa Cruz, or Ste. Croix. A West Indian island, the largest of the Virgin group. Capital Christiansted.—It is governed, in connection with St. Thomas and St. John, by an officer appointed by the Danish Crown. Intrusted by France to the Knights of Malta, 1651; purchased by Denmark, 1733; slavery abolished, 1848; coolies employed, 1863.

Santley, Charles, was b. at Liverpool 1834. Studied in Italy, and on his appearance in London in '57 at once took high rank, his first great success being achieved at Covent Garden in '60, when he took the part of Rhineberg in *Lurline*. He is a favourite baritone on the operatic stage of almost every European capital, and ('89-90) achieved a series of triumphs in Australia. He appeared, for the tenth time, at the Handel Festival in June '91, and sang with great vigour.

Sarasate (y Navasenes), Pablo Martin Melitor, the famous violinist, was b. at Pampeluna, on March 10th, 1844. Before he had attained his twelfth year he entered the Paris Conservatoire, and for violin tuition was placed under M. Alard. Having gained high honours, three years later ('59) Sarasate made a professional tour of the Continent. He did not, however, reach London until '74, when he made his *début* at one of the Philharmonic Society's concerts, subsequently playing at the Musical Union. He was here again in '77 and '78, since which time he has been a frequent visitor. The orchestral concerts given under his name (begun at St. James's Hall in '85) have become a welcome feature of the London musical season. At the Birmingham Festival of '85 Señor Sarasate introduced a violin concerto specially written for him by Dr. Mackenzie. At the Leeds Festival of '89 the same player was intrusted with Dr. Mackenzie's violin piece "Pibroch," the favourable verdict passed upon which has been ratified elsewhere. He gave a series of recitals during the season of '91.

Sarawak. A state in the island of Borneo, which has recently (1888) come under the virtual protectorate of Great Britain. Area about 40,000 sq. m., pop. 280,000. Capital Kuching. Sea-board extends 360 miles. Revenue ('88) \$361,615, expenditure \$347,482; imports £344,044, exports \$124,260. The government was intrusted to Sir James Brooke in '41, who ruled as rajah till '68, when he was succeeded by his nephew, Charles Brooke, the present rajah. Under the just and equitable rule of the Brookes, Sarawak has been reclaimed from barbarism.—'91. Rajah Brooke proclaimed his son, seventeen years of age, as heir-apparent, under the title of Rajah Muda.

Sardou, Victorien, French dramatist, was b. at Paris Sept. 7th, 1837. He first studied medicine, but afterwards became a littérateur. His first dramatic production, "La Taverne des Etudiants," was a failure, but his next works, "Monsieur Garat" and "Les Prés-Saint-Gervais," which he wrote for Dejazet in '60, were successes. In '61 his comedy "Les Pattes de Mouche" brought him prominently before the public. He also wrote for Madame Bernhardt (*q.v.*) "Fedora" and "Theodora"; and "La Tosca," which was brought out at the Port Saint Martin Théâtre in '87. In Feb. '89 his comedy entitled "Marquise" was produced at the Vaudeville. M. Sardou was elected a member of the French Academy in '77. His play "Thermidor," which was produced in Jan. '91, was prohibited by the French Government in the interests of public order.

Sarnia Tunnel (Port Sarnia, Ontario). This tunnel was constructed by the Grand Trunk Railway Co. of Canada under the St. Clair River, between Port Huron and Port Sarnia, to connect that line with the Chicago and Grand Trunk Railways. The tunnel was formally opened on Sept. 19th, '91, by Sir Henry Tyler, Chairman of the Grand Trunk, when the following complete description was published:—Length 6026 ft., or 11,553 ft. including excavated approaches; diameter 20 ft., lined throughout with cast-iron plates 2 in. in thickness, the lining altogether weighing 28,000 tons. The boring of the tunnel proper was done by means of large and heavy wrought-iron shields, with sharp cutting edges, driven forward by hydraulic rams of enormous power. From the time when the shields were lowered in position at the two proposed entrances, till they met in the middle, the work occupied just a year. Over 880 tons of bolts and nuts were used in the lining. The road bed (one line of rails) under the river is practically level, but the gradient of the approaches is 1 in 50; the rails are 100 lb. per yd., and are of the largest section in use on the American continent; four large 10-wheeled locomotives, weighing 42½ tons each, have been provided. The cost of the tunnel proper is given at £292,000. The total cost was estimated at £517,500, of which the Dominion Government granted £77,625.

Savage Island (or Niue), situated midway between Panama and Brisbane, and virtually a part of the Tongan group. The circumference of the island is 36 miles, and its height 2000 ft. Practically a huge coral reef, broken here and there, forming convenient inlets. It has recently received the protectorate of Great Britain in response to the request of the natives.

Savings Bank Act, '91. See SESSION, sect. 110.
Saxe-Coburg, Duke of. See FERDINAND, PRINCE.

Saxony. For Ministry, etc., see DIPLOMATIC.
Sayce, Rev. Archibald Henry, the distinguished comparative philologist and orientalist, was b. at Shirehampton 1846. Educated at Queen's Coll., Oxford; elected a Fellow '69. He subsequently became Senior Tutor. He was a member of the Old Testament Revision Company, and, in addition to his works on comparative philology, he has written many books, embodying the results of his researches in the languages and literature of Assyria, Babylonia and Chaldea. Hibbert lecturer '87.

Schlieffen, Lieut.-Gen. Count Alfred, the Chief of the Grand General Staff of the German Army, was b. 1833. Distinguished himself in connection with the Topographical Bureau, and afterwards as military attaché in Paris. In the course of his military service he has served with the 15th Corps in Alsace-Lorraine, as colonel of the 1st Uhlands of the Guard, chief of the 3rd Section of the Grand General Staff. In '89 he became Quartermaster-General, and in Feb. '91 he succeeded Count Waldersee as Chief of the Staff. He obtained after the Franco-Prussian war the Iron Cross of the First Class.

School Attendance Committees. The Lord Sandon's Education Act of 1876 prescribed that every district in England and Wales which had not a school board should have a school attendance committee, chosen in boroughs and townships by town councils and urban sanitary authorities, and in all other places by boards of guardians. Thus every inch of the area of England and Wales is covered either by a school board or by a school attendance committee. The chief difference of function between the two bodies is that the attendance committee cannot build or carry on schools; it can only compel attendance in the voluntary schools, and there must be enough voluntary school accommodation for all the children in the district. A large proportion of the rural area is under attendance committees, and there are a few important towns in the same position, including Accrington, Birkenhead, Bury, Cambridge, Cheltenham, Chester, Colchester, Dover, Lincoln, Preston, Southport, and St. Helens. Every year the School Attendance Committee area decreases and the School Board area correspondingly increases. Within the last twelve months 13 new School Boards have been formed, covering an aggregate population of about 150,000, who were in the previous year under School Attendance Committees.

School Board for London. The Elementary Education Act of 1870 specially provided that a school board should be formed for London. The usual preliminary inquiry directed to be made in all other places (whether boroughs or districts) was dispensed with in the case of the Metropolis, because the educational destitution was notorious, and would brook no delay. The first board was accordingly elected only a few months after the passing of the Act, and included such men as Lord Lawrence, who became its chairman; Lord Sandon (now Earl Harrowby), the late Mr. Samuel Morley, the late Mr. W. H. Smith, Professor Huxley, the late Sir Charles Reed, Rev. A. W. Thorold (now Bishop of Winchester), etc.—**School Accommodation and Attendance.** The task before this Board was of the most difficult nature, since its first report to the Education Department showed that, on the most moderate calculation, there existed a deficiency of more than 100,000 school places, and proposed

forthwith to meet this enormous deficiency. Then, too, there was the ever-growing increase of population to be dealt with, itself calling for an annual supply of twelve schools, each for 1,000 children. Its educational progress since 1870 will be seen by the following table, and also the "rate" at the end of each triennial period:—

	Rate at end of each Triennial Period.	School places provided.	No. on the Roll.	Average attend- ance.
1870	—	—	—	—
1873	'89	58,581	59,606	40,481
1876	3'0	146,074	146,031	114,380
1879	5'15	219,291	233,480	185,518
1882	6'15	280,275	295,833	238,205
1885	8'0	357,298	364,140	290,099
1888	8'36	407,636	420,924	328,578
1891	10'69	428,035	450,981	347,857

The following table shows the position of the Voluntary Schools during the same period:—

	School places provided.	No. on the Roll.	Average attendance.
1870	261,158	221,401	173,406
1873	282,936	259,543	195,662
1876	287,116	259,436	199,605
1879	271,314	235,084	182,728
1882	263,617	223,297	174,723
1885	262,175	211,711	168,712
1888	262,022	207,887	162,349
1891	258,329	210,516	167,525

Taking into account the fact that voluntary schools, accommodating 48,019 children, have been transferred to the Board, the above tables show that the work of the Board has been accomplished without any serious detriment to the attendance at the voluntary schools, notwithstanding the fact that the number of children now on the rolls of board schools alone is considerably greater than the total number of children on the rolls of voluntary schools in '70. The London Board labours under peculiar difficulties, owing to the exceedingly high price of land, and the larger salaries paid in London, as compared with provincial towns. The buildings of the Board are fitted with modern improvements and additions have from time to time been made as experience has proved their need. The health of the children has been carefully studied in such matters as lighting, warming and ventilation, under the hope that the care shown in all sanitary matters will have a great influence upon the health of the working classes of London. Outside the school building the Board have shown the same care of the children attending its schools. Extensive playgrounds have in most cases been provided, and wherever there is room, gymnastic apparatus also.—Curriculum (with one or two exceptions, as prescribed by the Code of the Education Department): reading, writing, and arithmetic (and needlework for girls), of course take precedence over all other subjects. The class subjects last year were English, geography, elementary science, history; and needlework for girls. Of these two are compulsory. Besides these there are specific subjects;

viz., algebra, euclid, mensuration, mechanics, Latin, French, animal physiology, botany, principles of agriculture, chemistry, physics, domestic economy, German, book-keeping, shorthand, and the practice of cookery and laundry work, which are only taken by individual children in the upper classes of the school. With regard to the three Rs, it is satisfactory to note the progress which has been sustained for many years. The following table shows the results of the examinations at the end of each triennial period since '73:—

	1876.	1879.	1882.	1885.	1888.	1891.
Reading	87'1	88'2	92'1	95'1	96'0	97'4
Writing	83'7	84'7	90'0	89'2	91'1	93'3
Arithmetic	77'9	80'0	85'4	87'4	89'0	91'1

The Elementary Education Act, '91 (see Session, sect. '89), which came into operation on Sept. 1st, '91, enacts that after the commencement of this Act, there shall be paid out of moneys provided by Parliament a grant in aid of the cost of elementary education in England and Wales at the rate of 10s. a year for each child of the number of children over three and under fifteen years of age, in average attendance at any public elementary school in England and Wales (not being an evening school), etc., etc. The Board, under the above mentioned Act, resolved that all the schools under their control should be free. No fees have therefore been charged at any Board School since the week ended Aug. 28th, '91. The number of teachers employed at Lady Day, '91, was 7450—2476 male and 4974 female. There were also about 1,472 pupil teachers. —Compulsory Attendance at School. The bye-laws of the School Board for London, made under sect. 74 of the Education Act of 1870, provide that children must attend a certified efficient school, or receive instruction in some other efficient manner. In order to enforce these bye-laws, and the additional regulations relating to education and employment contained in the Education Acts of 1876 and 1880, the Board have a staff of visitors (attendance officers) in each division of the Metropolis, whose duty it is to co-operate with the teachers of *all efficient schools* in securing the attendance of children. Prosecutions are only ordered after all other means have failed to secure a child's attendance. The visitors also make inquiries in special cases of non-payment or inability to pay school fees, and also in cases of applications for labour certificates, etc. The number of visitors at Lady Day, '91, employed in the Metropolis (excluding ten superintendents) was 271.—Industrial Schools. The School Board for London have availed themselves of the provisions of the Industrial Schools Acts and the Education Acts, relating to children wandering or not under proper control, or begging or not under proper guardianship, or persistently truanting from school, or charged with felony, etc., with a view to such cases being sent to industrial schools (a) under voluntary management, or (b) under the management of the Board. There are fifty-eight of the former schools with which the Board have agreements. There are also four of the latter schools: (1) a training-

school ship on the Thames, (2) an industrial school at Brentwood, chiefly for cases not suitable for other industrial schools, and (3) two truant schools for boys, one at Homerton and the other at Highbury. In the ordinary course children are committed until they attain the age of sixteen years, with power to the managers to license out to employment at an earlier age, if desirable. In the case of truant schools the children are licensed out, after a short detention, on condition that they attend an ordinary day school. The discipline while under detention has such a deterrent effect that, in the majority of cases, the boys attend school afterwards, but in case of failure the license is revoked and the boy taken back to the school for further treatment. Up to Lady Day, '91, 5,464 cases had been sent to industrial and truant schools, and of these 12,829 had been discharged to friends, employment, etc., leaving at that time 2635 children still in the schools. Wherever possible the parents are called upon by the agents of the Home Office to contribute towards the maintenance of their children in these schools.—**Evening Classes** have now been established in every part of the Metropolis, and the last report of the Evening Classes Committee states that the results of the session '90-91 are extremely satisfactory. The total number of pupils enrolled during the session was 31,015; average number on rolls, 17,037; and average attendance, 10,118. The Board formerly consisted of 49 members, but the number is now fixed at 55. The election of the eighth Board took place on Nov. 26th, '91. The votes obtained by the candidates are enclosed in brackets.—**Constitution of the Board:** City of London.—Sir Richard Temple, Bart., M.P. [10,391]; Sir Joseph Savory [10,249]; Miss R. Davenport-Hill [6,193]; Mr. W. H. Key [4,855]. **Chelsea**—Mr. Thomas Huggett [15,423]; Mr. J. Athelstan L. Riley [14,248]; Mr. F. Davies [13,513]; Dr. J. H. Gladstone [13,294]; Mr. Geo. White [8,086]. **Finsbury**—Mr. G. B. Clough [14,660]; Mr. T. Smith [11,931]; Mr. J. J. Stockall [10,690]; Miss Eve [10,642]; Mr. J. W. Sharp [10,590]; Mr. W. Roston Bourke [9,080]. **Greenwich**—Canon Rhodes Bristow [14,913]; Rev. William Blackmore [12,530]; Rev. J. Wilson [11,818]; Mr. Henry Gover [10,864]. **Hackney**—Mr. John Lobb [14,054]; Mr. J. C. Horobin [12,951]; Mr. F. Howse [12,538]; Rev. B. Meredyth Kitson [12,421]; Rev. Stewart D. Headlam [10,909]. **East Lambeth**—Rev. Andrew A. W. Drew [9,508]; Mr. J. C. Laing [8,614]; Mr. Geo. C. Whiteley [6,607]; Lord Sandhurst [6,023]. **West Lambeth**—Rev. Allen Edwards [21,560]; Rev. William Hamilton [20,985]; Mr. John Sinclair [18,158]; Mr. William H. Kidson [16,466]; Rev. Thos. B. Dover [13,733]; Mr. Hy. Lynn [13,721]. **Marylebone**—General F. J. Moberly [17,864]; Rev. C. J. Ridgeway [17,649]; Mr. J. R. Diggle [16,821]; Rev. J. J. Coxhead [16,222]; Sir W. Cameron Gull, Bart. [15,426]; Hon. Lyulph Stanley [14,344]; Mr. E. Barnes [14,219]. **Southwark**—Rev. E. Buckley [7,772]; Mr. J. H. Dumphreys [5,791]; Rev. J. C. Carlike [5,625]; Rev. W. Copeland Bowie [5,327]. **Tower Hamlets**—Mrs. Ruth Homan [14,257]. **Mr. G. L. Bruce** [12,006]; Rev. E. T. Plummer [11,494]; Rev. Edward Schnadhorst [10,083]. **Westminster**—Lord Colchester [10,552]; General Sim [10,254]; Mr. D. Laing [9,284]; Mr. W. Winnett [9,219]; Mr. H. N. Bowman Spink [9,126]. The result of

the poll places the Moderate party in a majority of three or four. Perhaps the most distinctive feature in the election is the defeat of Mr. Helby.

School Board for London Superannuation Bill. See SESSION, sect. 111.

School Boards, The. There were (Oct. '91) 2300 school boards in England and Wales, covering a population of 16,600,000, leaving a population of about 9,375,000 under school attendance committees (old census). Wherever there is not enough efficient public elementary school accommodation in a district for all the children a school board must be formed, whose first duty it is to make good the deficiency of accommodation by opening board schools. Districts without a deficiency of accommodation may have a school board by passing a vote to that effect by a majority of the town council in boroughs, or of ratepayers in districts which are not boroughs. Thus it happens that there are school boards in some districts without board schools. It is one of the chief duties of the school board to compel the attendance of all the children of school age at an efficient public elementary school, whether a board school or a voluntary school. School age is from 5 to 14, with exemptions from compulsory attendance for children who have passed certain standards of proficiency. There must be accommodation also for as many children as present themselves under the age of 5 and over the age of 14, except for such scholars as have passed an examination in the 7th standard. There are school boards in most of the large boroughs of England and Wales, but a few remain under school attendance committees. In boroughs with a population of 100,000 and upwards the School Board consists of 18 members; from 75,000 to 100,000, 13 members; from 40,000 to

75,000, 11 members; from 50,000 to 40,000, 9 members; from 5,000 to 30,000, 7 members; under 5,000, 5 members. Any man or woman twenty-one years of age, without any restriction as to qualification or residence, may be elected a member of a school board. The board may not interfere with the management of a voluntary school, but may demand from those schools returns of the attendance of children. The board may take compulsory possession of a site for a board school. It borrows money for building board schools, paying back the whole amount, interest and principal, in fifty years. All other expenses must be met year by year, the deficiency being made up by a school rate. School boards which fail in their duty are declared "in default," and may be superseded by a school board appointed by the Committee of the Privy Council on Education, at the cost of the ratepayers. School Boards in Scotland and the Isle of Man are under separate Acts of Parliament, under which the whole area of those countries are under school boards, and the school attendance committee is unknown.

Schools for Science and Art Act, '91. See Session, sect. 112.

Schreiner, Olive, authoress, is the second daughter of a Lutheran clergyman in South Africa. Came to England when about twenty with the manuscript of "The Story of an African Farm," desiring, above all things, to devote herself to physiological studies. Her manuscript, after various adventures, was submitted to Mr. George Meredith, who saw in it great promise, and suggested certain alterations, which she carried out. The story was then published under the pseudonym of "Ralph Iron," and met with great success. It is a singularly powerful spiritual autobiography, representing the rebound of a lofty, idealistic temperament from the ultra-Calvinism of the Dutch profession into a desolate atheism. The heroine is named after the maiden name of Olive Schreiner's mother, a very remarkable woman, the daughter of a Congregational minister who lived in East London, and who is buried in Bunhill Fields cemetery. Besides the above-named work Miss Schreiner has not published anything beyond occasional parables, into which, however, she has thrown her whole soul. Her parables are much more a part of herself than anything else she has written. A collection of them appeared under the title "Dreams." She has a novel at present well advanced; but she has retired to the back country of South Africa to see the sun once more, and to have leisure to live. The ultimate message of her teaching is that if the world can be saved at all it can only be saved by love. The Schreiners are a gifted family. One of her brothers is a leading member of the bar at Cape Town, and an elder sister is one of the most powerful and devoted of temperance and evangelical propagandists in South Africa.

Science and Art Department of the Committee of the Council on Education is a separate branch of the Education Department. Under it are the Normal School of Science and Royal School of Mines, S. Kensington and Jermyn Street, the National Art Training School, S. Kensington, numerous schools of science and art which receive payments on results, grants in aid, etc., the S. Kensington, Bethnal Green, and Indian Museums, the Science and Art Libraries, the Geological Museum, Museums of Edinburgh and Dublin, and the Geological Survey

of the United Kingdom. It spends sums in circulating science and art objects to country institutions, promotes local effort by conditional aid, and it has its own staff of examiners and inspectors.

Scientific Men and Doctors Deceased (Dec. '90 to Nov. '91). See OBITUARY.

Scientific Progress in '91. See under their various alphabetical headings, e.g., ANTHROPOLOGY, ARCHEOLOGY, GEOLOGY, etc.

Scotch Representative Peers. See PEERAGE.

Scottish Universities Royal Commission.

The following are the members of this Commission: Lord Kinnear (Chairman), Marquis of Bute, Rt. Hon. Earl of Elgin, Lord Kyllachy, Rt. Hon. Lord Sandford, Sir Arthur Mitchell, K.C.B., Sir Chas. Dalrymple, Bart., M.P., Prof. Sir Wm. Thomson, Sir H. Roscoe, M.P., Mr. J. A. Campbell, M.P., Dr. Patrick Heron Watson, Dr. W. G. Blackie, Prof. Butcher, Mr. Donald Crawford, M.P., Mr. Fredk. Fuller, and Mr. Alex. Crum. The secretary of the Commission is Mr. Robt. Fitzroy Bell, 18, Duke Street, Edinburgh.

Seal Fishery (Behring Sea) Act, '91. See Session, sect. 113.

Secretary of State. As early as 1553 there was a secretary to the sovereign, but the office was not nearly so important as it afterwards became, and it is doubtful whether before Henry VIII.'s days the holder was a privy councillor. From the time of Elizabeth until the union with Scotland there were two principal secretaries of state, and Anne added a third for Scotch affairs, but this office was abolished some years later. While there were two principal secretaries they divided home affairs between them, and one was at the head of the northern department, which included Denmark, Germany, Russia, and other countries, and the other was at the head of the southern department, which included France, Italy, Spain, etc.—to the elder of the two ministers being also committed Irish and Colonial affairs. A secretary for America or Colonial affairs was added in the reign of George III., but this office was abolished in 1782; the terms northern and southern were discontinued, and the duties divided into Home and Foreign, the affairs of Ireland and the Colonies being included in the former department. Another principal secretary who was intrusted with Colonial and War Office business was appointed in 1794, and in 1854 a secretary for War was appointed, who in the following year took over the duties of Secretary-at-War—a financial office in connection with military business which had existed for many years previously, and which was in 1863 formally and finally abolished. In 1858 a fifth principal secretary of state was appointed for India, so that there are now five principal secretaries of state. They are appointed without patent, by mere delivery to them of the seals of office by the sovereign; each is capable of performing the duties of the other, and in successive statutes new administrative duties are cast, not upon any one of the five individually, but upon the "Secretary of State," or "one of H.M. Secretaries of State." Each Principal Secretary is assisted by a **Parliamentary Under Secretary** and by a **Permanent Under Secretary**. The five **Permanent Under Secretaries** are: Home Office, Mr. Godfrey Lushington, C.B., salary £2000; Foreign Office, Sir Philip Currie, K.C.B., £2000;

Colonial. Sir Robert G. W. Herbert, K.C.B., £2000; **War.** Sir Ralph W. Thompson, K.C.B., £2000; **India.** Mr. John A. Godley, C.B., £2000. The office of **Secretary for Scotland**, re-created in '85, is not a principal secretaryship, so that although the holder exercises in Scotland many of the powers and duties of the Home Secretary, he is not by virtue of his office a Cabinet Minister. The **Permanent Under Secretary for Scotland** is Mr. Cochran-Patrick, £1500. See **MINISTRY, IRELAND (GOVERNMENT OF), HOME OFFICE**, etc.

Seed Potatoes (Ireland) Act. See **SESSION**, sect. 27.

Selborne, Roundell Palmer, P.C., 1st Earl of (creat. 1872), was b. at Mixbury 1812, and was educated at Trinity Coll., Oxford, where he graduated First Class in Classics '34. He was subsequently elected a Fellow of Magdalen; called to the bar at Lincoln's Inn ('37); became Solicitor-General (July '61); Attorney-General (Sept. '63); resigned (July '66) on the change of Government. Declined the Chancellorship in '68 on account of his disapproval of the disendowment of the Irish Church; acted as counsel for the British Government in the decision of claims under the Washington Treaty ('71); was M.P. for Plymouth (July '47 to July '52, also June '53 to March '57), and for Richmond (July '61 to Oct. '72), when he became **Lord Chancellor**. On the formation of Mr. Gladstone's third Government ('86), Lord Selborne refused to join the Cabinet, owing to his disapproval of the Prime Minister's Irish policy. He has since acted with the Liberal Unionists. Lord Selborne has published one or two books upon Church matters, including "A Defence of the Church of England against Disestablishment" ('86), and "Ancient Facts and Fictions as to Churches and Tithes" ('87). He was elected **Lord Rector of St. Andrews University** '77. He is also the editor of "The Book of Praise from the Best English Hymn-writers."

Selden Society. Inaugurated in '87 "to encourage the study and advance the knowledge of the history of English law." The Society has issued three volumes: "Select Pleas of the Crown, A.D. 1200—1225," "Selections from Manorial Rolls of the 13th Century" (both edited by Professor F. W. Maitland), and "Select Civil Cases of the 13th Century" (edited by Mr. W. Paley Baildon, of Lincoln's Inn); and has in the press its fourth volume (edited by Professor Maitland and W. Paley Baildon), which will consist of four treatises of the fourteenth and fifteenth centuries, containing precedents for the business of manorial and local courts, as well as extracts from some very ancient rolls recently discovered at the Public Record Office, and from the Court Rolls of the Bishop of Ely's Manor of Littleport. The fifth volume, in preparation, will consist of the well known "Mirror of Justices," edited from the MS. at Corpus Christi College, Cambridge, by Mr. J. W. Whitaker, of Trinity College, Cambridge. The Society consists of a **Council** comprising the leading lawyers in England, the Colonies, and the United States, in which it has also local secretaries. **Patron**, H.M. the Queen; **Vice-Patron**, H.R.H. the Prince of Wales; **President**, the Lord Chief Justice of England; **Vice-President**, Lord Justice Fry. **Hon. Sec. and Treasurer**, P. Edward Dove, Lincoln's Inn.

Select Committees. See **PARLIAMENTARY PROCEDURE**.

Self-Help Emigration Society, for benefiting the under-paid and unemployed in Great Britain, by assisting applicants whose character and fitness are assured to emigrate to **Canada, Australia**, and other Colonies. The Society supplements the funds of the intending emigrant, and assists him to obtain his passage. **Introductions** are furnished to the Society's correspondents, who are men of position, seventy in number, resident in Canada, Australia, and New Zealand, and **work** is usually provided for the emigrant on his arrival. During the past seven years nearly 4000 persons have been thus located, at a cost of about £20,000. A large proportion of this cost has been contributed by the emigrants and their friends. **Office**, Memorial Hall Buildings, Farringdon Street, London. Application from intending emigrants should be made by letter to the Sec., Mr. Edward Wilson Gates.

Senegal, or French Senegambia. A French colony of Western Africa, on the Senegal and the Gambia rivers. Capital **St. Louis**. Islands of Goree and Dakar part of the colony. Great part is fertile and rich in produce. Senegal navigable 750 miles up. See **COLONIES OF FOREIGN POWERS**.

Senegambia. A country in the west of equatorial Africa, comprising the regions watered by the Senegal and Gambia, and bounded north by the Sahara, south by Sierra Leone, east by the Joliba or Upper Niger, and west by the Atlantic. This vast region is estimated to contain an area of 400,000 sq. m., and a population of from 10,000,000 to 12,000,000 Berbers, Negroes, and Europeans.

Serjeant-at-Arms. The holder of this office carries the mace when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee. He, by the messengers, notifies committees when the House is going to prayers, and sees that strangers withdraw from beneath the galleries when a division is to be taken. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order, even should they extend to the removal of a member who has been ordered to withdraw and has refused to obey the ruling of the chair. Certain of the galleries, corridors, etc., are under his charge. The **Serjeant-at-Arms** of the House of Lords attends the **Lord Chancellor** with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of **Black Rod** (q.v.). Both **Serjeants-at-Arms** are appointed by the Crown. Mr. H. D. Eiskine is **Serjeant-at-Arms of the House of Commons**, and the corresponding office in the Lords is filled by **Lieut.-Col. Hon. Wellington P. M. C. Talbot**.

"Serpent Fund." See **SOLDIERS' AND SAILORS' FAMILIES' ASSOCIATION**.

Servia. Formerly an autonomous province of Turkey, now a kingdom under Alexander I. (regency) of the House of Obrenovitch. The executive Power is, by the constitution, vested in the king, and the legislative in the king jointly with the Skuptschina or National Assembly. There is also a Senate or Council of State always in session, which examines and elaborates projects of laws, etc. The Skuptschina of 178 members is elected three-fourths by the nation and one-fourth by the king, and is renewed every three years. Besides this there is

a Great Assembly of 338 members, none being royal nominees, called when required to decide vital and constitutional questions. All tax-paying citizens are electors. State religion is Greek Orthodox, but others are tolerated. Education is backward but progressing. Area, 18,750 sq. m., pop. 2,169,750. *Estimated revenue and expenditure for '91*, 57,527,084 d. *Imports ('90)* 38,044,000 d.; *exports* 45,840,000 d. *National debt* about 304,046,000 fr. (For army see FOREIGN ARMIES.)—*History.* King Alexander caused it to be intimated to Queen Natalie that he would not interfere with the arrangements made by his father. Queen Natalie (Dec. 6th, '90) laid her memorandum before the Skuptschina, and in it accused the king of infidelity. The Cabinet (8th) directed M. Patchitch to announce that a memorandum had been received, but that the Chamber had no power to take cognisance of it. The question came before the Chamber (12th), when the Liberals, being unable to secure a regular discussion of the facts stated in the memorandum, left the House in a body, declaring they would not attend any sitting when the memorandum was under consideration. The Radicals then adopted the following resolution: "Considering that there is no law relating to the Royal Houses, the Skuptschina cannot enter upon a discussion of the memorandum on its merits, but requests the Government to place itself in accord with the Regency, so that the disagreeable consequences of the matrimonial differences between the late king and his consort may be removed." The ex-king threatened, if the Constitution were violated to his detriment, to consider it non-existent. M. Steitch, the Servian diplomatic agent at Sofia, was called upon by his government to explain his courtesy to the Princess Clementine of Coburg, in paying his respects to her at the railway station. After the rejection of the memorandum an agitation in favour of the queen commenced, and the Government was obliged to prohibit meetings to organise serenades, or make presentations to her (15th). The queen decided to appeal to the law courts for permission to see her son without the present restrictions. The Government determined to give the queen a caution before taking measures to banish her (18th). On the advice of her friends, the queen determined (19th) not to be intimidated from taking legal proceedings, to remain at Belgrade, and submit only to violence. The treaty between the ex-king and the regents was divulged (22nd), and empowered the former to dismiss the latter, and take the government again if the arrangements as to the queen and King Alexander were broken. Russia presented the Government with 60,000 Berdan rifles, besides cannon, ammunition, sabres, etc. The queen, having appealed to the Russian Court to intercede for her, was informed that the Czar had resolved not to interfere in any way in her affairs. M. Ristitch renewed the offer to the queen, that she should reside abroad, and pay two or three visits to her son annually, during which time she was to be treated with royal honours.—'91. The queen received a large number of visitors at Belgrade on New Year's Day (Jan. 13th). Though King Alexander did not visit her, he promised to do so. The queen assumed the presidency of a Pan-Servian Ladies' Association. She declined to treat any more with the Regency (22nd), and required that all proposals should come from the King Milan himself. The Cabinet

resigned (28th). A revolt broke out among the Arnauts in Drenitza, Old Servia (Feb. 3rd). They were under the leadership of Juril Beg, and attacked Drenitza, burning the governor's palace, the barracks, the church, and other buildings. A society was formed for the purpose of establishing national schools in Bosnia and Herzegovina. M. Gruitch's Ministry resigned (20th). A Bill was passed (March) rendering it penal for a newspaper to attack members of the royal family, the regents, and the Skuptschina. A new arrangement was made between the ex-king and the regency (April), by which the former was to receive 800,000 f. a year and 1,000,000 f. down to enable him to leave the country, and cease troubling his son till he came of age. The Skuptschina expressed the desire (11th) that the queen also should leave the country. A concession was granted to an English syndicate to erect paper mills at Belgrade. M. Patchitch, on behalf of the Government, handed a note to Queen Natalie (May 8th) announcing the resolution of the Skuptschina as to the expediency of her quitting the country, and asking her to announce her intentions. An attempt was made (8th) to expel Queen Natalie from Servia. The streets near her residence were guarded by gendarmes, and the prefect waited on her to try to induce her to leave quietly. This failing, he forcibly conducted the queen to a carriage which was driven towards the quay, where a steamer was waiting. Her Majesty, however, was rescued by the students, who removed the horses, and dragged the carriage back to her residence. The troops fired on the queen's supporters, killing two, and wounding several. Before dawn (19th) Her Majesty was seized and taken by train to Semlin, in Hungarian territory. Numerous arrests were made. The Queen's legal representative at Belgrade lodged (21st) a formal protest against the expulsion, as a violation of the liberty of a Servian citizen. M. Tricoupis was entertained at a banquet at Belgrade (June) by the Patriotic Society of St. Sava. The Government and that of Montenegro signed a treaty placing each other on the most favoured nation footing. The Metropolitan Michael refused to license Pope Marco Petrovitch, who is president of the Radical Club, as vicar of the parish of Belgrade, and became embroiled with the Government. King Alexander left Belgrade (July 22nd) on a visit to the Czar. Thence he went to Ischl (Aug. 11th), on a visit to the Emperor of Austria, proceeding to Lucerne (13th), where he met the ex-King Milan. The two proceeded to Paris (15th). The king returned to Belgrade (Sept. 15th). The Holy Synod (Oct. 4th) passed resolutions in direct conflict with the educational policy of the Government. The resignation of Dr. Vitich, Finance Minister, was accepted (Nov. 3rd); the Ministers of Public Works and Public Worship also sent in their resignations. It was announced (17th) that King Milan had renounced his military rank and all his constitutional privileges. A contract was announced (20th) between the Government and the Steyr factory for the delivery of 100,000 Mannlicher rifles in '92, and 120,000 in '93.

* **Servia, King of.** See ALEXANDER I.

Servian Political Parties. The political life of Servia centres in the *Narodna-Skuptschina* or National Assembly, the members of which may be divided into *Liberals* or pro-Russians,

Radicals or pro-Austrians, and Progressists, who also lean to the side of Austria, while, in common with the Radicals, they aim at the continued independence of the kingdom. There is also the **Greater Skuptschina**, which is four times as large as the National Assembly, and is only convened when it is necessary to take a decision upon vital and constitutional questions. It is elected entirely, however, by the people, every tax-paying Serbian having the right to vote. The **Lesser** (or extraordinary) **Skuptschina** was elected on Sept. 26th, '89; but the mandate expiring in a year, it was succeeded by the ordinary, or **Narodna-Skuptschina**, elected (Sept. '90) for three years. The result of the September elections was to strengthen the **Radicals**, whose numbers were increased from 102 to 113. The **Liberals** obtained eighteen seats, and the **Progressists** two. One of these is held by M. Garaschianine, who retired from all parliamentary affairs shortly after the establishment of the regency in '89. Dissensions having occurred in the Radical Club, M. Gruitch handed in the resignation of the Ministry (Feb. 20th, '91). It was announced, three days later, that a new Cabinet, with M. Patchitch as Minister-President (without portfolio), had been formed. The resignation of M. Milonovitch, Under-Secretary for Foreign Affairs, was notified (March 7th). A Cabinet crisis was averted, in May, by the withdrawal of M. Djaja's resignation of the post of Minister of the Interior. M. Nicolitch, Minister of Public Worship, resigned his office (Oct. 2nd.) owing to differences with the Holy Synod. It was rumoured that M. Patchitch was also about to resign, and accept a diplomatic appointment, but it was afterwards announced that he would take the portfolio of the Minister of Finance. M. Velimirovitch became provisional Minister of Commerce.

Service, Hon. James, was b. at Kilwinning, Ayrshire, in 1823. Emigrated to Victoria in '53, and started as a general merchant. Entered Parliament four years later, and held the post of **Minister for Lands** '59-60, when he introduced the first Bill involving the principle of "selection before survey." Subsequently, as a private member, he carried through the "**Torrens Act**," for facilitating the transfer of real property. Mr. S. has, through a long parliamentary career, been the acknowledged leader of the Free Trade party in Victoria, and was one of the first and most strenuous advocates of Australian Federation. After the coalition of the two parties, in March '83, he became **Premier**, but resigned three years afterwards.

Session, Parliamentary, of 1890-1. [1] The following article gives an outline of the principal business transacted and of the legislation accomplished during the Session of 1890-1. As in last year's **ANNUAL**, **Military and Naval affairs** are dealt with mainly under the headings of **ARMY and NAVY** in the body of the work; but one or two matters of interest which arose on the **Estimates** are noticed in sects. 6 and 37 of this article. So, too, while the provisions of the **New Code** are explained in the article **EDUCATION**, the proceedings on the **Free Education Bill**, with the substance of the new **Act** itself, are set forth in sect. 69. Foreign affairs are dealt with under appropriate headings, but reference is made in various sections to some of the more important matters which came under parliamentary notice. The **Budget proposals** are, as usual, included, with the **Civil Service Esti-**

mates, in the article **FINANCE, NATIONAL**. Affairs in Ireland, changes in the *personal* of the two Houses, and the state of parties, though touched upon below, are, as before, dealt with specially under appropriate headings, the history of the **Parnellite rupture** being narrated under "**IRISH (Nationalist) POLITICAL PARTIES**." For convenience of reference the article, like its predecessors, is broken up into numbered sections, and is divided into three parts—the first containing the **Queen's Speech** at the opening and prorogation of Parliament, and having reference to a number of miscellaneous matters of interest, upon many of which the judgment of the House was taken; the second being devoted to proceedings on bills, and an analysis of the principal Acts passed; and the third to reports of committees.—[2] **The sixth session of the twelfth parliament of Her Majesty** was opened by Royal Commission on Nov. 25th, '90, the Lord Chancellor delivering the **Queen's Speech** as follows:—"MY LORDS AND GENTLEMEN.—No change has taken place in the foreign relations of this country during the short period which has elapsed since the close of the preceding Session. The securities for European peace appear to me to be undiminished. I have commenced negotiations with the King of Italy for the determination of the frontier which separates the territory under British influence in North-East Africa from that which belongs to the protected empire of Abyssinia. A treaty was signed on Aug. 20th, having for its object the ascertainment of the boundaries between British territory in Central Africa and the Portuguese provinces of Angola, Gaza, and Mozambique. It has, however, not received the ratification of the King of Portugal; and, pending further negotiations, a temporary arrangement in regard to the most urgent questions has been concluded between the two countries, which will be laid before you. Negotiations have also been commenced in respect of the Newfoundland Fishery questions, and I trust that a settlement may be arrived at which will be satisfactory to all parties. GENTLEMEN OF THE HOUSE OF COMMONS.—The estimates for the charge of the ensuing year will be submitted to you at the ordinary time. Strict economy will be observed in the preparation of them. MY LORDS AND GENTLEMEN.—The general condition of Ireland has sensibly improved under the operation of the salutary legislation which you have applied to it. But I have learned, with deep regret, that a serious deficiency in the potato crop in certain parts of Ireland threatens the recurrence of one of those periods of severe distress to which the population of the western counties are peculiarly exposed by the industrial and economic conditions under which they live. I trust that the measures of my Government may mitigate the immediate evil, and diminish the probability of its return. It appears to me also desirable, for the increase of contentment and the diminution of political disturbance throughout Ireland, to take measures for augmenting the number of owners engaged in the actual cultivation of the land. A measure having this object in view will be laid before you. Proposals will again be made to you for remedying the difficulties which have arisen from the indirect incidence of the rent-charge upon the land in England and Wales. A measure will be submitted to you for facilitating the transaction in Scotland and Ireland of the more important stages of private legislation affecting those countries. Your

attention will be invited to the expediency of alleviating the burden which the law of compulsory education has in recent years imposed upon the poorer portion of my people. There are several other matters upon which legislation is desirable; but recent experience has rendered it doubtful whether the time at your disposal will, in your judgment, be sufficient for the consideration of many subjects of an important character beyond those to which I have referred. In case time for further legislation should be found, I have directed the preparation of Bills for the enactment of a reformed system of county government in Ireland analogous to that which has recently been put in operation for Great Britain; for the establishment of District Councils; for the extension of facilities for purchasing small parcels of land in Great Britain; for amending the law with respect to the compensation payable by employers in case of injury to persons in their employment; for consolidating and amending the laws relating to public health; for the appointment of a Public Trustee; and for increasing the security of friendly societies and savings banks. In the discharge of the arduous duties which are assigned to you, I commend you heartily to the guidance of Almighty God." The Address in reply to the Royal Message was moved and seconded by Lord Windsor and Lord Ardilaun in the House of Peers, and by Col. Kenyon Slaney and Mr. Forrest Fulton in the Commons. Instead of the long, cumbersome series of paragraphs echoing each succeeding point in the Queen's Speech, the Address moved in the Commons was simply as follows:—"Most GRACIOUS SOVEREIGN,—We, your Majesty's most dutiful and loyal subjects, the Commons of the United Kingdom of Great Britain and Ireland, in Parliament assembled, beg leave to thank your Majesty for the most gracious Speech which your Majesty has addressed to both Houses of Parliament." A general discussion was raised upon the Address, but it was agreed to in both Houses at one sitting.—[3] So far as large measures were concerned, the previous session had proved to be barren of legislative result, and the pre-Christmas sitting was decided upon with the double object of reintroducing two of the leading bills which had been dropped, and of getting so well forward with the business that a prorogation might be possible at the end or even the middle of July. Sittings covering little more than a fortnight (Nov. 25th—Dec. 10th) sufficed for the introduction, second reading, and placing into committee of the Tithe Bill and Purchase of Land and Congested Districts (Ireland) Bill, and for the adoption of the initial measures which the Government recommended as necessary for mitigating Irish distress. When Parliament reassembled on Jan. 22nd the Tithe Bill was proceeded with in committee, and on this measure being disposed of the Irish Bill was taken up, to be succeeded in turn by the Free Education Bill. Other important measures also became law; and, although the Government were unable to bring about the prorogation until a little later in the year than they had anticipated, they could at least congratulate themselves upon a prolific session. The Nationalist rupture was only occasionally and casually mentioned, one of these occasions being when Mr. Healy observed that, however divided members from Ireland might be among themselves, they would always be solid against the common enemy. Mr.

Gladstone was absent from the House, except on one occasion, from and after the end of May, having been seized with influenza (a complaint from which a very large number of other members also suffered), and it being desirable that he should take as much care of himself as possible. Much sympathy was felt for him in the heavy loss he sustained by the death of his eldest son. Mr. W. H. Smith, too, was indisposed for several of the last weeks of the session, so that the Leader of the House and the Leader of the Opposition were both absent from their places simultaneously. The mortality among members was greater than has been known for many years, no less than thirteen hon. gentlemen passing away during that part of the session which fell in '91. Among these were Mr. Bradlaugh, Lord E. Cavendish, Sir C. Forster, Sir R. Fowler, Mr. Cavendish Bentinck, and the O'Gorman Mahon. Mr. Raikes, Mr. W. H. Smith, Mr. Parnell, and Sir J. Pope-Hennessy died during the recess. Mrs. Peel's fatal illness compelled the absence from the chair of the Speaker during the whole of the pre-Christmas sittings. On the death, amid expressions of regret from men of all parties, of that veteran statesman, Earl Granville, it was decided not then to appoint a successor to him as leader of his political friends in the House of Lords. On the occasions of Lord Granville's absence from his place, Lord Kimberley had habitually conducted any communications with the Government which were required by the course of business, and it was agreed that he should continue to discharge this duty with a view to the general convenience. The House of Commons was in Committee of Supply on thirty-one occasions, on the last of which twenty-six votes, representing over £17,000,000, were passed. The Appropriation Bill was introduced on Saturday, Aug. 1st, and Parliament was prorogued by Commission on Wednesday, Aug. 5th, the following being the Queen's Speech on that occasion.—[4] "MY LORDS AND GENTLEMEN,—I am glad to be able to release you from the labours of a protracted session. My relations with all other Powers continue to be those of peace and amity. A Convention has been concluded with the King of Portugal, and has been ratified, defining the boundaries which separate the dominions and the spheres of influence of the two Crowns in Eastern Africa. I have also entered into an agreement with the King of Italy, by which the line has been fixed which separates the Protectorate of Italy in the North-East of Africa from the British sphere of influence, and from the territory of Egypt. I have made proposals to the President of the United States for submission to arbitration of the difference between us as to the seal fishery in Behring's Sea. The negotiations are far advanced, but they are not yet concluded. A suspension of the seal fishery in those waters for the present year has intermediately been agreed to between the two Governments, in order to prevent an excessive destruction of the species, which there is reason to apprehend. The French Chambers have not yet approved of an agreement between myself and the French Republic for reference to arbitration of certain differences with respect to Newfoundland, which was signed during the present year. The ratification of the final act of the Brussels Conference for the repression of the slave trade has also been postponed, and also the ratification of the North Sea Convention for the prevention

of the sale of spirits at sea. GENTLEMEN OF THE HOUSE OF COMMONS.—I thank you for the provision you have made for the charge of the public service. I am glad that you have been able to devote a considerable sum to the mitigation of the burden which the law of compulsory education has imposed upon the poorer portion of my people. My LORDS AND GENTLEMEN,—The various measures which you have adopted in recent years for securing the observance of the law in Ireland, and improving the general condition of that country, have resulted in a marked abatement of agrarian offences, and a considerable advance in prosperity. The steps which have been taken to cope with the distress threatened by the serious failure of the potato crop in the poorest districts of the West of Ireland have proved effectual in averting the great calamity of famine. You have also passed a beneficent measure for dealing permanently with the congested districts of Ireland, which, it may be hoped, will, by fostering agriculture and stimulating the fishing industry, contribute largely to the prevention of similar dangers in the future. The provisions for enabling occupying tenants to purchase their holdings, and the measure for facilitating the transfer of real property in Ireland, will furnish the best guarantee for public security and order, by increasing the class of small proprietors of land. The Act which you have passed for imposing on the owners of land a direct liability for the payment of tithe rent-charge will remove a frequent cause of conflict between the occupiers and the tithe-owners, and will also afford relief to the tithe-payers in those cases in which it is most urgently required. In response to the growing demands of commerce and agriculture, you have completed an important part of the work of simplifying and adjusting railway rates, the results of which will doubtless justify the heavy labour which it has involved. The measures which you have passed for improving the law with respect to factories and workshops, savings banks, and public health will, I am confident, conduce to the comfort and well-being of my people. I trust that in a future session you may be able to examine several questions of interest to which I have drawn your attention, but which the time at your disposal has not permitted you to approach. I pray that, in the discharge of your various duties throughout my kingdom, you may be attended by the guidance and protection of Almighty God.”—[6] MISCELLANEOUS.—*Anglo-Portuguese Convention.* The Marquis of Salisbury (June 11th) laid before the House of Lords the treaty concluded with Portugal, the details of which had just been approved by the Cortes at Lisbon, and which his lordship said did not differ materially from the treaty tabled last August, such differences as there were being chiefly territorial, and not of very wide extent (see heading).—[6] *Army Estimates.* Mr. Hanbury (Feb. 19th) moved that, in view of the increasing competition of civil employment, the present conditions of military service urgently required to be so far modified as to provide a more regular and adequate supply of suitable recruits. Mr. Secretary Stanhope explained that many minor improvements were being made to increase the soldiers' comfort in barracks. He proposed to assemble a committee, somewhat on the lines of the well-known committee presided over by Lord Airey, to consider the question of deferred

pay, and also to refer to it certain questions as to the present terms of service with the Colours and with the Reserve respectively. He mentioned that crime in the Army had rapidly diminished of late years. The motion was withdrawn. In introducing the Estimates the Secretary of State explained the progress made with the three great works under aken during the past three years. The armament of the coaling stations was on the verge of completion, with the addition of Table Bay. The work of barrack improvement was being actively pushed on, and in many directions considerable progress had been made in building. They had also during the past year pushed on in all directions measures for the speedy mobilisation of our defensive forces in time of war; and having taken stock of all available resources and made full provision for the necessities of the garrisons, ports and coaling stations, they were organising all their remaining home forces into an army of defence. The Marquis of Hartington having, on Feb. 23rd, inquired what further steps had been taken to carry out the recommendations of the Commission on naval and military administration, Mr. Stanhope said as to the recommendation for the appointment of a naval and military council, that the Government had taken action in two directions. They had had an assembly of representatives of the different departments, so as to form some idea as to the best mode of dealing with naval and military matters. They had, he thought, been able to arrive at a conclusion that certain outstanding questions between the Army and the Navy might be settled, and by which the working of both departments would be facilitated. There should be better means of communication between the Army and the Navy, especially upon the question of defence; and instead of the old body which had existed, they had got together a much smaller body composed of the highest naval and military officers, who met together as often as was required, and who considered all questions of defence, and discussed the best way of proceeding. They had, therefore, a permanent means of communication between the Army and the Navy upon the question of defence. Of course, if any great question of principle should arise, that would have to be referred to the Committee of the Cabinet which dealt with those matters. The Commission had not recommended the abolition of the office of Commander-in-Chief during the present tenure of office, and the Government were not at present prepared to state their views as to the changes they proposed upon the occurrence of a vacancy in that office.—[7] *Ash Wednesday.* Usual motion for meeting at two o'clock, instead of at noon, carried by 243 to 178.—[8] *Atkinson, Mr.*, objected to the provisions in some of the Railway Rates Bills respecting the carriage of timber, and (July 24th) moved the rejection of the London & North-Western Railway Bill, but did not succeed in finding a second teller. On his challenging another of the bills, the Speaker called upon those objecting to rise in their places, and Mr. Atkinson alone rising it was declared that a division could not take place. The hon. member complained (July 27th) of an entry in the minutes of the previous Friday's proceedings on the Railway Rates Bills that he had frivolously claimed a division; and stated that he had acted in perfect good faith and in the belief that his amendment for the rejection

of the bill would be supported. He also complained that he had not been allowed to bring on notice of motion respecting the Speaker and clerks, which he had placed on the paper, as a matter of privilege. He asked that the entry in the minutes should be expunged, or that a committee of inquiry should be granted. The Speaker said the notice in question could not be brought forward as a matter of privilege, and acquainted the House with the terms of a letter addressed to him by Mr. Atkinson, and also drew attention to the conduct of the hon. member on several recent occasions. On the motion of the Chancellor of the Exchequer Mr. Atkinson was ordered to be suspended from the service of the House and excluded from its precincts for one week. Mr. Atkinson (Aug. 5th) said he had risen on the previous night to move a resolution to expunge from the journals the entry as to his suspension and the entry as to a frivolous division upon which that suspension was based; but he had found that morning that the motion was not on the paper as not having been dealt with, nor on the paper as having been dealt with. He now asked the House to pass the resolution in question. The Speaker said he was under the impression that the hon. member had waived his right to move when called upon on the previous evening. Mr. Atkinson said he would bring the question on next session.—[9] **Betting and Gambling.** Mr. Pickersgill moved (Mar. 17th) "That a Select Committee be appointed to inquire into the growing prevalence of betting and gambling; to ascertain to what extent the statutes dealing therewith are evaded; to consider whether any, and what, amendments should be made in such statutes; and to report their opinion thereupon to the House." Mr. Morton seconded. The Home Secretary believed no practical effect would follow the appointment of the committee. The motion was negatived by 70 to 47.—[10] **Bradlaugh, Mr.** Mr. Hunter (Jan. 27th) in the absence of Mr. Bradlaugh, then as it afterwards proved on his deathbed, moved that the resolution of the House of June 22nd, 1880, setting forth that having regard to the reports of two select committees appointed by the House, Mr. Bradlaugh be not permitted to take the oath or make the affirmation, be expunged from the journals of the House, "as being subversive of the rights of the whole body of electors of this kingdom." The motion was opposed by the Solicitor-General. Mr. Gladstone supported the motion, but suggested that they might omit the final declaration. Sir Stafford Northcote thought his own side might accept the motion so altered, and Mr. W. H. Smith concurred, with the result that the motion so amended was agreed to unanimously. Mr. Bradlaugh died Jan. 30th.—[11] **Church of England in Wales.** Mr. Pritchard Morgan moved (Feb. 20th) and Mr. Dillwyn seconded a resolution "that as the Church of England in Wales has failed to fulfil its professed object as a means of promoting the religious interests of the Welsh people, and ministers only to a small minority of the population, its continuance as an Established Church in the Principality is an anomaly and an injustice which ought no longer to exist." Mr. Gladstone considered that in this matter due regard should be had to the principle laid down by Lord Hartington, when leader of the Opposition, in the case of Scotland—viz., that the wishes of the people ought to prevail with respect to the continuance or discontinuance of

the ecclesiastical establishment. Mr. Raikes spoke in opposition to Mr. P. Morgan's motion, which, after further discussion, was defeated by 235 to 203, or a majority of 32. Mr. Gladstone paired in favour of the motion. [12] **City of London Parochial Charities Act, 1883 (Central Scheme).** Sir R. Fowler moved (Jan. 26th), "That an humble address be presented to her Majesty, praying her Majesty to withhold her consent from the Scheme of the Charity Commission now before the House for the management of the charities comprised in Statements VI. (2) to (15), VII. and VIII. under the above Act." Mr. James Stuart proposed an amendment dissenting from the scheme, so far as it related to the City Church Funds. The amendment was, after discussion in which both it and the original motion were opposed by the Vice-President of the Council, defeated by 110 to 55; Sir R. Fowler's motion being then negatived without a division. [13] **Colonial Conference.** The Earl of Dunraven moved (Feb. 12th) that it was desirable that the Colonial Governments be invited to send representatives to a Conference to be held in London to consider the advancement of trade within her Majesty's dominions, and the formation of a fund for certain purposes of Imperial defence. The Marquis of Salisbury said he could not countenance the project until they had something definite to propose to such a conference. The setting up of a discriminating system in favour of the colonies as against the rest of the world would involve the levying of duties on corn, meal and meat; and what chance was there of inducing the people of this country to accept legislation which would make these necessary articles perceptibly dearer? The motion was withdrawn. On Feb. 17th Mr. Howard Vincent moved in the Commons "that an early opportunity should be taken of inviting the self-governing Colonies to confer with the Imperial Government upon the best means of developing the trade of the Empire." The motion was seconded by Mr. Staveley Hill, and supported by Mr. J. Lowther. The Chancellor of the Exchequer remarked that if the colonists were prepared for a customs union, giving free trade within the Empire, he should say they meant business, but how near were we to any such consummation? The most the colonists had said was that they would keep a wall ten feet high against us, but would make the wall eleven feet high against foreigners. Mr. Vincent offered to withdraw the motion, and permission being refused, Mr. W. H. Smith moved "the previous question," which was agreed to.—**Colonisation** (see sect. 126).—[14] **De Cobain, Mr.** Address for "Copy of warrant for the arrest of Mr. Edward S. W. De Cobain, Member for East Belfast," agreed to on the motion of the Chancellor of the Exchequer, May 12th. Certain statutory declarations subsequently laid on the table. Mr. Goschen moved (July 13th), and it was ordered, "That Mr. Edward Samuel Wesley de Cobain do attend this House in his place upon Thursday, July 23rd. On July 20th the Speaker read a communication which he had received from Mr. Dudgeon, acting as solicitor for Mr. de Cobain, enclosing a medical certificate as to the state of that hon. member's health, and a statutory declaration verifying the same. For the reasons stated in the declaration, Mr. Dudgeon respectfully asked that proceedings under the order of the House might be suspended until Mr. de Cobain was able to return to

the United Kingdom and meet the charge made against him, which, he stated, was without foundation. Mr. Goschen asked for time for consideration before laying any proposal before the House. Mr. Goschen (July 21st) said the Government suggested that the Speaker should endeavour to obtain independent advice as to the state of Mr. de Cobain's health, but the opinion was thereupon expressed by Mr. Healy and others that in the circumstances the matter might well be allowed to stand over until next session. Mr. Goschen promised to consider the matter further, and on July 23rd moved that the order for the attendance of Mr. de Cobain be discharged. Motion agreed to.—[15]

Deer Forests. A motion by Mr. A. Sutherland, declaring that immediate legislation, based upon the recommendations of the Royal Commission of 1884, with regard to deer forests in the Highlands, was urgently called for, was (April 24th) opposed by the Lord Advocate and Mr. Chaplin, and rejected by 120 to 73.—[16] **Derby Day.** On the motion of Lord Elcho it was (May 26th) resolved, by 137 to 109, to adjourn over Derby Day.—[17] **Friendly Societies.** Mr. Howard Vincent moved (March 10th) that the encouragement of more general voluntary provision for sickness and old age, should engage the attention of her Majesty's Government, and that the sound principles of provident insurance should be included in the subjects prescribed by the Education Code for instruction in elementary schools. Sir R. Paget seconded. Sir H. Maxwell said State assistance was not required, and suggested that members should make widely known the superior advantages offered by the Post Office as compared with what were given by certain societies. He notified that the Government had prepared a Bill (see sect. 76) based upon the recommendations of the Committee on Friendly Societies, so far as they dealt with the affairs of collecting societies and industrial assurance companies. Mr. Vincent offered to withdraw the motion, but the House was counted out before this had been done.—[18]

Government Contracts. Mr. Sydney Buxton moved (Feb. 13th) "that clauses be inserted in all Government contracts, requiring that the contractor shall, under penalty, observe the recognised customs and conditions as to rates of wages and working hours that prevail in each particular trade; and that the contractor should, under penalty, be prohibited from sub-letting any portion of his contract, except where the department concerned specifically allows the sub-letting of such special portions of the work as would not be produced or carried out by the contractor in the ordinary course of his business." Mr. Plunkett submitted the following, which was accepted by Mr. Buxton (who thereupon withdrew his own proposal), and agreed to *nem. con.* "that it is the duty of the Government, in all Government contracts, to make provision against the evils recently disclosed before the Sweating Committee, to insert such conditions as may prevent the abuse arising from sub-letting, and to make every effort to secure the payment of such wages as are generally accepted, as current in each trade for competent workmen."—[19] **Granville, Earl.** On the reassembling of the Lords (April 14th) after Easter, Viscount Cranbrook adverted to the great loss which had fallen upon them during the recess, and paid a warm tribute to the public life and distinguished career of the

late leader of the Opposition. The Earl of Kimberley, the Earl of Derby and the Earl of Selborne, also joined in testifying to the high qualities of the late Earl.—[20] **Ground Values, Taxation of.** Mr. James Stuart (March 13th) moved that the freeholders and owners of ground values in the Metropolis, ought to contribute directly a substantial share of local taxation." The Chancellor of the Exchequer interpreted the motion as the bitter cry of rated London for relief, but he warned hon. members that they must expect strong opposition to any new tax they might propose with a view of continuing to carry out London improvements. The Government admitted that the finance of the Metropolis deserved earnest consideration; that it was desirable to consider the question of the division of rates between owner and occupier; that they should examine carefully how far any such division should take place as regarded existing contracts, and under what conditions, and that it was desirable that fresh taxes should be found. But as a committee (see sect. 132) was inquiring into the question, he hoped the House would make no premature declaration regarding it by passing this resolution. Mr. H. H. Fowler maintained, however, that they did not need the light of a committee to decide a question of principle. On a division, Mr. Stuart's resolution was defeated by 149 to 123; majority, 26.—[21] **Habitual Drunkards.** Lord Herschell (June 5th) called attention to the punishment of habitual drunkards, and moved that an inquiry was expedient to ascertain whether some better method of dealing with such cases could not be substituted. The motion was agreed to.—[22] **Home Rule for the United Kingdom.** Dr. Clark moved (Mar. 6th) "that in order to increase the efficiency of the Imperial Parliament to deal with Imperial affairs, and in order to give speedier and fuller effect to the special desires and wants of the respective nationalities constituting the United Kingdom, it is desirable to devolve upon the representatives of England, Ireland, Scotland, and Wales respectively, the management and control of their domestic affairs." The House was counted out.—[23] **Income Tax.** Mr. Bartley moved (Feb. 24th) that a committee should be appointed to inquire into the Income Tax, the mode of its collection, the system of appeal, the payment of poundage for collection, and generally to report on the present working and incidence of the tax as now imposed, and whether some juster system could be adopted, by a different rate being imposed on income derived from realised capital to that derived from industry. Mr. W. H. Smith thought no good results would follow from such an inquiry, but in reply to a remark of Mr. Gray, undertook to consider any proposal for improving the method of conducting appeals in country districts. Motion negatived by 161 to 106 (see sect. 120).—[24] **Indian Opium Traffic.** Sir J. Pease (April 10th) moved, on the order to go into Committee of Supply, a resolution declaring that the system by which the Indian opium revenue is raised is morally indefensible, and urging upon the Indian Government that they should cease to grant licences for the cultivation of the poppy and the sale of opium in British India, except to supply the legitimate demand for medical purposes, and they should at the same time take measures to arrest the transit of Malwa opium through British territory." Sir J. Fer-

gusson, in opposing the resolution, stated that the Indian Government were taking steps to decrease the traffic. The resolution was carried against the motion to go into Supply, by 160 to 130, and thus became the substantive motion. Sir R. Fowler thereupon moved to add to the resolution the words, "and this House, feeling the pressure of taxation on the people of India, will take steps to reimburse the deficiency so caused to the Indian Government." At one o'clock the debate stood adjourned, and no opportunity of resuming it could be found.—

[25] **Intoxicating Liquors (Licences).** Mr. John Ellis moved (April 28th) a resolution on this subject. Mr. F. Fulton proposed the addition of words affirming the principle of equitable compensation. Mr. Ritchie believed that the public sense of equity would revolt at any idea of a general suppression of licensed houses, upon which an enormous amount of capital had been embarked, without the smallest amount of consideration for those who had been carrying on a legitimate business and supplying a public want, in the belief that they were doing so under the protection of the law. He could not accept the motion without adding to it the words of the amendment. On a division, the amendment of Mr. Fulton was carried by 190 to 129, and Mr. Ellis's motion, amended so as to embody the principle of equitable compensation, was adopted by 182 to 111. Subjoined is the resolution of the House as finally arrived at, the words added at the instance of Mr. Fulton being those quoted: That, "provided equitable compensation be given," a large reduction in the number of houses in England licensed for the sale of intoxicating liquors is desirable, and that local authorities should be entrusted with further powers of control over the issue of such licences, and with respect to the days and hours during which the licensed houses should be open.—[26] **Ireland, Administration of the Law in.** Mr. J. Morley (Feb. 16th) moved that the action of the Irish Executive in connection with the recent prosecutions in Tipperary, and other proceedings, is calculated to bring the administration of the law into contempt, and violates the civil and constitutional rights of Irish citizens. Mr. T. W. Russell proposed an amendment, declaring that the action of the Executive in connection with the prosecutions in question, and other proceedings, "has been rendered imperative by the existence and activity of an illegal conspiracy, directed against the civil rights of a large section of her Majesty's subjects in Ireland, who have been subjected to cruel persecution and great loss in following their lawful callings, and this House rejoices in the successful vindication of the law at Tipperary and elsewhere, which has gone far to restore freedom to the individual in every part of Ireland." The motion was opposed by the Government, and on a party division was defeated by 320 to 245. On the amendment being put as a substantive motion, the debate was adjourned, on the motion of Mr. Healy, and no opportunity was found for resuming it. Early in June Mr. Balfour said there was now no longer any necessity for continuing the proclamation of numerous counties of Ireland under the Crimes Act, and all proclamations would be withdrawn except in the case of one county and a few baronies in two others.—[27] **Ireland, Distress in.** Mr. Arthur Balfour stated on Dec. 4th, '90, what the Government proposed to do to meet the distress consequent

on the failure of the potato crop. One consequence of the distress was a want of seed for the ensuing year's crop, and the other was the actual want among the population which was apprehended that year. As to the first point, he proposed to supply seed potatoes through the guardians of the poor, on credit, the interest on the money required to be advanced for the purpose to be paid from the Irish Church surplus, but those cultivators who paid ready money to obtain the seed at 20 per cent. discount. In order to meet the present distress in the country, with which the ordinary poor law could not cope, he proposed to rely principally upon railway works which were being or about to be constructed, and of these 284 miles were authorised, and would soon be in full operation; but in other districts relief works were to be instituted under competent supervision. Really useful roads were to be the staple employment there, but attention would also be given to drainage improvement, the reclamation of land, and afforesting. The Seed Potatoes Supply (Ireland) Act, 1890, giving effect to the first proposal indicated above, received royal assent Dec. '90. A resolution granting £5,000 for relief of distress in the west of Ireland was agreed to Dec. 5th, '90. Mr. Balfour, March 12th, on a vote of £55,831 for the relief of distress in Ireland, narrated what had been done, and the works which were being carried out. On two lines of railway which had been started the number of men employed was about 8,000, representing five or six times the number of individuals relieved, and the amount spent in wages was something over £40,000. He stated, regarding relief works proper, that almost all the works instituted were in the shape of roads, that the total number of men employed on such works on Feb. 28th was 7,397 in all Ireland, and the total of wages paid to labourers, excluding supervision, £21,159. Vote agreed to, and another estimate of £136,200 in and for the construction of light railways in Ireland carried after discussion. On a vote to complete the sum necessary for the Tramways and Public Companies (Ireland) Act and the Light Railway Act, Mr. Jackson, July 21st, said good progress had been made with the works, and it might reasonably be expected that most of them would be completed, or nearly so, by next year. On the vote of £160,000 for the relief of distress in Ireland (making the total expenditure in connection with that object, Dec. '90 to Aug. '91, £220,831), Mr. Balfour, July 22nd, gave a résumé of what had been done in connection with the subject since it was last discussed. Railway construction had been left in the hands of contractors, who had been required to employ local labour. The number of labourers engaged, including men, women and children, was, on Feb. 28th, 6,812. This was increased by May 23rd to 14,000, but on July 11th the number had fallen to 11,000, and was rapidly diminishing. The total amount advanced as potato loans amounted to £276,500, as against £600,000 in 1887.—[28] **Ireland, Land Disputes in.** Mr. Shaw Lefevre (Jan. 30th) called attention to the remaining disputes between large bodies of tenants in Ireland and their landlords which arose in the years 1885-7, and moved that it was the duty of the Government to use its influence for the settlement by arbitration of the remaining disputes between large bodies of tenants in Ireland and their landlords which arose in the years 1885-7, and, if necessary, to propose

legislation to Parliament for effecting this purpose. This was opposed by Mr. Balfour (who denounced the Plan of Campaign, and said if he were an Irish landlord he would rather beg his bread from door to door than submit to it), and defeated on a division by 213 to 152.—[29] **Ireland, Local Government.** Mr. Balfour, July 20th, said he sincerely hoped they would be able to bring forward an Irish Local Government Bill next session. He did not know whether he was to understand the Government were to have the support of the hon. and learned gentleman? (Mr. Healy: "Certainly.") Then he hoped the time would not be long delayed when the hon. and learned gentleman would have an opportunity of showing the practical value of the support which he had now promised to give. Mr. Parnell subsequently stated outside the House that he too would support a bill of the kind. On July 29th Mr. Balfour, in some observations regarding the constabulary, said that in Ireland, whatever form of government existed, the police force must be a centralised body. This body could not be placed at the service of the local majority with safety to the minority, whether it were a Protestant minority in the south or a Roman Catholic minority in the north; to so place it would be as disastrous as if the judges were elected by popular representation in the various counties.—[30] **Labour Commission.** Mr. W. H. Smith announced, April 10th, the names of those who were to be members of this Commission (see heading). Mr. Justin McCarthy asked leave to move the adjournment, in order to discuss "the refusal of Her Majesty's Government to recommend the appointment of Mr. Michael Davitt as a member of the Royal Commission on Labour"; but, less than forty members rising to support the motion, it could not be made.—[31] **Land, Taxation of.** Mr. Provand moved, Feb. 27th, "that the proportion of taxation which falls upon and is payable by land and its rentals is insufficient, and ought to be increased." Mr. Chaplin, in opposing, maintained that if there was any question of altering the taxation upon land, it should be in the direction of further relief rather than of increase. Mr. Gladstone, in supporting, said the President of the Board of Agriculture had remarked that the rates, though paid immediately by the occupier, fell in the last resort upon the land; this being so, it followed that within the last few years the Government had relieved land from the Consolidated Fund to the extent of five or six millions, while all they had done to redress the balance was to obtain a few hundreds of thousands of pounds by an addition to the succession duty. He maintained that a further change should be made in the death duties, and that under the present system ground rents enjoyed undue exemption. The motion was rejected by 128 to 77.—[32] **Livery Franchises.** Mr. J. Rowlands (Feb. 6th) moved "that the time has arrived when the Government should, in accordance with the recommendation of the Report of the City Liveries Charities Commission, take action to abolish the anomalous franchise now possessed by the Liverymen of the City of London, which gives a vote to persons who have no direct residential or business connection with the City, and thus increases the evils arising from the defective state of the Registration Laws, whereby many persons are prevented from becoming qualified electors, while others become entitled

to a plurality of votes." The motion was supported by Sir G. Trevelyan among others, but opposed by the Government, and defeated by 148 to 120; Mr. Gladstone and other official members of the Opposition voted for the resolution.—[33] **Local Government in Rural Districts.** Mr. A. Acland moved, April 14th, "that no measure of local government for the rural districts of England and Wales will be satisfactory which does not provide for the reform of vestries and the establishment of parish councils, so as to secure to the inhabitants of country villages a reasonable share in the management of their own affairs." Mr. Hobbhouse thereupon moved an amendment asserting that no measure of the kind would be satisfactory which did not provide for "the grouping of rural parishes under popularly elected district councils, and the effective control of local affairs by similar bodies in urban and populous places, and that such further reform of local government in rural districts is urgently required." The resolution was defeated by 175 to 142, and on the amendment becoming the substantive motion, Mr. Ritchie made a proposal which was under consideration when the debate stood adjourned. The discussion was not resumed.—[34] **Magazine Rifle.** Mr. Marjoribanks moved (Feb. 3rd) for the appointment of a Royal Commission to inquire into the merits of the new magazine rifle, and all the circumstances attending its adoption. Mr. Stanhope said the Small Arms Commission had tested the rifle in every way, and had utterly failed to break it down. After further discussion the motion was defeated by 108 to 74, an amendment of Mr. Hanbury, declaring that it was undesirable, by the appointment of a Royal Commission, to weaken the full responsibility of the officials concerned, being then agreed to.—[35] **Manipur.** Sir W. Harcourt (June 16th) called attention to the disasters at Manipur, and moved for further correspondence. The formal motion was agreed to after a discussion, in which Sir J. Gorst and Mr. Stanhope took part. The Marquis of Ripon (June 22nd) made a similar motion in the House of Lords. Viscount Cross said, with regard to the question of annexation, that he could make no definite statement until he had heard from the Government of India; but he had no hesitation in saying that, as a broad principle, he and the Viceroy had not the slightest desire to add to the territories of India, except in case of absolute necessity. As to the sentence of death passed on the Senaputti and the Jubra, any recommendation to mercy would be carefully considered. As to summoning a durbar, in order to effect an arrest, it was a practice he should certainly discourage, and he should be sorry to see the case of the Senaputti regarded as a precedent. In conclusion, he bore testimony to the gallant conduct of Major Grant and Mrs. Grimwood.—[36] **Mines, Secretary for.** Mr. Pritchard Morgan (Jan. 27th) moved that it was desirable to create a Department to have the control and supervision of the mining industries of the country, to be controlled by a Minister of the Crown, such Minister to be called the Secretary for Mines. This was opposed by the Government, though Mr. W. H. Smith promised consideration to the matter, and defeated by 118 to 83.—[37] **Navy Estimates.** On the motion to go into Committee, Sir J. Colomb (March and) called attention to the growth of colonial sea com-

merce, and the increase of British naval responsibilities caused thereby, and moved that certain particulars be presented annually with the Estimates. Sir W. Harcourt said the trade of a belligerent could be made absolutely safe under the Declaration of Paris. Lord G. Hamilton, in promising to give the information asked for, though in a different form, could not adopt the last speaker's view of the Treaty of Paris, but quoted figures to show that our expenditure upon the Navy was largely in excess of that of other Powers, as compared with our and their gross revenue. The proposal of Sir J. Colomb was negatived.—[38] **"One Man One Vote."** Mr. Stansfeld (March 3rd) moved "that it is needful to amend and simplify the laws relating to the qualification and registration of Parliamentary electors; and especially to provide (a) that no person shall be permitted to vote in more than one electoral area during the continuance of one and the same register; (b) that the term of qualification shall be reduced to not more than three months; (c) that registration superintendents shall be appointed, who shall be officially responsible for superintending the preparation of accurate lists of voters." The motion was seconded by Mr. Howell. Mr. Howorth moved, and Mr. Whitmore seconded, the following amendment: "That, whilst recognising the desirability of amending the present system of the registration of voters, this House is of opinion that no alteration of the present laws regulating the qualification of voters can be considered which does not at the same time provide that the different parts of the United Kingdom of Great Britain and Ireland shall be represented proportionately to their population." Mr. Gladstone supported the motion. Mr. Chamberlain said he approached the consideration of the subject more from the standpoint of Mr. Gladstone, than from that of the mover and seconder of the amendment. He regarded plural voting as doomed. He was in favour of manhood suffrage, payment of members, and equal electoral districts; but this proposal picked out only one little corner of the subject of the reform question, and he could not support an abstract resolution, the adoption of which would involve an interruption of the work in which they were engaged in order to give it effect. The time had not come for a new Reform Bill, and what they had to do was to make the best of the old one. Mr. Ritchie admitted the necessity of reform of the registration laws, but not for a new Reform Bill. On a party division, Mr. Stansfeld's motion was defeated by 291 to 189. The amendment was put as the substantive motion, but the debate was then adjourned and not resumed.—[39] **Peers and the House of Commons.** Lord de Mauley (July 28th) moved a resolution to the effect that a peer, giving notice of his intention to offer to represent a constituency in the House of Commons, should be excused attendance on the House of Lords during the existence of that Parliament. The Earl of Feversham moved the "previous question," which was accepted by the Marquess of Salisbury and agreed to.—[40] **Pensions, Hereditary.** Mr. Bradlaugh (Nov. 28th, '90) moved a resolution disapproving so much of the Treasury minute relating to perpetual pensions, hereditary payments, and allowances as proposed to commute some of such pensions, payments, and allowances at the rate of practically 27 years' purchase. This was defeated by 185 to 152

(see heading PERPETUAL PENSIONS).—[41] **Post Office, Administration of the.** A motion of Earl Compton for a select committee to inquire into the administration of the Post Office was (April 17th) defeated by 163 to 93.—[42] **Sunday Opening of Museums.** Mr. Lawson moved (March 20th) that it was expedient to open those national museums and galleries that are now closed in London to the public on Sundays for certain hours and under special regulations. The motion was opposed by the Government, and defeated by 166 to 30.—[43] **Treason-Felony Prisoners.** Mr. John Redmond (August 3rd) moved, as an amendment to the second reading of the Appropriation Bill, "that, in the opinion of this House, the time has come when, in view of the peaceable state of the country and the lengthened term of imprisonment already served by John Daly, Egan, and other persons, now suffering sentences of penal servitude for treason-felony, a reconsideration of their sentences should take place, with a view of recommending the extension towards them of the clemency of the Crown." The amendment was supported by Mr. Parnell, and in the division by all the Nationalists of both sections present, and by some of the Scotch and English Radicals. It was opposed by both the Home Secretary and Sir W. Harcourt, and defeated by 96 to 30.—[44] **Triple Alliance, England and the.** Sir J. Fergusson informed Mr. Labouchere (June 4th) that Her Majesty's Government had entered into no engagements pledging the employment of the naval and military forces of the Crown in any contingency; and that the Government retained their full liberty of judgment as to what action we should take and as to what means we should employ in any conceivable circumstances. At the same time, he added, Italian statesmen were well aware that Her Majesty's Government were at one with them in desiring that there should be no disturbance of the existing order in the Mediterranean and the adjacent seas, and that the sympathies of this country would be on the side of those who would maintain a policy so important for the British interests involved. Sir J. Fergusson informed Mr. Labouchere (July 2nd) that the Government had no information with respect to the stipulations of the treaty said to have been signed by Germany, Austria, and Italy. The Marquis di Rudini was reported to have expressed his concurrence with the description which had been given on the part of Her Majesty's Government of the exchange of views which had from time to time taken place between the Governments of Great Britain and Italy. Her Majesty's Government had no doubt that the Marquis di Rudini had also correctly described it. There had been no change of any kind in our attitude from that defined in 1888. Answering a further question by the hon. member (July 6th), Sir James said the understanding between this country and Italy which had been referred to was the sense of the communications which had been frequently mentioned as expressing the common object of maintaining the *status quo* in the Mediterranean—a principle which Her Majesty's Government by declaring in Parliament had publicly avowed.—[45] **Verney, Captain.** On May 7th, Mr. Speaker acquainted the House that he had received the following letter from Mr. Justice A. L. Smith, relating to the imprisonment of Captain Edmund Hope Verney, a member of this House:—"Central

Criminal Court, City of London, E.C., May 6th, 1891. Mr. Speaker.—I beg to inform you that Captain Edmund Hope Verney, M.P., was this day convicted before me upon his own confession of a misdemeanour, for which I have sentenced him to twelve calendar months' imprisonment. And I have the honour to remain, your obedient servant, A. L. SMITH." On May 12th the said letter and the record of the proceedings upon the trial of Captain Verney were considered; and it was resolved, on the motion of Mr. W. H. Smith, seconded by Mr. Campbell-Bannerman, "That Captain Edmund Hope Verney be expelled this House."—[46] **Women as County Councillors.** Mr. James Stuart moved (May 26th) "That the law ought to be so altered as to enable women to be elected and to serve on County Councils." This was opposed by the Government, and defeated by 78 to 52.—[47] **ACTS AND BILLS.**—The following is a list of the public Acts passed during the session:—**Seed Potatoes (Ireland) Act (Ch. 1), Transfer of Railways (Ireland) Act (Ch. 2), Custody of Children Act (Ch. 3), Technical Instruction Act (Ch. 4), Army Annual Act (Ch. 5), Consolidated Fund (No. I.) Act (Ch. 6), Seed Potatoes Supply (Ireland) (Ch. 7), Tithe Act (Ch. 8), Registration of Certain Writs (Scotland) Act (Ch. 9), Middlesex Registry Act (Ch. 100), Electoral Disabilities Removal Act (Ch. 11), Railway and Canal Traffic (Provisional Orders) Amendment Act (Ch. 12), Taxes (Regulation of Remuneration) Act (Ch. 13), Supreme Court of Judicature (London Causes) Act (Ch. 14), Merchandise Marks Act (Ch. 15), Army Schools Act (Ch. 16), Charitable Trusts Recovery Act (Ch. 17), Registration of Electors Act (Ch. 18), Seal Fishery (Behring's Sea) Act (Ch. 19), Pollen Fisheries (Ireland) Act (Ch. 20), Savings Banks Act (Ch. 21), Museums and Gymnasiums Act (Ch. 22), Reformatory and Industrial Schools Act (Ch. 23), Public Accounts and Charges Act (Ch. 24), Customs and Inland Revenue Act (Ch. 25), Russian Dutch Loan Act (Ch. 26), Consolidated Fund (No. II.) Act (Ch. 27), Branding of Herrings (Northumberland) Act (Ch. 28), Presumption of Life Limitation (Scotland) Act (Ch. 29), Law Agents and Notaries Public (Scotland) Act (Ch. 30), Mail Ships Act (Ch. 31), Roads and Streets in Police Burghs (Scotland) Act (Ch. 32), Allotments Rating Exemption Act (Ch. 33), Local Authorities Loans (Scotland) Act (Ch. 34), Bills of Sale Act (Ch. 35), Consular Salaries and Fees Act (Ch. 36), Fisheries Act (Ch. 37), Stamp Duties Management Act (Ch. 38), Stamp Act (Ch. 39), Brine Pumping (Compensation for Subsidence) Act (Ch. 40), Orficers Common Grassings Regulation Act (Ch. 41), Tramways (Ireland) Amendment Act (Ch. 42), Forged Transfers Act (Ch. 43), Trusts (Scotland) Amendment Act (Ch. 44), Turbary (Ireland) Act (Ch. 45), Post Office Act (Ch. 46), Metaliferous Mines (Sale of Man) Act (Ch. 47), Purchase of Land (Ireland) Act (Ch. 48), Returning Officers (Scotland) Act (Ch. 49), Commissioners for Oaths Act (Ch. 50), Slander of Women Act (Ch. 51), Public Health (Scotland) Amendment Act (Ch. 52), Supreme Court of Judicature Act (Ch. 53), Ranges Act (Ch. 54), Appropriation Act (Ch. 55), Elementary Education Act (Ch. 56), Redemption of Rent (Ireland) Act (Ch. 57), Western Highlands and Islands (Scotland) Works Act (Ch. 58), Public Works Loans Act (Ch. 59), Expiring Laws Continuance Act (Ch. 60), Schools for Science and Art Act (Ch. 61), London County Council (Money) Act (Ch. 62), Highways and Bridges Act (Ch. 63), Land Registry (Middlesex Deeds) Act (Ch. 64), Lunacy Act (Ch. 65), Local**

Registration of Title (Ireland) Act (Ch. 66), Statute Law Revision Act (Ch. 67), County Councils Elections Act (Ch. 68), Penal Servitude Act (Ch. 69), Markets and Fairs (Weighing of Cattle) Act (Ch. 70), Labourers (Ireland) Act (Ch. 71), Coinage Act (Ch. 72), Mortmain and Charitable Uses Act (Ch. 73), Foreign Marriage Act (Ch. 74), Factory and Workshop Act (Ch. 75), Public Health (London) Act (Ch. 76).—Subjoined is a summary of the provisions of the more important of these statutes, with some account of the proceedings upon several of them while they were yet bills, and also of the provisions of certain bills which were introduced, but which failed to find acceptance, and were either rejected or withdrawn. Those marked * were Government bills.—[48] **Allotments Rating Exemption Act (54 & 55 Vict. ch. 33)**, introduced by Mr. Cust, received royal assent July 21st, removes doubts which had arisen and relieves allotments from all liability to be assessed for sanitary purposes at a higher rate than other cultivated lands. "Allotment" is defined to mean any parcel of land of not more than two acres in extent and let as an allotment, and cultivated as a garden or a farm, or partly as a garden and partly as a farm.—[49] **Army Schools Act (54 Vict. ch. 16)** extends to army schools the provisions of any schemes which confer any benefit of an educational endowment on scholars being or having been educated at any public elementary school.—[50] **Betting and Loans (Infants) Bill.** Lord Herschell (Feb. 23rd) moved the second reading of the Betting by Infants Bill, which was directed against the practice of sending betting circulars to boys at school and youths at college. Second reading was accepted by the Government, and a suggestion that the sending of circulars offering to lend money to youths should also be dealt with, being largely supported, Lord Herschell (March 19th) introduced a bill to make it an offence to induce a borrowing infant to give a statutory declaration in connection with a loan, and to render invalid a contract for payment of a loan which had been advanced during infancy. Second reading agreed to. The two bills were consolidated into one bill, which passed the Lords. This measure was taken charge of in the Commons by Mr. J. Morley, but being objected to, failed to pass.—[51] **Brine Pumping (Compensation for Subsidence) Act (54 & 55 Vict. ch. 40)**—royal assent July 28th, was introduced by Mr. Brunner, and empowers the Local Government Board, on application and after local inquiry, to form a compensation district in any part of England and Wales, and to grant a provisional order, which is to be subject to confirmation by Parliament, for the establishment of a compensation board for such districts; such board to be empowered to form a compensation fund for the district, to be raised and maintained by the levy of an annual rate, not exceeding in any year 3d. per thousand gallons of brine raised, upon all pumers of brine within the district of the compensation board, and the fund to be applied in satisfaction of claims for damage alleged to have been caused by subsidence of land in the district by brine pumping.—[52] **Charitable Trusts Recovery Act (54 Vict. ch. 17).** Introduced by Sir W. Foster, and received royal assent May 11th. The object of the statute is to facilitate the recovery of rent charges and other payments owing to charities by empowering the Charity Commissioners to sue for the recovery of property of the kind.—[53] **Cheap Trains (London) Bill.** Mr. Theobald

(Feb. 24th) moved the second reading of this bill, the object of which was to make better provision as respects the administrative county of London for cheap workmen's trains, by compelling the companies to run such trains at $\frac{1}{2}$ d. per mile return fare. Mr. Blundell Maple supported the bill. Sir M. Hicks-Beach assured the House of his desire to give effect, as far as was possible under existing enactments, to any representations made to him by the County Council which would increase the facilities for workmen to live in the country. Bill thrown out by 73 to 54.—[54] **Children's Life Insurance Bill.** Dr. Magee, then (Jan. 22nd) Bishop of Peterborough, and subsequently Archbishop of York, moved the second reading of this bill, which he said was the same as that of last year, and contained the "undertaker's clause." The committee of last year had decided that this clause should be left out, and he himself did not desire to retain it, but he had no power to amend the bill before it was reported. Read a second time and referred to a select committee. The committee duly met and took evidence, but the bill was virtually abandoned after the death of the Archbishop, and on July 16th the committee reported that they did not consider it expedient to proceed further. The committee added that they could not separate without expressing their deep regret at the loss of their distinguished chairman, the late Archbishop of York, who had had charge of the measure.—[55] ***Clergy Discipline Immorality Bill,** introduced by the Archbishop of Canterbury, who (March 5th) moved the second reading. The measure was one for better enforcing discipline in the case of crimes and other offences against morality committed by clergymen. It passed the Lords, and was taken charge of in the Commons by the Government, who would have been content if they could have succeeded in passing this session the first four (out of thirty-one) clauses, which provided that a clergyman should vacate his benefice on being convicted of one of certain serious offences. Opposition to the bill was persisted in, and the Government recognising that it could only be passed by a great expenditure of time, withdrew it (Aug. 3rd).—[56] ***Coinage Act (54 & 55 Vict. ch. 72)** sets apart £400,000 for the purpose of rehabilitating the Victorian gold coinage. Mr. Goschen, in moving second reading (July 8th), said the amount of gold in circulation was estimated by Mr. Giffen at £73,000,000, of which £31,000,000 was assumed to be light. Under the Act, which received royal assent August 5th, her Majesty may, by Order in Council, direct that gold coins of the realm which have not been called in by proclamation, and are below the least current weight as provided by the Coinage Act, 1870, shall, if they have not been illegally dealt with, and subject to such conditions as to time, manner, and order of presentation, as may be mentioned in the Order, be exchanged or paid for by or on behalf of the Mint at their nominal value. For the purposes of this Act a gold coin shall be deemed to have been illegally dealt with where the coin has been impaired, diminished, or lightened otherwise than by fair wear and tear, or has been defaced by having any name, word, device, or number stamped thereon, whether the coin has or has not been thereby diminished or lightened. In a sovereign or half-sovereign loss of weight exceeding three grains from the standard weight shall, for the purposes of this Act, be *prima facie* evidence

that the coin has been impaired, diminished, or lightened otherwise than by fair wear and tear.—[57] **Companies Act (1882) Amendment Bill** was introduced by Mr. Hoyle, and after second reading referred to a select committee, whose inquiry was not completed this session.—[58] **Conspiracy Law Amendment Bill.** Mr. E. Robertson (Jan. 28th) moved the second reading of this measure, which he said proposed to lay down the general principle that, subject to certain specified exceptions, no combination should be treated as criminal unless it were accompanied by a criminal object. An agreement or combination by two or more persons to do any act would, by the bill, not be punishable as a conspiracy if such act, committed by one person, would not be punishable as a crime. Another clause of the bill proposed, in reference to recent decisions, that intimidation should include only such intimidation as would justify a justice of the peace, on complaint made to him, in binding over the person so intimidating to keep the peace. The bill was supported by Sir W. Harcourt, but opposed by the Solicitor-General as to the first part, though, as to the clause defining intimidation, he declined to go into the merits of the question, seeing that the point involved was to come before the High Court. Bill rejected by 179 to 143.—[60] ***Contagious Diseases (Animals) Bill.** Was introduced by Mr. Chaplin with the object of conferring additional powers on inspectors to be appointed by the Board of Agriculture for the inspection of cattle vessels. The bill, being strongly opposed, was withdrawn, Mr. Chaplin intimating that he would fall back on the powers already vested in the Board by statute (see heading, TRANSATLANTIC CATTLE TRADE).—[61] **Conveyancing and Law of Property Act (1881) Amendment Bill.** Mr. T. H. Bolton, March 4th, moved the second reading of this bill, the object of which was to give additional security to leasehold property, and to amend the Act of 1881 in some particulars found in practice to require amendment. The measure was opposed by the Attorney-General, but a second reading was carried by 159 to 141. The bill was amended in committee, and passed the Commons Aug. 1st; but in the Lords, Aug. 4th (the day before the prorogation), objection was taken to its being further proceeded with at that time, and it was accordingly lost for the session.—[62] ***County Councils (Elections) Bill.** Proposed to alter the date of holding County Council elections from Nov. 1st, '91, to March 8th, '92. In committee Sir J. Lubbock proposed, July 6th, that in the case of the administrative county of London the day of election should be the last Saturday in November. Amendment opposed by Mr. Ritchie, and defeated by 172 to 104. Bill amended so as to provide that the day of election should be, in each county, such day between the 1st and 8th day of March as the county councils may fix. Other amendments made, etc. An amendment proposed in the Lords, with a view of excepting London from the operation of the bill, was, July 17th, defeated by 54 to 19. As the **County Councils Elections Act (54 & 55 Vict. ch. 68)** received royal assent Aug. 5th. The ordinary day of election is to be such day between the 1st and 8th day of March as the county council may fix, and if no date is fixed, is to be the 8th. The ordinary day of retirement of county councillors is to be the 8th, and the newly elected

councillors are to come into office on that day. March 16th, or such other day within ten days after the ordinary day of retirement as the county council may from time to time fix, is to be the ordinary day of election of chairman, and of the aldermen, and the day for holding the quarterly meeting. The county register is to be completed before Dec. 20th in each year, and come into operation on Jan. 1st. Nothing shall require or authorise a returning officer to hold an election of a county councillor to fill a casual vacancy which occurs within six months before the ordinary day of retirement of county councillors.—[63] **Custody of Children Act* (54 Vict. ch. 3—royal assent, March 26th) enacts that, where a parent applies to the High Court for an order for the production of a child, and the Court is of opinion that the parent has abandoned or deserted the child, or that he has otherwise so conducted himself that the Court should refuse to enforce his right to the custody of the child, the Court may in its discretion decline to make the order. If, at the time of the application, the child is being brought up by another person, or is boarded out by the guardians, the Court may in its discretion, if it orders the child to be given up to the parent, further order that the parent shall pay to such person, or to the guardians, the whole of the costs properly incurred in bringing up the child, or such portion thereof as shall seem to the Court to be just and reasonable. Where a parent has—(a) abandoned or deserted his child; or (b) allowed his child to be brought up by another person at that person's expense, or by the guardians of a poor law union, for such a length of time and under such circumstance as to satisfy the Court that the parent was unmindful of his parental duties; the Court shall not make an order for the delivery of the child to the parent unless the parent has satisfied the Court that, having regard to the welfare of the child, he is a fit person to have the custody of the child. The Court is empowered to make such order as it may think fit to secure that the child shall be brought up in the religion in which the parent has a legal right to require that the child should be brought up. But nothing in the Act is to interfere with or affect the power of the Court to consult the wishes of the child in considering what order ought to be made or diminish the right which any child now possesses to the exercise of its own free choice.—[64] **Customs and Inland Revenue Bill*. In committee, June 15th, Mr. Roby moved an amendment exempting grammar schools and charitable institutions from payment of income tax, and it was defeated by 193 to 93. Received royal assent (54 & 55 Vict. ch. 25) July 3rd, and gives effect to certain of the Budget proposals (see heading FINANCE, NATIONAL).—[65] **Duration of Speeches (Parliament) Bill* of Mr. Atkinson, was to limit the duration of speeches of ordinary members to fifteen minutes, privy councillors being allowed half an hour. Thrown out (Feb. 24th) by 72 to 44.—[66] **Eight Hours' Bill* introduced by Mr. C. Graham, and Mines (Eight Hours) Bill brought in by Mr. W. Abraham (Rhondda). No opportunity could be found for discussing either of these measures.—[67] **Electoral Disabilities Removal Bill*. The Attorney-General, in moving the second reading of this Bill, said it had been rendered necessary by a decision of the High Court. The Bill provided that no person should be disqualified from being regis-

tered by reason only that during part of the qualifying period not exceeding four months at any one time, he had in the performance of any duty arising from or incidental to any office, service, or employment held or undertaken by him been absent from his dwelling-house or lodgings, or not resided in or within the required distance. Bill read a second time (Feb. 12th) after discussion. Received royal assent May 11th (54 Vict. ch. 11).—[68] **Electors Registration (Acceleration) Bill*. Mr. Ritchie, Feb. 13th, said the main alteration proposed by the Bill was the setting back of the qualifying period from July 15th to June 26th. Further, the Bill allowed a period of twenty-seven days between the last day of revision and the date of completion of the register. Instead of the date of the last day of the revision being Oct. 12th, it would be under the Bill Sept. 23rd. The register would, as under the existing law, be completed on Oct. 20th. The registers of parliamentary voters and for local purposes were both to come into force on Nov. 1st. Read a second time after discussion. Several members desiring to raise points in committee, which would have involved a considerable amount of discussion, Mr. Ritchie withdrew the bill on March 6th.—[69] **Elementary Education Bill*. Sir W. Hart Dyke, June 8th, explained his proposals with regard to the relief of parents from the payment of fees in elementary schools. We propose, he said, to offer every school 10s. on the average attendance of all its children between five and fourteen years of age; as regards such children schools will become wholly free or will continue to charge a fee reduced by the amount of the grant, according as the amount of fees at present charged in them does not or does exceed the sum of 10s. We propose to require that wherever it is necessary, public school accommodation shall be provided without payment of any fee, but in order that this may be provided with a minimum of friction, we propose to take no steps for its compulsory supply for a period from the commencement of the Act. The effect of the proposal, so far as fees were concerned, was to be this: the 10s. grant about represented a weekly fee of 3d., so that where the fee was 3d. or less, the school would be free, and where it exceeded 3d. it would be lessened by that amount. There would be no standard limitation whatever under the bill, but the grant was to be made payable only on behalf of those children of compulsory school age, compulsion being applicable between the age of five and fourteen. With regard to children under five years of age in no case was the fee to be charged more than 2d. per head. On second reading, June 22nd Mr. Bartley moved the following amendment: "That this House is prepared to amend the present system by which remission of school fees is obtained through the Poor Law Guardians by parents who cannot afford to pay the fees, but declines to accept a measure which, while it throws on the general taxation of the country the whole cost of elementary education of children whose parents can afford to pay a part of the cost, and imposes a large additional burden on the country, does not secure any increased educational efficiency, and is a source of danger to the continuance of voluntary and denominational schools, under which the majority of the children of the country are now educated." Debate continued June 23rd and also on June 24th, when the

amendment was defeated by 318 to 10, the members voting in the minority being Mr. Bonsor, Baron Dimsdale, Mr. Edwards-Moss, Mr. Howorth, Mr. W. F. Lawrence, Mr. J. W. Lowther, Mr. W. Lowther, Mr. Royden, Sir R. Temple, and Mr. Whitmore; and Mr. Bartley and Mr. Young, tellers. Second reading was then agreed to. On the committee stage Mr. H. H. Fowler, June 20th, moved an instruction empowering the committee to make provision, in the case of districts where there exists no school under public control, for the introduction of the principle of local representation in the supervision of schools receiving the fee grants. This was opposed by the Government, and defeated by 267 to 166. Mr. Summers, June 30th, moved an instruction to the committee that they should have power to raise the standards for partial and total exemption in schools receiving the fee grants. This was rejected by 186 to 133. Several other instructions were ruled out of order, and the House went into committee on the bill. The Government agreed to alter the age at which the fee grant should commence to be payable from 5 to 3, and after strong pressure and as a compromise to increase the free age from 14 to 15. Mr. S. Smith, July 1st, proposed to extend the provisions of the bill to evening schools, but the Government said they could not contribute any more money from the Exchequer, and the amendment was negatived by 99 to 61. An amendment submitted by Mr. Summers, providing that no religious catechism or religious formula which was distinctive of any particular denomination should be taught in any school receiving the fee grant was defeated by 195 to 90. Bill further considered in committee July 2nd and 3rd. Sir R. Temple moved to omit the sub-section of clause 3, which provided that if at any time after one year from the commencement of the Act it was found that there was an insufficient number of free places in any school district, the deficiency might be supplied according to the Elementary Act of 1870. The clause must, he said, bring in the School Board system in districts where voluntary schools had flourished. The amendment was defeated by 269 to 38. Bill passed through committee July 3rd, considered as amended July 7th. On the motion of Sir W. Hart Dyke, a new clause (now sect. 3 of Act) was added. Mr. E. Robertson proposed two clauses, one to enact that in any school receiving the fee grant a certificated teacher should have a right of appeal to the Education Department against dismissal by the managers, the other providing that no teacher should be required, as a condition of holding his appointment, to undertake or abstain from any duties out of the ordinary school hours. The former was negatived without a division; the latter was rejected by 181 to 110. Viscount Cranborne moved a new clause enabling the fee grant to be paid to a group of schools. This was accepted. Mr. Cobb proposed a new clause providing that any room in a school receiving the fee grant, might out of school hours be used for any vestry or parochial public meeting or other purpose, either for recreation or otherwise, by the inhabitants of the school district. This was defeated by 178 to 131. A proviso of Mr. Lloyd-George that where the fee grant should in any school exceed the aggregate amount of fees paid for the year ending Dec 31st, '90, the surplus should be applied for

such educational purposes, and in such manner as should be approved by the Department, and for this purpose the managers should on the Act coming into operation submit a scheme to the Department, was negatived by 143 to 93. Third reading agreed to after discussion, July 8th. Second reading agreed to in the Lords, July 16th, after debate, in which the Archbishop of Canterbury said he did not believe the bill would make any great change in the condition of voluntary schools, and whatever alterations did take place would be on the right side. In committee, July 20th, Lord Sandford proposed to reduce the maximum age up to which the fee grant should be payable from 15 to 14; but this was opposed by the Government and negatived. On the clause which provided that nothing in the Elementary Education Act of 1870 should prevent a School Board from admitting scholars to any school provided by the Board without paying fees, the Bishop of London moved to add the following proviso:—Provided that no additional burden be thereby laid upon the rates without the consent of the ratepayers, to be ascertained by the Education Department in such manner as they shall think fit. On a division the amendment was rejected by 36 to 29 votes. Other amendments made, Bill read a third time, July 24th, Lords' amendment considered by the Commons, July 30th. Mr. Mundella objected to the Lords' amendment striking out the words "and suitable" (to the insertion of which the Government had agreed in the Commons) from the clause, now as amended sect. 4 of the Act, which provided that the Department might "if they were satisfied that sufficient and suitable public school accommodation, without payment of fees, had been provided for a school district," etc. Sir W. Harcourt said the Lords had spoilt the Bill. The Government protested against this as an exaggerated statement, and agreed with the course taken by the Lords in taking out the words, the retention of which would, they believed, introduce an element of discord into the operation of the measure. The Lords' amendment was adopted by 110 to 86. Mr. H. H. Fowler moved to disagree with an amendment of the Lords, which he maintained would increase the 17s. 6d. limit. The Lords' amendment was supported by the Government, and adopted by 105 to 58. Mr. H. H. Fowler then took the opinion of the Speaker as to whether it was constitutionally competent for the Lords to increase the 17s. 6d. limit, and the reply was that if the Lords had increased the limit, they had exceeded their privileges. Mr. Goschen (July 31st) said the Government frankly accepted the decision of the Speaker. The Lords' amendment was subsequently struck out of the bill. On the bill being returned to the Lords, Viscount Cranbrook (Aug. 4th) proposed an amendment which, he said, would accomplish the object they desired to attain, and yet meet the objection of the Speaker. The proposed amendment having been agreed to, Lord Salisbury characterised the claim set up by the Commons as excessive, and in advance of any claim previously asserted, and asked their lordships to agree to formally record their opinion that, in making the amendment, they did not assent to the Commons' reasons being hereafter drawn into a precedent. Lord Kimberley concurring, a motion to this purport was agreed to. As the 54 & 55 Vict.

ch. 35, the bill received royal assent Aug. 5th. **Clause 1** enacts that after the commencement of this Act (Sept. 1st, '91), there shall be paid out of moneys provided by Parliament, and at such times and in such manner as may be determined by regulations of the education department, a fee grant at the rate of ten shillings a year for each child of the number of children over three and under fifteen years of age in average attendance at any public elementary school in England and Wales (not being an evening school), the managers of which are willing to receive the same, and in which the Educational Department are satisfied that the regulations as to fees are in accordance with the conditions in this Act. If in any case there is a failure to comply with any of the conditions in this Act, and the Education Department are satisfied that there was a reasonable excuse for the failure, the department may pay the fee grant, but in that case shall, if the amount received from fees has exceeded the amount allowed by this Act, make a deduction from the fee grant equal to that excess. For the purposes of sect. 19 of the Elementary Education Act, 1876, the fee grant paid or payable to a school shall be reckoned as school pence, to be met by the grant payable by the Education Department. **Clause 2** enacts: (1) In any school receiving the fee grant,— (a) Where the average rate of fees received during the school year ended last before January 1st, '91, was not in excess of ten shillings a year for each child of the number of children in average attendance at the school; or (b) For which an annual parliamentary grant has not fallen due before the said 1st of January; no fee shall, except as by this Act provided, be charged for children over three and under fifteen years of age; (2) In any school receiving the fee grant where the said average rate was so in excess, the fees to be charged for children over three and under fifteen years of age shall not, except as by this Act provided, be such as to make the average rate of fees for all such children exceed for any school year the amount of the said excess. **Clause 3**: "In any school receiving the fee grant, where the average rate charged and received in respect of fees and books, and for other purposes, during the school year ended last before the 1st January, '91, was not in excess of ten shillings a year for each child of the number of children in average attendance at the school, no charge of any kind shall be made for any child over three and under fifteen years of age." **Clause 4**: (1) "Notwithstanding anything hereinbefore contained, the Education Department, if they are satisfied that sufficient public school accommodation, without payment of fees, has been provided for a school fee district, and that the charge of school fees or the increase of school fees for children over three and under fifteen years of age in any particular school receiving the fee grant is required owing to a charge of population in the district, or will be for the educational benefit of the district, or any part of the district, may from time to time approve such charge or increase of fees in that school, provided that the ordinary fee for such children shall not exceed sixpence a week; (2) The Education Department shall report annually to Parliament all cases in which they have sanctioned or refused the imposition or augmentation of fees under this section, with a statement of the amount of fee permitted; (3) The Education

Department may, if they think fit, make it an express condition of such approval that the amount received for any school year from the fees so charged or increased, or a specified portion of that amount, shall be taken in reduction of the fee grant which would otherwise have been payable for that school year, and in that case the fee grant shall be reduced accordingly." **Clause 5**: "If at any time after the expiration of one year from the commencement of this Act it is represented to the Education Department that there is in any school district, or any part of a school district, an insufficient amount of public school accommodation without payment of fees for children over three and under fifteen years of age, for whom such accommodation is desired, and the Education Department are satisfied after inquiry that such is the case, the Department shall direct the deficiency to be supplied in the manner provided by sects. 9 and 10 of the Elementary Education Act, 1870, and every other section enabling them in that behalf, with respect to the supply of public school accommodation; and the expression "public school accommodation" in that Act shall include public school accommodation without payment of fees. Provided that whenever and so long as any deficiency in such last-mentioned public school accommodation in any district is in course of being supplied with due despatch, no requisition or order shall be issued in that behalf by the Education Department." **Clause 6**: "The managers of two or more public elementary schools in the same or neighbouring school districts, not being schools provided by a school board, may pay the fee grant, or part thereof, received by each school into a common fund for distribution, as may be arranged by them, between or among such schools. Provided that the fee grant received by each school in the first instance shall alone count as income of such school for the purposes of this Act and of sect. 19 of the Elementary Education Act, 1876, and a contribution to a school from any such common fund shall not be reckoned as income of such school from other sources within the said sect. 19. **Clause 7**: "Where the managers of two or more public elementary schools in the same or neighbouring school districts agree to associate and elect a committee for the schools, any surplus income on the accounts for the school year of any of the associated schools may be paid into a common fund, out of which contributions may be made to any of the other associated schools; but the contributions received by any such school shall not be counted as income from other sources for the purpose of sect. 19 of the Elementary Education Act, 1876, so that no addition to the public charge may result from this section taken in conjunction with the said sect. 18. Provided that no board school shall under this section be associated with any public elementary school other than a board school. By other sections of the Act it is provided that nothing in sect. 17 of the Act of '70 shall prevent a school board from admitting scholars to any school provided by the board without requiring any fee; and nothing in the Act as to give any preference or advantage to any school on the ground that it is or is not provided by a school board. The expression "school year" is to mean a year or other period for which an annual parliamentary grant is for the time being paid or payable under the minutes of the Department; and the

expression "average attendance" is, for the purposes of the fee grant, to mean average attendance calculated in accordance with the minutes in force at the commencement of the Act. Mr. Goschen informed Mr. Powell (July 17th) that the Government proposed next session to deal with the rating of public elementary schools, with a view to mitigating the burden upon them, while at the same time doing justice to all concerned.—[70] *Evidence in Criminal Cases Bill*, introduced by the Lord Chancellor, was to enable persons charged with crimes, or their wives or husbands, to give evidence, and was read a second time May 26th, passed the Lords, but dropped in the Commons.—[71] *Factory and Workshops Act (1878) Amendment Bill*, proposed to amend the original Act in several particulars, with a view of improving the conditions under which the work is carried on by those engaged in the textile industries. Second reading moved by Sir H. James (Feb. 18th), and agreed to after discussion.—*Factory and Workshops Sanitation Bill*. Second reading moved by Lord Thring (Feb. 20th), and agreed to by the Government on the understanding that the committee stage should not be taken until the Home Secretary's bill was in their lordships' hands.—*Factory and Workshop Bill* of the Earl of Dunraven read a second time on the same understanding as is mentioned in the previous section.—*Factories and Workshops Bill*. The Home Secretary, in moving second reading (Feb. 26th), dealt first with the provisions relating to sanitation, and explained that the object of the bill was to bring all workshops and factories up to the same sanitary level, and to require the same conditions as to ventilation, overcrowding, limewashing and cleanliness in all workshops, whether men alone, or women and children, were employed; but, with regard to domestic workshops, it was thought they might be left to the general law relating to public health. The bill also made better provision for carrying out the law relating to the employment of women and children, and alterations respecting their employment were made, which he believed would prove of immense advantage to poor women who had household as well as business duties to attend to. Second reading agreed to after discussion, and bill referred to standing Committee on Trade, as was also the measure of Sir H. James. Several clauses from the latter being incorporated with the Government bill, Sir H. James' bill was dropped. On consideration of the Government bill, as amended by the standing committee, Mr. S. Buxton, who also had a *Factory and Workshop* bill before the Commons, but which he was unable to find an opportunity of bringing forward, moved (June 18th) the insertion of a clause prohibiting the employment of children under eleven years of age in a factory or workshop after Jan. 1st, 1893. This was opposed by the Government, but carried against them by 202 to 186, majority 16. Mr. Matthews (June 19th) said the Government fully and cordially accepted the decision of the House. A further clause of Mr. Buxton, proposing to raise the age, on and after July 1894, to twelve years, was dropped; and a clause of the same hon. member, providing that on and after July 1st, 1892, no child under fourteen should be employed other than under the half-time system, was rejected by 189 to 164. Mr. D. Randall proposed inclu-

sion of all laundries but domestic laundries, under the Acts, and this was rejected by 99 to 90. Third reading agreed to. Read a second time in the Lords June 29th. In committee, July 13th, Lord Dunraven and Lord Thring (who subsequently dropped their own bills) moved numerous amendments. As the *Factory and Workshop Act* (54 & 55 Vict. ch. 75) bill received royal assent Aug. 5th. The measure comes generally into operation on Jan. 1st, '92. Clause 1 enacts "That if the Secretary of State is satisfied that the provisions of the law relating to public health as to effluvia arising from any drain, etc., or with respect to cleanliness, ventilation, overcrowding, or limewashing are not observed in any workshops (including workshops conducted on the system of not employing any child, young person or woman therein) or laundries, he may if he thinks fit, by order, authorise and direct an inspector under the principal Act to take, during such period as may be mentioned in the order, such steps as appear necessary or proper for enforcing the said provisions. Section 40 of the principal Act (which prescribes that notice shall be given by an inspector to a sanitary authority of sanitary defects in a factory or workshop) is applied to workshops conducted on the system of not employing any child, young person or woman therein, and to laundries. The factory inspector himself may take action after notice to the sanitary authority and default on their part. Sections 3 and 33 of the Act of '78 (which relate to cleanliness, ventilation, and overcrowding in, and limewashing of factories and workshops) are to cease to apply to workshops. For the purpose of their duties with respect to workshops (not being workshops to which the Public Health (London) Act, '81 (see sect. 100 applies), a sanitary authority and their officers shall, without prejudice to their other powers, have all such powers of entry, inspection, taking legal proceedings or otherwise as an inspector under the principal Act. If any child, young person, or woman, is employed in a workshop, and the medical officer of the sanitary authority becomes aware thereof, he shall forthwith give written notice to the factory inspector. Every workshop and workplace is to be kept free from effluvia, and where it appears to the sanitary authority that the limewashing, cleansing, or purifying of any such workshop is necessary for the health of the persons employed therein, notice may be given to the owner or occupier to do what is considered necessary, the person receiving notice may in default be fined, or the sanitary authority may do the work and charge such person with the cost. This provision is not to apply to workshops to which the Public Health (London) Act, '81, applies. In every factory of which the construction is commenced after Jan. 1st, '92, and in which more than forty persons are employed, special provision is to be made against fire. Special rules and requirements as to dangerous and unhealthy incidents of employment may be made and enforced under the Act. Other sections of the Act have reference to the period of employment for women, overtime, holidays, and conditions of employment, as to which last point an occupier of a factory or workshop shall not knowingly allow a woman to be employed therein within four weeks after she has given birth to a child; and on and after Jan. 1st, '93, no child under the age of eleven years is to be

employed in a factory or workshop. So much of the Act, sixty-one of the principal Act as enacts that the provisions therein mentioned regarding cleanliness, sanitary matters, overcrowding, etc., shall not apply to a workshop conducted on the system of not employing children or young persons therein, and the occupier of which has served on an inspector notice of his intention to conduct his workshop on the system, is repealed.—[72] ***Fisheries Act** (54 & 55 Vict. ch. 37—royal assent July 21st) is "An Act to carry into effect an international declaration respecting the North Sea Fisheries, and to amend the law relating to sea fisheries and salmon and freshwater fisheries." Part I. of this Act was intended to provide for the carrying out of the scheduled declaration which had been agreed upon between Her Majesty and the King of the Belgians, and the object of which was to remove difficulties which had arisen between British and Belgian fishermen. Part II. contains amendments of the Sea Fisheries Regulation Act, 1888, which have been found desirable in the course of carrying out that Act. Part III. gives power to constitute a Stour Fishery district, and Part IV. restores the power of the public, including any person aggrieved, to take legal proceedings under the Acts relating to sea and river fisheries which had been affected by recent decisions of the High Court.—[73] ***Foreign Marriage Act** (54 & 55 Vict. ch. 74—royal assent Aug. 5th) amends and explains the Foreign Marriage Acts, removing various doubts which have arisen under existing statutes, and expressly confirming all marriages solemnised on board one of Her Majesty's vessels on or before July 31st, '91.—[74] **Forged Transfers Act**, 54 & 55 Vict. ch. 43—royal assent Aug. 5th, introduced by Mr. Pitt-Lewis, for preserving purchasers of stock from losses by forged transfers. It enacts that a company or local authority may make compensation out of their funds for any loss arising from a transfer of any of their shares, stock, or securities, in pursuance of a forged transfer, or of any transfer under a forged power of attorney. The company or local authority may provide, either by fees not exceeding 1s. on every £100 transferred, to be paid by the transferee, or by insurance, reservation of capital, accumulation of income, or in any other manner which they may resolve upon, a fund to meet claims for such compensation. Any such company or local authority may impose such reasonable restrictions on the transfer of their shares, or with respect to powers of attorney for the transfer thereof, as they may consider requisite for providing against losses arising from forgery.—[75] **Hares Bill**. Colonel Dawnay, April 8th, moved a second reading of this bill, the object of which was to empower County Councils to fix a close time in their respective counties for hares during the breeding season. Second reading carried by 124 to 63. Bill subsequently dropped.—[75a] ***Indian Councils Act (1861) Amendment (No. 2) Bill**, introduced by Sir J. Gorst, and proposed, among other things, the enacting of provisions for increase of the numbers of members of Indian councils for making laws and regulations. Withdrawn.—[76] ***Industrial Assurance Bill**. Sir Herbert Maxwell moved second reading, May 32nd. The measure was based on the recommendations of the select committee appointed to inquire into and report on the operation of

sect. 30 of the Friendly Societies Act of 1875, and its provisions affected collecting societies and industrial assurance companies. Referred to a standing committee, where some progress was made, a number of changes being effected in the bill, but on June 22nd and the late Mr. W. H. Smith stated that, having regard to the intricacy of the measure, the interests involved, and the period of the session, it had been decided to withdraw the bill. Bill withdrawn accordingly.—[77] ***Inflammable Liquids Bill** was introduced by the Home Secretary to amend and consolidate the law relating to the keeping, selling and conveyance of inflammable liquid. Strong opposition was manifested to the bill, and it was withdrawn April 13th.—[78] **Intoxicating Liquors (Ireland) Bill**, brought in by Mr. Lea, and provided for entire Sunday closing over the whole of Ireland, and for earlier closing on Saturday evening. Discussed April 15th, when an amendment for its rejection having been defeated by 248 to 94, the second reading was agreed to. Owing to want of time in which to proceed further with the measure, it was withdrawn.—[79] **Justices of the Peace Qualification Amendment Bill**, presented by the Duke of St. Albans, with the object of abolishing the property qualification required for persons serving as county magistrates in England and Wales. Bill supported by Earl Cowper and Earl Spencer, but opposed by Lord Ashbourne and the Lord Chancellor, and rejected (March 3rd) by 62 to 39.—[80] **Land Department (Ireland) Bill** (see sect. 104).—[80] ***Land Registry (Middlesex Deeds) Act** (54 & 55 Vict. ch. 64—received royal assent Aug. 5th). The ***Middlesex Registry Act**, 1891 (54 Vict. ch. 10—royal assent May 11th), made temporary provision for the business of the Middlesex Registry of Deeds, by transferring the registrar's duties to the Land Registry. The registrar, a sinecure just deceased, had received, during the previous five years, an average sum out of fees of £4,859, and the Government wished that the office should not be filled up, and that the saving thus effected should pass into the Exchequer. The object of the later statute was, in further pursuance of the Middlesex Registry Act, 1891, to provide for the transfer of the business of the Middlesex Registry of Deeds to the Land Registry. For the sake of uniformity the rule making powers and other ancillary provisions of the Land Registry Act, 1875, were applied to Middlesex registry business, and an outline of procedure is given in a schedule to the Act.—[81] **Leaseholders Enfranchisement Bill**, to give facilities to leaseholders for the purchase of the fee simple of their holdings; second reading moved by Mr. J. Rowlands, April 29th. Mr. Haldane proposed an amendment declaring it to be inexpedient to pass a Bill which professed to enfranchise leasehold holdings without providing powers for the regulation and control of such holdings in the interest of the community, and the acquisition in the interest of such increment in the value of such holdings as might hereafter take place by reason of public necessities and other causes independent of improvements by the owners. Mr. Secretary Matthews opposed the Bill. The amendment was defeated by 214 to 39, after which the Bill was thrown out by 181 to 168.—[82] **Liquor Traffic Local Veto (Wales) Bill**. Second reading moved by Mr. Bowen Rowlands, March 18th, who explained that its object was to enable owners and occupiers to have effectual control

over the liquor traffic. The rejection of the measure was proposed by the Marquis of Carmarthen. The Home Secretary said the Government would put no pressure upon their supporters as to the way they should vote on the Bill that afternoon, though personally he objected to the measure. Mr. John Morley stated that in voting for the second reading, he confined himself to the support of its principle, leaving himself absolutely free as to the machinery by which that principle was to be applied. On a division the second reading was carried by 185 to 170. The Bill was subsequently dropped.—[83] ***Local Registration of Title (Ireland) Act**, a main object of which was to provide a simple and inexpensive means of registering title in respect of holdings purchased under the Irish Land Acts received royal assent Aug. 5th (54 & 55 Vict. ch. 66). ***London County Council Money Act**. (See heading, County Councils).—***London County Council (Water Supply, etc.) Bill** (see sect. 133).—[84] ***Lunacy Act** (54 & 55 Vict. ch. 65)—royal assent Aug. 5th amends the Lunacy Act, 90, principally in matters relating to local Government and pauper lunatics. Opportunity was also taken to amend the Act of 90 in some matters relating to private lunatics.—[85] ***Mail Ships Act** (54 & 55 Vict. ch. 37)—royal assent July 21st enables Her Majesty in Council to carry into effect conventions which may be made with foreign countries respecting ships engaged in postal service.—[86] ***Markets and Fairs (Weighing of Cattle) Act** (54 & 55 Vict. ch. 70)—royal assent Aug. 5th transfers the powers of exemption conferred by the Act of 87 upon the Local Government Board and the Secretary for Scotland to the Board of Agriculture, and from the Irish Local Government Board to the Irish Land Commission; and enacts that the market authority of every market and fair to which the principal Act applies shall, unless exempted by order of the Board, provide and maintain to the satisfaction of the Board sufficient and suitable accommodation for weighing cattle. The market authority of every market and fair held in any of a number of large towns and cities scheduled in the Act are to send to the Board statistics as to weight and sale of cattle. The Act is applied to Auction Marts, unless exempted by the Board, both as regards the provision for weighing cattle and the making of returns in places from which they are required to be made comes into operation Jan. '92.—[87] ***Marriage Acts Amendment Bill**, introduced by the Bishop of London, who explained that it would deal with certain difficulties which had been experienced in the working of the present law of marriage. Read a second time April 16th, and passed the Lords, but was dropped in the Commons.—[88] ***Marriage of Nonconformists (attendance of Registrars) Bill** to permit ministers of the Wesleyan-Methodist Society, under the direction of the Conference, to perform the marriage ceremony in any duly licensed building without the presence of a registrar. Read a second time without a division (Feb. 24th), on the motion of Mr. Atkinson, who had brought it in; considered in committee, but ultimately dropped, the mover being unable to find opportunities of pressing it forward, though he endeavoured to proceed with it as late as the last day of the session.—[89] ***Marriage with a Deceased Wife's Sister Bill**. Second reading of this Bill was carried in the Commons Feb. 17th, by 202

to 155. Considered in committee June 10th; closure carried on clause 1 by 175 to 94, clause carried by 182 to 99. Withdrawn June 17th, the supporters of the measure being unable to obtain any further opportunity of pressing it forward.—[90] ***Merchandise Marks Act** (54 Vict. ch. 15)—royal assent May 11th enacts that the customs entry relating to imported goods shall, for the purposes of the Merchandise Marks Act, '87, be deemed to be a trade description applied to the goods. Further, the Board of Trade may, with the concurrence of the Lord Chancellor, make regulations providing that in cases appearing to the Board to affect the general interests of the country, or of a section of the community, or of a trade, the prosecution of offences under the Merchandise Marks Act, '87, shall be undertaken by the Board of Trade, and prescribing the conditions on which such prosecutions are to be so undertaken. The expenses of such prosecutions so undertaken shall be paid out of moneys provided by Parliament.—[91] ***Middlesex Registry Act** (see sect. 80).—***Mortmain and Charitable Uses Act** (54 & 55 Vict. ch. 73)—royal assent Aug. 5th alters the definition of land in the Act of 88, and enacts that land may be assured by will (of a testator dying after the passing of the Act) to or for the benefit of any charitable use, but such land shall, notwithstanding anything in the will contained to the contrary, be sold within one year from the death of the testator or such extended period as may be determined by the High Court or by the Charity Commissioners. Any personal estate by will directed to be laid out in the purchase of land to or for the benefit of any charitable uses shall be held to or for the benefit of the charitable use as though no such direction to lay out in the purchase of land had been mentioned. But the Court or the Charity Commissioners may allow land assured by will or proposed to be purchased by personal estate to be retained or acquired for actual occupation for the purposes of the charity and not as an investment.—[92] ***Museums and Gymnasiums Act** (54 & 55 Vict. ch. 22)—royal assent July 3rd was introduced by Mr. Powell, and enables urban authorities to provide and maintain museums and gymnasiums. The Act is to be adopted by resolution, of which special notice is to be given. A museum is to be open to the public free, on not less than three days per week; a gymnasium is to be open to the public free of charge for not less than two hours per day during five days in every week. An urban authority may borrow for the purposes of the Act. The amount expended under the Act is in any year not to exceed the amount produced by a halfpenny rate for a museum and the like amount for a gymnasium.—[93] ***Newfoundland Fisheries Bill**. Lord Knutsford (March 19th) drew attention to the Newfoundland papers laid before Parliament, and presented a bill to revive certain sections of an Act of the 5th George IV. ch. 51, for the purpose of carrying into effect engagements with France respecting fisheries in Newfoundland. Bill read first time. On March 20th, Sir J. Ferguson informed the late Sir J. Pope Hennessy that the draft of the bill had not yet been communicated to the Government of Newfoundland. They were requested in November to procure the necessary legislation for empowering her Majesty's officers to carry out the treaties with France, and the present bill was proposed in

consequence of their declining to do so. Sir W. Whiteway, Premier of Newfoundland, who with other delegates had by this time (April 23rd) arrived in England from Newfoundland, was heard at the bar (a motion to that effect having been made by the Earl of Dunraven and agreed to), and explained the grounds on which the colony was opposed to the measure. Lord Knutsford (April 27th), in moving second reading of the bill, said the Government thought the measure should pass through the House, but that the second reading should not be taken in the Commons until after Whitsuntide. If by that time the Colonial Legislature had passed an Act which in the opinion of the Government secured the execution of the *modus vivendi*, of the decision of the arbitrators on the lobster question, and of the treaties and declarations of the Government, this bill would not be proceeded with. Second reading agreed to after further discussion. On the committee stage (May 4th), the Earl of Kimberley moved that, "in view of the assurance given by the delegates, the committee on the bill should be deferred until a reasonable time had been allowed for legislation by the colony." Lords Knutsford and Salisbury saw no reason to depart from their previous attitude, and the amendment was defeated by 113 to 30. Bill passed through committee. Read a third time, and passed May 11th. Mr. Goschen stated (May 26th) that the Colonial Bill differed in the important particular that the time of its operation was to be limited to one year. It would, therefore, be necessary to proceed with the Government bill in that House on May 28th. When the bill came on for consideration on that day, it was announced that both branches of the Newfoundland Legislature had passed the Draft Bill, with an amendment extending the operations of the measure till the end of 1893, thus securing the enforcement of the *modus vivendi* and the treaties with France, together with the award of the arbitrators during the next three fishing seasons. The late Mr. W. H. Smith recommended the House, in accordance with the suggestion of the delegates themselves, to read the bill a second time, he hoped without discussion, and then to postpone its further consideration for three weeks, with a view to its ultimate withdrawal. Finally, the Government accepted an amendment of Mr. Bryce, understanding that its adoption would not prevent them in case of necessity, from proceeding with the bill again, which amendment, after being verbally altered at the instance of Mr. Smith, was finally agreed to unanimously as follows: "That this House, having been informed that a satisfactory Act has now passed the Legislature of Newfoundland, and declaring its readiness to support the Government in taking all measures necessary for carrying out the treaty obligations of this country, and the arrangements for arbitration made with the Government of France in this matter, does not now proceed to the second reading of the bill." Second reading was accordingly not further proceeded with.—[94] *Penal Servitude Act* (54 & 55 Vict. ch. 69—royal assent Aug. 5th) reduces the *minimum* term of penal servitude from five to three years, and makes certain minor amendments in the Penal Servitude Acts and in the Prevention of Crimes Act, 1871.—[95] *Places of Worship Enfranchisement Bill*. Mr. Samuel Evans (April 22nd) moved second reading of this measure, which

proposed to empower all religious bodies to whom land had been granted on lease by the freeholder for the erection of their places of worship, to purchase the freehold subject to the payment of fair compensation. Mr. Secretary Matthews could not see that any case of public necessity had been made out for the interference with private rights in property which would be involved in the carrying of such a measure. Second reading was, however, carried by 218 to 110. Bill subsequently withdrawn.—[95a] *Possession of Game Bill*. Second reading of this measure was carried (March 11th) without discussion, by 147 to 95. Subsequently dropped.—[96] *Post Office Act* (54 & 55 Vict. ch. 46—royal assent August 5th) enacts that a Treasury warrant may determine (a) what circulars or what commercial, legal, and other similar documents; and (b) what marks or indications referring to the contents of a registered newspaper, when written or printed on the newspaper, or on the cover thereof, shall not be charged at letter postage rates. A Treasury warrant may modify the provisions of sect. 6 of the Act of '70 respecting the supplement of a newspaper, so far as they apply to a supplement which consists wholly of engravings, prints, or lithographs illustrative of articles in the newspaper. There is repealed so much of sect. 6 of the Act of '70 as requires the supplement to a newspaper to be unstitched, but all sheets of a supplement are to be put together at some one part of the registered newspaper, whether gummed or stitched up with the newspaper or not. There is further repealed so much of the said sect. 6 as requires the supplement to a newspaper to have the date of publication of the newspaper printed at the top of every page, sheet, or side on which any engraving, print, or lithograph appears. Power is given to the Postmaster-General to authorise the collection and delivery of letters otherwise than by an officer of the post-office. Another section enacts that "any person not in the employment of the Postmaster-General who wilfully and maliciously, with intent to injure any other person, either opens or causes to be opened any letter which ought to have been delivered to such other person, or does any act or thing whereby the due delivery of such letter to such other person is prevented or impeded, shall be guilty of a misdemeanour, and be liable to a fine not exceeding fifty pounds, or to imprisonment not exceeding six months. Nothing in this section shall apply to a person who does any act to which this section applies where he is parent or in the position of a parent or guardian of the person to whom the letter is addressed. A prosecution shall not be instituted in pursuance of this section except by direction of the Postmaster-General."—[97] *Presumption of Life Limitation Scotland Act* (54 & 55 Vict. ch. 29—royal assent July 3rd) decrees that when any person has disappeared and has not been heard of for seven years or upwards, the Court, on the petition of any person entitled to any estate heritable or movable on the death of such person, or entitled to any estate the transmission of which to the petitioner depends on the death of such person, may, after such procedure or inquiry as it may direct, find that such person has disappeared, and find what was the date on which he was last known to be alive, and found that he died at some specified date within seven years after the date on which

he was last known to be alive, and where there is no sufficient evidence that he died at any definite date, find that he shall be presumed to have died exactly seven years after the date on which he was last known to be alive, and it shall thereafter be competent to the petitioner, and to any other person entitled, to deal with the estate. The Act is not to apply to a policy of insurance.—[98] *Private Bill Procedure (Scotland) Bill, proposed that in the case of private bills relating to Scotland a commission should be substituted for the committees of both Houses, which commission would take evidence in or near the locality affected, and the House would deal with the report of such commission upon third reading, just as it had been in the habit of dealing with the reports of its committees. Mr. Campbell-Bannerman moved as an amendment "That the subjects dealt with in private Bill legislation ought not to be committed for inquiry to a commission until it had been shown that it is impracticable to remedy the evils now complained of by amending the present system of the inquiry by Parliament, and by extending the powers of municipal authorities in counties and boroughs." This was opposed by the Government, and defeated by 150 to 86, the bill being then read a second time and referred to a select committee. Bill was eventually withdrawn.—[99] *Public Accounts and Charges Act (54 & 55 Vict. ch. 24—royal assent July 3rd) abolishes the office of Receiver-General of Inland Revenue, and provides that from and after the next vacancy in the speakership of the Rolls Chapel the sum of £225, now paid annually to the preacher out of the Consolidated Fund, shall cease to be paid.—[100] *Public Health (London) Act (54 & 55 Vict. ch. 76—royal assent Aug. 5th). Two bills were introduced by Mr. Ritchie with the object of consolidating and amending the law, then contained in no less than thirty-five statutes. Bills read a second time April 7th, and subsequently considered and amended by the standing committee on law, being then amalgamated into one measure. The bills, as introduced, re-enacted the old law rendering the occupiers liable to clean the footways abutting on their dwellings. In the Standing Committee this duty was cast, by amendment of a clause, on the local authorities. Mr. Whitmore moved, on the bill being considered by the House, to restore the clause to its original form, so as to render the occupiers liable, but his amendment was defeated by 56 to 41. Third reading agreed to. The Act which comes into operation on Jan. 1st, '92, not only amends the law relating to public health, but may be said generally to do for London what was done for the rest of England by the Public Health Act '75. The existing provisions on the subject affecting London are repealed in so far as they apply to London, either from Jan. 1st, '92, or where, as in some cases, the new Act enables the County Council or the sanitary authorities to make bye-laws as to matters which now form the subject of express enactment, as from the coming into operation of the bye-laws. In any such case the first bye-laws under the Act are to be submitted to the Local Government Board for sanction not later than July 1st. If no bye-laws have been made, the enactment will be repealed at the end of '92, but the time may be extended by an Order in Council to a date not later than the end of June '93. In reference to

nuisances, the Act, among other things, amends in various ways the proceedings for summarily abating a nuisance. A fine is imposed on any person who causes a drain, etc., to be a nuisance, or injurious or dangerous to health, by wilful damage or interference. Other sections have reference to offensive trades. The execution of the powers conferred by the London Smoke Acts, is by the Act entrusted to the port sanitary authority as regards the Thames, and to the other sanitary authorities elsewhere in London, and the provisions of those statutes are extended to the whole of London. The Act gives power to the sanitary authority, on the certificate of a medical officer of health or sanitary inspector, to require that workshops other than bakehouses shall be limewashed, cleansed, or purified, if this is necessary for the health of the persons employed in the workshops, and on failure of the owner or occupier to comply with their requirements the sanitary authority may do the work themselves at the expense of the owner or occupier, as the case may be. The same power is given with respect to factories which are not within the provisions of the Factory and Workshop Acts, '78, and the Acts amending that Act, and to workplaces. The Act makes the sanitary authority the local authority for the enforcement of the provisions of the Act of '78, and the amending Act of '83, relating to the limewashing, painting, and washing of the interior of bakehouses, which are workshops within the meaning of those Acts; the restriction of the use of certain parts of buildings containing such bakehouses as sleeping-places; the prohibition of the occupation of such bakehouses unless certain sanitary conditions are complied with, etc. Section 27 requires the medical officer of health, on becoming aware of the employment in a workshop of any child, young person, or woman, to give notice of the fact to the Factory Inspector. The new Act repeals the obligation of the owner or occupier to sweep and cleanse the footway and water-course. It imposes the duty of keeping the streets (including the footways) properly swept and cleansed upon the sanitary authority, and renders them liable in default to a fine. The Act provides distinctly that it shall be the duty of the sanitary authority, as is implied at present, to secure the proper periodical removal of house refuse, and if without reasonable cause they fail to comply with his requirement, and especially if, where the house refuse is not removed from any premises at the ordinary period, and the occupier serves written notice requiring the removal of the refuse, they fail to comply with the notice within forty-eight hours after service thereof, they are liable to a fine. Numerous other sections of the Act have reference to sanitary conveniences. In regard to unsound food the Act extends to every article of human food the existing enactments respecting the search for, and destruction of diseased or unsound animals, meat, poultry, fish, fruit, vegetables, corn, bread, flour or milk. It provides for a penalty for the sale of any article unfit for food, as well as for its exposure for sale. An animal or article which is diseased or unfit for food may be destroyed and disposed of, although it has not been seized by the officer of the sanitary authority, and the finest terms of imprisonment which may be imposed are increased. When any article liable to be seized as unfit for food is found in

any one's possession the person from whom it is bought shall, unless he prove that at the time of sale he did not know, and had no reason to believe that it was unfit for food, be liable to a fine, as well as the possessor of the article. Where a person convicted of an offence under this section has been within twelve months previously convicted of an offence under it, the Court may, if it finds that he knowingly and wilfully committed both offences, order that a notice of the facts be affixed for a period not exceeding twenty-one days to the premises occupied by such person. A new house is prohibited from being occupied until the sanitary authority, or on appeal the justices, have certified that it has a proper and sufficient supply of water. Where in the exercise of their powers a water company cuts off the water supply to a dwelling-house, they are to give notice of the fact to the sanitary authority. The Act requires every sanitary authority to make bye-laws for securing the cleanliness of water tanks, and other receptacles for storing water for drinking or domestic purposes, or for manufacturing drink for the use of man. The numerous provisions in the Act, relative to infectious diseases, provide among other things for the removal of the exemption of London hospitals from the obligation to notify diseases under the Act of '89, but make a modification in the case of hospitals of the Metropolitan Asylum managers. Sanitary authorities are to provide proper premises with attendance for the destruction or disinfection of bedding, clothing, etc., and to provide vehicles for carrying them to and fro; and such authorities are empowered to convey, disinfect, and return such articles free of charge. Where the sanitary authority requires a house to be disinfected, and does the work itself, it is in future to bear the cost. A fine of £10 may be imposed on any person who, knowing himself to be suffering from any dangerous infectious disease, engages in any occupation connected with food, or carries on any trade or business in such manner, as to be likely to spread the disease. It is unlawful for the owner or driver of a public conveyance knowingly to convey, or for any other person knowingly to place in such conveyance, a person suffering from any dangerous infectious disease. Sanitary authorities are to provide mortuaries, and, if so required by the County Council, to provide a building for the reception of dead bodies for post-mortem examinations. At present, sanitary authorities are empowered to make regulations as to houses let in lodgings, or occupied by more than one family, and which are not common lodging houses: sect. 94 of the Act makes it compulsory on the sanitary authorities to make and enforce such bye-laws as are requisite on the subject. Any person charged under the Act, or the husband or wife of such person, will have the option of being examined as an ordinary witness in the case.

[101] *Public Works Loans Act (54 & 55 Vict. ch. 59—royal assent Aug. 5th) enacts that for the purpose of local loans there may be issued by the National Debt Commissioners, for loans by the Public Works Loans Commissioners, any sums not exceeding in the whole £1,500,000, and for loans by the Commissioners of Public Works in Ireland any sums not exceeding £1,000,000.—[102] *Purchase of Land and Congested Districts (Ireland) Bill. Mr. Arthur Balfour in introducing this measure (Nov. 27th, '90)

stated that, broadly speaking, there was no change in the policy which the Government adopted last Session, and in its main outline the speech which he delivered in the previous February would serve for the introduction of the present bill. [The total advance to be made under the bill was on that occasion estimated at about £33,000,000. But the Government had had forced on their notice the great mechanical difficulties of getting long and complicated measures through the House, and had, in consequence, cut the bill of last year into two halves. The first of these measures contained two parts, one of which embodied this modification of last year's proposal that it grafted the new loan upon the old machinery of the Ashbourne Act, and thereby considerably shortened and simplified the bill. The second half of the first bill dealt with the congested districts, and was practically a re-draft of the provisions of last Session, having reference to the same subject. The bill also gave fixity of tenure to the Land Commission. Bill No. 2 contained those parts of the bill of last year not contained in the first measure, including the provisions for the constitution of a Land Department. There were one or two points regarding which alterations in their proposals generally had been made, among them being that the limitation of twenty years' purchase (to which objection had been taken) did not appear in the new draft. Mr. Labouchere moved an amendment against entertaining any proposal to pledge the credit of this country for the purpose of land purchase in Ireland until the assent of the constituencies had been obtained at a General Election. This amendment was defeated by 268 to 117, and the bills were brought in and read a first time. On second reading (Dec. 2nd, '90) Mr. John Ellis moved an amendment, reciting that whereas, as a result of the policy of the Government in Ireland, equality of conditions as between buyer and seller had been greatly impaired, and the landlord's interest was maintained at an artificial value, and it was not proposed by the bill to invest any Irish authority with a control over the transactions, the House declined to pledge the credit of the country to the scheme proposed by the bill as being alike unsafe to the Imperial Exchequer and unjust to the Irish occupier. This was rejected (Dec. 3rd) by 245 to 173. Second reading was carried by 268 to 130. The House went into committee on Dec. 5th, but progress was at once reported. On the money resolution in connection with the bill, Mr. H. Fowler moved (April 6th) that the salaries of the Land Commissioners should be paid out of moneys provided by Parliament, instead of being charged directly on the Consolidated Fund. This was opposed by the Government, and defeated by 160 to 142. Committee on the Bill resumed same evening, and continued on April 10th, when Mr. Labouchere proposed to omit the provision by which the stock to be raised for the purpose of advances for Land Purchase was to be "guaranteed." This was rejected by 232 to 138. Mr. John Morley (April 16th) moved a proviso to the effect that no guaranteed land stock should be issued by way of advance in any county for the purchase of any holding unless the making of such advance in that county should have been previously approved by a resolution of the County Council elected to represent the county in which the holding is situate under an Act of this or the next

ensuing Session of Parliament. The late Mr. Parnell thereupon proposed an amendment to the effect that this proviso should not be operative until after the establishment of elective County Councils in Ireland. Debate resumed April 17th, when, after some animated proceedings, Mr. Parnell's amendment was withdrawn, and Mr. Morley's amendment defeated by 247 to 170. Clause 1 carried (April 20th) by 247 to 126. Consideration of the clauses of the bill concluded May 15th. House re-assembled May 21st, after Whitsuntide recess, to proceed with new clauses. Mr. Balfour (May 21st) moved the insertion of a new clause providing for the allocation of the sum available for purchase in proportion to the value of the holdings. The clause was supported by Mr. Parnell, as well as by numerous Gladstonians, but opposed by Mr. Macartney (an Ulster Conservative), by Lord Lyndington and other Unionists, and by the McCarthy section of the Nationalists. In replying to some of the criticisms passed upon the clause, and to an observation from the other side, Mr. Balfour said there was no more chance of another Land Purchase Bill being brought in, and of more millions being voted for the purpose, than there was of the introduction of the wildest and most chimerical scheme that ever entered the mind of man. Second reading of the clause was carried by 111 to 26. An amendment of Mr. Lea's, increasing the leading figure in the clause from £30 to £50, was subsequently accepted by the Chief Secretary, and agreed to. The clause, as amended, was carried by 108 to 22. On May 22nd Mr. Sexton moved that no advance should be made for the purchase of any holding on the estate of any landlord if it were proved, on the application of a former tenant, that the landlord had in any case refused, in a manner which the Land Commission might think unreasonable, to submit to arbitration any dispute relating to the estate between him and such person formerly in occupation. This was opposed by Mr. Balfour, and defeated by 62 to 20. The bill passed through committee the same evening, having been under consideration in committee at twenty-four sittings of the House. Report stage began June 1st. A new clause brought forward by Mr. Sexton (June 2nd) to give priority in purchase to tenants whose tenancy had been determined by process of law, was opposed by Mr. Balfour, and defeated by 112 to 74. Mr. T. W. Russell (June 4th) moved a new clause, providing for purchase by tenants formerly in possession of holdings, which was accepted by the Government, and, after being amended, added to the bill. Report stage concluded June 12th. Bill discussed on third reading (June 15th), and, an amendment of Mr. Labouchere's for its rejection having been defeated by 225 to 96, third reading agreed to. Second reading in the Lords agreed to after two evenings' discussion (June 26th). Passed through committee with amendment (July 2nd). Further amendments made (July 10th), read third time (July 14th), Lords' amendments considered by the Commons, and further amendments made to them. [108] *As the Purchase of Land (Ireland) Act (54 & 55 Vict. ch. 48) received royal assent Aug. 5th. Summarising Earl Cadogan's explanatory statement, in submitting the bill to the House of Lords on June 25th, '91, and which, on all leading points of the measure, still holds good, the effect of the Act may be thus explained: The first and leading principle

is a pledge of British credit up to a certain limit to carry out its objects. The majority of its clauses have been framed so as to enable the Government to use that credit so as to avoid throwing any risk whatever on the tax-payer, and in order to provide, if possible, absolutely sufficient guarantees. The second object is to provide for the allocation of the money to be lent for land purchase; and the third object is to provide for the relief of congested districts; and there are also a few clauses with reference to the Land Department. These objects it is proposed to attain as follows. The main security taken over and above the primary security of the holding itself is the power to capture, for purposes of security against loss to the British taxpayer, the Imperial contributions to Irish local purposes. The financial provisions of the Act are engrafted on the system of land purchase under the Ashbourne Act, and this Act is to be read into that Act with certain modifications. When the landlord and tenant are agreed on the sale of a holding—the Act being entirely permissive in its character,—and when the Land Commission have sanctioned the advance, the advance is made to the landlord, not in cash, but in the issue of guaranteed Land Stock of the nominal amount of the advance, producing dividends at the rate of 2½ per cent. In order to provide for the payment of these dividends, and for the redemption of the whole amount in forty-nine years, the purchasing tenant pays a purchase annuity for that period, the normal rate of which is 4 per cent. on the advance, but which is fixed at a higher rate during the earlier years of the term, in order to provide for the following purposes: 2½ per cent. on the advance, 1 per cent. Sinking Fund to pay off the capital in 49 years, and 1 per cent.—5s. per £100, termed in the Act the "county percentage"—which, subject to charges in connection with the guaranteed fund, is devoted to local purposes, and primarily for the purpose of providing labourers' dwellings in the various counties. The purchase annuities are paid into the Land Purchase Account provided for in the Act; and if there is any deficiency in the payment either of interest or capital, or in the county percentage, that deficiency is temporarily advanced out of the Consolidated Fund, this temporary advance being to a certain extent an automatic operation. It will be obvious that, if at any time there are arrears in the payment of annuities and interest, it would be impossible to obtain investors in Land Stock at 2½ per cent. Therefore the Act provides for the automatic filling up of any deficiency by the Consolidated Fund, and the object of guarantees is to recoup the Consolidated Fund. The Guarantee Fund is of two kinds—there are the cash portion and the contingent portion. The cash portion consists of the Irish Probate Duty Grant, which is a little over £200,000 per annum, the Exchequer contribution of £40,000, which is to be paid each year out of the Consolidated Fund, and the county percentage. In so far as the Exchequer contribution is not required to make up any deficiency, it is to be invested annually until it reaches £200,000, which is reserved for an object which will be subsequently explained. These two items form the cash portion of the Guarantee Fund. As to the contingent portion of the Guarantee Fund, in the first place it includes the Irish share of the local taxation

(Customs and Excise) duties, amounting to £700,000, and the following local grants:—Rates on Government property, grants to model schools and national schools, grants for the maintenance of children in industrial schools, grants in aid of workhouses and dispensaries, and grants towards the cost of pauper lunatics in district asylums. In a case in which the cash portion of the fund has been used, there is a provision for enabling the Lord-Lieutenant to order a levy to be made by the Grand Jury. This levy will defend the locality from the loss which would be entailed by touching any contingent portion of the Guarantee Fund. There is one more procedure in case of failure, wholly or in part, to recover arrears. Under the Act of '85, after exhausting all legal remedies against a tenant and his holding, the Land Commissioners were authorised to declare the amount they failed to recover to be an irrecoverable debt, and then it was possible to resort to the one-fifth guarantee deposit. By this Act the Commissioners are enabled to retain the guarantee deposit in every case, and only one-half of the sum declared to be irrecoverable is to be borne by the guarantee deposit. The reason for this latter provision is as follows: Under the Ashbourne Act the State had but one security in addition to the holding—namely, the one-fifth guarantee deposit. Under this Act the State has two securities—the guarantee deposit and the contribution to the local rates, that is, the Guarantee Fund; and it is only fair that both should bear their proportion of the loss. The great defect in all systems of land purchase has been the absence of provisions for periods of exceptional distress and calamity. In former Acts the only remedy was the sale of the purchaser's interest. This Bill provides two distinct resources against such a contingency. The first is provided by the increase of the annuity payable in the earlier years, called the purchaser's Insurance Fund, on which he can draw in seasons of distress. The second is the Reserve Fund to be created by means of the carrying over of the £40,000 a year Exchequer contribution, in so far as it is not required under the Act. The purchaser's Insurance Fund is the difference between 80 per cent. of the annual value of the holding, which will be payable for five years, and an annuity of 4 per cent. on the advance. This is only used when the advance is less than twenty years' purchase of the annual value of the holding, but the period may be extended by an order of the Lord-Lieutenant in certain exceptional circumstances. The other source of the Reserve Fund is created by paying over £40,000 a year out of the Exchequer contributions until the amount so carried has reached £200,000. Statistics of the working of the Ashbourne Act prove that the tenancies under £50 are as twelve to one compared with those over £50, and the proportion of money allocated under the Act of '85 is two to three. If the chief object of land purchase is to increase the number of peasant proprietors, and if the funds available are limited, it is obvious, if you wish to make your money go far in the desired direction, it is absolutely necessary that there should be some method of proportioning the advances to the relative numbers of the holdings. There is also a provision which enables tenants who were formerly in occupation of a holding to purchase. This is limited to cases

where a tenancy has been determined since May 1st, '79, and the former landlord or his successor are still in possession, and it can only be resorted to within six months after the passing of the Act. Lastly, there is a provision of considerable importance which authorises the re-lending of money provided by British credit. As soon as twenty-five times the share of a county in the Guarantee Fund has been advanced, the Treasury may order additional advances in that county out of the capital accumulated in the Sinking Fund, so that practically there will always be money available for land purchase in Ireland. A district may be declared to be a congested district when the proportion between the total population of electoral divisions and the total rateable value is less than £1 6s. 8d. per head. Those districts are formed into separate counties for the purposes of the Act, and in the Guarantee Fund in those districts £1,500,000 of the Irish Church Fund is substituted for that part of the contingent Guarantee Fund which comes under the head of model and industrial schools; and there is one condition under which those congested districts will receive their guarantees,—namely, that when a levy is made, half only will be made out of the county, and the other half will be made out of the £1,500,000 of the Church Fund which is devoted to these congested districts. Then a Congested Districts Board is formed, whose chief duty will be to bring about the amalgamation of small holdings, to assist migration and emigration, and generally to develop the industries and resources of the poorest districts of Ireland.—(104) The second of the two bills introduced by Mr. Balfour, which was to constitute a Land Department, and to amend the laws relating to land purchase in Ireland, was read a second time Nov. 27th, and the House went into committee upon it on Dec. 9th, but progress was at once reported. This bill was withdrawn in June, but certain clauses of it were by general consent embodied into two bills, and duly became law. One of these measures, the *Turbary (Ireland) Act* (54 & 55 Vict. ch. 45—royal assent Aug. 5th), provides for and regulates the user by purchasing tenants of rights of turbary; and the other, the *Redemption of Rent (Ireland) Act* (54 & 55 Vict. ch. 57—royal assent Aug. 5th), provides for the redemption of rent by long leaseholders and others.—(105) *Railway Companies Return Tickets Bill*. Dr. Clark (Jan. 27th) moved second reading of this measure, the object of which was to enable purchasers of railway tickets to make the return journey at any time. Sir M. Hicks-Beach said there were possibilities of an extension of the present rules applying to return tickets, but this was a bill to which the Government could not consent. Second reading negatived by 206 to 39.—(106) *Railway Rates Bill*. On the bill to confirm a provisional order made by the Board of Trade under "The Railway and Canal Traffic Act, 1888," containing the classification of merchandise traffic, and the schedule of maximum rates and charges applicable thereto, of the Great Eastern Railway Company, and certain other railway companies connected therewith, Mr. P. Stanhope moved (March 6th) that the House declined to proceed with the consideration of a scheme for the revision of railway rates which was based upon the full recognition of the legality of the station terminal charges. Amendment withdrawn after discussion, and bill, with

eight others, referred to a joint committee of the two Houses. Lord Balfour (March 10th) moved a resolution concurring in the appointment of the proposed joint committee, which was agreed to. After many sittings of the joint committee, the bills were reported, with amendments, and were considered by the Commons on July 24th, when Mr. P. Stanhope moved an amendment declaring that the conclusions of the committee did not afford a final or equitable settlement, and that further amendments in relief of trade were urgently required. This was defeated by 130 to 64. The President of the Board of Trade proposed or assented to several amendments which, in great part, met objections of members. All the bills subsequently became law.—[107] **"Ranges Act (54 & 55 Vict. ch. 54—royal assent Aug. 5th)** (see sect. 131) gives power to a volunteer corps, with the consent of the Secretary of State, to purchase land for military purposes. A county or borough council may, at the request of one or more corps, purchase and hold lands on their behalf. If a corps, or a county or borough council on behalf of one or more corps, desire to purchase lands compulsorily they may petition the Secretary of State, who may either dismiss the petition or direct a local inquiry to be made; and if, after inquiry, he is satisfied the land ought to be taken, he may submit a bill for that purpose to Parliament, provided that any petitioner against the bill may be heard in committee against it. Provision is made under which the corps or council may obtain the necessary funds.—[107a] **Reformatory and Industrial Schools Act (54 & 55 Vict. ch. 23—royal assent July 3rd)** was introduced by Mr. Howard Vincent, with the object of enabling the managers of reformatory and industrial schools to take advantage of favourable opportunities which might present themselves of advantageously starting in life the children under their charge. It had been found in practice that in numerous cases the veto of parents prevented such opportunities being seized. The managers may, with his own consent, apprentice any well-conducted child to, or dispose of him in, any trade, calling, or service, or by emigration, notwithstanding that his period of detention has not expired; provided that where the offender is to be emigrated, and in any case unless he has been detained for 12 months, the consent of the Secretary of State shall also be required for the exercise of any power under the Act.—[108] **Religious Disabilities Removal Bill**, for removing the disabilities of Roman Catholics to hold the offices of Lord Chancellor of Great Britain and Lord-Lieutenant of Ireland, brought in by Mr. Gladstone, Mr. John Morley, Mr. Campbell-Bannerman, Mr. Asquith, and Sir H. Davey. The debate on second reading was looked forward to with great interest. The late Sir John Pope Hennessy gave notice that he would move, after second reading, an instruction empowering the committee on the bill to insert a provision relieving the Sovereign and members of the Royal Family from all religious disabilities, but this was withdrawn before the debate came on. Mr. Gladstone, in moving second reading, Feb. 4th, described the measure as one for the removal from the statute book of an anomaly, an injustice and a discredit, and although he believed it to be in law seriously doubtful whether Roman Catholics were at that moment disabled from holding the offices in question, no person charged with the formation of a Government

would feel safe in recommending any one about the validity of whose acts there could be the smallest doubt. So far as he knew there was no legal obstacle to the office of Lord Chancellor, ecclesiastical patronage and all, being held by a Jew, by a Mahomedan, by a Buddhist, or by a Hindoo, who would exercise the right of presentation to, he thought, 800 benefices; or by a materialist, an agnostic, or an atheist—all these people were to be able to hold the office of Lord Chancellor and to recommend ecclesiastical appointments, while the successors of Pascal, of Thomas-à-Kempis, of Pope Gregory who sent missionaries to the southern parts of this country, were to be disabled. The late Mr. W. H. Smith, in proposing the rejection of the measure, expressed surprise that this speech was delivered now instead of at some former time during the many years the right hon. gentleman had been in Parliament. Mr. Gladstone interposed to remark that he delivered similar speeches both in regard to the Lord-Lieutenancy and the Lord Chancellorship in 1867. "That," continued the First Lord of the Treasury, "was when the right hon. gentleman was in opposition, but he had made no such proposal as this during the years since in which he had been responsible for the conduct of the government of the country." Mr. Smith's objection to this measure was that while it applied only to two persons, it alarmed and distressed very large classes of Her Majesty's subjects. Under the legislation to be proposed by the right hon. gentleman, they would have an independent Irish Parliament consisting generally and mainly of Roman Catholics, a Government generally and mainly consisting of Roman Catholics responsible to that Parliament, and they would have a Lord-Lieutenant qualified by the bill which the right hon. gentleman now proposed, who also would be a Roman Catholic, and who would be the sole link which would remain between the Government of England and of Ireland. The bill was rejected by 256 to 224, majority 32. Viscount Cranborne and 3 other Conservatives voted for the bill; and 3 Gladstonians, including Mr. Howell, voted against. The Unionist vote was divided, 9 of the party, including Mr. Chamberlain, Mr. Courtney, Sir H. James, and Lord Wolmer voting for, and 21 against. On Monday, Feb. 19th, the Attorney-General respectfully declined to answer inquiries addressed to him by Mr. Causton and Mr. Sumner, and raising the questions whether a Roman Catholic or a Jew was eligible to hold the offices of Lord Chancellor of England and Lord-Lieutenant of Ireland. These inquiries, said Sir Richard Webster, involved points of law of great difficulty, which could not be properly dealt with in the limits of an answer to a question. He knew that very different opinions were entertained by lawyers of great eminence both in and outside the House; therefore upon such a point his own personal opinion would be of no guidance to hon. members.—[109] **"Russian Dutch Loan Act (54 & 55 Vict. ch. 26—royal assent Aug. 5th)** makes provision for paying off the British portion of the Russian Dutch Loan, the residue of which remaining outstanding on Dec. 31st, '90, was about £56,529. [110] **"Savings Banks Act (54 & 55 Vict. ch. 21, royal assent July 3rd)** enacts that a trustee savings bank may not be described in any manner which imports that the Government is responsible to depositors for money placed in

the safe keeping of the bank. An Inspection Committee is to be established who may appoint persons to inspect the books and accounts of trustee savings banks, and to examine and report from time to time whether the bank has complied with the requirements of the law relating to the bank as to the security to be taken from officers, the accounts and the conduct of business, and whether any portion of the expenditure is excessive or unnecessary. A bank may be called upon to reduce its expenditure, and if it fail to do so or to remedy certain specified defaults, the National Debt Commissioners may close the account of the trustees or report to the Treasury with a view of action being taken under sect. 2 of the Act of '87 (under which a commissioner may be appointed to examine the affairs of the Bank) or adopt both of these courses. The Act also includes provisions under which a trustee savings bank and the post office savings bank may not receive any deposit which will make the sum standing in the name of any depositor exceed £200; interest may be allowed in full on the sum standing in the name of a depositor so long as it does not exceed £200, but whenever the sum exceeds that amount, interest shall not be allowed on the sum in excess. A depositor may, not more than once in any savings bank year, deposit money to replace money previously withdrawn in one entire sum during that year.—[11] School Board for London Superannuation Bill, brought in by Sir Richard Temple; read a second time Jan. 27th, and committed to a select committee, who were subsequently instructed by the House to consider the whole question of the superannuation of elementary school teachers in England and Wales. The committee chose Sir R. Temple as chairman, took much evidence actuarial and otherwise, and on July 20th presented a special report stating that they thought it was not desirable to proceed with the bill referred to them. They therefore reported the same without amendment to the House. Some witnesses had been examined by the committee upon the general subject referred to them, but, as the actuarial evidence was very complex, and had only recently been placed before them, and, as further evidence would be required, the committee had not been able to consider any report. They had therefore agreed to report to the House the evidence they had already taken, and recommended that a committee be re-appointed in the next session of Parliament. With the report was included a draft report proposed by the chairman. This had not been approved or even considered in detail by the committee, but looking to the information it contains, and to the experience and position of the hon. member who prepared it, we have had a summary of it made. Sir Richard Temple is convinced that superannuation is desirable for the sake not only of the teachers but of the schools; it is impossible that pensions should be allowed to teachers from public funds without contributions from themselves; and if a system of superannuation is to be called into existence there must be some authority, some organisation, and even some aid from the State. But when the principle comes to be applied to the vast body of teachers in England and Wales, there are a variety of conditions demanding a difference in treatment. In the first place, there are the teachers of the future. For these the conditions of the problem of superannuation

are comparatively simple. Then to these may be added the teachers who have recently entered the service. In the second place, there are the teachers of the present who are still in that service which they entered long ago, who have passed into middle life, and some of whom have already advanced near to the pensionable age. For these the conditions of the problem of superannuation are complex and difficult of solution. Respecting the teachers of the future, one primary calculation is simple. Each person, man or woman, may subscribe a certain sum annually to a fund under State management. With compound interest these subscriptions accumulate. The subscriber who retires before the time of superannuation arrives, may receive the present value of the annuity payable at the age of sixty-five which his past payments have purchased, with as much of the interest as might be allowable. All this would be arranged on what is known as "sur-render value." But in the event of there not being retirement, the subscriber would be entitled on reaching a certain age to such a pension as the amount of subscription with interest would purchase. The plan amounts to a compulsory system of superannuation under State management. But the pension would be very moderate, perhaps even small in comparison with the hopes that have apparently been entertained by many, if not all, of the teachers. For example, from tables furnished by the actuary, it appears that a teacher subscribing £1 per annum from twenty to twenty-one years of age would become entitled at sixty years of age to a pension of £11 per annum, or £18 at sixty-five. These (and other calculations given) do not provide for any repayment to heirs in event of death. If this is to be allowed then the pensions would be less favourable. Further, sixty and sixty-five have been suggested as possibly pensionable ages. The evidence showed that educational authorities generally would regard the age of sixty-five as too high. They would hold that the age should be fixed at sixty; some even would prefer fifty-five. But, however desirable it may be, that pension should be made compulsory at sixty, the financial difficulty is hard to be overcome, perhaps even insuperable. The pension obtainable after any subscription that could be reasonably expected up to sixty years of age would be in many cases too small for ordinary subsistence. The draft next adverts to the second category of present teachers, excluding, as already explained, all the juniors, those below a certain standing say of ten years, but including all others over ten years; or, if this be thought to constitute too high a limit, then say five years, but the greater the number of those who can fairly be excluded the less will be the difficulty of the calculation for those who remain. The remainder then will include those who are approaching middle life, those in middle life, and those beyond it. The actuarial tables show but too plainly that no subscriptions which these teachers could make up within the years available to them before pension time would obtain any adequate pension. A teacher of thirty years of age subscribing £4 per annum would obtain a pension of £24 at sixty, and £44 at sixty-five; a teacher of forty years of age would obtain a pension of £13 at sixty, and of £24 at sixty-five. If in the latter case, the teacher of forty, the subscription were doubled and made £8 annually with refer-

ence to the short period during which he would subscribe, still he would obtain a pension of only £26 at sixty, and £48 at sixty-five. Such pensions are considerably less than those shown above for the subscribers who began subscribing at twenty years of age, namely, £44 at sixty and £72 at sixty-five. To remedy this difficulty other means of increased payment might be devised, inasmuch as teachers thus situated would become entitled to pensionary benefits, towards which they had not adequately contributed. Great care would have to be exercised in graduating the special increase of rate of subscription, inasmuch as a person of forty years of age ought to pay a higher rate under these circumstances than one of thirty, and one of fifty than one of forty. But, at the best, it is hardly possible for them after forty years of age to afford subscriptions adequate to obtain a reasonable pension. Yet it would be hard to omit or exclude these persons, who comprise the best and the most experienced people in the profession, from any national scheme of pensions for teachers. From this point of view, Sir Richard could not perceive any mode of providing pensions for the teachers of, say thirty years of age and upwards now in the service without some State assistance, or some substantial guarantee which amounts to the same thing, though every effort should be made to reduce the extent of such assistance or guarantee. One method would be to fix a certain maximum scale of pensions for this particular class of teachers only, in reference to, say the calculations made above, and then to guarantee from the State the difference between the pension due according to the subscriptions (especially increased as above) and the pensions of the scale. For instance, if the subscriptions afforded a pension of £48, and the ordinary pension were assumed at £72 as shown above, the difference between the two sums might be made up by the State. This is only by way of illustration. Or, again, it might be arranged that to the pensions obtainable on the subscriptions a certain proportion, say one-fourth or one-third, should be added, under the provision that the total should not exceed the maximum of the scale. Or, better still, the State might allow a pension of £1 for every year of past service; for example, £20 for one who had twenty years' service; £30 for one who had thirty years' service, and so forth. To such pension there would be added any benefit to which the person might be entitled by subscriptions paid on the principles already indicated. This plan is especially suitable owing to the great variety in the periods during which the teachers have served since their certification, as shown in the returns. Heretofore no difference between men and women has been suggested. With women retirement on marriage is not infrequent; and they have naturally been anxious to secure the right to take with them the value of their subscriptions, and to that Sir Richard would agree. Further, the women feel anxiety regarding the pensionable age, as they wish that it should be fixed earlier for them than for the men. The evidence shows, too, that many educational authorities suggest fifty-five as the pensionable age for women, on the ground that their strength begins to fail sooner than that of men, and that after fifty-five they cannot well bear the nervous exhaustion which is caused by the work of teaching. Sir Richard recog-

nises the weight of this consideration. But even for the future teachers the financial difficulty will be almost insuperable. It has been shown above that the subscriptions will hardly afford a reasonable pension at sixty years of age, though they give a much better one at sixty-five; but at fifty-five they would afford only a pension of quite an inadequate amount. The same difficulty in an intensified degree would apply to the present teachers over, say, thirty years of age. It remains to notice the scheme presented by the School Board for London. Apart from the extra subscription for repayment of subscriptions on retirement, the rate of ordinary subscription for pension was proposed to be 2 per cent. on the salaries; but the fund, formed from this 2 per cent., was to have the benefit of the subscriptions of those who might die or retire before the pensionable age; and under this School Board the retirements have been numerous. But the scale of pensions was derived from the Civil Service Act, 31 Vict. ch. 31, which is much more liberal than any average of pensions that arise from the calculations already presented in this draft report. The Board did, as shown by the Bill, propose that the guarantee of the London rates should be given to the pension fund formed by the subscriptions, and did reckon on some payments for a while falling on the rates, though it was hoped that such amounts would be repaid by the fund afterwards. The calculations, however, made by the official actuary show that for some time a burden, greater than anything that the Board anticipated, would be thrown on the rates. Sir Richard cannot suggest that such a liability be incurred. If there is to be a separate scheme for the teachers under the London School Board, then the conditions would need to be revised; in other words, the subscriptions would have to be raised, and the benefits would have not only to be diminished but also altered in character, so that no appreciable burden should be thrown upon the rates for the future teachers, at all events. Such a revision could be made only by the Board itself if the scheme were remitted to that body for reconsideration. In that case Sir R. Temple apprehends that the Board would find itself obliged to make the same distinction as that already pointed out between the present and future teachers. And for the present teachers some assistance would be inevitable. But he observes that the calculations applied to the teachers in the country at large are applicable to the School Board for London. One point, however, needing adjustment would be that the teachers under the Board have for some time past been paying subscriptions towards a pension fund, which now amounts to a considerable sum. They would be entitled to retain this sum for their own advantage, whatever arrangement may be made. Sir Richard throughout assumes that whatever State aid may be furnished will be from the Treasury, and not from local rates. Together with the teachers there are others engaged in educational work, such as clerks, local inspectors, and others. Such officials are not so largely employed in voluntary schools, but under the various School Boards they are numerous, and often hold important posts. The School Board for London included these officials in the pension scheme; and Sir Richard considers that they should be thus included

everywhere under the same conditions as the teachers. It will be noted that in this draft report the Chairman has adverted to retirement only in health and strength as medically certified, and not to retirement from sickness before the pensionable age. Nor has he included surrender value to the heirs in case of death. If either or both of these contingencies should be included, then an ancillary scheme (which would not be difficult) would have to be provided.

—[112] *"Schools for Science and Art Act (54 & 55 Vict. ch. 61—royal assent Aug. 5th).* The object of this measure is to facilitate the transfer of schools for science and art to the local authorities, which, under the Technical Instruction Act, '89, are authorised to supply, or aid the supply of, technical or manual instruction.

—[113] *"Seal Fishery (Behrings Sea) Act (54 Vict. ch. 19—royal assent June 11th)* was introduced "to enable Her Majesty, by Order in Council, to make special provision for prohibiting the catching of seals in Behrings Sea by Her Majesty's subjects during the period named in the Order." The late Mr. W. H. Smith, in moving second reading (June 1st), explained that it was desired to settle the question involved amicably and by arbitration, and that Her Majesty's Government had been in communication with the Government of the United States and the Government of the Dominion of Canada with that view. The prohibition to fish would only be for a limited time, such as would be necessary to procure the award.—[114] *Slander of Women Act (54 & 55 Vict. ch. 51—royal assent Aug. 5th)* enacts that words spoken and published after the passing of the Act, which impute unchastity or adultery to any woman or girl, shall not require special damage to render them actionable.—[115] *Small Holdings Bill.*

Mr. Jesse Collings (Mar. 11th) moved the second reading of this Bill, explaining that its object was to provide facilities for the acquisition of land by the labouring population and others in the rural districts. The principle of his present Bill had been adopted by the Select Committee, and what hon. members would pledge themselves to, by voting for the second reading of the Bill, was some measure on the lines suggested by the Select Committee [see ed. '91, Session, sect. 92]. Mr. Chaplin took the principle of the Bill to be this; that the community should have power, under certain restrictions, to acquire land by the aid of the State for the purpose of creating a class of cultivating owners. That was a principle in which he believed they all concurred: it was one, at all events, of which Her Majesty's Government heartily approved, and that being the principle of the Bill, the Government would have no hesitation in supporting the second reading of the measure. Second reading agreed to. Bill subsequently dropped.—[116]

"Stamp Duties Management Act, and Stamp Act (54 & 55 Vict. ch. 38 & 39—royal assent July 21st) consolidate the law relating to the management of stamp duties, and the several enactments relating to the stamp duties payable on instruments.—[117] *"Statute Law Revision Act (54 & 55 Vict. ch. 67—royal assent Aug. 5th)*

carries on the work of statute law revision several years later in the present reign, and also deals with a number of Scottish and Irish statutes.—[118] *"Supreme Court of Judicature Act (54 & 55 Vict. ch. 53)* received royal assent Aug. 5th, and provides, among other things,

that every person who has held the office of Lord Chancellor shall be an *ex-officio* judge of the Court of Appeal, but he shall not be required to sit and act as a judge of the Court unless upon the request of the Lord Chancellor he consents so to do; and that the House of Lords, in the hearing and determination of appeals in Admiralty actions, may call in the aid of one or more assessors specially qualified, and hear such appeal, wholly or partially, with the assistance of such assessors.—[119] *"Supreme Court of Judicature (London Causes) Act (54 Vict. ch. 14—royal assent May 11th)* enacts that sittings may be held in the city of London by judges of the High Court under commissions issued for the trial of issues or inquiries in cases *ad nisi prius*.—[120] *"Taxes, Regulation of Remuneration Act (54 Vict. ch. 13—royal assent May 11th)* (see also sect. 23), provides that clerks to commissioners and assessors, and collectors of income tax shall henceforth be paid by salary instead of by pounce.—[121] *Teachers' Registration and Organisation Bill (introduced by Sir R. Temple)* and the *Teachers' Registration Bill (brought in by Mr. A. Acland)* were referred to a select committee, of which Sir W. Hart-Dyke was appointed chairman. This committee reported the Bills, without amendment (July 14th), and they were subsequently dropped. The committee also presented a special report, in which they made the following recommendations:—That registration of teachers in secondary schools is in principle desirable. That the most satisfactory arrangements in any scheme of registration that may be adopted would be (a) that existing teachers should not be put on the register merely as such, but should not suffer from any legal disability; (b) that both existing teachers and future teachers should be admitted to the register on producing such evidence of intellectual requirements and teaching capacity as might be required by the Council; (c) that the register should, as soon as might appear reasonable in each case, be made compulsory upon existing teachers in the event of their appointment to teach in a secondary school assisted by endowments or public money, and upon future teachers in these, and ultimately in all other secondary schools; (d) that teachers certified by the Education Department should be placed on the register with an indication, as in the case of other teachers, of the nature of their certificate. That the qualifications for registration should include evidence, both of attainments, and of teaching capacity. That with this object additional facilities are required for the training of teachers in secondary schools. That any educational council to be established for the furtherance of such registration, should be composed of nominees of the State, representatives of the Universities, and members elected by the teaching profession.—[122]

Technical Instruction Act (54 Vict. ch. 4—royal assent March 26th) was introduced by Sir H. Roscoe, and enacts that, subject to the conditions and restrictions contained in the Technical Instruction Act, '89, a local authority may—(a) Make such provision in aid of the technical or manual instruction for the time being supplied in a school or institution outside its district as may, in the opinion of the authority, be necessary for the requirements of the districts in cases where similar provision cannot be so advantageously made by aiding a school or institution within its district; and

(b) Provide or assist in providing scholarships for, or pay or assist in paying the fees of, students ordinarily resident in the district of the local authority, at schools or institutions within or outside that district.—*Theatres, etc. (London) Bill* (see heading *COUNTY COUNCILS*).—[123] **Tithe Rent-Charge Recovery Bill*. Sir M. Hicks-Beach (Dec. 1st), in moving second reading, explained that the bill only dealt with the question of recovering tithe, and announced that a small commission would be appointed to inquire into the question of tithe redemption, and of matters connected with it. Mr. Stuart Rendel moved an amendment declaring that tithe rent-charge in Wales ought to be applied in accordance with the constitutionally expressed wishes of the people of the principality. This was defeated by 224 to 130, and the bill read a second time. On the committee stage, Mr. F. Stevenson moved an instruction empowering the committee to provide for an equitable revision of tithes, in accordance with the altered conditions of agriculture. The amendment was rejected by 203 to 68, and the House went into committee, progress being at once reported. Committee resumed Jan. 21st, when a proviso of Sir M. Hicks-Beach that nothing in the Act should impose any personal liability upon any owner or occupier of lands for payment of tithe rent-charge, and that the court should not, by virtue of the Act, have power to imprison by reason only of the non-payment of tithe, was agreed to, the exclusion of imprisonment being, at the instance of Mr. S. Evans, extended to costs. On the clause empowering the court to remit tithe when it exceeded two-thirds of the annual value of the land, Mr. C. W. Gray moved to make the amount one-half, but his proposal was defeated by 178 to 124. Bill passed through committee Feb. 3rd. Third reading carried Feb. 12th, by 250 to 161. Marquis of Salisbury moved second reading in Lords Feb. 10th, which was agreed to after a discussion and an amendment of Lord Brabourne for the rejection of the measure had been negatived without a division. As the Tithe Act (54 Vict. ch. 8) received royal assent March 26th. Tithe rent-charge issuing out of any lands is to be payable by the owner of the lands, notwithstanding any existing contract between him and the occupier, and any such contract made after the passing of the Act is to be void. But occupiers liable under contract made before the passing of the Act are to be liable to pay the owner such sum as the owner has properly paid on account of the tithe rent-charge to which such occupiers are liable under their contract to pay, exclusive of any costs incurred or paid by the owner. It is provided that where the lands are occupied by several occupiers under contract to pay, any of them shall only be liable to pay such proportion of the sum paid by the owner as the ratable value of the lands occupied by him bears to the ratable value of the whole. Such sum is to be recoverable from the occupier by distress, and not otherwise. Where tithe is in arrear for not less than three months, the person entitled to it may recover through the county court; and elaborate provisions to cover various cases and contingencies are contained in the Act. Nothing in the Act is to impose or constitute any personal liability upon any occupier or owner for payment, and neither is to be imprisoned by reason only of non-payment. Tithe rent-charge exceeding two-thirds of the

annual value of the land may be remitted to the extent of the excess by the court.—[124] **Training Colleges (Ireland) Bill*, introduced by Mr. Arthur Balfour, was to provide for the reimbursement to training colleges in Ireland of certain past expenditure on their sites, buildings, appurtenances, premises, and fixtures, the institutions in question being St. Patrick's Training College, Drumcondra; Our Lady of Mercy Training College, Baggot Street, Dublin; and the Church of Ireland Training College, Kildare Place, Dublin. The proposal was strongly objected to by Mr. T. W. Russell and others, and on one occasion (July 30th) was under discussion until past 4 a.m. On July 31st, Mr. Balfour announced that, considering the late period of the session, he should not proceed with the bill, but would accomplish the object in view in a less theoretically perfect way by getting the money voted in the estimates. Mr. T. W. Russell thereupon expressed his gratification that the Chief Secretary had seen his way to withdraw the measure.—*Turbary (Ireland) Act* (see sect. 104).—*COMMITTEES*.—[125] *British and Foreign Spirits*. A Commons committee was (Jan. 25th) appointed to consider "whether, on grounds of public health, it is desirable that certain classes of spirits, British and foreign, should be kept in bond for a definite period before they are allowed to pass into consumption, and to inquire into the system of blending British and foreign spirits in or out of bond, and into the propriety of applying the Sale of Food and Drugs Acts and the Merchandise Marks Act to the case of British and foreign spirits; and also into the sale of either as an intoxicant." The committee took evidence, and reported April 30th. From some figures they gave regarding the production and consumption of spirits, it appears that in the year ended Dec. 31st, 1890, the consumption of British spirits was 769 gall., and of foreign and colonial spirits 234 gall. per head of the population of the United Kingdom, or a total per head of spirits of all kinds of 1003 gall. But the amount of spirits consumed in England, Scotland and Ireland per head of the population showed considerable variations. In England the consumption per head was little above half a gallon annually; in Scotland it was 1½ gall.; and in Ireland one gallon. Dealing with the question of the character and purity of spirits, the committee said the general conclusion of the evidence seemed to be that the mellowing of spirits by age is due to minute quantities of very imperfectly known bodies affecting the taste and smell, and which are present even in much smaller amount than the higher alcohols and ethers which are found practically to the same extent in old and new spirits. The committee arranged with the Inland Revenue that about fifty samples of spirits should be collected from public-houses, shebeens and fairs in various parts of the country, to ascertain whether adulterations of a pernicious character might be put into them by the retailer before being given out to the customers. Not a single case of such adulteration was found. The samples varied greatly in strength, being from 14 to 30 under-proof, but the spirit was normal. With regard to the blending of spirits, the committee did not recommend any increased restrictions. As to the bonding of spirits, their general conclusion from the evidence submitted to them was, that compulsory

bonding of all spirits for a certain period was unnecessary, and would harass trade. The committee went on to say, in reference to a very interesting question: "The use of ether as an intoxicant by drinking exists in South Derry and a small portion of Tyrone, in a district about 600,000 acres in area; but, so far as we could ascertain, in no other part of the kingdom. The origin of the practice is said to have been the effective putting down of illicit distillation in the mountainous district of Tyrone, about thirty years ago, and the substitution of this cheaper intoxicant for duty-paid whisky. Ether is expensive, but a small quantity of it (a teaspoonful or tablespoonful) is sufficient for intoxication. The ether used is generally impure, and is made from methylated spirit. . . . The character of the drunkenness is much the same as with whisky, but it is more rapid in its action, while, as the after effects are not so disagreeable, a person may get drunk two or three times in the day at a cost of sixpence. It is difficult to say how much is consumed per head of the population; but it is understood that the railways carry into the district about four tons annually—a very large amount when it is considered that a dose for an adult does not exceed a tablespoonful. The demoralisation as well as the physical deterioration of the drinkers is undoubtedly great, and calls for a remedy. Accordingly, at the instance of the Inland Revenue, ether has been scheduled under the Poisons Act; and since this has been done the sale in grocers' shops has practically ceased, and that of druggists is largely curtailed. The Rev. Dr. Carter, the rector of Cookstown, fears that the success of this measure in restraining the practice will not be permanent. On the other hand, Mr. Wilkinson believes that it has suppressed the practice in his district, and Inspector Clark, who was sent on a tour of inspection throughout the neighbourhood, gives positive evidence as to the decrease of this pernicious custom. It will be necessary to watch closely the further effect of scheduling ether as a poison, and it is in the interest of the Inland Revenue to do so, as this Intoxicant may be and is made from methylated alcohol, and thus escapes paying the duty with which other intoxicating beverages are charged. For the present your committee do not think that other measures are necessary, unless it may be considered desirable to obtain powers for search of grocers' shops, and of itinerant vendors who sell ether." As to methylated spirit, although its smell and taste are nauseous, evidence shows that it is used, to a considerable and increasing extent, in the Braid district, county Antrim, covering an area of five to eight square miles. Its retail price is about 3s. per gallon, while that of ordinary spirits is about 20s. "In Ballymena, three chemists and druggists sold last year 714 gallons; and, though part of this quantity may have been used for legitimate purposes, the major part is supposed to be taken as an intoxicant. The nauseous taste and smell are disguised by mixing it with tea and sugar. For one penny, a glass of methylated spirits can be got, having a greater intoxicating effect than whisky. The effects on the drinkers are stated to be deleterious, as it impairs the brain more quickly than alcohol. Efforts were made by the Inland Revenue to limit the quantity sold to retailers in this district to one quart; but the Pharmaceutical Society opposed the restric-

tion, and it was taken out of a bill before the House of Commons. Still, under the Budget Act of last session, the Inland Revenue might order a register to be kept of sales of methylated spirits retailed in any particular district, and they might modify the composition of methylated spirits used for retail purposes, so as to make it more offensive as a beverage." The committee did not think it was within the range of this inquiry to collect evidence as to whether a total abstinence from the use of spirits was better for the public health than taking them in moderate amount as a stimulant. The professional opinions given by Dr. Pavy, F.R.S., and Dr. Lauder Brunton, F.R.S., coincided with those of the public, that old mellowed spirits are less irritating to the stomach than newly distilled spirits. In reference to this matter the conclusion of the committee was, that as the public show a marked preference for old spirits, which the trade find more profitable, and as the practice has arisen of blending whiskies with patent spirits, to fit them for earlier consumption, it was not desirable to pass any compulsory law in regard to age, especially as the general feeling of the trade is that such an obligation would harass commerce, and be an unfair burden on particular classes of spirits. The committee thought it was a reasonable desire on the part of the cane-growing countries that their spirits should continue to be called "rum," and that imitations of it should be labelled as imitations. "Both the Inland Revenue and the Customs should support the operation of the Merchandise Marks Act, as far as they are able to do so, by taking precautions that spirits are not falsely described either as to their character or country of origin while they are in bond or delivered from bond. The authorities in charge of bonded spirits do not knowingly allow false descriptions, and have expressed their willingness to prevent them. But it must be borne in mind that the trade are against undue restrictions of description, and have got some of them removed. Your committee have received representations from importers and from bonded warehouse keepers in this country that further restrictions will hamper trade." **Children's Life Insurance** (see sect. 54).—[188] **Colonisation**. On Jan. 26th the select committee which had sat in 1880 and 1890 was reappointed to inquire into various schemes which have been proposed to Her Majesty's Government to facilitate emigration from the congested districts of the United Kingdom to the British colonies or elsewhere; to examine into the results of any schemes which have received practical trials in recent years, and to report generally whether in their opinion it is desirable that further facilities should be given to promote emigration; and, if so, upon the means and the conditions under which such emigration can best be carried out, and the quarters to which it can most advantageously be directed. The committee reported on March 17th. They had, they said, no grounds for thinking that the present condition of the United Kingdom generally calls for any general scheme of state-organised colonisation or emigration. They point out that there exist statutory powers to local authorities to provide for and assist the emigration of poor persons. As regards adults, these powers have not been largely used; but many children had been emigrated, the greater part of them to Canada, wholly or partially at the cost of the poor-

rate. A large field was said to exist for such emigration, and the committee urged the desirability of every facility and assistance being given to further it; and considered that the Treasury might with advantage grant pecuniary aid to industrial and other schools to assist in carrying out this object. Under section 69 of the Local Government Act a county council may, with the consent of the Local Government Board, borrow money for the purpose of making advances to any person, or bodies of persons, corporate or unincorporate, in aid of the emigration or colonisation of inhabitants of the county, with a guarantee for the repayment of such advances from any local authority in the county, or the government of any colony. The committee, for reasons given by them, considered that the necessity of obtaining such a guarantee would be a serious obstacle in the way of county councils carrying out this work, and recommended that the necessity for a guarantee should be abolished. The powers in possession of local authorities, subject to the recommendations above referred to, should be sufficient to enable them at no onerous risk to assist in the colonisation or emigration of persons or families from their own localities. The Committee came to the following further conclusions: "That the congested districts of Ireland, and of the Highlands and Islands of Scotland, form an exceptional case, and require relief by assistance to industries, to colonisation or emigration, and, where suitable, to migration; that the provisions proposed in the Land and Congested Districts (Ireland) Bill are ample for these purposes; that provisions similar to some of the foregoing should be made for the crofter districts of Scotland; that the Colonisation Board be continued and reconstituted for the purpose of colonisation and emigration from such districts; that the power of enlarging crofters' holdings in that Act should be kept alive; that crofts vacated by emigration or migration should be added to existing holdings without power of subdivision; that the experiment of colonising the crofter population in Canada should be further tried; and that the proposals of the Government of British Columbia should be favourably entertained." These proposals had, in the view of the committee, much to recommend them. "Under an Order of the Lieutenant-Governor in Council in 1888, Mr. Begg was appointed a Commissioner to submit to Her Majesty's Government a scheme under which, experimentally, an advance of £150,000 would be made by the Treasury, to bear interest at the rate of 2½ per cent. (but the interest for the first five years to be added to the capital sums), until repayment by the Government of British Columbia, who would guarantee the repayment of principal and interest. With the funds, etc., provided it is proposed to take out gradually 1250 families, and to settle them on locations variously suited for agriculture, fruit culture, sea fishing, and other industries. Mr. Begg's negotiation advanced so far that in 1888 the Treasury were apparently willing to grant the sum asked, but on more onerous conditions, which the Colonial Government did not see its way to accept. The appointment of the Committee of 1889 threw this and other schemes into abeyance, and the Commissioner has been ever since in a state of expectancy of its judgment on his project." The committee thought that similar proposals from any Colonial Govern-

ment should be entertained. They were also of opinion that the agency of companies for colonisation and emigration should be taken advantage of, both as regards the aforesaid colonisation in Canada and elsewhere, and that the Government grant to the *Emigrants' Information Office* should be increased. The committee characterise the design and management of this office as admirable; but, wide as is the field already reached by its publications, in order to render it thoroughly effective its funds should be increased so as to enable branch offices to be opened in Ireland, in Scotland, and in some of the large provincial towns. The committee also suggested that in case of need a Board of Emigration and Colonisation should be established for England and Wales upon the lines adopted for the existing Colonisation Board for Scotland. The Duke of Argyll (June 12th) called attention to the report of the Colonisation Committee, and expressed a hope that the Government would turn their attention to the systematic emigration and colonisation of the people in the congested districts of Scotland. The Marquis of Lothian said the only remedy for the existing state of things was emigration, and he agreed as to the suitability of British Columbia and Manitoba for colonisation. The Government were now in correspondence with British Columbia, to see what further could be done in the matter. Mr. Goschen informed Mr. A. Sutherland (July 2d) that the Committee on Colonisation recommended the adoption of a scheme of crofter emigration proposed by the Government of British Columbia, and the Government had informed the Government of British Columbia that they were prepared to accept the scheme with modifications.—[127] *Corn Sales*. On June 17th it was ordered "that a select committee be appointed to inquire and report upon the various weights and measures used for the sale of grain throughout the United Kingdom; the desirability of selling grain by weight only or by measure and weight, and, in the event of either being considered desirable, the extent to which either might be enforced; the desirability of the adoption of a uniform weight, either for the United Kingdom or any part of it; if a uniform weight is desirable, the standard to be adopted, and whether there should be one standard for all kinds of grain; and, if not, what should be the standard for each kind." The committee duly met, but examined only one witness, finding that at that late period of the session it was not in their power to conclude their inquiry. They therefore reported (July 17th) the evidence already taken, and recommended their reappointment next session. *Hospitals* (see, sect. 129).—[128] *Irish Society and London Companies (Irish Estates)*. On Jan. 26th a select committee was reappointed to inquire as to the terms of the charters or other instruments by which their estates in Ireland were granted to the Irish Society and to the London Companies, and as to the trusts and obligations (if any) attaching to the ownership of such estates, and as to the mode in which the sale of their estates has been effected, or can be effected, consistently with such trusts and obligations as may be shown to have existed or now exist. In their report, which was presented May 4th, the committee state that the immediate occasion for the inquiry arose from the sale by certain London companies of their estates in Ireland, and from the probability that this example

would be followed by the two other companies. These transactions brought into immediate and practical prominence two questions of great importance:—Do the London companies hold the Irish estates vested in them subject to trusts capable of being enforced in a court of law? Secondly, if no legal trusts are imposed by the instruments on which the companies found their title, did earlier documents, or did attendant circumstances, attach to the possession of these estates obligations of such a kind that, though not enforceable in a court of law, it would yet be proper for Parliament to take cognisance of them? "The task of pronouncing with decisive authority upon the legal construction of the charters and instruments in the order of reference, can," said the committee, "plainly only be performed by a judicial tribunal. Your committee understood their province to be to hear a full statement from the parties concerned of the various positions maintained by them, to compare the arguments by which those positions respectively were supported and defended, and finally to report to the House whether or not a *prima-facie* case had been established by those who insist that the grant of the estates was coupled with public purposes and trusts in Ireland, independent of the private benefit of the companies, and independent of the destination of the general funds of those companies in England." After going into the matter at length, the committee said they were unable to discover any better grounds for placing the companies in the position of purchasers or of private undertakers, than those which the courts declared not to be valid grounds for regarding the Irish Society as representative of purchasers or private undertakers. "Your Committee are of opinion that a *prima-facie* case exists for the proposition that, inasmuch as the courts have declared that public purposes are permanently attached to the lands preserved by the Irish Society, permanent public objects still follow the lands conveyed by the Irish Society to the companies, and the proceeds of the sale of such lands. In a matter of such gravity, your Committee consider that the intervention of the Attorney-General is required. Meanwhile, the conclusions established by the Royal Commission on the companies presided over by Lord Derby (1882-84), in respect of the endowments of the City Companies generally, appear to be entirely applicable to the portion of those endowments existing in Ireland. It would be unjust to exclude the Irish tenants of the companies from the benefits of the policy of land purchase, but it is indefensible to allow the vendors, by means of the Purchase Acts, to divest themselves of all the great local responsibilities peculiarly attached to their Irish estates." The committee considered that the proceeds of the sales constitute a fund, the benefits of which should, in conformity to the principles of the Commission of 1882-84, accrue wholly for purposes and objects local and Irish.—**Metropolitan Water Supply** (see sect. 133).—(189) **Metropolitan Hospitals**, etc. On the motion of Lord Sandhurst, it was resolved (Jan. 23rd) that a select committee be appointed to continue the inquiry with regard to all hospitals and provident and other public dispensaries and charitable institutions within the Metropolitan area for the care and treatment of the sick poor which possess real property or invested personal property in the

nature of endowment, of a permanent or temporary nature; and to receive, if the committee think fit, evidence tendered by the authorities of voluntary institutions for like purposes, or with their consent, in relation to such institutions; and further, to continue the inquiry as to what amount of accommodation for the sick is provided by rate, and as to the management thereof, and to report to the House. The committee took a great deal of evidence, which was in due course printed and laid before the House of Lords, and was accompanied by a recommendation that the committee should be re-appointed next session to draw up and make their report.—**Private Bill Procedure (Scotland)** (see sect. 98).—(190) **Railway Servants (Hours of Labour)**. Mr. Channing (Jan. 23rd) called attention to the amount of overtime work on the railways of the United Kingdom, and to the accidents and dangers to railway servants and the travelling public arising therefrom, and moved "that the excessive hours of labour imposed on railway servants by the existing arrangements of the railway companies of the United Kingdom constitute a grave scandal on justice, and are a constant source of danger, both to the men themselves and to the travelling public; and that it is expedient that the Board of Trade should obtain powers by legislation to issue orders where necessary directing railway companies to limit the hours of work of special classes of their servants, or to make such a reasonable increase in any class of their servants as will obviate the necessity for overtime." This was seconded by Mr. J. Wilson (Durham). After prolonged discussion, Sir M. Hicks-Beach suggested the withdrawal of the resolution, and undertook in that case to move, "that having regard to the fact that the employment of railway servants for excessive hours is a source of danger both to the men themselves and to the travelling public, a select committee be appointed to inquire whether, and, if so, in what way, the hours worked by railway servants should be restricted by legislation." Sir W. Harcourt advised Mr. Channing not to part with his resolution, but on a division it was defeated by 141 to 124. On Feb. 3rd the select committee was, on the motion of Sir M. Hicks-Beach, duly appointed. It held numerous sittings and took much evidence, and on July 11th reported that at that late period of the session it was not possible to conclude the inquiry. They therefore reported the evidence already taken, and recommended their reappointment next session.—**Railway Rates Bills** (see sect. 106).—(191) **Rifle Ranges**. A committee was (Mar. 10th) appointed to inquire into the difficulties now attending the acquisition of adequate rifle range accommodation in the United Kingdom. They examined a number of witnesses, and came to the conclusion that the existing ranges are insufficient for the proper training of the regulars, militia, and volunteers. They considered that five more field ranges, in addition to the existing four, is highly desirable. They considered further, that the Secretary of State should have power, under the Defence Act, in acquiring land compulsorily for the purpose of rifle ranges, to have the compensation assessed by arbitration. They were also of opinion that it was desirable for a volunteer battalion, or group of battalions, to acquire and to legally hold a range (see sect. 107).—**School Board for London (Superannuation)** (see sect. 111).—**Teachers**

Registration, etc. (see sect. 121).—[132] **Town Holdings.** On March 11th, the Committee on Town Holdings was reappointed to inquire into that portion of the original reference to the committee which the committee was precluded by want of time from reporting on last session, namely, "into the question of imposing a direct assessment on the owners of ground rents, and on the owners of increased values imparted to land by building operations or other improvements." The committee reported (July 9th) that they had examined numerous witnesses upon the matters referred to them, but had not, owing to the late period of the session at which the evidence was completed, sufficient time to fully consider their report. They had therefore, agreed to report the evidence they had taken to the House, and recommended that a committee be reappointed in the next session of Parliament to consider their report upon the evidence already taken, and, if necessary, to take further evidence.—**Ventilation of the House of Commons.**—A committee considered and reported on the subject, but its conclusions are not of general public interest.—[133] **Water Supply of London.** The bill promoted by the Corporation of London "to constitute a public authority to promote bills in Parliament for improving the supply and diminishing the cost of water in the city of London and the county of London, and adjoining boroughs and populous places, and for other purposes;" Mr. Causton's bill "to regulate the charges leviable by companies supplying water within the administrative county of London," the object of the measure being to prevent an increase of the water rates in London by reason merely of an increase in the annual rateable value; and Sir A. Borthwick's bill "to place the water supply of the Metropolis and the adjoining districts under the control of a public authority, and to make further provisions for such supply," were read a second time and referred to a hybrid committee. An instruction was agreed to by the House empowering the committee "to inquire into all matters connected with the nature, price, management, sources, and sufficiency of the water supply of London and its suburbs, and to insert in the bills such provisions in connection therewith as in their judgment are expedient." In their report, dated July 14th, the committee said they had proceeded upon the assumption that in the opinion of Parliament it was desirable to establish a single, public representative water authority for the metropolis. Having referred to the investigations already instituted into the subject, and especially to the important inquiry recently held by the Corporation of the City of London, the committee observed that they considered it to be desirable that the problem should be carefully and deliberately examined by the newly constituted municipal authority, the London County Council, in the interests of the water consumers of the Metropolis. They recommended: (i.) "That powers should be granted to the London County Council to expend such further sums as may be reasonably necessary, in order that they may examine thoroughly for themselves, as the responsible municipal authority of London, the whole position of the metropolitan water supply, and come to a conclusion as to the policy which, for financial and other reasons, it is desirable to adopt. (ii.) That, if they should so resolve, they should have power to promote a bill or bills in Parliament for the

purpose of constituting themselves the responsible water authority for London, acting through a statutory committee, appointed either wholly by themselves or partly in conjunction with the Corporation of the City of London, as suggested to your committee on behalf of both bodies. Such statutory committee to comprise a certain number of members possessing special knowledge and qualifications, not necessarily members of the body or bodies appointing. (iii.) That the London County Council, if constituted the water authority, should be required to purchase, either alone or in conjunction with such of the authorities of the outside areas as may be arranged, the undertakings of the eight water companies (except possibly certain lands of the New River Company) by agreement or, failing agreement, by arbitration, within a fixed period. (iv.) That, subject to any such arrangements, the new water authority should take over the duties and obligations which the present water companies now have towards the consumers of water in the districts outside the boundaries of the county of London, but within the limits of supply of the present companies. (v.) That, in the event of purchase by the new authority, power should be given to that authority, and to the authorities of the outside areas, to negotiate for the purchase by the latter (a) of so much of the works of distribution as is appropriated to the district of such local authority, and of the right to a supply of water in bulk from the new authority; or (b) possibly of some of the sources of supply which, with their works of distribution, it might be found practicable and advantageous to sever from the general scheme. (vi.) That those local authorities, which, like Croydon, Richmond, and Tottenham, are situated within the metropolitan water area, but have their own independent water supply, should, in the event of the purchase of the water companies by the new water authority, be guaranteed in the exercise of their present rights." In the event of the undertakings of the companies not being acquired by purchase, the committee recommended that there should be a Parliamentary inquiry, before which the interests of the whole of the consumers within the area of the present metropolitan water supply ought to be represented, into the statutory powers and obligations of the water companies, and the control which is now exercised by public departments and the metropolitan and other authorities over them. They appended to the minutes of evidence given before them a memorandum setting out the existing conditions, but suggested that it might possibly be found advantageous to make the obligations and the control more complete. The committee found it impossible, they said, within the limits of the time at their disposal, to conduct satisfactorily any examination into the quality and quantity of the London water supply. But, apart from that consideration, they were of opinion that these questions would naturally form a part of the complete inquiry which it would be the duty of the London County Council to conduct, with the assistance of the professional advice which, as the committee had recommended, should be at their disposal. The report proceeded:—"Although your committee have not been able, for the same reason, to examine into any of the cases sought to be established before them by the various local authorities of the areas in which are contained the present

sources of supply, for the protection of their separate interests, your committee have received sufficient indication that there exist complaints, founded or unfounded, that those sources are in some quarters being even already overtaxed. Your committee do not see their way to recommending any practicable method for the effective association of any of these authorities with the inquiry, for which the London County Council must be responsible. But they are of opinion that in any such inquiry regard must be had, on the one hand, to the statutory rights of the present water companies, and, on the other, to the legitimate wants and necessities of the inhabitants of those areas. It must remain with Parliament ultimately to decide upon the merits of any scheme submitted. In view of the possibility of its being ultimately established that the present sources of supply cannot be extended, and that additional sources are required, and in view also of the fact that the possible fresh areas of supply are limited, and are already being drained for other large communities, your committee think that Parliament may well consider, before granting any powers for further encroachment upon those areas, how far provision ought fairly to be made for the possible requirements alike of the Metropolis, and of the other large populations upon the lines of supply. Of the two bills [the bill of the Corporation, and that introduced by Sir A. Borthwick] before your committee for the constitution of a new water authority, neither appeared to them calculated to effect a satisfactory solution of the problem; but your committee desire to place upon record their opinion that both those bills were promoted in the public interest and to considerable public advantage." The bill of Mr. Causton was reported as not proceeded with; and it subsequently transpired that, owing to some misunderstanding as to the time at which it was to be taken, there had been no appearances.

Settled Land Acts, Case under, in '91. In the Chancery Division, Aug. 10th, '91, application was made under the Settled Land Acts to Mr. Justice Stirling by the Marquis of Ailesbury, for the sanction of the Court to the proposed sale of the mansion house and estates at Savernake, in Wiltshire, to Lord Iveagh, for the sum of £750,000. The petition presented by the Marquis stated that he was tenant for life in possession. He was married in '84, but had no issue. Of the proposed sum of £750,000, £500,000 was to be left on mortgage at 5 per cent., for a term of five years. The property comprised in the contract included the principal mansion house of the Savernake estate and 7743 acres of pleasure-grounds, park and lands, including Savernake Forest. The entire acreage of the land proposed to be sold was over 40,000 acres, including 95 farms, 1000 cottages, an hotel, and houses and building land in the town of Marlborough. The property was described by land agents, who gave evidence in support of the petition, as "a unique possession, which probably has not its equal anywhere, and is possessed of great beauty and amenities which are well known and even historic." The mansion-house, park, pleasure-grounds, and lands usually occupied therewith were stated to have been the principal residence of the Ailesbury family since 1675, when they were acquired by the marriage of the then Earl of Ailesbury with the Lady Elizabeth Seymour,

who had inherited them from her brother William, third Duke of Somerset, to whom they had descended from the first Duke of Somerset, known as "the Protector." The petitioner alleged that the proposed sale would be very advantageous for all persons interested in the estate, the price being considerably in excess of its value as an investment. At present the income was almost entirely absorbed in the payment of the charges for maintenance and repair of the buildings and the up-keep of the forest and estate generally, and in payment of interest upon mortgages and upon four jointures having priority over the petitioner's life estate. The application was opposed by one of the trustees, and by all the persons entitled in remainder. They filed evidence to show that at the time when the Yorkshire estates of the family were sold in 1885, the Savernake estates were resettled by the late Marquis and the petitioner with the object of keeping them in the family, and that out of the proceeds of sale of the Yorkshire estates the petitioner then received £175,000 to pay his debts. Since his grandfather's death in '86 the petitioner had created encumbrances upon his life interest to the extent of about £450,000, of which £200,000 was claimed by Mr. Samuel Lewis, and the petitioner admitted in the witness-box that he was now mainly dependent upon Mr. Lewis for his daily maintenance. A receiving order in bankruptcy had been made against him, and in an action for foreclosure brought against him by Mr. Lewis, a receiver had been appointed, who was now in receipt of the rents and profits of the estate. It further appeared that there were valuable heirlooms in the house, including a picture by Murillo, said to be worth £10,000, for the custody of which no provision had been made. Mr. Justice Stirling, in the course of his judgment, said that it was not surprising that the estate, encumbered as it was, should have been described as "the biggest white elephant ever known," and it could not be disputed that the position of the owner could only be maintained by the exercise of the utmost care and self-denial. The petitioner, however, had not seen fit to live in such a way. Any advantage from the sale would be reaped by his creditors rather than by himself, and he would be in no better position to fulfil his duties. Moreover, every person interested under the settlement was against the sale. Each was actuated by the desire to enjoy in his turn this unique historic possession, the home of his family for more than 200 years. An honest independent trustee ought to have regard to this feeling and endeavour to satisfy it, and his lordship could not find that the petitioner had done so. Then the circumstance that the custody of the heirlooms had been overlooked was not without significance. Again, the petitioner was utterly insolvent, and his life estate was incumbered to the full value; he had squandered a large sum which would have gone to keep up his position and dignity as the head of a great family. The next remainder-man was a partner in a lucrative business, and might not improbably succeed in acquiring that wealth which the petitioner had done nothing but dissipate. Looking at the matter from the point of view of an independent and careful trustee, his lordship came to the conclusion that the proposed sale, however desirable it might be for the creditors of the petitioner, was not one in which due regard had been paid to the interests of the parties

entitled under the settlement, and he was, therefore, unable to sanction it.

Severn Navigation Improvement. (For earlier references, see BIRMINGHAM AND BRISTOL SHIP CANAL, and BIRMINGHAM AND TRENT SHIP CANAL, in eds. '88 and '89). In the early portion of '91, a scheme for the improvement of the Severn, so as to admit steamers of 400 tons (instead of 80 tons) to Worcester, was much discussed. Several municipal corporations more directly interested—from Birmingham to Cardiff—had been asked for guarantees toward the required sum of £30,000, a Parliamentary bill having been obtained; and at a meeting of the Severn Commissioners in March, it was stated that the Cardiff Town Council were willing to contribute £5,000, if a definite time for repayment could be given. But it was pointed out that this could not be done, as the Commissioners under the Act had no other means for repayment than the expected increase in the tolls. A deputation, representing the Severn Commissioners, the Worcester Corporation, and Cardiff merchants, waited on the Cardiff Council on April 13th, and succeeded in removing the time limit above-mentioned. It was stated that half-a-dozen Cardiff merchants guaranteed a traffic of 50,000 tons a year, or its equivalent in money, and that Lord Bute had subscribed £3,000. By the end of June, the whole of the necessary sum had practically been guaranteed, and it was stated that of the £30,000 required £12,000 would be laid out in the city of Worcester for wharves and docks. Actual operations were immediately commenced at Bugg's Hill Ford, below Worcester. The works are being carried on under the direction of Mr. H. J. Martin, M. Inst. C. E., the engineer of the Severn Commissioners. Vessels coming from the Bristol Channel enter the Gloucester and Berkeley Canal at Sharpness, and go on to Gloucester, then they proceed thirty miles to Worcester. From here various canals afford access from the East Worcester and South Stafford manufacturing centres; and it is part of the present scheme to deepen the Severn to 7 ft. depth from Worcester to Stourport—12 miles.

Seychelles Islands, or Mahé Archipelago, are situated in the Indian Ocean, about 1000 miles north of Mauritius, of which British colony they are politically a part. The chief and largest island is Mahé, upon which is Port Victoria, the capital, harbour, and headquarters of H.M. East African squadron. Government is administered by a Chief Civil Commissioner and a Board, subordinate to the Governor of Mauritius. Exports, coconuts, cocoanut oil, sperm, vanilla, coffee, and cloves. For financial statistics, etc., see BRITISH EMPIRE (table).

Seyyid Ali (bin Said bin Sultan), Sultan of Zanzibar, is the brother of the late Sultan, Khalifa bin Said, and was b. 1855. He succeeded his brother in February '90. On the assumption of the protectorate of Zanzibar by Great Britain, the decoration of the Grand Cross of the Star of India was conferred upon him by Queen Victoria. The investment, by Col. Sir Charles Euan Smith, took place in the Palace at Zanzibar, Nov. 14th, '90.

Shah of Persia. See NASR-ED-DIN.

Shaw, Sir Kyre Massey, K.C.B., was b. at Monkstown, Co. Cork, 1830. Ed. at Trinity Coll., Dublin, where he graduated. After serving a short time in the army he was appointed Superintendent of the Belfast Constabulary, which

office he held until he succeeded Supt. Braidwood, who was killed at the great Tooley Street fire which took place in '61, in the office of Chief of the Metropolitan Fire Brigade. Is the author of an admirable manual on the subject of fire. C.B. '79. His impending retirement was notified in June '91, and took place on Nov. 1st. The honour of Knighthood was conferred on him.

Shaw, Richard Norman, R.A., has earned a wide popularity as the "domestic" architect of the day. Numerous dwelling-houses, both in London and the country, testify to his originality and to his command over the picturesque. He studied at the Royal Academy Schools, and came into notice when he won the gold medal for architecture at the biennial competition. The result of the travelling studentship, which goes with the gold medal, was a book of drawings, which aroused considerable interest among architectural students of that day. A recent public example of his work are the new Police Offices, on the Thames Embankment, while his private undertakings include, besides churches and private offices, "Flete," Ivybridge, Devon, Dawpool, near Birkenhead, Craigside, for Lord Armstrong, Lowther Lodge, Kensington, and several artists' houses at Hampstead. He was elected a Royal Academician in '77.

Sheffield and S. Yorks Canal. For some time past a scheme has been on foot to connect that busy steel, iron and coal centre, Sheffield, with the port of Goole by means of a navigable waterway, especially for the heavy traffic, which in these days of competition is found to be so expensive by rail. A company was formed and obtained an Act in '89. The company was authorised by the Act to purchase from the M. S. & L. Railway Co. the existing navigations, which included the river Don navigation, the Dearne and Dove Canal, the Stainforth and Keadby Canal, and the Sheffield and Finsley Canal, the whole being about 57 miles in length (see previous eds.). In their report, issued in Feb. '91, the directors intimated that they had received plans from the M. S. & L. Railway Co. of the existing canals they proposed to purchase after notice for compulsory sale had been served. The new Company, by the way, had to deposit £20,000, as required by the Act, before the railway company would entertain any proposals. The bill for constructing a short length of canal to connect the system with that of the Aire and Calder (as described in our last ed.) was passed during the parliamentary session (see AIRE AND CALDER).

Sherborne School, Dorsetshire. Refounded by Edward VI. (the earliest school founded by that monarch), 1550, re-organised 1870. Accommodation for 330 pupils. An Exhibition to either Univ. of £40 for four years falls vacant every year; pupils may also compete for Eulach Exhibitions of £50 for four years; this privilege is allowed to three other public schools only. Head Master, Rev. E. M. Young, M.A. Clerk to Governors, Mr. J. A. Fooks. Motto (royal arms of Ed. VI.), "*Honi soit qui mal y pense*." Some Alumni, Vice-Chancellor Knight-Bruce, Rt. Hon. Montague Bernard, Lewis Morris, Dr. J. M. Neale, Sir D. Forsyth, Wm. Forsyth, Q.C., etc.

Ship Building and Shipping. See TRADE, '91.

Shipping of the United Kingdom, The Chamber of. This consists of twenty-five Shipowners' Associations, located in London and the chief ports of the United Kingdom.

Its work is chiefly parliamentary, and consists in watching bills affecting shipping. Subjects which have recently been dealt with by the Chamber include the Incidence of Light Dues, Cotton Charter Parties, Abolition of Compulsory Pilotage in Port of London, Casualty Depositions, Grievances in North Atlantic Passenger Trade, etc. The affairs of the Chamber are managed by an **executive council**, to which every affiliated association elects one member. This Council is presided over by a **pres.**, and **vice-pres.**, who are annually elected at a meeting held in London in February. **Pres.**, Sir William Gray, West Hartlepool; **Vice-Pres.**, Mr. William Milburn, jun., London; **Sec.**, Mr. W. H. Cooke. **Offices**, 1, Whittington Avenue, Leadenhall St., E.C.

Shoemakers' Strike. See LABOUR.

Shorthand. Several systems of shorthand claiming to have great advantages over Phonography have appeared, but they have all, apparently, failed to sustain these claims. One of the most important events in connection with shorthand in recent years has been its inclusion as one of the fifteen specific subjects in the new **Education Code (q.v.)**. Under this code any of the scholars in Standards V., VI., and VII. may take up shorthand, and a grant of 4s. per head is made; in evening schools a grant of 2s. per head is given. In London, during '90, 2,551 boys and 920 girls were taught Pitman's shorthand under the School Board; and in the provinces 9,871 boys and 873 girls; making a total for Great Britain of 14,215. **Statistics** on the teaching of Pitman's shorthand in Great Britain, compiled during the early part of last year, show that it was taught in 1,520 colleges, schools, institutions, classes, etc., and that the number of pupils then receiving instruction from 793 teachers of phonography was 46,428, being 41,687 males and 4,741 females. The pupils who received instruction from these teachers during the whole of '90 was 55,558. These returns are necessarily very incomplete, and refer only to those who were receiving professional instruction. From figures furnished by the *Printer's Register* it appears that out of 607 journalists attached to the staffs of the principal London and provincial newspapers and press agencies, 569 write Pitman's system, and the remaining 36 use nine other systems. There are many other systems of shorthand extant, amongst them being those of Gurney, Taylor, Byron, Mavor, Lewis, and Preston, which, together with Pitman's, are mostly used in the law courts and the reporters' gallery of the House of Commons; Everett, Legible Shorthand, Guest, Jones, Lockett, and Script Phonography. Besides these, the United States, Germany, and nearly all European countries have numerous systems of their own. There are two societies representing shorthand writers. **The Shorthand Society**, founded 1881, which has a long membership roll, including writers of nearly all the above-mentioned system. Monthly meetings are held at Victoria Chambers, Chancery Lane, for the reading of papers and discussions. **Secy.**, E. Pocknell; **Offices**, 3, Whitefriars St., Fleet St., E.C.—During '91 two new systems of shorthand were published: **National Stenography**, by G. C. Mares, and **Simplex Shorthand**, by W. A. Brown. **A National Phonographic Society**, with the veteran Mr. Isaac Pitman (q.v.) acting as President, and Lord Bury, Dr. Gladstone, etc., as Vice-Presidents, has been

organised. The objects of the Society are the promotion and cultivation of a knowledge of shorthand. Of this Society Mr. W. Mair, "Hazelmerc," Knollys Road, Streatham, S.W., is the General Secretary.

Shrewsbury School. Founded by King Edward VI. in 1551, augmented by Queen Elizabeth in 1571. One of the seven schools reorganised by the Public Schools Act of '68. The school was moved to a new site (of 26 acres) in '82. Since '82 its numbers have increased from 170 to 300. **Head Master**, Rev. H. Whitehead Moss, M.A. **Motto**, "*Intus si recte, ne labora.*" **Distinguished alumni** include, among others: Sir Philip Sidney, Lord Brook, Marquis of Halifax, and, in the present century, Charles Darwin, the late Dr. Fraser, Bishop of Manchester, the late Professor B. H. Kennedy, the late Dr. Scott, Dean of Rochester, the late Dr. Thomson, Archbishop of York, the Bishop of Wakefield, Sir D. Lysons, Lord Thring, Sir C. T. Newton, Viscount Cranbrook, and many others.

Siam. A kingdom embracing the greater part of the Indo-Chinese and part of the Malay peninsula. Boundaries ill-defined. Area, about 250,000 sq. m.; pop. estimated at about 6,000,000, including Siamese and Laotians, 2,000,000 each, and Chinese and Malays, 1,000,000 each. Capital, **Bangkok** (pop. about 500,000), situated on the delta of the river Mee-nam, the great natural and economical centre of the kingdom. The royal dignity nominally hereditary, but each sovereign appoints his own successor. **Legislative power** exercised by the king in conjunction with a Council of Ministers, who have charge of the departments of war and marine, finance, foreign affairs, justice, agriculture, and the royal house. The Council of State consists of the Ministers, 10 to 20 members appointed by the king, and 9 princes of the royal house. There are forty-one provinces, each administered by a governor. People kept in a state of serfdom by the feudal owners of the soil. Domestic slavery in process of abolition. Foreign trade centres at Bangkok, and is almost wholly in the hands of foreigners. **Chief exports**, rice to Hong Kong, Singapore, and Lower Burma, teak-wood to Great Britain. King's revenue raised by customs, dues, and taxes on land, fruit trees, spirits, opium, gambling, tin mines, edible birds' nests, and fisheries, and amounts to about £2,000,000 a year. **Expenditure** within income, which amounts to about £2,000,000. **Imports** ('89), £1,593,257; **exports**, £2,286,280. No public debt. Small standing **army**, and general enrolment of males as militia. **Navy** consists of 4 steam corvettes and 12 gun-boats, on the model of that of Great Britain. Prevailing religion, Buddhism. Western ideas of civilisation spreading to some extent, and a few of the Siamese youths sent to Europe for their education.—**HISTORY.** Herr Bettige was appointed Director-General of Siamese Railways, and Mr. Wilkinson Chief Engineer to the Government. The rice crop of '90 was a failure. The Court consented to the construction of a telegraph from Sambas to Luang-Prabang, thus extending Indo-Chinese system. Four hundred houses were burnt down in Bangkok (Jan. '91), damage being done to the extent of £60,000. A concession was granted (March) by the King to Mr. Dunlop, of Singapore, for the construction of a railway across the Malay peninsula from Singora to Saiburee, and thence to Kulen. It was reported (Sept. 13th) that a French force

went to Batabong and arrested the local authorities, taking the chief to Cambodia. Prince Damrong, brother of the King, visited Paris (Oct. 27th).

Siam Railways. (For history and other details see previous eds., under the heading **BURMAH AND SIAM RAILWAYS.**) According to a Rangoon telegram of Dec. 3rd, '90, Herr Betge, a German engineer, was appointed Director-General of the Siamese railways, including control of construction. Mr. Wilkinson, an Englishman, was appointed chief engineer to the Government. From the same place it was reported (Mar. 25th, '91) that a concession had been granted to Mr. Dunlop, of Singapore, for a railway across the peninsula from Singora on the east to Saiburee, and thence to Kulen, a tin district in the southern portion of the province of Kedah; the total length of the line is about 136 miles. The completion of a three years' survey and alignment of a railway as far as the town of Chungsen, was announced in June. A Bangkok telegram of July 16th recorded that the King of Siam had turned the first sod of the Bangkok-Pankham Railway. In August tenders were invited for the construction of a railway from Bangkok to Korat, a distance of 265 kilometres. Official details of railway projects in Siam are furnished in the last report of the British Consul at Bangkok.

Siamne Canal (Cannes) Utilisation. In Feb. '91 it was announced that the Cannes Electric Light Co. had been constituted with a capital of 1,100,000 fr., to utilise the power derivable from the discharge of this canal, equivalent to 300-horse power in 24 hours, for the supply of electric light and power in the town.

Siberia. A Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural hills, a slender barrier which is now being broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system.

Siberian Railways. (See previous eds.) The greatest railway scheme in the world. A St. Petersburg telegram of Feb. 6th, '91, reported that it had been officially decided to begin the construction of the great Siberian Railway during the year by laying down a few verstas at the further end of Obdovostock. A *Times* correspondent, on Feb. 14th, April 3rd, and May 30th, contributed exhaustive articles, in which he stated that the plan finally recommended by the Government Railway Commission was in favour of a complete railway, in preference to the part rail part water track formerly approved, as follows: To start from Miask, a mining town on the eastern side of the Urals (to which the Samara-Oufa line, terminating at Zlataoosk, on the western side of the Urals, was about to be extended by a short but important line of 20 miles), to Chelabinsk, 64 miles; thence to the river Tom, 987 miles; and thence to Nishni-Oodinsk, 769 miles; total, 1820 miles, at an estimated cost of £11,807,500. Continuing east, the line runs from Nishni-Oodinsk to Irkutsk, 322 miles; to Mweesofsky Pier, by the southern shore of Lake Baikal, 194 miles; thence north-easterly to Srijetinsk, on the river Shelka, 669 miles; following the bend of the Amoor, on the left bank the railway runs to Khabarovka, then taking a southerly direction to Vladivostock, a distance from Srijetinsk of 4780 miles. The length of the whole line is

4785 miles, or about twice as long as the Canadian-Pacific (*q.v.*), and the total cost, including rolling stock, etc., £36,765,000. The six main sections may be briefly described as follows: (1) The Western Siberian, (2) The Central Siberian, (3) The Baikal, (4) The Trans-Baikal, (5) The Srijetinsk-Grafsky, (6) The Grafsky-Vladivostock; and the average cost per mile £7,680. One great advantage of the general route is the value of the regions passed through, especially the gold-producing district around Miask. A St. Petersburg telegram of Feb. 25th reported that a Committee of Ministers had decided that six years be the limit for the term of construction: the Railway Department had already been credited with a sum for the immediate preparation of a portion near Vladivostock, so that the Czarewitch could cut the first sod on his homeward journey from the far East. According to a St. Petersburg telegram of April 4th, a group of French capitalists had proposed to construct a portion of the line 7,198 verstas in length. The Czarewitch cut the first sod, after landing at Vladivostock, on May 24th. The *Times* of May 30th stated that the line was to be open for traffic in '95. From Ottawa, Aug. 4th, it was reported that the Russian Government had requested a Canadian syndicate to tender for the work of constructing 400 miles of the eastern section of the railway, from Vladivostock to the Amoor river; and that Mr. George Keefe, a Canadian engineer, was to proceed to Siberia at once. A St. Petersburg telegram of Sept. 2nd, stated that a strike had occurred among the men who had just begun to work on the Oussouri section, in the Amoor region, chiefly through bad food. Another telegram of Sept. 27th, stated that work on the first section was being rapidly pushed forward; in the Mias-Tcheliabinsk district, excavation and the preparation of ballast and materials for building stations was proceeding; on the Zlatoust-Mias section, 62 per cent. of the road and embankment work was ready on July 13th, and 59 per cent. of the foundation work for the bridges was finished, while over a third of the sleepers were delivered, and the telegraph wires fixed throughout the district.

Sierra Leone. A British colony on West African coast, including also the Isles de Los, Sherbro, and Mannah. Capital **Freetown**, pop. 22,000. For **financial statistics**, etc., see **BRITISH EMPIRE** (table).

Sierra Leone Dock Scheme. In June '91 it was stated that an influential syndicate had been formed for the purpose of making a thorough survey of the harbour of Freetown, to be carried out under the direction of Messrs. Hawkshaw and Hayter. The subscribers include Lord Brassey, Sir James Hay, Lord Raglan, Sir James Anderson, Mr. E. Jesse Coope, Mr. R. F. Sandeman, Mr. A. L. Jones (of Liverpool, manager of the Elder Dempster Line), Mr. F. W. Bond (chairman of the Royal African Mail Steamship Co.), Mr. Sinclair, Mr. Zachonis, of Sierra Leone and Manchester, and several others. It is understood that the Governor of Sierra Leone, Sir James Hay, has reported favourably on the enterprise to the Colonial Office.

Simon, Jules, the French statesman and economist, was b. 1814. His original surname was Suisse, but this has long been discarded by M. Simon. After a brilliant educational career, he became Lecturer on the History of Philosophy in Paris. For a time he edited a

philosophical review entitled *La Liberté de Penser*. In addition to editing the works of Bossuet, Descartes, Malebranche and Arnauld, M. Simon has published numerous works, such as "*La Liberté de Conscience*" ('59), "*Le Travail*" ('66), "*Souvenirs du 4 Septembre*" ('74), and "*Dieu, Patrie, Liberté*" ('83). Was elected member of the French Academy in '75, and in '82 became the permanent secretary of the Academy of Moral and Political Science. Of his distinguished political career the following is a summary. After the revolution of '48, he represented the *département* of the Côtes-du-Nord in the Constituent Assembly, and a year later became a member of the Council of State, until its reconstitution in June '49, when he was not retained thereon. In '63 he entered the Corps Législatif, and very soon became the leader of the Republican members. Was elected a Life Senator in '75, and after proving his ability in minor government positions became Premier in '76. A letter from the President, in the following year, caused M. Simon to resign the premiership. He has always advocated Free Trade.

Simplon Railway Tunnel. A scheme for continuing the railway from Geneva to Martigny and Brieg through the Simplon mountain to Domo d'Ossola, and thence to the Lago Maggiore. A Berne telegram dated Aug. 31st, '91, stated that the plans for making the tunnel and the proposals to the Government had just been published. The boring, which is 19,731 metres long, will take 8½ years to complete, cost 67,270,000 fr., while the whole of the lines together will require an outlay of 71,600,000 fr. A further sum of 8,400,000 fr. is to be devoted to sinking fund purposes, bringing the grand total to 80,000,000 fr. Of this sum 30,000,000 fr. is to be furnished by a subsidy, and the rest half in shares and half by mortgage. From an article in the *Times* of Sept. 17th, it appeared that it was proposed to start the boring for the tunnel, which is to be 12½ miles long, 3 miles more than the St. Gothard, on the northern side of the mountain, 687 metres in height just above Brigue. Thence it will rise at a gradient of 1:5 to 701 metres at the centre, and then drop at an incline of 6:5 to the southern side on Italian territory, the opening being at a height of 634 metres near Isella. This is only 10 miles from Dom d'Ossola, the terminus of the Italian Mediterranean Co.'s branch, and the estimated cost of a connection therewith is £170,000. From Brieg half the tunnel will be a single boring to take a double track, the other half will be of two parallel tunnels with single lines, this plan being thought the best and most economical for ventilation purposes. An exhaustion shaft is to be made at the highest point of the tunnel, and the mouth of one of the parallel tunnels will be kept closed except during the passage of the trains coming up from Iselle, thus improving the ventilation.

Sims, George R., was b. in London 1847. He entered the literary profession as a contributor to the *Weekly Dispatch* and *Fun*. He was one of the projectors of the *Referee*, in which were first published his well-known "*Dagonet Ballads*." He still contributes "*Mustard and Cress*" to that journal. Mr. S. came into prominence as a dramatist when his "*Crutch and Toothpick*" was produced at the Royalty Theatre, April '79. "*Lights of London*" (Princess's, '81) stamped his success as a graphic melodramatic play-writer. In collaboration with Mr. Henry

Pettitt he wrote "*Harbour Lights*," produced with great success at the Adelphi in '86. Another of Mr. S.'s popular plays is "*The Romany Rye*." Mr. S. has taken great interest in the work of improving the social condition of the poor, and in his "*How the Poor Live*," originally contributed to the *Pictorial World*, he has drawn graphic pictures of the terrible sufferings endured by the humbler class of toilers in the over-crowded districts of London. During '90 he published a work entitled "*Dramas of Life*." With Mr. Henry Pettitt as collaborator, Mr. S. wrote "*The Trumpet Call*," which was played at the Adelphi Theatre in '91. A collection of his poems was also published in '91, under the title of "*Dagonet Ditties*."

Slander of Women Act. See SESSION, sect. 114.

Small Holdings Bill. See SESSION, sect. 115, **Small Tithes.** See TITHES.

Smiles, Samuel, LL.D., author of many biographical works, was b. at Haddington, Scotland, in 1812. Abandoning the medical profession, in which he practised as a surgeon for a time, he became editor of the *Leeds Times* from '45-66 he was connected successively with the Leeds and Thirsk (now the North-Eastern) and the South-Eastern Railway Companies. His first book was on "*Physical Education*," published in '37. When he had attained the age of forty-five, there appeared his popular "*Life of George Stephenson*." Other biographies written by Dr. S., who received the hon. LL.D. from Edin. in '78, include those of George Moore, Boulton, Watt and Robert Dick. His books on "*Self-Help*," "*Character*," "*Thrift*," "*Duty*," "*Lives of the Engineers*," and "*The Huguenots*," have all attained wide popularity. A most voluminous writer, Dr. S. has been remarkable for the readability and accuracy of his works. An "*Autobiography of James Nasmyth*," edited by Dr. S., was recently published. His interesting history of the publishing house of Murray, entitled "*A Publisher and his Friends*," appeared in '91.

Smith, Sir Archibald Levin, a judge of the Queen's Bench Division of the High Court of Justice, was b. in 1836. Called to the bar in '60, he served his time as Junior Counsel of the Treasury ('63-8), and again from '79-83. During his career Mr. Justice A. L. Smith, who never took silk, was engaged in many important commercial cases and election petitions. Elevated to the Bench in '83. Acted as one of the judges of the *Farnell Commission* (q.v.).

Smith, Goldwin, LL.D., was b. at Reading, Berks, 1823. Ed. at Eton and Oxford, graduating first class in classics '47; Fellow of Univ. Coll. Oxford '47. He was Assistant Sec. of the Royal Commission of Inquiry into the condition of the Univ. of Oxford '50, and Secretary to a subsequent Commission, under which important University reforms were introduced. Regius Professor of History ('58 to '68) at Oxford, and was brought prominently into notice by his lectures, which were characterised by great vigour and originality. He championed the cause of the North in the American Civil War, at the conclusion of which he visited the United States on a lecturing tour. In '68 he accepted the Professorship of History at Cornell Univ., New York, resigning in '71 when he was appointed a member of the Senate of the Univ. of Toronto, where he has since resided. During '91 there appeared a book by Mr. S. entitled, "*Canada and the Canadian Question*."

Smith, William, LL.D., Hon. D.C.L. Oxon., classical scholar, and editor of the *Quarterly Review* since 1867, was b. in London, May 20th, '13. Educated at London University, was intended for the bar, and kept the usual terms at Gray's Inn; but abandoned the profession of the law for classical literature. He is the editor of the *Classical and Biblical Dictionaries*, the author of many educational works, and was for several years Classical Examiner in the University of London, and Professor of Classics in New College, London.

Sobranje. See BULGARIAN POL. PARTIES.

Socialism. Primarily and broadly, the name given to the doctrine which proclaims the equal right of all to the material conditions of existence—that is, to the enjoyment of the necessities, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the maintenance of those material conditions. Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—i.e., of a complete readjustment of political, religious, and domestic relations, involving the abolition of their present forms. **Social Democratic Federation**, Sec., J. Lee, 337, Strand, W.C.; **Socialist League**, Sec., T. Cantwell, 273, Hackney Road, E.; **Fabian Society** (q.v.), Sec., E. R. Pease, 276, Strand, W.C. Consult Karl Marx's "Capital," Hyndman's "Historical Basis of Socialism in England," Bax's "Religion of Socialism," Prof. Graham's "Socialism, New and Old," etc.

Society for Promoting Christian Knowledge. This Society was founded in 1698, and has during the last 192 years originated and supported a number of agencies in this country and abroad for promoting Christian knowledge. The following are some of the chief departments of its work: the Society is the Bible and Prayer Book Society of the Church, it is a Church of England Tract and Pure Literature Society; a Home Church Mission and Education Society; a Foreign and Colonial Missionary Society; and an Emigrants' Spiritual Aid Society. The expenditure by way of free grants of money and books for the year ending March 31st, '91, was about £40,828. It has founded a training college for one hundred schoolmistresses, at Tottenham, and maintains a Training College for Lay Workers in the East of London. The Society has voted a portion of its funds to aid in the establishment and development of **Medical Missions** and for the training of medical missionaries, lay and clerical, in India and other parts of the world. Secs., Revs. W. O. B. Allen, M.A., and E. McCure, M.A. **Organising Secs.** (Northern Province), Rev. J. Bridger, S. Nicholas, Liverpool; (Southern Province) Rev. J. E. Orlebar, Office, Northumberland Avenue, London, W.C.

Society for Promoting Industrial Villages, and for reviving or establishing village industries side by side with agriculture. This society was founded in 1883, and has already exerted its influence in many quarters with success. The work is being carried on by a staff of lecturers on various industries, and their gratuitous services are at the disposal of any local Society. Office, 30, Craven St., Charing Cross, W.C. Hon. Sec., George J. Knight.

Socotra. A large island lying 150 miles off Cape Guardafui, at the entrance of the Gulf

of Aden. Formally annexed by England ('86). Capital, *Tamarida*. Products, aloes, and also exports dragon's blood (a dye resin), dates, figs, etc. See BRITISH EMPIRE.

Sodor and Man, Rt. Rev. John Waring Bardsley, Lord Bishop of. The see was founded 447, and the income is £2000 annually. Dr. B. was b. 1835; ed. at Trinity Coll., Dublin, where he graduated M.A., and was ordained deacon '59. Archdeacon of Warrington, and subsequently Chaplain to the Bishop of Liverpool. He was appointed Incumbent of St. Saviour's in that city in '71, and was elevated to the episcopal bench as Bishop of Sodor and Man in '87.

Soldiers and Sailors Families Association ('85). **Object.**—The relief of the wives and families of all branches of the British land and sea forces in time of peace or war. Funded property £16,000. **Organisation.**—Office-bearers and committees representing each petty sessional division throughout the country. Also an **Officers Branch** ('86), for the education of officers' children, either by payment or purchase into existing schools and institutions, and by temporarily aiding with small grants necessitous officers' widows. It also administers the "**Serpent Fund**," which amounts to £13,630. The work of the Association is entirely voluntary, there being no offices or paid officers. **Patron**, H.M. the Queen. **President of the Council**, H.R.H. the Princess of Wales. **Chairman and Treasurer**, Colonel J. Gildea, 7, Knareborough Place, S.W.

Solicitor and Client, Law as to, in '91. In the Queen's Bench Division (June 10th, '91) was heard the action of *Langmead v. Winter*, in which the defendants, a firm of solicitors, were sued for damages for negligence. The plaintiff, a widow lady, alleged that by the advice of the defendants she incurred liability with reference to her deceased husband's estate, so that her separate property was entirely absorbed, and she was in fact ruined. The defence was that the loss was due to depreciation of house property, which the defendants could not have foreseen. The jury gave a verdict for the plaintiff for £2200, and required the defendants to give an indemnity against future claims.—In *Ward v. Gangee* (Chancery Division, Aug. 9th, '91) it was held that though a solicitor had been struck off the Rolls, he was entitled to continue to act as a commissioner for oaths until his appointment as such had been revoked by the Lord Chancellor.—Neither the registrar of a county court nor any of his partners is permitted to practise in the registrar's court under a penalty of £50. Where a registrar's son had taken a case in his father's court, and the bill of costs would have to be taxed by the registrar, the full penalty mentioned was inflicted.—In *Blyth v. Hadgate* it was held that if a trustee is a partner in a firm of solicitors, and his firm acts professionally in the trust affairs, every member is liable for breach of trust on the part of the trustee partner, while the funds are in possession of the firm.

Solicitor-General for Scotland. The present holder of this office is Mr. Graham Murray, Q.C., M.P.

Solly, Rev. Henry, who is well known in connection with technical education and similar progressive movements, is the son of the late chairman of the London Dock Company, and was b. in 1813; was educated privately and at Univ. Coll., London. After commercial experience, he entered the ministry. His first

pastorate was at the English Presbyterian Church, Yeovil. In '58 Mr. S. became the minister of the Unitarian Church at Lancaster, remaining there for four years. Since that date he has devoted his time to the promotion of social reforms. His energy has benefited the *Artizans' Institute* in St. Martin's Lane, founded in '74, at which technical education was practised. He formed the Society for Promoting Industrial Villages, and has written much on this and similar topics.

Somaliland. The country occupying the eastern horn or promontory of Africa. *Zeilah* and *Berbera* are the chief ports on the Gulf of Aden, and are now British, having been declared so in '85. In '86 the German Government declared a Protectorate over the whole promontory; taking the coast beyond the British territory (*Berbera*) on the north, and as far south as *Warsheikh*, where British protectorate ('87) again begins. Treaties have been effected with the various native rulers of the Somali coasts and country. About the centre of the promontory lies the country of *Ogadayn*. South of it is the rich valley of the *Webbe Shebeyli* ("Leopard river"). See *Berbera*, *Zeila*, *Colonies of European Powers*, etc.

Somerville Hall. See *HIGHER EDUCATION OF WOMEN*.

Soudan. That section of Africa lying immediately south of the Sahara. Its limits are variously defined. It may be said to be bounded by the Sahara on the N., by the Abyssinian highlands on the E., by the lands draining to the Congo basin on the S., and by Senegambia on the W. Within these limits it has an area of 2,000,000 sq. m., and a pop. estimated at from 80 to 90 millions. Lying mainly between 5° and 18° N. lat., it is entirely within the tropics.

Western and Central Soudan are divided into eight independent and semi-independent states viz. (from west to east), *Bambarra*, *Moassina*, *Gaido*, *Sokoto*, *Adamawa*, *Bornu*, *Baghirmi*, and *Wadai*. **Eastern Soudan** comprises *Darfur*, *Kordofan*, *Sennar*, *Taka*, the *Equatorial Province* (the scene of *Emin Pasha's* labours), and the *Bahr-Gazal Province*. The district of *Sennar*, the eastern limit, has been under Egyptian rule till recently, and has been brought into notice through our campaign against the Mahdi.

Soulsby, William Jameson, b. 1851, is the son of an old and respected journalist, the late Mr. Matthew Soulsby, who was many years in the Gallery of the House of Commons, on the staff of the *Morning Chronicle* and the *Times*. Mr. Soulsby was educated at the City of London School and King's Coll., London, where he graduated as an associate. He was called to the Bar at the Middle Temple in Jan. '74, and has written on many legal subjects. He was appointed, in Nov. '75, *Private Secretary* to the *Lord Mayor*, in the Mayoralty of Mr. Ald. Cotton, and has been reappointed in that capacity in every successive Mayoralty down to the present. He was nominated ('79) one of Her Majesty's lieutenants for the City of London, and is decorated with the Jubilee Commemoration Medal, the Order of the Legion of Honour of France, the Francis Joseph of Austria, the Saviour of Greece, the Humane Order of Iberia, and the Takovo and St. Sava of Servia. In '88 he was the recipient of a testimonial from the Courts of Aldermen and Common Council, in recognition of his services. Mr. S. has also been honoured by the freedom of the Turners'

and Loriners' Companies. He has been *Secretary* of the various *Mansion House Relief Funds* and other public movements, including the British section at the Paris Exhibition '89.

Sound Submarine Bridge. (See last ed. SWEDEN AND COPENHAGEN.) In Aug. '91 it was reported that this scheme, in a modified form, had been revived. The place now proposed is between *Elsinore* and *Helsingborg*, where the Sound is extremely narrow. The tubular iron tunnel will here have a length of only a little above four miles, and it will rest on pillars, consisting of iron boxes filled with concrete. The tunnel is to be so deep in the water that even vessels of the greatest draught can always pass over it. It is to be constructed of tubular pieces, about 100 ft. long, consisting of an outer and an interior iron wall, the interval being filled with concrete. The ends of the respective tunnel pieces are to rest on the pillars, the joints being covered with concrete. The cost is calculated at £650,000 or £875,000. The entire weight of the tunnel will be about equal to that of the water it displaces, and the pillars will in consequence be only slightly loaded. It is urged in favour of the project that the fixing and maintenance present no very serious difficulties.

South America. Under this head are comprised the Argentine Republic, the Empire of Brazil, and the Republics of Bolivia, Chili, Ecuador, Paraguay, Peru, Uruguay, and Venezuela, each of which are separately treated.

Southampton, County Council for. See *COUNTY COUNCILS*.

South Australia. A colony comprising the central section of Australia. The older portion, *South Australia* proper, lies between 129° and 141° E. long., and from the sea to 26° S. lat. To this was added in 1863 the *Northern Territory*, lying between 129° and 138° E. long., and north of 26° S. lat. The whole colony, thus constituted, contains 903,690 sq. m. (*South Australia* 380,070 sq. m., *Northern Territory* 523,355 sq. m.), extending 1,850 m. N. to S. and 650 m. W. to E.; pop. 342,484. Capital *Adelaide*, pop. 45,333, or, with surrounding suburbs, 117,000. It is a beautiful and well-built city, with many fine buildings and institutions. *Towns*, not suburban, are mostly small centres: *Gawler*, *Kapunda*, *Koolinga*, *Moonta*, *Naracoorte*, *Port Victor*, *Wallaroo*, the largest; *Palmerston* and others in *Northern Territory*. Settled part of colony divided into 37 counties, hundreds (agricultural blocks), 23 municipalities, and 112 District Councils—the last of most importance. Also four pastoral districts.—**Chief rivers** are portions of lower Murray, Wakefield, Gawler, Torrens, in south, and the large and navigable Roper, Adelaide, Victoria, Daly, etc., in the Northern Territory. Country around *St. Vincent Gulf* very rich and fertile. Extensive pastoral regions farther back. About 200 miles north of *Adelaide* begins a dry region separating the fertile south from the farther north, which is subject to tropical rains. Three considerable mountain chains traverse this part. Interior not entirely sterile, for artesian water has been struck in the neighbourhood of Hergott springs. Very many salt lakes exist. There is much fair pasture-land; but the soil and climate of the south are chiefly adapted for the growth of wheat, which has already made the colony the "granary of Australasia," and for vine and olive, both of which are now extensively planted. The mulberry thrives, but

sericulture has yet to be introduced. Climate of the south one of the most agreeable and healthy in Australia. See **NORTHERN TERRITORY**.—**Executive** the Governor and responsible Ministry. Parliament consists of Legislative Council and House of Assembly. Council consists of twenty-four members—eight retire triennially—elected by colonists of three years' residence, owning £50 freehold or £20 annual leasehold, or paying £25 annual rent; the whole colony voting in four constituencies. The Assembly is elected triennially on manhood suffrage: fifty-two members. Members of both Council and Assembly are paid £200 per annum. Colony is represented in the Federal Council of Australasia. Northern Territory ruled by a Resident and staff. Religion and education are well provided for. **Army**, 2,202; **Navy**, 170. **Income** ('90) £2,557,771; **Expenditure**, £2,579,257. **Exports**, £3,827,378; **Imports**, £8,262,673. There are 1,815 miles of railway 3650 miles of good main road; and 11,448 miles of telegraph. Colony founded in '36, under auspices of South Australian Colonisation Association; government vested in Governor appointed and commissioners approved by the Crown. Representative government introduced, and, in '52, local government of districts. In '56 the constitution was given and proclaimed. Responsible government from that date. Northern Territory annexed in '64. Overland telegraph from Port Darwin opened in '72.—**History**. '91. The Government required that the cable tariff for Queensland and New Zealand should be maintained or a guarantee given against loss. Sir Arthur Blyth, on behalf of the Colonies (excepting Queensland and New Zealand), and Sir John Pender, for the cable companies, signed (April 3rd) at Adelaide an agreement reducing the cable rates between England and Australia) except the two colonies mentioned) to 4s. per word from May 1st. Parliament was opened at Adelaide (June 4th) by the Governor, the Earl of Kintore. A seam of good commercial coal was cut at Leigh's Creek, on the Great Northern Railway. It was 48 feet thick, and 1,496 feet below the surface. The revenue for '90-91 was £2,774,000. The Legislative Assembly rejected a proposal (Nov.) to close all public-houses during all hours on Sunday.

South Staffordshire Mines Drainage. (See last ed.). An important step was taken by the Commissioners in giving notice of a Parliamentary Bill for the Session of '90-91 to enlarge their powers. They declared that without such enlargement the extensive new drainage works could not go forward. Mr. Wilson Lloyd, of Wednesbury, was chosen chairman for the year. During the last week of March '91 the Bondholder's Committee issued a report asking for the formal sanction of the Commissioners' creditors to the bill with the object of creating a preference debt to expend in the extension of the underground drainage operations. The Bill was read a third time in the House of Lords on June 18th, and the Commons on July 28th. It contains clauses to increase the borrowing powers of the Commissioners for the Tipton district in order to raise more money for unwatering the Bilston mines, which comprise 17,000 out of the 19,000 acres of the drainage area. It was stated that some of the most valuable Staffordshire mines were submerged, and a third of the acreage was paying the working expenses; the present bond-

holders were receiving no interest on their investment of £150,000, and it was hoped that the new capital would open up mines which would give some interest. Nearly 100 million tons of coal lie in the immediate area, of an estimated value of 50 millions sterling. At the meeting of the Commissioners on July 1st, the chairman hoped that the new powers would enable owners to raise 50 million tons of coal in forty years, representing 15 millions sterling. At the meeting of the Commissioners on Aug. 5th, in announcing the Royal Assent to the Bill, the chairman stated that the amount warranted to be raised was £100,000. At the half-yearly meeting held in October an excellent report was presented.

Southwell, Rt. Rev. George Ridding, Lord Bishop of. The see was founded in 1884, and its annual income is £3500. Dr. R. was b. '28; ed. at St. Mary's Coll., Winchester, and Balliol Coll., Oxford, where he graduated B.A. '51, M.A. '53, and D.D. '60. Elected Fellow of Exeter Coll. in '51. Was **Head Master of Winchester College** '07-84. Elevated to the episcopal see of Southwell in May '84.

Spain. A monarchy lately under Alfonso XII. of the House of Bourbon, now under a regency. By constitution of 1876, Spain is declared a constitutional monarchy, with executive power vested in the king, and the legislative power in the Cortes with the king. Cortes composed of senate and congress equal in authority. Senate in three classes—1st, senators in their own right; 2nd, 100 Crown nominees (the two first classes not to exceed 180); 3rd, 180 elected by communes, church, universities, and largest taxpayers, half to retire every five years. Congress composed of 431 deputies, elected by citizens of twenty-five years of age paying taxes. Islands of Cuba and Porto Rico represented in Cortes. Each province has its own parliament for municipal and provincial administration. Religion, Roman Catholic. Public worship of any other creed forbidden. Area, including the Balearic and Canary Isles, each considered a province, 1,97,667 sq. m.; estimated pop. ('89) 16,500,000; revenue for '91-2, £30,000,000; expenditure, £32,457,000. Imports for '90, £38,700,000; exports, £30,000,000.—**History.** The final report of the Council of State was in favour of reversing the Alameda Decree, which prohibits open-air calcinations. A Spanish force of 250 had an encounter with 500 natives of Ascension Island, who held a strongly fortified position. The position was carried, but the attacking force lost 26 killed and 51 wounded. Two royal decrees were issued (Dec. 19th, '90), one superseding the decree forbidding open-air calcination, and the other fixing provisionally the terms of indemnity to those whose industry was prejudiced by sulphur fumes. A Spanish coasting vessel was looted by Moors, near Alhucemas, on the coast of Morocco. General Bird Grubb, the new United States Minister, was received (23rd). The new customs' tariff on Arabs, cattle, etc., became law (24th), and operated from Jan. 1st. Wheat flour, instead of 18s., paid nearly £5 6s. per ton under the new duties. Reports reached San Francisco (27th) that fighting had taken place in the Caroline Islands between the Spaniards and natives. The village of Ona was bombarded by three Spanish gunboats and taken. The first Cortes, under the Regency created '86, was dissolved (31st).—'91. The Queen Regent sent a malacca

cane as a present to the Pope, which, on his touching it, fell open, and a shower of gold pieces fell out (Jan. 1st). Further fighting between the troops and natives in the Caroline Islands was reported (5th). A delegation of leading representatives of commercial and agricultural industries in Cuba visited Spain, to confer on the serious state of affairs in that island, which had been accentuated by the McKinley Bill. They had audience of the Queen (7th). A large number of officials and private friends attended the funeral of Alonzo Martinez, late President of Congress (15th). Further fighting between the natives and the Spaniards in the Caroline Islands was reported (30th). It was reported (March 1st) that the Spanish troops had succeeded in subduing the natives in the Caroline Islands. The Cortes was opened (2nd) by the Queen Regent. The speech promised a protectionist tariff, and referred to the denunciation of commercial treaties. Señor Pidal was elected President of the Cortes (4th), and General Martinez Campo of the Senate. At a working-men's congress held in Madrid (23rd) a resolution was passed urging the men to renew their demands for an eight hours' day. The Premier (April 21st) introduced into the Senate a Bill granting a general amnesty to military and civil political offenders. The Budget for '91-2 estimates the income at £29,351,000, and the expenditure £30,108,000. The funeral of M. Aried de Huitfeldt, late Minister for Sweden and Norway, took place (27th) with full military honours. A serious fire broke out (May 1st) at the Bilbao naval dockyard, doing much damage, and throwing 3000 workmen out of employment. The contract by which the Royal Portuguese Railway Company transferred 807 kilos. of lines in Spain to the Northern Railway Company of Spain was signed (June 4th). The Lower House (16th) passed the Bank Charter Bill, which empowered the Bank of Spain to increase its note issue to 90 millions sterling, double its original maximum, and extending the charter till 1921. By the measure the Treasury secured an immediate advance of two millions, and the same for '92 and '93 without interest. The treaty of commerce between Spain and the United States was signed (26th). The Bill prolonging the Charter of the Bank of Spain was adopted by the Senate (July 7th). The Bill was passed by the Senate (8th). The second of the three plated cruisers, ordered by the Government from Messrs. Martinz, Rivas, and Palmer, was launched. The special embassy sent by the Emperor of Morocco was received by the Queen Regent at San Sebastian (20th). A serious outbreak of small-pox occurred (Aug.) at Saragossa and the neighbourhood. Republican disturbances took place in Corunna on the occasion of the funeral (Sept. 6th) of a member of the corporation. The people came into conflict with the civil guard, being supported by the mayor. The corporation was suspended by the Government. Heavy rains, causing a great flood, occurred (13th) in the province of Toledo, and between 1500 and 2000 were drowned, and there was great damage to property. The Queen gave 50,000 pesetas, and the Government voted 500,000 pesetas for the relief of the distress. A terrible collision occurred near Burgos (24th). An express train from the French frontier ran into a mixed train coming in the opposite direction; 14 were killed and 26 injured. The German Emperor sent 20,000 fr.

towards the relief of the sufferers by the floods. It was determined to adopt the Mauser rifle for the army. The number of deaths at Burgos reached twenty-four. A royal decree (26th) ordered the substitution on all railways of the Morse apparatus for the existing telegraphs. The third 7000 ton belted cruiser, built for the Government at the private shipyard near Bilbao, was launched (Oct. 3rd). Great floods occurred in many parts of Spain, destroying the crops and killing a number of persons (22nd). In the course of the journey of the King and Queen Regent from San Sebastian to Madrid, they called at the Carthusian monastery at Milalores. These monks are under a vow of perpetual silence, but at the request of the Queen Regent they were allowed by dispensation to talk for four hours. An arrangement was made between the Bank of Spain and Messrs. Rothschild by which the latter renewed the loan of 50,000,000 fr., and advanced 100,000,000 fr. in gold. The advances were made simply on the Bank's signature. (For army and navy see FOREIGN ARMIES AND NAVIES.)

Spanish Colonies. See COLONIES AND DEPENDENCIES OF EUROPEAN POWERS.

Spanish Political Parties and the Cortes.

The Cortes or parliament of Spain consists of two bodies, a Senate and a Congress. The Senate is composed of three classes: those who sit by right of birth or official position, of members nominated by the Crown (these two classes not numbering more than 180 together), and of 180 elected by the largest taxpayers of the kingdom and certain corporate bodies. Political parties are broken up into groups, most of which are named in the '90 ed. Their origin may be traced back to '12, when at the beginning of a great reform movement in Spain there were two great parties—the Royalists (nicknamed *los serviles*) and the Liberals. Some thirteen to twenty years ago there arose the Republicans, who were divided into followers of Señor Manuel Ruiz Zorilla and of Señor Castelar, and of Señor Pi y Margall, the last-named being in favour, as the leader of the Federalist party, of provincial autonomy. Señor Canovas del Castillo is the chief of the Conservative party, who are devoted to the Monarchy. On Dec. 30th, '90, the Cortes was dissolved after nearly five years' existence. The result of the elections, which was announced in Feb. '91, distributed parties forming the Congress in the following proportions: 289 Conservatives, 12 Reformists, 8 Dissident Liberals, 7 Carlists, 5 Independents, 2 Republican Autonomists, and 25 Republicans; under Señor Sagasta there were 95 Liberals. The senatorial elections took place a week later, with the following result: 150 Conservatives, 19 Fusionists, 7 Reformists, 6 Martists, 1 Republican, and 1 Carlist. The President of the Cortes was elected (March 4th) in the person of Señor Pidal; General Martinez Campos was elected President of the Senate.

Speaker. The title of the presiding officer of a legislative assembly. On the first day of the meeting of a new Parliament members of the House of Commons are summoned from their own chamber to the House of Peers, where Her Majesty's pleasure is signified by the Lords Commissioners that they shall proceed to the choice of some proper person to be their Speaker. On their return the Commons proceed to the election accordingly, the Clerk acting the while as chairman. On the follow-

ing day the Speaker elect, with the House, is summoned to the House of Peers, and one of the Lords Commissioners signifies Her Majesty's approval of the choice made by the Commons. The Speaker then, in the name and on behalf of the Commons, lays claim to their ancient and undoubted rights and privileges, which being confirmed, he and his fellow-members return to their own chamber, and the ceremony of taking the oath is proceeded with, he being the first to go through it. (See COMMONS, HOUSE OF, and PARLIAMENTARY PROCEDURE.) The Speaker may hold office until a dissolution. Should the office become vacant during a session, the new Speaker then elected is presented for the Royal approbation, but does not claim the privileges of the House. This great officer has a residence in the Palace of Westminster, and receives a salary of £5,000 per annum; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4,000 and a peerage. There has been no contested election for Speaker since 1839. The following have filled the office since the meeting of the first reformed Parliament:—Sir C. Manners-Sutton (first elected '17), '33-5; Mr. J. Abercromby, '35-9; Mr. C. Shaw-Lefevre (the late Viscount Eversley), '39-57; Mr. J. E. Denison (afterwards Viscount Ossington, and since deceased), '57-72; Sir H. Brand (the present Viscount Hampden), '72-84, when Mr. Peel was elected. The Chairman of Ways and Means acts as deputy Speaker in the unavoidable absence of Mr. Speaker. The Speaker of the House of Lords is the Lord Chancellor for the time being. The Chairman of Committees and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act.

Spencer, Herbert, was b. at Derby 1820. Ed. by his father, a teacher of mathematics at Derby, and by his uncle, a clergyman. Became a civil engineer, subsequently devoting himself to literature and journalism. He was for some time sub-editor of a daily paper at Birmingham, and afterwards of the *Economist*. His first work of importance, "Social Statics, or the Conditions essential to Human Happiness specified, and the first developed," appeared in '51. In '55 appeared the "Principles of Psychology," and in '61 "Education—Intellectual, Moral, and Physical," which has run through sixteen editions. In '84 he visited the United States, where he gave several lectures, among others one on "American Nervousness." Among his many important works are "Political Institutions," being Part V. of "Principles of Sociology" ('82). Of Mr. Spencer's many review articles, a series from the *Contemporary Review* has been reprinted as "The Man versus The State," which contains the articles on "The New Toryism" and "The Coming Slavery," an attack on Socialism; "Ecclesiastical Institutions," being Part VI. of "Principles of Sociology" ('83). In '89 he published "An Epitome of Synthetic Philosophy," and in the *Times* discussed the question of land tenure. He has recently prefaced a book entitled "A Flea for Liberty."

Spirits Committee. See Session, sect. 125.
"S. P. G." (Society for Propagation of the Gospel in Foreign Parts). The oldest Missionary Society connected with the Church of England, being incorporated by Royal Charter

in 1701. On the Society's list there are 660 ordained missionaries, including eight bishops, and of these 220 are labouring in Asia, 142 in Africa, 17 in Australasia, 215 in North America, 34 in the West Indies and South America, and 32 in Europe. In the Society's colleges there are about 2600 students; and 2300 lay teachers are employed in the various Missions. Nearly 40,000 children are receiving instruction in the Mission Schools in Asia and Africa. Income for '90 was £164,383. Office, 19, Delahay St., Westminster. See, Rev. H. W. Tucker, M.A.

Sport. See articles:—AQUATICS, ARCHERY, ATHLETICS, BASEBALL, BILLIARDS, COURSING, CRICKET, CYCLING, FOOTBALL, GOLF, HUNTING, LACROSSE, LAWN TENNIS, POLO, RACQUETS, SWIMMING, TENNIS, TURF, and YACHTING.

Spurgeon, Rev. Charles Hadden, was b. 1834. On relinquishing the Pædobaptist views of his family he became associated with the church at Cambridge of which the celebrated Robert Hall had been pastor; and as a member of the preachers' association of this congregation Mr. S. first began to hold services in surrounding villages. Pastor at Waterbeach '51. Preached for the first time in London '53. Occupied a pastorate at New Park Street '54, but in consequence of the great crowds attracted, services were held at Exeter Hall, and at the Great Hall, Royal Surrey Gardens, where on one occasion a terrible disaster occurred through a false alarm of fire having been raised whilst Mr. S. was preaching. Pastor of the **Metropolitan Tabernacle**, erected at a cost of £32,000 ('61). Mr. Spurgeon's sermons, of which about 25,000 of each issue are sold, have been published since the first week of '55, and are translated into various foreign languages. As an author he has produced numerous works, the chief being the *Treasury of David*; he also edits *The Sword and Trowel*. Mr. Spurgeon founded in '67 the **Stockwell Orphanage**. The **Pastors' College**, the **Colportage Association**, the **Book Fund**, and the **Supplementary Pastors' Aid Fund** also owe their inspiration in a large measure to Mr. S. Mr. S. in '87 severed his connection with the **Baptist Union**—a step which has led to a long controversy in the papers under the title of the "Down Grade Question." In '88 Mr. S. celebrated the issue of his 2000th sermon. Mr. Spurgeon has recently published two volumes of proverbs under the title of "Salt-cellars." His illness, which commenced in June '91, excited world-wide sympathy during the many weeks in which he was prostrated. He was able to leave England for Mentone in October.

Stainer, Sir John, Mus. Doc., was b. 1840, and at seven years of age became a chorister of St. Paul's; at sixteen, organist of St. Michael's Coll., Tenbury, and, three years later, organist of Magdalen Coll., Oxford. Subsequently graduated both in Arts and in Music, and in '60 was appointed organist of Univ. Church. In '72 he succeeded the late Sir John Goss as organist of St. Paul's, and held that appointment until 1889, when he retired. Dr. Stainer has composed many anthems and Church services, the *Cantatas* "The Daughter of Jairus," "St. Mary Magdalene," "The Crucifixion," and, in addition to his well-known "Treatise on Harmony" and Musical Primers, has written "The Music of the Bible." Knighted '88. Sir John was in June '89 elected **Professor of Music at Oxford**, and, in the following October, **President of the Musical Association of London**, in

place of the late Sir Fredk. Gore-Ouseley. He is Inspector of Music to the Education Department.

"Standard, The." First published in 1827.

It is in the front rank of the political journals that rose into importance almost immediately after the abolition of the Paper Duty (6s). The political principles of *The Standard* are Conservative; but it reserves, and often exercises, the right of sharply criticising the action of the Conservative party. During the American Civil War, the letters of its correspondent "Manhattan" were marvellously popular, and the services of its war correspondents—notably Mr. G. A. Henty, and Mr. Cameron, the latter of whom was killed in the Bayouda desert—have always been prompt and efficient. The present editor is Mr. W. H. Mudiord. *The Evening Standard* (1857) is an evening edition of the morning paper.

Standing Committee. See PARLIAMENTARY PROCEDURE.

Standing Orders. This term was originally applied to certain Orders made by either house of parliament to regulate its own procedure. Orders made by either house may in respect of their time for remaining in force be classified under three heads. (1) Standing Orders, which are permanent regulations, although liable to be suspended upon extraordinary occasions—e.g., in order to the rapid passing of bills of a pressing nature. (2) Sessional Orders, which continue in force only during the session in which they were made, although they may be renewed from year to year. (3) Orders indefinite in their duration. Of these three classes the Standing Orders are the most important for purposes of procedure. The Roll of Standing Orders of the House of Lords has been regularly published at intervals. But until 1854 the Standing Orders of the House of Commons, with the exception of those relating to private bills, had never been published by authority. The Commons Standing Orders relative to public business were revised and reprinted in '88 (see PARLIAMENTARY PROCEDURE), and the Lords Standing Orders were considered and amended in '89.

Stanford, Charles Villiers, was b. at Dublin in 1852, and went to Cambridge as Choral Scholar of Queen's. Became organist of Trinity in '73, and soon afterwards Conductor of the Cambridge Musical Society. His university career was also distinguished. His operas are "The Veiled Prophet" (not yet heard in England), "Savonarola" (played at Covent Garden), and "The Canterbury Pilgrims" (written for Mr. Carl Rosa at Drury Lane). His oratorio "The Three Holy Children," written for the Birmingham Festival of '85, his "Irish Symphony," and his choral ode "The Revenge" (Leeds

Festival '86, are well worthy of his reputation. He is Professor of Composition at the Royal College of Music, and one of the leaders of advanced musical thought. Is the son of an accomplished amateur musician. In '87 he was appointed **Professor of Music at Cambridge** in succession to the late Sir George Macfarren. In Jan. '90 a new trio in E flat by Prof. S., for piano and strings, was produced. An oratorio by Prof. S., entitled "**Eden**," was produced at the Birmingham Festival '91.

Stanley, Henry M., was b. at Denbigh 1841, and passed his childhood in the workhouse at St. Asaph. Subsequently sailed as cabin boy to New Orleans, where he was adopted by a Mr. Stanley, whose name he took, but whose death without making provision for him again compelled him to start the world on his own account. After a series of adventures he became a journalist during the American civil war, being attached as reporter to the staff of the *New York Herald*. In '68 he was sent to accompany the British expedition into Abyssinia, as **war correspondent** for that paper. Subsequent to this he made a tour to the Black Sea, and thence through Persia into India. In '69 Livingstone, in Africa, had not been heard of for a long time. Mr. Gordon Bennett, proprietor of the *New York Herald*, ordered Stanley to "go and find him." Early in '71 Stanley left Zanzibar and plunged into the unknown continent. Before the end of that year he had found Livingstone. In '73-4 he accompanied the British expedition into Ashanti, up to Kumassi, as a **war correspondent** again. In '76 the *New York Herald* and the London *Daily Telegraph* conjointly sent him to **Central Africa**, to take up the thread of Livingstone's discoveries. He left Zanzibar in that year, and in '77 emerged on the west coast, having circumnavigated Victoria Nyanza, and forced his way in spite of terrible obstacles down the whole course of the hitherto unknown Congo. In '79 the King of the Belgians gave Stanley the command of an **expedition** formed by the **International African Association**, for the purpose of exploring the Congo. Stanley succeeded in planting stations and securing steam-navigation upon the upper river, and may be said to have made what is now the **Congo Free State** (*q.v.*). He remained at work from '79 till '85, with the exception of a short absence in '82. In Jan. '87, Mr. Stanley started on an **expedition** for the relief of **Emin Pasha** (*q.v.*). Previous to his departure he was entertained at a banquet at the Mansion House, and presented with the freedom of the City of London. News of Stanley and Emin, which had long been awaited, arrived on April 2nd, '89. On the following day the newspapers published the thrilling story of the explorer's perilous journey to the **Albert Nyanza**, through vast tropical forests, under conditions of the utmost difficulty. At the commencement of '90 news were received of the explorer's safety, and he was enthusiastically received on once more meeting Englishmen, and journeyed to the south of France, where the Prince of Wales personally congratulated him. On reaching London crowds awaited his arrival, and the hearty greetings given to him were repeated at every public appearance which he made. A succession of brilliant receptions and banquets, given under various auspices to Mr. Stanley and his companions, in addition to social functions, fully occupied him for the

next two months. During this time, also, he was hard at work on his book entitled "**In Darkest Africa**." His marriage with Miss D. Tennant took place at Westminster Abbey (July 12th). A controversy arose in October as to certain incidents noticed in a "Life of Major Barttelot," which, however, did not deter Mr. and Mrs. S. from undertaking a long-promised **American tour**, during which Mr. S. lectured before large audiences. After his return, in '91, from America, Mr. S. delivered many lectures in various parts of the kingdom. He fractured his ankle during a visit to Mitrren (July). He afterwards departed for Australia.

"Star, The." A Radical evening paper, devoted to the interests of the advanced Democratic movement both in Great Britain and Ireland. It first appeared Jan. 17th, '88, and has attracted attention by its promptness in obtaining information, and its outspoken articles and large circulation. One of its most popular features is the column entitled "Mainly about People." Office, Stonecutter Street, E.C.

State Pensions One of the greatest legislative measures, which has been advocated in the interests of the working classes of the United Kingdom during the present century is National Provident Insurance against pauperism. As Lord Carnarvon rightly stated in an article on National Insurance published in the *Nineteenth Century* for September '80, the idea is not a new one of a State insurance which should secure to poor people a moderate provision during sickness and old age, and which should be wide enough in its operation to enable us to dispense with a large portion at least of our system of poor relief. It has often been discussed many years ago in various forms, and was contemplated in the earlier Friendly Societies Acts; and to some extent it has been practically carried into effect by some of the friendly societies and great commercial companies. It has also been attempted by philanthropists. But the credit of giving it definite shape by investing it with such sufficient and precise details as to bring it within the province of public discussion belongs to the **Rev. Canon Blackley**. He first critically notified his scheme in the *Nineteenth Century* of Nov. '78, which was several years before Prince Bismarck had taken up the subject of insurance against sickness and old age for the German nation. So much attention and appreciation did Canon Blackley's scheme receive, that the **National Provident League** was formed shortly afterwards mainly to promote it. In '85, '86, and '87 a **Select Committee** of the House of Commons took evidence on the subject, and made a report on such in the last-mentioned year. Although the reference to the Committee was to inquire into the best method of National Insurance against Pauperism, the inquiry was practically limited to an examination of Canon Blackley's recommendations. Other schemes were submitted by the Rev. John T. Stratton, Mr. C. P. Tebbutt, Mr. J. Broughton Edgo, and Mr. Robert Davie, but the committee reported "that the evidence always tended to revert to Canon Blackley's scheme, which had manifestly impressed itself favourably or unfavourably upon the minds of witnesses, to the exclusion of all other proposals." These remarks apply to the present time, although other suggestions have since been made differing more or less from the Blackleyan proposals. It is to be regretted

that, notwithstanding much has been uttered at public meetings and published in magazines, reviews, and newspapers respecting State Pensions, there is no publication or number of such from which the public can gather within a reasonable readable space anything like the fair amount of information which they should possess for and against State Pensions and the administrative machinery in connection with them. We have endeavoured, therefore, in the following remarks to supply in a great measure this important deficiency, and trust that it will soon be supplemented by other information, whereby the public will be further aroused to a just sense of its enormous magnitude and importance. All the schemes of national compulsory insurance against being relieved by the Poor Law are recommended—firstly, on the ground that, notwithstanding it is a moral and political duty for every person to provide for independence in sickness and old age if he or she is able to do so, a vast majority of the inhabitants of the United Kingdom fail to fulfil the obligation, and an immense number make no proper attempt to discharge such duty. Owing to these omissions a great multitude are ultimately dependent on the poor rates, whereby the thrifty and industrious are compelled to pay for the maintenance of the unthrifty and the idle. Our Poor Law tends to encourage improvidence; because it teaches the young—and in the most impressive manner at a time when they can best make provision for themselves—that they may take the chance of being improvident with the knowledge that the ratepayers will have to provide for their maintenance if they do not provide for it themselves. Another reason in favour of national provident insurance is the uncertainty of many of the efforts now made by the thrifty portion of our people, to secure themselves against pauperism, owing to their being members of financially and in other respects unsound friendly societies, which undertake to grant sick pay and burial money, but from lack of funds or being wound-up fail in this obligation. Canon Blackley's original scheme was one for the compulsory insurance of all persons in this country of both sexes, by the prepayment between the ages of eighteen and twenty one years of the sum of £100 thereabouts into a National Provident Society for securing to the wage earning classes 8s. per week for sick pay and 4s. per week superannuation pay after the age of seventy years. As the Parliamentary Committee of '87 stated that the financial objections against the pension part of this scheme did not press with similar force against the sick-pay portion of the measure. Canon Blackley has abandoned the latter part of it, and now alone advocates pensions for old age of 5s. per week, to commence at sixty-five, for the payment of the before-mentioned premium of £10. He recently stated to a correspondent of *Help*, a journal of social science, that he thought the State would do well, for promoting an object so vital for the self-respect and independence of its inhabitants, "to contribute for wage-earners an equal sum to that paid by its subjects as premium. By this means, he adds, the initial payment would be reduced to one-half. In order to better understand and appreciate the importance and necessity of State pensions for the working classes, our readers should be reasonably aware—firstly, of the institutions which exist for peculiarly benefiting wage-earners, in return for subscriptions and premiums, the

limited number of persons to whom these benefits extend, the unsound character of many friendly societies, and the losses which are sustained by the very poor being compelled to discontinue their payments; secondly, of the approximate number of persons of sixty-five and over who are in receipt of parish relief, and the indifferent manner in which a vast number of the working classes regard the receipt of this relief when they become old. We will mention the essential particulars under these heads, and then state how it is proposed to carry out the scheme, and the administrative, actuarial, sentimental and other objections against it. For providing weekly payments to the working classes when unable to work from sickness, there are, and have been for a long period, various kinds of **Friendly Societies**. Some of these associations also pay to the representatives of their members a fixed sum for their burial, while other friendly societies insure about half the number for funeral expenses only. It is the general practice of these societies to grant sick-pay benefit for life. There is, however, reason to believe that in the future they will gradually cease to grant sick-pay benefit after a certain age, which would practically resolve itself more or less into the form of payment of an annuity. The **Manchester Unity of Odd Fellows** (*q.v.*), by the advice of Mr. Reuben Watson, their actuary, have ceased paying sick allowance when a member reaches sixty-five years of age. Those who wish to secure an old age pension can do so by making a special payment; but less than 250 out of more than 600,000 members appear to have availed themselves of the opportunity. An approximate estimate may be formed from the following table of the number of working people insured for sickness and funeral benefit:—

	Members.
Affiliated Orders	2,004,000
Centralised, General, and County Societies	500,000
Peculiar Trade Societies—	
(a) Railway Group	40,000
(b) Miners' Permanent Relief	221,000
Women's Societies	10,000
Small Local Benefit Clubs, which are fast passing out of existence, on account of bad financial arrangements	750,000
Collecting Friendly Societies, as the Royal Liver, Liverpool, Victoria Legal, Royal London, Scottish Legal, and others	2,809,593
Total	6,334,593

Many of these persons consist of infants whose parents have insured them for burial money by small weekly payments. The older **Trades Unions** grant all the benefits of friendly societies, as well as secure their members from the evils owing to loss of employment through the fluctuations of trade. Their membership includes about 750,000. These Unions, however, consist almost entirely of skilled workmen. But the new Unionism, which is now but little more than an aggressive organisation, mostly consists of unskilled labourers. It is stated that they are certain in the near future to extend the purposes for which they have been formed, in order to make full provision for out-of-work benefit, even if they do not grant sick pay. —The **Industrial Life Assurance Companies** are

very beneficial to wage-earners, by providing them with a fund for funeral expenses; and a vast number of these classes assure their lives and those of their children with these institutions, which include the Prudential, the Refuge, the Pearl, the British Workman's, the London, Edinburgh, and Glasgow, the Wesleyan and General, etc. Although three of these companies grant deferred annuities, but exceedingly few are contracted for with them. The **Prudential Assurance Company**, which has more than 9,000,000 policies on its books, has only contracted for about thirty deferred annuities. The issue of life assurance policies by the **Post Office**, the purpose of which was to benefit the working classes, has become a great failure, as it is unsuited to their habits. According to the report of the Postmaster-General, the number of life assurances effected in '90 was only 468, for a total sum of £25,466, as compared with 671 assurances for £32,832 in '89. As regards deferred annuities, only 116 of them were purchased from the Post Office in '90, amounting to £257. Although, as a rule, these annuities commence at sixty, very few of the small number purchased have been for wage-earners. From what has been stated respecting provision made by these classes for sick pay and burial expenses, it appears that about 3,000,000 insure for sick allowance, and about 13,000,000 for burial pay, but less than 500 for deferred annuities. Nearly all the wage-earners of the country have therefore made no provision for their old age. The consequence is, that when they can no longer work, after reaching sixty-five years of age, they, with few exceptions, must end their earthly existence by pauper out-door relief, or in a workhouse. In his article upon a *National Pension Scheme*, published in the *Contemporary Review* for April last, the Rev. W. Moore Ede states that "all through life the shadow of an old age of penury and pauperism hangs over nearly three-fourths of the population of this the richest nation in Europe: a gloomy prospect,—hard work for fifty years or more, and then, after all the toil and effort, to sink down into the submerged tenth at last. There ought to be, and there must be, some road out of this corner of darkest England." The position of the wage-earning classes is justly stated to be one of economic instability. As they are paid weekly, the money received by them on Saturday is required to meet the necessities of the coming week. But comparatively few of them possess, beyond the furniture of their houses, any appreciable amount of cash. As their income depends upon their work, their wages as a rule cease when they are prevented from working, and a few weeks' sickness without the aid of a friendly society will reduce them to a wretched state of destitution. Now, with all due regard to the benefits of these associations to the working classes, abundant trustworthy testimony has been adduced respecting the terrible ill consequences which have resulted from them. In the first place the great majority of our **Friendly Societies** are insolvent, or in other respects unsound, and therefore cannot be relied upon for the reception of the benefits they undertake to grant, and the average insurer cannot select the safe one. Mr. J. M. Ludlow, who was until recently the Chief Registrar of Friendly Societies, stated in his evidence before the Select Committee on

National Provident Insurance, in '85, that registered friendly societies often break up, and nearly as frequently because "they have too much money as because they have too little," for the purpose of dividing it. He added that "a vast number of friendly societies are founded openly and knowingly without any reference to what you would call actuarial soundness. The men know perfectly well that their contributions would not be sufficient to meet the actuary's valuation, but they rely upon a levy, and upon closing the box, and upon all sorts of expedients which will save their pockets in the first instance. And there is one moral cause for that which is overlooked very much, which is this, that in a large portion of this population the lower strata particularly, there is not sufficient honesty to resist the temptation of large accumulated funds. That, I believe, is the secret of the dividing societies and sharing-out clubs which so many benevolent people are very much opposed to. These dividing societies are chiefly met with . . . either in large cities, where morality is low, such as Liverpool in particular, or in the poorer paid agricultural districts, where it is a terrible temptation to a poor man earning small wages to handle large sums of money." If a working man is able to select a safe friendly society it may not have a branch near enough to his home to enable him to join, while if he succeed in becoming a member of such a society his removal to a distance may deprive him of membership. As his membership depends upon periodical payments, it often happens that a workman cannot from various causes pay his stipulated subscription, in which case he loses all he has paid in, and his provision is gone, unless he can pay the increased rate on rejoining, which very few do. It was admitted in evidence that the Oddfellows' and Foresters' Societies lose annually 25,000 and 20,000 members respectively, from their inability to continue their contributions. Lord Portsmouth, on the occasion of the observations made by Lord Carnarvon in the House of Lords on June 4th, '80, on insurance against sickness and old age, said that in one union more than half of the old people in the workhouse had been obliged to go there because they had lost their insurance money by the breaking up of parish clubs which arranged to pay weekly sums to their members during sickness. A vast number of similar cases have occurred. Very many wage-earners make no provision for sick or old-age pay in friendly societies, because they distrust all. Thousands of these societies have failed because young men have refused to join those containing many old members, whereby the supply of funds was cut off, and the societies became insolvent. In answer to the assertion that old age pauperism does not very extensively prevail in this country, because comparatively few of the working classes live very long, there are some important statistics to the contrary. Thus, of 100 persons who attain their twenty-first birthday, the number who reach,—

	Dr. Ogle's	
	Tables.	Tables.
60 years of age will be	54'01	69'47
65 " "	43'9	49'19
70 " "	32'8	37'59

The experience of the Foresters' Society respecting longevity closely approaches that of

the Oddfellows. As only persons who pass satisfactory medical examinations respecting their health are allowed to join friendly societies, the number of members who reach old age is in excess of the average longevity of the country. Some very important statements have recently been made to show that a great number of wage-earners, following various kinds of labour, have only comparatively short lives. In an article in the *Faringham Review* for October '91, on "A National Pension Fund," it is stated that the secretary to the Society of Brassworkers publicly notified that, after examining reports of the Engineers' Society, and the Bricklayers', Boiler-makers', Carpenters', Printers' and Compositors' Societies, etc., it appeared that only one in twelve of the members of those associations lived to be sixty-five. An almost similar statement coming from the Amalgamated Society of Railway Servants is that out of ninety-eight members who died in '90 only five had attained sixty-five. Messrs. Mann and Tillet are reported to have stated that a majority of the dock labourers break down altogether at forty-five, and they naturally scoff at a pension to begin at sixty-five. In confirmation of the assertions by leading advocates for State pensions for the poorer classes, that a vast number of them not only live to sixty-five and upwards, but that an enormous proportion of them are in receipt of poor-law relief, Mr. Burt moved in the House of Commons for a return of the number of persons in England and Wales above sixty, sixty-five, and seventy years of age respectively, who received poor-law relief on August 1st, '90. According to the return granted, the number over sixty-five years of age was 245,687 out of an estimated total of 1,300,000 in those parts of the United Kingdom, being nearly one in five of all classes. The percentage, however, is much greater than this, because lunatics in asylums, licensed houses for the insane and registered hospitals, vagrants, and persons who were only in receipt of relief constructively, in consequence of relief being given to wives or children, were not included. Again, not only was this return made in summer, when very many do not seek parish relief, but when trade was specially prosperous, and when almost any one who would work could get employment. This return gives the number of paupers on a single day only, and not for the year; and previous statistics have shown that the number of persons who have received poor-law relief during the year is about three and a half times the number relieved on any particular day. Canon Blackley states that when he was vicar of a country parish he found that 40 per cent. of the persons buried in the churchyard over the age of sixty-five had been in receipt of parish relief at the time of their death. He wrote a letter to the guardians appealing to the clergy of the country to undertake a similar inquiry; and upon the figures he thus arrived at, he formed the conclusion that among the wage-earning classes at least 50 per cent. of those who pass the age of sixty-five will be in receipt of poor-law relief before they die. He added: "You cannot depauperise these people unless you can make them contribute to their own support at the time when they can best afford it, and that I take it is between the ages of eighteen and twenty-one." Although there are an immense number of high-minded working-men who take pride in maintaining their individual

independence, and would hate to receive charity, there appear to be a multitude of other wage-earners who do not consider it a degradation for them to receive parish relief, and are therefore entirely indifferent to the prospect of spending their old age in the workhouse, and who do not belong to any friendly society. As this assertion has been doubted, important evidence to this effect has been given by Canon Blackley, Mr. Holmes, one of the directors to the Manchester Unity of Oddfellows, Mr. Pringle, chairman of a parochial board in Midlothian, and others. In reply to the statement that pauperism has recently decreased in this country, it must be said that during the last half-century it has decreased and increased about fifteen times. The reason why Canon Blackley recommends that the old age pension of 5s. per week, to commence at sixty-five, should be paid for between the ages of eighteen and twenty-one is because this is the period when the vast majority of wage-earners can best afford to pay it. At eighteen or nineteen nearly all labourers, and at twenty-one nearly all artisans, receive the full rate of wages, and the majority of them are unmarried; therefore they can manage to save a considerable part of their earnings annually if they desire to do so. It is proposed to extend the time for paying the pension sum in favour of apprentices until their apprenticeship expires, and then greater instalments may be required. Further time is proposed to be allowed for the payment of women's pensions, as regards those females who receive very small wages until they are twenty-one. On being asked why all classes of persons should be compelled to contribute to the pension fund, Canon Blackley stated that the scheme to be popular must be universal; and that those who are well-to-do to-day may ultimately be in receipt of poor-law relief, and be as much in need of the pension as the workmen they now employ. He adds that "a visit to the wards of any workhouse and the examination of their occupants will prove that the well-to-do class contribute to the workhouse population in quite sufficient numbers to necessitate their inclusion in any scheme of national insurance against old age. . . . We find plenty of men in the workhouses who have kept their packs of hounds." If this scheme is adopted, it is stated that the poor rates will be reduced to a very small amount, much to the benefit of a multitude of present and future ratepayers. It is proposed that the contributions for pensions should be paid into and distributed by the Post Office, under proper certification, and that every contributor should have the advantage of claiming his pension at whatever part of the United Kingdom he desired. It is recommended that the money should be invested under the authority of a Board of Management, elected, if deemed advisable, by the contributors themselves, but restricted in their power of investment by statute law. Canon Blackley proposes that the pension fund should be collected from people of means by the tax gatherer or the rate collector, and that employers of wage-earners should be empowered to deduct from the wages of the latter the amount due by them for insurance of pensions and pay them into the Post Office to the credit of the persons employed until the necessary sum has been received. As regards those men who have begun their payment to the pension fund, but have not been able to continue it because they have been thrown out of

work by the fluctuations of trade or other causes, it is proposed that as soon as they go to work again, the deductions from their earnings are to be resumed, whereby the period at which they complete their national insurance will be prolonged. Although there are a great number of the working classes who have no regular masters, the number of persons between eighteen and twenty-one who are in casual employment is very small in proportion to those above this age. It is stated that few employers would take a lad of eighteen or nineteen to work two or three days if they had to go to the Post Office and open a separate account and pay in 9d. or 1s. to his credit. The consequence would be that these youths would be driven to steady employment instead of gaining their livelihood by chance work. Concerning people who will not work, and who are under the obligation of doing so for their maintenance, when these come to the workhouse or the gaol Canon Blackley is of opinion that they might be detained there to earn their national insurance, though they need not be arrested outside for this purpose. Sometimes, therefore, the contributions of these persons could be obtained. It is not thought desirable that the State should be responsible for the pension fund, but that it should be required to keep the law in such a condition that contributors must pay their share of the fund. It is proposed that the fund should be valued yearly, and if the valuers should declare that the sum of £10 would prove too little to meet the requirements, they should be legally forced to state what is the proper sum to supply the deficiency, and all future contributors should pay it, as this is the mode in which inadequacies of contributions in insurance companies are met. It is considered desirable to allow the return of £5 without interest to the legal representatives of the working classes on their death for funeral expenses. It is alleged that the scheme would be beneficial to the Friendly Societies, because a great number of persons by paying for their pensions would have acquired the habit of thrift who otherwise would not have done so, and would therefore join these societies for the purpose of obtaining pay during sickness. To prevent mortgaging of the pension, it is proposed to empower the poor-law authorities to draw the pension of any person who came to the workhouse, whereby it could not become a security to any money-lender. Canon Blackley's proposals were supported by a number of witnesses of various classes who gave evidence on the subject before the Select Committee referred to, and the statements of some of these are specially embodied in the report of the Committee. Mr. Goodwin, a compositor, said that he thought the scheme should be compulsory because: he found that there were a number of people "who will never avail themselves of any of the methods open now to provide against these emergencies, but so soon as they became ill they readily fall back upon their fellow-workmen for help in the shape of subscriptions." Sir Edward Walter, the founder and commander of the Corps of Commissioners, 1600 strong, spoke unhesitatingly in support of Canon Blackley's complete scheme; and this is the more worthy of consideration because Sir Edward has established in his corps a system of compulsory provident insurance, which is very beneficial to and is greatly appreciated by the men. At numerous large meetings of working men, addressed by Canon

Blackley and others on the scheme, it has been hailed with great delight, and but very few wage-earners at these gatherings manifested any opposition to the scheme. In March '86 circulars were sent by the council of the National Provident League to all the boards of guardians in England, which numbered 649, and to about 90 of the largest parochial boards in Scotland, requesting an expression of opinion respecting the proposal for compulsory National Provident Insurance. In the following May resolutions in favour of the scheme had been received, and not an unfavourable one. The Barony Parochial Board of Glasgow, representing the largest parish in Scotland, with 464,000 inhabitants, accompanied their resolution with an intimation that three of their officials, including the chairman, were ready to give evidence in favour of the scheme, and two of them gave it before the Select Committee accordingly. A considerable, and, it may be added, a preponderating amount of testimony, was given before that body from various sources adverse to Canon Blackley's proposals as a whole, from (a) the official point of view, mainly on administrative grounds; (b) from the actuarial point of view, chiefly because the initial sum for securing the required benefits is insufficient; and (c) from the vested interests or friendly societies' point of view, on the ground that they would be injuriously affected by national insurance. With respect to objections against State pensions by the classes and masses, one is that the granting of such would be considered a system of enforced pauperism, and therefore could not be received with favour. The upper and middle classes, none of whom would be entitled to one of these pensions unless they fell to the level of wage-earners, would be bitterly opposed to being taxed for their allowances, and part of which would be enjoyed by an immense number of working people, who are quite able to make pecuniary provision for themselves. A great proportion of the middle classes could ill afford to pay for these pensions. The Select Committee reported that the proposal for compulsory insurance "is open to very strong objections." They think that the great majority of wage-earners "would prefer to provide their own insurance in their own way, rather than be parties to any compulsory scheme. Anything which tended to undermine the self-taught habits of thrift and self-help, which prevail among the working classes to a considerable extent, or to lead the wage-earners of the country to rely for support upon a National Insurance Society, practically guaranteed by the State, might be fraught with disastrous consequences. . . . It might lessen the feeling of responsibility, which is shared by a constantly increasing number of the working classes, of providing their insurance for themselves. It might seriously impair that education in thrift and training in business which has been brought about by the building up and management of their own associations for self-help by the working classes, the value of which to the nation it is almost impossible to exaggerate." According to the evidence given before the Committee, it is clear that contributions for pensions could not be obtained from very many of the poorer class, that the scheme would in a great measure fail to benefit a multitude of those who now add very much to the pauperism of the nation. The scheme would neither assist those who are out of work, nor compel

those who were idle and dissolute to labour; and yet, as the Committee properly state, "absence of employment for those who are willing to work, and the reluctance of the idle to work under any circumstances, are two of the most fruitful causes of poverty." The Committee fear that the proposal that none but wage-earners should be benefited by the scheme would be quite inoperative; because many poor people who did not earn wages would be excluded, while a great number of wage-earners who are fully able to provide for themselves would become recipients of the proposed benefits. Whatever objections may be raised against the pension scheme on the ground that the amount of the pension is insufficient, it appears that it is about double the sum which is given under our poor law for outdoor relief, and is 1s. 4d. per week in excess of the maximum old age national pension granted to working men in Germany, which ranges from 2s. 6d. to 3s. 8d. per week, based upon the rate of wages which the recipient of this pension has been paid. Mr. Cardin, Assistant Receiver and Accountant-General of the Post Office, in his examination before the Select Committee, stated that he believed there would be difficulty in the Post Office collecting and distributing the Pension Fund. The Committee, however, declare that "this objection, even if maintained, does not appear to be one fatal to Canon Blackley's scheme, supposing it to be approved of in other respects, and it might probably be met by an alteration in detail of the proposed system." The evidence given before the Committee by Mr. Hendriks, an eminent actuary, is very important respecting the administration of the scheme. It is not practicable, he says, to ear-mark or register the whereabouts or the existence or death of millions of the portion of the population entitled to become claimants as pensioners in old age. In friendly societies and assurance companies, the numbers are restricted to thousands instead of millions, with one noteworthy exception; and their identity, residence, and deaths can easily be ascertained, and chiefly kept in check by the fact that nearly all the contributions are payable periodically until the benefit assured for is payable. This could not be the case with national provident insurance, because many years would pass before claims would be made. "In the meanwhile thousands upon thousands of deaths might be unascertainable. The real number of potential claimants of the future could never be ascertained with sufficient correctness for calculation, either in statistical statements of the fund, or in the more important matter of financial valuations. The writing off of lives in the great book of members of the fund would be most unsafe, except in the case of death and identity being most strictly proved; and in innumerable instances this could not be done. Individuals and their identity in the lower strata of society are most difficult to trace out in the long period between the age of twenty-one and the termination of life." All actuarial estimates in Canon Blackley's scheme "may," says Mr. Hendriks, "be considered in one sense as purely empirical, because there is necessarily an enormous amount of hypothesis of untried risks introduced into the calculation." Actuaries differ greatly as to the cost of an annuity. According to tables drawn up by Mr. Nelson for the Ancient Order of Foresters, £9 9s. 1d. paid at twenty-one is the purchase-

money of 5s. per week at sixty-five. Mr. Watson, the actuary of the Manchester Unity of Oddfellows, states that the cost is £14 10s.; and the Government annuity tables of 1884 mention the purchase amount to be £17 6s. 8d. Different rates of interest are assumed as the basis of calculation. Mr. Sutton, actuary to the Registry of Friendly Societies, declares that large friendly societies or companies would allow 3 per cent. Mr. Holmes, one of the directors of the Manchester Unity of Oddfellows, states that the average rate of interest on their investments is about 3½ per cent., but their scale of payments is based upon a 3-per-cent. valuation. Mr. Stead, High Chief Ranger of the Ancient Order of Foresters, has notified that their scale for annuity payments is estimated on a valuation of 4 per cent. On the contrary, Mr. Sutton mentions that in fixing the scale of payment for deferred annuities "the Government makes the assumption of only obtaining 2½ per cent." Canon Blackley appeared to be of opinion that the Board of Management would make its own investments, whereby it might realise from 4 to 4½ per cent. compound interest on them. In reference to this, Mr. Sutton states that "the life offices of the United Kingdom, with assets altogether of £120,000,000, and with everything in their favour as regards opportunities to invest and ability in the selection of securities, find it difficult to realise much more than 4 per cent. all round, and there has been a tendency for the rate to fall. Now, if the National Insurance Society were started to-morrow, and all persons just twenty-one years of age made to pay the lump sum for their deferred annuities only at a price about equal to that given by the experience already quoted of the Manchester Unity, there would be at least £3,000,000 to be at once invested; and assuming the population stationary the next year, there would be another £3,000,000 to be invested, as well as the year's interest on the first £3,000,000. In this way, at the end of forty-nine years, and before a single penny had been paid in the way of benefit, the National Insurance Society would have, as one only of its numerous duties, the investment of over £300,000,000 in respect of its annuity fund only. What would be the exact effect of such a state of things upon the financial and economic condition of the country generally it is not proposed to discuss; but sufficient has been probably indicated to assist in the formation of an opinion upon the subject." Mr. Hendriks stated that he had always shared in the opinion of that talented actuary, the late Professor de Morgan, that in the future actuaries had more to fear from a fall in the rate of interest than from a rise in the rate of mortality as a disturbing element in their calculations; and that if he were the adviser of a great State department for granting deferred pensions he "would not take the responsibility of advising a higher rate than 3 per cent., either in calculation of contributions or in the probable average accumulations of some hundreds of millions of its funds in the next half a century for the purpose of meeting its liabilities within and at and after that lapse of time." The Select Committee report that they are of opinion that instruction in sound principles of thrift and insurance should form part of the compulsory education scheme of the country. "An elementary text-book on the principles of provident insurance, such as is recommended by Mr. Sutton and in Mr. H. S.

Tremenheere's paper might be comprised in a few pages, and if introduced by the Education Department into the routine of elementary schools might prove of infinite advantage to the whole mass of the population, and ultimately, by the diffusion of knowledge, sap the evils of improvidence and imprudent investment.

—The **National Provident League** has recommended another scheme for old age pensions, to which it is stated Canon Blackley is not opposed. This is a voluntary State-aided measure. It proposes as follows: (1) That the pension secured by a contributor from his or her own resources shall not be below £6 10s. per annum, payable at sixty-five years of age; (2) that the amount of pension guaranteed by the State to meet such sum shall be another yearly sum of £6 10s., so that each contributor will be entitled at sixty-five to a pension of £13 a year; (3) that the Post Office organisation be used for the collection of funds if desired, and in all cases for the payment of State pensions when due; (4) that every person on the completion of his or her own payments shall receive a certificate stating the name, age, and address of the insurer, the date of the completion of the insurance, and also the name and address of the Friendly Society Annuity Office Trust Fund, or Post Office Savings Bank in which the insurance was effected; and this certificate, after being countersigned by a magistrate on proof of identity, shall be presented by the person insured when the State pension is demanded, at any post-office; (5) the production at any time of such a certificate shall entitle an applicant to receive any poor-law relief which may be necessary during any period of life in the form of out-door relief, if so desired. (6) That on the death of a certificate holder before drawing pension a sum not exceeding £5 be paid by the State to his or her nominee. (7) That no pensioner shall have the right to assign or alienate any portion of his or her pension of £13 a year. (8) That as the great object of the National Provident League is to prevent pauperism, it is most desirable that no part of the State Pension subventions should be chargeable to the poor rates; but the League recommend that the State contribution be divided between Imperial and local taxation. Several favourable resolutions and expressions of opinion have been received respecting this scheme, from bodies to whom circulars were addressed on the subject in July last. A few adverse resolutions to it have been received. That of the Guardians of St. George's-in-the-East Union, which represents one of the poorest districts in the Metropolis, is exceedingly important and weighty. Their opinion is that these new proposals would not cause the present pauper class to insure for old age, while the "bribe of doubling their contributions might cause the upper strata of the working classes, who at present as a rule maintain themselves in honourable independence, to become dependent on the general community; and as dependence on the State is only another word for pauperisation, these now independent classes—the very backbone of the nation—would become pauperised." Respecting the proposal to secure outdoor pauper relief as a right to all applicants who have completed their payments to the pension fund, the Board state that not only would this "be pauperisation indeed, but that it would discourage providence through

the friendly societies, as well as private charity by relatives and the benevolent, and it would cut at the root of parental and filial affection and responsibility. The Board cannot favour the argument that pauperisation would be abolished by making a class dependent on Imperial and local taxation rather than on the poor rates. The Board would define pauperisation as that which leads people to depend on State funds to provide for them, and not to provide for themselves. The Board believe that the only method of dispauperisation is by a wise and careful administration of the Poor Law, and by leaving to the working classes liberty to develop their own excellent provident associations."—What is called the **Chamberlain-Hunter Scheme** is voluntary in its application, and it is recommended that Scotland should first be subjected to it. It was notified in detail by Dr. Hunter, M.P., in a speech at Woodside, early in October. It is proposed that if any person saves by the time he or she is twenty-five £5, the State is to supplement it by contributing £15 for the purpose of enabling an insurer to receive a weekly pension of five shillings after attaining sixty-five. To this as a nest egg the subscriber would add by his subsequent payments whatever sum he could afford. For individuals now over the age of twenty-five special arrangements are to be made, so as to give corresponding aid towards pensions. The weekly or quarterly contributions which would follow would depend on the amount of the desired pension, and also on the point whether the insurer wished to have his subscriptions returned in the event of his death before reaching the pension age. It will not matter whether the workman pays his savings to the Government through a post-office or to a friendly society. By insuring with the Post Office it is said that he will not get benefit on so liberal a scale of interest, but he will get greater security. The Government contribution will, however, be the same in both cases. A man and his wife under this scheme may, if they avail themselves of it, secure 10s. per week. Owing to the grant for free education to England out of the Imperial taxes, a sum corresponding to the amount given to England for the relief of school fees is to be set aside for Scotland, where the schools are already free. About £20,000 is now held for Scotland until next session, and it remains to be determined how this sum is to be expended. According to the statement of Dr. Hunter, the Government is pledged to apply some portion of the money for higher education; but that sum can hardly exceed £70,000 a year, still leaving £200,000 per annum. It is proposed that this latter sum should be used towards the State contribution for old age pensions in Scotland, which is better than expending it in aiding local rates.—The **Church of England Life and Fire Assurance Institution** has announced a new plan of securing old age pensions for the working classes. It is proposed that parents shall be encouraged to pay, under the sanction of the managers of public elementary schools, and by means of the teachers, to an old age pension fund under a scheme formulated by the directors of the Institution. The pension is to commence at sixty-five, but if the pupil dies in the interim his representatives are to receive a certain sum down. The smallest contribution is fixed at 3d. per week and the highest at 6d. A person who has paid the smaller of these

two sums per week since the age of five will receive £11 4s. 11d. when he or she is sixty-five; if the payments commence between the ages of five and six the amount of the yearly pension will be £10 16s. 11d.; and so on in a descending scale, to the child who begins to be provident between twelve and thirteen years of age, when the amount payable to him or her at sixty-five will be £8 10s. 6d. per annum. For 6d. per week the maximum pension which can be granted under the same rates of payment is £22 9s. 10d., and the lowest is £17 1s. 10d. The **German Law of Insurance against Invalidity and Old Age**, enacted in '89, is a very important provision, and has engaged the attention of the civilised world. The persons liable to be insured under this law on completing sixteen years of age are mechanics, labourers, shop assistants, apprentices who earn wages, clerks, travellers, small manufacturers and tradesmen who employ few hands, sailors, and all the wage-earning and salaried class, male and female, whose total net income does not exceed £100 a year. Those who are exempted from the scheme are soldiers, and sailors belonging to the flagships, civil servants and all who are pensioned by Government, persons who are unable to earn more than one-third of the usual wages, those who are quite incapable of earning a living, those who are in receipt of pensions or charity, those who are already insured for an old age pension equivalent to that which the law provides, and all whose income exceeds £100 a year. Exemption can only be obtained by applying to and satisfying the requirements of an inferior court, with the right to appeal to a superior court. As the scope of this law is to secure to every labouring person or servant throughout the German Empire a sufficient yearly amount to relieve him from entire dependence on others in the event of confirmed invalidity, and on reaching the age of seventy providing he is not already receiving an allowance for invalidity; the scheme is expected to include about 12,000,000 persons. As regards contributions to this pension fund, those who are compelled to insure are divided into four classes, and their weekly payments are regulated by the wages they earn. Those in Class 1, whose total wages do not exceed £27 10s. per annum, will be obliged to pay 6s. 11d. per year for thirty years or 1½d. per week; those in Class 2, whose total wages are not more than £27 10s. per year, will pay 9s. 5d., or 2½d. per week; those in Class 3, whose wages do not exceed £42 10s., must pay 11. 3d. a year, or 3d. per week; and those in Class 4, whose wages are more than £42 10s. yearly, are to pay 14s. 1d. a year, or 3½d. per week. If the working expenses of the state of the funds require these contributions to be increased a trifle more, they may be increased accordingly. In all classes the master has to pay the same yearly amount as the man as long as he continues in his employment, and to deduct the amount due from the man from his weekly earnings, he being responsible to the local authority for the payment both of the man's and his own contribution. Payments are only made for forty-seven weeks in the year, five weeks being allowed for inability to pay from want of employment and other causes. To receive incapacity or invalid pay, a man must satisfy the authority that he is totally unable to work, or that he is so far incapacitated that he cannot earn more than one-sixth of the ordinary wages,

and he must have contributed for not less than five years. The highest annuity he would then receive would be £6 18s. 3d. in the first class; £5 14s. 7d. in the second; £11 16s. 10d. in the third; and £14 13s. 3d. in the fourth class. The annuity, however, might be much less than this, as the annual pension is regulated not only by the class to which he belongs, but by the amount of his contribution paid in. The local authority pays him £3 per annum, and the Imperial authority £2 10s.; what he receives in addition to this £5 10s. will depend upon the number of his and his employers' yearly contributions. Concerning old age pensions which begin at seventy; if a man and his employers have paid their contributions for thirty years, the former would then receive, if in Class 1, £5 6s. 5d. per annum or 2s. 0½d. weekly; if in Class 2, £6 14s. 7d. per annum, or 2s. 7d. weekly; if in Class 3, £8 2s. 9d. per annum, or 3s. 1½d. weekly; if in Class 4, £9 11s. per annum, or 3s. 8d. weekly. The pensions are paid monthly in advance by the local authority, and can neither be sold nor mortgaged. An excellent "History, Analysis, and Criticism of the German Law of Insurance against Invalidity and Old Age" has been very recently published. It is the reprint of a paper read before the Institute of Actuaries on April 27th last, by Mr. T. E. Young, B.A., one of the Vice-Presidents. It appears to be by far the best treatise of its kind published, and is particularly worthy of consideration, not only as regards the German system of insurance, but with reference to the proposed schemes for State pensions in the United Kingdom. Mr. Young states that the German scheme forms a coercive and deep interference with individual liberty, and a "serious restraint upon a free and original expansion of national life and character." Among other important objections to the scheme which this eminent actuary has adduced, the following are especially worthy of notice, viz., "The payment of a portion of the contributions by the employers will, I fully apprehend, from the teachings of economic history, involve a reduction in the nominal amount of wages, and consequently a further restriction of personal and social life. The employers will obviously seek to transfer a portion of their burden of enforced charges to the labourers' gains; hence reduced wages with higher prices; all acting in combined power against the workmen's impoverished condition. . . . Hence, with augmented taxation and a reduction of the means of life, we shall, I fear, find the prices of the labourers' essentials of life—to omit regard altogether of possible comforts—gradually increasing, so that we shall obtain the relation of advancing cost and diminishing means of purchase, involving, by restriction of the necessaries of livelihood, defective and inefficient work, and the disastrous enfeeblement of individual enterprise." After stating that there will probably be an extended emigration of the more vigorous and intelligent classes, as the consequence "of this financial and social pressure," he adds that such a result "must impair the financial resources required for the complete execution of the law, and must tend to leave a larger and larger number of dependent and inferior labourers appealing to its provisions, and to its reducing sources of supply. . . . A vital consideration in the examination of this subject is the fact that a widely organised scheme like the present is

practically final as regards any essential modification, except under the danger of radical social disturbance, and the serious discontent involved in any alleged breach of national contract, with its possibilities of disruption approaching to the dimensions of a revolution, and the shaking of the bases of a country's life." It was strongly pointed out, in the discussion of the German measure of invalidity and old age insurance by many members, that the intervention of the State subsidy was likely to attach a pauperising tendency to the Bill, and that the additional indirect taxation required would be mainly incident upon the poorer classes, so that the subsidy designed as a blessing might lastly be regarded by the people as a curse. The German law of insurance against invalidity and old age was only carried by a narrow and diffident majority, which acknowledged that it was a leap in the dark. So far from satisfying the working classes, they have loudly complained about it. The Secretary of Finance, Baron Maltzahn, has mentioned, as a reason for maintaining the corn duties, that Government is obliged to uphold this source of revenue, because the cost of this insurance was certain to continually rise. Political parties in this country now know that something now must be done for the poor of the United Kingdom to improve their condition, and it is expected that further pension schemes for their relief will soon be published. Mr. John Morley, M.P., in his speech at Stoneleigh Park, in August, said that he thought the man or the party who solved the question of preventing a man who has worked hard all his life, maintained his family, and has been a good citizen, from going in his old age into the workhouse, will deserve more glory than by winning battles on the field. There is no social subject which has so rapidly come to the front for discussion during the last twelve months as the question of State pensions. It is now regarded as the leading subject in the insurance world, and is likely to be treated as the principal social topic for legislation at the next general election. A great development of public opinion is looked for on this question within the next few months. The press is devoting much more attention to it, and but few days pass without some important instruction being notified.

Stationery Office (Princes St., Westminster) provides the public offices and Parliament with books, stationery, etc., and arranges for the greater part of the printing required by them. In Oct. '88 the Controller of the Stationery Office was appointed by Letters Patent, under the Great Seal, to exercise all rights and privileges in connection with copyright the property of H.M. Controller, T. D. Pigott, C.B. (£1500); Assistant Controller, J. S. Lewis (£635).

Stationery Office Publications. The vast number of papers issued to the public under the superintendence of Her Majesty's Stationery Office (*q.v.*) renders it impossible to enter much into detail; but they comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyage of H.M.S. *Challenger*, calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade, the Education, and Science and Art Departments, and the Local Government Board, Explosive and Factory Books and Forms, Survey publications, and numerous miscel-

laneous books. The following are a few of the most important books issued since our last edition: Vol. iii. of *State Trials* (1837-40), containing the speech at the opening of the Special Commission on the Bristol Riots which took place in '37, and also the full account of the trial of the mayor for neglect of duty on those occasions. The volume also contains many trials of interest. The complete set, it is anticipated, will occupy about eight or ten vols. No further volumes of the report on the scientific results of the voyage of the *Challenger* have been issued during the year. The Pliocene deposits of Britain, by Clement Reid; The Geology of Flint, Mold and Ruthin, of parts of North Lincolnshire and Hull, Yorkshire, and Yarmouth and Lowestoft; The History of the Sudan Campaign, in two parts, with a case of maps; A Text-book of Naval Architecture; Drawings of the Flags in use at the present time by various nations. Papers and books, of passing and permanent interest, from all departments, have been constantly appearing. The *Board of Trade Journal* (monthly) contains useful information for merchants and others, while the *Kew Bulletin* (monthly) ought to interest a large circle, containing as it does such valuable notes on *Economic Produce and Plants*. Of the *Chronicles and Memorials* we have The *Flores Historiarum*, vols. i. to iii., edited by Henry Richards Luard, D.D.; The *Memorials of St. Edmund's Abbey*; The *Chronicles of the Reigns of Stephen, Henry II., and Richard I.*; The *Register of the Abbey of St. Thomas*, Dublin, and others. In the *Record Series*, numerous foreign and domestic papers, and a Descriptive Catalogue to the Ancient Deeds preserved in Her Majesty's Public Record Office. The publishers are Messrs. Eyre & Spottiswoode, East Harding Street, London, E.C., Messrs. Menzies & Co., 12, Hanover Street, Edinburgh, and Messrs. Hodges, Figgis & Co., 104, Grafton Street, Dublin. The *Hydrographic Publications* are obtainable only from Mr. J. D. Potter, 31, Poultry. The *Geological and Ordnance Survey Maps* are published by Mr. E. Stanford, Charing Cross, London, S.W., Messrs. Menzies & Co., 12, Hanover Street, Edinburgh, and Messrs. Hodges, Figgis & Co., 104, Grafton Street, Dublin. *Patent Specifications* are only to be obtained at the Patent Sale Office, Cursitor Street, Chancery Lane, London, E.C.

Stead, William Thomas, is the son of Rev. W. Stead, Congregational minister, Howdon-on-Tyne, and was b. July 6th, 1849; married '73; ed. privately and at Silcoates; apprenticed '63 to commercial house at Newcastle Quay. Appointed editor of the *Northern Echo* '71; and assistant-editor '80 to Mr. John Morley (then editor of the *Pall Mall Gazette*); succeeded him as editor-in-chief '83; interviewed Gordon at Southampton (Jan. '84); wrote "The Truth about the Navy" (Oct. '84), "The Maiden Tribute of Modern Babylon" (July '85), "No Reduction no Rent," a record of a visit to Ireland in the autumn of '86, "The Langworthy Case" ('87), "Truth about Russia," written after a visit to that country in May and June '88, and "A Guide to the Paris Exhibition" ('89); went in October to Rome, to gather material for a series of "Letters from the Vatican," published in book form under the title of "The Pope and the New Era." Resigned the editorship of the *Pall Mall Gazette* on his foundation of the *Review of Reviews*, of which

he is the able editor. Founded a scholarship of the value of £100 per annum for three years at Newnham College, to encourage the study of present-day history and politics among women. Published a book dealing with the *Passion Play* at Oberammergau, at the last performance of which he was a spectator. Has during '91 delivered many public addresses dealing with a scheme for combined philanthropic action among various religious bodies.

Steel. See TRADE, '91.

Stephen, Sir James Fitzjames, Bart., K.C.S.I., son of the late Rt. Hon. Sir James Stephen, was b. 1829. Called to the bar ('54), Q.C. ('68). For about two years and a half ('71-2) he was legal member of the Council of the Governor-General of India, and by his codification of the criminal law of that country conferred lasting advantage upon its inhabitants. He was Prof. of Common Law to the Inns of Court '75-9. Appointed a judge '79. Mr. Justice S. is a high authority on criminal law. He is the author of "General View of the Criminal Law of England," "Digest of the Law of England," "Digest of the Criminal Law," and other legal works, as well as "Liberty, Equality, Fraternity," and "Essays by a Barrister." Resigned his judicial position (April 7th, '91) consequent on his ill-health. Received a baronetcy shortly afterwards.

Stephen, Leslie, was b. at Kensington 1832. Is a son of the late Sir James Stephen, and brother of the present Sir J. F. Stephen. Ed. at Eton, King's Coll., London, and Trinity Hall, Camb., where he graduated '54, and subsequently becoming Fellow and Tutor of that college. Mr. S. was for some time editor of the *Cornhill Magazine*, and in '83 accepted the *Clark Lectureship in English Literature at Cambridge*, but resigned it twelve months later. His best known books are "The Playground of Europe," "Essays on Freethinking and Plain Speaking," "History of English Thought in the 18th Century," "The Science of Ethics," and the several series of "Hours in a Library." He edited, with Mr. S. Lec, the "Dictionary of National Biography," now in course of publication, but in May '91 ill-health caused him to resign the editorship.

Stephenson, Rev. Dr. Thomas Bowman, D.D., LL.D., President of the Wesleyan-Methodist Conference, was b. 1839. He entered the ministry in '60, after education at Wesley Coll., Sheffield, and also at London University. In '70 he commenced his work on behalf of destitute children, and at present there are five country branches of the Home in Bonner Road, Victoria Park. Dr. S. was elected a member of the Legal Conference in '80. He occupied a seat on the School Board for London for some time. From Victoria University, Canada, he received the hon. degree of LL.D. Elected (July '91) to succeed Dr. Moulton in the presidency of the Wesleyan-Methodist Conference. Visited America (Oct.) on the occasion of the Ecumenical Conference.

Sterling, Madame Antoinette, eminent vocalist, was born in the State of New York. Her musical education was conducted by Abella, Marchesi, and Pauline Viardot. In London her training was continued by Manuel Garcia. Her debut in England took place in '73, at one of the Promenade Concerts, Covent Garden Theatre. Since that time Madame S. has become one of the most popular singers of ballads and Scotch songs, notably on account of her rendering of

"The Lost Chord" and "The Better Land." She married, in '75, Mr. John MacKinlay.

Stevenson, Robert Louis, was b. at Edinburgh, 1845, and ed. at the Univ. of that city, graduating M.A. He started a magazine while a student; but the venture was not a success, though some of his own contributions to it gave promise of the distinction he has now attained. One of Mr. Stevenson's earliest works was an account of his travels in California, but the book which established his reputation as a writer of the first rank was "Treasure Island." Amongst the most popular of his other works are "Dr. Jekyll and Mr. Hyde," dramatised and played at the Lyceum theatre in '88; "Familiar Studies," "Underwoods," "Virginitus Puerisque," "Story of the Rebellion of '45," the "Dynamiters" (written in conjunction with his wife), "An Inland Voyage," "Travels with a Donkey," "New Arabian Nights," "The Silverado Squatters," "Prince Otto," "The Blackamoor" ('89), and his numerous essays. He has also written a life of his father, the celebrated lighthouse engineer. His most recent works are "Edinburgh: Picturesque Notes," "The Master of Ballantrae," and "In the Wrong Box." Since '90 Mr. S. has been living at Samoa, where the climate seems especially suited to his delicate health.

Stirling, Sir James, was b. 1836. Ed. at Trinity College, Cambridge. Called to the bar '62, Junior Counsel to the Treasury '81, Member of the Bar Committee '83. Formerly he reported for the Incorporated Law Society. Is a Judge of the Chancery Division of the High Court of Justice.

Stock Exchange, Law as to, in '91. An important case with reference to what are known as "rogue-bonds" came before the Lord Chief Justice and a special jury (Q. B. Div., July 10th, '91). It appeared that Messrs. Sebag, Montefiore & Co., the defendants, bought a Spanish bond value £698, odd, for the plaintiffs, Messrs. Ruffer & Sons. The bond, however, had been stopped by the Spanish Courts. In other words, it was invalid, and it had also been posted up as invalid on the Stock Exchange. The plaintiffs refused to accept delivery, and a number of witnesses experienced in the transactions of the Stock Exchange gave evidence to the effect that the plaintiffs were bound to accept the bond, in spite of the fact that it was invalid. In short, it was argued that according to the rules of the Stock Exchange a broker may sell a bond which he knows, but which his client does not know, to be invalid, and the purchaser is bound to accept delivery. Among those who gave evidence as at the practice of the Stock Exchange was the Chairman of that institution. The Lord Chief Justice denounced the practice referred to as utterly dishonest, and as conflicting with the commonest rules of morality. In the result, the jury found a verdict in favour of the plaintiffs.—In *Salaman v. Warner* (Court of Appeal, April, '91). The defendant had been concerned in bringing out a company, and it was alleged that they had disseminated a belief that the bulk of the shares would be allotted to the public. It was further contended that by means of a misstatement to the Stock Exchange Committee they procured a settling day, a circumstance which in itself implied that the greater part of the shares were allotted to the public. The plaintiff, Mr. Salaman, became a "bear" of these shares, hoping that when the time came for delivery he would

be able to purchase them in the market at a lower rate than that at which he had sold them. When, however, the time came for him to deliver the shares which he had sold, he had to buy them at a price fixed by the defendants, who, as he alleged, by thus "rigging" the market, put him to a loss of £7,250, for which amount he claimed. It appeared, however, that the defendants had made no untrue statement to the plaintiff, and that his contracts were entered into before the alleged sharp practice had been committed. The Court of Appeal therefore dismissed the plaintiff's appeal on the ground that there was no privity between the parties.—A lady forwarded a cheque for £350 to a stockbroker as application money in respect of some shares which she wished to take in a company that was being formed. The stockbroker undertook to forward her application to the "right quarter," but sent it to the promoters of the company, and paid them the application money. Subsequently the lady desired to cancel her application, but she was unable to recover the £350. Hence she sued the stockbroker. It was not denied that the latter had acted *bond fide*, but it was held that this did not relieve him from his liability for the loss of the £350. *Leveson-Gower v. May*, Q. B. Div., July 22nd, '91. In *Thomson v. Mead* (Q. B. Div., July 22nd, '91) it was held that an outside broker who had received instructions to buy at a price, had no right to make the transaction his own and make a profit by buying, if he could, for less and charging the customer the full price.

Stock Exchange. Movements in '91. The year opened with a dull tone owing to the existence of a general feeling of uneasiness, partly due to the knowledge of the fact that although the Baring disaster had been averted, there was still the liquidation of the affairs of the old firm to be effected, and also to an idea that there existed an under-current of weakness on the Paris Bourse. Before the month of January was over the markets were further disturbed by the outbreak of the revolution in Chili; and this, together with rumours of further financial troubles in Buenos Ayres, affected the whole of the South American securities. Then followed the publication of the dividends on the several home railways, and these were in nearly every instance less than had been expected. The result of these several causes was that there was no disposition on the part of the public to enter into speculative transactions, and as a consequence, dealings on the Stock Exchange languished, and, so far as business is concerned, the year '91 was really worse than that of '90. Notwithstanding this, however, the number of failures amongst the members of the Stock Exchange was fewer than usual, nor was there a single one of any magnitude. The movements in silver created no interest, and the price was practically about 45½ all the year. From time to time there were periods of excitement, and the markets were exceptionally active during the latter part of August and the early part of September, but very soon business eased off again, and only in American railway shares, and then only to a limited extent, was there any sustained movement. **Foreign stocks.** In no single instance were prices in this department maintained, and this remark applied equally to European and South American stocks. Very early in the year it became apparent that the financial

position of Portugal was critical, but it was not until May that it was actually admitted that even the payment of the next coupon was doubtful, and the price of the 3 per cent. external loan, which in the middle of April stood at 56, fell by the middle of the following month to 44, and subsequently to 31½. **Spanish stock** was fairly well supported until October, chiefly by the Paris financial houses, but the accumulation of responsibilities in that centre necessitated about this time some withdrawal of the support, and the consequence was a smart fall, the loss since the beginning of the year being nearly 13 points. **Russian stocks** were in fairly good repute up till the month of April, when certain events rather frightened holders, and brought about a smart fall. This was, to some extent, recovered, but the prestige of Russian stock was broken; and it soon became apparent that the centre of Russian finance had been transferred from Berlin to Paris. This movement was, to some extent, due to the apparent *rap-prochement* between the Czar and the Republic, and the feeling thus engendered was made use of by the Berlin houses, which had bought largely when Russian stocks were depressed, to unload on Paris. About the middle of the year a fresh loan was talked about, but this was not actually issued until Oct. 7th, when subscriptions for £19,775,000 were invited at £78 17s. per bond of £98 17s. 6d. This was not taken up at all in Germany, and even in London the subscription was very small. By the help of a syndicate in Paris the whole amount was subscribed, but the new loan was quoted at a discount almost before the allotments were made. On Nov. 18th **Russian** 4 per cent. converted stock was dealt in at 86½. **Greek stocks** steadily dropped during the whole year, and being quoted at 90 for the 5 per cents. in January, were only 72 in November. **Italians** also suffered, but not to such an extent. In **Turkish**, the "A" stock was carried to 45 in February, on a report that a scheme of redemption was about to be carried out; but as nothing was done the price gradually receded, and by the end of October was hardly better than 40. **Argentine** bonds kept fairly steady until the middle of April, when it became apparent that it was impossible to carry out the obligations undertaken, and the gold premium having advanced to over 300, there was a general drop in the price of all the securities, which was afterwards only partially recovered. Although the revolution actually broke out in Chili in January, the price of the Foreign loan was hardly affected until nearly two months later, the lowest quotation being touched in July. Soon after this, it was apparent that the Congressional party must win, and even before the war was over the price recovered to nearly what it stood at before the outbreak. This recovery was not fully maintained. The actual fall, however, by the end of October, after eight months of civil war, was only 6 per cent. **Brazilian stocks.** On October 30th General Fonseca declared a military dictatorship, and the immediate result was a heavy fall in the prices of the different stocks, and on the announcement that several of the provinces had declared themselves independent, a further depreciation took place, the 1889 loan, on Nov. 14th, exactly one year after the revolution which deposed the Emperor Dom Pedro, being quoted at 50. A very heavy fall occurred in the **Argentine Provincial Loans**; Buenos Ayres 6 per cent.

falling from 70 to 27, the price afterwards recovering to 36 only. **Uruguay** stocks were a bad market during the whole year, and the price of unified steadily dropped from 50 to 37, these stocks forming a considerable portion of the lumber taken over by the Baring guarantee syndicate. A scheme of conversion was proposed by the Government by which the 5 per cent. and 6 per cent. bonds were to be exchanged for $\frac{3}{4}$ per cent. bonds. This scheme was accepted at a meeting of bondholders held in London, and although a strong opposition was raised, principally by the continental holders, the proposed arrangement was afterwards ratified by the Uruguayan congress.

Home Railways. There was a considerable and steady depreciation during the whole year, but at no time were there any very violent fluctuations. The year opened dull but hopeful, and it was only when the dividend announcement came to be made that a depression set in. The dividends were certainly disappointing, as only in a few instances were the figures of the previous year maintained, and this in spite of large increases in the gross receipts. The same thing happened when the results of the working of the first half of '91 were made known, the quotations at the latter end of the year, however, showing some recovery. That this was not due to bad trade is clear, from the fact that in every railway there was a large increase in traffic, but the percentage of working cost kept ahead of this, so that the extra cost was greater than the increased takings, and the following table will show what a very serious additional expenditure this increase involved.

Home Railways. Percentage of Working Cost to Gross Traffic Receipts.

	Second half year.		First half year.	
	1889.	1890.	1890.	1891.
Gt. Eastern . . .	52'48	54'39	55 72	58'08
" Northern . . .	56 07	56'05	60 00	60 83
" Western . . .	48'70	50'59	53'10	54'84
London and Brighton .	41'49	43'90	49'66	52'45
" Chatham . . .	48'41	50'02	50'35	56'64
Lon. & North Western .	52'62	54'36	53'14	55'46
" South Western . .	50'72	54'33	53'62	54'82

" District . . .	49'86	49'28	46 68	44'46
Sheffield . . .	48'84	50'77	54 74	55'14
Midland . . .	52'02	53'21	55'60	56 43
North Eastern . . .	52'52	58'21	55 31	57'22
South Eastern . . .	47'34	48'23	53'81	57'93
Caledonian . . .	46'46	51'70	49'09	52 56
North British . . .	43'94	49'53	45'25	49 79

This, however, is one item only, for co-incidence with it there was a considerable addition to the preference and preference share charges. Amongst the few railway stocks which improved in value was the Metropolitan, which rose from 78 to 88, and the Midland from 149 to 161 $\frac{1}{2}$, while on the other hand North Western stock dropped from 179 to 169, Great Western from 163 to 155, North Eastern from 168 to 155, Lancashire and Yorkshire from 117 to 108, Brighton A from 162 to 145, Dover A from 126 to 82, North British Deferred from 51 to 37, and

Caledonian from 120 to 112. These prices do not represent the worst in all cases, but there is no doubt that a further depreciation was only prevented by the existence of a bear account, and to the fact that during the whole year there was but a small amount of stock in the hands of the dealers. At the meeting of the shareholders of the Chatham Railway in Jan. a proposal was brought forward for re-arranging the stocks, by which the interest on the preference stocks was to be reduced from 4 $\frac{1}{2}$ to 4, and the total of the ordinary stock from £11,259,282 to £3,753,094. So many of the shareholders, however, objected to this that the scheme was withdrawn. The Bill brought forward by the Manchester and Sheffield Company to provide for an extension by which that system should effect an entrance into London, was thrown out by the Parliamentary committee in June, owing principally to the opposition of the Great Northern Railway. On May 1st occurred the accident to the Brighton express through the collapse of a bridge at Norwood. No lives were lost, but the accident was the means of bringing about a thorough overhaul of all the railway bridges in the country.

Canadian Pacific Railway. The growth of the receipts of this line during the year were extraordinary, and by the end of Sept. the gross takings showed an increase of \$2,149,000, the price of the shares rising from 74 to 94 at one time. The **Grand Trunk of Canada** was not equally fortunate, the receipts showing a considerable decrease. A very acrimonious discussion took place in the early part of the year between the chairmen of two companies, but later a reconciliation took place, and more friendly relations now exist. Mr. MacIntyre, from the Canadian Pacific board, joining the Trunk Board, and Sir Joseph Hickson, the general manager of the Trunk, retiring, his place being filled by the appointment of Mr. Sergeant. The **InterOceanic Railway of Mexico** was finally opened for through traffic in Oct., and on its announcing very low through freight rates, the (old) Mexican (Vera Cruz) made a reduction from 74s. to 30s. a ton. Traffic was bad for the second half of the year, and the prices of the different classes of stock fell considerably. **South American** rails were all depressed owing to the state of affairs in the Argentine, and only partially recovered. A very serious fall occurred in **Lombardo Venetian Railway** shares owing to a series of bad traffics, and the price steadily fell from 12 $\frac{1}{2}$ to 7 $\frac{1}{2}$. The only department of the Stock Exchange where there was any real and sustained business was in **American Railways**, where the prospects of an excellent harvest stimulated purchases as early as April; but it was not until about August that a "boom" set in, which carried up prices to the highest point touched since the collapse of 1881-2. In the beginning of August there was a fear that the Union Railway would have to go into the hands of a receiver, and the shares fell to 36, but after protracted negotiations a syndicate was formed to take over the floating debt, when the price again rose to 44. The highest quotation of the year was 53 $\frac{1}{2}$. There was no remarkable movement in Miscellaneous shares beyond the collapse of the two **American Meat Companies** shares. **Eastman's** were compelled to pass the July dividend on their preference shares, and the price of the ordinary, which at one time during the year stood at 12 $\frac{1}{2}$, fell to 3 $\frac{1}{2}$, and **Hammond's** fell from 6 to 1 $\frac{1}{2}$, from which figures there was

some little recovery. Electric Lighting shares were rather active, and one or two new companies were floated, notably the City of London, a *proleég* of the Brush Company. An active crusade was conducted by the temperance party at the licensing sessions, with the result that many licences were refused, and as these houses belonged mostly to the brewery companies, this class of shares has receded in price. American brewery shares were also depreciated. Owing to a severe drop in all classes of foreign stocks, principally, the shares of the various Trust Companies suffered severely, but later in the year there came a partial recovery. Tramways have been disturbed by the great increase in the price of fodder, and also by doubts as to whether the County Council would exercise their right of purchasing the roads on the expiry of the leases. The matter was discussed in the Council as early as June, and a motion brought forward authorising the purchase was lost by the abstention of members, but at the last meeting in October it was decided, by a very small majority, to exercise the right as to the London Street Tramway Company. The mining year was a most unsatisfactory one, especially as regards the South African group, for not only are prices lower, but there has been no business doing at any time, if we except a short spurt in August and September. Indian miners were fairly well supported, the

returns from the mines being good. Rio Tinto shares fluctuated between 23½ and 16½, and De Beers, in spite of a most optimistic speech from the chairman at the annual meeting, dropped from 17 to 12½.

Stock Exchange Terms. (For history of this, and official list, see ed. '87.) For the purposes of business the S. E. is regulated by a committee of thirty members, including the chairman and deputy chairman, called the "**Committee for General Purposes.**" This committee is appointed by a ballot of the members, and holds office for twelve months from the 25th March in each year. The S. E. contains upwards of 2,500 members, who are either **Jobbers** or **Brokers**. The former are dealers who buy and sell at the market prices, while the latter deal with the jobbers on behalf of the public, and are remunerated by commission for transacting the business. The S. E. recognises no transactions with any other parties than its own members, and all must be in accordance with the usages of the "house." The transactions are liquidated twice a month, the settlement extending over three days. The dates are fixed by the committee every month, some accounts being longer than others. In the case of Consols, however, it is different, the settlement in English government securities taking place but once, at the commencement of each month. **S. E. holidays**—January 1st; Easter Monday; May 1st; Whit Monday; the first Monday in August; November 1st; December 26th; unless specially ordered otherwise by the committee. —**Terms.** Scrip is an abbreviation of the term subscription, and is applied to the certificates of payment of deposits and calls prior to the issue of the definitive certificates or bonds. **Time Bargains** are transactions entered into by speculators who have no intention of either paying for the stock or shares they have bought, or delivering those they may have sold. If at the time appointed the stock they have bought stands above the price named the seller pays the difference. If below he receives it. A **Bull** buys with the view to a rise in price before a settlement at a future date. A **Bear** sells with the view of buying back at a future date at a lower price. **Contango** is a sum paid by the speculator for the rise, per share or per cent., for the privilege of deferring payment till the next settlement. **Backwardation** is a sum paid by the speculator for the fall, to postpone delivery of stock or shares till the following settlement. **Continuation rates** embrace both contango and backwardation. **Options** are transactions by which a speculator can limit his loss by paying a fixed sum when the bargain is made. They may be either a "put and call," a "put," or a "call." A put and call enables an operator to sell or purchase at a fixed price on a certain day. A put is a transaction by which a speculator has the option of selling stock at a fixed price at a future time, for which he pays an agreed rate. A call is a transaction by which stock can be claimed on a settled day for a certain consideration. **Carrying over** signifies the postponement of payment or delivery of stock or shares till the next settlement day. **Hammering** is the declaration of a defaulting member, which is announced by the "head waiter" striking three blows with a mallet. **Cornering** is an operation by which a scarcity of stock is created, thus producing a fictitious market and preventing a dealer from obtaining what he has previously sold except at greatly enhanced prices. For example, if A sells B a number of shares or stock for delivery on a certain day, and finds he is unable to deliver them, B can have the securities publicly bought

in by the secretary to the committee, or by the clerks of the "house." The sellers of such securities under the circumstances necessarily raise the prices severely against A, who has to pay the abnormally enhanced price. A is then said to be cornered. **Arbitrage** is an operation whereby identical securities are bought in one market and sold in another. **Long and Short** are American terms synonymous with **Bull and Bear**. **Spread** is also an American term for the option to either **Put** or **Call** stock. **Straddle** is the same option at one price whether stock is "put" or "called." Amongst the abbreviations used in the Stock Exchange the following are the principal:—**Brums**, a name given to London & North-Western Railway stock; **Berwick** stands for North-Eastern stock; **York "A,"** Great Northern "A" stock; **Dinabs**, Edinburgh and Glasgow; **Haddock's**, Great North of Scotland; **Saras**, Sheffield Deferred; **Potts**, North Staffordshire; **Caley**, Caledonian; **Claras**, Caledonians Def.; **Coras**, Caledonian Def. Ord.; **Bertha**, Brighton Def.; **Dover "A,"** or **Doras**, S.E. Rly. Def.; **Ayrshire**, ordinary stock of the Glasgow and S.W. Rly.; **Chinas**, Eastern Extension Telegraph shares; **Noras**, Great Northern Def. Ord. stock; **Knackers**, Harrison, Barber & Co.'s shares; **Vestas**, the Deferred stock of the Railway Investment Co.; **Virgins**, Virginia New Funded. —**Paris Bourse.** On the Paris Bourse there are sixty recognised official brokers (*Agents de Change*), known as the **Parquet**. There are also non-official dealers under the name of *Coulisse*; which include many high-class firms and arbitrage houses. The settlements are arranged each fortnight in Foreign Government and Miscellaneous Securities, and Monthly in Rentes, and occupy five or six days. The monthly liquidation really commences on the last day of each month, as **Options** are declared on that day. **Rente** "continued," 1st of month; **Other securities** "continued," on the 2nd; **Accounts** made up, 3rd; **Clients pay** brokers and deliver securities, 4th; **Brokers pay** clients, 5th, and **Brokers deliver** securities to clients, 6th. The fortnightly settlement commences on the 15th of the month and finishes on the 20th, and is conducted after the manner already described, omitting the Rente day. Consult Burdett's "Official Intelligence," '90.

Stocks, Lumb, R.A., was b. 1812. Has excelled in the art of line engraving, which he commenced in '33. The paintings of eminent artists—such as Stothard, Macleod, Callcott, Webster, Lander, Wilkie, Sir F. Leighton, W. P. Frith, T. Faed, and Sir Noel Paton—have attained additional fame through the skillful and artistic treatment in engravings by Mr. S. Was elected Associate Engraver of the Royal Academy '53, and became R.A. '73.

Stokes, Sir George Gabriel, Bart., M.P., LL.D., F.R.S., was b. 1819, at Skreen, co. Sligo. Ed. at Pemb. Coll., Camb., where he graduated B.A. (41) as senior wrangler, and was elected to a fellowship. App. Lucasian Professor of Mathematics (49). Awarded the Rumford medal by the Royal Society, in recognition of his services to the cause of science by his discovery of the change in the refrangibility of light (52). Sir G. S., who was chosen one of the secretaries to the Royal Society (54), was president of the British Association at Exeter (69), and President of the Royal Society (85-90), and is President of the Victoria Institute. He

has contributed to the *Transactions* of several learned societies, besides delivering professional lectures at Cambridge, and formerly delivered lectures at the Museum of Practical Geology in London. He was also Burnett Lecturer at Aberdeen ('83-5). Sir G. Stokes is Hon. LL.D. and D.Sc. Cambridge, D.C.L. Oxford, and LL.D. Edinburgh, Dublin and Aberdeen. He was elected M.P. for Cambridge University '87, in the place of Mr. Beresford-Hope, deceased. Created a baronet of the United Kingdom, '89. He has recently retired from the Committee on Solar Physics. Various short articles on religious topics have appeared from his pen. In '91 he published "Natural Theology," being the Gifford Lectures for the year.

Stone, Marcus, R.A., is the son of the late Frank Stone, A.R.A., and was b. in 1840. He has illustrated various books and magazines, and achieved his earliest success in '63 with his "From Waterloo to Paris," a picture representing Napoleon in a peasant's cottage. Several of his subsequent domestic pictures have been engraved, and one or two of them purchased by the Royal Academy under the Chantrey bequest. Mr. Stone, who has occasionally painted landscapes and water-colour pictures, was made A.R.A. '77, R.A. '87.

Stoughton, Rev. John, D.D., author and Nonconformist divine, was b. 1807. Ed. at Highbury Coll., and Univ. Coll., London. After holding successive churches at Windsor (32) and Kensington (43), he became (75) Prof. of Historical Theology in New Coll., London; D.D. Edinburgh ('69). Dr. S. is the author of numerous works, among which are the "Ecclesiastical History of England," "Ages of Christendom," "Progress of Divine Revelation," "Golden Legends," etc.

Stowe, Mrs. See FEECHER STOWE.

Straits Settlements. A British Crown colony in the Malay Peninsula. It derives its name from the straits which separate the Malay peninsula from Sumatra, and which form the great trade route between India and China. It consists of the island of Singapore, the town and province of Malacca, the territory and islands of the Dindings, the island of Penang, and Wellesley. The native states of Perak, Selangor, and Sungei Ujong, are controlled by the Colonial Government. The Cocos or Keeling Islands are a distant dependency. The whole area of the actual colony is about 1,472 sq. m., pop. 552,000. The capital of the colony and seat of government is Singapore.—**Singapore** is an island at the southern extremity of the Malay Peninsula, area 206 sq. m., pop. 139,208. It is hilly and forested, fertile, and not unhealthy for Europeans. Chief local products are pepper and gambier. The varied fauna includes tigers. The city of Singapore is a great commercial centre for the East. It has a commodious harbour, now being strongly fortified. It is the headquarters of H.M. military and naval forces in these regions. The usual garrison consists of a battalion of infantry and two batteries of artillery.—**Penang, or Prince of Wales' Island**, lies 360 miles north of Singapore, and about two miles off the coast of Province Wellesley. Its area is 107 sq. m., pop. 190,597. The port and capital is called **Georgetown**, a well-built city. The Governor of the colony appoints a Resident Councillor to control administration.—**Province Wellesley** is politically one with Penang. It stretches 45 miles along the coast of the main-

land. Area 500 sq. m., pop. 97,324.—**Malacca** is a town and territory 240 miles south of Penang. Its coast, rocky and barren, extends 42 miles. The area is 659 sq. m., pop. 93,579. The town is one of the oldest European settlements in the East, having been acquired by the Portuguese in 1511. The Dutch captured it from them in 1641. It was taken by England in 1795, afterwards restored, and in 1824 ceded by the Dutch in exchange for English settlements in Sumatra. It is ruled by a Resident Councillor, subject to the Governor of the colony.—**The Dindings** consist of the island of Puulo Pangkor and a small strip of territory on the mainland, about 80 miles south of Penang, and politically annexed, recently, to that settlement.—**Cocos Islands or Keeling Islands** are a small coral group lying some 700 miles south-west of Java. Area 9 sq. m., pop. 400. **Perak, Selangor, and Sungei Ujong**, the protected states, are practically dependencies of the colony. **Perak** has an area of 7049 sq. m., pop. 179,500; a revenue of \$2,530,708, and has liquidated all debts. Its port is Port Weld, and capital Kinta. **Selangor** has an area of 3000 sq. m., pop. 120,000, revenue \$1,505,652. Its capital is Kwala Lumpur. **Sungei Ujong** has an area of 660 sq. m., pop. 14,000, revenue £25,353. Other native states in the Peninsula are more or less under British influence.—**The Straits Settlements** form a Crown colony. The Governor is assisted by Executive and Legislative Councils. For financial statistics see **BRITISH EMPIRE**, etc. (table). The history of the colony has been similar to that of the Indian Empire. Penang was our first settlement (1795), Malacca finally ours in 1825, and Singapore in 1824. Gradual enlargement of British territory has followed, while the native states are passing into the same position as those of the Indian Empire. The colony is well ordered, extremely valuable, and its development proceeding rapidly.—'91. The Governor, Sir C. Clementi-Smith, opened the Council (Oct. 15th), and said that there was a deficit of \$850,000, and that the estimated deficit for next year was \$190,000. All the reserve balances had been realised to pay the military contribution. The Malay native States were improving.

Street Ambulance. See **HOSPITALS ASSOCIATION.**

Suez Canal. (For history of the Canal see previous eds.) According to the report of the British Consul at Port Said, received in the spring of '91, the increase in the number of vessels using the electric light is very striking. The new regulations came into force in March '87, and the numbers of vessels were as follows: 1887, 395; 1888, 1611; 1889, 2445; 1890, 2636, out of a total of 3389 vessels using the Canal. In '90 the average time of transit of vessels had been reduced to 24 h. 6 m.; the average time of vessels travelling at night with the electric light had fallen to 22 h. 9 m. The shortest passage by a steamer using the light was 14 h. 15 m., or 30 m. quicker than in '89. The thirty-seventh annual meeting of the Company was held at Paris on June 2nd, and the report stated that the receipts amounted to 70,460,910 fr., and total expenses to 32,327,526 fr.; 3,389 vessels used the Canal, an increase of 13.58 per cent., and of these 2,522 were British. The net dividend was 86 fr. 75 c., and it would have been 87 fr. 31 c. but for the increase of the French tax from 3 to 4 per cent. At a

meeting of the Council of the Company on July 7th Mr. Austin Lee, second secretary of embassy at Paris, was elected to succeed Mr. Standen, who retired, to represent Great Britain. (For some account of the new railway from Ismailia to Port Said see **EGYPTIAN RAILWAYS**.)

Suffragans. See **BISHOPS and DIOCESE**.

Sullivan, Sir Arthur Seymour, was b. in London, 1842. His father was a military bandmaster. As a choir-boy at the Chapel Royal he gained the "Mendelssohn Scholarship" at the Royal Academy of Music, in '56, and there completed his musical education. He went to Leipzig from '58 to '61. His music to Shakespeare's "*Tempest*" at once attracted public favour on his return in '62. Constantly writing cantatas ("Kenilworth," '64, etc.), oratorios ("Prodigal Son," '69; "Light of the World," '73), anthems, songs, etc., he yet remained without any specially extensive popularity, till he hit upon a vein of burlesque operetta, which he produced in conjunction with W. S. Gilbert, who wrote the librettos. The first of these was "Trial by Jury" ('75), followed by "The Sorcerer" ('77); "*H.M.S. Pinafore*" ('78), which ran for 700 consecutive nights, and had probably the greatest success in England and in the United States of any work of the kind. "*Pirates of Penzance*" ('80); "Patience" ('81); "Iolanthe" ('82); "Princess Ida" ('84); "*Mikado*" ('85), revived in '88; "*Buddigore*" ('87); and "The Yeomen of the Guard" ('88). For the Leeds Festival, in Oct. '86, he set to music an arrangement of Longfellow's "*Golden Legend*." Sir A. Sullivan received the honour of knighthood ('83), and the Legion of Honour ('78). He is a D.C.L. Oxon., and LL.D. Camb. "*Ivanhoe*," the music of which was composed by Sir Arthur Sullivan, was produced in Feb. '91 at Mr. D'Oyly Carte's new opera-house.

Sunday School Association was founded in 1834, and exists in connection with the Unitarian and Free Christian Churches. Its objects are the publication of suitable books for Sunday Schools, and the promotion generally of Sunday School Education. **Pres.**, Mr. F. Nettleford; **Hon. Secs.**, Rev. W. Copeland Bowie and Mr. J. M. Wade. **Office**, Essex Hall, Essex Street, W.C.

Sunday School Union. This Union was founded in 1803, and its objects are to stimulate and encourage Sunday-school teachers, at home and abroad, to greater exertions in the promotion of religious education; by mutual communication to improve the methods of instruction; to ascertain those situations where Sunday-schools are most needed, and promote their establishment; to supply the books and stationery suited for Sunday-schools at reduced prices. **President** for '91, Right Hon. Lord Herschell. **Chairman**, F. F. Belsey. **Secs.**, J. E. Tresidder, E. Towers, J. Edmunds, W. H. Millar, W. H. Groser, and C. Waters. **Treasurer**, Mr. S. Hope Morley. **Organ**, *Sunday School Chronicle*. **Editor**, B. Clarke.

Sunday Society. This was founded in '75, to promote the opening of museums, picture galleries, libraries, and gardens on Sundays for the moral and healthful enjoyment of those who during the other days of the week were unable to go to them. The society, whose president is Prof. G. J. Romanes, M.A., LL.D., F.R.S., has worked hard since its foundation, and at present the museums, art galleries,

libraries, and gardens are open every Sunday at Kew, Hampton Court, Greenwich, Dublin, Edinburgh, Battersea, Birmingham, Bradford, Chelsea, Fulham, Gateshead, Halifax, Hammer-smith, Kensington, Leicester, Manchester, Middlesborough, Newcastle-on-Tyne, Northampton, Norwich, Oldham, Oxford, Rochdale, Salford, St. Helens, Sheffield, Stockport, Wigan, Wolverhampton. **Offices:** Conduit Street. **Hon. Sec.**, Mark H. Judge.

Sungei Ujong. A Malay state under British protection. See **STRAITS SETTLEMENTS**.

Supply. The sums necessary to defray the charges for the Army, Navy, Civil Services, Customs, Post Office, etc., are voted annually by the House of Commons in Committee of Supply. The sums required are granted for the financial year ending on March 31st; and, although votes on account are sometimes granted early in the session for parts of the year, the whole sum voted during the session for any service is for the exact period of twelve months. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the Supplementary Estimates. **Votes of credit** for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the Army (Annual) Bill, which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and means of continuing it periodically in such strength as the House itself may deem to be necessary. A Commons committee which sat in '88 suggested that a standing committee should be appointed, to which, on the motion of the Government and by the vote of the House, certain classes of the estimates or certain votes might be referred, but no step has as yet been taken towards the adoption of this plan. For the Civil Service estimates for '91-92 see **FINANCE**, **NATIONAL**.

Supreme Court of Judicature. The Supreme Court was formed by the consolidation of all the superior courts of the kingdom of England, excepting only the House of Lords and the Judicial Committee of the Privy Council. It replaces (a) the Courts of Common Law, the Queen's Bench, Exchequer and Common Pleas, together with the Court of Appeal known as the Court of Exchequer Chamber; (b) the Court of Chancery and the Court of Appeal in Chancery; (c) the Court of Admiralty; (d) the Court of Probate and Court for Divorce and Matrimonial Causes, which replaced the old ecclesiastical courts dealing with similar matters; (e) the London Court of Bankruptcy; (f) the Court of Common Pleas at Lancaster and the Court of Pleas at Durham. The Supreme Court replaces all these by a single court of first instance known as Her Majesty's High Court of Justice, and a single court of appeal known as Her Majesty's Court of Appeal. The High Court of Justice, again, is organised in three divisions—(a) the Queen's Bench Division, in which have been merged the Courts of Queen's Bench, Exchequer, and

Common Pleas. It consists of the Lord Chief Justice of England, who is the president, and fifteen puisne judges; (b) the Chancery Division, under the presidency of the Lord Chancellor of England, and having five puisne judges; (c) the Probate, Divorce, and Admiralty Division, consisting of two judges, the senior acting as president, and the junior ranking as a puisne judge. All puisne judges appointed since the foundation of the Supreme Court bear the same title and receive the same salary. Her Majesty's Court of Appeal consists of the Lord Chancellor as president, the Lord Chief Justice, president of the Probate Division, and Master of the Rolls, who are members *ex officio*, and of five ordinary members, known as the Lords Justices. As the three dignitaries first named are usually engaged elsewhere, the working Court of Appeal commonly consists of the Master of the Rolls and the five Lords Justices. The distribution of business between the several divisions of the High Court rests on the general principle that any action may be brought in any one of them. But this rule is modified by law and practice as follows:—

(a) The criminal jurisdiction of the Court is exercised solely by the judges of the Queen's Bench Division. (b) Jurisdiction over causes of the following classes is exercised solely by judges of the Chancery Division: (i.) actions for the administration of the estates of deceased persons; (ii.) actions for the dissolution of partnerships; (iii.) actions for redemption or foreclosure of mortgages; (iv.) actions for the raising of portions or other charges upon land, or the sale of land subject to any charge; (v.) actions to enforce execution of trusts; (vi.) actions for the rectification, setting aside or cancelling of written instruments; (vii.) actions to enforce specific performance of contracts; (viii.) actions for the partition or sale of real estates; (ix.) actions concerning infants and their estates. (c) Jurisdiction over all such causes as would have come before the old Courts of Admiralty, Probate, and Divorce is exclusively exercised by the judges of the Probate Division. To the above general rule there are other exceptions of less importance. The procedure of the High Court has been formed by a process of selection and improvement out of the different forms of procedure observed by the old Courts which have been merged in it. The only differences of procedure now to be observed in the different divisions are such as have a practical value in the despatch of their different business. In all divisions every cause is as far as possible dealt with by a single judge, in whom are vested all the ordinary powers of the Court. The same forms of pleading are prescribed by the rules, although not adopted in practice by all the divisions alike. In all the divisions evidence is given by word of mouth or by affidavits, as may be most expedient. Trial by jury is becoming infrequent in all civil causes, although still most infrequent in the Chancery Division. The Court of Appeal is the same for all causes, and observes an absolutely uniform procedure, although for the more rapid despatch of business it is divided into two courts, each commonly consisting of three members. The procedure of the High Court and Court of Appeal is set out at large in the Rules of 1883. These, although irregular in form and incomplete in substance, constitute our nearest approach to a code of civil pro-

cedure. In the year preceding, the various branches of the Supreme Court were for the first time housed in a single building. See also JUDGES and SESSION, sects. 118 and 119.

Surrey House Museum, which is situated at Forest Hill, S.E., has been formed by Mr. F. Horniman at a cost of £100,000. It comprises about twenty-four rooms, and includes a Bible and MSS. room, an embroidery saloon, an Egyptian gallery, and an Oriental armoury. Mr. Horniman generously presented the Museum to the public on Dec. 24th, '90, and stated his intention to erect a hall with a library in connection with the Museum.

Sussex, County Council for. See COUNTY COUNCILS.

Swansea Water Scheme. On Oct. 21st, '91, the Swansea Corporation agreed to promote a Parliamentary Bill to carry out a new water scheme. The proposed source of the additional supply is the watershed of the river Usk, and it is estimated that it will yield 5½ million gallons a day. The cost is given at £230,000.

Swaziland. A small native state in South Africa, lying between the Transvaal, Zululand, and Amatonga. Area 9,000 sq. m.; pop. 50,000. It is a mountainous tract stretching along the Libombo range, with richly fertile valleys, and its mineral wealth is great; valuable fields of gold and coal being included in it. The Swazi are a section of the warlike Zulu race, and, during our campaign in the Transvaal against Sikukuni, and afterwards in Zululand, were our firm allies. At the conclusion of the war with the Transvaal Boers, their boundary was carefully delimited, and the independence of Swaziland agreed to. But with their customary contempt for treaties and disregard of native rights, the Boers ('85-6) largely encroached on Swaziland. Umbandine, king of the Swazi, has petitioned for British assistance, and the appointment of a British Resident as his adviser.—Boers threaten to absorb the country. Gold has been discovered. For substance of the Convention signed by President Kruger and presented to the Volksraad, as communicated to the Imperial Parliament Aug. 4th, '90. (See ed. '91.)

Sweden. A kingdom under Oscar II., of the house of Bernadotte, by charter of 1815 indissolubly united with the kingdom of Norway without prejudice to separate constitution, government, and the laws of either. If throne become vacant, the Diets of both kingdoms elect, and in default of agreement an equal number of Swede and Norse deputies make an absolute nomination. Affairs common to both kingdoms are administered by council of state, on which both nations are represented. Under the Swedish Constitution of 1809 the executive power is lodged in king, who also possesses legislative power in matters of political administration; in other respects such power is exercised jointly by the Diet, which, possesses a veto on all legislation, and the sole right of taxation. Diet consists of two chambers, the first of 139 members (elected by provinces and municipalities for nine years), the second of 216 members (1 to every 10,000 of population, elected directly for three years). The State religion is Lutheran; all others, except the Jesuits, are tolerated.—Sweden. Area, 170,979 sq. m.; estimated pop. in '87, 4,734,901; estimated revenue and expenditure ('92), £4,959,444; debt, £14,384,070; imports ('89), £20,949,428; exports, £16,762,505. The king has right of veto;

but if a law be thrice passed by three Storting things separately elected, his veto is overridden. The *Norae* Constitution of 1814 vests the legislative power in the Storting, which is elected indirectly, the people choosing delegates who elect the Storting. For business purposes it is divided into the Odelsting, composed of one-fourth of the members, and the Lagthing, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberate, and the measure must be passed by a two-third majority.—**Norway.** Area, 123,205 sq. m.; estimated pop. in '86, 1,954,000; estimated revenue and expenditure for year ending June '90, 45,070,000k.; debt ('88), 105,283,266k.; imports ('88) 158,396,700 k.; exports, 122,356,600 k. The timber export from Norway and Sweden in '90 was 940,000 tons, or 36,000 tons more than in the previous year.—'81. The Government declared itself willing (Jan. 9th) to purchase for 6,500,000 crowns the railway constructed on its territory by the Swedo-Norwegian Railway Company. The Ministry of M. Stang resigned (Feb. 23rd) because the Storting carried, in opposition to the Government, a resolution demanding greater independence for Norway in the foreign policy of the two kingdoms. A new Ministry was formed by M. Steen (Maroh) (see **NORWEGIAN POLITICAL PARTIES**). There was a procession of 4,000 and demonstration in favour of an eight-hours' day on May-day, but all passed off quietly. The German Emperor paid a visit to this country (July 26th). The third Congress of the International Association for the Consideration of all Questions relating to Crimes and Criminals was opened at Christiania (Aug. 27th). There was great distress (Nov.) amongst the working classes owing to the dearth of employment, and mass meetings were held, at which the immediate abolition of the taxes on articles of necessity was demanded. For army and navy see **FOREIGN ARMIES AND NAVIES**; and for Council, etc., see **DIPLOMATIC**. See also **NORWEGIAN POLITICAL PARTIES**.

Sweden and Copenhagen "Submarine Bridge." This is the title given to a novel proposal by a Swedish engineer (see *Engineer*, Sept. 20th, '82). It would be 2½ miles long, of 100-ft. spans, and would be submerged sufficiently to allow ships to pass over it. There would be a double tube with an outer skin of iron and inner one of steel, the space being filled with concrete, and would carry a single line of rails. The piers, 100 feet apart, would be ordinary caissons filled with concrete.

Sweden and Norway, King of. See **OSCAR II.**

Swedenborgians. See **NEW JERUSALEM CHURCH**.

Swimming. A large number of swimming clubs have been formed throughout the United Kingdom in the course of the last decade, and it is impossible to overestimate the value of these useful institutions; indeed, it is a singular fact that comparatively few of our sailors are adepts in that pastime which in the hour of danger and shipwreck should prove most valuable to them, and a knowledge of which would much lessen the distressing loss of life which annually marks the bathing season. Several important competitions were decided in '90, whilst a number of public exhibitions in the art of natation were also given by our most prominent swimmers. The **Amateur Swimming**

Association, which is the ruling body in this branch of sport, held various meetings in '90 with a view to defining more clearly the different districts, rearranging the championships, and making alterations in their laws. The Life Saving, Plunging and Ornamental Swimming Society was formed at a meeting held on Jan. 3rd, '91, at Anderson's Hotel, Fleet Street, at which over fifty delegates from various clubs attended. With the laudable desire of encouraging swimming amongst the teachers and pupils of metropolitan board schools, the Southern Counties A.S.A., early in January, approached the governing body of the Physical Education Department of the London School Board. Both parties being favourably impressed with the idea that much good may arise, arrangements were soon arrived at as to the best means to be employed to promote the good object in view. The S.C.A.S.A. undertake to instruct the teachers of the School Board, so as to make them competent to teach the scholars, and to render every assistance in their power. The amateur question was discussed at the annual meeting of the A.S.A., held in the library of the Reform Club, Liverpool, on April 4th, and eventually the following resolution was carried: "A swimmer ceases to be an amateur and becomes a professional by accepting remuneration, by way of expenses or otherwise (provided that swimmers competing in A.S.A. or district championships may accept from their clubs third-class railway fares to and from the town where the championship is held) for swimming in public, or by being employed for money or wages in a swimming bath or elsewhere as an attendant on swimmers." At the same meeting the various championships were allocated as follows: Salt water, long distance, 100 yards, and half-mile, to the South; mile, 500 yards, and water polo, to the North; 220 yards and plunging, to the Midlands. At the Blackfriars Street Bath, Salford, J. Nuttall, the famous Stalybridge swimmer, distinguished himself in a six lengths (156 yards) handicap for professionals. He started from scratch and won, his time being given as 1 min 46 secs., which is 2 secs. better than J. Haggerty's record for 150 yards. On June 2nd the **Ladies' Challenge Cup**, which has been in the possession of the Otter Swimming Club since '74, was up for competition for the sixty-eighth time. This trophy has to be won three times in succession, or six times in all, before being won outright, and the victory of G. H. Rope, the president, places his record at four wins, and there are two other members (C. J. Sachs and C. Newman) who equal him in this respect. In the sixty-ninth contest, on June 30th, H. Le Mesurier (the hon. secretary) proved successful, this being his second victory. The **Half-mile Championship** of England was decided on July 18th, at Tuf, about six miles from Exeter, with the following result: S. W. Greaseley, Leicester S.C. (mile amateur champion '90-1), 8; W. Evans, Manchester Swan S.C. (holder, and 100 yards, 220 yards, 500 yards, and salt water amateur champion), 2; G. A. Mead, captain Bristol Leander S.C., 3; P. Helson, Exeter S.C., 4; and G. R. Newcombe, Exeter S.C., 5. Winner's time, 13 min. 42½ sec. The fifteenth race for the **Long-distance Amateur Championship** of the Thames was decided between Kew Railway Bridge and the Steamboat Pier at Putney on July 25th, when the first three were: A.

Ibbott, Dreadnought S.C., time 1 h. 12 min. 27 sec.; 1; A. G. France (long-distance champion and winner of the cup in '86-7-8, Neptune S.C., time 1 h. 13 min. 25 sec.; 2) and J. F. W. Smart, Dreadnought S.C., time 1 h. 13 min. 30 sec.; 3. The **Quarter-mile Salt Water Amateur Championship** was decided at Portsmouth on Aug. 3rd, when W. Evans, Manchester Swan S.C. (holder, and 100 yards, 220 yards, and 500 yards amateur champion), came in first; W. J. Stratton, captain Zephyr S.C., being second, W. Brickett, captain Unity S.C., third, and W. Dale, captain South-east London S.C., fourth. Winner's time, 7 min. 15 sec. At Leicester Baths, on Aug. 13th, S. W. Greaseley swam a mile in 29 min. 3½ sec., thus beating Horace Davenport's record of 29 min. 25½ sec., made in '77, by 22 sec. Two days later, at the Welsh Harp lake, Hendon, H. R. Taylor won the **half-mile race** for the captaincy of the Professional Swimming Association, this being the first contest which had taken place since the reorganisation of the body, but which in earlier days had attracted the best and fastest of professionals. Taylor's time was 18 min. 9 sec. On Sept. 1st the Cleopatra floating bath on the Embankment was opened to the public. On Sept. 9th W. C. Johnson, of the Manhattan Athletic Club, and amateur swimming champion of the United States and Canada, arrived in this country; but his subsequent displays showed that he was no match for our best swimmers. On Sept. 22nd Evans, of Manchester, won the **220 Yards Championship** at the Leicester Baths, his time being 2 min. 52 sec. On Oct. 2nd, at the Crown Baths, Kennington Oval, the Nautilus Club beat Hanley in the semi-final for the water-polo championship of England; but four days later they were in turn beaten by Burton-out-Trent in the final by three goals to two. The latter have now won the championship on three occasions during the last four years. On Oct. 8th Evans, of Manchester, won the **500 Yards North of England Amateur Championship**, and two days later won the final of the **100 Yards Championship**, at the St. George's Baths, London, after a splendid race with A. W. Burghard, of the Nautilus Club, the winner's time being 1 min. 8½ sec. At the same baths, later in the evening, the Oxford Gardens School defeated Nunhead School in the final of the **Public Elementary Schools of London Championship**; and the Nautilus representatives beat those of the Amateur Swimming Club for a water-polo challenge cup. On Oct. 16th, at the Crown Baths, Kennington Oval, Oxford beat Cambridge in their annual water-polo contest by four goals to one; and on the following day Scotland beat England in the international water-polo match by two goals to love. Immense interest was evinced in this contest, which took place at Glasgow, and the teams were: **Scotland**—D. Graham (South side S.C., Glasgow), goal; E. G. Thomson (Pollokshields A.F.C.), and C. L. Tulloch (Pollokshields A.F.C.), backs; James Russell (captain, Victoria F.C., Glasgow), half-back; A. M. Cawood (Victoria Baths F.C., Glasgow), John Strachan (Belmont S.C., Dundee), and Neil Haldane (Pollokshields F.C., Glasgow), forwards. **England**—G. A. Haarnack (Amateur S.C., London), goal; H. Lake and J. E. Cragg (Amateur S.C., London), backs; G. Hunt (Mayfield S.C., Manchester), half-back; S. Pointon (captain, Hanley S.C.), T. P. Barrett (Hanley S.C.), and A. W. Burghard (Nautilus S.C., London), forwards.

On Oct. 22nd, at Lambeth Baths, J. Nuttall beat his own record of 2 min. 2 sec. for 160 yards, accomplishing the distance in 1 min. 55½ sec. Since the successful performance of the feat by the late Matthew Webb, swimming the Straits of Dover has been the aspiration of every long-distance swimmer; and on Aug. 18th, '90, Davis Dalton, the famous American back swimmer, is credited with having swam from Boulogne to Folkestone. (Sec. ed. '90.) It was arranged that another attempt to swim the Channel should be made on Sept. 21st, '81, by Dalton, Fisher, Albert and Downes; but owing to the stormy weather, low temperature of the water, and other causes, the project was abandoned. Fisher and Dalton had previously failed in attempts to swim from Dover to Ramsgate, though both got to within a few miles of their journey's end. On Sept. 16th Mr. R. Topping, well known in racing circles, swam for six hours in the sea at Brighton, the feat being undertaken for a wager of £1500 laid by another sportsman to £200.

Swinburne, Algernon Charles, son of Admiral Swinburne, was b. in London 1837. Ed. at Balliol Coll., Oxford ('57). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond" ('67). These were followed by two tragedies, "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism. His later works are "A Song of Italy," "William Blake, a critical essay"; "Songs before Sunrise" ('71), in which he glorifies "Panthelism and Republicanism"; "Studies in Song" ('81); "A Century of Rondels" ('83); "Life of Victor Hugo" ('86). During the year '88 he published a poem on "The Armada." "A Study of Ben Jonson" appeared in '90.

Switzerland. A republic composed formerly of several independent allied states, but since 1848 a united confederacy. Area 15,892 sq. m. Population (Dec. 1st, '88), 2,914,057. The constitution of 1874 vests supreme legislative and executive authority in two chambers—viz. (1) a State Council of 44 members, chosen two for each canton for three years by the twenty-two cantons of the Confederation; and (2) a National Council of 145 delegates of the Swiss people, chosen also for three years, directly, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a Federal Council of seven members, elected for three years by the Assembly, the president and vice-president of which are the first magistrates of the republic. Education is free and compulsory. **Budget**, '90: revenue, 72,532,300 fr.; expenditure, 85,543,700 fr. (fr.— $\frac{1}{2}d.$). **Public debt** of the republic, £1,466,824; property of the republic, £2,209,000. The various cantons have their own budgets of revenue and expenditure, and their own debts, the latter always covered by cantonal property, chiefly in land. The **aggregate cantonal debts** amount to about £12,000,000. **Special imports** in '89, £38,169,145; **special exports**, £28,435,794. The chief imports are: Food of all kinds, including wines and spirits, £9,233,571; silk, £6,575,116; precious metals, £3,498,830; cotton, £3,111,392; wool, £2,479,483; cattle, £1,896,183; minerals (excluding metals), £1,714,442; iron, £1,420,636; chemicals, £1,249,897; clothing, £1,095,882. The chief exports are: Silk goods, £8,589,730; cotton goods, £6,218,543;

watches, clocks and their component parts, £3,949,728; articles of food, including wine and spirits, £2,874,556; precious metals, £1,162,536. No standing army permitted by law, but all citizens are liable to serve, and in turn undergo annual military training. The State maintains a highly trained staff and colleges, and in addition military training forms part of the curriculum of every school. The reputation of the Swiss as a warlike nation is deservedly high, and the scientific eminence of the officers is well known. It is estimated that in case of war the Confederation could put 250,000 men in the field (see FOREIGN ARMIES; and for Council see DIPLOMATIC).—**History.** The Federal Assembly met (Dec. 1st, '90), when Herr Kellersberger was elected President, and Herr Goeltzheim Vice-President, of the Council of State. At Berne (3rd) the body of a young peasant girl was found, dreadfully mutilated. The States Council passed the Budget for '91 (5th), which gives receipts 65,638,000 fr., and expenditure, 78,069,000 fr. The Swiss National Council adopted the following law as to extradition: Extradition will not be granted for political crimes and misdemeanors. It will, however, be granted—although the person accused pleads a political motive or purpose—if the action for which extradition is demanded has pre-eminently the character of a common crime or misdemeanour. The Federal Tribunal will decide in every case as to the nature of the punishable action on the ground of the facts of the case. When extradition is granted, the Federal Council will make it a condition that the person to be handed over shall neither be prosecuted nor punished on account of a political crime, nor be punished more severely on account of his political motive or purpose. The Federal Council (16th) ordered the expulsion of six Anarchists. Two other Anarchists were expelled (2nd). Mme. Fleuviot left her collection of paintings to M. Revillon, who died five days after her, leaving the pictures as a gift to Geneva. '91. The authorities gave orders for the arrest of all the delegates who attended the Socialist Congress at Capolago (Jan. 7th), the Federal Council having already issued warrants of expulsion against them. The haven of Geneva was frozen over (11th) for the first time since '30. The elections for the Assembly which is to revise the Cantonal Constitution of Ticino passed off quietly (12th). By an avalanche at Ruetti (Feb. 5th) twenty-two men were killed. The official resignation by Cardinal Mermillod, of the See of Lausanne and Geneva, was received (18th). The revised Constitution for Ticino was approved by popular vote (March 8th). The new University at Lausanne was opened (May 18th). The Military Administration reported (18th) that the active army on Jan. 1st numbered 127,937, the Landwehr 80,272, and the Landsturma 272,124 men. The National Council and the State Council were opened (June 1st). At Moenchenstein, near Bale, an excursion train was crossing the river (14th), when the bridge collapsed; 47 persons were killed and 200 injured. The fête in the village was at once stopped. The bridge was on the direct line from London to Bale, and was newly built. The trial of the twenty-one persons implicated in the Ticino revolt began (29th) at Zurich. The mountain railway between Viège and Zermatt was inaugurated (July 6th). The popular vote as to the people's right to take the initiative in demanding the

revision of certain provisions of the Federal Constitution was 169,142 for, and 117,338 against. The trial of the Ticino prisoners concluded (14th), the jury finding them not guilty. M. Castioni, who killed State Councillor Rossi in the Ticino revolt, did not appear before the court, and was condemned in default to eight years' hard labour, twelve years' deprivation of civil rights, and to pay the costs, 2663 fr. The celebration of the six hundredth anniversary of the foundation of the Swiss Confederation was commenced at Lucerne (Aug. 1st). The International Geographical Congress was opened at Berne (10th), under the presidency of Dr. Gobat. The seventh centenary of the foundation of Berne was celebrated (13th). The morning express from Calais to Berne ran into a special excursion train between Münchenbuchsee and Zollikofen (17th); 14 people were killed and many injured. A fast train from Geneva ran into an empty train, which was being shunted at Zurich (30th); several persons were injured. A Fisheries Exhibition was opened at Bale (Sept. 4th). The Ticino Cantonal Government unanimously adopted (7th) the proposal to urge the Federal Government to grant an amnesty to the accused in the forthcoming second trial in connection with the revolt in '90. The Italian Anarchist, Schischi, was expelled from Geneva (11th). The Appeal Division rejected the appeal of the civil sufferers from the acts of the Ticino revolutionists (17th). The second International Congress on Accidents to Workmen was opened at Berne (21st), under the presidency of M. Linder, Inspector-General of Mines. The *plébiscite* to decide on the subject of the new Customs proposals resulted in the adoption of the new tariffs by 211,781 votes against 146,820. The proposal for a State Bank Note monopoly, which was also submitted to the popular vote, was likewise accepted by 223,853 votes against 143,989, and by 14 Cantonal votes against 8. The town of Meiningen, in the Canton of Berne, was totally destroyed by fire (24th), except the Wilder Mann and the Victoria hotels. The Federal Budget for '92 showed a deficit of 13 millions, caused by the increased military expenditure. The foreign trade in '90 amounted to £40,065,026 for imports, and £20,002,912 for exports. The chief Swiss imports from Great Britain were, cotton goods, £762,428; woollens, £444,495; ironware, £141,706; and the main exports to Great Britain were silk goods, £1,722,433; cotton goods, £899,622; watches, £661,124; and condensed milk, £450,265.

Sydney. Capital of New South Wales (g.v.). **Symonds, John Addington**, was b. at Bristol, Oct. 5th, 1840. Ed. at Harrow and Balliol Coll., Oxon. Fellow of Magdalen '62. Wrote many articles for the *Saturday Review*. He has published many works, amongst them being "Introduction to the Study of Dante," "Shelley" the article on "Italian History" for the *Encyclopædia Britannica*, a translation of the "Sonnets of Michael Angelo and Campanella," and "In Nights and Days," '80. Owing to delicate health, Mr. S. has resided for some time out of England, only paying flying visits occasionally to his native land. From his home in Davos various letters have occasionally been published. Published in '90 "Essays, Speculative and Suggestive." During '91 he was said to be engaged on a "Life of Dante."

T

Taafe, Count Edward Francis Joseph, in the Austrian peerage, and Viscount Taafe of Corren, and Baron of Ballymote, Sligo, in the Irish peerage, was b. at Prague Feb. 24th, 1833. He was brought up in companionship with the present Emperor Francis Joseph. The Count is a descendant of that powerful nobleman of the same name who proceeded from Ireland, and made a great name in the Germanic Empire. Appointed Governor of Salzburg in '63. In '67 he became Austrian Minister of the Interior and Vice-President of the Cisleithan Ministry. At the latter end of '69 he served as Minister President. In '71 he accepted the office of Governor of the Tyrol and Vorarlberg. In '80 he was summoned to form a new cabinet, over which he still presides. During '91 his health was very unsettled.

Talmage, Rev. T. De Witt, D.D., was b. 1832. Ed. at New York Univ., graduating with distinction. He entered the legal profession, but, after a short period, prepared for the ministry at the New Brunswick Theological Seminary. His first pastorate was at Belleville, N.J.; he afterwards removed to Philadelphia, where his rising fame induced the church at Brooklyn Tabernacle to make strenuous efforts to obtain his services as their minister, and he preached his first sermon there in March '69. The great success which attended Dr. Talmage's preaching necessitated the enlargement of the Tabernacle in '71, but it was burned a year later. However, a still larger and finer structure was soon built, but this was also burnt down '89. A new church is to be built, at a cost of £42,000. Dr. Talmage visited England Nov. '89, and afterwards made a tour in Palestine and on the Continent.

Tampico (Mexico) Harbour Works. This port, once the most important in the country, has been much injured in its development by the formation of a bar, about half a mile in length, owing to the quantity of detritus brought down in the current of the rapid river Panuco. The scheme now in progress is to direct the stream by means of two jetties placed 1000 ft. apart and extending out about 1½ miles, and up to the end of August '91 more than half the foundations had been put in. A trestle gangway is constructed in advance of the jetty as it proceeds, and the bottom courses up to water level are composed of mattresses, 60 ft. square and 4 ft. thick, made of brushwood fascines which are covered with layers of rock, the size of the mattresses diminishing as the wall rises. When the work is completed it is expected there will be 35 ft. draught of water at sheltered quays, and that Tampico will become the best and safest port in the Gulf of Mexico, sixteen days from Liverpool. The town has 7000 inhabitants, is connected by railway with the centre of the country, and large quantities of produce are brought down the river, which for several miles at the lower end is nearly a quarter of a mile wide, and is 35 ft. deep.

Tasmania. An island south of Australia, separated from it by Bass Strait, 120 miles across. Formerly called *Van Diemen's Land*. Extends 170 miles north to south, and 160 miles west to east, containing 26,215 sq. m., with a population of 151,480. Capital, Hobart, pop.

34,419, in the south. Second city, Launceston. Other towns Georgetown, Longford, New Norfolk, Mount Bischoff, Lefroy, and Beaconsfield. Tasmania is divided into eighteen counties, within which are electoral districts, parishes, and municipalities. Ruled by a Governor and responsible Ministry. Two elective Houses of Parliament, Legislative Council of 18 members, House of Assembly of 36. Colony represented in the Federal Council of Australasia. (For Ministry, etc., see DIPLOMATIC.)—**History.** The revenue for '90 was £753,000, being £17,000 above the estimate.—'91. The Federal Council met at Hobart (Jan. 20th) and elected Sir Samuel Griffith president. The estimates for '92 were: Revenue, £910,000; expenditure, £875,000. The Bank of Van Diemen's Land suspended payment (Aug.). It was announced that the Bank of Van Diemen's Land and the National Bank of Tasmania would be amalgamated (Oct. 2nd), but the project fell through (9th).

Taxes, Regulation of Remuneration Act, '91. See Session, sect. 120.

Teachers' Guild, The. was established as a registered society in 1885. The members of the Guild now (Oct. '91) number about 4600, of whom about 2100 are in the Central Guild and the rest in the twenty-six local branches. The work upon which the Council are at present especially engaged is the attempt to raise teaching to the rank of a learned profession through registration. **Chairman**, Rev. T. D. Morse, LL.D. **Sec.**, H. B. Garrod, M.A.; **Registrar of Women Teachers**, Miss L. Brough; **Assistant-Registrar and Manager of Information Bureau**, Miss M. Booth Scott; **Offices**, 74, Gower St., W.C.

Teachers' Registration and Organisation Bill. See Session, sect. 121.

Technical Education. The bringing forward of the question of Technical Education owes its impulse to the establishment of the *Artisans' Institute* in 1874, under the influence of the late Mr. Samuel Morley, M.P., Lord Lyttelton, Rev. H. Solly (q.v.), and others. In '78 many of its teachers were taken over by the City and Guilds of London Institute. To the patronage of the Livery Companies of London, much of the subsequent progress of the movement may fairly be attributed. I. **A Central Institution**, at S. Kensington, was opened in '84, having been built and fitted up at a cost of £100,000. Here the students, after instruction, are qualified to become technical teachers, mechanical, civil, and electrical engineers; principals, superintendents and managers of chemical and other manufacturing works. II. **The City and Guilds Technical College**, Finsbury, is of a lower grade than the preceding, and prepares persons of both sexes for intermediate posts in factories. It consists of a day school and an evening school. III. **The South London School of Technical Art**, Kennington Park Road, numbers over 150 students. The subjects taught are modelling, design, wood engraving, china painting, life classes (drawing and painting), and house decoration. IV. **The Technological Classes** in different towns connected with the Institute are nearly 500, with upwards of 12,000 students. These students, on passing the

technological examinations, are granted prizes and certificates, which are regarded as diplomas of proficiency. These examinations led to the formation of technical classes at the **Polytechnic**, Regent Street, and at the **People's Palace** (q.v.), in the East End. The Institute has also promoted instruction in the use of **wood working** tools amongst the boys of the **London Board Schools**, and already many boys are having lessons once a week at the bench. Under the new code the cost of providing manual instruction may be defrayed out of the ordinary School Board rate; and the system is consequently likely to be greatly extended. On Oct. 9th, '88, the *Times* published a letter in which the secretary of the **Goldsmiths' Company** announced the gift from that Company of the **Royal Naval School at New Cross**, with seven acres of land and £85,000, to advance the cause of Technical Education in South London. Previous to this the **Charity Commissioners** had offered £150,000 for the same cause, on condition that another £150,000 was raised from other sources. With the £300,000 it is intended to start and endow several institutions, where practical and industrial training will be

combined with social and recreative facilities. The **Technical Instruction Act** became law in '89. It was announced in July '91 that the corporation of Liverpool propose to devote part of the Imperial Grant for technical education to a nautical college, where navigation and practical engineering should be taught. See **EDUCATION, MANUAL TRAINING, and CONTINUATION SCHOOLS.**

Tehuantepec Ship Railway. News came from the United States, in July '91, that this project was being revived. Mr. Simon Stevens, late president of the company, was said to be preparing a treaty by which the United States and Mexican Governments would jointly guarantee the issue of 100 million dollars of 2 per cent. 100-year bonds for the completion of a ship railway and canal proposed in the plans. In October it was reported that the Government were making inquiries into the condition of the works so far executed in connection with the Tehuantepec Railway, a contract having been entered into some time ago by the late Colonel McMurdo. It was the Government's intention to complete the line as expeditiously as possible.

The words "Express paid Jask" must be inserted in the address and paid for. *f* Telegrams for any place in Bolivia can be forwarded only at the sender's risk. *g* On telegrams posted from an office in China to any place in the country a fee of 5s. for postage is charged to the sender. *h* Telegrams for any place in Colombia, except Colon, Panama, and Buenaventura, for any place in Costa Rica, in Ecuador, except Guayaquil and St. Elena, in Guatemala or Independent Honduras, can be forwarded only at sender's risk. *i* Telegrams for Hedjaz must be written in plain language. *k* On telegrams posted from a telegraph office in Japan to any place in the country a fee of 1s. 6d. for postage is charged to the sender. *l* Telegrams in code or cypher cannot be accepted for Massowah and Onquih. *m* Telegrams for any place in Mexico, except Coatzacoalco, Jaltepan, Mexico City, Reyes, Salina Cruz, San Geronimo, Tampico, Vera Cruz, and Zarabia, can be forwarded only at sender's risk. *n* Telegrams for all places in Persia, except Teheran, Ispahan, Bushire, Shiraz, Tabriz (Tauris), Kirmanshah, and Salmas, must be written in French, and in plain language. *o* Telegrams for any place in Peru, except Callao, Mollendo, Lima, and Payta, can only be forwarded at the sender's risk. *p* For the rates to Washington City see "Columbia District." *q* Telegrams for any place in Venezuela, except Caracas and La Guayra; and code and cypher telegrams for any place in Cuba are accepted only at the sender's risk. *r* Telegrams for publication in newspapers may be sent at a reduced charge, under special conditions, to North America, the Australasian Colonies, India, Burmah, Ceylon, Penang, Singapore, Egypt, the Transvaal, Natal, Orange Free State, and Cape Colony. The terms and conditions may be ascertained on application to the Cable Companies in London, with whom the arrangements for the acceptance of such telegrams must be made.

Temperance Movement, Juvenile. Among the young, temperance work is carried on mainly through bands of hope and similar societies in the various denominations. A careful estimate of the strength of the juvenile movement throughout the United Kingdom, including members of the Band of Hope Union, and making ample deductions for double membership, gives the number of juvenile temperance societies as 17,449, with a membership of 2,112,079. A remarkable effort for the promulgation of temperance principles among the young was made on Saturday, Oct. 17th, through the organisation of the United Kingdom Band of Hope Union, when more than a million homes were visited by voluntary workers, who made an appeal to parents, urging upon them the importance of allowing

their children to become members of a band of hope. The number of forms for the use of visitors exceeded 32,000, and it was found necessary to print 1,250,000 of the appeals with which they were furnished. A second visitation was to be made in a month's time, to enrol the children influenced in this way; and a special appeal, through Sunday-school teachers, was to follow at Christmas, the first Sunday in the New Year being devoted to temperance advocacy. The Church of England Temperance Society joined in the movement through its diocesan organisation, the Bishop of London issuing an appeal, while Cardinal Manning caused a pastoral letter to be read to all the Catholic congregations within his diocese.

Temperance Organisations. British Temperance League, which was founded in 1835: annual income, £2,000; organ, *Advocate*; offices, 29, Union Street, Sheffield. United Kingdom Alliance, formed in 1853: annual income, £12,000; organ, *Alliance News* (Ed. Mr. H. S. Sutton); Pres., Sir Wilfrid Lawson, M.P.; offices, 16, Deansgate, Manchester, and 15, Great George Street, Westminster. National Temperance League, formed 1856, of National Temperance Society, started 1842, and London Temperance League. income, with National Temperance Tract Depot, £11,230; organ, *Record*; offices, 33, Paternoster Row, E.C. United Kingdom Band of Hope Union, 1855, has affiliated, with its county, district, or town Unions, 10,387 societies, having 1,402,265 members: income, £6,683; organ, *Chronicle*; offices, 4, Ludgate Hill, London, E.C. Midland Temperance League, 1857: income, £300; offices, Temperance Institute, Corporation Street, Birmingham; North of England Temperance League, 1858; offices, 33, Pilgrim Street, Newcastle-on-Tyne. Western Temperance League: income, £1,700; organ, *Herald*; offices, Redlands, Bristol. Independent Order of Rechabites, Sons of Temperance, and two Sons of Phoenix Orders are temperance sick benefit societies. The first, established 1835, has 120,000 members; capital, £456,000; organ, *Rechabite and Temp. Mag.*; offices, Lancaster Ave., Fennel St., Manchester. Members of the Sons number 50,000; capital, £62,660; organ, *Son of Temperance*; offices, 29, Pitt Terrace, Miles Platting, Good Templary (q.v.) Sunday Closing Association, 1866: income, £3,000; organ, *Reporter*; offices, 14, Brown St., Manchester. British Women's Temperance Association; Pres., Lady Henry Somerset; Sec., Miss M. Holland; offices, 25 and 26, Memorial Hall, Farringdon Street, London, E.C. In Scotland—in addition to Highland Temperance League—the Scottish Temperance League, 1844, income £6,164, *League Journal*, offices, 108, Hope St., Glasgow; Scottish Permissive Bill Association, income £4,109, *Reformer*, offices, 112, Bath St., Glasgow; the Irish Temperance League, income £1,846, *Irish League Journal*, offices, 18, Lombard St., Belfast; Irish Temperance Association, *Banner*, Eustace Buildings, Dublin. The Church of England Temperance Society: income £11,739, offices, 9, Palace Chambers, Westminster, London, S.W., organ *Chronicle*, heads the list of **denominational societies**, among which are the Congregational and Baptist Associations; Wesleyan, Methodist New Connexion, Bible Christian, Swedenborgian, and Friends' Societies; and Free Methodist, Primitive Methodist, and

Roman Catholic Leagues, some of which have official organs.—**Undenominational**: The Medical Temperance Society, British Women's Temperance Association, Blue Ribbon Gospel Temperance Mission, and Young Abstinents' Union, have each papers of their own. To these may be added the National Deaf and Dumb, Travellers', Police, Cab-drivers', Soldiers', and English and Scotch Railway Temperance Societies. The Society for the Study and Cure of Inebriety, and the National Temperance Federation Offices, 29, Union Street, Sheffield, have been recently formed, twenty-five national societies being affiliated with the latter, which has been chiefly engaged in parliamentary work. In London, the Temperance Permanent Building Society has probably advanced over £3,000,000 since 1854; and the Artisans' and General Dwelling Company, now in its twenty-first year, has built over 4,000 houses on its estates in the suburbs, where no licences are allowed. During the past few years several **Inebriates' Homes** have been opened in different parts of the country.

Tenniel, John, artist, was b. 1820. Showing the possession of artistic taste at an early age, he may be considered as entirely self-taught. He was a successful candidate in one of the cartoon competitions for the decoration of Westminster Hall (45), and painted a fresco for the Palace at Westminster. His **illustrations** of books, although not comprising many, have always been characterised by great taste. When "Alice in Wonderland" made its appearance, some portion of the notice it obtained may fairly be attributed to Mr. T.'s illustrations of the book. In '51 he joined the staff of **Punch**, with which newspaper he has since been connected, and for which he draws the cartoon. Many of his sketches have obtained world-wide notice by this means.

Tennis. After the memorable match for £1000 which took place between T. Pettitt and C. Saunders, the respective champions of America and England, in Sir Edward Guinness' court, St. Stephen's Green, Dublin, on May 30th, '90, and which resulted in favour of Pettitt by seven sets to five, the contests of '91 appeared comparatively tame. The latter subsequently resigned the title of professional champion, and upon Saunders laying claim to it considerable discussion followed as to the justice of his doing so, and also as to the championship promoted by the Queen's Club Committee, there being two other recognised tennis centres in the Metropolis—Lord's and Prince's. This championship was thrown open to professional players of the world, and the full conditions guiding the competition were published in *The Field* of Jan. 17th. The first tie in the amateur championship was played at Queen's Club on March 23rd, between Lord Windsor and Mr. T. W. Legh, and the former winning by three sets to one, established his right to challenge Sir Edward Grey, but his lordship scratched to Sir Edward, who was awarded the title, Mr. E. B. Curtis (the holder) having vacated the championship by absence. Mr. H. E. Crawley had qualified to contest the silver prize by defeating Mr. J. Oswald, but he did not challenge the holder, Sir E. Guinness, who thus retained the trophy; and as the latter also declined to contest the **Gold prize**, it remained for the fifth successive year in the possession of the Hon. A. Lyttelton. In the **Oxford and Cambridge Matches** played at Lord's, the Light

Blues won both the singles and doubles. In the former Mr. E. H. Miles beat Mr. W. Sheldermine by three sets to love, and in the doubles Mr. Miles and Mr. J. B. Gribble defeated Mr. Sheldermine and Mr. A. R. Hamilton by three sets to two. A number of matches were played between Latham and Saunders, Latham and Fennell, and Saunders and E. Johnson, and between our leading amateurs and professionals during the season; but that arranged between the Hon. A. Lytton and Saunders unfortunately fell through.

Tennyson, Alfred Tennyson, 1st Baron (creat. 1884) is the son of the late Rev. George Clayton Tennyson, rector of Somerby, Lincolnshire; and was b. at Somerby, Aug. 6th, 1809. Ed. at Trin. Coll., Cambridge, where he gained the Chancellor's medal for his poem in blank verse, "Timbuctoo"; married Emily, daughter of Henry Selwood, of Peasmore, Berks, and niece of Sir John Franklin, and by her had two sons—Hallam and Lionel; Hon. D.C.L. Oxon ('55); has been *Poet Laureate* (q.v.) since '50. Published in '30 his first volume, "Poems chiefly Lyrical," followed by "Poems," in 2 vols. ('42), "The Princess"—which contains what many consider the finest of his lyrics: "Tears, Idle Tears"—('47), "May Queen," and "Locksley Hall," "In Memoriam"—a tribute to the memory of Arthur Hallam, son of the historian ('50); this fine poem was at first published anonymously. His other chief works being "Maud" ('55), "Idylls of the King" ('58), "Enoch Arden" ('64), "The Holy Grail" ('69), "The Window, or the Songs of the Wren" ('70), "Gareth and Lynette" ('72), "Queen Mary" ('75), "Harold" ('76), "The Cup" ('81), "The Promise of May" ('82), "The Cup and the Falcon" ('84), "Becket" and "Tiresias" ('85), "Locksley Hall: Sixty Years After"—which attracted much attention ('86); *Jubilee Ode* ('87). Lord T. has for many years resided at Freshwater, in the Isle of Wight; Aldworth; or at Rundhurst, Sussex. Almost simultaneously with the publication (Dec. '89) of "Asolando," by Robert Browning, a volume of poetry by Lord T. was issued, entitled "Demeter," and contained some very choice poems. Among its contents was "Crossing the Bar," which, by its exquisite music, excited great admiration. It was stated in Sept. '91 that a new comedy by Lord T. had been accepted by Mr. Augustin Daly for production in America.

Terry, Miss Ellen, was b. at Coventry, Feb. 27th, 1848; made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamiellius in "The Winter's Tale" and Prince Arthur in "King John." When only fourteen she was a member of Mr. Chute's Bristol company, which included Mrs. Kendal, Mrs. Labouchere, Kate Bishop, and several other now prominent members of the profession. She made her *début* in London, March '63, as Gertrude in "The Little Treasure," and until Jan. '64 played Hero in "Much Ado about Nothing," Mary Meredith in "Our American Cousin," and other secondary parts. In that year she married and left the stage, but reappeared again in Oct. '67, in "The Double Marriage" at the New Queen's Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Fortia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and has since, in

conjunction with Mr. Irving, played in the longest runs ever known of "Hamlet," "The Merchant of Venice," "Romeo and Juliet," and "Much Ado about Nothing." She has also appeared as Viola in "Twelfth Night," Henrietta Maria in "Charles I.," Camma in Tennyson's tragedy of "The Cup," and Ruth Meadows in "Eugene Aram." She achieved immense success as Marguerite in W. G. Wills' play of "Faust." She accompanied Mr. Irving on his American tour in '87, and afterwards reappeared at the Lyceum in "Faust," and ('88) at the same theatre played as Lady Macbeth and in "Dead Heart." In Sept. '91, Miss T. appeared as Lucy Ashton in "Ravenswood," with great success.

Tewfik. Mohammed Tewfik Pasha, Khedive of Egypt, eldest son of Ismail Pasha, was born 1852. Made President of Council by his father upon dismissal of Nubar, '78, and worked for a few weeks loyally with his colleagues, Sir Rivers Wilson and M. de Blignieres. Resigned rather than be party to the *coup d'état*. On deposition of Ismail he was proclaimed Khedive by Sultan's firman, June '79; gave loyal support to Dual Control ('79-82). Was unable to resist rebellion of Arabi ('82), but refused to take refuge in British ships. After bombardment of Alexandria entered into negotiations with English, and proclaimed amnesty to all who would return to obedience. This being ineffectual, after Tel-el-Kebir Tewfik returned to Cairo. Behaved with great courage during the outbreak of cholera ('83), when, accompanied by his wife, he visited the sick in spite of the remonstrances of ministers.

Theosophy. During '91 great interest was developed in this subject owing to the death of Mme. Blavatsky. Theosophy is a system of teaching which professes to explain the origin and destination of the universe and man. It claims to be the Ancient Wisdom Religion from which all existing religions are derived. It teaches that the existing universe is one of a long series of manifestations of the absolute; that man is a compound being, whose spiritual portion retains its identity through a long series of incarnations. These are repeated until the man, by ascetic training (described in detail in Patanjali's "Yoga Philosophy"), becomes free from all desires and passions. Beings in this condition are called adepts or Mahatmas, and have powers unknown to ordinary humanity. Theosophists assert that our universe is ruled by planetary spirits, who were the Mahatmas of prior creations. Theosophy bears a strong resemblance to Buddhism and the Jewish philosophy expounded in the Kabbala. It has been brought into public notice by the Theosophical Society, which was founded in New York on Nov. 17th, '75, by H. P. Blavatsky and H. S. Olcott. The founders assert that they were acting under the guidance of certain Wise Men of the East, or Mahatmas in theosophical phraseology—particularly of one named Koot Hoomi Jal Singh. A branch was formed in London under the presidency of George Wyld, M.D. In '79 Mme. Blavatsky, Col. Olcott and two others landed at Bombay, and settled among the Hindus there, and afterwards at Madras, to propagate the principles of the Society. On their arrival Sir R. Temple, Governor of Bombay, placed them under police surveillance, ostensibly upon the suspicion that they were Russian agents. The supervision soon ceased.

Mdme. Blavatsky claimed to possess certain mysterious powers which enabled her to control forces of nature unknown to most of the world. Her disciples believed she could send letters enormous distances instantaneously without the employment of visible means, that she could produce by occult forces articles of various kinds from a distance, and do many other wonderful things. These apparent miracles were denounced as jugglery. The lady and gentleman who were co-founders of the Bombay Society left it. In London, the president, Dr. Wyld, resigned on account of doubt in the good faith of Mdme. Blavatsky. In '84 Mdme. Coulomb published "Some Account of my Interchange with Mdme. Blavatsky," which accused Mdme. Blavatsky of deceiving her followers, and stated that she (Mdme. Coulomb) had helped in the work of deception. In Nov. '84 Mr. Richard Hodgson was sent to Madras by the Society for Psychical Research (*q.v.*) to inquire into the alleged miracles. A lengthy report was published by him in the Proceedings of the Society for '85, in which he declared that Mdme. Blavatsky was "engaged in a long-continued combination with other persons to produce, by ordinary means, a series of apparent marvels for the support of the theosophic movement," and that there was "a very strong presumption that all the marvellous narratives put forward as evidence of the existence and occult power of the Mahatmas are to be explained as due to either deliberate deception, carried out by or at the instigation of Mdme. Blavatsky, or to spontaneous illusion or hallucination or unconscious misrepresentation on the part of the witnesses." A large number of resignations resulted from these publications, which were not stopped by the report of a committee of inquiry appointed by the Theosophical Society to examine into the phenomena, which declared that the phenomena were genuine, and were produced without collusion, but that it would be impossible to convince a jury composed of opponents of theosophy that such was the case. For this reason it was declared inadvisable that Mdme. Blavatsky should vindicate her character in the law courts. Mdme. Blavatsky hurriedly left Madras for Europe. London became her headquarters until her death (see OBITUARY, Miscellaneous), and English converts were obtained. Among them was Mrs. Annie Besant (*q.v.*), and Mr. Herbert Burrows. The objects of the Theosophical Society are: (1) to form the nucleus of a Universal Brotherhood; (2) To promote the study of Eastern literatures, religions and sciences; (3) To investigate unexplained laws of nature and the physical powers of man. See *Lucifer*, *The Path*, *The Theosophist*, the monthly organs of the Society, and "The Secret Doctrine," by H. P. Blavatsky. Secretary of the British Section, W. R. Old, 19, Avenue Road, Regent's Park, London.

Thistle. The most ancient and most noble Order of the. Originally established in 1540, and remodelled in 1687, and again in Queen Anne's reign (1703). It was by the statute of 1827 declared that this Order should consist of the Sovereign and 16 knights. Its abbreviation is K.T., and its badge a green ribbon, with motto "*Nemo me impune lacessit*" ("None annoys me with impunity"). There are at present twenty K.T.s, including the Sovereign and princes of the blood, the subjoined being a list of them:—

The Sovereign.

Prince of Wales.	D. of Connaught.
D. of Edinburgh.	D. of Cambridge.
E. of Mansfield.	M. of Bute.
D. of Argyll.	D. of Buccleuch.
L. Napier and Ettrick.	D. of Hamilton.
E. of Stair.	M. of Lothian.
D. of Athole.	D. of Montrose.
E. of Southesk.	D. of Fife.
M. of Lorne.	E. of Galloway.
L. Colville of Culross.	E. of Crawford and Balcarras.

Dean of the Order, Very Rev. James Cameron Lees, D.D.; Secretary, Major Sir J. T. Stewart-Richardson, Bart.; Lyon King of Arms, J. Balfour Paul; Gentleman Usher of the Green Rod, Sir Duncan Alexander Campbell, Bart.

Thomas, William L., was b. 1830. In early life studied engraving in Paris and Rome, under his brother, the late Mr. G. H. Thomas. Visited America, and started there the first illustrated American paper. On returning to England entered into business as a wood-engraver. In 1866 the *Graphic* (*q.v.*) was launched under Mr. Thomas's direction, and he is managing director and art editor of it. Mr. T. is a member of the Royal Institute of Painters in Water Colours. The foundation of the *Daily Graphic*, under the artistic management of Mr. T., took place Jan. '90. Was presented (Dec. '90) with a handsome testimonial on the coming of age of the *Graphic*.

Thomson, Sir William, P.R.S., LL.D., D.C.L., was b. at Belfast, 1824. Ed. at Glasgow Univ., and Cambridge, where he graduated ('45) as second wrangler, and was elected to a fellowship. App. Prof. of Natural Philosophy in the Univ. of Glasgow ('46). Editor of the *Cambridge and Dublin Mathematical Journal* ('46), in which he contributed valuable additions to the mathematical theory of electricity. It is, however, in connection with submarine telegraphy that Sir W. Thomson's labours in electrical science are best known. He has also made important additions to the science of magnetism. His mathematical insight is seen to the greatest advantage in his investigation of the nature of heat. Pres. of the British Association ('71). Knighted in '66. He is joint author with Professor Tait of the well-known treatise on "*Natural Philosophy*." Created Grand Officer of the *Légion d'Honneur* in '80. Elected President of the Royal Society in '91.

Thornycroft, Hamo, R.A., the well-known sculptor, was b. in London, 1850. Becoming a student at the Royal Academy, he devoted himself to statuary. After paying a visit to Italy, his style underwent a change, which was evidenced in the statue of "*Artemis*," exhibited in '80. This is now to be seen at Eaton Hall. The statue of "*Tencor*" ('82) was bought for the nation. His other works include "*The Mower*" and "*The Sower*." His bronze statue of General Gordon stands in Trafalgar Square. Mr. T. was elected A.E.A. in '81, and E.A. seven years later. Was elected (Feb. '91) a member of the Athenæum Club for his distinction in art.

Tillett, Benjamin, one of the leaders of the great Dock Strike, and General Secretary of the Dock, Wharf, Riverside, and General Labourers' Union, was b. in Bristol in 1850. Before he was eight he worked in a brickyard, and at twelve served six months on a fishing-smack. He was then apprenticed to a bootmaker, but

ran away and joined the Royal Navy, from which he was discharged invalided after a short service. After several voyages in merchant vessels he settled at the Docks, and gradually formed the Dockers' Union, which has now some 23,000 members. He gave valuable evidence before the **Parliamentary Commission on Pauper Immigration**, and before the Lords' Committee on the Sweating System. He is a ready speaker, and during the strike showed much talent in the organisation of labour.

Timber. See **TRADE**, '91.

Timber, Law as to the Cutting of, in '91.

An important case as to the right of limited owners of landed estates to cut timber and retain the proceeds was heard before Mr. Justice Chitty (Jan. '91). In general the timber is regarded as part of the estate, and the money arising from its sale is treated as capital, the interest thereon being paid to the owner in possession. The word timber includes, as a rule, only oak, ash and elm; but it extends to other trees which are comprised in the term by local custom. In the present case Lady Dashwood was from 1862 till the time of her death tenant for life of extensive estates, principally in Buckinghamshire. A large part consisted of beech woods, and it had been customary for the owner each year to cut down the larger trees and sell the wood to chair-makers. By the custom of the county of Buckingham beech trees are timber, and after Lady Dashwood's death the next heir contended that in appropriating the proceeds of the sales she had been taking what legally belonged to him and his successors. An action was therefore brought against her executors to recover the sum of £50,000. Mr. Justice Chitty, in giving his decision, had regard to the actual practice on the estate rather than to the strict rule of law, and held that Lady Dashwood, in following the custom of her predecessors, had acted within her right.

"Times, The." The representative English political daily paper. First published under the title of *The Daily Universal Register*, Jan. 1st, 1785, at 24d., which name was changed to *The Times* Jan. 1st, 1788. Editors have been:—Dr. Stoddart, Thomas Barnes, J. T. Delane, Prof. Thomas Chenery, G. E. Buckle (q.v.) (present editor), 1884. The Centenary of *The Times* occurred in Jan. '88. The series of contributions under the title of "**Parnellism and Crime**" appeared in '87. "**The Mail**" published three times each week, furnishes a summary of the contents of *The Times*. In conjunction with *The Times* are issued, in a convenient form, the parliamentary debates, law reports, and occasional summaries of subjects of special public interest. **Palmer's "Index to The Times"** provides a convenient means of identifying any particular subject or event.

Tin. See **TRADE**, '91.

Tirebuck, William, was b. in 1854, at Liverpool. After early commercial experience he became connected with the *Liverpool Mail*, to which he contributed some poems. He was on the staff of the *Yorkshire Post* for six years, in addition to writing for magazines. He is now devoting himself to the issue of novels, of which "**St. Margaret**" was the first, and "**Dorrie**" ('91) was the most recent. He has edited Longfellow's Poems in the "**Camelot Classics**," and poems of Goldsmith, Hartley Coleridge, Lamb, and Bowles, for the "**Canterbury Poets**." Other works are, "**William Daniels: Artist**," "**Dante Gabriel Rossetti**," and "**Great Minds**

in Art." He has also written a dramatic cantata and an operetta, and set several songs to music.

Tithe Commission. See **REDEMPTION OF TITHE RENT-CHARGE COMMISSION**.

Tithe Rent-charge Recovery Act, '91. See **SESSION**, sect. 123.

Titles of Courtesy. See **COURTESY TITLES**.

Tobago. A British West Indian island belonging to the Crown colony of the **Windward Islands**. An Administrator presides over local councils, but all ordinances must be approved by general Government and Governor of the Windward Islands. For statistics see **BRITISH EMPIRE**, etc. (table).

Tolstol. Count **Lyof Nikolaivitch**, usually called Count Leon Tolstol, the most eminent living Russian novelist, was b. Aug. 28th, 1828, at Yasnaya Poliana, in the government of Toula, where he still lives. Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "**War and Peace**," a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but his "**Anna Karenina**," which appeared in '76, is better appreciated abroad. Matthew Arnold reviewed it enthusiastically a few months before his death; and George Meredith says that Anna, the beautiful but unfaithful wife, who ends her guilty passion by suicide, is the most perfectly depicted female character in all fiction. "**The Cossacks**" is his only other novel. He wrote much on education, and published many short tales and reminiscences of childhood and youth. The last six years of his life he has devoted to religious teaching. He makes "**Resist not evil**" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "**Christ's Christianity**." A complete edition of his works in English is being published. Count Tolstol married in '61, and has nine children living. Published in '89 "**My Religion**." Translations of his "**Kreutzer Sonata**" appeared in '90, and the views contained therein on the social question were the subject of much attention.

Tonbridge School was founded 1553, and was reorganised '80. **Governors:** the Worshipful Company of Skinners. Four exhibitions from £90 to £60 for four years fall vacant annually, and are tenable at any place of higher education that the Governors may approve of; four others are tenable only at Oxford or Cambridge. Pupils, 308. **Head Master**, Rev. Joseph Wood, D.D. Motto, *Deus dat incrementum*.

Tongkin. A country of Indo-China, formerly a province of Annam, made a French colony in 1884. Capital **Hanoi**, on the Hanoi or Song-koi river. Principal port and chief seat of trade, Hai-phong. See **ANNAH**, and **COLONIES OF EUROPEAN POWERS**.

Toole, John Lawrence, was b. in London 1833. After being for some time in a mercantile office, he joined the City Histrionic Club, and made his first appearance on the stage at the Haymarket Theatre ('53). Engaged under Mr. Dillon at Queen's Theatre, Dublin. Was en-

gaged at St. James's Theatre, London ('54), where he played in various characters of low comedy. Visited the United States of America ('74), and on his return to England appeared at the Gaiety Theatre ('75). Commenced the management of the Folly Theatre ('80), which he has named after himself, "Toole's Theatre." He achieved great success in "The Don" in '88, in which year he also published his "Reminiscences." Numerous farewell banquets were given to Mr. T. (Feb. '90) on his departure for a tour in Australia, from which he returned in May '91. He played in J. M. Barrie's "New Hedda."

Tortola. A West Indian island of the Virgin group, and chief of the Presidency of the Virgin Islands, in the British federal colony of the Leeward Islands. Area 26 sq. m.

Tower Bridge (London). (For earlier details see previous eds.) A bridge on the "bascule" principle, with two Gothic towers, the centre span of 200 ft. being cut in halves, to be raised and brought flush with the towers by machinery concealed within the latter; an upper footway for passengers for use when the bridge is open, and approached by staircases or lifts within the towers; approach roads and the land spans (which are on the suspension principle) 60 ft. wide, and the central span 50 ft. wide. The end of '92 was given as the time for completion. The two immense piers in the bed of the river were described as the largest in the world, and the total cost of the bridge and machinery was given at £750,000. On Oct. 20th the Commissioners of Sewers decided to join with the London County Council in forming the northern approach to the bridge by the widening of Whitegate Street and Sandys Row, Bishopsgate, the London County Council to pay half the cost of the city section, which will be over £50,000. On Nov. 7th it was reported that underwriters at Lloyd's were not willing to accept insurances on vessels passing to and fro under the bridge except as an extra risk.

Toynbee Hall. Founded in 1884, as the outcome of a scheme framed by the members of Oxford and Cambridge Universities, to "provide education and the means of recreation and enjoyment for the people of the poorer districts of London and other great cities; to inquire into the condition of the poor, and to consider and advance plans calculated to promote their welfare." It is the centre of a growing educational and philanthropic work and social study. The residents at the Hall, who pay their own expenses, devote the whole or a portion of their time to the service of their neighbours, whilst those who desire to help, but are unable to take up residence at the Hall, are called associates. The members, who include the actual workers, are more especially those who, unable to co-operate personally in the labours of the Association, are desirous of making it a channel of their sympathies with their less fortunate fellow-citizens. In connection with Toynbee Hall are Wadham House and Balliol House, where students and workers reside. Each House enjoys self-government. Address: Commercial Street, Whitechapel. Warden: Rev. S. A. Barnett (q.v.), Vicar of St. Jude's, Whitechapel.

Trade, '91. In this article the trade of '91 is considered briefly under its more important divisions. Exports, as we prophesied last year, have shown a decline, which the monthly returns indicate clearly. They are as follows:—

Month.	Exports of Home Products only.	
	'89-90.	'90-91.
November . . .	£22,270,038	£21,025,553
December . . .	21,001,670	21,384,270
January . . .	21,586,752	19,844,315
February . . .	21,084,228	20,470,621
March . . .	20,067,022	21,663,278
April . . .	20,344,307	20,919,066
May . . .	22,940,779	19,744,473
June . . .	21,532,817	21,434,390
July . . .	24,327,336	21,945,112
August . . .	22,817,009	20,670,489
September . . .	22,764,077	20,793,543
October . . .	21,673,090	21,166,113
	£204,404,385	£251,081,338

In view of the more hostile tariffs with which we have had to contend, and the fact of very heavy shipments to America in the summer and early autumn of '90, this result is not entirely unsatisfactory. The imports show a slight advance, being £348,607,110 during the first ten months of '91, as compared with £344,355,274 during the same period of '90. The imports of raw material for manufacturers likewise show an increase.—Coal. The coal trade has been fairly satisfactory during '91. Prices have been too high to suit the views of manufacturers, but from the coal owner's point there has not been much cause of complaint. In Nov. '90 best Wallsend stood at 20s. 6d. per ton. Since then it has, on the whole, been lower, never standing above 10s., and falling during June and July as low as 17s. 6d. Early in Nov. it was 19s. During the first ten months of the year exports showed an advance, both in quantity and value, the figures being:—

	Quantity.	Value.
'90 . . .	25,290,354 tons	£15,938,743
'91 . . .	26,279,825 "	£16,073,541

It is encouraging to find that the increase has been general in the case of all our principal customers, with the exception of Italy, whose takings are about 7 per cent. less, owing to the depression which has generally prevailed in that country. The deliveries to Germany have increased 30 per cent., owing to the dearness of the native coal (see FOREIGN TRADE). The quantities sent to France, Russia, Egypt, and India, all show improvement on '90.—Copper. The history of the copper market during the past twelve months has been one of declining prices. Early in Nov. '90 the price stood at £58 7s. 6d. per ton. During that month a sharp fall took place, in consequence of the financial crisis, and a consequent slackening in the demands for general trade purposes, and in December a further decline was registered, until as low as £52 10s. was reached. During the first three months of '91 the copper market was firm, with a slightly upward tendency, but a drop to £51 12s. 6d. occurred in April. In May prices rose smartly until £55 5s. was reached, but then another decline occurred, and at the end of Sept. £51 was touched. At the close of Oct. the price was £45 17s. 6d. Financia

and trade depression is mainly responsible for this fall, though reports in the autumn of the reopening of the Anaconda mine, in America, contributed to depress prices. As we indicated last year, prices during '90 were perhaps unduly high. At the same time, they are now artificially depressed, and the future will probably bring improvement. Stocks were lower at the end of Oct. than at the same date last year, and the consumption, largely in consequence of the increased demand for copper for electrical industries, exceeded the supply. In the United States the home demand seems likely, before very long, to absorb the whole production in that country, and therefore, in the absence of unforeseen causes of depression, the prospect may be regarded as fairly satisfactory.—**Cotton.** The year has been comparatively uneventful in the cotton market. There has been no cotton corner during '91, abundant supplies being against any attempts to manipulate the market. Prices, with unimportant variations, tended steadily downward until August, partly owing to a poorer demand, and partly because the crop in the United States was extremely heavy. Middling Upland, which stood at 58d. per lb. on Nov. 1st, '90, was as low as 48d. in August. Since then there has been a slight recovery, reports of damage to the crops by weather having favoured attempts to raise prices. In the early part of Nov. '91 it stood at 48d. per lb. The export of yarn during the first ten months of '91 was only 4 per cent. below that of the same period of '90 as regards quantity, but as much as 7½ per cent. in value, owing to the decline in prices. To nearly all the European countries the deliveries have been less, the only notable exception being France, which has largely increased its takings. China, Japan and India have also been much poorer customers, and spinners of bundle yarns have had a difficult year. As regards piece goods, the diminution for the first ten months was, on the aggregate, about 5 per cent., and shows no special variation of interest, except a marked decline in the Eastern demand. On the whole, however, the year has not been a profitable one for either spinners or manufacturers, and many of the joint stock companies show a balance on the wrong side as the result of the past year's trading. The total crop in the United States for the year ending Sept. 1st, '91, was unprecedentedly large. That of the previous year was in excess of any before known, but it has been considerably surpassed. The following are the totals for the last four years of the American and Bombay crops (the latter for the year ending June 30th)—

Year.	United States. Bales (500 lbs.).	Bombay. Bales (500 lbs.).
1887-8 . . .	7,017,707	1,472,000
1888-9 . . .	6,935,082	1,851,000
1889-90 . . .	7,323,726	2,238,000
1890-1 . . .	8,055,518	2,020,000

The Continent has again taken more than this country, the season's consumption being:—

United Kingdom, 4,318,000 bales; Continent, 4,527,000 bales; United States, 2,958,000 bales. The latest reports on the Indian cotton crop indicate a poorer yield during the coming season, owing to the injury caused by delayed rains in June and July. **Iron and steel.** The past year has been a less exciting one than its predecessor, and in many respects more satisfactory, though not without its ups and downs. Early in Oct. '90, when nearly all the Scotch furnaces were shut down, Scotch warrants stood at 54s., and Number 3 Middlesbrough warrants at 50s. 3d. By the close of the year, however, both had receded, and stood respectively at 46s. 4d. and 42s. 3d. During January and February trade was quiet, and the fluctuations in price very small, but during March a sharp fall occurred, Scotch warrants touching 42s., and Middlesbrough 38s. 6d., prices lower than the minimum figures of '90, and only a few shillings above the lowest prices of the last thirty years. This fall was due to the blowing in of the Scotch furnaces, with a reduction in wages of 20 per cent., to a decreased demand and to general uneasiness. During the second quarter of '91 there was no special trade activity but a great deal of excitement and fluctuation in the warrant market. Prices of Scotch rose from 42s. to 50s., and after receding to 45s. 7½d., settled down to 47s. at the close of June. These great alterations were due, according to Messrs. William Fallows & Co., "to large transactions carried on by two sets of operators, one buying for a rise and the other selling for a fall. The operations of the latter appear to have been carried much too far, and the price of pig-iron, being forced down much below cost, the consumption outran the production to such an extent that stocks were largely reduced. The stock in Connal's Store, at Glasgow, which at one time rose to 1,039,942 tons, had declined to 512,635 tons by the end of April 1891. It was at this point that the "Bull" operators began to take up the warrants which they had bought, and this they did to such an extent that these documents became so scarce that many contracts had to be squared off with the buyers, as warrants were not forthcoming. The price at which this squaring off was done is not known, but in the open market up to 59s. was paid. When the great bulk of these contracts were arranged the market quickly settled down. Since then prices have been fairly steady. Manufactured iron is too low to warrant buyers paying an advance for pig, and the latter is largely under the control of London operators, who hold enough reserve stock to prevent any fall, and seem to have fixed 47s. as their limit. Exports of hardware and cutlery show a decline of 9½ per cent. for the first ten months of the year. The deliveries to the United States a little more than half what they were in '90, the McKinley tariff having hit this branch of trade particularly hard. Germany, France, the Argentine Republic, and South Africa have also been poorer customers, but Brazil, India and Australia have taken more from us. Exports of pig-iron and railway material have seriously declined, and the same may be said of iron manufactures generally, with the exception of machinery and mill work, which have suffered less than other branches. During the first six months of the year there was great activity in the tin-plate industry, owing to heavy orders from the United States in anticipation of higher duties which took

effect on July 1st, the deliveries to that country up to the end of June being nearly double what they were up to the same date in '90. Since then they have practically ceased, with the result that many of the Welsh works have had to be closed, at any rate, temporarily. About seven-eighths of our whole export of these articles having hitherto been to the United States, the outlook is sufficiently serious, though whether these articles can be produced to any appreciable extent in America is still very uncertain (see FOREIGN TRADE).—**Jute.** With some fluctuations jute has shown an advancing tendency in '91. According to Messrs. Wilson & Berg, R.F.C., which stood at £13 10s. to £14 per ton on Dec. 31st, '90, had reached £16 10s. to £17 in the middle of Oct. '91, an advance of over 20 per cent. At the same time the phenomenon of last year was repeated, an increase in the increase of our exports, and a decrease in their value. This can only be explained by the fact that the demand for low qualities increased, and that for better goods fell off. Our deliveries to Germany increased 80 per cent. in quantity, and those to the United States showed a substantial advance, a fact which, in view of the operation of the McKinley tariff, is noteworthy. Decreases occurred in the exports to South America and to Turkey. In yarns there has been little variation in the aggregate, but much in detail. Deliveries to Germany, Spain and other countries rose a good deal, but those to the United States fell off two-thirds. This would seem to indicate that the new tariff has not benefited American jute manufacturers.—**Linen and Flax.** Flax has shown but little variation in price this year, smaller imports being neutralised in their effect on rates by general trade depression. Our exports, both of linen yarn and piece goods, show a decline as compared with '90, the returns for the first ten months being £5,019,783, as compared with £5,633,880 in the same period of '90. In yarn Germany and Holland are the only important countries which have taken more, the exports to the United States having declined nearly 70 per cent. In piece goods the deliveries to Germany, Brazil and Australasia have been fairly maintained, but the United States, France and the West Indies have been poorer customers. The export of linen thread is less by nearly 20 per cent.—**Nitrate of Soda.** During the year ending June 30th, '91, the world's consumption of this product has again increased, though not to the same extent as in the previous year; the figures for the twelve months ending June 30th being 706,000 tons for '89, 898,000 tons for '90, and 929,000 tons for '91. In the United Kingdom a slight decline occurred, most manifest during the second half of '90, the figures for the whole year being 118,000 tons as compared with 127,000 tons in '89-90. For the first half-year of '91 the increase in the consumption in Germany was 22 per cent., and in Holland 20 per cent., other Continental countries remaining practically stationary. During the latter half of '90 the decline, which had previously been in progress, continued. The price, which at the end of June stood at 8s. per cwt., fell by the close of the year to 7s. 4d. A natural, although unimportant, revival took place in January, when the outbreak of the civil war in Chili became known, although those best able to judge then, confidently asserted that it would be of short duration. This opinion proved erroneous, and as the year went off without

peace being restored, prices rose, and the market maintained itself under supplies so large as in ordinary circumstances to have produced very low rates. In March the long continuance of easterly winds retarded arrivals, and as high a price as 9s. 6d. was reached, which fell to 8s. 9d. on the arrival of large cargoes. The year closed in June with an average price of 8s. 4½d. The future of the industry is very uncertain. Although the civil war is now over, it has caused heavy losses to the nitrate companies, and there is talk of claiming big sums from Chili on that account, though the probability of their being paid seems slight. With the view of raising prices, a combination of producers to restrict the supply has again been on the carpet, and a provisional agreement has been signed for carrying on the industry during seven months of the year only, and limiting the shipments to 18,000,000 quintals. Last year 23,000,000 quintals were shipped. The following statistics will be of interest both to consumers and investors in nitrate companies:—

	Consumption in Europe and United States for year ending June 30th.	Visible Supply, June 30th.	London Spot Price, June 30th.
	Tons.	Tons.	s. d.
'84 .	524,000	225,000	9 9
'85 .	483,000	186,000	10 6
'86 .	415,000	165,000	9 6
'87 .	502,000	145,000	9 0
'88 .	645,000	190,000	9 0
'89 .	706,000	288,000	8 6
'90 .	898,000	254,000	8 0
'91 .	929,000	276,000	8 4½

Salt. During '91 the monopoly of the Salt Union has been perceptibly weakened. Outside firms have competed successfully, with the result that prices, already reduced, had to be further lowered in October, as the result of a conference between the directors of the Union and the principal distributing firms. Unfortunately, foreign salt has already gained so firm a hold in certain parts of the world, that the task of displacing it, even at the new rates, will be far from easy. Meanwhile, exports are declining. The returns for the first ten months of '91 amount to only 586,814 tons, as compared with 638,758 tons in the same period of '90, and 738,000 in the first ten months of '88, the year the Union was formed. That attempted monopoly has not been remunerative to its constituents, the ordinary £10 shares being now only worth some £4 10s. each.—**Shipping and Shipbuilding.** At the beginning of '91, freights were unremunerative pretty well all round, but towards the spring an improvement took place, and fairly good rates were obtained from the East, the Black Sea and the Danube. In consequence of this a large number of steamers, the tonnage of which was estimated at 600,000 tons, were set to work again after having lain idle for some time. The heavy wheat shipments from Bombay and Calcutta led to a great demand for tonnage homeward, and as the outward requirements were comparatively small, very low rates were current for cargoes to India, coal being carried from Cardiff to Bombay

at 6s. 6d. per ton, an almost unprecedentedly small figure. An improvement at once set in when the wheat shipments were over. Since then the Eastern demand has been normal, and fairly steady. Baltic rates were very low during the first half of '91, but have since risen considerably. Mediterranean rates have followed the same course, rising 30 per cent. between July and October. Black Sea prices have also advanced considerably latterly, being 12s. to 12s. 6d. at the end of June, and as much as 23s. in October, owing to the prohibition of grain exports by the Russian Government. As the year has advanced, American cotton freights have been in request at hardening prices, owing to the enormous grain shipments to Europe. Outward Atlantic freights have gradually receded, until 12s. 6d. has been accepted for sustains by mail boats. At the end of Sept. '91 there were 475 vessels, of 702,114 gross tons, under construction, as compared with 406, of 652,248 gross tons, at the same time in '90. The most notable feature in this connection is the boom in sailing ships. While the number of steamers is about the same, that of sailing vessels has nearly doubled, and preparations are said to be being made for building many more. The Clyde seems likely to take the lead in this new development. The reason for this seems to be, that with freights cut as they are steamers cost too much to work. The tonnage of the latter this year is 54,670 tons less than last. As more than a sixth of the whole tonnage now under construction is on foreign account, the building this year, though probably too large, cannot be considered as foolishly excessive.—**Timber.** The close of '90 found the timber trade in an unsatisfactory position. In spite of reduced imports, stocks were unduly high, and prices so depressed, as to render business very unprofitable. The latter half of November, and the whole of December '90, were particularly bad for the timber trade, owing to the prevalence of severe weather, and the hoped-for improvement was checked. Worse was in store, however. In the middle of Jan. '91 serious failures occurred, affecting timber interests generally, and putting so severe a strain on credit as to cause a further downfall in prices already unduly depressed. Fortunately this decline was only temporary. In February a slight advance was again perceptible, and though there was again weakness in March, owing to the accumulation of stocks for sale, prices recovered in April, and remained firm in May and June. In July attempts were made to enforce an advance, but on the whole they proved futile, and during that month and August business remained quiet and prices unaltered. During September, however, rates decidedly advanced, and the prospect for the future is much more hopeful than at this time last year. The London figures for both foreign and colonial timber in stock, on Sept. 30th, showed a considerable diminution on the figures of the previous year, and supplies of foreign deals and battens were lower than for several years past. The most important items were—foreign deals, 2,016,000 pieces; foreign battens, 2,328,000 pieces; foreign boards, 7,251,000 pieces; and colonial pine deals and battens, 1,060,000 pieces. A comparison of prices in some of the most important qualities between the lowest point at the end of January, and that reached in Oct. '91, yield the following result:—

Swedish Fourth Yellow.

Jan. Oct.
£7 to £9 10s. £8 10s. to £9 10s. per standard.

Quebec Red Pine.

Jan. Oct.
£2 10s. to £3 10s. £2 10s. to £3 10s. per load

There has again been a decided decline in the importation of pitch pine, the receipts of which, for the first nine months of '91 were hardly half, those during the same period in the preceding year. The tendency in favour of goods ready prepared for use has hardly been so marked in '91 as in previous years, and imports of hewn timber have declined less in proportion. Canadian and American oak continues scarce, the imports having declined nearly 50 per cent. in '91. The mahogany market has continued in a satisfactory condition, and the imports have considerably increased, amounting to 38,704 tons during the first ten months of '91, as compared with 32,325 tons during the same period of '90. Average Honduras logs were higher in prices, being firm at 5½d. to 7½d. (running 6½d. average) during '91. Teak has been firm, the imports being considerably below those of '90. Walnut has been firm and in good request throughout the year, but the popularity of Sequoia (Californian redwood) has hardly been maintained. During the early part of '91 it was in small request.—**Tin.** During the past twelve months the price of tin has undergone fluctuations, but the general tendency has been a downward one. This is due partly to a diminution in the demand, owing to general trade depression, and partly to the fact that imports have increased, as the following figures for the first ten months of '90 and '91 show—

Imports from	'90.	'91.
	Tons.	Tons.
Straits Settlements . .	291,945	348,825
Australasia	101,851	90,166
Other Countries	38,082	22,785
Total	431,878	461,776

The movement in price may be briefly summarised. At the end of Sept. '90, Straits tin stood at £102, but from then to the end of the year there was a downward movement, and on Jan. 1st, '91, the price was £91 10s. In March £93 15s. was touched, and in June £94 2s. 6d., but these were the highest rates during the year, and on Nov. 5th, '91, the rate was £90 6s. 3d., which was rather below the average for the year. The most encouraging feature is that latterly, in spite of the demand being only moderate, the market has been firm.—**Wool.** Before beginning an account of the London sales of the past year, which practically fix the prices for the whole world, we give two tables—one showing the imports of colonial and foreign wool into the United Kingdom, and the other the estimated growth of wool in this country and in the United States. For both we are indebted to Messrs. Jacomb, Son, & Co.—

Imports of Wool into the United Kingdom.

Year.	Colonial.	Foreign.
	BALES. (Average Weight, 330 lb.).	BALES. Various Weights.
'82 .	1,191,266	296,325
'84 .	1,285,741	318,998
'86 .	1,366,647	375,361
'87 .	1,351,342	406,039
'88 .	1,533,520	395,850
'89 .	1,526,698	486,355
'90 .	1,511,547	384,089

It will be seen that both categories show a decline, that in foreign wool being particularly marked. The receipts of River Plate and Uruguay wool on the Continent of Europe also fell off, being only 316,000 bales in '89-90, as compared with 420,000 in '88-89. The figures of the wool grown in this country and the United States are necessarily only approximate, but they are interesting, as showing the general tendency -

Wool Grown.

Year.	United Kingdom.	United States.
	lb.	lb.
'83 .	128,338,115	320,400,000
'86 .	136,544,876	322,000,000
'89 .	132,772,200	302,000,000
'90 .	137,724,700	316,000,000

Thus the production in the United States, in spite of the heavy protective duties, is practically stationary. Resuming our report on the London sales from where we left off last year, at the close of the fourth series in '90, the fifth series in November and December consisted of a small offering of 145,000, which met with little demand, prices declining *id.* to *1½d.* on Australians, though Capes did not suffer quite so much. For this decline the financial crisis in November must be held partly responsible. At the first sales of '91, held in January and February, there was an average attendance of buyers. South African wools fetched about the same rates as in December, while good Australians were 5 per cent. higher, and inferior 5 per cent. lower. At the second sales, in April, the same tendency was shown, good descriptions advancing and inferior ones receding. About 56 per cent. of the total quantity sold was for export. The third series in June and July showed good kinds as steady at former rates, but faulty offering again lower. The fourth series, opening in September, was marked by a general decline all round, though the demand was steady throughout. In view of the fact that the total arrivals in '91, up to Oct. 7th, were in excess of those to the same date in '90, the general result cannot be deemed unsatisfactory, especially in view of the spirited buying from

Yorkshire at the close of the fourth series. The growing importance of the sales of wool in Australia and New Zealand may be gathered from the following statistics -

Australian Wool Sales.

1860-1.	1883-4.	1887-8.	1890-1.
208,272.	377,227.	421,500.	581,329 bales.

Woollen goods. Our woollen exports have, despite bad trade and adverse tariffs, suffered surprisingly little during '91. As regards yarn, there has actually been an increase as regards quantity, although, owing to declining prices, the value works out rather less. Holland took less by $\frac{1}{2}$ per cent. than in '90, and the United States' purchases fell off from 877,500 lbs. to 266,500 lbs. As the latter country has, however, been an unimportant yarn-buyer for some time, the diminution has no serious meaning. It is satisfactory to find that Germany, our largest customer, which takes half the total export, bought more from us than in '90, and that all the other European countries including France, followed suit. The export of woollen goods, other than carpets, flannels and blankets, was about the same as in '90, the quantities being 47,398,800 and 47,377,400 yards for the first ten months in '90 and '91. Germany, Holland and Belgium proved better customers, but Italy and France took rather less. The United States, South Africa and the Argentine Republic showed decreases, but China, Brazil, Canada and Australasia increases, the two former being very notable. Our foreign trade was less in flannels, blankets and carpets than in '90. Worst exports suffered very seriously. Whereas 150,709,900 yds. were exported in the first ten months of '90, only 124,276,800 yds. were sent abroad during the same period of '91. Bradford, the centre of this trade, has had a bad year. The trade with France has fallen off 15 per cent., and that with the United States 55 per cent., the decline in the shipments to the latter country being the main trouble. On the other hand, it is encouraging to find substantial increases in our exports to China, India and all the principal British colonies. Our trade with Australasia has increased nearly 50 per cent., so that worsted seems to be successful in finding other outlets when shut out of the United States.

Trade, Board of, is constituted of numerous distinguished personages *ex officio*, the real work of the Department being done by a President (Sir M. Hicks Beach, M.P.), a Parliamentary Secretary (Lord Balfour of Burleigh), a Permanent Secretary (Sir Henry Calcraft, K.C.B., salary £1800), six assistant secretaries, in connection with as many departments relating to harbours, mercantile marine, finance, commerce and corn returns, railways, and fisheries, and a large staff of inspectors, surveyors, clerks, etc. Two separate Councils, for Trade and Foreign Plantations, were first established in 1660, and were consolidated into one Department in 1672, but this lasted for three years only. It was, however, revived in 1695. The present Department owes its origin to an Order in Council of 1786; but its work has enormously increased since then, and every year sees some new administrative burdens thrown upon its shoulders. Perhaps the most important additions of recent years were made in '83. The New Patent Office was established under an Act passed in that year for granting and registering patents, regis-

tering designs and registering trademarks; was placed under the immediate control of an officer who acts under the superintendence and direction of the Board, and was opened for business on Jan. 1st, '84. The other new branch of departmental work which was added by the legislation of '83 was in regard to **Bankruptcy**. The powers of the Board under both these Acts have been explained and summarised under other headings in previous editions of this work, and a sketch of the provisions of the Bankruptcy Act of '90 is given in this edition. By the **Patents, Designs and Trade Marks Act, '88** (51 & 52 Vict. ch. 50), it was enacted that after July 1st, '89, a person should not be entitled to describe himself as a patent agent unless he was registered under the Act by the Board of Trade, who were to make rules required for giving effect to this provision; but every person who proved to the satisfaction of the Board that prior to the passing of the Act he had been *bona fide* practising as a patent agent was to be entitled to be registered in pursuance of the Act. Any person knowingly describing himself as a patent agent in contravention of the section, was to be liable on summary conviction to a fine not exceeding £20. "Patent agent" is defined to mean exclusively an agent for obtaining patents in the United Kingdom. A number of amendments of great importance to those interested were made in the Act of '83. At the commencement of each session the Department reports to Parliament upon all railway, canal, tramway, subway, gas and water bills which have been deposited by promoters, and upon applications made to it for provisional orders for tramways, electric lighting, etc. When the construction of a railway has been sanctioned by Parliament, the line cannot be opened until an inspector of the Board has certified as to its fitness. Railway bye-laws must be approved by the Board, and its inspectors inquire into and report upon all railway accidents. It may order a railway company to make certain provisions for the public safety, including the adoption of the block system on all or any of their railways open for the public conveyance of passengers, and has the power to enforce its orders; and periodical returns of overtime worked on railways are to be made to it by the companies. Under the Railway and Canal Traffic Act, '88, the two new **Railway and Canal Commissioners** were to be appointed by Her Majesty on the recommendations of the President of the Board of Trade. The same measure enacted that every railway company should submit to the Board a revised classification of merchandise traffic, and a revised schedule of maximum rates and charges applicable thereto; that the Board should consider the same and any objections which might be urged thereunto, and endeavour to arrange differences between the company and objectors; and that if after hearing all the parties the Board were unable to come to an agreement with the company, the Board might determine the classification which in their opinion ought to be adopted, and the schedule which in their opinion would be just and reasonable, and report upon the same to Parliament; such classification and schedule to be subsequently embodied in a provisional order confirmation bill, upon which the railway company might be heard. It was under this Act that the Board made the provisional

orders which last session formed the subject of the prolonged inquiry before a joint committee of the two Houses, presided over by the Duke of Richmond, and which orders being amended by the committee, and subsequently by the House of Commons, settled the rates and charges of the principal railway companies. New tramways are also subject to its inspection, and the use of electric, steam, or any mechanical power upon them is subject to its consent or supervision. The rights of the Crown to foreshores are vested in it, and it has statutory powers in regard to pilotage, lighthouses and their maintenance, the inspection of British salmon and fresh-water fisheries, and under the Sea Fisheries Acts in regard to oyster, mussel, crab, lobster, and other fisheries. It may, on the application of a county or borough council, create a sea-fisheries district and local fisheries committee, whose bylaws are subject to its regulations. It is the guardian of the coasts, tidal waters, navigable rivers, harbour works, and tidal lands, when any works affecting any of them are projected by local authorities or railway or other companies. Certain important harbours, like Holyhead, are directly under it, and the President is a commissioner of the Mersey Conservancy. The Board supervises all matters relating to the mercantile marine (*g.v.*). Its officers may board vessels, inspect documents, muster crews, inquire into the cause of any accident or damage to vessels, see whether ships are in good condition, and take action for their detention if they be overlaiden or unseaworthy. It manages the **Mercantile Marine Fund**, which is derived from various sources, including light dues; and is applied to the maintenance of lighthouses and beacons, the expenses connected with local marine boards and officers, engagement of seamen, etc. The subordinate department of the **General Register and Record Office of Shipping and Seamen**, London, is under the Board, and exists mainly for the purposes of the Merchant Shipping Acts in their relation to the title of ships and to the registration of seamen; also for the purposes of the Naval Reserve Act. It has the custody of records and returns relating to ships and seamen, and the registration and tabulation of particulars abstracted from these records and returns; and it is the duty of the Department to see that those documents which they receive give the particulars which they ought to give, and to call for explanations of any apparent breach of Acts of Parliament or instructions of the Board which an examination of them may disclose. The Registrar issues certificates to masters, mates, and others who have complied with the required conditions as to service and the necessary technical knowledge. The **Naval Reserve** is, as regards enrolment and the fulfilment of conditions as to service, under the Registrar. The **Standard Department** was transferred to the Board from the Exchequer in 1866, and in 1877 the Permanent Secretary of the Board was appointed warden of the standards, without salary. It has the custody of the primary standards of length and weight, and its principal duty is the verification of local standards. The Board is empowered to cause such new denominations of standards for the measurement of electricity, temperature, pressure, or gravities, as appear to it to be required for use for trade to be duly made and verified. It may order a local inquiry with respect to the

administration of the law relating to weights and measures within the jurisdiction of any local authority, and it may examine and grant certificates to inspectors of weights and measures. The Standard Department subscribes to the International Metric Bureau at Paris, but the adhesion of this country to the Metric Convention is explicitly guarded by the declaration that they have no intention of adopting or proposing the adoption of the metric system in this country. The inspection of the returns furnished weekly of purchases of British corn, which information has since '36 served as the basis of the tithe rent-charge, is performed by another Department of the Board. Under the Companies Act '62 the Board may in certain cases, on the requisition of a sufficient proportion of shareholders, appoint an inspector to examine into the affairs of a company. Applications for charters of incorporation are generally referred to the Board by the Privy Council. When commercial treaties are in course of negotiation, it is generally consulted by the Foreign Office. It verifies the apparatus used under the Petroleum Act to test the flashing point of inflammable mineral oils. Under the Metropolitan Gas Acts detailed accounts are laid before it by the companies, and in connection with the Department there are officials and referees to act in regard to the examination of the purity of gas. The Board has its own legal branch for the transaction of business in connection with inquiries into railway accidents, detention of unseaworthy ships, cases before the Railway Commissioners, etc. It publishes monthly returns regarding trade and navigation, in addition to a mass of statistical information as to the commerce, taxation, population, and progress of the United Kingdom, the colonies, and many foreign countries; there is in connection with it a bureau which collects and disseminates information as to the

state of the labour market at home and abroad; it also publishes a journal of its own, containing much that is interesting to commercial men. By an Act of the Session of '91 the Board may undertake a prosecution under the Merchandise Marks Act of '87.

Trade Unions. Accurate statistical data of the trade unions of the United Kingdom are not obtainable; but the Board of Trade has for the past three years endeavoured to obtain information covering the whole area of trade unions. At the close of '89 the Chief Registrar of Friendly Societies had a list of 888 trade unions, and 104 of these have acceded to the request of the Board of Trade to supply balance sheets and other information. This number is considered by Mr. Burnett, the labour correspondent of the Board of Trade, to be not more than one-third or one-fourth of the trade unions of the kingdom; but, however, to include the largest and most important. The recent growth of Trade Unionism can be measured by the membership represented at the annual gathering of Unionists, known as the Trade Union Congress. At the first congress, in '68, 118,367 were represented; in '78, 623,957; in '88, 674,634; in '89, 835,055; in '90, 1,470,191; and in '91 close on 2,000,000. A great amount of interest has been excited in relation to the secretariat of the Amalgamated Engineers' Union, vacant by the decease, in '91, of Mr. R. Austin. Consult Reports of Trades Union Congresses, published by the Trades Union Parliamentary Committee; also "Statistical Tables and Report on Trade Unions, third report" (Parliamentary). It gives detailed and comparatively early statements of income and various branches of expenditure, particulars of wages, hours of labour, etc., and also an appendix containing a selection of the most important passages from the annual addresses of the chief officers of principal unions to their

members. These quotations are of special interest, as showing the subjects and direction of popular thought on trade questions. See also LABOUR LEGISLATION.

Trades Union Congress. The twenty-fourth Annual Congress was opened at Newcastle (Sept. 7, '91), when there were 532 delegates from 177 societies and 44 trade councils present, who represented nearly 1,302,855 trades unionists in the United Kingdom. Mr. T. Burt, M.P., was elected president; and Mr. G. Shipton, London, was elected vice-president. Auditors and committees were appointed, and the report of the Parliamentary Committee read. The second day's proceedings opened with the entertainment, by the mayor and corporation, of about 700 delegates at breakfast. On the adjournment to the Town Hall, the first business was the passing of a vote of sympathy with the London carpenters and joiners, who were on strike for shorter hours; and the president delivered his *inaugural address*, in the course of which he said, "Through the watchfulness of the London Trades Council, they had had their right to strike vindicated before the law; but, whenever they could have their difficulties and disputes calmly argued and settled by the arbitrament of reason, he ventured to say they would be fools, almost criminals, if they resorted to a strike. One thing, however, which the trades unions had not vindicated was the right to demand of the capitalist, however powerful and proud he might be, that he should receive and listen to their properly accredited representatives. The probability was that, when strikes occurred in the future, they would be on a larger scale than they had been in the past. Workmen would refuse to deal with blacklegs, directly or indirectly. Some of them might think it would be a wholesome lesson to the stupidest among the capitalists to teach them the value of labour, by bringing the industries of the country to a standstill. He was glad that met with but slight applause. If they were dealing with the stupidest and most tyrannical only, he for one would not discourage that idea, but it would hurt the innocent more than the guilty; and before they reached the point of wounding the capitalist, either in his pocket or his stomach, his two most vulnerable points, thousands of breadwinners and women and children would have suffered, and perhaps been carried to a premature grave." A considerable time was taken up in a discussion as to the manner of voting during the congress. In '90 the congress at Liverpool passed a resolution respecting the method of voting; and, acting under this, the Parliamentary Committee framed a regulation, whereby one vote would be recorded for every 1,000 constituents represented by a delegate, and paid for at the rate of so much a thousand. Some of the delegates thought this rule acted against the new unions; and a small committee, appointed to consider the question, recommended that the voting during the congress should be by show of hands. The Standing Orders Committee recommended that the voting during the present congress should be by show of hands, and that the former method, the "card system," should be in abeyance. The question was put to the meeting, and the president ruled that the voting upon it must be on the card system. There was some opposition to this; but, on the vote being taken, it was decided by a large majority to vote by show of hands during

the current congress. Mr. Matkin then moved, "That, in the opinion of this congress, the time has arrived when the Government of the United Kingdom should endeavour to bring about, in conjunction with all foreign governments, an international alteration in the hours of labour to **eight hours a day**, and, further, to demand the convocation of an international conference for the purpose." Seconded by Mr. W. Owen. Mr. Young (Northumberland) moved, and Mr. Knight (Newcastle) seconded, "That, in the opinion of this congress, it is impossible to establish universal uniformity of hours without inflicting very serious injury to workers in those districts and centres where natural conditions are least favourable for the procuring of subsistence. This congress, therefore, cannot agree to support this appeal for the establishment of a universal eight-hour day." This was lost: 136 voting for, and 302 against it. Mr. Keir Hardie then moved, and Mr. P. J. King seconded, that the following words be prefixed to the resolution, "This congress reaffirms the decision of last year's congress, relative to a legal eight hours' day, and further." On the question being put, 232 voted for, and 163 against it. At this stage the congress adjourned. On the debate on the original resolution being resumed, several minor amendments were moved and rejected, and finally the following amendment, moved by Mr. Hall (Hull), seconded by Mr. Austin (Liverpool), was carried by 242 to 156, "That, in the opinion of this congress, any Bill for the reduction of hours of labour should be of a **permissive character**, and should not be put in operation without the consent of at least two-thirds of the organised members of any trade." On the amendment being put as a substantive motion, many delegates spoke in favour of a compulsory eight hours' day for women, and a good number in favour of a general eight hours' day. Finally, Mr. Keir Hardie moved, "That legislation regulating hours of labour to eight per day shall be in force in all trades and occupations, save where a majority of the organised members of any trade or occupation protest by a ballot voting against the same." This was seconded by Mr. P. J. King, and carried by 285 to 183 votes. On this amendment being put as a substantive motion, it was carried by 341 to 73, the result causing great excitement. It was discovered, after the Congress, that the words "eight hours" were not in the resolution as put from the chair, and that, therefore, the Congress had not given an official pronouncement on the question. Mr. Wilson drew attention to the ruling of the Standing Order Committee, by which no one could be a delegate unless he had been a workman, and mentioned the name of Mr. Saunders, of Rotherham, representing the stovegrate workers. Some discussion took place, and on a division the ruling of the committee was upheld by 199 to 159, so that Mr. Saunders had to leave the congress. On the motion of Mr. M'Bean, a resolution was agreed to, affirming the desirability of the **payment of members of Parliament**, of school boards, county councils, and all local bodies, out of the rates; and that the question be made a test question at the next general election. It was resolved, on the motion of Mr. J. H. Wilson, that the time had arrived when all working men entitled to vote at Parliamentary elections should be called upon to serve on juries, and that they be paid

10s. per day for their services. A resolution condemning those co-operative societies which refused to pay a standard rate of wages to their employes, and kept them for longer hours than private tradesmen were in the habit of keeping their employes, was agreed to. On the motion of Mr. J. M. Jack, seconded by Mr. W. H. Lambton, it was resolved, "That this congress regrets that no favourable opportunity has yet presented itself in Parliament to debate the Bill having for its object the future examination of persons in charge of steam-engines or boilers, and the granting of certificates as to their practical fitness for such a duty; that the Parliamentary Committee is herewith instructed to arrange for the reintroduction of this Bill at the earliest possible date; or, should any other Bill be introduced, relating to steam-engines or boilers, that an effort be made to have included the principle of examination and granting of certificates as to the practical fitness of all persons placed in charge of steam-engines or boilers." The congress then adjourned. On the fifth day, it was agreed, "That this congress regrets that no action has been taken by the Government, during the past year, to carry out the resolutions of previous congresses calling upon them to appoint additional working men and, where possible, women as inspectors of factories, workshops, mines, bakehouses, railways, and other works throughout the United Kingdom of Great Britain and Ireland, and also India; further, this congress affirms its opinion that the present staff of inspectors is totally inadequate to be of service, especially where sweating and overtime so largely prevail; and hereby instructs the Parliamentary Committee to take the necessary steps to bring the question more prominently before the Government, with the view of getting additional inspectors, male and female, appointed without delay, and also to appoint additional working men inspectors for mines, provided they possess the necessary qualification; and that inspectors of factories be strictly prohibited under penalty from giving any notice whatever to employers, managers, or foremen, as to when they intend to inspect the workshops." Mr. Woods moved, and Mr. Edward seconded, "That the Parliamentary Committee of the Trades Union Congress be instructed to use all legitimate means in its power to secure the passage of the Miners' Eight Hours' Bill by the House of Commons"; and this was agreed to, after a long discussion, by 290 to 50. Glasgow was chosen as the next place of meeting. The remainder of the sitting was devoted to the consideration of the constitution of the congress, and the report of the committee presented. The report was much amended; and eventually it was decided to refer the question of the constitution to the Parliamentary Committee, with the request that they draw up a scheme of constitution on the principle of one man one vote. On the sixth day the following gentlemen were elected the **Parliamentary Committee**: Mr. John Wilson, M.P., Miners' National Union; Mr. J. H. Wilson, Seamen's Union; Mr. T. Birtwhistle, J.P., Amalgamated Weavers; Mr. Councillor Inskip, Boot and Shoe Operatives; Mr. E. Harford, Amalgamated Railway Servants; Mr. T. R. Threlfall, Southport Trades Council; Mr. J. Mawdsley, Cotton Spinners; Mr. G. D. Kelly, Lithographers; Mr. William Matkin, Carpenters and Joiners; and Mr. J. Inglis, Associated Blacksmiths. Mr. Fenwick, M.P., Miners'

National Union, was re-elected secretary of the Parliamentary Committee without opposition. Mr. Taft reported that there was a balance of £1,079 18s. 8d. to carry forward. **Resolutions** were passed affirming the desirability of fixing a uniform commission, not to exceed 4½ per cent., on the gross fish sales, in the interest of the fishermen of the United Kingdom, who were paid by a share of the net proceeds, and that the fish should be sold by English auction; the desirability of forming a Parliamentary election fund, to return members to Parliament, and to pay such members; condemning the action of the Home Secretary in refusing to admit the claim of laundresses to the protection of the Factory and Workshops Act; the desirability of the simplification of the property and rating qualifications for members of boards of guardians; declaring that public instead of private inquiries should be held in Scotland in cases of accidental death, the relatives of deceased persons to have the right to be represented and give evidence and examine witnesses, and that further power in the latter direction be conceded to the representatives of the trade unions in England; urging all sectional trades employed in the erection of buildings to use their utmost endeavours to eradicate sub-contracting and scamping in the building trade; "that this congress, recognising the principle of appointing practical workmen as factory and mines inspectors, is of opinion that the principle be further extended to railways, and instructs the Parliamentary Committee to formulate and promote measures in next Session of Parliament to secure the same"; and that all public works requiring the special sanction of Parliament, where temporary railways are used during construction, shall be subject to the regulations of the Board of Trade; and that the Parliamentary Committee draft amendments to the Conspiracy and Protection of Property Act, to define clearly intimidation. The congress terminated with the usual votes of thanks (13th). At a large open-air meeting of working men on the closing day, the following resolution was adopted, "That, in the opinion of this meeting, a greatly improved social condition of the people is principally due to trade combinations; and, as the further improvement of the working classes will largely depend upon the complete organisation of all branches of industry, we hereby call upon all workers to at once affiliate themselves with the societies of their respective industries." See also LABOUR.

Tramways and Trams (Metropolitan). In 1858, Train, an American, endeavoured to obtain an Act of Parliament to authorise the construction of tramways in London. In '66 and '67 application was made to Parliament for power to construct a system of tramways in Liverpool, for which a statute was obtained in '68. This was the first English system of tramways for passenger traffic that was authorised by Act of Parliament. From '69 to '71 Acts for the making of sixty-one miles of tramways in London were passed. A statute was also passed in '70 to enable the Board of Trade to make provisional orders, authorising the construction of tramways in Great Britain with the consent of the local authorities, and giving considerable powers for regulating their construction and working. In '69, the North Metropolitan Tramway Company was authorised to lay tramways in the Whitechapel, Mile End, and Bow Roads; and in '70 the company was em-

powered to lay extensions to Aldgate, at the West End, and to Stratford, Leytonstone, and Bromley, at the East End. In '77 the company obtained additional powers to lay tramways in the North and East of London. In '69 Acts were passed for the construction of the Kennington, Brixton, and Clapham routes from Westminster Road by the Metropolitan Streets Tramway Company; and the routes from Pimlico, by Vauxhall to Greenwich by the Pimlico, Fockham, and Greenwich Tramway Company. These two companies were by their Acts empowered to make and work tramways in almost all the Metropolitan thoroughfares on the south side of the Thames, consisting of 25 miles of street. In '70, they were amalgamated as the London Tramway Company. In that year the London Streets Tramway Company were authorised to lay tramways on the north side of London from Lower Holloway to the south end of Hampstead Road, and from Kentish Town to King's Cross. In the beginning of '73 42 miles of tramway had been opened on the Metropolitan streets, while at present about 130 miles are used for passenger traffic. Horses employed for hauling trams are only worked about eleven to fourteen miles a day, and much less on steep gradients. In London, a tramcar horse bought at the age of five years has to be sold at a low price after about six years' work. The average life of a tramcar horse is from five to six years. During '90 proprietors' licences were issued in respect of 1022 tramway cars, and 120 new cars were brought into use during that year of an improved kind, and only 1 car was rejected, as against 35 omnibuses unfit for public use, when submitted for a licence, owing to the police regulations not being complied with. In the official monthly night inspection made of stage carriages, no tramway car was reported as unfit. The North Metropolitan Tramway Company holds the first place as regards the mileage of its tramways and the number of cars and horses running thereon, the number of passengers conveyed, and the receipts from them. The number of miles of tramway open of the company is 52. For the half year ending June 30th, '91, their rolling stock consisted of 356 cars and 12 omnibuses, of which 347 were in good running order and 21 were under repair. At that time the company had 3,500 horses. They carried during the first six months of '91 35,615,027 passengers, whose fares amounted to £194,948 13s. 8d. The number of miles run was 3,629,323, and the percentage of total working and general expenses, as compared with total receipts, was 78.71. Advertisements brought the company £5,176 4s. The net profit realised for the last half year was £42,860 3s., whereby the proprietors of the fully-paid-up shares were paid a dividend at the rate of 8 per cent. per annum, subject to deduction of income tax. The police licences and excise duty cost the company £654 15s.; provender, £42,583 13s. 3d.; shoeing, £296 18s. 10d. The total number of passengers carried on the company's tramways from the date of the opening of such on the 9th May, '70, to the 30th June, '91 was 720,391,227; while the gross traffic receipts during the same period amounted to £5,410,320 4s. 2d., of which sum, £1,234,604 17s. 4d. has been paid in dividends to the shareholders. The lines are divided up into penny sections, all of which are a mile or more in length, with twopenny and threepenny fares for longer distances and

through fares. Some of the lines are about five miles in length. The number of miles of tramway belonging to the London Tramway Company is about 224; for the half year ending June 30th, '91, their number of cars and omnibuses running was 2381, consisting of 1301 pair-horse cars, 25 one-horse cars, and 38 omnibuses. The Company then had 3,287 horses and mules. During this period the number of passengers carried on the Company's lines amounted to 30,527,176, the receipts from whom came to £149,644. The number of miles run was 3,761,891. The Company obtained £2,378 13s. 7d. from advertisements. The net income for the half-year was £19,903 0s. 6d., which according to the Capital Act of the Company was equally divided between the ordinary shareholders and the holders of scrip certificates. The Company paid for police licences and excise duty £462 4s. 4d.; for provender, £37,526 10s. 6d.; and for shoeing £2,708 3s. 10d.

Transatlantic Cattle Trade. A Departmental Committee of the Board of Trade and the Board of Agriculture was appointed by the President of the Board of Agriculture to inquire into and report upon the Transatlantic Cattle Trade. Among the numerous witnesses called was Mr. Samuel Plimsoll. The committee in their report, which was laid before both Houses of Parliament in course of the session of 1890-91, give some interesting statistics regarding the trade. In '77 the Transatlantic cattle trade was a noticeable factor in the imports of the year. The United States sent into British ports, 11,523 cattle and 13,120 sheep, and Canada sent 7,639 cattle and 10,275 sheep. But it was not until the following year that the trade began to assume large proportions. In '80 the United States sent 156,490 cattle and 67,220 sheep. These figures, as far as the United States trade is concerned, remained unequalled in cattle until '89, when the importation was more than double that of the immediately preceding year, and the numbers rose to 294,391 and to 384,646 in '90. The progress of the Canadian trade shows less fluctuation during the same period, rising by more regular increments, but also displaying a considerable exhaustion, as far as cattle are concerned, in 1889-90, the numbers being for those years 83,588 and 121,309. The United States trade in sheep is evidently a decreasing one, as the figures since '83 show. In '88 they had sunk as low as 1,203, recovering in '89 to 18,690, but sinking again in '90 to 3,900. Canada also is sending less sheep than she did ten years ago, and both countries doubtless are feeling the competition of the dead meat trade. **Summarising their conclusions, the committee say:** "The evidence shows clearly (1) That the Transatlantic cattle trade is a large and growing business carried on in various kinds of vessels by private enterprise, and regulated partly by people interested in the trade, and partly by official inspection on behalf of the Governments of the United States and the Dominion of Canada and of Her Majesty's Government, at the ports of embarkation and debarkation respectively. (2) That the successful carriage of animals by sea is to some extent affected by their condition before embarkation, especially after long land journeys. (3) That in fine weather the transit of cattle by sea is conducted in safety, with a minimum of loss and a comparatively small amount of suffering, even in ships of as low a tonnage as 1,200 tons. (4) That in heavy weather, either in summer or in

winter, although it is more frequent in winter, even in the best ships cattle are always liable to suffering and sometimes to heavy loss; but that with sufficient shelter and ventilation, adequate fittings and space, proper stowage, good attendance, and a due amount of skill in navigation, the average loss and suffering can be still further diminished." The committee recommended that cattle should not be carried on bridge decks or poops, nor on the upper deck of any ship under temporary shelters. The shelter should be of such a character as to form part of the permanent structure of the ship. Cattle should not be carried on the lower 'tween deck of any ship unless adequate means of artificial ventilation are provided; nor on the hatchway, nor on any part of any deck where they can impede the navigation of the ship, or interfere with the lowering of boats. The fittings should be so constructed as to be able to resist the strain of the severest weather, and where the fittings are inadequate the vessel should be considered unfit for the trade. The committee also made recommendations respecting passageways, ventilation, waterports (to furnish means for a ready escape of water), attendance, food and water, light and other matters, and expressed the opinion that the Board of Agriculture should make regulations from time to time with regard (a) to the parts of the vessel in which animals may be carried and the space to be allotted to each animal; (b) to the size and construction of the fittings and the pens and the width of the passageways; (c) to the provision of adequate lighting and ventilation; and (d) generally for protecting the animals from unnecessary suffering during the passage by sea. They recommended that powers of inquiry, similar to those which are now possessed by the Board of Trade under the provisions of the Merchant Shipping Acts, should be conferred upon the Board of Agriculture with regard to casualties and losses among cattle during their transit by sea. On June 18th, '91, Mr. Chaplin brought in the *Contagious Diseases (Animals) Bill*, which proposed to give the powers of inquiry recommended by the committee and just referred to. Under the *Contagious Diseases (Animals) Act, 1878*, the Board of Agriculture have power to make general or special orders (amongst other things) for ensuring for animals carried by sea a proper supply of food and water, and proper ventilation during the passage and on landing; for protecting them from unnecessary suffering during the passage and on landing. It was also proposed by the Bill to provide that general orders made under the above provisions should be laid before Parliament. So much opposition to the bill was however manifested that Mr. Chaplin withdrew it, notifying that he would fall back on the powers the department already possessed. Accordingly, on the last day of August, the Board by virtue and in exercise of the powers in them vested by statute, issued the *Transatlantic Cattle Vessels Order, '91*, which is to commence and take effect on Jan. 1st, '92, and is to apply to all vessels in or on which cattle are conveyed across the Atlantic to any port or place in Great Britain. It prescribes the parts of the vessels to be used, makes regulations as to the pens and fittings, amount of space to be allowed, passageways, ventilation, light, food, water, etc., some of which follow pretty closely the recommendations of the committee; and declares that if anything is done, or omitted to be done, in contraven-

tion of the order, the owner and the charterer, and the master of the vessel, shall each, according to and in respect of his own acts or omissions, be deemed guilty of an offence against the *Contagious Diseases (Animals) Act, 1878*.

Transcasian Railway (See former eda.; also *SIBERIAN RAILWAYS*.) From St. Petersburg, July 28th, '91, it was announced that the Government would shortly begin the construction of the first section of the new branch line to connect the Transcasian Railway system with the town of Sarakhs, on the Russo-Persian frontier. The new line will be 325 kilometres in length. In an interesting letter to the *Times*, Aug. 8th, the Hon. G. N. Curzon, M.P., pointed out that Sarakhs is 70 miles from Zulfikar, on the Afghan frontier. The Transcasian Railway, he added, at present extends from Uzun Ada, on the east shore of the Caspian (the terminus is about to be shifted to Krasnovodsk, a much superior port farther to the north) to Samarcand, a total distance of 900 miles. For the first 400 miles it runs in a south-easterly direction, and at the small station of Dushak it turns in a north-easterly direction crossing the sandy desert to Merv and the Oxus. At Dushak the railway is nearest to Meshed, the Persian capital of Khorassan, and to the Afghan fortress of Herat. The Russian frontier, however, now extends far beyond Dushak towards Afghanistan, including Sarakhs and Penjdeh, at one point being within 60 miles of Herat. It is across this belt that the Russians intend to extend their railway system. He describes three proposed schemes, and says the most likely one is to start from the station at Karibent, on the river Tejend (known at Herat as the Heri Rud), and following the river valley to Sarakhs, which is 100 miles from Meshed and 170 from Herat. On one side of the river at Sarakhs the Russians have a military cantonment, and on the other the Persians maintain a small force in a decayed fort. Mr. Curzon is of opinion that when the line is made this "settlement in a desert" will not long remain the terminus; there is a twofold ulterior intent—an extension westward to Meshed and southward to Herat. A Vienna telegram (Sept. 23rd) stated that the extension to Tashkend was to be begun at once.

Transcaucasian Railway. In August '91, according to the *Novoe Vremya*, the direction of the new railway across the main chain of the Caucasus had been decided upon. With the northern terminus at Vladikavkaz on the Caspian (see *TRANS-CASPIAN RAILWAY*), the line will run up the Kambil Valley and over the Um-Bort and Arkhat passes. Proceeding eastwards to the great Georgian military way, it will follow the courses of the Khevsur and Aragva until it meets the Transcasian line from Batoum. There will be two tunnels, one seven versts long and the other eleven. The two highest points will be 4935 ft. and 5180 ft. above the Black Sea level.

Transkelan Territories. A region of eastern South Africa, sometimes called Kaffraria, divided from Cape Colony by the Kei river, from Natal by the Umtafuna and Umzimkulu rivers, and from Basutoland by the Quathlamba mountains. Area about 15,573 sq. m. Consists of a number of small Kafir tribal territories annexed, since 1876, to Cape Colony, or brought under its control. These territories are now grouped into three chief magistracies—Griqua-

land East, Tembuland, and Transkei. There is besides one Protectorate, Pondoland, ruled by its own chiefs, without magistrates. See BRITISH EMPIRE.

Transvaal. An independent Dutch state, officially styled the *South African Republic*. It lies N. of the Vaal river and S. of the Limpopo river. It is bounded W. by Bechuanaland; E. by Portuguese territory; S. by Swaziland, Zululand, Natal, and Orange Free State. Boundaries defined by Convention of London, 1884. Area 121,854 sq. m.; pop. about 610,000, of whom some 62,000 only are whites. Country divided into fifteen districts; capital, *Pretoria*. The Transvaal is ruled by a *President* (Mr. Kruger) elected for five years, with a Council of four members. Legislation is effected by a *Volksraad* of forty-four members, one-half retiring every two years. Revenue ('89) £1,382,661; expenditure, £1,030,890; debt, £436,255. Exports of wool, cattle, hides, grain, ostrich feathers, ivory, butter, gold, etc., £900,000; imports ('88), £3,784,830, and more smuggled.—'91. From Jan. 1st letter postage to England was reduced to 4d. per half-ounce. In September a Church Conference met at Pretoria to settle the disputes between the three Dutch Church sections. In '90 the revenue from the goldfields amounted to £581,992. For President, etc., of Republic, see DIPLOMATIC.

Treason-Felony Prisoners. See SESSION, sect. 43.

Treasury. The Lord High Treasurer, who, when existing, is the third great officer of State, had of old the appointment of all officers employed in collecting the revenues of the Crown, the nomination of all escheaters, and the disposal of all plans and ways relating to the revenue; and power to let leases of Crown lands. This definition of his powers and duties still holds good, to a great extent, in regard to the Treasury Board; although the management of the Crown lands has long since passed into the hands of the Commissioners of Woods and Forests. The Treasury has control over the management, collection, and expenditure of the public revenue (see FINANCE), and exercises a general supervision and control over all the public departments, and no increase of salaries or additions to or material changes in the civil establishments can be made without its authority. All exceptional cases in matters of revenue are referred to it, and it settles all questions regarding the amount of compensations, allowances, and pensions to be awarded in exceptional cases. It audits the civil list, and is the accounting department to the House of Commons for a number of civil service votes, including those for rates on Government property, secret service, criminal prosecutions, revising barristers, learned societies, suppression of the slave trade, subsidies to telegraph companies, and for temporary commissions. All money bills of the London County Council are submitted to it, and if approved are introduced by one or other of its representatives in the House of Commons. Since the days of George I., the powers and duties of the office of L. H. T. have been invariably executed by commissioners, consisting of the First Lord of the Treasury, the Chancellor of the Exchequer, and three Lords Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, has no share in the management of the department; but some minor duties, such as recommending for Civil List Pensions,

appertain to his position. A number of appointments are in his gift, and he is an *ex-officio* trustee of the National Gallery and British Museum. For nearly eighty years prior to 1835, the office of First Lord was invariably held by the Prime Minister of the day. The departmental duties of the three junior lords are almost nominal. The Patronage Secretary to the Treasury is principal Government whip (see COMMONS), but he does little more in the department than nominate a few postmasters. The commissioners forming the Treasury Board seldom if ever meet; and in fact the real work of the department is performed by the Chancellor of the Exchequer, who is its effective head, aided in matters of detail by the Financial Secretary, and the Permanent Secretary (Sir R. Welby, K.C.B., salary £2500). The Chancellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and upon the figures before him he prepares and introduces his budget; appointments in the National Debt Office are in his gift, and not only questions affecting public revenue and expenditure, but the National Debt, and the best methods of reducing it, and the advances made by the National Debt Commissioners for local loans are all matters within his special cognisance (see FINANCE). He is master of the Mint, and he presides at the nomination of sheriffs. Like the First Lord of the Treasury, he is provided with an official residence at Downing Street. In connection with the Treasury there is a Parliamentary counsel who drafts Government Bills, and a solicitor who acts for the Government in certain legal prosecutions, and is the Crown's nominee when Her Majesty becomes entitled to the personal estate of an intestate, and administration is granted by the court; and who is also Queen's Proctor for Divorce Interventions and Director of Public Prosecutions.

Trent and Mersey Canal Development. This scheme (briefly referred to in our last ed.) took the form of a parliamentary notice for the session '90-91. The North Staffordshire Railway Company sought powers to widen and deepen their Trent and Mersey navigation and other canals, constructing eleven new locks; to acquire land on the route from Stoke in Staffordshire to Middlewich and Davenham, Cheshire; and to stop the towing-path in the Harecastle tunnel vessels to be towed through the "long tunnel." The idea is to open up deep-water communication between the Cheshire shore of the Mersey and the Potteries.

Trent Valley (Canada) Canal. On April 21st, '91, a deputation arrived at Ottawa to urge the Government to adopt the construction of this canal, the object being to connect Georgian Bay with Lake Ontario, at an estimated cost of over a million sterling. The distance between bay and lake is 197 miles, and there is a series of waterways and small lakes, leaving only 58 miles of excavation. If the work be carried out, the distance between Duluth and Chicago would be shortened by 300 miles. (See ST. LAWRENCE, OHIO, and LAKE ERIE CANALS.)

Trevelyan, The Rt. Hon. George Otto, Bart., P.C., M.P., D.C.L., was b. 1838; ed. Harrow, and Trin. Coll., Camb.; represented Tynemouth '65-8, and commenced his official parliamentary career in '69, as Lord of the Admiralty; and, in Mr. Gladstone's ministry,

became Sec. to the Admiralty ('80-82). After holding the office of **Chief Sec. for Ireland**, Sir George was appointed Chancellor of the Duchy of Lancaster (with a seat in the Cabinet) in '84, and held the office of **Sec. for Scotland** for a month in '86. Sir George, being unable to agree with Mr. Gladstone's Irish policy, resigned his position in the Government (March '86); but on the conclusion of the **Round Table Conference**, at which he represented the Unionist party, he announced that his opposition to the points of disagreement with regard to the **Home Rule** movement had been overcome, and he rejoined his colleagues on the Front Opposition bench, re-entering the House, after defeat at his old constituency of Hawick District, as member for the **Bridgeton Division of Glasgow** (Aug. '87). Sir George has gained considerable distinction in the world of letters by his "**Life of Lord Macaulay**," his uncle. He is also the author of some humorous poetry, entitled "**The Ladies in Parliament**."

Triple Alliance, England and the. See **Session, sect. 44.**

Truro, Rt. Rev. John Gott, Lord Bishop of. See founded in 1877, with an income of £3000. His lordship, the third bishop, was b. in '46, and was ed. at Brasenose Coll., Oxon, whence he graduated B.A. '53, and received D.D. in '73. Ordained '57, and became curate of St. Nicholas, Great Yarmouth, afterwards holding the incumbency of St. Andrew, Great Yarmouth. Appointed perpetual curate of Bramley, Leeds, in '66, and vicar of Leeds in '73. Became Dean of Worcester in '86, and Bishop of Truro June '91. Is the author of "**The Parish Priest of the Town**." Was consecrated in St. Paul's Cathedral on Sept. 29th, and enthroned in Truro Cathedral on Oct. 28th.

Trustees. (For definition of responsibilities and duties of trustees see previous eds.)—**Law on, in '91.** It was held (*In re Dick*, Court of Appeal, Jan. 16th, '91) that trustees who had no authority under the will to vary investments were nevertheless empowered by the Trust Investment Act '89 to sell out existing investments for the purpose of investing the proceeds under that Act, such existing investments being investments authorised by the Act. It was held that the words giving power "from time to time to vary any such investment" (section 3) applied not merely to investments under the Act, but to all investments referred to in the section. On the other hand, it was held (*In re Othwaite*, Chancery Division, July 23rd, '91) that the power given to trustees to invest in the securities mentioned in the Act does not include a power for the trustees to set apart and appropriate any of the securities for the purpose of providing an annuity given by the will, so as to enable the trustees to divide the rest of the testator's estate.—Where a trustee in bankruptcy elects to defend an action, and appears at the trial, an order may be made against him personally for the payment of costs. It is not necessary that an order should be obtained making the trustee a party, if he of his own free will makes himself such (*London School Board v. Wall*, Court of Appeal, June 3rd, '91).—In the case of *Low v. Bouverie* (Court of Appeal, July 11th, '91) the defendant was the trustee of a fund in which his brother, Vice-Admiral Bouverie, had a life interest. In '88 the brother applied to Mr. Low to advance him the sum of £600 on the security of this interest. Mr. Low's solicitors wrote to

Mr. Bouverie, the trustee, to inquire about the trust fund, and as to whether any money had already been advanced upon it. Mr. Bouverie replied that the sum was charged with interest on certain policies, but that he himself held no mortgage upon it. The £600 was thereupon advanced to Vice-Admiral Bouverie by the plaintiff's solicitors. It turned out, however, that money had been several times previously advanced upon the same property, and that Mr. Bouverie, as trustee, had had notice though those facts were not in his mind when he gave the answers above referred to. As a matter of fact, the prior charges exhausted Vice-Admiral Bouverie's interest in the fund, and there was nothing left out of which Mr. Low could recover the £600. He accordingly claimed it from the defendant, Mr. Bouverie; but it was held that trustees can only be made to pay damages for an erroneous statement if it has been made fraudulently. Judgment was therefore given for the defendant.

Trusts, Charitable. See **Session, sect. 52.**
Tuberculosis, Royal Commission on. The following members compose this Commission: **Chairman**, Rt. Hon. Lord Basing; **Prof. G. T. Brown**, Dr. Geo. Buchanan, Dr. J. F. Payne, Prof. Burdon Sanderson. **Sec.**, C. L. Hudson, Whitehall Place.

Tunis. One of the Barbary States of Northern Africa, lying east of Algeria. Capital, **Tunis**, pop. 150,000. For Prime Minister, etc., see **DIPLOMACY.**

Upper, Sir Charles, Bart., G.C.M.G., C.B., D.C.L. (Cantab.), High Commissioner for Canada in London, was b. at Amherst, Nova Scotia, July 1821. Was ed. in Edinburgh for the medical profession, and was the first President of the Canadian Medical Assoc. Entered politics, and became **Prime Minister** of his native province ('64-7). Is a strong advocate of confederation, and wrote a "Letter to the Earl of Carnarvon on the Union question" in '66. Became **Cabinet Minister** of the Dominion ('70), and held office with Sir John Macdonald till '73; was one of the leaders of the Conservative Opposition till '78, when he was again appointed minister. As **Minister of Railways** he took the chief part in advocating throughout Canada the construction of the Canadian Pacific Railway, and took charge of the measure in parliament. To his eloquence and energy is largely due the speedier prosecution of that work. Received his present appointment in '84. Accompanied Mr. Chamberlain to Washington as Canadian representative during **fishery negotiations** in '88, and for his services was created a **baronet**. Took a prominent part in the Canadian political struggle of Feb. '91. Wrote an article on "**Federating the Empire**" in the *Nineteenth Century* for October.

Turf, The. (For early history of horse-racing, the constitution of the Jockey Club and Grand National Hunt Committee see previous editions.) The present **stewards of the Jockey Club** are Prince Soltykoff, Mr. J. H. Houldsworth, and Lord Durham; and the following gentlemen form the committee of Tattersall's subscription room:—The Duke of Beaufort, K.G., Duke of Montrose, K.T., Earl of Zetland, Lord Calthorpe, Lord de L'Isle and Dudley, Earl of March, Marquis of Londonderry, Lord Gerard, Sir Robert Peel, Prince Soltykoff, Sir George Chetwynd, Colonel Robert Baring, Mr. Daniel Cooper, Colonel Fludger, Mr. G. E. Paget, Mr. C. Perkins, Mr. W. M. Redfern, Mr.

E. Clay Ker Seymour, and Major Gilbert Stirling. The flat-racing season of '91 opened at Lincoln on March 16th, but it will be convenient to give precedence to the five great three-year-old contests of the year, these being the Two and One Thousand Guineas, the Derby, the Oaks, and the St. Leger. The two former were run over the Rowley Mile at Newmarket, the **Two Thousand Guineas** (in reality worth £4250), being decided on Wednesday, April 29th, and the **One Thousand** (worth £4050) on the following Friday. For the former event, confined to colts, there were nine runners, and M. Blanc's Gouverneur started favourite at 5 to 4 agst., but he ran unplaced to Lord Alington's Common (9 to 1 agst.), Mr. J. H. Houldsworth's Orvieto and Lord Durham's Peter Flower. The winner, a brown colt by Isomy—Thistle, won by three lengths in 1 min. 47 sec. The **One Thousand Guineas** restricted to fillies, brought out a field numbering twelve, and Mr. Douglas Baird's Siphonia was in strong request at 2 to 1 agst., but only succeeded in finishing third to Mr. Noel Fenwick's bay filly **Mimi** (by Barcadine—Lord Lyon mare), and Mr. D. Cooper's Melody. The winner started at 7 to 1 agst., was ridden by Rickaby, and covered the distance in 1 min. 44½ secs. The Derby, the great event of the year, which annually draws close upon half a million visitors to Epsom Downs, was established in 1780, the first winner being a chestnut colt named **Diomed**, belonging to Sir Charles Bunbury; but the conditions ruling the contest have, like those of the St. Leger, materially changed since its institution, as will be seen on reference to the particulars supplied in the ed. of '88. Owing to the decisive style in which he won the Two Thousand Guineas, **Common** was made favourite for the Blue Riband of the Turf, which was run on May 27th, odds of 11 to 10 being laid on his winning; agst. Dorcas 10 to 1 was offered, Gouverneur on this occasion starting third in request at 100 to 9. The favourite beat Gouverneur easily by two lengths, whilst Martenburst (a 50 to 1 chance) was a bad third, with The Deemster and Cattlestone close up; Orion was sixth, Old Boots seventh, the remaining competitors being Fitz-Simon, Peter Flower, and Simonian. The winner covered the distance (about 1½ miles) in 2 min. 56½ secs., and the value of the stakes amounted to £5510. The list of Oaks winners is headed by Bridget, a filly which carried the colours of the same Earl of Derby who instituted the Derby Stakes a year later; and the only differences between the races are, that the Oaks is restricted to fillies, which are apportioned 8st. 10lb. each—or 4lb. less than colts now carry in the Derby—and that whereas the latter is run for on Wednesdays, the Oaks is fixed for Fridays. On the latest anniversary, when the value of the stakes reached £4405, there were only six starters, and mindful of her easy win in the One Thousand Guineas, the admirers of **Mimi** laid 7 to 4 on her again proving successful, 7 to 2 being wagered against Lord Rosebery's Corstorphine, and 100 to 7 against Baron Rothschild's Haute Saone. **Mimi**, again ridden by Rickaby, won in a canter by four lengths from Corstorphine, Lady Primrose (a 50 to 1 chance) being third; Sabra was fifth and St. Kilda last. The winner's time was 2 min. 5½ secs. Immense excitement was evinced in the St. Leger (£4200), which was run for at Doncaster on Sept. 9th, over a distance of

1 mile 6 furlongs and 132 yards, the meeting between the Derby and Oaks winners and Révérend (who since running at Epsom had won the valuable Prince of Wales' Plate at Leicester and the Prix de Deauville at Paris, and had also run second to Clamart in the Grand Prix de Paris) being looked forward to with the greatest interest, and several hundred thousand persons were present on the historic Town Moor on the eventful afternoon. Odds of 5 to 4 were laid on **Common**, 5 to 1 was offered agst. **Mimi**, and 11 to 2 agst. Révérend. The last named made most of the running, but when called upon **Common** dashed to the front, and won by a length in 3 min. 14½ secs., thus following in the footsteps of West Australian, Gladiator, Lord Lyon, and Ormonde, and securing the triple crown. In each of the three races he was ridden by George Barrett, and a little later his joint owners (Lord Alington and Sir Frederick Johnstone) disposed of him to Mr. Blundell Maple for £15,000, the highest price ever paid for a three-year-old in this country. The latter gentleman was subsequently offered £20,000 for the colt on behalf of a Vienna syndicate, but the offer was declined, and negotiations which, it was hoped, would have led to a match between **Common** and Queen's Birthday unfortunately fell through. As may be conjectured, Révérend was second in the St. Leger, but Colonel North's St. Simon of the Rock, another 50 to 1 chance, was third, with Bosphorus (the hope of north-country sportsmen) fourth, **Mimi** fifth, Orvieto sixth, Patrick, Blue seventh, Cattlestone eighth, and Admiral last. The **Prix du Jockey Club** (the French Derby) was won by Ernak, and the **Prix de Diane** by Primrose, a filly named Primrose, singularly enough, being second out of 16 runners. As already intimated, the flat-racing season opened at Lincoln on March 16th, and the green curtain only fell upon the closing scene at Manchester on Nov. 22nd; but many sportsmen deem it more prudent to commence with the Craven fixture at Newmarket, and finish with the Houghton gathering at Turf headquarters. Appended is a brief *résumé* of the leading events of the many programmes comprising the year's list of fixtures under Jockey Club rules, taken, as nearly as possible, in the order of their decision: At Lincoln, the Bathany Plate fell to Charm, the Brocksley Stakes to Katherine II., and the Lincolnshire Handicap, with 21 runners, to Lord George (3yrs., 8st., 100 to 9 agst.), Seraphine II. coming next, and Nunthorpe third; at Liverpool, Scarborough won the Molyneux Stakes, High Havens the Union Jack Stakes, De Beers the Prince of Wales' Handicap, Clarence the Sefton Park Plate, and Lady Rosebery (6yrs., 9st., 100 to 8 agst.) the Spring Cup, Peacebearer being second, and St. Thomas third; at Hurst Park, the Inauguration Plate fell to Rough and Ready, the Hampton Court Plate to Crime, and the Spring Handicap to Old Coin; at Gosforth Park, the Newcastle Spring Handicap was won by Sedge Chat; at Northampton, Rotton secured the Earl Spencer Plate, Bouthillier the Althorp Park Stakes, and Lusignan the Northamptonshire Stakes; at Leicester, the Spring Handicap fell to Court Baron, the Excelsior Breeders' Foal Stakes to Glenayes, and the Portland Stakes to Flyaway; at Epsom, King of Diamonds was credited with the Great Surrey Handicap, Rejected with the Spring Cup, Ragimunde (3yrs., 6st. 7lb., 4 to 1 agst.) with

the Great Metropolitan Stakes, and Nunthorpe (5yrs., 8st. 4lb., 25 to 1 agst.) with the City and Suburban, for which there were 15 starters; and at **Sandown Park**, Pierrette took the Esher Stakes, Euclid the Two-year-old Walton Plate, and Burnaby the Sandown Handicap. At the **Newmarket Craven Meeting**, the Crawford Plate (named in memory of the respected owner of Craig Millar and Sefton, which respectively won the St. Leger of '75 and the Derby of '78) fell to Dearest, the Fitzwilliam Plate to Suspender, the Babraham Plate to St. Dunstan, and the Craven Stakes to Friar Lubin; at **Derby**, Bouthillier took the Budbury Stakes, and Workington the Doveridge Handicap; at **York**, the Great Northern Handicap was awarded to Loricula; Rejected was successful in the Somersetshire Stakes at Bath; and at **Doncaster** the Spring Handicap was won by Sabra. At **Newmarket**, the First Spring Two-year-old Stakes fell to Palisandre, the Hastings Plate to Friar Lubin, the March Stakes to Amphion, and Circassian beat Benburb in the race for the Challenge Whip, over a distance of 4 miles 1 fur. and 177 yards—the longest race of the year on the flat; at **Chester**, the Trades Cup was won by Vasistas (5yrs., 8st. 3lb., 9 to 4 agst.), and the Great Cheshire Handicap by Screech Owl; at **Kempton Park**, Windgall took the Spring Two-year-old Plate, and Nunthorpe (5yrs., 9st., 100 to 7 agst.) defeated 18 opponents in the Great Jubilee Handicap, value £2650. At **Newmarket** Priestess won the Somerville Stakes, Windgall the Breeders' Plate, Pinzon the Handicap, Mimi the Stakes (value £3825), Desdemona the Two-year-old Plate, and Fitz-Simon the Payne Stakes; at **Kempton Park**, Bel Demonio secured the Empress Plate; at **Manchester**, Court Dame was credited with the Hartington Plate, Workington with the Salford Borough Cup, Lady Hermit with the Breeders' Foal Stakes, El Diabolo with the John o' Gaunt Plate, Imp with the De Trafford Handicap, Rucl with the Two-year-old Whitsuntide Plate (value £2740), and Lily of Lumley (5yrs., 7st., 100 to 8 agst.) with the Handicap (value £2070); and at **Epsom** the Woodcote Stakes fell to Bonavista, the Stanley Stakes to Smew, the Royal Stakes to Sabrina, the Great Surrey Breeders' Foal Stakes to Lady Hermit, the Grand Prize (value £2120) to Benvenuto, and the Acorn Stakes to Lorette. At "**Royal Ascot**," which opened on June 9th, the Thirty-fourth Biennial Stakes fell to Knockany, the Prince of Wales's Stakes (value £2425) to Melody, the Ascot Stakes to Houndsditch (5yrs., 7st. 9lb., 11 to 2 agst.), the Coventry Stakes to Dunure, the Gold Vase to Mons Meg, the Thirty-seventh Triennial to Grand Prior, the Thirty-ninth Triennial to Polyglot, the Ascot Derby to St. Simon of the Rock, the Royal Hunt Cup to Laureate II. (5yrs., 7st. 12lb., 33 to 1 agst., Rathbeal being second and Breach third), the Coronation Stakes to Cereza, the Thirty-third Biennial to Henry VIII, the Fern Hill Stakes and Twenty-ninth New Biennial to Humptious, the Gold Cup to Morion, the New Stakes to Goldfinch, the Rous Memorial to Amphion, the Twenty-eighth New Biennial to Surefoot, the Wokingham Stakes to Rathbeal (4yrs., 7st. 10lb., 9 to 2 agst., Le Nord being second and Ram Lal third), the Alexandra Plate to Gonsalvo, the Windsor Castle Stakes to Lorette, the Hardwicke Stakes to L'Abbesse de Jouarre, and the Thirty-eighth Triennial to Peter Flower. At **Windsor**, Brucee won the Athens Plate and Idlesleigh the Summer Han-

dicap; at **Sandown Park**, Peter Flower was awarded the Electric Stakes, Yard Arm the Summer Handicap, and Galeopsis the British Dominion Two-year-old Stakes; Narraghmore was successful in the Irish Derby at the **Ourragh**; at **Newcastle**, Bosphorus took the North Derby (11 to 2 agst., Sarawak being second and High Havens third), Queen's Birthday the Northumberland Plate, and Persistent the Seaton Delaval Stakes; at **Stockbridge**, the Champagne Stakes were credited to the filly by Charibert—Court Beauty, the Hurstbourne Stakes to Lady Hermit, and Amphion walked over for the Stockbridge Cup; the Inauguration Plate at **Portsmouth Park** was secured by Pierrette, and the Grand Prize by Rotten Row; at **Carlisle**, the Cumberland Plate was accorded to Alice; at **Newmarket**, the July Stakes fell to Flyaway, the Zetland Plate to Versifier, and the Stud Produce Stakes to St. Damien; at **Hurst Park**, Springtime was victorious in the Prince of Wales' Plate; and at **Leicester**, Broad Corrie took the Zetland Plate, Simonian the Midland Derby (5 to 1 agst., Barbatiello being second and Punster third), Mavourneen the Summer Handicap, and Révérend the Prince of Wales' Stakes (value £5047, Deemster being second and Orvietto third). On July 10th, at **Sandown Park**, was decided the Eclipse Stakes, one of the most valuable races of the season, and which on this occasion was worth £11,075, and relying on his Two Thousand Guineas and Derby form, backers were content to lay 2 to 1 on Common, notwithstanding that the opposition consisted of such speedy animals as Surefoot, Gouverneur, Orion, Rathbeal, Memoir, Le Nord, Alloway, and Fuse. The latter made the running for Common, but evidently at too slow a pace, and the finish was fought out between Surefoot and Gouverneur, the former gaining the verdict by a short head after a magnificent and exciting struggle, the favourite being third. The distance was 1 mile 2 furlongs, and the winner's time 2 min. 15 secs. At the same meeting Worldly Wise won the Royal Handicap, and Lady Caroline defeated a dozen opponents in the National Breeders' Produce Stakes. At the **Newmarket July Fixture** the Dullingham Plate was awarded to Patrick Blue, the Exeter Stakes to Palatine, the Midsummer Plate to Orvietto, the Chesterfield Stakes to La Fleche, the July Cup to Memoir, and the Fulbourne Stakes to Petrovna; at **Kempton Park**, Galeopsis was successful in the Grand Two-year-old Stakes, and Ram Lal in the Victoria Cup; at **Liverpool**, the St. George Stakes went to Simonian, the Molyneux Cup and Croxeth Plate to Ratton, the Mersey Stakes to Backbiter, the Knowsley Dinner Stakes to Bracken, the Great Lancashire Breeders' Produce Stakes to Lady Morgan, and the Cup to Rathbeal (4yrs., 8st. 12lb., 6 to 4 agst., St. Benedict being second and Burnaby third); and the Norfolk and Suffolk Stakes at **Yarmouth** were credited to Elopement. At "**Glorious Goodwood**," Unicorn (3yrs., 6st. 12lb., 12 to 1 agst., Cuttlestone being second and Warlabey third) won the Stewards' Cup, County Council the Ham Stakes, Orme the Richmond Stakes, Cinderella the Gratwicke Stakes, White Feather (3yrs., 6st. 10lb., 100 to 15 agst., Barmecide being second and Vasistas third) the Goodwood Stakes, Orvietto the Sussex Stakes, La Fleche the Lavant Stakes, Sir Hugo the Rous Memorial, Gonsalvo the Goodwood Cup, Orme the Prince of Wales' Stakes (value £2800), and

Haute Saone the Nassau Stakes. At Brighton, Hear Hear secured the Marine Plate, Westminster the Iligh-weight Plate, and Veau d'Or the Stakes; and at Lewes, where the "Sussex fortnight" was brought to a close, Gossoon defeated thirteen opponents in the Astley Stakes, and Lady Rosebery secured the Handicap. At Kempton Park the International Breeders' Two-year-old Stakes fell to Flyaway, the City of London Breeders' Foal Stakes to Bumptious; at Redcar Grammont was successful in the Great National Breeders' Foal Stakes; at Windsor, Halsbury took the Berkshire Plate, and Lady Lena the Curlew Plate; at Paisley Dazzle was credited with the "Silver Bells"; at Stockton Wynyard was victorious in the Wynyard Plate, Cardrona in the Hardwicke Stakes, Bosphorus in the Great Northern Leger, and Rosebery Despatch in the Handicap; and at Leopardstown, Calamity was awarded the International Produce Stakes. At York the Prince of Wales's Plate fell to El Diablo, the Lonsdale Stakes to Lightfoot, the Yorkshire Oaks to Charm, the Convivial Produce Stakes to Silvermint, the Great Ebor Handicap to Buccaneer, the Ebor St. Leger to Rousseau, the Gimcrack Stakes to Therapia, and the Great Yorkshire Stakes to Orvieto; at the Curragh, Crystabelle won the Anglesey Stakes; at Derby, the Champion Breeders' Foal Stakes went to Barracouta, the Peveril of the Peak Plate to Trapezoid, the Harrington Stakes to Earl of Annandale, the Breeders' St. Leger to Dorice, and the Devonshire Nursery to Task; at Doncaster Morebattle won the Fitzwilliam Stakes, La Fleche the Champagne Stakes, Alloway the Great Yorkshire Handicap, Workington the Cleveland Handicap, Pilot the Tattersall Sale Stakes, Bracken the Alexandra Plate, Tostig the Portland Plate, Gossoon the Rous Stakes, Westminster the Westmoreland Plate, Croza the Park Hill Stakes, Huntingdon the Prince of Wales's Nursery, Queen's Birthday the Doncaster Cup, and Orvieto the Doncaster Stakes; at the Western Meeting (Ayr), Progression was credited with the Nursery Plate, Alice with the Ayrshire Handicap, and Dazzle with the Gold Cup; at Leicester Navarro was successful in the Midland Nursery, and Rusticus (5yr., 7st., 33 to 1 agst.) defeated Victorious, Enniskillen, and nine others in the Leicestershire Royal Handicap of £5347; and at Manchester Falsandre won the Lancaster Nursery, Ralph Neville the De Trafford Handicap, Navarro the Gerrard Nursery, Scarborough the Breeders' Foal Stakes, Evil Eye the September Handicap, and Signorina (6 to 1 agst.) the weight for age Lancashire Plate of £8971, Orme being second, and Martagon third. At the Newmarket First October Meeting Sir Hugo was first in the Boscawen Stakes, Adoration in the Buckenham Stakes, Patrick Blue in the Great Foal Stakes, Ragimunde in the Forty-third Triennial Produce Stakes, John Morgan (4yrs., 7 st., 10 to 1 agst.) in the Great Eastern Railway Handicap, St. Angelo in the Hopeful Stakes, Posy in the Seventh Zetland Stakes (for two-year-olds), Mimi in the Sixth Zetland Stakes (for three-year-olds), Broad Corrie in the Forty-fourth Triennial, Dearest (4yrs., 7st. 2lb., 10 to 1 agst.) in the October Handicap, Henry VIII. in the Grand Duke Michael Stakes, El Diablo in the Rutland Stakes, Galeopsis in the Rous Memorial Stakes, and Orvieto in the Newmarket St. Leger Stakes. At Hurst Park, Heremon

secured the Imperial Plate; at Gatwick Meeting, which takes the place of the old Croydon fixture, and was opened on Oct. 7th, Queen of the Florin won the Surrey Nursery, Inverkeithing the Horley Handicap, Admiral Benbow the Charlwood Handicap, Falsandre the Montefiore Stakes, and Catarina the Gatwick Handicap; and at Kempton Park Gantlet defeated a dozen opponents in the Great Breeders' Produce Stakes of £5000, and Euclid beat fourteen rivals in the Champion Nursery Handicap. At the Newmarket Second October Meeting the Lowther Stakes fell to Blue-Green, the Clearwell Stakes to Gantlet, the Champion Plate to Orion, the Newmarket Oaks to Ramelton Lassie, the Autumn Handicap to Catarina, the Severals Plate to Suspender, the Cesarewitch Stakes (2 miles 2 furlongs 85 yards) to Ragimunde (3yr., 6st. 10lb., 25 to 1 agst., Penelope being second, and Lily of Lumley third), the Middle Park Plate to Orme (who was followed home by El Diablo and Gantlet), the Newmarket Derby to Orvieto, the Rose Plate to Star, the Prendergast Stakes to Priestess, and the Thirteenth Challenge Stakes to Sir Frederick Roberts. At Newcastle the Northumberland Autumn Plate was won by Dare Devil; and at Sandown Park the Great Sapling Stakes were credited to the colt by Galliard—Mother Superior, and the Autumn Handicap was won by Golden Maze. At the Newmarket Houghton Meeting the Criterion Stakes fell to Mortgage, and the Cheveley Stakes to Carmilhan. Comedy (3yrs., 7st. 3lb.) started at 7 to 1 agst., in a field of twenty-nine for the Cambridge-shire, and won by half a length from Breach, with Derelict third. Ibbett, the rider of Comedy, was called before the stewards to explain the running of the mare at Ascot and Derby, and after fully investigating the matter, they found "that there was not sufficient evidence to disqualify Comedy for the Cambridge-shire." The Dewhurst Plate was won by Orme, the Old Cambridgeshire Free Handicap by Coromandel, the Jockey Club Cup by Patrick Blue (Lord Hartington's Morion being disqualified for crossing), and the green curtain was lowered on the flat-racing season at headquarters with the victory of Lord Durham's Lunette in the Criterion Nursery on Oct. 20th. At Lincoln the Great Tom Stakes fell to Dare Devil, and the Autumn Handicap to Shrine; Veau d'Or won the Lewes Handicap; and at Liverpool the Sixty-second St. Leger was credited to Bracken, the Knowsley Nursery to Clarence, the Autumn Cup to Madame d'Albany, and the Great Lancashire Stakes to Gavotte. At Derby, Bouthillier won the Chesterfield Nursery, The Smew secured the Doveridge Stakes, and Bar-le-Duc defeated twenty-one opponents in the Osmeaton Nursery. Towards the close of the year a syndicate was formed for the re-purchase of Ormonde, the triple-crowned hero of '86, the price paid Senor Boucau, of Buenos Ayres, being £35,000. This famous racehorse will be located at the Marden Deer Park stud. Turning to the cross-country season, the chief event is the Grand National Steeplechase, run for over a course of about 4½ miles at Aintree, near Liverpool, and the race of March 20th, '91, ended in favour of Come Away (aged 11st. 12lb., 4 to 1 against, ridden by Mr. H. Beasley), Cloister being second, and Flex (the winner of '90) third. There were twenty-one runners; the value of the stakes was £1680; and the winner's time was 9 min. 58 sec.

At the same meeting Carlsbad won the Challenge Hunt Steeplechase, Oxton the Eleventh Hunt Steeplechase, and Roman Oak the Eleventh Champion Steeplechase. At Derby Sir Herbert defeated seven opponents in the Full Cry Steeplechase; at Manchester, the Lancashire Steeplechase was awarded to Why Not, the Jubilee Handicap Hurdle Race to Dornoch (who also won the Grand National Hurdle Race at Croydon), and the Hunter's Steeplechase to Bloodstone; at Sandown Park the Mammoth Hunters' Steeplechase of £103 fell to Bloodstone (ridden by Captain E. R. Owen), the Grand International Steeplechase to The Sikh, and the Great Sandown Hurdle Race to Maypole; and at Leopardstown Roman Oak (ridden by Captain Owen) won the Irish International Steeplechase. The annual House of Commons Point-to-point Steeplechase was decided on March 21st, over a line of country behind the village of Staverton, near Daventry, and a neighbouring height formed a natural stand from which the whole of the race could be witnessed. The conditions guiding this contest were as follows: For maiden hunters, *bona fide* the property of and regularly hunted that season by members of the House of Commons, and which were in their possession on or before March 1st, '91; to be ridden by members of the House of Commons, in proper hunting costume; about 3½ miles. Mr. A. E. Pease came in first in the 12st. class on his grey mare Norah Creina, Mr. Hermon Hodge being second on Lady Evelyn, and Mr. Elliott Lees third on Damon. The other competitors in this class were Mr. Bromley-Davenport's Delilah, Mr. Bromley-Davenport's Dawtry (ridden by the Marquis of Carmarthen), Lord E. Hamilton's Bridget, and Sir S. Crossley's Borderer. In the 14st. class Lord H. Bentinck came in first on his brown gelding Bugler, Mr. W. H. Long being second, on Crusader, and Mr. P. A. Muntz third and last on Landmark. To the disappointment of a large number of people the Shrewsbury-Lonsdale match, fixed for March 9th, terminated in Lord Shrewsbury paying forfeit. The affair arose out of a conversation amongst a shooting party assembled at Ingestre in the previous November, as to the merits of trotting *versus* galloping, and which led to the wager of the nominal sum of £100 being made between Lord Shrewsbury and Lord Lonsdale. The course was to be twenty miles, equally divided between the four different styles of driving—*vir.*, four-in-hand, pair, single, and postilion. Mr. Arthur Coventry was appointed referee, and each competitor was to drive his own team. After several roads had been discussed, Lord Lonsdale chose a fairly level stretch on the Great North Road, while Lord Shrewsbury's choice was a road on the borders of Sussex, close to where his horses were being trained. The referee, probably thinking that either was good enough, decided for the latter, as being the nearer to London. Various delays occurred through unfavourable weather, and Lord Shrewsbury, after some little unpleasantness with reference to the wording of a telegram sent him by Lord Lonsdale, declined to go on with the match. As vast sums of public money had been wagered about the 20 miles being covered in one hour, Lord Lonsdale decided to go the course and make the best record in his power. This he did on the morning of the 11th, after the road had been cleared by a gang of men and a snow-plough,

and amid tremendous excitement his lordship covered the distance in 55 min. 30 secs.—a record that will not easily be lowered, and one of the finest performances in the history of sport. About this period the stewards of the Jockey Club, assisted by Messrs. Lumley, their solicitors, closed their investigation into the so-called "Jockey Ring" to a close, with the result that they declined to grant a renewal of some licenses, and warned other jockeys and some professional backers off Newmarket Heath. Towards the close of March, Mr. A. A. Hopkins, one of the Metropolitan police magistrates, who had been selected as referee in the actions of "Goater *v.* Godfrey," and "Godfrey *v.* Goater and Craven," issued his award. The actions arose in the first instance out of the Cesarewitch victory of Primrose Day in '89. Mr. Godfrey was indebted to his trainer, and eventually an arrangement was entered into whereby Goater, in co-operation with Mr. W. G. Craven was to run Mr. Godfrey's horses for the benefit of the latter gentleman's estate, and with a view to clearing off his liabilities. Disputes arose, followed by litigation, and the matter being referred to Mr. Hopkins, that gentleman went through all the facts and figures, and found that the amount due from Mr. Godfrey to Goater was £593 1s. 7d. including training expenses and bill of exchange. Mr. Godfrey was also adjudged to pay £174 12s. to Mr. Craven for keep of horses. Upon his counter-claim Mr. Godfrey established damages against Mr. Craven for £156 1s. 10d., and against his trainer for £750. Having thus calculated his figures, the referee inflicted the whole costs of claim, counter-claim, trial, and reference upon Mr. Godfrey. The stud to be delivered to Mr. Godfrey upon payment by him of the amount of the award within fourteen days. A motion for further reference was made in the Queen's Bench Division by Mr. Godfrey, but this was dismissed. Another *cause célèbre* was that in which Lord Penrhyn sued Mr. Gale, of the *Licensed Victualler's Mirror*, for libel, which it was alleged imputed dishonesty on the part of those entrusted with the management of his lordship's horses, the remarks complained of arising out of the in-and-out running of Noble Chieftain and other animals in the same stable. Eventually all imputations were withdrawn, and, on a sum of money (£100) being paid by the defendant to a charitable institution, a juror was withdrawn. In London there are two sporting daily papers: the *Sportsman*, edited by Mr. S. Downing, the article signed "Vigilant" being written by Mr. H. Smurthwaite; and the *Sporting Life* (with which is incorporated *Bell's Life*), editor, Mr. Lowe. The *Sporting Chronicle* is published daily at Manchester; the leading weekly journal devoted to sport is *The Field* (editor, Mr. F. Tomes), and another high-class weekly sporting paper is *The Horse-breeder*, edited by "Beacon."

Turkestan. From Central Asia, or what was formerly known as Independent Tartary, Russia has formed two provinces—Turkestan and Transcaspiæ. The former comprises the khanates and deserts annexed by Generals Tcherniaeff and Kaufmann between '60 and '75. Area about 408,086 sq. miles, with 3,124,848 inhabitants. The principal town is Tashkent (pop. 100,000); Bokhara and Khiva are under the control of a Governor-General. The old military road from Orenburg to Tashkent is now abandoned, reinforcements and stores being sent to Turkestan

from the Caspian to Samarcand by railway. —**Turkestan, Afghan.** Is an Afghan province north of the Hindoo Koosh, consisting of 70,000 sq. m., and a population, mostly non-Afghan (Uzbek), of nearly 1,000,000. Principal town, **Masarr-i-Sherif** (pop. 25,000), near the ruins of ancient Balkh. (For history see previous editions). —**Turkestan, Eastern.** China's westernmost province, formerly known also as **Kashgaria**, a state established by the rebel Mussulmans under Yakoub Beg, the Atalik Ghazi. Includes the towns of **Yarkand, Kashgar, and Khotan**.

Turkey. An empire possessing extensive territories in Europe, Asia and Africa, governed by Sultan Abdul Hamid II. The commands of the Sultan are absolute, unless opposed to the express direction of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised by the Grand Vizier and the Sheikh-ul-Islam, who are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians. The area of Turkey is estimated at about 1,263,500 sq. m.; and its total population at about 33,268,000. **Estimated revenue** for '88-9, £16,650,000; **expenditure**, £19,260,000. **National external debt** about £223,000,000 in 1874. By Berlin Treaty, 1878, Bulgaria, Montenegro, Servia, and Greece were to assume a portion of the external debt; and by arrangement in December 1881 the external debt was to be reduced to about £106,000,000, and certain revenues handed over to a European commission of liquidation. In addition, there is an **internal debt** of £30,000,000, and an **indemnity** of £32,000,000 due to Russia. The **consolidation of the various loans** (excepting the railway bonds, over £14,000,000) was effected between the years '84 and '88. **Imports** for '87-8, 2,102,595,299 piastres (100 piastres = £1), of which 851,811,828 p. came from the United Kingdom; **exports**, 11,287,300,900 p., of which 357,444,096 p. went to the United Kingdom. (For army and navy see **FOREIGN ARMIES AND NAVIES**). —**History.** A convention was (Dec. '90) drawn up between Turkey and Egypt establishing the payments of duty on imported goods according to their value at the place of consumption. The leading officials, lawyers, merchants, and representatives of the Armenian community presented an address of loyalty to the Sultan, to which a favourable reply was given. The body of the German naturalist, Dr. Robert Reinsch, who had been murdered, was discovered eight miles from Canea (20th). A dividend of 14 fr. per share was declared (27th) at the annual meeting of the Tobacco Régie. The Armenian National Assembly met at Galata (29th), and passed addresses of devotion to the Sultan. —**91.** From the 1st Jan. Turkey exchanged postcards with the other members of the Postal Union. By order of the Porte public proclamation was made (5th) that the Greek churches were reopened for public worship. The leading merchants at Stamboul presented an address to Sir Edgar Vincent for the support given to trade and commerce by the Ottoman Bank. The Sultan practically sanctioned (Feb.) the project of establishing homes for enfranchised negro slaves. It was proposed to establish the homes in the district of Benghazi, Tripoli, Jeddah, and Hodeida, as well as in Constantinople, and in future the freed slaves will be

sheltered in these asylums, and, in conformity with special regulations already in force, will be cared for at the cost of the State. Provision will also be made for the children of negroes received at the homes. The boys will be admitted to the primary professional schools, or to the military bands, while the girls will be assisted to obtain situations as domestic servants. It was also provided that married slaves should be sent to homes built on the State lands at Smyrna. The Sultan presented to the Japanese commodore, Canaka (8th), an autograph letter to the Mikado, expressing thanks for the assistance rendered by the Japanese vessel to the survivors of the wreck of the *Ertogroul*. The Japanese visitors terminated a six weeks' visit (12th). A circular note was issued to all the provincial governors, giving precise instructions as to how the Ottoman officials are to act in respect to the questions of pensions, testamentary dispositions, schools, and the administration of the oath to priests, and the trial of ecclesiastics before the civil Courts. Musurus Pasha died (12th) and was buried with great pomp at Arnoutkeny, on the Bosphorus (16th). The first sod of the Salonika-Monastir Railway was turned (May 14th). The Orient express from Constantinople to Paris was stopped (31st) by brigands at Tcherkesskeni and robbed, five of the passengers being carried off to the mountains, a ransom of £8,000 being demanded. The passengers were liberated (June 4th) on payment of the ransom. A revolt of Assyrian Arabs, at Yemen, was reported (14th); they attacked the Imperial troops, and forced them to retire with the loss of 100 men. The Greek monastery of Simon Petros, Mount Athos, was totally destroyed by fire (14th). The damage was estimated at 1,000,000 fr. Cholera broke out in Aleppo. The Grand Vizier, Kiamil Pasha, and other ministers were dismissed (Sept. 3rd) (see **DIPLOMACY**). The Sultan conferred the Grand Cordon of the Osmanieh Order on the Servian Minister of Foreign Affairs, and upon M. Ribot, French Minister for Foreign Affairs. Several encounters with brigands in the neighbourhood of Adrianople. Considerable anxiety was caused by the stopping of a Russian vessel, containing volunteers returning from training, at the entrance to the Dardanelles by the Turkish officials. After some delay the vessel was allowed to pass, the plea for stopping it being that, by the Berlin Treaty, war ships were not to pass the Straits. An understanding was finally arrived at between the two Powers that vessels of the Volunteer fleet were to be allowed to pass through. Kiamil Pasha was granted a pension of £300 per month, and the late Sheikh-ul-Islam of £200. Reports (Oct. 15th) stated that the cholera was increasing in Damascus, and ten days' quarantine was established at Beyrout and Jaffa on persons from Damascus. The cholera spread throughout Syria; quarantine was (18th) imposed on all arrivals from Syrian ports. The Porte (Nov. 2nd) issued a circular to all the Powers stating that destitute Jews would not be allowed to enter the country. The German consulate protested against the conversion of the Debt as being a violation of contract and damaging the value of the bonds. M. Arnaud, local director of the Tobacco Régie at Trebizonde, was attacked in his house by a band of robbers, who beat him, his wife, and son, and left after ransacking the house. In consequence

of this outrage an irade was issued, ordering that the Régie officials should be armed like gendarmerie. It was announced (aoth) that the Government had resolved to improve the drainage of Cairo, and had asked for plans.

Turkey, Sultan of. See ABDUL HAMED II.

Turkish Railways. In our last edition we gave summarised accounts of several of the railway works being carried on under government recognition. A letter from Constantinople, telegraphed from Paris on Dec. 22nd, '90, stated that numerous concessions had been demanded, there being great activity in railway development. The principal schemes were for the construction of a line from Samsoun to Sivas by M. Cotard; from Panormo to Koniah by M. Nagelmackers; the extension of the Aidin line to Koniah; extension of the Kassaba line to Afium to Kara Hissar; and the prolongation of the Mersina and Adana railway to Aleppo.

The German company were pushing on the line from Ismidt to Angora (see last ed.), finding that traffic sprung up immediately; and the same company were making a railway from Monastir to Salonica, and were about to apply for a concession to join the European system with the Greek line from the Piræus to the frontier (see GREEK RAILWAYS). A Paris telegraph of April 4th, '91, stated that the Jaffa-Jerusalem railway and the Beyrout harbour works, both undertaken by a French company, were rapidly progressing; the first section, to Ramleh, was opened on May 24th. Another message from the same source (April 10th) reported that a railway was being promoted under English auspices from Saida to Damascus, the Lebanon to be traversed on the funicular system. It was reported from Constantinople (June 2nd), that M. Macau, chairman of the Cockerill Company (Belgium), had obtained the Samsoun-Sivas concession, with permission to extend the line to Cæsarea and the Gulf of Alexandretta, thus effecting communication between the Black Sea and the Mediterranean, a distance of 1800 kilometres; the Government guarantee is about 14,000 fr. per kilomètre constructed. From Paris (July 2nd) it was stated that M. Bayhor, of Beyrout, had obtained a firm for a line from Beyrout to Damascus and had commenced work; a Belgian company had also obtained a concession for a steam tramway from Damascus to Houram. In September attention was called to a pamphlet issued by the Cairo Geographical Society to advocate a railway between Ismailieh and Gaza (see EGYPTIAN RAILWAYS), which also gave a summary of railway enterprise in Syria. According to a Constantinople telegram of Oct. 11th, it appeared that, owing to a difficulty in carrying out the contract made by Mr. James Pilling, of Manchester, to construct a railway from St. Jean d'Acre to Damascus, the 10,000 Turkish lira lodged as a guarantee had been seized. An irade just issued, however, gave Mr. Pilling a prolongation and a modification of the concession.

Tylor, Edward Burnett, D.C.L., F.R.S., President of the Anthropological Society, and Keeper of the Oxford University Museum, was b. at Camberwell, 1832. Ed. at the school of the Society of Friends, Tottenham. Has greatly distinguished himself by his researches in the history of man and civilisation. His best known works are his *Handbook on Anthropology*, and "*Primitive Culture: Researches into the Development of Mythology, Philosophy, Religion,*

Art, and Custom." Read an interesting paper on "The Limits of Savage Religion" at the Anthropological Institute (Nov. 10th, '91).

Tyndall, Professor John, Ph.D., LL.D., D.C.L., F.R.S., was b. Aug. 21st, 1820, at Leighlin Bridge, co. Carlow, Ireland. Ed. first at a national school. In '39 he left school to join the Irish Ordnance Survey. In '51 he went to Berlin, and continued his researches under Professor Magnus. He soon returned to England, and was elected F.R.S. in '52. In '53 he was invited to give a Friday evening discourse at the Royal Institution. Appointed **Professor of Natural Philosophy** '53, but resigned in '88. It was in '49 that Prof. T. first visited the Alps, purely for the sake of recreation. The result of these visits and his investigations are contained in the "*Philosophical Transactions*" for '51, also in his "*Glaciers of the Alps*" (London, '60), etc. In '63 his work "*Heat considered as a Mode of Motion*" was published, and this at once put him in the forefront as a physicist. In '66 he relieved Professor Faraday at Trinity House, and on the latter's death succeeded him as superintendent of the Royal Institution. In '74 he delivered the famous Belfast address as president of the annual meeting of the British Association. In '91 the Professor suffered from continued ill-health, from which he is now, happily, recovering.

Tyne and Solway Firth Ship Canal. At the end of Aug. '91 it was reported that a proposal to construct this waterway had so far advanced that a London engineer had commenced a survey. It is suggested that the canal be 200 ft. wide and 30 ft. deep, locks being dispensed with. The naval as well as the commercial aspects of the scheme are enforced by the promoters.

Types. The letters, marks, and signs cast in metal (the larger sizes cut in wood) with which printing is executed. Such types are rectangular in shape, having on their surface (*tech.* "face") the letter of the alphabet or such other design which, when inked, is intended to be imprinted on paper or other substance. The date of the invention of the art of printing is coincident with the discovery of *movable types*. Printing in its simple sense—*i.e.*, the transferring of designs in wood or other material to paper to form books—existed long before, but the introduction of movable types was the mainspring of the movement which disseminated light to succeeding ages, and assisted in spreading civilisation throughout the habitable globe. No handicraft receives so much *observation* as printing; but the observation of the ordinary reader, however attentive it may be, is usually superficial and imperfect. Types are seen, but not regarded: it is only the *information conveyed by types* that is considered. Few general readers know one type or style from another, and fewer still can identify the types under differing circumstances, or speak of them by their technical names; yet, to the publisher and author, especially, such knowledge is of the highest importance, and even to the general student it not without interest. Types are of all sizes—from the immense *poster types* which decorate our hoardings, down to that which can scarcely be read except by the aid of a magnifying glass. It would be foreign to our purpose to describe or even to give a list of the whole of the types in general use; we, therefore, shall

confine our observations to those which are more especially used for the purpose of book printing. They are as follows (premising, however, that those marked with an asterisk are not so frequently used):—

1. Great Primer.*
2. English.
3. Pica.
4. Small Pica.
5. Long Primer.
6. Bourgeois.
7. Brevier.
8. Minion.
9. Emerald.*
10. Nonpareil.
11. Ruby.*
12. Pearl.
13. Diamond.*
14. Minikin.*

The following scheme will not only show the proportions which the book types in general use bear to one another, but will, by showing the extra amount of letters that may be got into the same space, be a useful guide to an author in casting off a MS. with a view of ascertaining (by assessing the average number of words in each line of his MS., and how many lines in a folio) how much it will make in a certain size of type. The vertical lines at the top and bottom divide the line into three equal spaces of 6 and one of 3 ems—that is, 3 $\frac{1}{2}$ in.

Proportion of one Type to another.

INCHES | 1 | 2 | 3 | 3 $\frac{1}{2}$
The complete set of types in any quantity is called a **font**. Pica is universally recognised as the **standard type**, and by this the printer makes all his measurements. Six pica ems, laid sideways thus, E E E E E E, are equal to an inch—72 of them making a foot. It is often a subject of great perplexity to an author or publisher to know in what type he shall print a certain work. Although the choice is arbitrary, and depends upon many surround-

ing circumstances, such as the nature of the work or the intended bulk of the book, custom has relegated certain sizes of type to a certain size of page. The following table will therefore be found useful, giving, as it does, the technical names of the paper and its sections when folded into recognised sizes; as also the generally accepted widths and lengths of the type of pages suitable for such sizes of type, and suggestions for the particular sizes of type which may be used, and are usually adopted:—

NAMES OF PAPERS AND THEIR DIVISIONS FOR BOOK-PRINTING.	Size of Paper of Page in inches.	Size of Page of Type in Pica ems.		Size of Type most suitable.

With the aid of the above table, and by bearing in mind that a pica em is the sixth of an inch, any person, with an ordinary measuring rule, can fix the length and width of his page—which, notwithstanding the measurements given above, is within certain limits quite arbitrary—as is also, indeed, the size of the type which may be used. For instance, the size of the paper for this page is what is technically termed crown octavo ($5 \times 7\frac{1}{2}$), and on reference to the last column of the above table, the reader will see that we have suggested that the types Nos. 4, 5 and 6 may be used (that is, Small Pica, Long Primer, or Bourgeois), and this would be correct for all ordinary purposes. But it is in the nature of a Cyclopædia that a great deal of information should be compressed into a small compass: the type, therefore, to be used must be chosen accordingly. The type selected is No. 10 (Nonpareil), which is just one-half the size of Pica, and of which 12 ems go to the inch, or 24 ems (or lines) to the foot. It should be noted that, as a rule, **extract matter** occurring in the text should be set one size smaller than the body, and **foot-notes** two sizes smaller. Thus, if the body of the work should be composed in Small Pica, the extract matter (which should at all times be clearly indicated) should be set or composed in Long Primer, whilst the foot-notes should be set in Bourgeois. **Side or out-in notes** are set several sizes smaller—such as Minion, Nonpareil, or even Pearl. In connection with the question of types, it may

not be out of place to give the author a hint as to the preparation of “copy” and the correction of proofs. All “copy” for the printer should be clearly and legibly written on one side of the paper, all extract or foot-note matter being indicated, all contractions avoided as far as possible, and where this is not the case, the same to be written on a systematic basis. By writing on the right-hand side of each sheet of paper, the left, which has been left blank, may be used for interpolations or emendations or notes, which should be clearly marked as such. A little care in the preparation of “copy” will often save the author from what he considers “vexatious charges” under the head of corrections. These chiefly arise from deviations from the “copy” which the author makes in the proofs, or from causes connected with the preparation of the “copy,” and are charged to the author. Such charges are always considered unsatisfactory, on both sides; for whilst, upon the one hand, the printer has to take a deal of time and trouble to alter his type, on the other the author apparently sees nothing for the heavy charge made. As a guide to an author how to mark a proof, we refer him to the previous page, which, we think, will embrace every variety of correction, accompanied by an explanation which will make the symbols clear. The corrected page is also added as a guide. Consult “Hints to Authors,” by Henry Jowett ('89).

U

Unitarian. The name commonly given to Christians who do not accept the doctrine of the Trinity, or the Deity of Christ. Congregations number about 250 in England, besides 20 mission stations, 32 in Wales, 10 in Scotland, 40 in Ireland. The British and Foreign Unitarian Association is not representative, but consists of independent subscribers desirous of promoting “the principles of Unitarian Christianity.” The Association claims no authority over churches or ministers. The only technically Unitarian College is that of the Unitarian Home Missionary College in Manchester, which educates for the ministry students who are not able to enter Manchester New College (*q.v.*), recently removed to Oxford, where most of the leading Unitarian ministers are trained. There is a triennial Conference of non-subscribing congregations, which consists almost entirely of Unitarians (next to be held in April '94). The professedly Unitarian congregations of the United States number 350; of these 232 are in New England, many of them being old Puritan foundations. (See also SUNDAY SCHOOL ASSOCIATION.) The *Inquirer*, which is a weekly newspaper (established '42), is described as devoted to the cause of “reverent free-thought.” It discusses religion, chiefly from the “new” Unitarian point of view, and its contents are further referred to under the heads of “Ethics, Literature, and Science.” The present editor is the Rev. W. G. Tarrant, B.A., Essex Hall, Essex Street, Strand, W.C.

United Service Institution. See ROYAL U. S. INSTITUTION.

United States. A confederation of forty-

three North American sovereign states united together by a federal bond for imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is intrusted to three separate authorities—the executive, the legislative, and the judicial. The first is vested in a president elected for four years by electors appointed by each separate state. He is commander of the national forces, and has a veto on all laws passed by Congress, although a bill may become law in spite of his veto, on afterwards being passed by a two-thirds majority of each House of Congress. The administration is conducted under immediate authority of the president by seven ministers chosen by him, and holding office at his pleasure, though confirmed by the senate. A vice-president is also chosen in the same manner; he is *ex officio* president of the senate, and in case of the death or resignation of the president he assumes his office for the remainder of the term and the senate elects a temporary vice-president. The legislative power is vested in Congress, which consists (1) of a senate of 76 members—viz., two chosen by each state legislature for six years—who confirm or reject all appointments by president, and its members constitute a court of impeachment, with power only to remove or disqualify from office; (2) of a house of representatives of 332 members, chosen every two years by all duly qualified male citizens and apportioned among the states according to population. In addition to the representatives, delegates from “territories” (not yet organised into states) are entitled to

debate on matters pertinent to their interests, but must not vote. The Congress may propose an amendment to the constitution if two-thirds of both houses deem it necessary; and such amendment shall be deemed to be incorporated in constitution when ratified by the legislatures of three-fourths of the several states. The judicial power is confided to a supreme court (the members of which are nominated by the president for life) with power to interpret the constitution, to decide all disputes between the federal government and the individual states, and to hear all causes arising under the federal laws, etc. Perfect equality is accorded to all religions; education free and general, although backward in some of the former slave states—the cost being met from state or local funds, and the federal government contributing a portion. The power to enact municipal laws is reserved to the states of which the constitutions and modes of administration bear a close resemblance to each other—the executive being confided to a governor and the legislative to one or two chambers, as the case may be. Roughly speaking, each state has voluntarily surrendered to the central government all federal matters, including taxation for federal purposes only, while reserving the right to administer all local affairs and to impose local taxes at its pleasure. The soil of the United States not included within the boundaries of an individual state are divided into "territories," the districts of Columbia, Alaska, and three Indian territories. When duly qualified by population, etc., it is competent for the confederacy to form the territories into new "states" and admit them into the Union. There is also a "district of Columbia," a neutral territory under the direct government of the confederacy, in which is situated the capital, Washington. The total area of the Union is 3,602,990 sq. miles; the population, by the census of '90, was 62,480,540. Revenue ('90) \$403,080,983; expenditure, \$318,040,711. Exports, '90-91, \$881,076,017; imports, \$823,286,735. The national debt in '89 amounted to \$1,617,374,419. The army is limited by Act of Congress to 25,000 men and 2155 officers; the actual strength ('90) is 2,170 officers and 25,220 men. In addition, each state is supposed to have a militia, in which all men from eighteen to forty-five, capable of bearing arms, should be enrolled. GENERAL. '90. Ten young ladies were seriously burnt (Dec. 13th) in consequence of the dress of one of them catching fire at a fancy ball at Akron, Ohio. The Union Pacific Railway switchmen at Rawlins, Wyoming, struck (18th). Mr. B. C. Faurot, president of the Columbus, Lima, and North-Western Railway, completed contracts (22nd) by which they secured 3,000,000 acres of capable of bearing arms, should be enrolled.—land in Mexico, granted to the former by the Mexican Government, which also undertook to pay \$200 to each family, and \$50 to each bachelor who settled on the land. The Supreme Court decided (22nd) that a wife is not a competent witness against her husband where polygamy is charged against him. The President issued a proclamation that the International Exhibition at Chicago would be opened May 1st, 1893, and closed on the last Thursday of the following October (24th). The Masonic Temple at Baltimore was destroyed by fire; damage, \$450,000. There was a great snowstorm in New York (26th). The distress in Oklahoma during the month was very great, three-fourths of the 40,000 persons in the territory being in want

of food and clothing. Capt. James Carroll, of Sitka, Alaska, offered the Government \$2,800,000 for the territory.—'91. Three new lighthouses were opened (Jan. 1st) on the coast of Maine—at Luluc Narrows, end of Great Dutch Island, and Goose Rock. The principal part of the State prison at Plattenburg was destroyed by fire; the damage amounted to \$60,000. Fifteen miners at Eagle's Pass, Texas, were blown up and killed in the powder-house. The Fifth Avenue Theatre and Hermann's Theatre, Broadway, New York, were destroyed by fire (2nd), and also Sturtwant House, and other buildings. The damage was estimated at \$567,000. Mrs. R. G. Peters, an English lady, was murdered by burglars (8th) in her house at Atlanta, Georgia, and the house set fire to. The burglars were not caught. Sharp earthquake shocks were felt at Rusk, Texas (8th). A bride was shot while in the church, Marion county (12th); the murderer was not caught. Dobson's carpet factory, Philadelphia, was destroyed by fire (17th); damage, \$1,000,000. Great fire occurred in clothing houses, Buffalo; a wall fell burying five persons, two of whom were killed. A terrific snowstorm raged along the Atlantic coast (24-5th), doing enormous damage to the extent of several millions in New York alone. One hundred and fifty men were killed by an explosion in the Frick Mine, Mount Pleasant, Pennsylvania. At the Carbon Hill coal mines, Walker county, nine negroes were surrounded by a mob of miners and shot while asleep for taking the place of strikers (30th). Judge Wallace, in the Chicago Court (Feb. 2nd), refused to grant an injunction restraining a firm of booksellers from selling an edition of the *Encyclopædia Britannica*, published by a Chicago firm, the Court holding that rival American publishers had a legal right to use all or any of the contents of the original edition, excepting such portions as were covered by the copyright of American authors. A strike of coke-workers commenced at Connesville (9th), 10,000 men going out. A revolver fight between two editors took place (22nd) in the streets of Columbus, Ohio. One was fatally wounded, one passer-by killed, and several others wounded. A crowd broke into the New Orleans prison (March 14th) and shot or hanged eleven of the Italians charged with the assassination last autumn, of Mr. Hennessey, chief of police; the Italians were members of a secret society, the Mafia, which committed murders and terrorised people generally. There was a serious epidemic of influenza in Chicago and other cities, the death rate reaching as high as 35 per 1000. Strikes occurred at the West Pennsylvania Coke Works; there were riots, and a number of the strikers were shot in conflicts with the authorities. A congress of inventors and manufacturers was opened at Washington (April 8th) to celebrate the beginning of the second century of the American patent system. The sheriff and 13 deputies were arrested (8th) on the charge of having murdered the coke work strikers. There was a severe epidemic of influenza in New York and Brooklyn. Serious riots occurred, and the militia were called out to suppress them. A car load of dynamite exploded (May 19th) at Tarrytown, killing 18 persons and wounding 25. The coroner's jury censured Mr. Chauncey Depew and the directors of the railway for allowing passengers to travel in the same car as the explosives. Half the town of Seabright, N. J., was burnt (June 16th).

Hundreds of people were rendered homeless. A terrible railway collision occurred at Ravenna (July 3rd) between a heavy freight train and the Erie express from New York. Twenty-five passengers were killed, some being burnt to death, the wreckage having caught fire. Four criminals were executed by electricity (7th) at Sing Sing. News was received at New York (11th) that the Chippewa Indians had been in revolt for some time. An explosion in, and collapse of, a five-storey building occurred in New York (Aug. 22nd); the ruins caught fire, and between 70 and 90 persons were either crushed or burnt to death. The St. Clair tunnel under the St. Clair river, connecting the American and Canadian railways, was opened by Sir Henry Tyler, the chairman of the Grand Trunk Railway (Sept. 19th). One hundred and twenty British delegates to the Methodist Ecumenical Congress took part in the services at the Asbury Methodist Church in New York (Oct. 4th). The Rev. Mr. Morgan, one of the delegates, preached, and the Rev. Dr. Stephenson, President of the Wesleyan Conference of England, delivered an address. The Comte de Paris sent (14th) a splendid Lyons velvet banner to the Pennsylvania Commandery of the Loyal Legion. A preliminary report upon the nursery industry was issued during the month by the Census Office. The report showed that there were in the United States 4510 nurseries, valued at \$41,978,835, and occupying 172,866 acres of land, with an invested capital of \$52,425,669, and giving employment to 49,657 men, 2279 women, and 14,200 animals, using in the propagation and cultivation of trees and plants \$990,606 worth of implements. Of the acreage in nurseries 95,025 acres were found to be used in growing trees, plants, shrubs, and vines of all ages; the figures, based upon the best estimate of the nurserymen, making the grand total of plants and trees 3,386,855,773, of which 518,016,612 were fruit trees, 683,003,396 grapevines and small fruits, and the balance nut, deciduous and evergreen trees, hardy shrubs, and roses. The largest acreage was devoted to the production of apple trees—viz., 20,232 acres, numbering 240,570,666 young trees, giving an average of 11,890 per acre; while the plum, pear, and peach had, respectively, 7826, 6854, and 3357 acres, producing 88,494,367, 77,223,402, and 49,887,894 young trees, or an average of 11,307, 11,266, and 14,861 trees to the acre. The value of the green, dried, and preserved fruits exported in '90 was \$4,031,680; 20,861,462 lb. of dried apples, and 453,506 barrels of green apples were exported. The value of the year's import of fruit was \$18,310,007. A negro editor was awarded \$825 damages against a New York *café* proprietor in whose place he was refused service (Nov.). A terrific storm took place at Washington (23rd).—**SOICIAL.** '90. A sale of articles belonging to George Washington took place (Dec. 11th). Mr. Henry B. Brown was (22nd) appointed Judge of the Supreme Court in the place of the late Judge Miller. Señor Valente, Brazilian Minister, was transferred to Vienna, and was succeeded by Señor Salvador de Mendonça.—'91. Judge Warder, of Chattanooga, and his son-in-law quarrelled (Jan. 18th); revolvers were produced and fired, killing the latter. The Judge's daughter, Mrs. Fugette, was seriously shot in trying to stop the quarrel.

Mr. Windom, Secretary to the Treasury, after a short speech at a banquet given (29th) by the New York Board of Trade and Transportation at Delmonico's, collapsed in his chair, and died in a few minutes, after being removed to another room. General Sherman died (Feb. 14th) at the age of 70, and was buried at St. Louis with military honours (21st). Mr. Charles Foster, ex-Governor of Ohio, was appointed Secretary to the Treasury (21st). President Harrison made a tour of the South American States during April and the early part of May. At Colorado Springs, while Mrs. Harrison was holding a reception (May 12th), the floor of the porch gave way, and 30 people were precipitated into the area; no one was dangerously hurt. Judge Warder committed suicide (July 18th). Mr. J. Russell Lowell died (Aug. 14th).—**COMMERCIAL.** A petition from New York merchants was presented to Congress (Dec. 4th), asking for an extension of the time during which goods could be taken out of bond under the old duties. Mr. Curtis G. Stoddard, an American banker, was arrested (12th) on the charge of embezzling \$2,200,000 and \$4,000,000 in bonds. Mr. S. indignantly denied the charge. It was decided to build the Government Appraisers' Stores near the Hudson river piers, New York. It was reported (27th) that about 30 United States consuls and consular agents in Canada were implicated in a system of fraud, connected with consular certificates, by which the Government were defrauded of \$1,000,000. During the year ending Dec. 31st, '90, 10,907 failures have occurred in the United States, against 10,882 in 1889. The total liabilities amounted to \$189,000,000, as compared with \$148,000,000 for the preceding year. This amount is the largest since 1884, when the total was \$220,000,000.—'91. Messrs. Marshall, Field, & Co. prepared a suit (Jan. 1st) to test the constitutionality of the M'Kinley tariff on the ground that the omission of the tobacco rebate clause invalidated the whole measure. The Superintendent of the Philadelphia Mint having refused (3rd) to coin into dollars an ingot of 514 oz., presented by Messrs. Morse and Merrick, those gentlemen decided to take the case to the Supreme Court. The Sugar Trust was re-organised as the American Sugar Refining Co. (10th), with a capital of £10,000,000. The Secretary to the Treasury decided (12th) that bar or ingot silver cannot be coined for the use or benefit of depositors. A Chicago grand jury found a true bill against Mr. Gibson, Secretary of the Whisky Trust, for attempting to bribe a man to blow up a distillery with dynamite. During the progress of the Free Coinage Bill a silver pool was formed, and (Feb.) on the defeat of the Bill there was an accumulation of 10,000,000 oz. in New York, which cost the speculators on the average \$7.10 per oz.; they had to sell at \$7.05 per oz. The first losses to the speculators amounted to \$2,000,000, and storage and interest amounted to \$500,000 more. In a test case before the Philadelphia Court the Government were adjudged (June 19th) to refund to Messrs. Meyer and Dickinson \$632 excess duties levied on hat trimmings. The Government gave notice of appeal to the Supreme Court. The case was settled by the Treasury paying back \$5,000,000 to the overcharged importers. The New York Chamber of Commerce adopted a resolution declaring the

opinion that the law compelling the purchase by the Government of 4½ million ounces of silver a month was opposed to the public welfare. Sir Julian Pauncefote wrote to the Government respecting loose baling of American cotton and the attendant risk to human life. **POLITICAL.** The Pension Bill, which passed through Committee in Nov., voted \$133,173,085 for pensions, and \$1,500,000 for surgeons' fees. It was reported (Nov. 30th, '90) that the position of the Indian difficulty was becoming serious, the Indians having assembled in several places and commenced raiding. The President, in his message to Congress (Dec. 1st), stated that the revenue for the last fiscal year amounted to \$403,080,983 and the expenditure to \$297,736,487. The postal receipts being ignored, there was a surplus, including the Sinking Fund, of \$105,344,496. For '90 the receipts amounted to \$16,030,923 and the expenditure to \$15,739,871 in excess of the revenue and expenditure respectively of '89. For the current year the estimated receipts were \$406,000,000 and the estimated expenditure \$354,000,000, the postal revenue being again ignored. A Bill for the free coinage of silver was introduced. Early in the month Colonel Cody (Buffalo Bill) was sent by the Government against the Indians. A conflict between two bodies of Indians (13th) in South Dakota, and they had also attacked the settlers. The outlook became more serious (15th). Sitting Bull was arrested in his camp, forty miles from Standing Rock, as, it was said, he was going to Badlands. His followers attempted a rescue, and in the *mêlée* Sitting Bull and his son were killed. There was a conflict between some troopers and the Indians (16th), when 52 of the former were killed; the Indians' loss heavily. Further engagements took place on the two following days. The police arrested the Indian Messiah (22nd) in Red Cloud's camp. He was a fanatic, named Hopkins, of Nassau, Iowa. There was fighting near Battle Creek, Dakota (24th), and also subsequently, in which conflicts large numbers of the Indians and many of the Government troops were killed. On the part of the troopers, in most cases, no quarter was given, and firing only ceased when there was not a living Indian in sight.—91. Mr. Lyall, British consul at Galveston, Texas, was removed (Jan. 1st) on the demand of the Governor of Texas, who considered that he had been insulted by that official. Fighting took place between the troops and Indians at Pine Ridge; thirty of the soldiers were killed. General Miles reported (16th) that all the Indians were entering the Pine Ridge Agency and delivering up their arms. The arms surrendered were found to be worn out, the good ones being secreted. General Miles issued an address (19th) to the men under his command, announcing the end of the war. The public debt on Jan. 1st amounted to \$862,430,541. The correspondence between Mr. Blaine and Lord Salisbury on the Behring's Sea question (*q.v.*) was laid before Congress. The Secretary of the Treasury notified that all goods sent into the country for the sole purpose of exhibition at the World's Fair were to be admitted duty free (7th). The statistics of the seal fisheries for '90 showed that a total of 43,779 skins were brought to Victoria during that period, valued at \$498,728, being an increase over the year 1889 of 8,569 skins. Of the total catch 22,019 seals were taken in Behring's Sea, the rest being secured along the coast.

Twenty-nine British Columbia vessels, valued at \$248,250, were engaged in the fisheries, their crews numbering 678 men. The total catch of these vessels was 39,547 skins, of which 18,165 were taken in Behring's Sea. Five American vessels took 3,043 seals in Behring's Sea during the year, and carried their catch to Victoria, and one German vessel caught 811 seals. The question of the Behring's Sea Fisheries was brought before the Supreme Court of the United States (12th) by Sir John Thompson, Attorney-General for Canada, asking the Court commanding the District Court at Sitka to annul the proceedings by which the sealer, W. P. Saywood was libelled in '87. The Senate (14th) passed a Free Coinage Bill, fixing the merit of value at a dollar coined of 412½ grains of standard silver or 25½ grains of standard gold; it also gives all bullion owners authority to deposit bullion for coinage, all certificates issued for silver or gold being made legal tender, while bullion owners have the option of receiving coin or certificates for their bullion which shall afterwards be coined. A treaty of commerce with the Congo State was signed (24th). In the Supreme Court (27th) the case of the sealer, *W. P. Sayward*, came on for hearing. Mr. Calderon Carlisle, on behalf of Great Britain, contended that the proceedings were brought to get the Court to decide a matter of private right. The States Attorney-General, Mr. Miller, said the case was an effort to transfer a long-standing diplomatic controversy from the Executive to the Judicial Department. Mr. Choate, the counsel for Canada, contended that Canada appeared simply as a friendly stranger seeking to protect the fortunes of one of her citizens. There was no political question at issue. The Apportionment Bill, fixing the number of the members of the new House at 356 was passed by the Senate (28th). Both Houses of Congress adjourned (30th) after the announcement of the death of Mr. Windom, Secretary to the Treasury. The Judge of the Supreme Court decided (Feb. 2nd) that Great Britain should have leave to file an application for a writ of prohibition in the matter of the sealer *W. P. Sayward*. The Senate passed an amendment (9th) to the Copyright Bill, extending its principles to maps, charts, dramatic and musical productions, engravings, and lithographs. The House of Representatives passed a Bill giving a subsidy to American built vessels carrying mail for foreign countries. The Copyright Bill passed (March 4th) in a form which would enable a private individual to import two copies of a foreign book. The supplies voted by Congress amounted to \$25 millions. The Italian Government called upon the United States Government to proceed against the persons who lynched the Italians charged with the murder of Inspector Hennessey, and not being satisfied with the promptitude of the action taken, Baron di Fava, the Italian Minister, presented his letters of recall (31st). General Huston, United States Treasurer, resigned (April), and was succeeded by Mr. E. H. Nedecker. The Grand Jury, which made inquiry into the lynching, found (May 1st) "that a thorough examination of the subject failed to disclose the necessary facts to justify this Grand Jury in presenting indictments"; it also found that eight of the men were naturalised, and that another had announced his intention of becoming so. The Chilean steamer *Itala* called at San Diego,

apparently for coal, but, as it was believed, she came for arms for the Parliamentary party; by orders from Washington (5th), a deputy marshal was put on board. She left the port (6th), and took a cargo of arms and ammunition on board outside from the American schooner *Robert and Minnie*. The deputy marshal was put on shore at Ballast Point (8th). The *Robert and Minnie* was captured, and the United States war vessels in the Pacific were ordered to seek and recapture the *Itata* (11th). Officers and men connected with the *Robert and Minnie* were arrested and charged with violating the neutrality laws (12th). Señor Ricardo Trumbull, a member of the Chilean Congress, was arrested and charged with a similar offence in connection with the same case. The question of the *Itata* was amicably settled (20th), and she was surrendered to the American cruisers at Iquique (June 4th). Mr. McKinley was nominated Governor by the Ohio Republic Convention (17th). The libel on the *Robert and Minnie* was dismissed by the Court. The Pacific mail steamer *City of Panama* was seized (Aug.) at La Libertad because she left La Union without a permit. The *Itata* was released at Los Angeles (30th), on filing a bond in a penalty of \$60,000 for the vessel, and a like amount for the cargo and arms. Mr. Egan was instructed to demand an explanation of and compensation for the death of the U.S. sailors attacked by the crowd and killed at Valparaíso (Oct.). It was reported (29th) that the Chilean Government refused to accept responsibility. Mr. McKinley was elected Governor of the State of Ohio (Nov. 4th). The elections took place on the following day. It was stated that the Customs receipts had fallen off by \$35,000,000 during the four months ending Oct. 31st. The *W. P. Sayward* case came before the Supreme Court for argument (9th). It was announced (10th) that an agreement had been come to with Great Britain as to the terms on which differences respecting Behring's Sea should be submitted to arbitration. At a banquet in Boston Mr. McKinley was hailed as the future President of the United States (20th).

United States Political Parties. The House of Representatives in the fifty-second Congress, to meet in March '92, was elected in Nov. '91. That House now consists of 332 members, owing to the recent addition of Wyoming and Idaho to the list of States. The State Legislatures select the members of the Senate, of which one-third falls to be elected for the March Congress. The two great parties in the United States are the Republican and Democratic, while a third party, under the name of the *Farmers' Alliance*, was formed by Mr. Benjamin R. Tillman. It is strongly opposed to monopolies, demands "equal rights for all and special favours for none," and preaches "brotherly love." In '91 this party held a convention in Ohio, and nominated Mr. John Seitz as governor. The Ohio election has attracted much attention, as it is thought that its result will decide the fate of the free silver coinage agitation. (See UNITED STATES.) During the November elections this party showed a heavy decline in its influence. Many of its members rejoined the Republicans. Mr. McKinley was successful on Nov. 4th in gaining the governorship of the State of Ohio. His election as President is now regarded as a possibility. Mr. Grover Cleveland would be

a very popular candidate, while the chances of Mr. J. G. Blaine are not to be disregarded.

United States, President of the. See, HARRISON, BENJAMIN.

University College, London, founded 1826, was opened in '58 under the title of "The University of London." In '36 it was thought desirable to separate the College from the University, and the former was incorporated in that year as "University College, London," by royal charter, which was annulled in '69, and the College re-incorporated with additional powers. There are, therefore, two distinct institutions—the one a *teaching* body and the other an *examining* body. The curriculum includes courses in arts, law, science, theoretical and applied, medicine, and the fine arts. There is also *University College Hospital*, with upwards of 200 beds. **President,** J. Eric Erichsen, LL.D., F.R.S.; **Vice-President,** Sir U. J. Kay-Shuttleworth, Bart., M.P. **Deans,** Professors W. P. Ker, M.A., and W. Ramsay, M.A., LL.D., F.R.S.; **E. A. Schäfer, F.R.S. Sec.,** J. M. Horsburgh, M.A. The students number in all about 2000.

University College of North Wales (Bangor). Opened 1884. It received a Royal Charter in '85, and it is in receipt of a Government grant of £4,000 per annum, besides an annual grant in aid of the Agricultural Department, which is in connection with the institution. The courses of study include the usual subjects of a liberal, classical, and scientific education. The physical, chemical and biological laboratories are very extensive and complete. The chemistry, botany, and zoology courses are recognised for medical graduation in the Universities of Edinburgh and Glasgow, and students can make one *annus medicus* at the College. The science courses are recognised for two years of the three years' degree course of the *University of Edinburgh*. The College is a local centre for the matriculation examination of London University in June, Intermediate Arts Examination and B.A. examination of London University, and the Medical Preliminary Examinations of Edinburgh and Glasgow Universities in spring and autumn. There are a large number of *entrance scholarships* connected with the institution. The College has organised a system of *agricultural education* throughout North Wales, including the establishment of three *dairy schools*. The College possesses a valuable library containing nearly 20,000 volumes. **Sec.,** W. C. Davies.

University College School, Gower St., established 1832, is completely *unsectarian*—separate classification in all subjects—a modern school with classical department. Prepares for University College and London matriculation, as well as for Universities, Woolwich, etc. Pupils, 500. **Motto,** *Paulatin sed firmiter*. **Head Master,** H. W. Eve, M.A. **Sec.,** J. M. Horsburgh, M.A. Amongst its *alumni* are the Rt. Hon. Joseph Chamberlain, Sir Frederick Leighton, Mr. George Lewis, Professor Michael Foster, Mr. R. H. Hutton, Lord Justice Lindley, Mr. Justice Charles, Rt. Hon. J. W. Mellor, and Principal Greenwood (Owens, Manchester).

University Extension. The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." It commenced in '72 with the *University of Cambridge*; about four years later *Oxford* took it up—abandoning it, however, until '85; and in

'76 was formed the London Society for the Extension of University Teaching within the Metropolitan area. Dublin University is associated with Cambridge in forwarding the work in Northumberland and Durham; Owens' College, Manchester, is also in the field; and the Scotch Universities are making a similar plan for laying siege to the north. During '91 further advance has taken place in England with regard to this movement. The Technical Education Committee of the Kent County Council has made a grant to the South-Eastern Association for the Extension of University teaching to establish courses of lectures in more than fifty villages of the country. The University of Sydney, New South Wales, adopted the scheme in '87; and the Chautauqua Home Reading Club—the largest organisation of the kind in America—is promoting a similar system of higher education. Such is a general view of the present position of this movement; an insight into its working is afforded from the following details regarding the Cambridge, London, and Oxford schemes. **CAMBRIDGE.** This scheme is controlled by a syndicate of seventeen, appointed by the

granted students must give evidence of certain proficiency in Latin, one other language, and mathematics. A town may come under the operation of the ordinary scheme in providing a place of meeting for the classes and a fee of £45 per term to the University for teaching. All the local expenses are met by the local committee, who also fix and receive the fees. Classes were held (Aug.) at Cambridge, to which students who had obtained certificates were admitted. Students were admitted to the University Libraries and Museums, and some of them resided at Newham and Girton Colleges. With the County Councils of Devonshire, Norfolk, Kent, Surrey, Cambridgeshire, North-Hants, Sussex, etc., lectures on scientific subjects, bearing on agriculture and various industries, were given by lecturers of the Syndicate in the autumn of '91 in 89 villages and towns. In the Lent Term, '92, the work is expected to be still further extended. For this work the system is variously modified to suit local needs. The advance of the Cambridge section of University Extension will be seen in the table appended. Full details of the scheme and

Latest Statistics of University Extension Scheme, '91.

	Cambridge.	Oxford.	London Society for the Extension of University Teaching.	Total.
Number of Centres	97	146	60	303
Number of Courses	140	192*	121	453
Total number of Lectures given	1512	1481	1226	4219
Number of Lecturers employed	51	33	26	110
Number of Students attending Lectures . .	11,100	20,248	13,000	44,348

University senate. Under it there are two terms in the year—October to December, and January to March—and a course of twelve lectures given in each term. Either preceding or after each lecture a class is held for about an hour, during which students are orally examined by the lecturer, who also goes over the written papers done at home by the more advanced students every week. At the end of each term a special examination is held and certificates awarded on the joint report of examiner and lecturer. Six certificates so won entitle the winner to the Vice-Chancellor's Certificate. Of the eighty (besides County Council centres,) twelve are under the joint management of Cambridge and Durham, while seven are affiliated to Cambridge. These affiliated centres are—Derby, Exeter, Hull, Newcastle-on-Tyne, Plymouth with Stonehouse and Devonport, Scarborough, and Sunderland. The privileges of students at these centres are—(1) entrance to Cambridge University without submitting to the "previous" or "little go" examination; (2) remission of one year's residence before proceeding to the degree examination; (3) the title "Students affiliated to the University of Cambridge." For affiliation a connected course of study extending over at least three years is required, and before the special privileges are

how to proceed in forming a new centre will be given on application to the Secretary of the Local Examinations and Lectures Syndicate, Syndicate Buildings, Camb.—The LONDON Organisation comprises a council of 32 members; President, the Rt. Hon. G. J. Goschen, M.P. Bedford College, Birkbeck Institution, City of London College, College for Men and Women, King's College, London Institution, Queen's College, Royal Institution, University College, and Working Men's College, each nominate a member of the council; the remaining 22 are elected by members of the society. Any one may become a member of the society by paying an annual subscription of two guineas, or £50 for a life membership. These subscriptions and voluntary subscriptions constitute the society's revenue. The council is assisted and advised on educational matters by the Joint Board, which consists of three representatives from each of the Universities of Oxford, Cambridge, and London. The Joint Board nominates the lecturers and awards certificates to the students. The scheme of work is similar to the Cambridge

* Sixteen special classes for students, supplementary to winter courses, and consisting of 5 or 6 lectures held in the summer term are not included in this total.

scheme—two terms in the winter, each of three months, weekly lectures followed by a conversational class, weekly papers for the lectures and final examinations. In order to encourage continuity of work, a new certificate, called the **Seasonal certificate**, has been instituted, which is awarded to students who have obtained a certificate in each of two consecutive winter courses, and have, in addition, satisfied the Joint Board in summer work, consisting of practical demonstrations on special reading and study under the direction of the teacher for a period of not less than ten weeks. Students under certain conditions with four seasonal certificates are awarded **Certificates of Continuous Study**. The **Local Centres** are managed by local committees, who fix and receive the students' fees. The Society simply provides lecturers and examiners, the charge being £27 10s. for a course of ten, and £32 10s. for a course of twelve lectures. The students' fees vary from 1s. to half-a-guinea, according to the locality and the discretion of the local committees. The total number of students in 1890 was nearly 13,000. The number of students writing weekly papers has largely increased. During '90 the Council submitted evidence to the Senate of the Univ. of London showing that the work done by the London organisation was worthy of the recognition of the University. See to the Council, R. D. Roberts, M.A., D.Sc., Charterhouse, E.C.—**Consult Univ. Extension Journal.**—**OXFORD.** The University first took an active part in educating non-matriculated students by means of University Extension Courses in '78. In '85 the system was reorganised on its present lines. Local committees in 146 towns acted last year ('90-91) in concert with the Oxford University Delegates, and arranged 102 courses, which were attended by 20,248 students. Of 1388 students, who entered for final examinations, 1181 candidates received certificates of distinction. Though in these examinations they only write one paper, the standard is identical with that required (but on several papers) in the Final University Examinations for B.A. During the last six years the local committees have spent on Oxford courses more than £20,000. A course consists of from six to twelve lectures. Long courses are increasing in number. In connection with each course a travelling library of books, recommended by the lecturers, aids the students. The arrangements made in '87 for private tuition by correspondence have not been adopted by many students. The proportion of students entering for final examination is small but increasing. The method of University Extension work is invariably the lecture, followed or preceded by a class, supplemented by weekly exercises corrected by the lecturer. Optional final examination by independent University Examiner. Fifty Students' Associations are in existence. The County Councils have arranged this year ('91) more than 100 Oxford University Extension Courses (mostly of twelve lectures and classes) on Science. Seventeen experienced lecturers are now wholly engaged in this new department of the work. The fourth summer meeting was held in Oxford in Aug. '91. It lasted nearly five weeks, and 1200 students attended during the first five days. The sequence of studies will be continued at the next four summer meetings, and in future cycles of four years. £150 was awarded in scholarships to enable students to attend the meeting. The successful essayists

included many artisans. The standard of the prize essays was remarkably high. All information can be obtained from the *Oxford University Extension Gazette* (monthly, 1d.). See, Mr. Michael E. Sadler, M.A., Examination Schools, Oxford.

Uppingham. Archdeacon Johnson's School, founded 1584; reorganised '75. Three leaving exhibitions of £60, £50 and £40 offered every year, and 16 of about £30 each to Cambridge. There are 330 boys in the upper, and 55 in the lower, school. Head Master, Rev. E. Carus Selwyn.

University Hall, Gordon Square, W.C., owes its inception in the main to the publication of "Robert Elsmere," by Mrs. Humphry Ward. Its aim is twofold: to provide public lectures on Biblical, religious, social and economic subjects, free from any ecclesiastical restrictions; and to provide a residence for young men engaged in business or professions, who are willing to give a part of their leisure to social or religious work in the neighbourhood. The residents have engaged a hall in Marchmont Street, in one of the most neglected districts in St. Pancras, as a centre for their work. There are now about a dozen men in residence at the hall. The Biblical lectures have followed the lines of Continental criticism and the sympathies of the founders of the Hall are with the most free liberal developments of the religious life; but no religious tests are imposed upon residents, and men of diverse creeds and churches are included in their number. Mrs. Humphry Ward, the Earl of Carlisle, the Rev. Stopford Brooke and Dr. Martineau are on the committee. Warden, I. H. Wicksteed, M.A., University Hall.

Uruguay. Formerly called **Banda Oriental**. A republic on the east coast of South America, south of Brazil. Area, 72,150 sq. m.; pop. (1889), 700,000. Capital, **Monte Video**, pop. 104,472, at the mouth of the Rio de la Plata. Government vested in a president elected for four years. Legislature is composed of a Senate elected for six years by departments, and a Chamber elected for three years, one for each 3000 of population. In the recess a permanent committee of two senators and five deputies assume legislative power and control of general administration. State religion Roman Catholic, but all others tolerated. President, General Obes. Estimated revenue for '89, \$13,862,000 (£1 = \$4.70); expenditure, \$13,811,308; debt ('89), \$79,189,944. Imports ('88), 29,477,448 pesos; exports, 26,008,254 p. The Government introduced a Bill in both Chambers (Dec. 10th, '90) to raise the customs on spirits, sugar, perfumery, silk, tinned provisions, and tobacco.—'91. A decree was published (Jan. 5th) that on the 8th the National Bank would begin redeeming the paper money in gold, to be completed by July 1st. The Bill to raise the customs passed both Houses (14th). The Ministry resigned, and a Cabinet of Conciliation was formed (March) as follows:—Capitan-General Perez, Minister of the Interior; Señor Manuel Herrero y Espinosa, Minister for Foreign Affairs; Señor Carlos Maria Ramirez, Minister of Finance; Señor José Maria Castellanos, Minister of Commerce and Public Works; General Callarada, Minister of War and Marine. The Government arranged for a loan of a million sterling from the Banco Popular of Brazil. Two thousand cases of influenza were reported from Montevideo (Nov. 10th).

V

Vaccination. The enforcement of the Vaccination Acts has been anything but thorough since the announcement that the Government intended to grant an inquiry into the working of these statutes (see *infra*). In many cases the magistrates have postponed their decisions for several months where prosecutions have been instituted before them, while the practice of forming societies for the payment of fines inflicted upon anti-vaccinators has rendered penalties practically inoperative.

Vaccination, The Royal Commission on, was appointed in 1889, to inquire into the subject of vaccination and the operation of the vaccination laws. The members of the Commission are: **Chairman,** Right Hon. Lord Herschell; Sir James Paget, Bart., F.R.S.; Sir Charles Dalrymple, Bart., M.P.; Sir W. Guyer Hunter, M.P.; Sir Edwin H. Galsworthy; Sir William Savory, Bart.; John Syer Bristowe, M.D.; Wm. Job Collins, M.D.; John S. Dugdale, Q.C., M.P.; Professor Michael Foster, M.D.; Jonathan Hutchinson; J. Allanson Picton, M.P.; Samuel Whitbread, M.P.; F. Meadows White, Q.C.; and J. A. Bright, M.P. Sec., Mr. Bret Ince, 8, Great George Street, S.W.

"Vanity Fair." This pioneer of the so-called society journal, was founded in Nov. '68. It has always been noted for its literary pretensions, and for its weekly caricature, which is *vis à vis* *graveris*. The chief artist is Mr. Leslie Ward ("Spy"), who occupies the position so long held by the late Carlo Pellegrini ("Ape"). Its politics are old-fashioned Tory. It devotes considerable space to Service matters. Editor, Mr. O. A. Fry; office, 182, Strand, W.C.

Vaughan, The Very Rev. Charles John, D.D., was b. 1816. Ed. at Rugby and Trin. Coll., Camb.; B.A., Senior Classic, and Chancellor's Medallist, '38; Fellow of Trin. Coll., '39. Head Master of Harrow, '44-59. Offered and refused bishopric of Rochester, '60. Vicar of Doncaster, '60-69. Was appointed **Master of the Temple** in '59, and **Dean of Llandaff** in '79. One of the Deputy Clerks of the Closet in Ordinary to Her Majesty, '82. Amongst other works, Dean V. has published "Memorials of Harrow Sundays," a selection of sermons, '59; "The Church of the First Days," "Lectures on the Acts of the Apostles," '64; "Half-Hours in the Temple Church," '71; and "My Son, give Me thine Heart" ('76-8),—sermons preached before the Universities of Oxford and Cambridge.

Venezuela. A republic in South America, governed by a president, assisted by Senate, three members nominated by each province, and a House of Representatives, elected directly, one member to every 35,000 of population. Roman Catholicism is the state religion, but private exercise of all others is permitted. Education is in a backward state, but was made compulsory in '70. Area 632,695 sq. miles; pop. in '89 2,234,385. Capital, **Caracas**, pop. 70,500. **Estimated revenue** for 90-91, 35,976,000 b. (bolivare = 1 fr.); **expenditure** the same amount. In '89 the debt was 112,587,184 b. Army about 2500, exclusive of militia about 60,000 strong.—'91. It was reported (March 24th) that a collision had occurred between the British and Venezuelan on the British Guiana and Venezuela frontier.

It was reported (April 4th) that an Englishman, named William Campbell, was murdered by the Venezuelan police at Amacoro. For Ministry, etc., see DIPLOMATIC.

Verdi, Giuseppe, is the son of an innkeeper at Rancola, in the duchy of Parma, and was b. 1814, and studied at Milan. His first work of any importance was the incidental music to a drama, "Oberto di San Bonifazio" ('39), but he quickly rose to supremacy on the opera stage with such works as "Il Lombardi" ('43), "Ernani," "Rigoletto," "Il Trovatore," "La Traviata" ('53), "Un Ballo in Maschera" ('59), "Aida" ('71) and "Montezuma," produced in '78. A fine dramatic gift and a love for showy, taking melodies, lie at the root of Verdi's remarkable success. In '74 he composed the "Requiem" for Alessandro Manzoni. His latest work, "Otello," was produced at Milan, '86, and was reproduced in London at the Lyceum in '89. He celebrated his jubilee as a composer in Nov. '89.

Verne, Jules, was b. Feb. 8th, 1828, at Nantes. He studied law, both there and at Paris. He began writing short pieces for the stage, and in '63 commenced his series of marvellous stories, which have made his name almost a household word. His best known stories are "Five Weeks in a Balloon," "Twenty Thousand Leagues under the Sea," "A Floating City," "Adventures of Captain Hatteras," "The Mysterious Island," "Michael Strogoff, the Courier of the Czar," "Dick Sands, the Boy Captain," and "Le Pays de Diamants." His works are characterised by a combination of scientific knowledge and imaginative power. An unsuccessful attempt on his life was made in March '86. In '90 he published "A Family without a Name" and "The Purchase of the North Pole." In '91 he issued "César Cascabel."

Victoria. The smallest of the colonies in the Australian continent. Occupies the south-eastern corner. Divided from New South Wales on north by Murray river, and from South Australia on west by 141st meridian of E. long. Extends 420 miles E. to W., and 240 miles N. to S., containing 87,884 sq. miles. Pop. 1,133,000, besides 11,290 Chinese and 780 aborigines. Capital **Melbourne**, pop. 397,127, situated on Hobson's Bay and river Yarra. Victoria is divided into 37 counties, within which there are at present 60 cities and boroughs and 123 shires or rural municipalities. The colony is also divided into four great districts—**Gippsland, Murray, Wimmera, and Loddon.** Executive is vested in Governor and responsible Ministry. Two Houses of Parliament: upper, **Legislative Council**; lower, **Legislative Assembly.** Council consists of 42 members, of whom 14 retire every two years. Members must possess estate worth £100 per annum. Electors must occupy property worth £10 per annum if freehold, £25 if rented, except they are university graduates, clergy, schoolmasters, doctors, lawyers, or officers of army or navy. Legislative Assembly of 95 members representing 34 districts elected triennially on manhood suffrage. Clergy of all denominations and convicts excluded from both Houses. Victoria is represented in the Federal Council of Australia. Melbourne is said to be the best defended city in the empire. The

colony possesses 2 ironclads, 5 torpedo boats and 2 gunboats, 5 armed launches, and naval reserve of about 620 officers and men, with 84 guns. There is a volunteer militia of 4388, cavalry, infantry, engineers, artillery, with 177 guns. Paid staff, artillery and torpedo corps, number about 335. Education is compulsory, and is free and secular. There is a Minister of Education, who is responsible for appointments and school properties. There are colleges and grammar schools, and numerous private or religious denominational establishments. For financial statistics see BRITISH EMPIRE, etc. (table).—**History.** The Cabinet proposed in Dec. '90 to establish an office in London for the transaction of loan business, and to raise a loan of £350,000 for its irrigation scheme. The deficit on the railway receipts for '90 were £250,000. The oat crop received extensive damage from locusts.—'91. The new Anglican Cathedral for the diocese of Melbourne was consecrated (Jan. 22nd). The wheat crop was attacked by the locusts, which caused a loss of 18,000,000 bushels. A new Victorian Cabinet was formed (April 22nd). An engineer went (June) to King George's Sound to prepare forts to be garrisoned by the Australian Colonies. The expenditure for '90-1 was £9,550,000, and the revenue £8,341,000; the estimated revenue for '91-2 was £8,582,000, and the expenditure £8,982,000. The Earl of Hopetoun opened Parliament (23rd). The late Dr. Beane, a member of the Victorian Legislature, bequeathed £10,000 to the Mayor of Canterbury, England, of which city he was a native. The Yarra-Yarra overflowed its banks (July), inundating the city of Melbourne, blocking the railways, and rendering 1000 persons homeless. There were continued heavy rains, causing floods, which washed away part of the railway embankments, stopping the traffic; the tramway traffic was also stopped. The British Bank of Australia stopped payment (Aug. 15th); the liabilities to depositors were £158,000. The Anglo-Australian Bank suspended payment (18th), with liabilities of £120,000. The Draft Federation Bill passed the Assembly and went to the Council (Sept.). The assembly virtually rejected the Women's Suffrage Bill, the Government withdrawing the proposal (Oct. 2st). The revenue of Victoria for the quarter ended Sept. 30th amounted to £1,980,000, being a decrease of £95,000 as compared with the yield of the corresponding quarter of '90. The Customs revenue showed a decrease of £14,000, the territorial of £22,000, Public Works £33,000, and fees £17,000, while the receipts of the railways were fully maintained. The mace of the speaker of the Victorian Parliament was stolen (9th). A epidemic of influenza broke out, affecting Lord and Lady Hopetoun, the Premier, and the leader of the Opposition. The committee of the House of Assembly agreed that the railway deficit was due to the Government sanctioning the construction of non-paying lines. The officers and men of the Auxiliary Squadron were entertained at Melbourne by the citizens. General Booth was enthusiastically received in the county towns. The Legislature passed the Victorian Loan Bill, authorising the floating of six millions in three annual instalments at 4 per cent. interest or less. A large shipment of butter was made by *Lusitania* to London (26th). There was a serious outbreak of influenza in the city of Melbourne (Nov.).

Victoria Alexandrina, Queen of Great Britain and Ireland and Empress of India, was b. at Kensington Palace May 24th, 1819. She is the only child of the late Duke of Kent, third son of George III., by Louisa Victoria, Princess of Saxe-Coburg, and sister of Leopold I., King of the Belgians. The young princess, whose father died when she was only nine months old, was brought up under the care of her mother, and of the Duchess of Northumberland, who superintended her education. She succeeded her uncle William IV. June 20th, '37, and was crowned in Westminster Abbey, June 28th, '38. She married, Feb. 10th, '40, Prince Albert of Saxe-Coburg Gotha, who died of gastric fever Dec. 14th, '61. Her mother, the Duchess of Kent, died March 10th in the same year. For many years after the death of the Prince Consort, H.M. lived in seclusion, though she regularly performed her official duties. On Jan. 2st, 77, H.M., in accordance with an Act of Parliament adopted during Mr. Disraeli's administration in the previous session, was proclaimed **Empress of India** by the Viceroy at Delhi. On several occasions prior to her marriage the Queen was subjected to annoyance at the hands of insane admirers; and several other attempts have at different times been made upon H.M.'s life. In '69 she published "*Leaves from the Journal of Our Life in the Highlands*," an interesting account of the happy days spent at Balmoral with her husband and family. In '85 a second volume was issued by her under the title of "*More Leaves from the Journal of our Life in the Highlands*." Her Majesty christened the *Royal Sovereign*, which is the largest battleship ever constructed for the British Navy, and the *Royal Arthur* (Feb. 26th, '91), in the presence of a distinguished company at Portsmouth. Visited Grassie in March, remaining until April, and returned greatly benefited in health. Breaking her journey to Scotland, H.M. laid the foundation stone of the new Derbyshire Royal Infirmary at Derby (May). Was present at the wedding of Miss Alberta Ponsonby (June 22nd), and, a week later, at the christening of Lady Alexandra Duff. The visit of the German Emperor to H.M. (July) was the occasion for a large number of Royal entertainments at Windsor and in London, where the Queen held a garden party. H.M. inspected the French Fleet when it visited Portsmouth.

Victoria and Albert, Royal Order of, was instituted in 1856, and enlarged in '64, '85 and '80; is for Ladies, and consists of four classes. Registrar, Sir A. W. Woods.

Victoria Cross, The, was instituted in Feb. 1856 at the termination of the Crimean war, for the purpose of rewarding conspicuous acts of bravery performed by soldiers, sailors, or marines. The decoration consists of a Maltese cross of bronze having the royal crest in the centre, with a scroll bearing the words "For valour." Soldiers upon whom it has been bestowed wear it with a red ribbon, and sailors with a blue ribbon, upon the left breast. Non-commissioned officers and men receive with the V. C. a pension of £10; and each additional act of valour, besides being recorded by a bar placed upon the suspending ribbon, entitles the hero to a further pension of £5.

Victorian Exhibition. This is projected to occupy the New Gallery, Regent Street, as past winters the Guelph, Stuart, and Tudor exhibitions have been held there. It will serve as a record of the reign of Her Majesty the

Queen, '37-57. Portraits of about 400 celebrities who have passed away, as well as portraits of the Royal Family now alive, will form the staple attraction of the exhibition.

Victoria Nyansa Railway. See **MOMBASA.**
Victoria Reading Circle. This was promoted in '87 by the council of the Sunday School Union (*q.v.*). Certain books are selected for the use of the various branches, which has since the Circle's foundation contained a total membership of 4470 persons. See, Mr. J. L. Nye, 56, Old Bailey, E.C.

Victoria University, founded and incorporated by royal charter 1880, grew out of **Owens College, Manchester** (*q.v.*), which was established '51. Besides Owens College it now comprises University College, Liverpool ('84), and the Yorkshire College, Leeds ('87); and consists of a federation of colleges, not necessarily situated in the same district, as at Oxford and Cambridge. **Chancellor,** the Duke of Devonshire; **Vice-chancellor,** G. H. Rendall, M.A. **Registrar,** A. T. Bentley, M.A. Undergraduates about four hundred in number. Grants technical, commercial and literary certificates to properly qualified candidates, and certificates of proficiency to women and examines schools. Its **Degrees** with their hoods are:—**B.A.** (*h.* black cloth or silk with an edging of pale blue silk); **M.A.** (*h.* black cloth or silk with a lining of pale blue silk); **B.Sc.** (*h.* black cloth or silk with an edging of pale red silk); **M.Sc.** (*h.* black cloth or silk with a lining of pale red silk); **LL.B.** (*h.* black cloth or silk with a broad edging of violet coloured silk); **M.B.** (*h.* black cloth or silk with a broad edging of red silk); **M.S., Master of Surgery** (*h.* black cloth or silk with a lining of red silk); **Litt.D., Ph.D., D.Sc., LL.D., M.D.** (*h.* alike—viz., velvet or satin serge of a gold colour, lined with silk of a lighter shade of the same colour).

Viège and Zermatt Railway. This mountain railway (of which some description was given in our last ed., under the heading **VISP-ZERMATT**) was formally inaugurated on July 6th, '91. It leaves the main line of the Jura-Simplon at Viège, and goes through Stalden and St. Nicholas to Zermatt, at the foot of the Matterhorn. The journey occupies three hours, instead of nine or ten as formerly. Mr. Stockalpe was the engineer, and the work was very difficult.

Vienna Improvements. A great scheme, or series of schemes, has for some time been under consideration for the improvement of the Austrian capital. Under date Oct. 6th, '91, the following were reported to be the calculations of the commission appointed in the matter. Preliminary outlay for the construction of the Metropolitan Railway, 60 million florins; for the regulation of the Wien, 33 millions; and for the enlargement of the Danube Canal, 12 millions; total, 105 million florins. It was proposed that the sum be raised by a loan at 4½ per cent., guaranteed conjointly by the State, the province of Lower Austria, and the city of Vienna.

Vienna Musical Dramatic Exhibition, '92. Promoted by the Princess Metternich, well-known for her support of all artistic enterprise. An exhibition, in Vienna, illustrating as completely as possible the history and progress of music and the drama. A committee, under the presidency of H.R.H. the Duke of Edinburgh, is acting on behalf of Great Britain. There will be portraits of eminent composers, actors, actresses, singers, and playwrights; original

MSS., interesting playbills, and musical instruments of all periods. The exhibition will take place in the grounds of the Rotunda, in the Prater.

Villiers, Rt. Hon. Charles P., P.C., M.P., who is entitled to be called the "Father of the House of Commons," is the brother of the 4th Earl of Clarendon, and was b. 1802. Ed. at St. John's Coll., Camb., graduating M.A. ('27), and was called to the bar of Lincoln's Inn in the same year. From '33 to '52 he filled the post of **Examiner of Writings** in the Court of Chancery; and in '35 was elected **M.P.** for Wolverhampton, which he has since represented in Parliament, his constituency, since '85, having been the Southern Division of that town (in the *L.U.* interest). The offices which the **veteran Free Trader**, the colleague of Cobden and Bright in the fight for the Repeal of the Corn Laws, has filled, have been: Judge-Advocate-General ('52-59), President of the Poor Law Board ('58-65). He was raised to the rank of an earl's son in '39, and in '53 became a member of the **Privy Council**. The honour of **peerage**, which was offered to Mr. V. in '85, was gracefully declined by him. He enjoys the reputation of being one of the most famous of present-day conversationalists.

Vine, Sir John Richard Somers, was b. 1847; was private secretary at the Mansion House to Lord Mayors of London '72-5. Acted as secretary to Bengal Famine Relief Fund in '74, and to British fund for relief of the inundated departments of the south of France, was City and official agent to International Fisheries, Health, and Inventions Exhibitions, '83-4-5, and to Royal Commissioners for Colonial and Indian Exhibition '86, and was knighted in that year. Is author of "English Municipal Institutions, their Growth and Development," "The English Code," and other statistical and legal works, and editor and compiler of several year-books. He is a knight of several principal orders. As **assistant secretary** to the Imperial Institute, Sir J. did good service in '89 to that scheme by a visit to the foreign British colonies.

Virgin Gorda. A West Indian island of the Virgin group, belonging to the Presidency of the **Virgin Islands** in the British federal colony of the **Leeward Islands**. Area 10 sq. m.

Virgin Islands. An archipelago in the West Indies, lying immediately to the east of **Puerto Rico**. Of the principal islands Spain holds **Culebra** and **Bicque**, Denmark possesses **Santa Cruz**, **St. Thomas**, and **St. John**, and England owns **Tortola**, **Virgin Gorda**, and **Anegada**. The latter form a presidency of the British federal colony of the **Leeward Islands**. Total area of the presidency 64 sq. m.; total pop. 5,500. (For details see under the name of each island, and **BRITISH EMPIRE**, etc. table.)

Volunteers. Volunteer corps are raised under the Volunteer Act 1863 (26 & 27 Vict., c. 65). They are subject to the provisions of that Act and any Acts amending it, and likewise to all regulations made with regard to volunteer corps by the authority of Her Majesty's Principal Secretary of State for War. The movement originated in '59, the Duke of Westminster, Lords Elcho (now Lord Wemyss), Ranelagh, and Truro, being its most prominent supporters at the onset, and all placing themselves at the head of corps raised in the Metropolis. The enrolled strength of the force has been as follows since its establishment: '60, 119,146;

'61, 161,239; '62, 157,818; '63, 162,935; '64, 170,544; '65, 178,484; '66, 181,505; '67, 187,864; '68, 199,194; '69, 195,287; '70, 193,893; '71, 189,608; '72, 178,279; '73, 171,937; '74, 175,387; '75, 181,080; '76, 185,501; '77, 193,026; '78, 203,213; '79, 206,265; '80, 206,537; '81, 208,308; '82, 207,336; '83, 209,305; '84, 215,015; '85, 224,012; '86, 226,752; '87, 228,038; '88, 226,469; '89, 224,021; '90, 221,048. **Arms.** The latest returns showed the distribution of arms to be: Light Horse, 249; Artillery, 41,422; Engineers, 11,114 Submarine Miners, 1,575; Mounted Rifles, 46; Rifles, 165,395; Medical Staff Corps, 1,247. The officers who have qualified for the 50s. grant after passing the necessary qualifying examination were 6126; sergeants, 13,010. Officers passed the examination in tactics, 1188; officers passed in signalling, 77. **Total number of efficient**, 187,496; percentage of efficiency, 96.04. **Expenditure.** The expenditure on the force is as follows:—Pay of Adjutants, £76,000; pay of Sergeant-Instructors, £93,200; capitulation grants to volunteer corps, £457,100; allowances in aid of volunteer camps, £61,000; stationery allowances—£4 pr. company—£19,000; allowance to Artillery Volunteer Corps for expenses of batteries of position, £10,000; allowance to officers and submarine mining engineers at schools of instruction, £7,000; medical attendance on permanent staff, £5,800; pay of Brigade Majors under mobilisation scheme, £3,000; working pay of non-commissioned officers and men employed in connection with National Artillery Association and National Rifle Association, etc., £3,000; travelling expenses of Adjutants, £2,200; allowance to Artillery Corps for gun houses, £2,200; and payments to Clerks of Lieutenancy, £1,600. **Ministerial statement.** In his statement on the army estimates Mr. Stanhope said: "The volunteers show a reduction in the enrolled numbers of nearly 3,000 men. This reduction is brought about mainly by the very stringent conditions of efficiency, which have weeded out some of the older and less energetic men, but is also partly due to the fact that, whilst efforts have been made to increase the Artillery branch in places where their numbers would be deficient on mobilisation, it has not appeared desirable to allow increases of establishment to Volunteer Infantry in districts where there existed an undue proportion of that arm. Some increases of establishment have, however, been lately sanctioned, and there seems no reason to fear a continued diminution of numbers. I am satisfied that the volunteers we have now are very much more efficient for their duties than before. I am sorry to say that the dearth of officers still continues. While it is mainly due to the increasing disinclination of gentlemen of means and leisure to make the necessary sacrifices, there can be no doubt that the falling off of local subscriptions even in the matter of prizes has thrown greater expense on volunteer officers. During the year '90 eighteen brigade camps were held under the mobilisation, and proved to be an unqualified success in England. The general officers of districts are unanimous in praising the good effect of their camps. In many cases the brigades went into camp well advanced in all their internal arrangements for transport and supply, and for medical and sanitary services, and without any assistance at all from the regular army. The value of this organisation it is impossible to over-estimate, as it at once removes from the volunteer force the stigma which has so long

attached to them, that they are unprovided with commissariat and transport. It is satisfactory also to record the general approval of the work done by the new batteries of position, of which there are now 79 with 316 guns. The value of this addition to our defensive forces can hardly be exaggerated. On the face of the estimates there appears to be a reduction on the volunteer vote of nearly £180,000. This sum, however, represents the expenditure for equipment granted last year. The fact should not be lost sight of, that at the present time every efficient volunteer in the kingdom is in possession of a great coat, valise, haversack, leggings, etc. This marks, of course, a great advance on the old order of things, when only a few favoured corps were in a position to take the field." **Batteries of Position.** For many years there have been a large number of 40 pr. R.B.L. guns on travelling carriages in the hands of the Volunteer Artillery in various parts of the country, and some corps have been in the habit of turning out with these guns horsed, and taking part in field days, reviews, etc. No systematic attempt was made until recently to utilise the guns for defensive purposes, nor to organise them as batteries; they were looked upon in the same light as the other guns in the hands of the volunteers, and used for general purposes of instruction in gun drill and practice. Proposals were made some time ago to utilise these 40 pr. R.B.L. guns, about 110 of which were in the hands of Volunteer Artillery Corps, by forming them into small organised batteries consisting of not less than two guns with two waggons of military patterns. The officers commanding various corps already in possession of these guns were consulted, and a general willingness was expressed to carry out the scheme, provided that some money allowance was granted towards the expense of hiring horses and harness. From a comparison of various estimates from different parts of the country, the sum of £56 was considered a fair allowance per battery of two 40 pr. guns with a proportion of service waggons. Meanwhile the working out of the mobilisation scheme had brought forward in such a prominent way the want of mobile artillery for the defence of the country, that it was considered advisable to give a further and more systematic development to the movement than the original scheme contemplated. Large numbers of Volunteer Artillery exist in inland counties and in the north, where their services as garrison artillery cannot be readily made available for manning our coast defences, situated as these are, to a great extent, in the southern portion of the kingdom. It was therefore decided to allot the available guns to such corps as were not destined to man the guns in coast defence works, and thus to utilise these—chiefly inland—corps to form a force of position artillery which could co-operate with the field army in the general defence of the country. It was also considered advisable that, wherever possible, the guns should be organised in batteries of four guns with a proportion of service waggons, this being for many reasons preferable to a system by which two guns should form a unit. A number of inland corps were accordingly selected, and after some correspondence twenty-one batteries of 40 prs. and 20 prs. were equipped. To equip these batteries twenty-four 40 prs. and twenty-eight 20 prs. R.B.L. guns were issued, and the balance of thirty-two 40 prs. was obtained by

utilising guns already in the hands of the volunteers. An allowance of £112 per battery was granted under definite conditions as to efficiency, etc. A number of 16 prs. R.M.L. guns, which had become available owing to the re-arming of the Royal Artillery, were afterwards offered to volunteer corps, and, in addition, a further number of the 40 prs. already in their hands were grouped into batteries of four guns each, and volunteer corps were invited to horse and man them, an addition of £24 being made in the latter case to the grant of £112 per battery, in return for which the volunteers undertook to provide transport for their ammunition. The grant for the 16 prs. was £100 per battery, as they require less horsing power, and waggon was issued for transport of ammunition. Treasury sanction having been obtained, steps were at once taken to issue the batteries at the beginning of '90; the following guns were in the hands of the volunteers: 3 batteries of 16 prs. R.M.L.; 7 batteries of 20 prs. R.B.L.; 27 batteries of 40 prs. R.B.L.;

total, 67 batteries with 268 guns. These guns, though not of the latest type, are a very important addition to our powers of defence, and have the advantage of firing a much heavier projectile than the field artillery which would accompany an invading army. A further advance was made in '90. Twelve more batteries of 16 prs. became available, and their issue was approved by the Treasury. As regards the work which has been done by the batteries of position, and the standard of efficiency they have attained, the reports received from the Royal Artillery officers in command, and from general officers commanding districts are, in all cases of a satisfactory nature, and in most cases very highly so. The zeal and interest shown throughout, it is said, is very great, and a higher standard of efficiency than has been reached could hardly have been expected, and officers commanding artillery districts express their astonishment at the efficiency to which their batteries of position generally have attained.

W

Wadi Raian Reservoir Scheme. (For previous history see ed. '91.) A summary of a note by the Public Works Department on the summer supply of the Nile was telegraphed from Cairo on Nov. 25th, '90, which showed the necessity of increasing it by storage. This was the case not only as regards the irrigation areas, but the experiences of '88 and '89 proved that only two-thirds of the water required reached Cairo, while the water supply of Alexandria was most precarious. In regard to the Raian project. Col. Ross reported that by increasing the cost to £2,000,000 the filling of the reservoir might be assured in two years, the advantages being stability and control over dangerous floods. The only alternative appeared to be the construction of dams on the Nubian Nile involving the recapture of Berber. (As will be seen in our last ed., Mr. Cope Whitehouse, who brought forward the Wadi Raian scheme, estimated the cost at £1,589,000.) In the House of Commons on June 25th, '91, Mr. Summers asked what was being done, and Sir J. Fergusson stated that the water supply question was one for the Egyptian Government. Various reports had been received from Mr. Cope Whitehouse, but they did not consider they would be justified in incurring the expense of laying them before Parliament." In reply to a further question on July 20th, Sir J. Fergusson said that an offer of Mr. Cope Whitehouse to defray the expense of the maps, etc., had been declined on the 2nd inst., that gentleman being referred to the Egyptian Government. On Aug. 3rd, in the House of Commons, Mr. S. Smith asked if the Under Secretary for Foreign Affairs had seen a letter in the *Times* of July 27th from Mr. W. Willcocks, Inspector of Irrigation, who stated that the summer supply of the Nile was deficient for the existing cotton and sugar crops, and that with a sufficient reservoir the value of these products might be increased by 10 millions per annum. Sir J. Fergusson again referred his questioner to the Egyptian Government. From Cairo, Sept. 1st, it was reported

that the Acting Consul General had informed the British Government that the Department of Public Works had prepared a plan for an adequate water reserve between Assouan and Wadi Halfa, but the scheme would involve the destruction of the monuments of Philæ, and was strongly opposed by the military experts. Another telegram from Cairo (Oct. 5th) stated that it had been finally decided that an International Commission of Engineers was to be invited to meet in Cairo on the question of a storage reservoir. Five schemes were to be submitted, of which three were associated with the names of the late M. de la Motte at Gebel Silicli, Mr. Willcocks at Assouan, and M. Prompt, French Administrator of the Egyptian railways, at points between Assouan and Halfa. These contemplate the construction of dams and the ponding up of the river in the valley itself. Mr. Willcocks also advocates the supplementing of this by reservoirs in the Delta on the edge of the desert. The fifth project is that of Mr. Cope Whitehouse for the restoration of the Raian basin of Lake Moeris. The official opening of the Koshesha Barrage took place on Oct. 17th.

Wakefield, Rt. Rev. William Walsham How, D.D., 1st Bishop of, was b. at Shrewsbury 1823. Ed. at Shrewsbury School and at Wadham College, Oxford, where he graduated, '47. He held successively the curacies of St. George's, Kidderminster, and Iloly Cross. Shrewsbury; the rectory of Whittington, the rural deanery of Oswestry, and the rectory of St. Andrew Undershaft with St. Mary Axe, London. Prebend of St. Paul's Cathedral, '79, and Bishop Suffragan of Bedford in the same year. Dr. H. devoted himself energetically to the work of promoting the well-being of the population in the East of London. He was translated to the new see of Wakefield Feb. 88. He has written several works of a pastoral, exegetical, and devotional character, in addition to his well-known "*Pastor in Parochia*."

Wales, H.R.H. Albert Edward Prince of, was b. at Buckingham Palace, Nov. 6th, 1841;

created Prince of Wales and Earl of Chester, by patent under the Great Seal, on Dec. 4th of the same year; baptised at St. George's Chapel, Windsor Castle, Jan. 25th, '42. Ed. at Christ Church, Oxford (D.C.L. '68), and at Trin. Coll., Camb. (LL.D.), and Edin. Univ. (LL.D.); also LL.D. Dublin ('68) and Calcutta ('74). Prince of the United Kingdom of Great Britain and Ireland, Prince of Wales, Duke of Saxony, Prince of Saxe-Coburg and Gotha, Great Steward of Scotland, Duke of Cornwall and Rothesay, Earl of Chester, Carrick, and Dublin, Baron Renfrew, and Lord of the Isles, K.G., K.T., K.P., G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., P.C. He is personal A.D.C. to Her Majesty the Queen, a field-marshal of the forces, colonel-in-chief of 1st and 2nd Life Guards, and Royal Horse Guards, col. 10th Hussars, hon. colonel of the Oxford and the Cambridge University Corps, of the Middlesex Civil Service Corps of Rifle Volunteers, of the 3rd Batt. Gordon Highlanders, and the Sutherland Highland Rifle Volunteers, hon. admiral of the Fleet. Holds the rank of field-marshal in the German army, and is colonel-in-chief of the 5th Pomeranian Blücher Hussars. He is also colonel of the Austro-Hungarian 12th Regt. of Hussars. Admitted to the Middle Temple, called to the bar and to the bench of that Society (Oct. 31st, '61). H.R.H. is an Elder Brother of Trinity House; also Grand Master of the United Grand Lodge of Freemasons of England ('74); President of the Society of Arts and of St. Bartholomew's Hospital. Married (March 10th, '63) H.R.H. the Princess Alexandra Caroline Mary Charlotte Louisa Julia, eldest dau. of Christian IX., King of Denmark, and sister of the Empress of Russia and the King of Greece. On her marriage the House of Commons voted her a dowry of £20,000, and a pension of £10,000 a year. The Prince and Princess celebrated their silver wedding, '88. In the winter of '71, while staying with his family at his country seat, Sandringham, Norfolk, the Prince was attacked with typhoid fever, which it was feared would prove fatal, but after several weeks' prostration he recovered, and on Feb. 27th, '72, he attended a public thanksgiving in St. Paul's Cathedral. He visited India ('77), and subsequently travelled in the Holy Land, and also visited the United States and Canada. In company with the Princess he made a tour through Ireland ('85), where he met with a cordial reception. He evinced an active interest in the promotion of the late series of Exhibitions held at South Kensington, and despite not a little opposition succeeded in establishing the Imperial Institute (q.v.). In May '91 H.R.H. became a grandfather by the birth of a daughter of the Duchess of Fife. He celebrated his fiftieth birthday in November.

Wales, H.R.H. Prince Albert Victor of. See CLARENCE AND AVONDALE, DUKE OF.

Wales, H.R.H. Prince George Frederick of, and son of the Prince of Wales, was b. 1865. He soon displayed a similar predilection for naval affairs to that shown by his elder brother for military interests. In '79, accompanied by his brother, H.R.H. made a voyage round the world, on board the *Bacchante*, returning to England in '82. Appointed to the command of the new gunboat *Thrush* (March '90). Was promoted to the rank of commander in Her Majesty's Fleet (Aug. '91). Visited Ireland in October. H.R.H. suffered from an

attack of enteric fever (Nov.), which called forth much sympathy.

Wallace, Alfred Russel, LL.D., F.L.S., was b. at Usk in 1822, and educated at Hertford Grammar School. In '48 he accompanied Mr. Bates to the Amazon, and embodied the results of his observations in the regions of that river in "*Travels on the Amazon and Rio Negro*." He subsequently proceeded to Southern Asia, and spent eight years among the Malaya, collecting material for his valuable work "*The Malay Archipelago*." His other important scientific works are, "*Tropical Nature*," "*The Geographical Distribution of Animals*," "*Island Life*," and "*Contributions to the Theory of Natural Selection*." Dr. Wallace published in '82 "*Darwinism*." The publication of his "*Land Nationalisation, its Necessity and its Aims*," led to the establishment of the Land Nationalisation Society, of which he is President. He was awarded the Royal Medal of the Royal Society in '68, and in '70 the Gold Medal of the Société de Géographie de Paris. In '89 Dr. W. published "*Darwinism: an Exposition of the Theory of Natural Selection, with some of its Applications*," which was received with great interest in the scientific world.

War Office. Under this Department are the military factories for the manufacture of arms, gunpowder, etc., and the army clothing depot at Pimlico. The parliamentary chief of the Department is the Secretary for War, who is aided by a Parliamentary Under-Secretary, a Permanent Under-Secretary, and a Financial Secretary. The Commander-in-Chief has charge of the combatant personnel of all regular and irregular forces, and is immediately responsible for their discipline and efficiency; and he makes appointments and promotions so far as they may be made by the Crown, but these are countersigned by the Secretary of State, who is responsible to Parliament. The employment and disposal of the forces come within the province of the Secretary of State. See SECRETARY OF STATE, MINISTRY, and ARMY.

Ward, Mrs. Humphry, the authoress of "*Robert Elsmere*," "a novel of agnosticism," is a daughter of Thomas Arnold, author of the well-known "*Manual of English Literature*," a niece of Matthew Arnold, and granddaughter of Dr. Arnold, of Rugby. She married in 1872 Mr. Thomas Humphry Ward, at that time a tutor of Brasenose Coll., Oxford, now art critic of the *Times*, and editor of a well-known edition of the English poets. She has also written a story, and is now engaged upon another novel. Mrs. Ward has displayed a deep interest in the establishment ('90) of University Hall (q.v.).

Wards of Court. An interesting case with reference to the jurisdiction over wards of court came before the Court of Appeal on July 23rd, '91 (*Bolton v. Bolton*). Miss Eveline Mary Bolton was entitled to a considerable sum of money expectant on her father's death under the will of her grandfather. The grandfather's estate was being administered by the Court of Chancery, and Miss Bolton, while still an infant, was made a party by her father as guardian *ad litem*. In '89, Miss Bolton, being nineteen years of age, became, with the approval of her father, engaged to a Mr. Russell, a commercial traveller earning some £300 a year, and by an order of the Court dated Nov. 9th, '89, Mr. Russell was permitted to visit and pay his addresses to Miss Bolton, in contemplation of his subsequently making proposals to the

Court for marriage. He gave the Court an undertaking to act as became a gentleman and an honourable man, and "in all respects to abide by the directions and orders of the Court." Miss Bolton, being anxious to get married and to find her husband some money with which to start him in business, was advised by her father's solicitor to wait till she came of age, as otherwise the Court would require her property to be put in strict settlement. A week before Miss Bolton came of age, the father learned that the parties contemplated getting married on July 8th, six days after the coming of age. He accordingly took out a summons for directions, but before it could be heard the young lady came of age. Nevertheless, Mr. Justice North's chief clerk made an order restraining the parties from inter-marrying, and it was subsequently confirmed by the judge. The ground stated in the order was that a settlement had been executed by Miss Bolton as soon as she came of age, by which an absolute general power of appointment was given to herself and her proposed husband jointly in priority to the other trustees of the settlement. It was held, on appeal, that the order could not stand, as the Court had no right to restrain the lady now that she had attained her majority, and that the undertaking given by Mr. Russell in '89 to abide by the directions and orders of the Court was only intended to apply to any order made by the Court within its jurisdiction. Even if the undertaking gave the Court jurisdiction it ought not to be exercised, because it would in effect control the power of the lady, now of age, to dispose of her property as she thought fit.

Water Colours. See ROYAL SOCIETY OF PAINTERS IN WATER COLOURS, and ROYAL INSTITUTE OF PAINTERS IN WATER COLOURS.

Waterhouse, Alfred, R.A., was b. 1830. Studied architecture at Manchester. His first important work was the Manchester Assize Court, and he has been the architect of the County Gaol, Owens College, and the Town Hall, in the same city. In London Mr. W. has designed the Natural History Museum, the Prudential Assurance Company's Offices in Holborn, the New University Club, the *New St. Paul's Schools*, and the *City and Guilds Institute* in the Exhibition Road. Balliol College, Oxford, and Caius and Pembroke, Cambridge, have been partly rebuilt from his designs. Elected A.R.A. ('78), R.A. ('85). Mr. Waterhouse has chiefly adapted the Gothic and Romanesque styles of architecture to modern requirements. Mr. W. was confirmed ('90) as a member of the *Berlin Academy of Arts* by Imperial decree. Pres. R.I.B.A.

Waterloo and City Subway Railway. Towards the end of Oct. '91 it was stated that the London and South Western Railway Co. were considering a scheme for the construction of an electrical underground railway from their Waterloo terminus to the centre of the city. It was understood that the idea was to form an independent company to make a line from underneath the Waterloo station to proceed under the Thames.

Waterloo Cup. See COURSING.

Water Polo. See SWIMMING.

Water Supply of London. See SESSION, sect. 133.

Watts, George Frederick, R.A., was b. 1820. In '43 his cartoon of "Caractacus led in Triumph through the Streets of Rome" obtained one of the three highest-class prizes of

£300 at Westminster Hall. Three years later, in a similar competition, his colossal oil pictures, "Echo," and "Alfred inciting the Saxons to prevent the Landing of the Danes," secured him one of the three highest-class prizes of £500. Mr. Watts executed one of the *frescos* in the Poets' Hall of the Houses of Parliament, and painted in fresco the west end of *Lincoln's Inn Hall*. His "Judgment of Paris," contributed to the Grosvenor Gallery in '87, was a canvas of remarkable power and originality of treatment. Elected R.A. '68. Mr. W. executed an excellent portrait of Lord Tennyson during '90.

Ways and Means. The Committee of Ways and Means of the House of Commons (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer (see FINANCE), and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. Thus, in 1885 Mr. Childers' Budget resolutions increasing the spirit duties were agreed to in Committee of Ways and Means, and the higher duties were collected on the following day, and until the bill embodying the resolutions, and the Government which had framed them, were defeated, when the old duties were reverted to. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to Her Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the Appropriation Bill.

Ways and Means, Chairman of. See CHAIRMAN OF WAYS AND MEANS.

Webster, Sir Richard Everard, O.C., M.P., the *Attorney-General*, was b. 1842; ed. at King's Coll. School, the Charterhouse and Trin. Coll., Camb.; was called to the bar at Lincoln's Inn ('68). Rapidly achieved a reputation for his conduct of engineering, patent, shipping, and railway cases. Sir Richard took silk at the unusually early age of 35. M.P. for Launceston '85, and now represents the Isle of Wight. *Attorney-General* in Lord Salisbury's Government of '85, and again in that of '86. Appeared on behalf of the *Times* before the *Farnell Commission*, and his acceptance of this brief led to much acrimonious discussion in the House of Commons, but the motion to reduce Sir Richard's salary was defeated. He is well known for his athletic tastes, and made several "records" when at college.

Weights and Measures, Law as to, in '91. A tradesman, whose weighing machines had been verified and stamped by the local inspector, subsequently sent them to the Board of Trade, who certified that they were false and unjust, and that they could never be made accurate. He subsequently sued the inspector for the fee which he had received, and recovered the amount. (*Wetterburne v. Davis*, Queen's Bench Division, June 11th, '91).

Wellington College (Wokingham, Berks). Founded in 1853, in memory of the great Duke of Wellington. The foundation consists of ninety scholarships for the sons of deceased officers, who are educated for £10 a year. There are also twelve exhibitions of the value of £50 a

year offered annually to sons of officers, and seven open scholarships, besides special foundations. Average number of pupils, 425. *Motto*, "*Heroum filii*." *Chairman of Governors*, H.R.H. the Prince of Wales. *Head Master*, Rev. E. C. Wickham, M.A. *Bursar*, M. S. Forster, B.C.L., M.A.

Wells, Henry Tanworth, R.A., was b. 1828, and devoted the early years of his career as an artist to miniature painting. On the death of Ross, and the retirement of Thorburn, he was *facile princeps* in this department of art. In '61 Mr. W. turned from miniatures to oil paintings, and his pictures soon became popular on the walls of the Royal Academy. He was elected R.A. in '70.

Welsh Local Veto Bill. See SESSION, sect. 82.

Western Australia. A colony comprising all the western half of Australia beyond the 120th meridian of E. long. It is 1,280 miles N. to S., and 800 E. to W. Divided into thirteen electoral and five land districts; also twenty-six counties in S.W. Land districts are Central, Eastern Central, South Eastern, Northern, and Kimberley. Capital *Perth*, pop. 10,000; chief port *Fremantle*, pop. 5,000; other towns *Albany*, *Geraldton*, *Roebourne*, *York*, *Northampton*, etc. *Carnarvon* on the *Gascoyne*, and *Derby* on the *Fitzroy*, are new port-townships in the north. Many rivers: the *Swan*, *Fitzroy*, *Glenelg*, *De Grey*, *Gascoigne*, *Murchison*, etc.; but none navigable at all seasons. Education provided for and compulsory. Western Australia is the only colony of the group which gives assistance to denominational schools. Volunteer force of 588, and one torpedo-boat. There are 515 miles of railway open and 160 under construction, 700 of road, 2955 of telegraph. Great efforts are being made to promote the construction of railways on a grand scale on the "land-grant system," and so to open up back country. For financial statistics see BRITISH EMPIRE, etc. (table). Exports consist of timber, wool, gold, lead, copper ore, whale-oil, guano, sandalwood, pearls and pearl-shell. Imperial Parliament passed the West Australia Enabling Bill, and in September, '90, Sir W. C. F. Robinson, the new Governor, left England with the new constitution, under which the colony is to be ruled by Governor and two Houses of Parliament. The new constitution was proclaimed on Oct. 22nd, '90, by the Governor. The event was made the occasion of much rejoicing, salutes being fired and special services held in the churches. The first Ministry in the first Parliament was formed by the Hon. J. Forrest, Surveyor-General and Commissioner of Lands under the Crown Administration. It was framed as follows: Premier and Treasurer, Hon. John Forrest; Colonial Secretary, Mr. Shenton; Attorney-General, Mr. Burt; Commissioner of Lands, Mr. Marmion; and Minister of Public Works, Mr. Venn. The first meeting was held on Dec. 30th, '90.—'91. The first section of the Midland Railway of Western Australia, from Guildford to Gingin, was opened by the Governor, Sir W. Robinson (April 10th).

Wesleyan Methodists are the followers of the Revs. John and Charles Wesley. The first society was formed in 1739. In 1797, owing to the expulsion of Alexander Kilham from the Methodist ministry, a new society was formed, which began with 5,000 members, and was denominated the "Methodist New Con-

nexion." It has missions abroad, especially in China, and its total membership by last returns was 34,254, with 214 ministers.—In 1811 another society was commenced, as the result of expelling from membership Hugh Bourne and William Clowes; they are called the "**Primitive Methodists**" (*q.v.*); they have foreign missions, and a membership of 101,662, with 1,038 ministers.—In 1815, the "**Bible Christian**" Society was originated by the expulsion of William O'Bryan: they have a mission in Australia, a membership of 30,034, and 251 ministers.—The **Methodist Free Churches** were formed out of members expelled from Methodism in 1828, 1835, and 1849, all of which unallegated in 1857: they have foreign missions in Africa and Australia; their total membership is 85,049, with 421 ministers.—There are also two other small societies, known as the "**Wesleyan Reform Union**," and the "**Independent Methodists**," their united membership being 14,410. The Methodists in Ireland number 25,369, with 236 ministers. The greatest development of Methodism has been in the **United States of America**, where it is now the leading denomination, numerically and financially. The following is a tabulated summary of the Methodists throughout the world, as represented by the official returns published immediately preceding January '91:—

	Ministers.	Class Members.
<i>English Wesleyans in—</i>		
Great Britain	2,018	452,302

Total Ministers and Members		5,444,542

These are duly accredited members of the Methodist Society, heads of families mostly. Take the low average that there are four adherents to Methodism for every member of society, we have a total of persons who

attend Methodist worship constantly of 28,000,000, all of whom properly belong to Methodism. The hundredth anniversary of the death of John Wesley was the signal for the commencement of a series of commemorative services, in which representatives of various denominations took part. A statue of the founder of Wesleyanism, by Mr. Adams Acton, was unveiled on March 22, '91, by the President, in the presence of a distinguished company assembled at City Road. An interesting exhibition of Wesley relics was on view at the Allan Library. The Wesleyan Conference was held in July at Nottingham. The Methodist Ecumenical Conference was held in Washington, U.S.A., in October. The President of the United States paid a visit to the Conference. A large number of English delegates took part in various important debates. President of Conference for '92 is the Rev. Thos. Bowman Stephenson, D.D., LL.D. (*q.v.*). See also LONDON WESLEYAN MISSION. For foreign mission statistics see MISSIONARY SOCIETIES.

Western Africa. British Possessions. For Executive Council see DIPLOMATIC.

West Indies. The name given by Columbus to the islands surrounding the Caribbean Sea. They are divisible into the Bahamas, the Greater Antilles, and the Lesser Antilles. The last are also divided into Windward and Leeward groups; and to them may be added islands off the Venezuelan coast. The total area is estimated at upwards of 90,000 sq. m., and the total pop. at 5,000,000, of whom two-thirds are negroes.

Westminster Abbey Commission. Was appointed, April '90, to inquire into the present state of the Abbey of Westminster, as regards the facilities which it offers for providing for the interment, and of otherwise preserving the memory of Her Majesty's subjects, in the manner which has been customary for many centuries; and to hear evidence, and to consider plans for providing at the Abbey, or elsewhere, an additional place for memorials, should such a provision appear necessary. The Commissioners were—Mr. Plunket, M.P. (Chairman), First Commissioner of Works; Sir Austen Henry Layard, Sir F. Leighton, P.R.A., Dean Bradley, Mr. Jennings, M.P., and Mr. A. Waterhouse, Pres. R.I.B.A. In July '90 the Commission reported that they had examined fourteen witnesses (including one of the Commissioners, the Dean of Westminster), and submitted the evidence then taken. The Commissioners met again in '91, but took no further evidence, and their final report is dated June 24th. As to the space still remaining for interments, the Commissioners think that even if it should be deemed desirable to make use of every spot, available room could not be found for more than ninety or ninety-five coffins. As to monuments, Dean Stanley had held that the time had all but come when it would be impossible, from want of space, to continue to erect monuments within the limits of the existing building, and was stated to have declared in conversation that there remained but two spots still available for the erection of statues to men of the greatest eminence. To the argument that the cloisters might sufficiently provide sites for future monuments, the Commissioners reply that while it would no doubt be possible to put up a few mural tablets in addition to those already affixed to the walls, there is no room for any other kind of sepul-

chral record in those covered walks. Among other proposals mentioned by the Commissioners as having been brought before them, is the adaptation of the existing Chapter House, but they consider this building as being virtually unavailable for the purpose of a monumental chapel. In concluding, the Commissioners reported that space might probably be found beneath the floor of the Abbey for interment for at least a hundred years to come if the duty of granting such burial be discharged sparingly, and with careful regard for the greatness of the national honour thereby conferred; but that no room now remains in the interior of the building for important monumental commemorations. They submitted that the memorials, illustrating the history of England for more than eight centuries, which the Abbey contains, are an inheritance of high national interest and value, and that the roll of such memorials ought to be continued. They were of opinion that no interference with existing monuments, short of removal or re-arrangement on a large scale, would provide adequate facilities for this purpose. Such a course they were not prepared to recommend, and they did not think that even in individual cases memorials should be disturbed contrary to the wishes of the representatives of the dead. They found that provision adequate for such commemoration could not be made in any existing building within the precincts of the Abbey, nor in any place not immediately connected with it. They had therefore taken evidence and considered plans for providing at the Abbey an additional place for memorials; and reported further that of the various schemes which had been brought before them, there were two which they commended as specially suited to the purpose. The one proposed to clear an area now occupied by certain houses in Old Palace Yard, and to erect upon a portion of the ground so cleared a monumental chapel connected with the Abbey at Poet's Corner. They ventured to recommend, whether the latter part of this proposal be adopted or not, that no time should be lost in removing the houses in Old Palace Yard referred to, which not only conceal, to a great extent, the architecture of the Chapel of Henry VII. and the ancient Chapter House, but are also a constant source of danger to the Abbey from fire. The other plan contemplated the erection of a monumental chapel on a vacant piece of ground, the site of the old Refectory, lying immediately south of the Great Cloister and parallel to the nave of the Abbey. They believed that one or other of these last-mentioned schemes would provide a solution of the problem which had been submitted for their consideration. After a careful review of the arguments, they recommended that of the two schemes the latter should be adopted, and that in order to carry it out, so much of the land required for that purpose as, under the Public Schools Act, '68, became vested in the governing body of Westminster School, should be re-conveyed by statutory enactment, if necessary, to the Dean and Chapter of Westminster Abbey. The report was signed by all the Commissioners; but Sir A. H. Layard, Sir F. Leighton, and Dean Bradley appended their names to a further paragraph, in which they said that whilst cordially approving in other respects on the above report, they felt themselves obliged to dissent from its last paragraph, which recommended

the adoption of the Refectory site, and from such other passages as pointed to that conclusion; and advised that preference should be given to the site at the south-east of the Abbey. As between the two sites the Commissioners were therefore equally divided in opinion.

Westminster, Very Rev. Geo. Granville Bradley, D.D., Dean of, was b. 1821. Ed. at Rugby, where Dr. Arnold was then head master, and at Univ. Coll., Oxford, of which the late Dean Stanley was then tutor. He graduated first class in Classics '44, and was elected a Fellow of his College the same year. Subsequently assistant master to Dr. Tait, at Rugby, and Head Master of Marlborough Coll., where he introduced the study of modern languages and science. Elected Master of Univ. Coll., Oxford, in '70, appointed Hon. Chaplain to the Queen '74, Chaplain in Ordinary '76-81, Canon of Worcester Feb. '81, and, in the following August, Dean of Westminster. He is the author of "Recollections of Arthur Penrhyn Stanley," "Lectures on the Book of Ecclesiastes," "Lectures on the Book of Job, delivered in Westminster Abbey" ('87), and of a standard work on Latin prose.

Westminster School, or the Royal School of St. Peter's, Westminster. Founded 1560, reorganised 1868. Foundationalers, 40; 10 annual vacancies. The Westminster Play, an annual representation of a Latin comedy by the scholars, is of some celebrity. There are a number of close scholarships and exhibitions at Christ Church, Oxford, and of exhibitions at Trinity College, Cambridge. Head Master—Rev. W. Gunion Rutherford, M.A. Motto—"Dat Deus incrementum." Registrar, J. Tyson, B.A.

Whitman, Walt, American poet, a native of Long Island, New York, was b. 1810. In his youth he was apprenticed both to the printing and carpentering crafts. He abandoned these, however, for scholastic and journalistic pursuits. In his younger days he was a great walker, and made long journeys on foot through the United States and Canada, receiving inspiration by the way for his remarkable poems, which are characterised by strong individuality and a disregard for literary conventions. The best known of his works are "Leaves of Grass," "Drum Taps," and "Democratic Vistas." During the Civil War he devoted himself to the care of the wounded in the hospitals of Virginia and Washington. He subsequently entered the Government service at the latter city, where he remained till '74, when he retired to Camden, New Jersey. In '87 his English admirers presented him with a testimonial in the form of a purse of gold, amongst the subscribers being Lord Tennyson; and in '89 he received congratulations from *littérateurs* in all parts of the world on the occasion of his seventieth birthday.

Whittier, John Greenleaf, was b. 1807, at Haverhill, Massachusetts, U.S.A. In '29 he became editor of the *American Manufacturer*, a Boston newspaper; afterwards editor of *New England Weekly Review*; entered the legislature of Massachusetts in '35. Became secretary of the American Anti-Slavery Society in '36, at Philadelphia; edited *Pennsylvania Freeman* in '38-39, when his office was sacked and burnt by a mob; returned to his native state ('40), and became correspondent of the *National Era*, an anti-slavery paper published at Washington in '47. Contributed anti-slavery and other lyrics to this paper, and has since lived

for years in literary retirement, publishing some volumes of poems, which have given him a prominent place among American authors.

Wilhelmina I., Queen of the Netherlands, was b. 1880. She is the daughter of William III., of the Netherlands, by his second wife, the Princess Emma Adelaide Wilhelmina Theresa (now Queen Regent). Her mother is sister of H.R.H. the Duchess of Albany, being daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina succeeded to the throne on the decease of her father, in Nov. '90. In June '91 the youthful Queen was visited by the German Emperor and Empress. Her mother acts as Queen-Regent of the Netherlands.

Wilkinson, Rt. Rev. Geo. Howard, ex-Bishop of Truro, was b. '33, and ed. at Oriel Coll., Oxon., graduating B.A. 2nd class Litt. Hum. '55, and proceeded M.A. '59, and D.D. by diploma '83; was ordained deacon '57, and priest '58 by the Bishop of London, and consecrated to the see '83. For two years was curate of Kensington; appointed incumbent of Seaham Harbour '59, and transferred in '63 to Auckland, Durham, and in '67 to St. Peter's, Great Windmill Street, Westminster; here he remained until '70, when he was appointed to the vicarage of St. Peter's, Eaton Square. He was Select Preacher at Oxford '79-81, Hon. Canon of St. Petrock in Truro Cathedral '78-83, and Proctor for the diocese of London '80-83. As an author his lordship is known by his many devotional works. He was compelled by continued ill-health to resign the bishopric in May '91.

Willard, Edward Smith, the actor, was born in '53. When sixteen, he abandoned a commercial career at Brighton, and the Christmas of '69 found him playing at Weymouth in "The Lady of Lyons." He came to London in '81, and under Mr. Wilson Barrett at the Princess's, he played Clifford Armitage in "The Lights of London." His impersonation of the gentlemanly burglar in "The Silver King," for some time stamped him as the first of stage villains. His reputation increasing with every part he undertook, Mr. W., laudably ambitious, assumed leading rôles. At the Shaftesbury, he played in "Jim the Penman," and a little later ('89) made a great advance by his fine performance of Cyrus Blenkarn, the dreaming moody potter in "The Middleman." During next year "Judah" was another success. With these and other plays Mr. W. went to America, where his reception was so encouraging that he repeated his visit in '91.

William II., King of Prussia and Emperor of Germany, is the eldest son of the late Emperor Frederick III., by Victoria, Princess Royal of England, and was b. Jan. 27th, 1859. He succeeded his father June 15th, '88. Ed. at the gymnasium of Cassel, and submitted to the ordinary discipline of that establishment until '77, when he entered the University of Bonn. He married on his twenty-second birthday, in '81, the Princess Augusta Victoria, of Schleswig-Holstein-Augustenburg, a niece of Prince Christian. The Labour Conference, inaugurated by the Emperor in '90 was a decided success. In the early part of '91 rumours were current as to serious reprisals on the part of Prince Bismarck with regard to the Emperor. A state visit to Heligoland and to Amsterdam took place previous to His Majesty's arrival in England, accompanied by the Empress, in July.

They were entertained at a series of splendid festivities. State visits to the City of London, where the Emperor was presented with its freedom, and to the Opera and the Albert Hall, were features of his tour. He reviewed the volunteers at Wimbledon, was present at the wedding of Prince Aribert of Anhalt with Princess Louise, daughter of Prince and Princess Christian, and paid a visit to the Marquis of Salisbury. He met the Emperor of Austria (Sept.) previous to returning to Berlin. An accident—the result of a fall—incommoded His Majesty for some weeks. He was visited by the King of Roumania at the end of October. See GERMANY.

William II., King of Württemberg, was b. in 1847. He is a grandson of the late King's uncle. He married Princess Marie of Waldeck-Pyrmont, who died in '82. He next married Princess Charlotte of Schaumburg-Lippe. He is a Protestant, but in the event of his death without issue, the Crown will pass to the Roman Catholic branch of the family. On the decease of King Charles (Oct. 6th '91), he ascended the throne.

Williams, George, the well-known founder of the Young Men's Christian Association (*q.v.*), was b. at Dulverton, Somersetshire, on Oct. 11th, 1821. After private education, he commenced his business career at Bridgwater, but soon removed to London in '41, when he entered as junior assistant in the establishment of Messrs. Hitchcock & Rogers, drapers, St. Paul's Churchyard. Struck with the neglected condition of young men, he soon gathered together a company of those employed in this establishment, with the result that Mr. Hitchcock became converted, and gave them the greatest encouragement. Widening their borders, twelve of them met on June 6th, '44, and founded the Young Men's Christian Association, which was designated as "a society for improving the spiritual condition of young men engaged in the drapery and other trades. Since that date, when Mr. W. became its first treasurer, the Y.M.C.A. has held the chief place in the philanthropic work of its founder, although numerous societies claim his energies and generous support. He was taken into partnership by Mr. Hitchcock, and, on his decease became head of the firm, which now is styled Hitchcock & Williams. Mr. W. is one of the most familiar figures at the annual "May meetings," and in connection with many charitable institutions.

Will Cases in '91. A curious case came before the Courts in connection with the will of the late **Sir Edgar Boehm**. It appeared that the deceased had given instructions to have a will prepared, under which he intended to leave £10,000 to each of his daughters, Georgiana and Florence. The will was duly executed, but it was subsequently found that the name of Georgiana had been inserted twice over by a mistake in drafting, and that she, therefore, took two legacies of £10,000 each, while her sister Florence took nothing. This was only discovered after the deceased's death. An application was therefore made to the Probate Division for probate of the will with the name of Georgiana struck out in one place, and a blank left where it had been so inserted. Mr. Justice Jeune acceded to the executor's request in this respect, and the matter subsequently went back to Mr. Justice Chitty, with a view of the restoration to Miss Florence Boehm of

the portion which her father had evidently designed for her.—A person who died domiciled in England, bequeathed £1000 to a religious society at Richmond, Victoria, to be spent in masses. It was held that, though the gift was good according to the law of Victoria, yet, as the deceased had an English domicile the gift failed, by reason of its being a gift for a superstitious use, under 6 Edw. VI., cap. 17. (*In re Elliott*, Chancery Division, Jan. 16th, '91.)—A singular point was raised in *Re Lorry*, deceased (Chancery Division, April 10th, '91). A deceased testator directed his trustees to pay the income of his property during the life of his son to his son's wife and to his son's children in equal shares, and after his son's death to his son's widow and to his son's children in equal shares. The son was married at the date of the will, but his wife died shortly after the testator's death, and he married again. The question therefore arose, whether the son's second wife was entitled to a share of the income, her husband being still alive. It was held, looking at the scope of the will, which contained a provision generally for the son's family, that the second wife was entitled to a share of the income.—The Trade Union Act of '71 permits a trade union to purchase or lease land not exceeding one acre, and to sell, exchange, lease, or let such land. It was held that these words pointed to an ordinary buying for money, and that a bequest of land to a trade union, even though less than one acre in extent, is void. (*In re Amos*, Chancery Division, May 28th, '91.)—Where a bachelor had married a widow with children, who survived him, and there were no children of the marriage, it was held that, by using the phrase "our children" in his will, he had given his estate to the children of his marriage, who did not exist, and that consequently the next-of-kin were entitled, as in a case of intestacy. (*Re Baynam*, Chancery Division, June 12th, '91.)—A testator, by his will, gave to his nephew "my old mahogany desk, with the contents thereof; my double-leaved mahogany table, and Dr. Adam Clark's 'Commentaries.' Subsequently, the desk was found to contain bank-notes and coin, a banker's deposit receipt for £60, promissory notes for considerable sums, and a number of papers of no value. It was not disputed that the bank-notes and coin passed under the bequest, but it was argued that some of the other securities did not, as they did not of themselves confer a title on the bearer. The Court held that the testator intended to pass the securities in the desk, and gave judgment accordingly.—In a case in which a testator directed his residuary estate to be divided equally between the National Lifeboat Institution and the "Greenwich Royal Hospital," it was held that the "Royal Hospital, Greenwich," was intended, and that the *Seaman's Hospital Society* and the *Miller Hospital* and *Royal Kent Dispensary*, were not entitled, as they alleged, to come within the description contained in the will.—A beneficial legacy is liable to duty, but where a trust is created for the benefit of others there is an exemption from such duty. In the case of the *Attorney-General v. Sharpe* (Queen's Bench Division, Dec. 16th, '90), the testator had, by his will, directed his executors to invest a sum of £5,000 and pay the interest to a lady, provided that she should act as guardian to his children and provide them with a home. She was not,

however, to be deprived of the income from the £5000 while she remained unmarried, though no child of the testator should reside with her. It was held that, in these circumstances, the bequest was for the lady's benefit, and did not create a trust which would exempt it from liability.

Williams, Sir Roland Vaughan, Q.C., who succeeded Mr. Justice Manisty in the Court of Queen's Bench, is a son of the late Sir E. Vaughan Williams, formerly a Judge of the Court of Common Pleas, and was b. 1838. Ed. at Oxford; called to the bar at Lincoln's Inn '64, and practised on the S.E. Circuit as well as at the Surrey Sessions. Q.C. '89. Has more than once acted as Commissioner for a judge on Circuit, so that his elevation to the bench (Feb. '90) was no surprise.

Wills, Sir Alfred, a judge of the Queen's Bench Division, was b. in 1828, and after a distinguished academical career, entered at the Middle Temple, by which Inn he was called to the bar in '51. He obtained a solid reputation as a junior. Q.C. '72. His appointment to the bench enriched the judicature with the presence of an able lawyer and a man of the highest personal character. Mr. Justice Wills has published one or two little works about Alpine scenery. Appointed President of the Railway Commission '88.

Winchester, Rt. Rev. Anthony Wilson Thorold, Lord Bishop of. The see was founded in 635, and has an income of £6500. In precedence bishops of this diocese rank after London and Durham. His lordship, the 85th bishop, was b. June 13th, 1825. Ed. at Queen's Coll., Oxford, graduating B.A. '47, D.D. by diploma '77. Ordained deacon '49, priest '50, by the Bishop of Manchester, consecrated Lord Bishop of Rochester '77, and translated to Winchester '90. His lordship was rector of St. Giles-in-the-Fields '57-68, minister of Curzon Chapel, Mayfair '68, vicar and rural dean of St. Pancras '69-77, Canon of York and Examining Chaplain to the Archbishop of York '74-7, Select Preacher at Oxford '78-80. Member of the School Inquiry Commission '64; member of the first School Board for London '70. Among his lordship's best-known works, in addition to commentaries on the New Testament, are "The Presence of Christ" and "The Work of Christ." Is a Governor of Charterhouse and of Dulwich Coll.

Winchester College, the oldest of our public schools, founded (1387) by William of Wykeham, as a nursery for the "New College" he had recently founded at Oxford. About a dozen vacancies yearly occur for foundationers, who are elected by the governors after open competition. Her Majesty gives two gold and two silver medals to be competed for. Tenable at the Universities are four exhibitions of £50 for four years, and at New College, Oxford, six scholarships. Head Master—Rev. W. A. Fearon, D.D. Motto—"Manners maketh man."

"Winter, John Strange" (Mrs. Henrietta E. V. Stannard), is the only daughter of the late Rev. Henry Vaughan Palmer, and was b. at York in 1836. Was recently eulogised by Mr. Ruskin as "the author to whom we owe the most finished and faithful rendering ever yet given of the character of the British soldier." Her books "Cavalry Life" and "Boots's Baby" have attained a remarkable success. Was married in '84 to Mr. Arthur Stannard, a civil engineer. She published in '90 "Mrs.

Bob." Is editing a weekly publication entitled "Golden Gates." During '91 she published "The Other Man's Wife," "Good-bye," and "Lumley the Painter."

Wolsley, General, 1st Visct., K.P., G.C.B., G.C.M.G., was b. in 1833, at Golden Bridge House, in the county of Dublin. Entered the army in '52. As ensign he served with the 80th Regiment in the latter part of the second Burmese war. He was dangerously wounded at the head of a storming party in the last and most critical action of the war. As lieutenant he served in the Crimea from Dec. '54 with the 90th Light Infantry, and as assistant engineer, and was twice wounded. Attaining a captain's rank, he served in India with the 90th, and on the staff in the campaigns of '57-9, and received a brevet majority. As lieutenant-col. he served in the China war of '60; and as colonel in Canada from '62-70, in which last year he commanded the Red River Expedition. As major-gen. Sir G. W., K.C.M.G., commanded the troops in the Ashantee War in '73-4; and as lieutenant-gen. he held the command of the troops in the South African War in '79. Commanded the army in the Egyptian War of '82, and was raised to the peerage after the victory of Tel-el-Kebir. He also commanded in the Sudan campaigns of '84-5, and was made a Viscount and K.P. Lord W. received £25,000 for services in Ashantee, and £20,000 for Egypt. He has held many staff appointments, and has been High Commissioner to Natal and to Cyprus. Appointed Adjutant-General '82. Lord W. contributes occasionally to periodical literature; of his "Soldier's Pocket-book" several editions have appeared. Appointed ('88) Ranger of Greenwich Park. In Oct. '90 he took up new duties as Commander-in-Chief of the Army in Ireland.

Women's Clubs. See CLUBS FOR LADIES.

Women's Trade Unions. One striking result of the Labour Movement (*q.v.*) during '90 was seen in the combinations formed by many female workers. An important example of this was seen in the **Women's Trade Union Association**, which was founded immediately after the dock strike at a meeting held at the Great Assembly Hall, Mile End, early in Oct. '89. Its function is to encourage the formation of women's unions which when founded are self-supporting and self-managing, the Association only providing the initial expenses of formation. The weekly contribution is in most cases 2d., in some 1d.; in hardly any is there a sick or out-of-work benefit. The most flourishing unions formed by the Association are the Confectioners' and Kope-makers' in London, but help has been given to various provincial unions during the year. The objects of the body were defined as follows, in a letter published in Feb. '90: "(1) To educate working women in an understanding of their own economic interests, and to help them to organise. (2) To assist them in those cases of imposition and oppression which are found to occur, and to defray legal expenses if necessary. (3) To provide an East End office, developing into a labour bureau, which shall also be a cheerful meeting-place, with papers, magazines and other means of

education." A club has been established for members of Unions. The rent, lighting and firing are covered by donations received for that special purpose. The management is to be entirely in the hands of the members; but a lady of experience in these clubs, who is a member of the committee of the Association, is acting as Secretary of the Club. Donations to the Club are kept separate from the main fund, which is devoted solely to propaganda work, and to supporting any women who may be discharged solely on union grounds. No part of the fund is allowed to support strikes. Sec., Miss Clementina Black. Offices, Assembly Passage, Mile End Road, E.

Wood, General Sir Henry Evelyn, V.C., K.C.B., G.C.M.G., was b. at Cressing in 1838, and entered the navy in '52. Served in the Crimea, and was injured at the assault on the Redan. In '55 he joined the army as cornet of the 13th Light Dragoons. Served in India, and, while commanding the 1st Regt. of Bealson's Irregular Horse, won the *Victoria Cross* for bravery in '59. As lieutenant-col. of the 90th Infantry went through the *Ashantee* war. Became C.B. in '74, and was raised to the brevet rank of colonel. Previous to the Zulu war he joined the Middle Temple, and was called to the bar '74. After defeating the Zulus at Kambula, he became brigadier-general, and was also present at Ulundi. In '79 he met with a triumphant reception in England, and became K.C.B. Served through the *Transvaal* war as major-general, and was one of H.M.'s Commissioners for settling the *Transvaal* limits ('81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the *Egyptian expedition*, receiving the thanks of Parliament in '82. He also served in the Soudan. Since '89 he has commanded the *Aldershot* district. After such a varied career, his popularity is very great in naval, military, and legal circles.

Woolner, Thomas, R.A., was b. 1825, and studied under William Behnes. Exhibited remarkable skill in producing models of a poetical and historical character. His "Death of Boadicea" ('43) attracted much attention. He visited Australia in '54. Amongst his latest works are statues of Captain Cook for Sydney harbour, of Sir Stamford Raffles for Singapore, and of Bishop Fraser of Manchester, and the monument to Sir Edwin Landseer in St. Paul's Cathedral. Elected R.A. ('74); he was for some years *Professor of Sculpture* in the *Royal Academy*. Mr. Woolner is also a poet, and published in '63 "My Beautiful Lady," which ran through several editions.

Worcester, Rt. Rev. John James Stewart Perowne, Lord Bishop of, was b. at Burdwan, Bengal, and ed. at Norwich Grammar School and Corpus Christi Coll., Camb., becoming Bell's Univ. Scholar in 1842. He was ordained deacon '47 and priest a year later. He became assistant tutor of Corpus Christi Coll.; was for some time divinity lecturer at King's Coll., London; and afterwards examining chaplain to the Bishop of Norwich. *Vice-Principal* of Lampeter Coll., which owes much to his strenuous activity; *Hulsean Lecturer* in '68; and was seven years later appointed chaplain to the Queen. The restoration of Peterborough Cathedral, whither he went as dean in '79, has been largely owing to his efforts. He formed one of the Convocation Company of

Old Testament Revisers, and was select preacher before the Univ. of Oxford in '88. His idea of considering the solution of ritual difficulties resulted in the formation of a body entitled Churchmen in Council (*q.v.*). Dr. Perowne has a high reputation for many theological works written from the evangelical standpoint. His appointment as successor to Dr. Philpott in the see of Worcester was notified at the end of Oct. '90.

Working Men's College. This was founded in 1854 by the late Frederick Denison Maurice, and has for its object instruction at the smallest possible cost (the teaching being almost wholly unpaid) in the subjects with which it most concerns English citizens to be acquainted. It thus places a liberal education, comprising the branches of Latin, Greek, French, German, Law, Geography, Euclid, etc., within the reach of working men. Free lectures are delivered on Saturdays at 8.30 p.m. A library, common-room, and museum are provided at the College, 47, Great Ormond Street, W.C. Principal, Rt. Hon. Sir J. Lubbock, Bart., M.P.; Sec., H. R. Jennings.

World's Fair. See CHICAGO WORLD'S FAIR. **Worsteds Goods.** See TRADE, '91.

Wrangler. The title given to some thirty of the most successful competitors in the highest mathematical examination at Cambridge, answering to the first class in the final mathematical schools at Oxford. The examination, formerly held in January only, takes place twice in the year, the Tripos list being also issued in June. Senior Wrangler for '91, Mr. James Goodwillie, of Corpus Coll. Mr. G. was b. at Liberton, near Edinburgh, and ed. at Edin. Univ.

Wright, Sir Robert Samuel, M.A., B.C.L., who succeeded the late Mr. Baron Huddleston, was ed. at Balliol College, Oxford, where he took a 1st Class in Classical Mods ('59), and, in the following year, in *Literæ Humaniores*. He also was awarded three University prizes—the English essay, the Arnold essay, and the Latin verse prize,—and gained the Craven Scholarship in '61. Was elected a Fellow of Oriel, and was called to the bar of the Inner Temple four years later. Joining the northern circuit, he held the office of Common Law junior counsel to the Treasury until Dec. '90, when he became a Justice of the High Court. His marriage to Miss Chermiside took place in Aug. '91.

Wright, Thomas, the editor of the *Morning Advertiser*, was b. in Leicester 1841. Joined the staff of the *Leicester Chronicle* in '59, and in '62 came to London as assistant to Dr. J. Campbell in the editorship of the *British Standard*. Entered the Reporters' Gallery in '66 as a temporary member of the *Times* cords during the absence of one of the staff. The following year he took a Gallery engagement on the staff of the *Morning Advertiser*, which he retained till '73, when, at the request of the editor, Col. Richards, he accepted the post of sub-editor. This post he held till '86, when he was appointed editor of that journal.

Writs. Should a seat become vacant during a session, from any one of the causes mentioned under the head of *HOUSE OF COMMONS*, a new writ is moved for at the commencement of an ordinary sitting, generally by one of the whips of the party to which the late member belonged. Provision is also made for the issue of writs during the recess without the intervention of the House, it being enacted that the

Speaker may, on the production of a certificate signed by two members that a member has died, or accepted an office held direct from the Crown, or has been called to the House of Lords, or that the seat has become vacant by the bankruptcy of a member, order a writ to be issued for a fresh election to fill the vacancy thus caused. But a writ may not be issued during the recess on the acceptance of the Chiltern Hundreds or of the like offices. The Lunacy (*Vesting of Seats*) Act, 1886, provides a procedure by which the seat of any member who may have been received into a lunatic asylum shall be declared vacant.

Württemberg, King of. See WILLIAM II., KING OF WÜRTENBERG.

Wyndham, Charles, was b. at Liverpool

1841, and was ed. for the medical profession in England as well as Germany. He is a Doctor of Medicine and a Licentiate of both the Royal College of Surgeons and the Apothecaries' Hall. Made his *début* as an actor in '61, at Washington. Shortly afterwards he served as surgeon in the Confederate army during the civil war. First appeared on the London stage in '66, and has always maintained a high reputation as a leading comedian. For many years Mr. Wyndham has been lessee of the Criterion Theatre. In Feb. '87 he was the recipient of a massive loving cup from the Prince of Wales as a souvenir of a performance of "David Garrick" at Sandringham. Mr. W. performed in Berlin the latter play in German during '88. During '91 Mr. W. appeared in "Sowing and Reaping" and "Dearest Mamma."

Y

Yachting. After the close struggle for premier honours which took place in '90 between the *Thistle* and *Juerna*, it was only to be expected that, with the subsequent purchase of the former by the German Emperor (who re-named her the *Meteor*), Mr. Jameson's stately cutter would have matters pretty well her own way in British waters in the contests of '91; and in this respect anticipations were fulfilled, though she found a formidable opponent in the Earl of Dunraven's *Valkyrie*. In the memorable races in which the two first-mentioned yachts met, the *Juerna's* (118 tons) record was a trifle the best; and she showed a marked improvement upon her experimental centre-board being removed, more especially in light winds. This season she made 28 starts, winning 15 first and 7 other prizes, the value of which reached close upon £11,100. The *Valkyrie* (78 tons) is credited with £835, the result of 11 wins and 4 seconds out of 27 starts. At the head of the "40's" comes the new Scotch-built cutter, Mr. J. A. Inglis' *Thalia*, which made almost as successful a *début* as did the *Juerna* in the previous year, though her record was helped by some sails-over at the West-Country regattas, towards the close of the season. She started on 32 occasions, and gained 18 first and 7 second prizes, the value of which reached £796. Mr. A. D. Clarke's cutter *Reverie*, a Southampton "40," also made a creditable first-season display, and finished second in her class, with 7 firsts and an equal number of seconds, the value of which amounted to £423. The *Croale's* performances fell below those of '90, when she was credited with fifteen flags for £510, as against 5 wins and 11 minor prizes for £285. A notable record was made in the "20" rating class by Mr. T. C. Hill's Clyde-built cutter *Dragon*, which made 31 starts, and won 27 firsts and 3 seconds, the value being £506. In the only other race in which she failed to obtain honours she lost her mast when holding a leading position. In this class Captain T. Clarke's *Velsia* stands second, with 6 wins and 15 seconds (value £264), a falling off as compared with the 26 prizes (value £523) placed to her credit in the previous year. Though racing only in Southern waters, the Hon. V. Montagu's cutter *Siola* gained 4 firsts and 9 seconds (value £120) out

of 19 starts; while Mr. McGildowney's *Clarissa* out of 25 attempts was only placed first on one occasion, but was second four times. Messrs. Allan's *Dora*, which boasts a centre-board, heads the "10" rating class, with a score of firsts and 3 seconds (value £160) out of 31 essays; *Decima* only started 14 times, but is credited with prizes to the value £104; whilst *Dis* is credited with £59 for 5 prizes gained in 10 starts. The "5" rating class—which, for the first time, was taken under the aegis of the Royal Yacht Squadron—furnished some very good racing. The advent of Mrs. Schenley's *Windfall* and Mr. P. Perceval's *Savourna* aroused much interest, and both fully justified the anticipations of builders and owners. The first-named won 19 firsts and 12 other prizes (value £160) out of 39 starts; whilst the *Savourna*, which did not commence so early in the season, gained 17 first and 14 other prizes (value £115) out of 37 attempts. Mr. A. Jameson's *Glycera* did best at the Irish regattas, and placed prizes to the value of £86 to the credit of her owner; *Alweda* comes next with £51, followed by *Quinque* with £30, and *Ierna* with £28. In the "2½" rating class, the *Babe*, which headed the list last year, experienced no difficulty in maintaining her position, her most dangerous rivals being the new boat *Avadavat* and *Fiera*, who come second and third respectively. At the Royal Yacht Squadron Regatta off Cowes, held in the first week of August, the race for Her Majesty's Cup attracted the following starters: Lord Iveagh's *Cetonia*, schooner, 157 tons rating; the Earl of Caledon's *Viking* (*nee Wandur*), yawl, 120; the Earl of Dunraven's *L'Esperance*, cutter, 61; Mr. J. Mulholland's *Egeria*, schooner, 118; the Prince of Wales's *Aline*, schooner, 149; and Lieutenant Lillingston's *Kirmew*, yawl, 57. They finished in the order given, the coveted trophy going to the *Cetonia*. The *Yarana*, which raced the *Valkyrie* so hard in '90, proved a comparative failure in '91, when she sailed under the name of *Maid Marion*, and only won prizes of the value of £90. *Columbine*, the new yawl built for Mr. Paget, the commodore of the Royal Victoria Club, won 7 firsts and 5 seconds out of 28 starts; *Leith* credited Mr. Watson with £258, her victories including the Queen's Cup at Dover, which was taken out of the almost

actual possession of the *Iverna* by re-measurement after the race; and the veteran *Neptune's* fourteen flags represent a monetary value of £275. The Council of the Yacht Racing Association had several matters of importance to consider during the season; and a resolution passed by them on Aug. 15th, with reference to the size of boat or yacht they should legislate for, gave rise to much adverse comment. The resolution referred to was to the following effect: "It is desirable to limit the size of yacht the Y. R. A. shall legislate for, or notice, or decide protests for; and that the exact limitation be determined at the next meeting of the council." This, it was contended, amounted to saying that the association should not notice yachts or boats below a certain rating in any way whatever—neither measure them, class them, nor decide protests for them. As a consequence, a largely attended meeting of owners of yachts of and under 2½ rating was held at the George Hotel, Portsmouth, on Aug. 29th. On behalf of the seconder of the resolution objected to, it was stated that there had been a misunderstanding as to what the council proposed to do; that they were perfectly willing to legislate for the smaller classes, but wanted some expression of the views and wishes of those interested in the "2½ raters." Eventually it was proposed "that an association be formed for 2-raters and under, and that the Y. R. A. be asked to form a branch or sub-council, with rules and regulations to be framed by a committee of boat owners, such rules and regulations to be only applicable to such boats." Admiral Hallowes proposed as an amendment, "That no association, separate from the Yacht Racing Association, be established, unless that association should decide to exclude the small classes from the operation of its rules." This was carried; and after a long discussion, Mr. Tatham moved, Mr. Quilter seconded, and it was resolved unanimously, "That, in the event of the Y. R. A. declining to legislate for boats under 2½ rating, the association be asked to accept two delegates from each recognised club as members of their council, and to delegate them to deal with the smaller classes under the Y. R. A. rules." The question of the shifting of centre-plates during a race was also considered by the Yacht Racing Association, the case in point arising in the course of a match at the Royal Western Club (Scotland). This matter was fully fought out by the council when the restriction on the use of the centre-plates was abolished, the conclusion arrived at being that as the weighted centre-board had not come into existence in America—the home of centre-boards—it would not do so in this country. Hence it was considered at that time sufficient to enjoin, on such a possible thing as a heavily weighted centre-board, that only manual labour should be employed in using it. As a matter of fact, however, a comparatively heavy centre-plate can be used, with manual labour only, in a small yacht; and though it was decided, in the particular instance submitted, that no infringement of the rules had taken place,—i.e. the centre-plates could not be regarded as ballast,—it was stated that the council intended taking an early opportunity for considering the desirability of altering the existing rule with regard to centre-boards. The question of limiting crews in small boats when in competitive sailing formed another subject of discussion, especially amongst Solent yachtsmen;

and it may be added that any proposition to reduce in length the courses over which our leading races are now sailed over would meet with general approval. American yachtsmen became greatly excited over what is known as the "Gracie-Volunteer" fouling case; and it appeared as if more than one lawsuit would arise out of remarks made during the controversy. The mishap arose at the finish of a race, when both were about to stand close-hauled past the winning mark on starboard tack; but *Gracie*, it appears, could not quite clear the mark without giving a smart luff up, and then shoot past it. She consequently hailed *Volunteer* for room, as she was unable to clear the mark unless *Volunteer* luffed up also or stayed. The American rule on the point is as follows: "If an overlap exists between two yachts when both of them, without tacking, are about to pass a mark on the required side, then the outside yacht must give the inside yacht room to pass the mark," by luffing up (short of tacking). The contention of the *Volunteer* in effect was that the *Gracie* could not have weathered the mark by luffing and shooting round it, as she was heading too far to leeward of it; the *Gracie* people, on the other hand, alleged that they could have done so. The protest was lodged by Captain Earle, of the *Gracie*; but after due deliberation the New York Yacht Club regatta committee dismissed it, and exonerated those responsible for the course taken by the *Volunteer* from all blame. Of the 38 leading yacht clubs in the United Kingdom the oldest is the *Cornwall*, which was established at Falmouth as far back as 1720, although the date of the Admiralty warrant is the same as that of the *Northern*, stationed at Rothsay. Yachts of 15 tons and upwards, Government measure, must be registered at the Custom House in London, or at one of the ports, and owners are prohibited from flying the colours of the club to which they belong without first obtaining the necessary Admiralty warrants. The rules of sailing, scale of time allowances, and measurements, are guided by the code arranged by the Yacht Racing Association in '80. The *Prince of Wales* is Commodore of the *Royal Yacht Squadron* (Cowes), and it was this club that first presented the coveted cup for open competition in '51, when it was won by *America*, a schooner flying the stars and stripes. The owner of this yacht subsequently set the trophy apart as a "perpetual challenge for friendly rivalry between foreign countries." Consult "A Manual of Yacht and Boat Sailing" (Dixon Kemp, Field Office, 346, Strand, W.C.), and "Yachting," in the Badminton Library Series.

Yeames, William Frederick, R.A., is the son of Mr. W. Yeames, who was British consul at Taganrog, South Russia, where he was b. 1835. Received tuition in art from George Scharf and others. After studying at Florence and Rome, he exhibited in '59 at the Royal Academy two pictures. His speciality has been historical pictures—e.g., "Lady Jane Grey in the Tower." Elected A.R.A. in '66, and twelve years later became R.A.

Yeomanry. This force has in some measure changed its aspect of late years. It was until a few years back composed almost entirely of farmers, the commissions being held by the nobility and landed gentry. Owing, however, to agricultural depression and other causes the farmer element is by no means as prominent as it used to be. In populous districts it is

being replaced by a class of men who adopt soldiering because they like it, and who are anxious to fulfil all War Office requirements. The force is organised in regiments, thirty-nine in number. They are called out annually for training for eight days, during which time officers and men receive pay at the following rates *per diem* :—Lieut.-Colonels, 23s.; Majors, 19s. 3d.; Captains, 14s. 7d.; Subalterns, 8s.; Surgeons, 11s. 4d.; Veterinary Surgeons, 8s.; Sergeants, Corporals, Trumpeters, and Privates, 7s. The force is liable to be called out for service in any part of Great Britain in case of threatened invasion or to suppress civil riots. A return issued in April '91, giving particulars of the force, as supplied by the training reports of '90, shows that the total enrolled strength was 10,697—669 Officers, 39 Adjutants, 237 Sergeants (permanent staff), 935 Sergeants (yeomen), 197 Trumpeters, 661 Corporals, and 7,959 Privates. The training-field statistics gave 9251 out of this 10,697 as present under arms. The statistics of horses show that 6,582 are the property of their riders, 1,407 are the property of relatives or friends, and 1,257 are hired—total, 9,246. The musters at training for '90 show the following corps to be strongest, having over 300 of all ranks actually on parade: Cheshire, 365; Leicestershire, 360; Royal North Devon, 348; Staffordshire, 344; Gloucestershire, 339; Ayrshire, 337; Buckinghamshire, 318; Yorkshire Hussars, 309; Worcestershire, 306; and Shropshire, 305. Corps numbering between 200 and 300: Royal First Devon, 295; Duke of Lancaster's Own, 284; North Somerset, 265; Northumberland, 261; Westmoreland and Cumberland, 260; Southern Nottinghamshire, 259; Yorkshire Dragoons, 255; Montgomeryshire, 254; Royal Wilt, 251; Lancashire Hussars, 237; Warwickshire, 236; Derbyshire, 204; and Dorsetshire, 202. Corps with forces numbering between 100 and 200: Oxfordshire, 193; Denbighshire, 191; Lanarkshire, 187; Royal East Kent, 177; Sherwood Rangers, 177; Second West York, 177; Royal Glasgow, 173; Pembroke, 162; Middlesex, 159; Hampshire, 147; Hertford, 146; West Kent, 135; Berks, 134; Suffolk, 120; Lothians and Berwickshire, 119. In his statement on the Army Estimates the Secretary of State for War said: "The Yeomanry continues to be well reported upon as regards general efficiency, and its numbers remain almost stationary. Some alterations advantageous to the force have been made in the regulations, in respect of men kept from duty by sickness, the injury allowance to men and horses, and the travelling expenses of the permanent staff. The tenure of command has been reduced to five years with power of renewal."

Yokohama Harbour Works. A detailed account of the extensive works of the Japanese Government in this harbour is contained in the last British Consular report published in this country in Aug. '91. The chief features are two breakwaters, one on the north and the other on the east, training works for the river which discharges itself into the bay on the north-west side of the harbour, and a pier for sea-going vessels. The breakwaters have a total length of 12,082 ft., terminating 1 ft. above high-water level of spring tides, and will leave between them an entrance 800 ft. wide, having a depth of 30 ft. at low-water springs. Of the water space, about 21 square miles, bounded by the breakwaters, the training works and the land; fully a square mile is available in its present state as anchorage for vessels drawing from

15 ft. to 29 ft., but the shallower parts are to be dredged, and the harbour depth will be extended shorewards by the same means, a work now going on. The pier is to be an iron structure, on screw piles, carried out 1980 ft. from the landing place, and having at its inner end a bridgeway of 50 ft. span for boats. The outside end for 1000 ft. will have a depth on either side of from 19 ft. to 25 ft. at low water, and a deck breadth of 62½ ft.; for another 500 ft. there will be berthage on each side for vessels drawing from 17 ft. to 19 ft. Lines of railway will lead from the pier head to the Custom House, and thence to the station to connect with the main railway system of the country. It is expected that the works will be finished for all practical purposes in '91. It was also announced in August that the Japanese Government had accorded permission for the incorporation of a dock company at Yokohama, with a capital of three million yen.

York. Rt. Hon. and Most Rev. William Dalrymple MacLagan, D.D., Lord Archbishop of, Primate of all England, and member of the Privy Council. The see dates from 635, and has an income of £10,000. His Grace, the 83th Archbishop in succession, was b. at Edinburgh. His lordship is the son of Dr. David MacLagan, who served with distinction in the Peninsular War, and was b. 1826. Ed. at Peterhouse Coll., Cambridge; graduated B.A., Junior Opt. '56; M.A. '60; D.D., *jure dign.*, '78. Ordained deacon '56, and priest '57. Consecrated Lord Bishop of Lichfield '78. Held curacies at St. Saviour, Paddington, '58-60, and St. Stephen, Marylebone, '58-60; curate in charge of Enfield, '65-9; rector of Newington '69-75; vicar of Kensington '75-9; Prebendary of St. Paul's Cathedral '78; Chaplain-in-ordinary to the Queen. In '70 his lordship edited "The Church and the Age," and is the author of "Parochial Papers"; "The Church and the People; an Inquiry into the Neglect of Public Worship" ('82), etc. His lordship's hospitable invitation to 150 Nonconformist ministers to visit him at the Palace on Michaelmas Day '90 occasioned much interest. His Grace was appointed to succeed the late Dr. Magee as Archbishop of York in May '91. In early life he entered the army, but retired with the rank of lieutenant in '52. His lordship was enthroned in York Minster Sept. 15th.

Young Men's Christian Association, The. which has for its object the spiritual, mental, social and physical well-being of young men, was founded in the year 1844, for the purpose of benefiting the young men in the various dry goods houses in the City of London, the President, Mr. George Williams, being the chief instigator in its formation. The work rapidly took root, and increased in every direction, until there are at the present time 4216 associations scattered throughout the world, with a total membership of 389,196. In the United Kingdom there are 952 centres, with 78,604 members; whilst in London there are 65 associations, with a roll of 9613 young members. Figures, however, afford no adequate idea of the large number of young men who are daily brought into touch by means of the various agencies employed by the Association. The headquarters of the Y.M.C.A. are situated at Exeter Hall, Strand, which was purchased and adapted to the requirements of the work in the year '80, at a cost of £61,000. Mr. J. H. Tritton is Chairman of Committee. General Sec., Mr. E. J. Kennedy; Financial Sec., Mr. Clarence

Hooper. The total number associated with the Central Association last year was 3920. The **gymnasium**, situate at 92, Long Acre, ranks as one of the finest in London, the total members last year being 1063. The **educational system** is a particularly good one, 109 classes, in a wide range of subjects, being conducted last year. The advantages offered to young men are multifarious, including **reading and magazine room**—provided with leading daily and weekly London and provincial newspapers and magazines, chess, draughts, etc.; open from 9.30 a.m. to 10.30 p.m. **Drawing and conversation room**—furnished with piano, books, games, etc. **Circulating and reference libraries** and writing room—quiet, well-lighted room, containing works of reference; adapted for study, letter-writing, etc. (Arrangements have been made whereby members and associates may have books from Messrs. Mudie's and Messrs. W. H. Smith's circulating libraries.) **Bible-classes and devotional meetings, educational classes**—conducted by competent and experienced teachers; reduction in fees to members and associates. **Members' meetings, missionary conversaciones, and social receptions** are held during the session. **Restaurant, buffet, and tea room**—the dining and tea-rooms, which are open to the public, are supplied with chess and draughts, daily papers, etc. **New gymnasium** (under medical direction), opened by H.R.H. the Prince of Wales, K.G., June 7th, '88—use of, with instructions, on special terms; open to ladies and gentlemen. **Seaside homes**—for rest and recreation, under efficient management, at moderate tariff, at Hazlewood, Ryde, Isle of Wight; Shaftesbury House, Margate; Sherwood House, Llandudno, North Wales; Steine House, Brighton; Cairns' House, Bournemouth; and 82, Westborough, Scarborough. **Apartment register**—well recommended lodgings, in London and suburbs, at moderate rates. **Employment bureau**—to assist young men, reliably introduced, to obtain suitable employment. **Baths**—Turkish and swimming—at special rates. **Letters of introduction** to any association in the world are given to young men reliably introduced.

Young Men's Society, Church of England. See CHURCH OF ENGLAND YOUNG MEN'S SOCIETY.

Young Women Organisations for the Benefit of. The two principal organisations which exist in England for the benefit of young women are the Girls' Friendly Society and the Young Women's Christian Association, although there are other societies which aid the work in their respective methods. The **Young Women's Christian Association** (London Office, 16A and 17, Old Cavendish Street, W.), with Lord Kinnaird and Lady Carbery as Presidents, numbers about 10,000 young women among its members in all parts of the world. **Conditions of membership** are either (a) belonging to the Prayer Union, or (b) being an "Associate," i.e., one of a class comprising all members not joining the Prayer Union. The **subscription, exclusive**

of fees for Institute membership, is one shilling per annum. The **advantages** gained by joining the Association are the friendship and help of the local secretary and members (introductions and help being given under the rules of the Society to members moving to a new locality). Further privileges of Institutes, **Boarding Houses, seaside homes, educational classes, employment and emigration agencies and libraries** are open to members. There are 16 centres for **classes** in London; the subjects include arithmetic, book-keeping, shorthand, drawing, dressmaking, music, English, French, German, ambulance, cookery and drill. These classes are open to all young women, whether members of the Y.W.C.A. or not. Students are prepared at 14, Finsbury Square, E.C., twice a week at moderate fees, for the Civil Service as clerks, sorters and telegraphists, by a special Civil Service tutor. Instruction is also given in type-writing, and the "Anglo-Parisian" system of dress cutting. Prizes and certificates (elementary and advanced) are given on the results of an examination held early in May. The Association has two excellent **gymnasiums**, at the Morley Hall, 116, Regent Street, W., and the City Institute, Finsbury Square. **Classes for musical drill** are held at the Clondesley Institute, 34, Barnsbury Street, N.—The **Girls' Friendly Society** (Patron, the Queen; Vice-Patron, the Princess of Wales; Presidents, the Archbishop of Canterbury and the Archbishop of York). It has for its object the banding together in one society of ladies (as associates), now 28,907 in number, girls and young women for mutual help, religious and secular, besides encouraging purity, dutifulness, thrift and fidelity, and providing help in sickness. Branches exist in 1065 places, and members (who number 131,034 from the age of 12 and upwards) are introduced from one branch to another wherever they may go. "Associates" must belong to the Church of England, but no such restriction applies to "members." The organisation of the Society is on Church of England lines (diocesan, rural dean and parochial), in 33 dioceses of England and Wales. Associates contribute annually not less than 2s. 6d., members not less than 6d. No girl is admitted who is not of a virtuous character; the loss of such character forfeits all membership. The organisation extends to various towns of Northern and Central Europe, and in the diocese of Gibraltar. Clubs, classes, homes of rest, registry offices and protected emigration form part of the scheme. The women students of the universities are not unmindful of their less privileged sisters, and manage a well-arranged and thriving centre in connection with organisations for women at the **Women's University Settlement**, 44, Nelson Square, S.E. The "London Pupil Teachers' Association" and the "Metropolitan Association for Befriending Young Servants" (in itself a large organisation founded in '75, 18, Buckingham Street, Strand) are under their support.

Z

Zambesi and Shiré Rivers. The Zambesi is the largest of the African rivers flowing into the Indian Ocean. It flows S.E. and E. to Mozambique Channel, a course of 1400 miles. Its banks were the scene of Livingstone's earlier wanderings, and he discovered the famous Victoria Falls. South of the Zambesi lie the countries of **Monomotapa**, **Mashona**, and **Manica**, where are many ancient ruins, testifying to the presence of a civilised people. Gold is said to be plentiful. During '91 Mr. H. Johnston was appointed Consul-General for Portuguese East Africa and H.M.'s Commissioner for territories lying to the north of the Zambesi, under British influence. See **NYASSA**, **BLANTYRE**, **MOZAMBIQUE**, and **ANGLO-PORTUGUESE CONVENTION**.

Zanzibar. A territory on the east coast of Africa. Consists of the island of Zanzibar, 55 by 25 miles, area 625 sq. m.; pop. 200,000, the isles of Pemba and Mafia, and some points on the **Suahili coast**. Capital, Zanzibar. The Seyyid's revenue is uncertain, but from over £200,000 has fallen to little more than half that sum. Imports in '83 £1,220,000; exports £800,000.

—**History.** At the end of Nov. '90 Mr. Leith, of the British East African Company, had an affair with the Masai, 80 of whom attacked his camp. The Masai were defeated, 12 being killed. It was reported that the power of Sultan Fumo Bakar was completely broken. Emin Pasha was recalled to the coast by Major von Wissmann. It was officially stated (Dec. 24th) that four millions were to be paid by Germany to the Sultan for the cession to Germany of his sovereign rights on the mainland of Africa.—'91. The German flag was hoisted at Bagamoyo and the Sultan's lowered with great ceremony (Jan. 1st). It was announced (27th) that the British East Africa Company would take charge of Lamu, Manda, and Patta under similar conditions to Mombasa. It was reported (30th) that peace had been signed between Sir Charles Euan-Smith and the Sultan of Witu. Sir C. and Lady Euan-Smith were entertained at a banquet by the British residents prior to proceeding to Europe (March 4th). Mr. Mackenzie, of the British East Africa Company, concluded a treaty with the chiefs at Witu (21st), which, amongst other things, abolished slavery; the date for absolute emancipation of all slaves being fixed at May 24th, '96. The Sultan declared (Aug.) that his dominions came within the Brussels Act Zone for the prohibition of the sale of spirits. There was considerable uneasiness (Oct. 15th) on the German coast. The new Government was formed (20th). The Privy Purse was fixed at three lakhs of rupees annually. It was reported (30th) that the British East African Company's forces had defeated the rebel Mohammedan party at Uganda in May.

Zola, Emile, was b. 1850, in Paris. Ed. at the Lycée St. Louis, and began life at Messrs. Hachette's, the distinguished French publishing firm. He first appeared as a novelist in "Les Mystères de Marseilles." "Thérèse Raquin" further exhibited his remarkable power of critical analysis of human nature. "L'Assommoir," perhaps his most popular work, has gone through fifty editions. Author of "Nana," "Pot Bouillé," and other works. As a critic, Zola has contributed much to the *Voltaire* and the *Figaro*. He is a writer

of remarkable power and industry. His novel "La Terre" has been prohibited in Austria and England on account of its alleged indecency. M. Zola was appointed a **Knight of the Legion of Honour** in '88. The publication of "La Bête Humaine" ('89) raised great discussion. Was elected (April '91) President of the Society of Men of Letters.

Zone Railway System. What is termed the regional passenger tariff exists in Austria and Hungary. The States lines are now being conducted on this principle, but railways which are in the hands of private shareholders still maintain the ordinary method. In '89 there were in Hungary 6570 miles of railway open to traffic, and of these 4415 miles were under the control of the Government. The capital already expended amounted to £71,712,919. To the active enterprise of **M. Baross**, the Minister of Hungarian Railways, the success of the zone system is in a large measure due. It was introduced into Hungary on Aug. 1st, '89; into Austria, on June 1st, '90. Fourteen zones have been adopted in Hungary, and Budapest has been selected as the centre. The reduction in the tariff amounts, generally speaking, to about 40 per cent. A certain price is charged in each zone for conveying a passenger to any station fare to any station within the first zone—the total extent of which is 15½ miles. The second-class fare in the same zone is 10d., and 5d. is the third-class fare. The charges rise proportionately throughout the zones. For journeys beyond 140 miles the fares run as follows: first class, 16s.; second class, 11s. 8d.; third class, 8s. In addition to the national reduction of fares, which is in itself an important point, various progressive improvements have been commenced in connection with the zone tariff system. Tickets are on sale by tobaccoists, hotel-keepers, and at post-offices. In Austria, the third class fare per kilometre is one kreutzer, the second class fare is two kreutzers, and the first class fare is three kreutzers. If travelling by express trains is required, 50 per cent. on these fares is the rule. There are twenty-eight zones in the Austrian system. In Germany the system came into force for those travelling on the Berlin Street railways (Oct. '91). A third-class return ticket for any distance up to 7½ kilometres is 2d., and for a second-class return ticket a charge of 3d. is made. The Turkish Government has just introduced into its railway system the zone method. On Oct. 1st this method was also adopted on the Serbian and Bulgarian railways. The line to Salonica will not employ it until May, '92. The system was adopted on May 1st, '91, on the **Cork, Blackrock and Passage Railway**. From Cork to Passage the distance was reckoned as one zone, and the fares were 5d. first class, and 3d. third class. The first month's figures showed an increase of 2005 passengers. Mr. J. Blundell Maple, M.P., advocates the adoption of the Zone railway system by English railway companies.

Zululand. A country in South Africa, north-east of Natal, now a British possession. Area about 10,000 sq. m.; pop. probably 200,000. Is well watered and capable of cultivation, with 140 miles of seaboard. St. Lucia Bay, the best harbour, was proclaimed British (1885). (For history see previous eds.)

OCCURRENCES DURING PRINTING.

Alpine Railways. The opening of the Brienz Rothhornbahn railway, which is described as the highest in Europe, was announced in November. It is 7836 feet high at the summit level, and ascends 5600 feet, or 223 feet higher than the Pilatus line. The journey occupies 1½ hour; the gauge is 0·8 metre; and the railway is purely rack and pinion, on the Abt system, being similar to the Monte Generoso railway. The steepest gradient is 1 in 4. The line was built very quickly, being begun in Oct. '90, and no fewer than ten tunnels were bored, several streamlets were bridged, and heavy stone dams erected.

Argentine Republic. The Budget for '92 gave revenue, \$24,600,000; expenditure, \$19,300,000; debt, \$645,500,000.

Austria-Hungary. The Archduchess Louise of Tuscany, having renounced her reversionary rights to the throne, was married (Nov. 21st) to Prince Frederick Augustus of Saxony. The new treaty of commerce with Italy was signed at Munich (22nd). Count Kalnoky was congratulated on attaining his tenth year of office as Minister of Foreign Affairs (23rd). For the first time in twelve years the Government was defeated in the Reichsrath. A motion for the reduction of taxes falling on the two poorest classes of the population was met by an amendment for which 126 voted, while 166 opposed it.

Behring Sea Question. It is announced at Washington that an agreement has been entered into between Great Britain and the United States as to the terms on which the points in dispute between the two governments in respect to the Behring Sea question should be submitted to arbitration. The agreement will, however, have to be ratified by the Senate. Three schooners sailed, on Nov. 24th, for the Behring Sea, for the purposes of sealing.

Brazil. Marshal da Fonseca resigned the Dictatorship, in consequence of an insurrection (Nov. 23rd). General Floriano Peixoto was called to succeed him in the Presidency, and subsequently issued a manifesto appealing to the country to cease all further revolution.

Bulgaria. The total estimated revenue for the current year is £3,210,148, while the expenditure is £3,208,328.

Chili. Señor Jorge Montt was elected President (20th), in succession to Señor Vicuña, Balmaceda's nominee.

Colonies of European Powers. It was announced from Constantinople (Nov. 27th), that Turkey had ceded by treaty to France a small tract of land in south-west Arabia, opposite

Perim Island, named Cape Cheik, by which occupation, it is said, Great Britain will no longer hold absolutely the entrance to the Red Sea.

Commons, House of. The Rt. Hon. W. L. Jackson, M.P., was re-elected (Nov. 23rd) for North Leeds, after accepting the post of Chief Secretary for Ireland. The Hon. H. Sturt (C.) and the Hon. Pascoe Glyn (G. L.) were nominated candidates for East Dorset (Nov. 23rd). The polling took place on the 27th, and resulted as under:—

Hon. Humphrey Sturt (C) . . . 4427.
Hon. Pascoe Glyn (L) . . . 4074.

[For previous polling see p. 164.]

Corea, A Railway in. According to a report published in this country in November, a railway project for the "Hermit Kingdom" was under consideration. The Korean Minister at Tokio had been instructed to obtain an estimate for the cost of a line from Seoul (the capital) to Jenchuen, and details had been given him at the Japanese Railway Bureau. Such a scheme, if it escape the jealous interference of China, would be of great interest.

Cycling. On Nov. 19th, at Herne Hill, M. A. Holbein covered 361 miles 1446 yards in 24 hours, on a pneumatic-tired safety machine, this being a world's record for an enclosed track.

Diplomatic. It was announced (Nov. 26th) that Sir J. C. Bray, Chief Secretary of South Australia, had accepted the post of Agent-General in London for that colony.

Egypt. The penal code giving the police control over hotels, clubs, bars and other public places was approved (Nov. 21st).

France. The Archbishop of Aix was tried (Nov. 24th) before the Court of Appeal on a charge of having violated the law by writing a defiant letter to the Minister of Justice in reply to a circular addressed by the latter, desiring French prelates to abstain from pilgrimages to Rome. He was condemned to pay a fine of 3000 fr.

Germany. Gen. von Caprivi delivered an able speech in the Reichstag (Nov. 27) calculated to inspire confidence in the general position of international affairs.—The publication of a volume of sermons delivered by the Emperor on board his yacht while cruising in the North Sea is announced, entitled "The Voice of the Lord upon the Waters."

Labour. Mr. J. Macvicar Anderson, president of the Royal Institute of British Architects who was the arbitrator between the master builders and the London carpenters and joiners,

made his award (Nov. 26th). He fixed the time to give an average of fifty hours per week all the year round, and the wages, hours, and pay for overtime. The joint committee issued orders for the men to begin work (23rd), but there was much dissatisfaction among the men at the terms of the award; many of them considered themselves in a worse position than before the strike.—It was announced (24th) that 38,895 French miners were on strike.—At a meeting of the London Building Trade Committee (24th) a resolution was passed condemning the award of the arbitrator and calling on the carpenters and joiners to perfect their organisations with a view to getting more reasonable terms at an early date. A Labour Congress assembled at Lyons on Nov. 26th. under the presidency of M. Lafargue.

Lancashire, Yorkshire, and East Coast Railway. A Bill has been lodged for next session to empower the Company to make various deviations, etc., increasing the capital, and empowering the Great Eastern to subscribe for £250,000 in shares or stock.

London Subway Railways. The Parliamentary Notices issued toward the end of November also include the Hampstead, St. Pancras and Charing Cross.

Lyons Tower. An announcement was published in *Iron* of Nov. 20th, '91, that a company had been formed to construct an iron tower near the Gay Observatory. The new structure will terminate at the top in a bell-tower, in the interior of which astronomical instruments will be placed. The base of the tower, which is to be composed of four perpendicular pillars supporting a cross-vaulting, will be of stone, and will sustain the metallic part of the structure. The company does not require any subvention from the city: it simply proposes to charge one franc to every person desirous of viewing from that elevated situation the magnificent panorama presented by the city of Lyons.

Marriages.

FitzRoy, Hon. Edward A., 1st Life Guards, 2nd s. of late Lord Southampton—**Muriel Douglas,** d. of late Hon. Archibald C. H. Douglas Pennant (Nov. 19)

Hay, Arthur W. H., e.s. of Col. the Hon. Chas. Hay—**Mary,** y. d. of late Sir Edward Scott (Nov. 24)

Power, Richard, M.P.—**Annie O'Donnell** (Nov. 21)

Saxony, Prince Frederick Augustus of—**Archduchess Louise** of Tuscany (Nov. 21)

Wilson, Gordon C., Royal Horse Guards, e. s. of Sir Samuel Wilson, M.P.—**Lady Sarah Isabella Augusta Spencer Churchill,** y. d. of late Duke of Marlborough (Nov. 21)

Ministry. It was notified (Nov. 24th) that Lord Walter Gordon Lennox, M.P., had been appointed Treasurer in Her Majesty's Household. Lord Burghley, M.P., was appointed Vice-Chamberlain.

New South Wales. It was stated (Nov. 27th) that Sir Alfred Stephen, G.C.M.G., C.B., had resigned the Lieut.-Governorship of New South Wales, and was to be succeeded by Sir F. Darley, the then Chief Justice.

Obituaries.

Berg, Herr Christian, leader of the Radical party in Denmark (Nov. 27), 68.
Boone, Bishop, head of the American Protestant Episcopal Church in China (Oct.), 46
Brooks, Sir Victor Alexander, Bart. (Nov. 23), 48
Carlisle, Dr. Harvey Goodwin, 58th Bishop of (Nov. 25), 73. [For biography see p. 96.]
Curry, Sir J. P., Bart., M.P. (Nov. 28), 66
Ebury, Lady (Nov. 21), 84
Evans, Dr. Evan, Master of Pembroke College, Oxford, since '64 (Nov. 23), 77
Falmouth, Dowager Viscountess, who was the 23rd Baroness Le Despencer in her own right, and wid. of 6th Viscount Falmouth (Nov. 20), 69.
Florence, W. J., distinguished American actor (Nov. 10), 60
Grainger, Rev. Canon (Nov. 25)
Haggis, Alfred H., Deputy Chairman of the London County Council (Nov. 24), 67
Lytton, 2nd Baron and 1st Earl of, British Ambassador at Paris (Nov. 24), 60. [For biography see p. 416.]
Magniac, Chas., who represented St. Ives '68-74, Bedford '80-85, county of Bedford '85-6 (Nov. 23), 62
Power, Richard, M.P. (Nov. 29), 40
Wostenholme, Prof. Jos. (Nov. 18), 62

Peers, House of. The Bishop of Bangor is (Nov. 26th) now entitled to take his seat in the Upper House.

Political Speeches. The Marquis of Salisbury addressed the National Union of Conservative Associations at the Town Hall, Birmingham (Nov. 24th); Lord Salisbury, Mr. Joseph Chamberlain, and Mr. H. Matthews (Nov. 25th).

Ramsgate New Front Drive. The raising of the first stone of these works, which will cost £60,000, took place on Nov. 23rd. They consist of a front approach to the two cliffs, a new military road across the inner harbour, and the widening of the approach to the Chatham and Dover station, besides a new Custom House and harbour-master's house.

Spain. The Cabinet resigned (Nov. 22nd), and a new ministry was formed by Señor Canovas del Castillo, which was composed, as follows, and took the oath of allegiance Nov. 23rd: President of the Council, Señor Canovas del Castillo; Minister of Foreign Affairs, the Duke of Tetuan; Minister of the Interior, Señor El Duayen; Minister of War, General Azcarraga; Minister of Marine, Admiral Montogo; Minister of Justice, Señor Cos Gayon; Minister of Finance, Señor Castañeda; Minister for the Colonies, Señor Romero y Robledo; Minister of Public Works, Señor Linares-Rivas.

Trent and Mersey Canal. In the coming session a bill will be proceeded with empowering the Trent Navigation Company to increase their capital, and to alter or cancel agreements with the North Staffordshire Railway Company with regard to the user of the Trent and Mersey Canal.

Royal

Society

FOR THE

PREVENTION OF CRUELTY TO ANIMALS,

105, JERMYN STREET, ST. JAMES'S, LONDON.

Patrons.

HER MOST GRACIOUS MAJESTY THE QUEEN.

THEIR ROYAL HIGHNESSES THE PRINCE AND PRINCESS OF WALES.

President.

THE RIGHT HON. LORD ABERDARE.

Treasurer—R. RUTHVEN PYM, Esq. | **Bankers**—COUTTS & Co., Strand, London.

Upon this Institution, founded in 1824 (the only one having for its object the protection of dumb and defenceless animals), rests a heavy responsibility. It is earnestly and respectfully submitted, that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Committee respectfully appeal to the Public to extend a hearty assistance,—

- I. By supplying early information to the Secretary of all acts of cruelty that have been witnessed.
- II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom.

The increased operations of the Society have drawn from the funds an amount vastly exceeding the yearly subscriptions. The Committee need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those many urgent measures which every well-wisher of this Society has so deeply at heart. Remittances may be forwarded to

JOHN COLAM, *Secretary.*

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

The labour of other Charities is divided among many Associations; but this Charity stands alone—the Defender of the defenceless—without any assistant.

FORM OF BEQUEST.

Benevolent individuals who may be inclined to become benefactors by Will to this Society are earnestly desired to use the following form:—

“I give and bequeath the sum of _____, to be paid, free of Legacy Duty, out of such part of my Estate as can be lawfully applied for that purpose, unto the Treasurer for the time being of a Society called or known by the name of THE ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Committee for the time being of the said Society.”

CASSELL & COMPANY'S MAGAZINES.

The SPECTATOR says:—"So much trouble is taken with these periodicals, so much ability is at the disposal of the conductors, that it is difficult to bestow the praise which is really deserved without seeming extravagant."

The Quiver.

For Sunday and General Reading. *New and Enlarged Series.* MONTHLY, 6d.

"THE QUIVER is an amazing sixpennyworth; the illustrations are so good, and the style so fresh and attractive, combining solid instruction with much that is entertaining and bright."—*The Rock.*

Cassell's Family Magazine.

MONTHLY, 7d.

"The stories in CASSELL'S FAMILY MAGAZINE are good, the pictures are clever, the selection of subjects is strikingly varied; it contains a variety of useful information, and altogether a glance through the pages shows that their contents are unusually attractive."—*The Times.*

"Little Folks" Magazine.

MONTHLY, 6d.

"The extraordinary popularity of LITTLE FOLKS has placed it beyond both rivalry and criticism."—*Queen.*

The Magazine of Art.

MONTHLY, 1s.

"The exquisite beauty of the engravings in THE MAGAZINE OF ART and the excellence of the letterpress should carry the magazine into every home where art is appreciated."—*Standard.*

Cassell's Saturday Journal.

WEEKLY, 1d.; MONTHLY, 6d.

* * Each Weekly Number now contains 24 pages. Illustrated.

"The best and cheapest pennyworth of popular literature ever produced."—*The Times.*

Work.

An Illustrated Magazine for all Workmen, Professional and Amateur.

WEEKLY, 1d.; MONTHLY, 6d.

"It is a curious reflection, but soundly true, that there is not a person of ordinary average intelligence and strength who could not learn from WORK . . . how in a short time to make a living."—*Saturday Review.*

CURRENT ACCOUNTS are kept in conformity with the practice of London Banks. In cases where a remunerative Balance is not maintained, a Charge for Commission is made. Parties keeping Current Accounts have the facility of having approved Bills discounted—of obtaining Loans upon negotiable Securities—of depositing Bills, Coupons, etc., for collection—and of lodging with the Bank Deeds and other valuable property in Fireproof Strong-Rooms for safe custody. DEPOSIT ACCOUNTS—Money, in amounts of £10 and upwards, is received from the public generally, subject to seven days' notice of withdrawal, and interest is allowed thereon at the current rate of the day; the Bank notifying any change in the rate of Interest by Advertisement in one or more of the leading London Newspapers. If the money be withdrawn within a fortnight, no interest is allowed. Persons having Current Accounts can transfer any portion of their Credit Balance to Deposit Account.

The AGENCY OF COUNTRY and FOREIGN BANKS, whether Joint Stock or Private, is undertaken by the Bank. BILLIERS of CREDIT, payable at any of the chief Commercial Towns and Cities of the World, are granted; also Mercantile and Marginal Credits. CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any of the places on the Continent where the Bank has an appointed Correspondent. DIVIDENDS, etc., on Government and other Stocks, Annuities, Pensions, etc., are received for customers of the Bank without charge, the Purchase and Sale of Stocks, Shares, and Securities are also undertaken; and every description of Banking business is transacted. The Officers and Clerks of the Bank are pledged not to disclose the transactions of any of its Customers.

The present Subscribed Capital of the Bank is £14,000,000, in 140,000 Shares of £100 each, held by upwards of 8000 Shareholders. The sum of £20 has been paid on each Share, thus making the paid-up Capital £2,800,000. The Rest or Surplus Fund is £1,655,620 4s. 9d. Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The Bank takes the Agency of Private Country Banks, Joint-Stock Banks, and other Public Companies in England or the Colonies, attends to the purchase and sale of British and Foreign Stocks, collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad, acts as Agents for the receipt of Military and other Pay and Allowances, and generally transacts every description of Banking business. Sums of £10 and upwards may be deposited, repayable at call, sums of £500 and upwards may be deposited upon seven days' notice of withdrawal. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. Cheques cannot be drawn against Deposit Accounts, nor will Depositors be entitled to any of the usual Banking facilities of a Current Account. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon. Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, and America. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for commission. Letters of Credit are also granted, payable at all the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches. The Officers of the Bank are not allowed to receive any Christmas Boxes or Gratuities.

GENERAL REVERSIONARY AND INVESTMENT COMPANY,

5, WHITEHALL, LONDON, S.W.

ESTABLISHED 1836. *Further Empowered by Special Act of Parliament, 14 & 15 Vict., cap. 130.*

CAPITAL £500,000.

The business of this Company consists in the PURCHASE of, or LOANS upon—

REVERSIONARY INTERESTS, vested or contingent, in well-secured property; also

LIFE INTERESTS in Possession, or in Expectation.

LOANS UPON REVERSIONS may be obtained either at an Annual Interest, or in consideration of redeemable deferred charges, payable upon the Reversions falling in.

PRESENT INCOMES are likewise granted upon the latter principle to persons entitled to Reversionary interests, who may thus obtain an income until their property falls into possession, without being called upon for any payment until that event.

Prospectuses and forms of proposal may be obtained from

D. A. HUMSTED, *Actuary and Secretary.*

The Company undertakes Life Assurance of every kind at moderate rates, and on terms and conditions which compare favourably with those of other Companies.

Double Advantage Policies issued, securing **TWO PAYMENTS** of the amount assured—one payment on the attainment of a specified age, and a second payment at death thereafter.

Policies are made indisputable after five years.

Regulations are in force for securing to the Assured the benefit of the surrender value of a policy in the event of its lapse.

Fire Insurances are accepted at tariff rates

Prospectuses and Proposal Forms may be obtained on application at the Chief Office, or any of the Branches.

HENRY WARD, *Secretary and Manager*.

THE

LONDON FEMALE PENITENTIARY and GUARDIAN SOCIETY.

Founded A.D. 1807, for the **RESCUE, RECLAMATION, and PROTECTION**
 of **BETRAYED and FALLEN WOMEN.**

10,000 Young Women have been welcomed to these Homes, most of them for a residence of Eighteen months,—irrespective of the large number who have been temporarily sheltered.

6000 have been placed in service or restored to friends, and, in addition, many have received impressions which have resulted in a change of heart.

100 inmates, and immediate admission to applicants. Persons interested in Rescue work are invited to send cases.

Funds are earnestly solicited, as THE SOCIETY IS IN NEED, and has no Endowment whatever. CONTRIBUTIONS will be thankfully received by the Bankers, BARCLAY, BEVAN, RANSOM & CO., 54, Lombard Street, E.C., and 1, Pall Mall East, S.W.; WILLIAMS, DEACON & CO., 20, Birchin Lane, E.C.; or by

W. EDWIN PAGE, Secretary.

The Baptist Missionary Society.

FORMED IN 1792.

ITS present sphere of labour embraces, in Asia—Continental India and the Island of Ceylon, Northern China and Japan; in Africa—the Upper and Lower Districts of the basin of the Congo River; in Europe—Norway, France and Italy; and in the West Indies—Mayti, Trinidad, the Bahamas, San Domingo, and Turk's Islands. It also supports an Institution for training Native Agency in the Island of Jamaica. It has 125 Missionaries, 587 Evangelists, and 496 Mission Stations, in connection with which there are 15,839 Church Members, and a much larger number of adherents.

Income for the year 1890-91. £66,011 5s.; expenditure, £74,846 17s.

Treasurer—W. R. RICKETT, Esq.

General Secretary—ALFRED HENRY BAYNES, Esq., F.R.A.S., to whom all Money Orders should be made payable.

Bankers—MESSRS. BARCLAY, BEVAN, TRITTON, & Co., 54, Lombard Street, E.C.

Office—BAPTIST MISSION HOUSE, 19, FURNIVAL STREET, HOLBORN, E.C.

FORM OF BEQUEST.

I give to the Treasurer or Treasurers, for the time being, of the Baptist Missionary Society, the sum of £ sterling, duty free, to be paid exclusively out of such parts of my personal estate, not specifically bequeathed, as may be lawfully given by will to charity, and not to abate unless there should be no other fund for the payment in full of my other legacies, and in such case only ratably with my other pecuniary or general legacies.

If any friends wish to bequeath property for Translations or Schools, it is only necessary to say instead of the General Fund, the Translation Fund, or the School Fund.

CHRISTIAN EVIDENCE SOCIETY.

President—THE ARCHBISHOP OF CANTERBURY.

Vice-President—SIR GEORGE G. STOKES, BART., M.P., D.C.L., F.R.S., etc.

Chairman of Council—THE LORD CHANCELLOR.

CONSTITUTION AND OBJECTS.—Founded in 1870, by men of leading religious denominations, to counteract the aggressive infidelity of the times, especially among the uneducated; to meet the difficulties and strengthen the faith of the doubting and perplexed; and to instruct the young in the reasons for believing Christianity to be a Divine Revelation.

METHODS OF OPERATION.—Conferences, Sermons, Lectures, in London and the Provinces; Classes for Young People, followed by Examinations, and award of Prizes to successful Students; Free Distribution of Tracts; receiving and giving Information on Doubts and Difficulties, and on the Literature of Christian Evidence.

REPORT 1890-91.—Sermons and Lectures, 490; Open-air Lectures, 546; Students Examined, 117; Prizes, 19; Certificates, 68; Receipts, £1,033; Expenditure, £1,297; Wanted, £2,000.

ANNUAL MEETING.—May, 1891; *Chairman*, David Howard, Esq., V.-P. Chem. Soc., V.-P. Vict. Inst., etc.; *Speakers*, Rev. W. Hay Aitken, M.A.; B. Harris Cowper, Esq.; Rev. Preb. Shelford, M.A.; Rev. Prof. Redford, M.A., LL.B.

WESTMINSTER, LONDON, S.W.

CITY OF LONDON TRUSS SOCIETY,

35, FINSBURY SQUARE.

For the Relief of the Ruptured Poor throughout the Kingdom.

ESTABLISHED 1807.

Patron: **H.R.H. THE PRINCE OF WALES, K.G.**

President—**Right Hon. LORD EBURY, P.C.** Treasurer—**JOHN NORBURY, Esq.**

THE importance of this Charity to the suffering poor of both sexes and all ages may be gathered from the fact that upwards of **470,000** have been already relieved.

The proportion of aggravated cases to simple cases is larger than it was formerly. Hence more expensive instruments are required, greater cost is entailed, and increased Funds are needed.

Subscriptions and donations will be thankfully received by Lloyd's Bank (Limited), 72, Lombard Street, E.C.; and by the Secretary, at the Institution, 35, Finsbury Square

JOHN WHITTINGTON, Secretary.

Secretary—**ARTHUR E. READE, Esq.**

The Governors earnestly solicit assistance for this Hospital, which treats annually an average of over

23,000 SICK AND INJURED PATIENTS.

The Assured Income is about - - - - - **£6,000.**

The Expenditure averages - - - - - **£13,000.**

ANNUAL SUBSCRIPTIONS and DONATIONS will be most thankfully received by either of the above-named bankers; or by the Secretary, at the Hospital.

FORM OF BEQUEST.

"I give and bequeath to the Treasurer or Treasurers, for the time being, of CHARING CROSS HOSPITAL, London, for the use of that Charity, the sum of free of Legacy Duty, to be paid out of my pure personal estate as soon after my decease as may be possible."

Cottage Homes for 300 Homeless Little Boys, Farningham.

Homes for 200 Orphan Boys, Swanley.

Homes for Little Boys, Farningham and Swanley.

Patrons—The PRINCE and PRINCESS OF WALES.

BENJAMIN CLARKE, Secretary.

Circus, E.C.

LONDON CITY MISSION.

FUNDS URGENTLY NEEDED.

Bankers: BARCLAY, BEVAN & Co., 54, Lombard Street. E.C.

THE OBJECT OF THIS SOCIETY, established 1835, is to evangelise the masses in the Metropolis, by carrying the Gospel to every house, garret, and cellar, and beseeching men to be reconciled to God through our Lord and Saviour Jesus Christ. The number of Missionaries is now 500. Every Missionary visits once a month about 650 families, or 2900 persons. They also meet constantly about Half a Million Working Men in Factories and elsewhere.

Special Missionaries have been appointed to various classes; amongst others, to the Bakers, night and day Calbmén, Omnibus Men, Canal Boatmen, Soldiers, Sailors, and the Criminal Classes, besides Foreigners from all parts of the world.

SUMMARY OF WORK, MARCH 1890-91.

Visits and calls paid	3,614,938
Induced to attend Public Worship	5,556
New Communicants	2,176
Adults visited who died	8,366
Of whom visited by the Missionary only	2,318
Public-houses regularly visited	10,000
Drunkards reclaimed	1,874

A large addition to the number of Missionaries is needed at once. It is estimated that about a Million of the Working Classes in London never attend any place of public worship.

Office: 3, Bridewell Place, London, E.C.

F. A. BEVAN, *Chairman.*

LONDON FEVER HOSPITAL,

LIVERPOOL ROAD, ISLINGTON, N.

FOR the reception of persons suffering from Infectious Fevers. A small fee is charged, but about three-fourths of the cost of each patient is borne by the Hospital.

78,000 patients have been isolated here since 1802, and probably ten times as many persons have been preserved from infection.

The benevolent are earnestly asked to help the Committee in this valuable work.

Donors of £10 10s. or more in one sum are Governors for life. Subscribers of a Guinea and upwards for more than a year are Governors while they continue to subscribe.

Domestic servants of Governors, and certain employés of subscribing firms, clubs, and hotels, are treated free of all charge.

N.B.—Patients residing outside the Metropolitan Asylums Board area can only be received into this Hospital from the families of Governors.

DONATIONS and SUBSCRIPTIONS will be gratefully received by the Secretary at the Hospital.

MAJOR W. CHRISTIE.

Bankers—MESSRS. PRESCOTT, DIMSDALE & CO., 62, THREADNEEDLE ST., E.C.

NATIONAL ORTHOPÆDIC HOSPITAL (FOR THE DEFORMED),

234, GREAT PORTLAND STREET, REGENT'S PARK, W.

Patron—H.R.H. THE DUKE OF CAMBRIDGE, K.G.

Supported by Voluntary Contributions.

Crippled Children and Adults are here Relieved and Cured; and many Patients who were well-nigh hopeless cripples, cured by the surgical skill and timely aid of this Charity, are now earning a livelihood.

The Committee of Management very earnestly appeal for HELP, that the benefits of the Charity may be continued and extended.

£1 1s. Annually gives "Annual Governorship"; £10 10s. Donation, "Life Governorship."

Letters of recommendation are not compulsory to the necessitous poor.

Bankers, Sir S. SCOTT, Bart., and Co., 1, Cavendish Square, W. Secretary, H. CANNING, Esq., who will gladly afford every information to those desirous of interesting themselves in the Hospital.

FOUNDED 44 YEARS.

CONTRACTIONS.

ST. GILES' CHRISTIAN MISSION. FOUNDED 1860.

Superintendent - Mr. GEORGE HATTON, 4, Ampton Street, Regent Square, W.C.

Secretary - Mr. WILLIAM WHEATLEY, 29, Brooke Street, Holborn, E.C.

Treasurer - F. A. BEVAN, Esq., 54, Lombard Street, E.C.

THE OBJECT OF THIS MISSION IS THREEFOLD:

1. The Evangelisation of St. Giles, and the Assistance of the Deserving Destitute Poor of the District.
2. The Reclamation of the Criminal Classes.

During 1890 7715 men and boys were assisted as follows:—

Sent to Sea -	103
Sent Abroad (Outfit, Passage Money, and all other expenses being borne by the Mission) -	67
Sent Home to Friends -	261
Relieved with Gifts of Money, Clothes, Tools, Stock, etc., and by Employment being found -	7284
	<u>7715</u>

3. The Rescue of the Lost Women of St. Giles' to paths of virtue and usefulness, by training them for Domestic, Laundry, and other useful service.

Funds are much needed to enable us to meet the heavy expenditure of the above threefold course of philanthropic enterprise.

A COMPLETE LIBRARY IN ITSELF.

In 8 Vols., cloth, 48s., or half-morocco, 68s.

BLACKIE'S MODERN CYCLOPEDIA.

Edited by CHARLES ANNANDALE, M.A., LL.D.,

Editor of "Ogilvie's Imperial Dictionary," &c.

WITH NUMEROUS PICTORIAL ILLUSTRATIONS AND A SERIES OF MAPS.

"Will be found a boon to the general reader. Some handy form of encyclopædia has long been wanted. This is comprehensive, without being bulky. The information is succinctly given, sufficiently copious, and strictly relevant."

Saturday Review.

"The articles are distinguished by accuracy not less than by succinctness. We have been particularly struck with the scientific, geographical, and legal articles. The work is being admirably supervised by Dr. Annandale."—*Spectator.*

LONDON: BLACKIE & SON, LIMITED, 49 & 50, OLD BAILEY.

* * THE TIMES says :—"The Church Monthly is excellent."

IMPORTANT NOTICE.

At the repeated request of many influential Clergymen we now issue THE CHURCH MONTHLY in a smaller size—namely 32 pp., demy 8vo. This new issue is uniform in Contents and Illustrations with the ordinary 24 pp. crown 4to Edition.

TO THE CLERGY.

Which is THE BEST MAGAZINE FOR LOCALISATION?

THE Editor of the *London Diocesan Magazine* recently conducted an inquiry into the present position of Parish Magazines in London Diocese. About two hundred replies were received in answer to his inquiries. The following extract is taken from a most interesting article on the subject :—

"It is not the object of this article to pass judgment upon the various publications issued with this purpose in view, but we are bound to say that while any opinion at all is expressed in the letters which have been sent in, it is almost always in favour of the CHURCH MONTHLY, and that this preponderance of opinion is not confined to words alone is shown by the following particulars from the parishes which have sent replies :—

'Church Monthly' ...	50	'Penny Post' ...	1
'Banner of Faith,' 4to, 8; 8vo, 22 ...	30	'Gleaner' (C.M.S.) ...	1
'Dawn of Day' ...	29	'Family Friend' ...	1
'Home Words' ...	24	'Old Jonathan' ...	1
'Parish Magazine' ...	15	Special ...	30
'Gospeller' ...	6		
'Home Visitor' ...	4	Total ..	195
'New and Old' ...	3		

Splendidly Illustrated. 24 pp. Crown 4to, and 32 pp. Demy 8vo.

PUBLISHING OFFICE:—27, PATERNOSTER ROW, LONDON.

Mr. J. M. BARRIE'S WORKS.

SIXTH EDITION. Buckram, gilt top, crown 8vo, price 6s.

AULD LIGHT IDYLLS.

Truth.—"It is some time since I read anything so racy, humorous, and altogether delightful."

SEVENTH EDITION. Buckram, gilt top, crown 8vo, price 6s.

A WINDOW IN THRUMS.

Mrs. OLIPHANT, in *Blackwood's Magazine*, says:—"No book could be more deeply instinct with the poetry of real feeling, in which no fiction is, though it requires something which can only be called genius to reveal it to the world."

THIRD EDITION. Buckram, gilt top, crown 8vo, price 6s.

MY LADY NICOTINE.

Speaker.—"A very delightful book. . . Mr. Barrie is a charming and brilliant essayist."

FOURTH EDITION. Buckram, gilt top, crown 8vo, price 6s.

WHEN A MAN'S SINGLE:

A Tale of Literary Life.

Saturday Review.—"Mr. Barrie is a man with a style. From one end to the other the story is bright, cheerful, amusing, barring the idyllic prologue, which is pathetic as well as humorous."

LONDON: HODDER & STOUGHTON, 27, PATERNOSTER ROW.

Dedicated by Special Permission to Her Majesty.

New Edition, 1892. Imperial folio, half-bound in russia or morocco, with gilt titles and edges, £8 6s.
Full-bound, russia or morocco, extra gilt, £10 10s. (to order).

The others can be had mounted on cloth in case to Order. Specially prepared Roan Leather Covers, with gilt title, can be had for the Royal Atlas, 12s. 6d. each.

The Royal Atlas may also be had in Monthly Parts, at 4s. 6d. each.

"Dr Keith Johnston's 'Royal Atlas,' ever since its publication in 1871, has maintained its ground as the best English Atlas on a large scale extant. Of the new maps added to the Atlas, we can speak in unqualified praise. The maps of the western half of the Dominion of Canada and of Mexico, by Mr. I. B. Johnston, are creditable specimens of cartography, and need not fear comparison with any work produced elsewhere. Each map is provided with a separate index, and together the Atlas is one deserving the support and confidence of the public."—*The Athenaeum*.

ELLIOT STOCK, 62, PATERNOSTER ROW, LONDON.

The "Ceylon Observer"

Is the largest and oldest Daily Paper in the Colony. It is the Official Medium for all Government announcements, and through its Office the Proceedings of the Ceylon Legislative Council are published. Its telegraphic and special correspondence is complete. Its circulation is far ahead of any local print, and it is seen practically by every one who takes an interest in English affairs. In less than a three years' agitation it forced the Government into a progressive policy as regards railways.

The "Overland Ceylon Observer"

Is a general Mail *résumé* of Ceylon intelligence, relating to Planting, Shipping, Governmental, Civil, and Military matters.

The "Tropical Agriculturist"

Is the leading Tropical Magazine, and has a wider circulation than any other Monthly Publication of a similar kind.

It contains specially written information for Planters of Tea, Coffee, Sugar, Cacao, Cinchona, Rice, and other Tropical Products.

It circulates throughout India, Burmah, Straits, Java, Sumatra, Borneo, Northern Australia, Queensland, Fiji, Mauritius, Natal, West Indies, South and Central America, California, Southern States, Continent, and England.

The only Local Publication published in the East devoted to the interests of the Tea Industry.

The Ceylon Handbook and Directory

Is an annual volume of about 1000 pages, containing complete Civil and Official Directory information, as well as statistical particulars of the Tamil and Sinhalese Residents of the colony. Also tabulated statements and reviews relative to Agriculture, the Planting Enterprise, and Export and Import Trade of the Colony.

Advertising Rates on application to London Offices :—

With portraits of the Members of the Royal Institute of Painters in Water Colours, and including the names and addresses of about 6000 Artists. Price 3s. 6d.

"For compactness and comprehensiveness this excellent manual might be described as the 'Whitaker' of the art world."—*St. James's Gazette*.

"It is now recognised as indispensable."—*Daily Telegraph*.

Adeline's Art Dictionary.

Containing a complete Illustrated Index of all Terms used in Art, Architecture, Heraldry and Archaeology. Translated from the French, and Enlarged. With nearly 2000 Illustrations. Post 8vo, 7s. 6d.

"A handy, well-printed and comprehensive lexicon, with clear, brief and accurate definitions."—*Saturday Review*.

"The definitions are clear, concise and suggestive. . . . Its comprehensiveness and exactitude are eminently satisfactory."—*Glasgow Herald*.

A Manual of Decorative Composition,

For Designers, Decorators, Architects and Industrial Artists.

By HENRI MAYEUX. Translated by J. GONINO, and Illustrated by nearly 300 Engravings. Post 8vo, 6s.

"Mr. Mayeux's method is admirable, and it is really wonderful how much information, how many practical hints, how much valuable criticism he packs into his three hundred odd pages."—*Glasgow Herald*.

"This is a thoroughly admirable, because a thoroughly practical work."—*Manchester Guardian*.

LONDON: J. S. VIRTUE & CO., LD., 26, IVY LANE, PATERNOSTER ROW.

Largest and most Influential Circulation in Ireland.

THE FREEMAN'S JOURNAL

Established 1763.

THE FREEMAN'S JOURNAL is guaranteed to have the **Largest Circulation** of all the **Daily Newspapers** in Ireland.

The London Office and the Head Office, Dublin, are connected by Special Telegraph Wire, for the transmission of News and Advertisements.

Its Political, Social, Commercial and General News is of the fullest and freshest description.

THE WEEKLY FREEMAN AND IRISH AGRICULTURIST

IS PUBLISHED THROUGHOUT IRELAND EVERY SATURDAY.

It is taken by all classes in the Towns and Country Districts, and its **guaranteed Weekly Circulation** is at least ten times as great as all the other Agricultural Journals in Ireland.

THE EVENING TELEGRAPH

Is issued from the *Freeman's Journal* Office daily, at 1, 3, 5, and 6 p.m., and has a daily circulation of over **30,000** copies.

SPORT.

An excellent Sporting Paper ; contains all the news of Sports in Ireland, with latest Betting, &c.

Chief Offices : PRINCES STREET, DUBLIN.

London Offices : 211, STRAND, W.C.

BRANCH OFFICES : *Donegal Street, Belfast ; 28, Grand Parade, Cork ; 145, Argyle Street, Glasgow ; 132, George Street, Limerick ; 50, Sir Thomas's Buildings, Liverpool.*

THE MORNING NEWS (Belfast).

The leading and most widely circulated and the oldest Penny Daily Newspaper in Ulster.

ULSTER WEEKLY EXAMINER (Belfast).

The largest circulation in the North of Ireland. Circulates extensively in Scotland.

**Chief Offices : DONEGAL STREET, BELFAST, and
4, 5, & 6, PRINCES STREET, DUBLIN.**

BRANCHES : *211, Strand, London ; Grand Parade, Cork ; 132, George Street, Limerick ; 145, Argyle Street, Glasgow ; 50, Sir Thomas's Buildings, Liverpool ; Castlewood Avenue, Ruthmines.*

Agencies in every City, Town and Village in Ireland, and the important centres of Britain, the Colonies, &c.

ESTABLISHED 1748.

THE ABERDEEN JOURNAL

AND DAILY ADVERTISER FOR THE NORTH OF SCOTLAND.

The *Aberdeen Journal* circulates throughout the North of Scotland. It is read by all classes, has maintained a leading position for over a hundred and forty years, and is the first-class medium for Advertisers.

THE ABERDEEN WEEKLY JOURNAL,

Published on Wednesday morning, is an excellent medium for General Advertisements.

ABERDEEN EVENING EXPRESS.

The *Express* is the most popular, the largest, and most widely circulated Newspaper in the North. Four Editions are published Daily, with Local and Telegraphic News to time of publication. It stands unrivalled as a medium for Advertisements of all classes.

Larger Circulation than any other Evening Paper North of Glasgow.

HEAD OFFICES—28 & 29, ADELPHI, ABERDEEN.

LONDON OFFICE—5, NEW BRIDGE STREET, BLACKFRIARS, E.C.

THE

Alnwick Guardian & County Advertiser.

Published every FRIDAY AFTERNOON at the
"GUARDIAN" OFFICE, BONDGATE WITHIN, ALNWICK,

Circulates extensively in the large Agricultural and Mining Constituencies of the Berwick and Wansbeck Parliamentary Divisions. It is a recognised medium for County Advertising, and the Leading Agricultural and other Auctioneers of the County avail themselves of its Advertising Columns. Agricultural and other Articles by Leading Writers a Speciality.

ONE PENNY.

ALNWICK, NORTHUMBERLAND.

The Hampshire Herald

AND ALDERSHOT ARMY REVIEW.

The recognised Conservative Organ for North and
East Hants.

EVERY FRIDAY. PRICE ONE PENNY.

"The smartest-written and best-printed provincial paper we have seen."—*Vide PRESS OPINIONS.*

Is the cheapest and most influential Advertising Medium in the County, and has a larger circulation than the combined issues of all other papers in the district.

SPECIAL TERMS QUOTED FOR SERIES OF ADVERTISEMENT INSERTIONS.

Printed and Published by

THE ALTON PRINTING COMPANY, Limited,
NORMANDY STREET, ALTON.

Established over a Quarter of a Century.

The Andover Advertiser

AND

NORTH and WEST HANTS GAZETTE,

Published every Friday. Price One Penny.

Weekly Circulation 5,000.

THE ANDOVER ADVERTISER has long held a leading position in North and West Hants as a High-class Family Newspaper.

The circulation is now **Ten Times as Large** as any circulating within the district.

Being **NEUTRAL IN POLITICS**, the *Andover Advertiser* is read by all classes within the extensive area over which its circulation extends, and therefore affords to Advertisers opportunities not met with in connection with any other Journal in the district.

Circulating as it does through an extensive Agricultural centre, Seed Merchants, Manufacturers of Agricultural Implements, Manures, Feeding Stuffs, etc., will find the *Advertiser* the best medium for bringing their various articles and manufactures before the public.

Auctioneers, Surveyors, Land Agents, etc., will obtain, by means of the *Advertiser*, far greater publicity for their announcements than through any other Journal circulating in this wide and important district.

To those in want of domestic servants, or servants seeking situations, no better medium is offered than the *Advertiser*.

As a General Advertising Medium the *Andover Advertiser* is the best, and without it no announcement can receive full publicity.

All Communications to be addressed to the Proprietor,

J. C. HOLMES,

HIGH STREET, ANDOVER.

"FOR LASSIE'S SAKE."

Handsomely Bound Cloth, Gilt Edges, Published at 3s. 6d.

A NEW NOVEL by a NEW AUTHOR. Every WOMAN should read it.

It is at that light woman's figure that I wonder you to be! the sun and its details are in moderation. She is leaning against an open window gazing away beyond it at the sleeping down the trees and the hills away far away in a land not visible to any one but herself. Not a sound, not a word of rumour and shadows, and a ruling wind judging from the expression of her face. Not shall I tell you that I think she is looking at? And what the sun is always shining. She can see the sunshine though the others then they pass through the shadowed wood and music in the narrow streets, say that it is not so but the sun is sinking away and the night shadows are creeping in closer and closer and the cold dune in which the ground and in their darkness they dimble and fall. But this woman, with her sweet, strong face has passed through the darkest woods, men climbed up the steepest ways and where others were gone stumbling and falling, in the darkness he has given an upward look, and seen one glimpse of blue sky with a glimmer of sun, feeling its tory of light above and the path has been brighter, and the brambles near turned aside, and the hill is a foot, and the stones like sheep after that place. What a strong face it is, with all its gentle rest! Does it mark the strong curves of the mouth with its happy, tender, tender? Not pretty! not exactly, but a something in the face that draws people to her, and in the eyes of the many who love her she is very beautiful.

"Well, what's your name, and this little one?" stroking a foxen head beside him, whilst the owner if it survived him gravely out of her big grey eyes. "I'm Laddie and she's Lassie. The five and she's our my old name is Edward Richard Beaumont and Lassie is Lassie, tell Stanley your name!" a dictatorial voice, followed with a slight pause by a younger voice, who spoke out in a high key "Dorothy Beaumont."

"We've one sister and two brothers," replied the Laddie.

"Big ones—put in Lassie from the central eye. There's Phil—continued Laddie, he comes next me and George, he's twelve, then there's Daisy—she's fifteen—wful old—and never and never looks after us all!"

"Laddie! where does our bank do? he'll be five!" inquired Lassie—who had been disengaged for the first time, and was now stirring up the mud and water with the end of her willow.

"I spec' they've got homes just like me," said Laddie. "I saw two little baby ones go by just now. Lassie, they might have been you and me!"

"I can't like a fish!"—indignantly—"I can't dot a little wiggly body. I must fatter!" glancing down at her sturdy legs.

Then her curiosity got the better of her indignation.

"Hulsey! mine was dem! I addie," she asked. "No! they was quite alone. I think they'd been to school."

"Did y'speak, I addie?"

Now Laddie was a strictly truthful boy as a rule, but in this case his imagination clearly ran away with him for, gravely wagging his head, he said, "I did mind I'm not quite sure, Lassie, but I think I heard them say something about bread pellet and going to fill their mummies. I shouldn't wonder if actually 'if the mummies and jays come so on'."

"If a strange man is speaking half decently, that a man should give so much to possess that small thing, that all his hopes and ambitions that he has been toiling and striving after all those years should sink away into oblivion beside this one ray of sunshine that man may stand with the scales of life in his hand and on one end place his lot in his work his struggles, his gain, and his lot and his future and weighed against his lot in love where is it all? The bid me in a quiet, and the true faces of the man and shone in his face, 'I wonder if you ever feel like that ready to give up everything that hitherto you have considered as life, just for love?' Look at me! I see I'm taking her hands in his, and gazing so intently into the eyes that looked half fearfully into his. No! he said dropping the hands, and burying his face in his hands, 'I cannot read it there. I cannot! Tell me, Lassie, tell me!' He spoke quickly and hurriedly. He said he could not read, but in that half-shrinking girl he had seen the brighten of a child that he had seen and heard that which it could not comprehend and the man waited tensely for her to speak.

The child opened the door a little wider, and Lassie stepped in. What a scene it was that met her eye! At one end of the low, squashed room was a bed, upon which the dead woman in was laid out, in the last sleep of death. The hard, care-worn face had a painful expression on it that Lassie had never seen there in life, and the thin wasted hands were folded across her breast, with a bunch of wild flowers placed between them.

But it was not the sight of death that struck such grief to Lassie's heart as the misery of the life around her. At the foot of the bed crouched the figure of a girl about her own age, whose white, grief-stained face was turned pitifully up to that of the dead woman's, and whose form was shaken with the heavy sobs that found no relief in tears.

Joe drew back a moment half appalled by her last words, then drawing her to him, he said, "Yes, I promise, Lassie. I have great faith in you, but you do not seem to think there is any fear of your doubting my love!"
